SWITZERLAND, with 59 Maps, 13 Plans, and 11 Panoramas.
Nineteenth Edition. 1901. 8 marks.

CONVERSATION DICTIONARY, in four languages. 3 marks.

MANUAL OF CONVERSATION, in four languages. 3 marks.
THE UNITED STATES
The Handbook to the United States, undertaken in response to repeated requests from British and American tourists, is intended to help the traveller in planning his tour and disposing of his time to the best advantage and thus to enable him the more thoroughly to enjoy and appreciate the objects of interest he meets with. The writer is Mr. J. F. Muirhead, M.A., who has for several years taken part in the English editions of Baedeker's Handbooks, and has personally visited the greater part of the districts described.

The vast extent and rapidly changing conditions of the United States make the production of a satisfactory guidebook a peculiarly difficult task; but for its improvement the Editor confidently and gratefully looks forward to a continuance of those valuable corrections and suggestions with which travellers have long been in the habit of favouring him.

In the preparation of the Handbook the Editor has received most material aid from friends in all parts of the United States, so many in number as to preclude an enumeration of their names. In particular he wishes to express his obligations to the superior officials of the leading Railway Companies, who have been, almost without exception, uniformly courteous and helpful; to many officials of the Federal and State Governments; to the keepers of the most important libraries, museums, and galleries of art; to the officials of the Appalachian Mountain Club; and to the professors of numerous universities and colleges.

It is hoped that the various monographs of the Introduction, though sometimes going beyond the recognized functions of a guidebook, will be found of material value to the tourist. Each has been written by an undoubted authority on the subject of which it treats; and their general aim is to enable the traveller who studies them to give an intelligent appreciation to the political, social, industrial, and physical aspects of a great country that is much less accurately known by the average European than its importance warrants.

On the Maps and Plans the Editor has bestowed especial care; and it is believed that in this respect the Handbook is more completely equipped than any other publication of the
kind relating to the United States. Such merit as they possess is largely due to the kind and efficient cooperation of Mr. Henry Gannett, Chief Topographer of the United States Geological Survey.

When not otherwise indicated, the populations are those of the national census of 1890; but wherever a State census has made more recent figures available, these have been preferred.

Hotels. The Editor has endeavoured to enumerate not only the first-class hotels, but also the more deserving of the cheaper houses. The comfort of an American hotel is, however, much more likely to be in the direct ratio of its charges than is the case in Europe (comp. p. xxvi). Although changes frequently take place, and prices generally have an upward tendency, the average charges stated in the Handbook will enable the traveller to form a fair estimate of his expenditure. The value of the asterisks, which are used as marks of commendation, is relative only, signifying that the houses are good of their kind.

To hotel-proprietors, tradesmen, and others the Editor begs to intimate that a character for fair dealing and courtesy towards travellers forms the sole passport to his commendation, and that advertisements of every kind are strictly excluded from his Handbooks. Hotel-keepers are also warned against persons representing themselves as agents for Baedeker's Handbooks.

Abbreviations.

R. = Room; B. = Breakfast; D. = Dinner; L. = Luncheon.
— N. = North, Northern, etc.; S. = South, etc.; E. = East, etc.;
W. = West, etc. — M. = English (or American) Mile; ft. = Engl. foot; min. = minute; hr. = hour. — Ho. = House; Ave. = Avenue; St. = Street; R.R. = railroad; Mt. = Mountain. — U.S. = United States.

The letter d with a date, after the name of a person, indicates the year of his death. — The number of feet given after the name of a place shows its height above the sea-level. — The number of miles placed before the principal places on railway-routes indicates their distance from the starting-point of the route.

Asterisks are used as marks of commendation.

Plans.

INTRODUCTION.

Money. The currency of the United States is arranged on a
decimal system, of which the dollar ($), divided into 100 cents
(c.), is the unit. The Gold coins are the pieces of $1, $21/2, $5,
$10, and $20. The Silver coins are the dollar, half-dollar, quarter
dollar (=1 s.), and 'dime' (10 c.). The 5 c. piece or 'nickel' is
made of Nickel (silver 5 c. pieces still occasionally seen), and there
are Bronze pieces of 1 c. (1/2d.) and 2c. (1d.). The 3c. piece
(nickel) is no longer coined. The U. S. Paper Currency consists of
Gold Notes (of the denomination of $20, $50, $100, $500, $1000,
$5000, and $10,000), United States Notes ('greenbacks'), U. S.
Treasury Notes, and Silver Certificates. The last three are issued
for $1, $2, $5, $10, $20, $50, $100, $500, and $1000. All
are redeemable at par. The National Bank Bills (from $5 to $1000)
are also universally current. Throughout nearly the whole of the
country notes are much more common than coins for all sums of
$1 and upwards; but in California gold and silver are in almost
exclusive use. For practical purposes the dollar may be reckoned
as 4s. and $5 as 1L; but the actual rate of exchange for 1L is gen-
crally between $4.80 and $4.90 (or $1 = about 4s. 2d.).

The European visitor to the United States will find it con-
venient to carry his money in the form of letters of credit, or cir-
cular notes, which are readily procurable at the principal banks.
Foreign money does not circulate in the United States, even the
Canadian coins of exactly the same form and value as American
coins being generally refused; but Bank of England notes are
usually taken at their full value at the hotels of all the larger
cities. — Post Office Orders (see p. xxviii) are not convenient for
strangers, as evidence of identity is generally required before pay-
ment, though this may be waived by the remitter, but most of the
large Express Companies (see pp. xxviii, 15) issue Money Orders
that are cashed at sight in the same way as Post Office Orders in
Great Britain. The cheques of the Cheque Bank are also convenient.

Expenses. The expenses of a visit to the United States depend,
of course, on the habits and tastes of the traveller, but are almost
inevitably from one-fourth to one-third higher than those of
European travel. The distances to be traversed are so great that
railway-fares are sure to be absolutely, even when not relatively,
higher (comp. p. xxi); and comfortable hotels of the second or
third class are comparatively rare. Persons of moderate require-
ments, however, by frequenting boarding-houses instead of hotels
and avoiding carriage-hire as much as possible, may travel comfort-
ably (exclusive of long continuous journeys) for $5–7½ (20–30 s.)

Baedeker's United States. 2nd Edit.
I. TIME.

a day; but it would be safer to reckon on a daily expenditure of at least $10 (2l.). An entire day (24 hrs.) spent on the train (i.e. a journey of 500-800 M.) costs, with Pullman car accommodation and meals, about $20 (4l.). The cost of living varies considerably in different parts of the country; and New York, where most visitors land, is one of the most expensive cities in America. Comp. pp. xxvi, 9.

Passports, though not necessary in the United States, may be useful in procuring delivery of registered and poste restante letters.

Custom House. The custom-house examination of the luggage of travellers entering the United States is generally conducted courteously but often with considerable minuteness. Nothing is admitted free of duty except the personal effects of the traveller, and unusually liberal supplies of unworn clothing are apt to be regarded with considerable suspicion. Residents of the United States may not introduce free clothing or other personal effects purchased abroad of a greater total value than $100. The traveller should be careful to 'declare' everything he has of a dutiable nature, as otherwise it is liable to summary confiscation (comp. p. xix).

Time. For the convenience of railways and others a Standard of Time for the United States was agreed upon in 1883, and a system adopted by which the country was divided into four sections, each of 15° of longitude (1 hr.). Eastern Time, or that of the 75th Meridian, prevails from the Atlantic Coast to a line running through Detroit, Buffalo, Pittsburg, and Charleston. Central Time (of Meridian 90), 1 hr. slower, extends thence to a line running from Bismarck (N.D.) to the mouth of the Rio Grande. Mountain Time (105° lon.) extends to the W. borders of Idaho, Utah, and Arizona. Pacific Time (120°) covers the rest of the country. Thus noon at New York is 11 a.m. at Chicago, 10 a.m. at Denver, and 9 a.m. at San Francisco. True local or mean solar time may be anywhere from 1 min. to 30 min. ahead or behind the standard time. In some cases, where the local clocks keep true time and the railway clocks keep standard time, the results are confusing; but the new system is a vast improvement on the former multiplicity of standards, and railway time, except near the dividing lines, is now universally employed locally.

II. Voyage from Europe to the United States.

The chief routes from Europe to the United States are indicated in R. 1 (comp. also p. 6); and the steamers of any of the companies there mentioned afford comfortable accommodation and speedy transit. The fares vary considerably according to season and the character of the vessel; but the extremes for a saloon-passage may be placed at $50 (10l.) and $500 (100l.), the latter sum securing a suite of deck-rooms on the largest, finest, and quickest boats in the service. The average rate for a good stateroom in a good
III. RAILWAYS.

steamer may be reckoned at $75-125 (15-25l.). The intermediate or second cabin costs $30-65 (6-13l.), the steerage $20-30 (4-6l.). The slowest steamers, as a general rule, have the lowest fares; and for those who do not object to a prolongation of the voyage they often offer as much comfort as the 'ocean greyhounds.'

The average duration of the passage across the Atlantic is 6-9 days. Passengers should pack clothing and other necessaries for the voyage in small flat boxes (*not* portmanteaus), such as can lie easily in the cabin, as all bulky luggage is stowed away in the hold. Stateroom trunks should not exceed 3 ft. in length, 1½-2 ft. in breadth, and 15 inches in height. Trunks not wanted on board should be marked 'Hold' or 'Not Wanted,' the others 'Cabin' or 'Wanted.' The steamship companies generally provide labels for this purpose. Dress for the voyage should be of a plain and serviceable description, and it is advisable, even in midsummer, to be provided with warm clothing. A deck-chair, which may be purchased or hired (4½) before sailing, is a luxury that may almost be called a necessary. If bought, it should be distinctly marked with the owner's name or initials, and may be left in charge of the Steamship Co.'s agents until the return-journey. On going on board, the traveller should apply to the purser or chief steward for a seat at table, as the same seats are retained throughout the voyage. It is usual to give a fee of 10s. (2½ dollars) to the table-steward and to the stateroom-steward, and small gratuities are also expected by the boot-cleaner, the bath-steward, etc. The stateroom steward should not be 'tipped' until he has brought all the passenger's small baggage safely on to the landing-stage. — Landing at New York, see pp. 3, 6.

The custom-house officer usually boards vessels at the Quarantine Station (see p. 2) and furnishes blank forms on which the passengers 'declare' any dutiable articles they may have in their trunks. The luggage is examined in the covered hall adjoining the wharf, where it is arranged as far as possible in alphabetical order by the initials of the owners' names (comp. p. 6). After the examination the traveller may hire a carriage to take himself and his baggage to his destination, or he may send his trunks by a transfer-agent or express man (see p. xxii) and go himself on foot or by tramway. Telegraph messengers and representatives of hotels also meet the steamers.

Railways. The United States now contain about 185,000 M. of railway, or nearly as much as all the rest of the world put together. The lines are all in private hands, and the capital invested in them amounts to about $11,000,000,000 (2,200,000,000 l.). Nearly 50 corporations report over 1000 M. of track each, while the Chicago & North Western System alone operates almost 8000 M. The total number of employees is not far short of 900,000. The railway mileage per 1 sq. M. of surface varies in the different states from about 3/10 M. in New Jersey and Massachusetts to about 1/12 M. in Nevada, Illinois has about 10,500 M. of railway, Rhode Island about 220 M. In 1896 the number of passengers carried was 511,772,737 and the average distance travelled by each was about 25 M.

The equipments of American railways are, as is well known, very different from those of European railways. Instead of comparatively small coaches, divided into compartments holding 6-8 people each, the American railways have long cars (like an enlarged tramway-car), holding 60-70 pers., entered by doors at each end, and having a longitudinal passage down the middle, with the seats on each side of it. Each seat has room for
III. RAILWAYS.

two passengers. Local and short-distance trains, especially in the East,
genерally have one class of carriage only, but all long-distance trains are
also furnished with drawing-room (parlor) cars by day and sleeping-cars
at night, which accommodate about 24-30 people in the same space as the
ordinary cars and are in every way much more comfortable. Second-class
and emigrant carriages are also found on some long-distance trains and in
parts of the South and West, but scarcely concern the tourist. Smoking
is not permitted except in the cars ('Smokers') specially provided for
the purpose and generally found at the forward end of the train. Smoking
compartments are also usually found in the parlor-cars. The parlor and sleeping
cars are generally the property of special corporations, of which the Pullman
and Wagner Palace Car Companies are the chief; but on a few railways they
belong to the railway-company itself. The vexed question of whether the
American or the European railway-carriage is the more comfortable is hard
to decide. It may be said generally, however, that the small compartment
system would never have done for the long journeys of America, while the
parlor-cars certainly offer greater comfort in proportion to their expense than
the European first-class carriages do. A Limited Vestibuled Train, such as that
described at p. 305, comes measurably near the ideal of comfortable railway
travelling, and reduces to a minimum the bodily discomfort and tedium of
long railway-journeys. In comparing the ordinary American car with the
second-class or the best third-class carriages of Europe, some travellers
may be inclined to give the preference for short journeys to the latter.
The seats in the American cars offer very limited room for two persons,
and their backs are too low to afford any support to the head; a single
crying infant or spoiled child annoys 60-70 persons instead of the few in
one compartment; the passenger has little control over his window, as
someone in the car is sure to object if he opens it; the window opens
upward instead of downward; the continual opening and shutting of the
doors, with the consequent draughts, are annoying; the incessant visi-
tation of the train-boy, with his books, candy, and other articles for sale,
renders a quiet nap almost impossible; while, in the event of an accident,
there are only two exits for 60 people instead of six or eight. On the
other hand the liberty of moving about the car, or, in fact, from end
to end of the train, the toilet accommodation, and the amusement of
watching one's fellow-passengers greatly mitigate the tedium of a long
journey; while the publicity prevents any risk of the railway crimes
sometimes perpetrated in the separate compartments of the European
system. Rugs, as a rule, are not necessary, as the cars are apt to be over,
rather than under, heated. Little accommodation is provided in the way
of luggage-racks, so that travellers should reduce their hand-baggage to
the smallest possible dimensions. — In the sleeping-car the passenger en-
gages a Half-Section, consisting of a so-called 'double berth', which, how-
ever, is rarely used by more than one person. If desirous of more air and
space, he may engage a whole Section (at double the rate of a half-
section), but in many cases a passenger is not allowed to monopolize a
whole section to the exclusion of those not otherwise able to find accom-
modation. Parties of 2-4 may secure Drawing Rooms, or private compart-
ments. A lower berth is generally considered preferable to an upper
berth, as it is easier to get into and commands the window; but, by what
seems a somewhat illiberal regulation of the sleeping-car companies, the
upper berth is always let down, whether occupied or not, unless the whole
section is paid for. So far nothing has been done towards reserving a
special part of the car for ladies, except in the shape of a small toilette
and dressing room. — Dining Cars are often attached to long-distance
trains, and the meals and service upon them are generally better than those
of the railway-restaurants. The charge for a meal is usually $1, some-
times 75¢. In the few instances where the à la carte system is in vogue,
the prices are comparatively high; and this is also true of refreshments
furnished from the buffets of sleeping or parlor cars. — Tickets are
collected on the train by the Conductor (guard), who sometimes gives
counter-checks in exchange for them. Separate tickets are issued for
the seats in parlor-cars and the berths in sleeping-cars; and such cars
III. RAILWAYS.

generally have special conductors. Fees are never given except to the coloured Porters of the parlor-cars, who brush the traveller's clothes and (on overnight journeys) boots and expect about 25c. a day. In America the traveller is left to rely upon his own common sense still more freely than in England, and no attempt is made to take care of him in the patriarchal fashion of Continental railways. He should, therefore, be careful to see that he is in his proper car, etc. The conductor calls 'all aboard', when the train is about to start, but on many lines no warning bell is rung. The names of the places passed are often not shown distinctly (sometimes not at all) at the stations, and the brakeman, whose duty it is to announce each station as the train reaches it, is apt to be entirely unintelligible. A special word of caution may be given as to the frequent necessity for crossing the tracks, as the rails are often flush with the floor of the station and foot-bridges or tunnels are rarely provided. Each locomotive carries a large bell, which is tolled as it approaches stations or level ('grade') crossings. — With the exception of the main line trains in the Eastern States, the speed of American trains is generally lower than that of English trains; and over a large portion of the South and West it does not exceed 20-25 M. per hour even for through-trains.

Fares vary so much in different parts of the country, that it is difficult to state an average. Perhaps 3-4 c. (1½-2 d.) per mile will be found nearly correct on the whole, though in E. states the rate is frequently lower, especially for season, 'commutation' (good for so many trips), or mileage tickets, while in the S. and W. 4 c. is often exceeded. The extra rate for the palace-cars (½-1 c. per mile) is low as compared with the difference between the first and third class fares in England, and the extra comfort afforded is very great. Return-tickets ('excursion' or 'round trip' tickets) are usually issued at considerable reductions (comp. also p. xxv). The 1000 M. Tickets, from which the conductor collects coupons representing the number of miles travelled, is a convenient arrangement which European railways might do well to imitate. A distinction is frequently made between 'Limited' and 'Unlimited' tickets, the former and cheaper admitting of continuous passage only, without 'stopovers'; and the latter being available until used and admitting of 'stopovers' at any place on the route. Tickets may sometimes be obtained at lower than the regulation rates at the offices of the so-called 'Scalpers', found in all large towns; but the stranger should hardly attempt to deal with them unless aided by a friendly expert. In some states their business is illegal. Railway-fares change more frequently in the United States than in Europe, so that the continued accuracy of those given throughout the Handbook cannot be guaranteed. — At the railway-stations the place of the first, second, and third class waiting-rooms of Europe is taken by a Ladies' Room, to which men are also generally admitted if not smoking, and a Men's Room, in which smoking is often permitted.

Among the American Railway Terms with which the traveller should be familiar (in addition to those already incidentally mentioned) are the following. Railroad is generally used instead of railway (the latter term being more often applied to street-railways, i.e. tramways), while the word 'Road' alone is often used to mean railroad. The carriages are called Cars. The Conductor (often addressed as 'Captain' in the South and West) is aided by Brakemen, whose duties include attention to the heating and lighting of the cars. A slow train is called an Accommodation or Way Train. The Ticket Office is never called booking-office. Luggage is Baggage, and is expedited through the Baggage Master (see p. xxii). Depot is very commonly used instead of station, and in many places the latter word, when used alone, means police-station. Other terms in common use are: turn-out = siding; bumper = buffer; box-car = closed goods car; caboose = guard's van; freight-train = goods train; cars = train; to pull out = to start; way station = small, wayside station; cow-catcher = fender in front of engine; switch = shunt; switches = points.

The railway-system of the United States is so vast that it is impracticable to produce such complete Railway Guides as those of European countries. The fullest is the Travellers' Official Guide, a bulky volume
of 8-900 pp., published monthly at New York (50 c.). Other general monthly guides are Rand-McNally's (40 c.) and Appleton's (20 c.). Local collections of time-tables are everywhere procurable, and those of each railway-company may be obtained gratis at the ticket-office and in hotels. All the more important railway-companies publish a mass of 'folders' and descriptive pamphlets, which are distributed gratis and give a great deal of information about the country traversed. These are often very skilfully prepared and well illustrated.

Luggage. Each passenger on an American railway is generally entitled to 150 lbs. of luggage ('baggage') free; but overweight, unless exorbitant, is seldom charged for. The so-called Check System makes the management of luggage very simple. On arrival at the station the traveller shows his railway-ticket and hands over his impedimenta to the Baggage Master, who fastens a small numbered tag, made of brass or cardboard, to each article and gives the passenger brass or cardboard 'checks' with corresponding numbers. The railway-company then becomes responsible for the luggage and holds it until reclaimed at the passenger's destination by the presentation of the duplicate check. As the train approaches the larger cities, a Transfer Agent usually walks through the cars, undertaking the delivery of luggage and giving receipts in exchange for the checks. The charge for this is usually 25 c. per package, and it is thus more economical (though a composition may sometimes be effected for a number of articles) to have one large trunk instead of two or three smaller ones. The hotel-porters who meet the train will also take the traveller's checks and see that his baggage is delivered at the hotel. In starting, the trunks may be sent to the railway-station in the same way, either through a transfer agent or the hotel-porter; and if the traveller already has his railway-ticket they may be checked through from the house or hotel to his destination, even though that be at the other side of the continent, 3000 M. away. Baggage, unaccompanied by its owner, may be sent to any part of the country by the Express Companies (comp. p. 15), which charge in proportion to weight and distance. The drawbacks to the transfer system are that the baggage must usually be ready to be called for before the traveller himself requires to start, and that sometimes (especially in New York) a little delay may take place in its delivery; but this may, of course, be avoided by the more expensive plan of using a carriage between the house and railway-station.

Steamers. Some of the American steamers, such as the Fall River and Hudson boats (pp. 74, 161), offer comforts and luxuries such as are scarcely known in Europe, and their fares are usually moderate. Where the fare does not include a separate stateroom, the traveller by night will find the extra expenditure for one ($1-2) more than compensated. Meals are sometimes included in the fare and are sometimes served either à la carte or at a fixed price. Throughout the Handbook the traveller will find indicated the routes on which he may advantageously prefer the steamer to the railway.

Coaches, usually called Stages, and in some country-places Barges, have now been replaced by railways throughout nearly the whole of the United States, but in places like the Yosemite (p. 506), the Yellowstone (p. 427), and some of the other mountainous and rural districts the traveller is still dependent on this mode of conveyance. The roads are generally so bad, that the delights of coaching as known in England are for the most part conspicuously absent. The speed seldom exceeds 6 M. an hour and is sometimes less than this. The fares are relatively high.

Carriages. Carriage-hire is very high in the United States in
IV. PLAN OF TOUR.

spite of the fact that both the price of horses and their keep are usually lower than in England. Fares vary so much that it is impossible to give any general approximation, but they are rarely less than twice as high as in Europe. When the traveller drives himself in a 'buggy' or other small carriage, the rates are relatively much lower.

Electric Tramways. Most of the cities of the United States now possess excellent systems of electric tramways, which enable the tourist to visit all the points of interest, urban and suburban, at a minimum expenditure of time and money.

IV. Plan of Tour.

The plan of tour must depend entirely on the traveller's taste and the time he has at his disposal. It is manifestly impossible to cover more than a limited section of so vast a territory in an ordinary travelling season; but the enormous distances are practically much diminished by the comfortable arrangements for travelling at night (comp. p. xx). Among the grandest natural features of the country, one or other of which should certainly be visited if in any wise practicable, are Niagara Falls (R. 29), the Yellowstone Park (R. 85), the Yosemite Valley (R. 102), Alaska (R. 106), and the Grand Cañon of the Colorado (p. 466). Along with these may be mentioned the cañons, mountains, and fantastic rocks of Colorado (RR. 93, 94), the grand isolated snow-covered volcanic cones of the Pacific coast (pp. 426, 446, 514, etc.), the Mammoth Cave of Kentucky (p. 356), the Cavern of Luray (p. 379), the Natural Bridge of Virginia (p. 380), and the Shoshone Falls (p. 444). Among the most easily accessible regions of fine scenery are the Adirondacks (R. 25), including the Ausable Chasm (p. 187), the White Mts. (R. 16), the Catskills (R. 24), Mt. Desert (R. 11), the Hudson (R. 21), and the Delaware Water Gap (p. 215). Visitors to the S., besides the climate and vegetation, will find much to repay them, especially in such quaint old cities as New Orleans (R. 83). California (RR. 95-104) abounds in objects of interest and beauty. The trip into Mexico (RR. 107-111) is well worth the making. Travellers who make the trip to the Pacific Coast and back will do well so to plan their journey as to include the wonderful scenery of the Denver & Rio Grande Railroad (R. 94), as well as a trip into the Yellowstone Park, while the W. part of the Canadian Pacific Railway, between Vancouver and Banff (about 600 M.; see Baedeker's Canada), offers the grandest railway scenery in North America. Most of the larger cities have their own special points of interest, and a visit to the national capital (p. 275) should by all means be made.

Where the territory included is so vast and the possible combinations of tours so endless, it may seem almost useless to attempt to draw up any specimen tours. The following, however, though not intrinsically better than hundreds of others, may serve to give the traveller some idea
IV. PLAN OF TOUR.

of the distances to be traversed and of the average expenses of locomotion. It is, perhaps, needless to say that the traveller will enjoy himself better if he content himself with a less rapid rate of progress than that here indicated. A daily outlay of $10-12 will probably cover all the regular travelling expenses on the under-noted tours; and this rate may be much diminished by longer halts.

a. A Week from New York.
(Railway Expenses about $40.)

<table>
<thead>
<tr>

</table>

The following table of the distances from New York of a few important points, together with the present railway fares and approximate length of the journey, may not be without interest. The fares are for first-class, "limited" tickets, but do not include sleeping-car rates.

**San Francisco:** distance 3500 M.; fare $75-82; time of transit 41½-5½ days.

**Excursion Agents.** Travellers may sometimes find it advantageous to avail themselves of the facilities for tours in the United States offered by Messrs. Raymond & Whitcomb (296 Washington St., Boston, and 31 E. 14th St., New York), Thomas Cook & Son (261 and 1225 Broadway, New York), and H. Gaze & Sons (113 Broadway, New York). These firms have agencies in all the most frequented resorts throughout the country. Raymond & Whitcomb arrange for a large series of excursions in special vestibuled trains, under the care of one of their representatives, which relieve the inexperienced traveller of almost all the inconveniences of a journey in a strange land. The arrangements are made so as to afford the widest possible freedom of movement in every way, and the charges are reasonable. For the Raymond trip into Mexico, see p. 537. — Most of the railway-companies issue tickets for circular tours on favourable conditions, and some of them (such as the Pennsylvania R.R. and the Burlington Route) also arrange personally conducted excursions in special trains.

The Pedestrian is unquestionably the most independent of travellers, but, except in a few districts such as the Adirondacks (p. 183) and the White Mts. (p. 134), walking tours are not much in vogue in the United States, where, indeed, the extremes of temperature and the scarcity of well-marked footpaths often offer considerable obstacles. For a short tour a couple of flannel shirts, a pair of worsted stockings, slippers, the articles of the toilet, a light waterproof, and a stout umbrella will generally be found a sufficient equipment. Strong and well-tried boots are essential to comfort. Heavy and complicated knapsacks should be avoided; a light pouch or game-bag is far less irksome, and its position may be shifted at pleasure. A more extensive reserve of clothing should not exceed the limits of a small portmanteau, which may be forwarded from town to town by express.
V. Hotels.

Hotels. The quality of the hotels of the United States varies very greatly in different localities; but it is, perhaps, safe to say that the best American houses will be found fully as comfortable as the first-class hotels of Europe by all who can accommodate themselves to the manners of the country and do not demand everything precisely as they have been used to it at home. The luxury of some of the leading American hotels is, indeed, seldom paralleled in Europe. The charges are little, if at all, higher than those of the best European houses; but the comforts often afforded by the smaller and less pretentious inns of the old country can seldom be looked for from American houses of the second or third class, and the traveller who wishes to economize will find boarding-houses (see p. xxvii) preferable. When ladies are of the party, it is advisable to frequent the best hotels only. The hotels of the South, except where built and managed by Northern enterprise, are apt to be poor and (in proportion to their accommodation) dear; many of the hotels in the West, on the other hand, even in the newest cities, are astonishingly good, and California contains some of the best and cheapest hotels in the United States. The food is generally abundant and of good quality, though the cuisine is unequal (comp. p. xxvii). Beds are almost uniformly excellent. The quality of the service varies.

A distinction is made between Hotels on the American Plan, in which a fixed charge is made per day for board and lodging, and Hotels on the European Plan, in which a fixed charge is made for rooms only, while meals are taken à la carte either in the hotel or elsewhere. No separate charge is made for service. The European system is becoming more and more common in the larger cities, especially in the East; but the American plan is universal in the smaller towns and country-districts. Many hotels in the large cities offer a choice of systems. The rate of hotels on the American plan varies from about $5 per day in the best houses down to $2 per day or even less in the smaller towns; and $3-4 a day will probably be found about the average rate on an ordinary tour. The charge for a room at a good hotel on the European plan is from $1 upwards. Many of the American hotels vary their rate according to the room, and where two prices are mentioned in the Handbook the traveller should indicate the rate he wishes to pay. Most of the objections to rooms on the upper floor are obviated by the excellent service of 'elevators' (lifts). Very large reductions are made by the week or for two persons occupying the same room; and very much higher prices may be paid for extra accommodation. Throughout the Handbook the insertion of a price behind the name of a hotel ($5) means its rate on the American plan; where the hotel is on the European plan (exclusively or alternatively) the price of the room is indicated (fr. from $1). The above rates include all the ordinary requirements of hotel-life, and no 'extras' appear in the bill. The custom of giving fees to the servants is by no means so general as in Europe, though it is becoming more common in the Eastern States. Even there, however, it is practically confined to a small gratuity to the porter and, if the stay is prolonged, an occasional 'refreshers' to the regular waiter. In hotels on the American system the meals are usually served at regular hours (a latitude of about 2 hrs. being allowed for each). The daily charge is considered as made up of four items (room, breakfast, dinner, and supper), and the visitor should see that his bill begins with the first meal he takes. Thus, at a $4 a day house, if the traveller arrives before supper and leaves after breakfast the next day, his bill will be
§3; if he arrives after supper and leaves at the same time, §2; and so on. No allowance is made for absence from meals. Dinner is usually served in the middle of the day, except in large cities.

On reaching the hotel, the traveller enters the Office, a large and often comfortably fitted-up apartment, used as a general rendezvous and smoking-room, not only by the hotel-guests, but often also by local residents. On one side of it is the desk of the Hotel Clerk, who keeps the keys of the bedrooms, supplies unlimited letter-paper gratis, and is supposed to be more or less omniscient on all points on which the traveller is likely to require information. Here the visitor enters his name in the ‘register’ kept for the purpose, and has his room assigned to him by the clerk, who details a ‘bell-boy’ to show him the way to his room and carry up his hand-baggage. If he has not already disposed of his ‘baggage-checks’ in the way described at p. xxii, he should now give them to the clerk and ask to have his trunks fetched from the station and sent up to his room. If he has already parted with his checks, he identifies his baggage in the hall when it arrives and tells the head-porter what room he wishes it sent to. On entering the dining-room the visitor is shown to his seat by the head-waiter, instead of selecting the first vacant seat that suits his fancy. The table-waiter then hands the guest the menu of the day, from which (in hotels on the American plan) he orders what he chooses. Many Americans order the whole of their meals at once, but this is by no means necessary except in primitive localities or inferior hotels. The key of the bedroom should always be left at the office when the visitor goes out. Guests do not leave their boots at the bedroom door to be blacked as in Europe (except in the first-class houses), but will find a ‘boot-black’ in the toilette-room (fee 10 c.; elsewhere 5 c.). Large American hotels also generally contain a barber’s shop (shave 20-25 c.; elsewhere 15 c.), railway-ticket, express, telegraph, telephone, messenger-service, type-writing, theatrical, and livery offices, book-stalls, etc.

The following hints may be useful to hotel-keepers who wish to meet the tastes of European visitors. The wash-basins in the bedrooms should be much larger than is generally the case. Two or three large towels are preferable to the half-dozen small ones usually provided. A carafe or jug of fresh drinking water (not necessarily iced) and a tumbler should always be kept in each bedroom. If it were possible to give baths more easily and cheaply, it would be a great boon to English visitors. At present a bath attached to a bedroom costs $1 (4s.) a day extra, while the charge for using the public bathroom is usually 35-75 c. (1s. 6d.-3s.). No hotel can be considered first-class or receive an asterisk of commendation which refuses to supply food to travellers who are prevented from appearing at the regular meal hours.

Boarding Houses. For a stay of more than a day or two the visitor will sometimes find it convenient and more economical to live at a Boarding House. These abound everywhere and can easily be found on enquiry. Their rates vary from about $8 a week upwards. At many places the keepers of such houses also receive transient guests, and they are generally preferable to inferior hotels.

— Furnished Rooms are easily procured in the larger cities, from $4-5 a week upwards (comp. p. 9). Soap, curiously enough, though provided in hotels, is not provided in boarding-houses or lodgings.

Restaurants. In New York and other large cities the traveller will find many excellent restaurants, but in other places he will do well to take his meals at his hotel or boarding-house. Restaurants are attached to all hotels on the European plan (p. xxvi). A single traveller will generally find the à la carte restaurants rather expensive, but one portion will usually be found enough for two guests
and two portions ample for three. The table d'hôte restaurants, on the
other hand, often give excellent value for their charges (comp. p. 9).

Soup, fish, poultry, game, and sweet dishes are generally good; but the
beef and mutton are often inferior to those of England. Oysters, served
in a great variety of styles, are large, plentiful, and comparatively cheap.
In America wine or beer is much less frequently drunk at meals than
in Europe, and the visitor is not expected to order liquor 'for the good
of the house'. Iced water is the universal beverage, and a cup of tea or
coffee is included in all meals at a fixed price. Wine is generally poor
or dear, and often both. It is much to be regretted that, outside of Cali-
ifornia, the native vintages, which are often superior to the cheap imported
wines, seldom appear on the wine-list; and travellers will do good service
by making a point of demanding Californian wines and expressing surprise
when they cannot be furnished. Liquors of all kinds are sold at Saloons
(public houses) and Hotel Bars (comp. p. 10). Restaurants which solicit
the patronage of 'gents' should be avoided. The meals on dining-cars and
'buffet cars' are generally preferable to those at railway-restaurants.
Tipping the waiter is, perhaps, not so general as in Europe, but is usually
found serviceable where several meals are taken at the same place. Cafés,
in the European sense, are seldom found in the United States except in
New Orleans (p. 415) and a few other cities with a large French or German
element in the population. The name, however, is constantly used as the
equivalent of restaurant and is sometimes applied to first-class bar-rooms

VI. Post and Telegraph Offices.

Post Office. The regulations of the American postal service are
essentially similar to those of Great Britain, though the practice of
delivering letters at the houses of the addressees has not been system-
atically extended to the rural districts. The service is, perhaps, not
quite so prompt and accurate. The supply of letter-boxes is gen-
erally abundant, but the number of fully equipped post-offices is
much lower (proportionately) than in England. Stamps are sold at
all drug-stores and hotels, and often by letter-carriers.

All 'mailable' matter for transmission within the United States and to
Canada and Mexico is divided into four classes: 1st. Letters and all
Sealed Packets (rate of postage 2 c. per oz. or fraction thereof); 2nd. Newspapers and Periodicals (1 c. per 4 oz.); 3rd. Books, etc. (1 c. per 2 oz.);
4th. Merchandise and Samples (1 c. per oz.). Postal cards 1 c.; reply postal
cards 2 c. A 'special delivery stamp' (10 c.) affixed to a letter, in addition
to the ordinary postage, entitles it to immediate delivery by special mes-
senger within certain limits. Letters to countries in the Postal Union cost
5 c. per 1/2 oz., postal cards 2 c., books and newspapers 1 c. per 2 oz. The
Registration Fee is 6 c.; the stamp must be affixed to the letter before pre-
sentation for registration, and the name and address of the sender must
be written on the envelope. Undeliverable letters will be returned free to
the sender, if a request to that effect be written or printed on the envelope.

Domestic Money Orders are issued by money-order post-offices for any
amount up to $100, at the following rates: for sums not exceeding $2 1/2,
3 c.; $2 1/2-5, 5 c.; $5-10, 8 c.; $10-20, 10 c.; $20-30, 12 c.; $30-40, 15 c.;
$40-50, 18 c.; $50-60, 20 c.; $60-75, 25 c.; $75-100, 30 c. For strangers
these are not so convenient as the money-orders of the Express Companies
(comp. p. xvii), as identification of the payee is demanded, unless this is
specifically waived by the remitter. Foreign Money Orders cost 10 c. for
each $10.

Telegraph Offices. The telegraphs of the United States are
mainly in the hands of the Western Union Telegraph Co., with its
headquarters in New York (p. 14), and the service is neither so
cheap nor so prompt and trustworthy as that of Great Britain. At the
beginning of 1899 this company owned 189,847 M. of line and
874,420 M. of wire, while the number of despatches sent by it in
1898 was 62,173,749. The rates from New York are given at p. 15,
and from them may be roughly estimated the probable rates from
other parts of the country. — In 1897 the United States contained
536,845 M. of Telephone Wires, with 325,244 telephones (comp.
p. 15). Telephones are in operation in all large, and many of the
small, towns throughout the country.

VII. Glossary.

The following short list of words in frequent use in the United
States in a sense not commonly known in England may be found of
service. The speech of the cultivated American, of course, varies
little from the speech of the cultivated Englishman, and no mis-
understanding is likely to arise in their verbal intercourse; but it
will not unfrequently be found that railway-officials, cabmen, waiters,
and the like do not know what is meant by the British equivalents
of the following expressions. It must not be understood that the
under-noted words are all in use throughout the whole of the United
States. A New Englander, for instance, may tell you that 'he never
heard such a word', when you use a term in regular use by all
classes in the West or South. The list, which might be extended
indefinitely, does not attempt to enumerate the local names for dif-
f erent kinds of food, implements, etc.; nor does it mean to include
words that are solely and avowedly 'slang'. Purely technical terms
are also avoided. Comp. p. xxi (railway terms), p. xxvii, etc.

Bed-spread, coverlet, counterpane.
Biscuit, hot tea-rolls.
Bit (California and the South), 12½ c.
(two bits 25 c., eight bits $1).
Blind, shutter.
Block, rectangular mass of building
bounded by four streets.
Boots, used only of boots coming up
wholly or nearly to the knee. Comp.
Shoes and Ties.
Boss, master, head, person in authority.
Bowl, basin (set bowl, fixed in basin).
Bright, clever.
Broncho, native (Western) horse.
Bug, beetle, coleopterous insect of
any kind.
Bureau, chest of drawers.
Burro (California and the South
West), donkey.
Calico, printed cotton cloth.
Carom, cannon (at billiards).
Chore, odd job about a house done
by a man.
Chowder, a kind of thick fish soup.
City, corporate town or municipal
borough.

Clark, shopman.
Clever, good-natured.
Corn, Maize or Indian corn.
Cracker, biscuit; also, in the Southern
States, a poor white man.
Creek (pron. crick), a small stream.
Cunning, neat, pretty, tiny (mainly
of children or small pet animals).
Cute is often used in much the same
sense.
Cuspidor, spittoon.
Cutter, light, one-horse sleigh.
Deck, pack of cards (used by Shakes-
peare).
Dirt, earth, soil (e.g., a 'dirt tennis-
court').
Drummer, commercial traveller.
Dry Goods, dress materials, drap-
ery, etc.
Dumb, (often) stupid (Ger. dumm).
Elevator, lift.
Fall, autumn.
Fix, to arrange, make, put in order,
settle, see to, etc.
Fleshy, stout.
Grip or Grip-sack, hand-bag.
VIII. GENERAL HINTS.

Gums, overshoes (see Rubbers).
Gun, to go shooting.
Hack, cab; hackman, cabman.
Help, servant.
Hitch, to harness; hitching-post, post to tie horses to.
Horse Car, tramway.
Hunt, to go shooting.
Lines, reins.
Lot, a piece or division of land in a city.
Lovely, loveable.
Lumber, timber.
Lunch, a slight meal at any hour of the day.
Mad, vexed, cross.
Mail, to post; postal matter; postal service.
Mucilage, liquid gum.
Muslin, cotton cloth.
Nasty, disgusting (not used before 'ears polite').
Notions, small wares.
Observatory, (often) belvedere or view-tower (Ger. Aussichtsturm).
Parlor, drawing-room.
Piazza, veranda.
Pie, tart or pie.
Pitcher, jug.
Prince Albert (coat), frock-coat.
Rapid Transit, a general name for elevated railroads and similar means of rapid city and suburban locomotion.
Recitation, lesson, college lecture.
Ride, applied to any mode of conveyance (horse, carriage, boat, etc.).
Right away, directly.
Rock, stone of any size; to throw stones.

In the United States First Floor is usually synonymous with Ground Floor, while Second Floor corresponds to the English First Floor, and so on. Throughout the Handbook these terms are used in conformity with the English custom.

VIII. General Hints.

The first requisites for the enjoyment of a tour in the United States are an absence of prejudice and a willingness to accommodate oneself to the customs of the country. If the traveller exercise a little patience, he will often find that ways which strike him as unreasonable or even disagreeable are more suitable to the environment than those of his own home would be. He should from the outset reconcile himself to the absence of deference or servility on the part of those he considers his social inferiors; but if ready himself to be courteous on a footing of equality he will seldom meet any real impoliteness. In a great many ways travelling in the United States is, to one who understands it, more comfortable than in Europe. The average Englishman will probably find the chief
physical discomforts in the dirt of the city streets, the roughness of
the country roads, the winter overheating of hotels and railway-cars
(70-75° Fahr. being by no means unusual), the dust, flies, and mos-
quitos of summer, and (in many places) the habit of spitting on
the floor; but the Americans themselves are now keenly alive to
these weak points and are doing their best to remove them.

Throughout almost the whole country travelling is now as safe as in
the most civilized parts of Europe, and the carrying of arms, which indeed
is forbidden in many states, is as unnecessary here as there. Those who
contemplate excursions into districts remote from the highways of travel
should take local advice as to their equipment. — The social forms of
America are, in their essentials, similar to those of England; and the
visitor will do well to disabuse himself of the idea that laxity in their
observance will be less objectionable in the one country than in the other.
He will, of course, find various minor differences in different parts of the
country, but good manners will nowhere be at a discount. — No limit is
placed on the number of passengers admitted to public conveyances, and
straps are provided in the cars of tramways and elevated railways to
enable those who cannot obtain seats to maintain their equilibrium.

The prices of almost all manufactured goods are much higher in the
United States than in Europe; and the traveller should therefore come
provided with an ample supply of all the articles of personal use he or
she is likely to require, down to such small items as pins and needles,
tapes and ribbons, dress ties and gloves, toilette requisites, buttons, and
matches (generally very poor in America). An important exception to the
above rule is boots and shoes, which are excellently made in the United
States and cost, if anything, rather less than in England. Cotton goods
are also as cheap as in Europe. — Indoor clothing for American use
should be rather thinner in texture than is usual in England, but winter
wraps for outdoor use require to be much thicker. The thick woollen
gowns that English ladies wear in winter would be uncomfortably warm
in the ordinary winter temperature of American hotels and railway-car-
rriages; and a thin soft silk will, perhaps, be found the most comfortable
travelling dress on account of its non-absorption of dust. Overshoes
(‘artics’ and ‘rubbers’) are quite necessary in winter and are worn almost
as much by men as by women. — Weddings frequently take place in the
evening, and are managed by a set of ‘ushers’ chosen from the bride-
groom’s friends. — The rule of the road in America follows the Con-
tinental, not the English system, vehicles passing each other to the right.

The art of the Barber and Hair-Dresser has been developed to a high
point in the United States, where the ‘tonsurial saloons’ are often very
luxurious. The prices, however, are high (15-25 c. for a shave, including
hair-brushing and the application of essences; hair-cutting 25-35 c., sham-
pooing 15-25 c., ‘sea foam’ or ‘dry shampoo’ 10-20 c., etc.).

Public Conveniences are not usually provided in American cities, but
their place is practically supplied by the lavatories of hotels, to which
passers-by resort freely. Accommodation is also furnished at railway
stations. Such public conveniences as do exist in New York and other
large cities are disgracefully inadequate in number, size, and equipment.

Public Holidays. The only holidays observed in all the states are
Independence Day (July 4th) and Christmas Day (Dec. 25th). New Year’s
Day (Jan. 1st) and Washington’s Birthday (Feb. 22nd) are celebrated in
nearly all the states. Decoration Day (May 30th) is set apart in the N.
and W. states for decorating with flowers the graves of those who fell in
the Civil War; and some of the S. states have a Memorial Day for the
same purpose. Thanksgiving Day (last Thurs. in Nov.) is observed with
practical unanimity; and General Election Day (Tues. after the first Mon.
in Nov.) and Labor Day (first Mon. in Sept.) are each celebrated by a large
number of states. In addition to the above, some states have special holi-
days of their own.
IX. A Short History of American Politics
by
John Bach McMaster.

What is now the territory of the United States has been derived from six European nations. Resting on the discovery by Columbus, and the Bulls of the Popes, Spain claimed the whole Continent, but has been in actual possession only of the Gulf coast from Florida to Texas, and of the interior from the Mississippi to the Pacific. The Swedes once had settlements on the Delaware. The Dutch, following up the voyage of Hudson to the river bearing his name, claimed and held the country from the Delaware to the Connecticut. The French discovered the St. Lawrence and explored and held military possession of the valleys of the Mississippi and Ohio and the Great Lakes. The English by virtue of the voyages of the Cabots claimed the Atlantic coast and there founded the colonies which grew into the thirteen United States. Alaska was purchased from Russia.

In the course of the struggle, sometimes peaceful, often bloody, by which the rule of these nations has been thrown off, the Dutch conquered the Swedes; the English conquered the Dutch and the French; the United States expelled the English and in time by purchase or conquest drove out the Spaniards and the Mexicans.

The first serious struggle for possession occurred in the middle of the 18th century, when the English moving westward met the French moving eastward at the sources of the river Ohio. In that struggle which has come down to us as the 'French and Indian War' France was worsted and, retiring from this continent, divided her possessions between England and Spain. To England she gave Canada and the islands and shores of the Gulf of St. Lawrence and, entering what is now the United States, drew a line down the middle of the Mississippi River and gave all to the E. of that line (save the island on which is the city of New Orleans) to Great Britain, and all to the W. of it to Spain; Spain at the same time gave Florida to England as the price of Cuba.

Having thus come into possession of all the country to the E. of the Great River, King George determined to send out an army of 10,000 men to defend the colonies, and have the latter bear a part of the expense. This part he attempted to collect by duties on goods imported and by a Stamp Tax (1765) on legal documents and printed matter. No tax for revenue had before been laid on America by act of Parliament. The colonists therefore resisted this first attempt and raising the cry 'no taxation without representation' they forced Parliament to repeal the Stamp Tax in 1766. The right to tax was at the same time distinctly asserted, and in 1767 was again used, and duties laid on paints, oils, lead, glass, and tea. Once more the colonists resisted and, by refusing to import any goods, wares, or
merchandise of English make, so distressed the manufacturers of England that Parliament repealed every tax save that on tea. All the tea needed in America was now smuggled in from Holland. The East India Company, deprived of the American market, became embarrassed, and, calling on Parliament for aid, was suffered to export tea, a privilege never before enjoyed. Selecting commissioners in Boston, New York, Philadelphia, and Charleston, cargoes of tea were duly consigned to them; but the people would not allow a pound of it to be sold. At Boston men disguised as Indians boarded the tea ships and threw the boxes into the harbour (comp. p. 88).

As a punishment for this, Parliament shut the port of Boston and deprived the people of Massachusetts of many functions of local government. The Assembly of Massachusetts thereupon called for a General Congress to meet at Philadelphia on Sept. 5th, 1774. The colonies gladly responded and this Congress, having issued a Declaration of Rights and addresses to the King, to Parliament, and to the People of England, adjourned to await the result. The day for the reassembling of Congress was May 10th, 1775; but before that day came, the attempt of Gage to seize military stores brought on a fight at Lexington (April 19th, 1775; p. 125). The fight at Lexington was followed by the siege of the British in Boston, by the formation of the 'Continental Army', by the appointment of George Washington to command it, by the battle of Bunker Hill (June 17th, 1775; p. 96), and by an expedition against Quebec, which came to naught, on the last day of the year.

General William Howe meantime had succeeded Gage in command of the British at Boston, and, finding himself hard pressed by Washington, evacuated the city and sailed for Halifax. Believing New York was to be attacked, Washington now hurried to Long Island, where (August 27th, 1776; p. 58) Howe defeated him, took possession of New York, and drove him first up the Hudson and then southward across New Jersey.

Congress, which (July 4th, 1776) had declared the colonies to be free and independent states, now fled from Philadelphia to Baltimore. But Washington, turning in his retreat, surprised and captured the British outpost at Trenton (p. 223). Cornwallis instantly hurried toward that town, but Washington, passing around the British rear, attacked and captured (at Princeton, Jan. 3rd, 1777; p. 228) a detachment on its march to Trenton, and then went into winter quarters at Morristown.

With the return of spring Howe, finding that he could not reach Philadelphia by land without passing in front of the Continental Army stretched out on a strongly intrenched line across New Jersey, went by sea. Washington met him at Chadd's Ford on the Brandywine (p. 268), was defeated, and on Sept. 25th, 1777, Howe entered Philadelphia. In the attempt to dislodge him Wash-
IX. HISTORY.

...Washington fought and lost the battle of Germantown (Oct. 4th, 1777; p. 243). The loss of Philadelphia was more than made good by the capture of Burgoyne and his army at Saratoga (Oct. 17th, 1777; p. 198), while on his way from Canada to New York City.

The fruits of this victory were the recognition of the Independence of the United States by France, the treaty of alliance with France (Feb. 8th, 1778), and the evacuation of Philadelphia by Clinton, who had succeeded Howe. Washington, who had spent the winter at Valley Forge (p. 253), instantly followed, and overtaking Clinton at Monmouth fought and won the battle at that place (June 29th, 1778). Clinton escaped to New York, and Washington, drawing his army in a circle about the city from Morristown on the S. to West Point on the N., awaited further movements.

Turning towards the Southern States, the British commander now despatched an expedition which took Savannah and overran the State of Georgia. The year which followed (1779) is memorable for the capture of Stony Point by Anthony Wayne (p. 163), for the treason of Benedict Arnold (pp. 163, 168), for the execution of Major John André (p. 166), for the capture of the Serapis by Paul Jones after one of the most desperate naval battles on record, and by the failure of an attempt by the Americans to retake Savannah (p. 394). In 1780 Clinton led an expedition from New York to Charleston, took the city, swept over South Carolina, and, leaving Cornwallis in command, hurried back to New York. Gates, who now attempted to dislodge the British, was beaten. Greene now succeeded Gates, and Morgan, the commander of his light troops, won the battle of the Cowpens (Jan. 17th, 1781; p. 375). This victory brought up Cornwallis, who chased Greene across the State of North Carolina to Guilford Court House (p. 375), where Greene was beaten and Cornwallis forced to retreat to Wilmington. Moving southward, Greene was again beaten in two pitched battles, but forced the British to withdraw within their lines at Charleston and Savannah.

Cornwallis meantime moved from Wilmington into Virginia and took possession of Yorktown. And now Washington, who had long been watching New York, again took the offensive, hurried across New Jersey and Pennsylvania, and, while a French fleet closed the Chesapeake Bay, he besieged Cornwallis by land, till (Oct. 19th, 1781) the British General surrendered (p. 369). This practically ended the war.

The Treaty of Peace, in 1783, actually ended it, secured the independence of the United States and fixed her boundaries, roughly speaking, as the Atlantic Ocean on the E., the Mississippi on the W., New Brunswick, the St. Lawrence, and the Great Lakes on the N., and the parallel of 31° on the S.

While the war was still raging, Congress had framed an instrument of government, which the States ratified and put in force on Mar. 1st, 1781. This instrument of government which bound the thirteen States
IX. HISTORY.

in perpetual union was known as the Articles of Confederation, and established a government as bad as any yet devised by man. There was no executive, no judiciary, and only the semblance of a legislature. The Congress consisted of not more than seven nor less than two delegates from each State; sat in secret session; was presided over by a President elected from its own members; and could not pass any law unless the delegates of nine states assented. It could wage war, make treaties, and borrow money; but it could not lay a tax of any kind whatsoever; nor regulate commerce between the States, or with foreign powers; and was dependent entirely on the liberality of the States for revenue. This defect proved fatal. Inability to regulate foreign commerce by duties stripped the country of its specie. Lack of specie forced the States to issue paper money. Paper money was followed by tender acts and force acts and, in some places, by a violent stoppage of justice by the debtor class. A commercial and financial crisis followed and the people of the States, reduced to desperation, gladly acceded to a call for a national trade convention which met in Philadelphia in May, 1787. The instructions of the delegates bade them suggest amendments to the Articles of Confederation. But the convention, considering the Articles too bad to be mended, framed the Constitution which the people, acting through conventions in the various states, ratified during 1787 and 1788.

On Mar. 4th, 1789, the Constitution became the 'supreme law of the land.' In the first congress no trace of party lines is visible. But the work of establishing government had not gone far when differences of opinion sprang up; when the cry of partial legislation was raised, and the people all over the country began to divide into two great parties,—those who favoured and those who opposed a liberal construction of the language of the Constitution and the establishment of a strong national government. The friends of national government took the name of Federalists, and under the lead of Alexander Hamilton who, as Secretary of the Treasury, marked out the financial policy of the administration, they funded the foreign and domestic debt occasioned by the war for independence, assumed the debts incurred by the States in that struggle, set up a national bank with branches, and laid a tax on distilled liquors. Each one of these acts was met with violent opposition as designed to benefit a class, as unconstitutional, and as highly detrimental to the interests of the South. Against the Federalists were now brought charges of a leaning towards monarchy and aristocracy. Great Britain it was said has a funded debt, a bank, and an excise. These things are, therefore, monarchical institutions. But the Federalists have introduced them into the United States. The Federalists, therefore, are aristocrats, monarchists, and monopolists.

Of all who believed these charges, none believed them more sincerely than Thomas Jefferson, Secretary of State. Seeing in these
acts a wide departure from the true principles of democracy, he set himself to work to organize a party of opposition, and was soon looked up to as the recognized leader of the Federal Republicans. Hardly had the two parties thus been called into existence by difference of opinion on questions of home affairs, when they were parted yet more widely, and the dispute between them intensely embittered by questions of foreign affairs. In 1793 the French Republic declared war against England, and sent a minister to the United States. As the United States was bound to France by the Treaty of Alliance and by a Treaty of Amity and Commerce, and was not bound to Great Britain by any commercial treaty whatever, it seemed not unlikely that she would be dragged unwillingly into the war. But Washington with the advice of his secretaries proclaimed neutrality, and from that time every Republican was the firm friend of France and every Federalist the ally of England. Then began a seven years' struggle for neutrality. France threw open her colonial ports to neutral commerce. Great Britain asserting the 'Rule of the War of 1756', a rule prescribing that no neutral should have, 'time of war, a trade it did not have in peace, declared this trade was contraband and seized the ships of the United States engaged in it. The Republicans denounced neutrality and attempted to force a war. The Federalists in alarm dispatched John Jay, the Chief Justice, to London with offers of a commercial treaty. England responded and on Feb. 29th, 1796, the first treaty of Amity and Commerce between her and the United States became law. At this France took offence, rejected the new minister (C. C. Pinckney) from the United States, and drove him from her soil; suspended the treaties, insulted a special commission (sent out in the interest of peace), with demands for bribes and tribute, and brought on a quasi-war. Never since the days of Bunker Hill had the country been so stirred as this act of the French Directory stirred it in the summer of 1798. Then was written our national song 'Hail Columbia'. Then was established the department of the Navy. Then, under the cry, 'Millions for defence; not a cent for tribute', went forth that gallant little fleet which humbled the tricolour in the West Indies and brought France to her senses.

With the elevation of Napoleon to the First Consulship came peace in 1800. In that same year the Federalists fell from power never to return. Once in power, the Republicans began to carry out the principles they had so long preached. They reduced the National debt; they repealed the internal taxes. They sold the Navy; boldly assaulted the Supreme Court; and in 1811, when the Charter of the National Bank expired, refused to renew it. Their doctrine of strict construction, however, was ruined, when, in 1803, they bought the Province of Louisiana from France and added to the public domain that splendid region which lies between the Mississippi and the Rocky Mountains. At that moment it seemed
as if the people were about to enter on a career of unwonted prosperity. But Napoleon suddenly made war on England, and by 1806 the United States was involved in a desperate struggle of nine years both with France and England for commercial independence. Great Britain searched our ships, impressed our sailors, violated the neutrality of our ports, and by the decisions of her admiralty courts and by orders in council sought to ruin our neutral commerce with Europe, unless carried on through her ports and under her license. Napoleon attacked us with his decrees of Berlin and Milan, and sought to ruin our neutral commerce with England. The United States retaliated by means of the Embargo and Non-intercourse, and, in 1812, by declared war.

With the cessation of hostilities another epoch in our history begins. From the day when Washington proclaimed neutrality in 1793, to the day when the people celebrated, with bonfires and with fireworks, and with public dinners, the return of peace in 1815, the political and industrial history of the United States is deeply affected by the political history of Europe. It was questions of foreign policy, not of domestic policy that divided the two parties, that took up the time of Congress, that raised up and pulled down politicians. But after 1815 foreign affairs sank into insignificance, and for the next thirty years the history of the United States is the history of the political and economic development of the country to the E. of the Mississippi River.

The opposition which the Federalists made to the War completed their ruin. In 1816 for the last time they put forward a presidential candidate, carried three states out of nineteen, and expired in the effort. During the eight years of Monroe’s administration (1817–25) but one great and harmonious party ruled the political destinies of the country. This remarkable period has come down to us in history as the ‘Era of good feeling’. It was indeed such an era, and so good were the feelings that in 1820 when Monroe was re-elected no competitor was named to run against him. Every State, every electoral vote save one was his. Even that one was his. But the elector who controlled it, threw it away on John Quincy Adams lest Monroe should have the unanimous vote of the Presidential electors, an honour which has been bestowed on no man save Washington.

In the midst of this harmony, however, events were fast ripening for a great schism. Under the protection offered by the commercial restrictions which began with the Embargo and ended with the peace, manufactures had sprung up and flourished. If they were to continue to flourish they must continue to be protected, and the question of free trade and protection rose for the first time into really national importance. The rush of population into the West led to the admission of Indiana (1816), Mississippi (1817), Illinois (1818), Alabama (1819), and Missouri (1820) into the Union, and
brought up for serious discussion the uses to be made of public lands lying within them. The steamboat, which had been adopted far and wide, had produced a demand for some improved means of communication by land to join the great water highways of the country and opened the era of internal improvements. The application of Missouri for admission into the Union brought up the question of the admission of slavery to the W. of the Mississippi. A series of decisions of the Supreme Court, setting aside acts of the State legislatures, gave new prominence to the question of State rights.

The Missouri question was settled by the famous Compromise of 1820 (the first great political compromise) which drew the line 36° 30' from the Mississippi to the 100th Meridian, and pledged all to the N. of it, save Missouri, to freedom. But the others were not to be settled by compromise, and in the campaign of 1824 the once harmonious Republican party was rent in pieces. Each of the four quarters of the Republic put a candidate in the field and 'the scrub-race for the presidency' began. The new manufacturing interests of the East put forward John Quincy Adams. The West, demanding internal improvements at public expense, had for its candidate Henry Clay. William H. Crawford of Georgia (nominated by a caucus of congressmen) represented the old Republican party of the South. Andrew Jackson of Tennessee stood for the new Democracy, for the people, with all their hatred of monopolies and class control, their prejudices, their half-formed notions, their violent outbursts of feeling. Behind none of them was there an organized party. But taking the name of 'Adams men' and 'Clay men', 'Crawford men' and 'Jackson men', the friends of each entered the campaign and lost it. No candidate secured a majority of the electoral college, and the House of Representatives chose John Quincy Adams.

Under the administration of Adams (1825-29) the men who wished for protection and the men who wished for internal improvements at Government expense united, took the name first of National Republicans and then of Whigs, and, led on by Henry Clay and Daniel Webster, carried through the high protection tariffs of 1828 and 1832. The friends of Jackson and Crawford took the name of Democrats, won the election of 1829, and, during twelve years, governed the country. In the course of these years the population of the United States rose to 17,000,000, and the number of states to twenty-six. Steam navigation began on the Ocean; two thousand miles of railroad were built in the land; new inventions came into use; and the social and industrial life of the people was completely revolutionized. The National debt was paid; a surplus accumulated in the Treasury; the sale of public lands rose from $3,000,000 in 1831 to $25,000,000 in 1836; and the rage for internal improvements burned more fiercely than ever. A great financial panic spread over the country; the Charter of the National Bank
expired; a hundred 'wild-cat banks' sprang up to take its place; and the question of the abolition of slavery became troublesome.

On the great questions which grew out of this condition of affairs the position of the two parties was well defined. The Democrats demanded a strict construction of the Constitution; no internal improvements at public expense; a surrender of the public lands to the state in which they lay; no tariff for protection; no National Bank; no agitation of the question of abolition of slavery; the establishment of sub-treasuries for the safe keeping of the public funds, and the distribution of the surplus revenue. The Whigs demanded a re-charter of the National Bank; a tariff for protection; the expenditure of the surplus on internal improvements; the distribution of the money derived from the sale of public lands; a limitation of the veto power of the President; and no removals from office for political reasons.

The Democrats, true to their principles, and having the power, carried them out. They destroyed the Bank; they defeated bill after bill for the construction of roads and canals; they distributed $38,000,000 of the surplus revenue among the states, and, by the cartage of immense sums of money from the East to the far distant West, hastened that inevitable financial crisis known as the 'panic of 1837'. Andrew Jackson had just been succeeded in the Presidency by Martin Van Buren (1837-41) and on him the storm burst in all its fury. But he stood it bravely, held to a strict construction of the Constitution, insisted that the panic would right itself without interference by the Government, and stoutly refused to meddle. Since the refusal of Congress to re-charter the Bank of the United States, whose charter expired in 1836, the revenue of the Government had been deposited in certain 'pet banks' designated by the Secretary of the Treasury. Every one of them failed in the panic of 1837. Van Buren, therefore, recommended 'the divorce of Bank and State', and after a struggle of three years his friends carried the 'sub-treasury' scheme in 1840. This law cast off all connection between the State Banks and the Government, put the collectors of the revenue under heavy bonds to keep the money safely till called for by the Secretary of the Treasury, and limited payments to or by the United States to specie.

The year 1840 was presidential year and is memorable for the introduction of new political methods; for the rise of a new and vigorous party; and for the appearance of a new political issue. The new machinery consisted in the permanent introduction of the National Convention for the nomination of a president, now used by the Democrats for the second time, and by the Whigs for the first; in the promulgation of a party platform by the convention, now used by the Democrats for the first time; and in the use of mass meetings, processions, songs, and all the paraphernalia of a modern campaign by the Whigs. The new party was the Liberty Party and
the new issue the ‘absolute and unqualified divorce of the General Government from slavery, and the restoration of equality of rights among men’. The principles of that party were: slavery is against natural right, is strictly local, is a state institution, and derives no support from the authority of Congress, which has no power to set up or continue slavery anywhere; every treaty, every act, establishing, favouring, or continuing slavery in the District of Columbia, in the territories, on the high seas is, therefore, unconstitutional.

The candidate of this party was James Gillespie Birney. The Democrats nominated Martin Van Buren. The Whigs put forward William Henry Harrison and elected him. Harrison died one month after his inauguration, and John Tyler, the Vice-President, and a Democrat of the Calhoun wing became president. The Whig policy as sketched by Clay was the repeal of the sub-treasury act; the charter of a National Bank; a tariff for protection; and the distribution of the sales of public lands. To the repeal of the sub-treasury act Tyler gladly assented. To the establishment of a bank even when called ‘Fiscal Corporation’, he would not assent, and, having twice vetoed such bills, was read out of the party by a formal manifesto issued by Whig Congressmen. It mattered little, however, for the question of the hour was not the bank, nor the tariff, nor the distribution of the sales of lands, but the annexation of the Republic of Texas. Joined to the demand for the re-occupation of Oregon, it became the chief plank in the Democratic platform of 1844. The Whig platform said not a word on the subject, and the Liberty Party, turning with loathing from the cowardice of Clay, voted again for Birney, gave the State of New York to the Democrats, and with it the presidency. Accepting the result of the election as an ‘instruction from the people’, Congress passed the needed act and Tyler in the last hours of his administration declared Texas annexed.

The boundary of the new State was ill-defined. Texas claimed to the Rio Grande. Mexico would probably have acknowledged the Nueces River. The United States attempted to enforce the claim of Texas, sent troops to the Rio Grande, and so brought on the Mexican War. At its close the boundary of the United States was carried to the S. from 42° to the Gila River, and what is now California, Nevada, Arizona, New Mexico, Utah, and more than half of Wyoming and Colorado were added to the public domain. While the war was still raging, Polk, who had succeeded Tyler, asked for $2,000,000 to aid him in negotiating peace. Well knowing that the money was to be used to buy land from Mexico, David Wilmot moved in the House of Representatives that from all territory bought with the money slavery should be excluded. This was the famous Wilmot proviso. It failed of adoption and the territory was acquired in 1848, with its character as to slavery or freedom wholly undetermined.

And now the old parties began to break up. Democrats who
believed in the Wilmot proviso, and Whigs who detested the annexation of Texas, the war with Mexico, and the extension of slavery went over in a body to the Liberty Party, formed with it the 'Free-soil Party', nominated Martin Van Buren, and gave him 300,000 votes. In their platform they declared that Congress had no more power to make a slave than to make a king; that they accepted the issue thrust on them by the South; that to the demand for more slave states and more slave territories they answered, no more slave states, no more slave territories; and that on their banner was inscribed 'Free Soil, Free Speech, Free Labor, and Free Men'. As the defection of Whigs to the Liberty Party in 1844 gave New York State to the Democrats and elected Polk, so the defection of Democrats to the Free Soilers in 1848 gave New York to the Whigs and elected Taylor. As Harrison, the first Whig President, died one month after taking office, so Taylor, the second Whig President, died suddenly when a little over one year in office, just as the great Whig Compromise of 1850 was closing. The imperative need of civil government in the new territory, the discovery of gold in California, the rush of men from all parts of the earth to the Pacific Coast forced Congress to establish organized territories. The question was: shall they be opened or closed to slavery? But, as the soil had been free when acquired from Mexico, the question really was: shall the United States establish slavery? The Democrats, holding that slaves were property, claimed the right to take them into any territory, and asserting the principle of 'squatter sovereignty', claimed the right of the people living in any territory to settle for themselves whether it should be slave or free. The Free Soilers demanded that the soil having been free when a part of Mexico should be free as a part of the United States. Between these two Clay now stepped in to act as pacificator. Taking up the grievances of each side, he framed and carried through the measure known as the Compromise of 1850, the third great political Compromise in our history. The fruit of this was the admission of California, as a free state; the passage of a more stringent law for the recovery of fugitive slaves; the abolition of the slave trade in the District of Columbia; and the organization of Utah and New Mexico on the basis of 'squatter sovereignty'. This done, Senators and Representatives of all parties joined in a manifesto, declaring that the issues resting on slavery were dead issues, and that they would neither vote for, nor work for any man who thought otherwise. But thousands did think otherwise. The action of Clay pleased none. Anti-slavery men deserted him in the North; pro-slavery men deserted him in the South; and in 1852 the Whig party carried but four states out of thirty-one and perished. Even its two great leaders Clay and Webster were, by that time, in their graves.

Excited by such success, the Democrats, led on by Stephen A. Douglas, now broke through the compromise of 1820 and in
1854 applied 'squatter sovereignty' to the organization of the territories of Kansas and Nebraska. Against this violation State legislatures, the people, the pulpit, and the press protested vigorously, for every acre of Kansas and Nebraska lay to the N. of 36° 30' and was solemnly pledged to freedom. But the Democratic leaders would not listen and drove from their ranks another detachment of voters. The effect was soon manifest. The little parties began to unite and when, in 1856, the time came to elect another President, the Republican party of to-day was fully organized and ready. Once more and for the last time for 28 years the Democrats won. The administration of James Buchanan (1857-61) marks an epoch. The question before the country was that of the extension of slavery into the new territories. Hardly had he been inaugurated, when the Supreme Court handed down a decision on the case of Dred Scott, which denied the right of Congress to legislate on slavery, set aside the compromises of 1820 and 1850 as unconstitutional, and opened all the territories to slavery. From that moment the Whig and Democratic parties began to break up rapidly till, when 1860 came, four parties and four presidential candidates were in the field. The Democratic party, having finally split at the National Convention for nominating a president and vice-president, the southern wing put forward Breckenridge and Lane and demanded that Congress should protect slavery in the territories. The northern wing nominated Stephen A. Douglas and declared for squatter sovereignty and the Compromise of 1850. A third party, taking the name of 'Constitutional Union', declared for the Constitution and the Union at any price and no agitation of slavery, nominated Bell and Everett, and drew the support of the old Whigs of the Clay and Webster school. The Republicans, declaring that Congress should prohibit slavery in the territories, nominated Abraham Lincoln and Hannibal Hamlin and won the election.

The State of South Carolina immediately seceded and before the end of Feb., 1861, was followed by Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas. Taking the name of the Confederate States of America, they formed first a temporary and then a permanent government, elected Jefferson Davis President, raised an army, and besieged Fort Sumter in Charleston Harbour. The attempt to relieve the fort brought on the bombardment and surrender (April 19th, 1861). The Confederate States were now joined by Virginia, North Carolina, Arkansas, and Tennessee. Richmond was made the capital, and the Civil War opened in earnest.

The line of separation between the States then became the Potomac River, the Ohio River, and a line across S. Missouri and Indian Territory to New Mexico. Along this line the troops of the Union were drawn up in many places under many commanders. Yet there were in the main but three great armies. That of the E. or Potomac under Gen. McClellan; that of the centre or the Ohio under Gen. Buell; that of the W. or Missouri under Gen. Halleck.
In command of all as Lieutenant-General was Winfield Scott. Confronting them were the troops of the Confederacy, drawn up in three corresponding armies: that of N. Virginia under Johnston and Lee, that of the Cumberland under Albert Sidney Johnston, and that of the trans-Mississippi under McCulloch and Price.

Yielding to the demand of the North for the capture of Richmond before the Confederate congress could meet there (July 20th, 1861), McDowell went forth with thirty-eight thousand three-months volunteers to the ever memorable field of Bull Run (p. 374). But the serious campaigning did not begin until Jan., 1862. Then the whole line west of the Alleghenies (made up of the armies of Ohio and the Missouri), turning on Pittsburg as a centre, swept southward, captured Forts Henry and Donelson, defeated the Confederates at Shiloh (p. 384), captured Corinth (p. 334), took Island No. 10 (p. 364), and drove them from Fort Pillow. Meantime Farragut entered the Mississippi from the Gulf (see p. 416), passed Forts Jackson and St. Phillip, captured New Orleans, and sent Commodore Davis up the river to take Memphis. Memphis fell June 6th, 1862, and, save for Vicksburg, the Mississippi was open to navigation. When the year closed, the Confederates had been driven to the E. into the mountains of Tennessee, where (Dec. 31st, 1862-Jan. 2nd, 1863) was fought the desperate and bloody battle of Murfreesboro'. The Union troops won, and the Confederate army fell back to Chattanooga (p. 383).

With the Army of the Potomac meantime all had gone ill. The affair at Bull Run in July, 1861, had been followed by the transfer of the army to McClellan. But McClellan wasted time, wore out the patience of the North, and forced Lincoln to issue General Order No. 1 for a forward movement of all the armies on Feb. 22nd, 1862. Obedient to this McClellan began his 'Peninsula Campaign' against Richmond, was out-generated by Lee, and in the second battle of Bull Run (p. 374) suffered so crushing a defeat that Lee ventured to cross the Potomac, enter Maryland, and encounter McClellan on the field of Antietam (p. 379). In that battle Lee was beaten and fled across the Potomac. But McClellan failed to follow up the victory and was removed, the command of the Army of the Potomac passing to Burnside. Burnside led it across the Potomac and the Rappahannock and on Dec. 13th, 1862, lost the battle of Fredericksburg (p. 365). For this he was replaced by Hooker, who, May 1st-4th, 1863, fought and lost the battle of Chancellorsville (p. 366). Lee now again took the offensive, crossed the Potomac, entered Pennsylvania, and at Gettysburg met the Army of the Potomac under Meade (p. 366). On that field was fought the decisive battle of the war. Then (July 1st-4th, 1863) the backbone of the Confederacy was broken, and the two armies returned to their old positions in Virginia.

While Meade was beating Lee at Gettysburg, Grant captured

X. Constitution and Government of the United States

by James Bryce,

Author of 'The American Commonwealth'.

The United States form a Federal Republic — that is to say, a Republic created by the union of a number of separate commonwealths, each of which retains some powers of government though it has yielded others to the Federation as a whole. The circumstances under which this Union took place have been already described in the historical sketch. It was established by the adoption of an instrument called the Constitution drafted by a Convention which met at Philadelphia in 1787, accepted and ratified by the (then 13) States in the years 1788-91. The Constitution prescribes (1) the structure of the Federal Government and the respective functions of its several parts, (2) the powers of the Federal Government and restrictions imposed upon it, (3) the relations of the Federal Government to the States and of the States to one another, (4) certain restrictions imposed upon the States. It does not specify the powers of the States, because these are assumed as pre-existing; the States when they created the Federal Government having retained for themselves most of the powers which they previously enjoyed.

The Constitution is the supreme law of the land, binding everywhere upon all authorities and persons. It can be altered in either of two ways: (a) The Federal Legislature may by a two-thirds vote in each of the two Houses prepare amendments and send them to the States. If ratified by the State Legislatures or by Conventions (i.e. assemblies elected by the people for the purpose) in three-fourths of the States, they take effect and become part of the Constitution. (b) The legislatures of two-thirds of the States may require the Federal Legislature to call a Constitutional Convention to prepare amendments to the Constitution. These amendments when ratified by three-fourths of the State Legislatures or State Conventions (as the case may be), take effect as parts of the Constitution. Fifteen amendments have been actually made, all drafted by the Federal Legislature and ratified by the State Legislatures. As the States created the Federation and as they still exercise most of the ordinary functions of government, it is convenient to describe them first.
under which the Electoral votes had been counted since 1865 could not be adopted. A compromise was necessary and on Jan. 29th, 1877, the Electoral Commission of five Senators, five Representatives, and five Judges of the Supreme Court was created to decide on the doubtful returns. Of the fifteen eight were Republicans and seven Democrats, and by a strict party vote the thirteen Electoral votes were given to the Republicans and Rutherford B. Hayes declared elected.

The memorable events of his term (1877-81) were the resumption of specie payments on Jan. 1st, 1879; the passage of the Bland Silver Bill, restoring the silver dollar to the list of coins, making it legal tender, and providing for the coinage of not less than 2,000,000 nor more than 4,000,000 each month; and the rapid growth of the National or Greenback-Labour party. Hayes was followed in 1881 by James A. Garfield, whose contest with the Senators from New York over the distribution of patronage led to his assassination by the hand of a crazy applicant for office. Chester A. Arthur then became President, was followed in 1885 by Grover Cleveland, who was succeeded in 1889 by Benjamin Harrison, who was in turn succeeded in 1893 by Grover Cleveland. In 1897 William McKinley became President, and his period of office was signalized by a war with Spain (1898) and the advent of the United States as a Colonial Power.

Author of 'The American Commonwealth'.

The United States form a Federal Republic — that is to say, a Republic created by the union of a number of separate commonwealths, each of which retains some powers of government though it has yielded others to the Federation as a whole. The circumstances under which this Union took place have been already described in the historical sketch. It was established by the adoption of an instrument called the Constitution drafted by a Convention which met at Philadelphia in 1787, accepted and ratified by the (then 13) States in the years 1788-91. The Constitution prescribes (1) the structure of the Federal Government and the respective functions of its several parts, (2) the powers of the Federal Government and restrictions imposed upon it, (3) the relations of the Federal Government to the States and of the States to one another, (4) certain restrictions imposed upon the States. It does not specify the powers of the States, because these are assumed as pre-existing; the States when they created the Federal Government having retained for themselves most of the powers which they previously enjoyed.

The Constitution is the supreme law of the land, binding everywhere upon all authorities and persons. It can be altered in either of two ways: (a) The Federal Legislature may by a two-thirds vote in each of the two Houses prepare amendments and send them to the States. If ratified by the State Legislatures or by Conventions (i.e. assemblies elected by the people for the purpose) in three-fourths of the States, they take effect and become part of the Constitution. (b) The legislatures of two-thirds of the States may require the Federal Legislature to call a Constitutional Convention to prepare amendments to the Constitution. These amendments when ratified by three-fourths of the State Legislatures or State Conventions (as the case may be), take effect as parts of the Constitution. Fifteen amendments have been actually made, all drafted by the Federal Legislature and ratified by the State Legislatures. As the States created the Federation and as they still exercise most of the ordinary functions of government, it is convenient to describe them first.
The States and their Government. There are now 45 States in the Union. Although differing very greatly in size, population, and character, they have all of them the same frame of government. In all of them this frame is regulated by a constitution which each State has enacted for itself and which, being the direct expression of the popular will, is the supreme law of the State, binding all authorities and persons therein. Such a constitution always contains a so-called Bill of Rights, declaring the general principles of the government and the primordial rights of the citizen, and usually contains also a great number of administrative and financial regulations belonging to the sphere of ordinary law. The habit has grown up of late years of dealing, by means of these instruments, with most of the current questions on which public opinion calls for legislation. These constitutions are often changed by amendments which (in most States) are passed by the Legislature by certain prescribed majorities and then submitted to the vote of the people. When it is desired to make an entirely new constitution, a special body called a Convention is elected for the purpose, and the instrument drafted by it is almost invariably submitted to the people to be voted upon.

State Governments. The Legislature. In every State the Legislature consists of two bodies, both alike elected by the people, though in districts of different sizes. The smaller body (whose members are elected in the larger districts) is called the Senate and varies in number from 9 to 51. The larger body is usually called the Assembly or House of Representatives and varies in number from 21 to 321. The suffrage has now everywhere been extended to all adult males who have resided in a certain (usually a short) period within the State. In three States (Wyoming, Colorado, and Utah) it is enjoyed by women also and in several women vote at municipal or school committee elections. The Senate is usually elected for four years — sometimes, however, for three, two, or even one. The House is usually elected for two years. Both Houses have similar powers, save that in most States Money Bills must originate in the House of Representatives. The powers of these Legislatures are limited, and in the case of the newer constitutions very strictly limited, by the State Constitution. If they pass any statute contravening its provisions, or infringing any of the restrictions it has imposed, such a statute is void. All members of State Legislatures are paid, usually at the rate of about $5 a day. They are generally required by law and almost invariably required by custom to be resident in the district from which they are chosen.

These legislative bodies are not greatly respected, nor is a seat in them greatly desired by the better class of citizens. In a few States, such as New York, Pennsylvania, and Louisiana, there is a pretty large proportion of corrupt members.

The State Executive. In every State the head of the Executive is the Governor, elected by popular vote for a term of (rarely one) usually
two, three, or even four years. He receives a salary of from $1000 to $10,000. He is responsible for the execution of the laws and the maintenance of order in the State, whose militia he commands. He has, except in four States, the right to veto any bill passed by the Legislature, but the bill may be re-passed over his veto by a majority (usually two-thirds) in both Houses. He is assisted by a Secretary of State and several other officials, who, however, are not named by him but elected directly by the people.

The State Judiciary. In eight States the Judges are appointed by the governor; in all the rest they are elected either by the people or (in five States) by the State Legislature for terms varying, for the Superior judges, from two to twenty-one years, eight to ten years being the average. In four, however, they hold for life. Their salaries range from $2000 to $10,000 per annum, but in most states do not exceed $5000. Such salaries, coupled with the uncertainty of re-election, have been found too small to attract the best legal talent, and complaints are often made that the Bench is not as strong as the Bar which practises before it. Corruption, however, is rare, especially among the judges of the higher courts. There have not been more than three or four States in which it has been proved to exist, and in some of these it does not exist now. It is, of course, the function of the Courts to determine, when a case comes before them, the validity or invalidity of a State Statute which is alleged to transgress any provision of the State Constitution. Very frequently they are obliged to declare such statutes to be unconstitutional; and in this way the Legislature is effectively restrained from destroying the securities which the Constitution provides.

Local Government, Rural and Urban. The organization of local government is within the province of State Legislation and there are many differences between the systems in force in different States. As regards the cities (the term applied in America to any municipality), the scheme of government is usually as follows.

There is always a Mayor, the head of the executive, elected for one, two, or three years, receiving a substantial salary, and charged with the maintenance of order and general oversight of municipal affairs. There is always a legislature, consisting either of one or of two representative bodies elected for short terms, generally in wards, and (in most cases) receiving salaries. The other officials, including the police justices and local civil judges, are either elected by the people or appointed by the Mayor, with or without the concurrence of the Legislature. The tendency of late years has been to vest larger and larger powers in the Mayor. In some cities there is a distinct board of Police Commissioners (sometimes appointed by the State), and in most the management of the Public Schools is kept distinct from the rest of the municipal government and given to a separately elected School Committee.

As regards Rural Government, two systems may be distinguished,
in the one of which the township, in the other the county, is the
administrative unit.

The township, called in the New England States the Town, is a
small district corresponding roughly to the Commune of France, or
the Gemeinde of Germany. Its area is in the Western States usu-
ally 6 sq. M. and its average population from 500 to 2000. Its in-
habitants choose annually a small number (usually six or seven)
officials, who manage all local affairs, roads, police, poor relief, and
(in some States) sanitary matters, collect local taxes for these pur-
poses, and also choose one or more local justices. In the New
England States and in most parts of the West the inhabitants are
accustomed to meet at least once in spring, in some places several
times a year, to receive the reports of their officers, vote the taxes,
and pass resolutions upon any other business that may be brought
before them. This gathering is called the Town Meeting. Schools
are usually managed by a separate School Committee, but sometimes
by the township officers.

Above the township stands the county, whose area averages (in
the Western States) 5-600 sq. M. In the older States it is usually
smaller. Its business is administered by a board of (usually) three to
five persons, elected annually and receiving small salaries. The
county has charge of prisons, lunatic asylums, main roads, and in
some States of the almshouses provided for relief of the poor. In
other States this function is left to the townships, which administer
a little out-door relief. Pauperism is not a serious evil except in
the large cities; in most rural districts it scarcely exists.

This Township and County System prevails over all the Northern
and Middle States and is on the whole purely and efficiently ad-
ministered.

In the other parts of the Union, i.e. in all or nearly all of the
former Slave States, there are no townships; the unit of government
is the county, to whose yearly elected officers all local business
whatever is intrusted. The Southern counties are generally some-
what larger but not more populous than those of the Northern States.
Local government is altogether less developed and less perfectly vital-
ised in this part of the country, but within the last twenty years
sensible progress has been made — least, of course, in the dis-
tricts where the coloured population is largest, such as Louisiana,
Mississippi, and South Carolina. Townships are beginning to appear in
some States and the growth of education makes the School Districts
and Committees an important factor in giving the people interest in
local affairs.

The Americans are as a rule well satisfied with their system of
rural local government, which in many respects might serve as a
model to Europe, being more free and popular than that of Germany
or France or Italy, more complete than that of England. With their
municipal government on the other hand the liveliest discontent
exists. The larger cities especially have in most cases fallen into the hands of unscrupulous gangs of adventurers, commonly known as Rings, who monopolise the offices and emoluments, job the contracts for public works, incur large debts for the city, and in some few cases enrich themselves by plundering the public funds, while occasionally securing impunity by placing their creatures and dependents in judicial posts.

Many attempts have been made to bring about reforms by changing the frame of municipal government, but so far no great success has been attained. The root of the evil seems to lie partly in the presence in these great cities of a vast multitude of ignorant voters — mostly recent immigrants from Europe — who, since they pay little or no direct taxation, have no interest in economy; and partly in the indifference of the better class of citizens, who are apt to neglect the duty of voting at municipal elections, or when they do vote condone the faults of a Ring which professes to belong to their own political party. The smaller cities, down to those with a population of from 8000 to 10,000, present similar though less glaring faults; and on the whole it may be said that municipal government is the one conspicuous failure of American democracy.

Distribution of Powers between the States and the Federal Government. When the people of the United States created the Federal Government by the adoption of the Constitution, the States retained in their own hands all power, authority, and jurisdiction which was not delegated to the Federal Government. Accordingly the field of State action remains not only wide but undefined. It includes the maintenance of law and order within the State, control of the State militia and police, the organization of local government both urban and rural. The whole field of ordinary law as well civil as criminal, comprising the law of marriage and other family relations, of property and inheritance, of contracts and torts, of offences at common law or otherwise, is within the scope of State legislation. So also is the law relating to trade within the State, including the law of corporations and the regulation of railways and canals, as well as the control of education, charities, the care of the poor, and matters pertaining to religion. The State courts have of course a jurisdiction commensurate with the sphere of State legislation; i.e. they try all causes arising under State law and punish all offences against it. The State has also an unlimited power of taxing all persons and property (except as hereinafter mentioned) within its area, of borrowing money, and of applying its funds as it pleases.

The powers and jurisdiction of the Federal Government on the other hand are restricted, being those, and no others, which have been either expressly or by implication conferred upon it by the Federal Constitution. They therefore admit of being specified and are the following.
AND GOVERNMENT.

On all these subjects the Federal Legislature has the exclusive right of legislating, and the Federal Executive and Judiciary have, of course, the right and duty of enforcing such legislation. There are also a few subjects, including bankruptcy, which the Federal Legislature may deal with, but which, if left untouched by Federal Statutes, State legislation may regulate. There was at one time a uniform Federal bankrupt law; at present there is none, and the matter is regulated by each State in its own way.

Besides this allotment and division of power, the Constitution imposes certain restrictions both on the Federal Government and on the State Governments. The former is disabled from suspending the writ of habeas corpus or passing an ex post facto law, from abridging the freedom of speech or of the press, or the right of bearing arms, from making certain changes in legal procedure, from giving any commercial preference to any particular State, from establishing or prohibiting any religion. Each State, on the other hand, is restrained from making any treaty or taking other international action; from coining money or making anything but gold or silver coin legal tender; passing any ex post facto law or law impairing the obligation of contracts; setting up any but a republican form of Government; maintaining slavery; denying the right of voting in respect of race, colour, or previous condition of servitude; abridging the privileges of a U. S. citizen or denying to any person within its jurisdiction the equal protection of the laws; depriving any person of life, liberty, or property without due process of law. Neither can any State, except with the consent of the Federal Legislature, impose any duty on exports or imports, or keep ships of war or troops (except its own militia) in time of peace.

Where there is a doubt as to whether a particular power is possessed by one or other authority, the legal presumption is in favour of its being possessed by a State, because the original States were all of them self-governing commonwealths with a general power over their citizens; while the legal presumption is against the Federal Government, because the powers it has received have been enumerated in the Federal Constitution. However it is not deemed necessary that these powers should have been all expressly mentioned. It is sufficient if they arise by necessary inference.

Structure of the Federal Government. The Federal Government consists of three departments or organs, which the Constitution has endeavored to keep distinct: viz., the Legislature, the Executive, and the Judiciary. The powers of these three extend over every part of
the country alike, but of course touch those matters only which lie within the purview and competence of the Federal Government.

The Legislature. The Federal Legislature, called Congress, consists of two chambers — the Senate and the House of Representatives. The Senate is composed of two persons from each State: \( i.e. \), at present of 90 persons, and is presided over by the Vice-President of the United States. Senators are chosen in each State by the legislature thereof, a circumstance which has largely contributed to cause those bodies themselves to be elected on the lines of the great national parties. Each senator sits for six years, and one-third of the body go out of office every two years, being of course re-eligible. The Senate, besides its legislative powers, which are equal to those of the House (except in one point, \( \text{viz.} \): that Money Bills must originate in the House), has also two important executive powers. One of these is the right of approving or rejecting nominations to office made by the President, a right which is freely exercised except as regards Cabinet offices, which custom leaves entirely within the President's discretion. The other is the power of approving treaties, which must be submitted by the President to the Senate and are not valid until ratified by a majority of two-thirds of the Senators present. The Senate has also the judicial power of sitting as a High Court to try impeachments preferred by the House of Representatives against the President or any other of the great officials, including the Federal Judges. When the Senate sits in this capacity the Chief Justice of the United States presides. A majority of two-thirds is required for conviction. Andrew Johnson is the only President who has ever been impeached (1867), and in his case the requisite majority was not obtained.

The post of Senator, being dignified, powerful, and comparatively permanent, is much sought after and is indeed the chief object of ambition to successful members of Congress or pushing State politicians. It is these attractions rather than the method of indirect election by the State legislatures, which have drawn so much political ability into the Senate. At present many of the Senators are men of great wealth and some of them are accused of having made their way into it chiefly by their wealth, the State legislatures being not infrequently open to this kind of influence. It has often been proposed to vest the election directly in the people of each State, and probably this would be a better method than the present. Although the States differ vastly in size and importance, the Senators from the small States exert as much influence as those from the greatest, being indeed often superior in ability to the latter.

The House of Representatives consists at present of 357 persons elected by districts of nearly equal size, the boundaries of the districts being in each State determined by State legislation. The members are elected for two years, elections being always held in the November of a year bearing an even number; \( \text{e.g.} \ 1892, 1894, 1896. \) Members are almost invariably chosen from the district in which
they reside. Like the Senators, they receive a salary of $5000 a year, besides mileage (travelling expenses). They are (especially in the North and West) less frequently re-elected than is the case with Senators; and it generally happens that about one-half of the members of each House have not sat in the preceding House. Usually more than half of the members belong to the legal profession, though many of these do not practise law. Although elected in November, a new House does not come into existence till the 4th March following and is seldom summoned by the President to meet until the December of the same year. The first function of a House is to choose its Speaker, who always belongs to the majority and is permitted to use all the functions of the Chair in the interests of his party. Having a large control over the conduct of business and the function of nominating all the committees of the House and assigning to each its chairman, his power is very great. All bills are referred after second reading, which is given as a matter of course, to one of the standing committees, of which there are usually at least fifty, each of from 3 to 16 members, and if reported back by the committee is considered in committee of the whole House when time can be found for the purpose. As the number of bills brought into each Congress now reaches or exceeds twenty thousand, many are not reported back, and a great many more are never taken up, or if taken up are not completed, by the House. The chairmanships of the chief committees such as those on Ways and Means, Appropriations, Rivers and Harbours, Foreign Relations, and Judiciary, are important posts which carry great influence and are much desired by leading men. There are also a considerable number of select committees appointed from time to time to deal with special questions. (A similar system of Committees prevails in the Senate, where, however, the Committees are appointed not by the presiding officer but by the Senate itself.) The House has a power of closing its debates and coming to a division by voting the 'previous question', and uses this power freely. In the Senate no similar power exists. In each body the presence of one-half of the total number is required to make a quorum.

Both the Senate and the House have the power of holding secret sessions; and this power is frequently exercised by the former, especially when the confirmation of appointments is under consideration.

Although Congress attempts much, it accomplishes comparatively little. The opportunities for delaying business are manifold; there is little recognized leadership, and therefore many cross-currents; the two Houses often differ, throwing out or amending in material points one another's bills. In these conflicts the Senate more often prevails than the House does, because it is a smaller and on the whole a better organized body. There is little direct corruption in either House, but a good deal of demagogism and of what is called 'log-rolling', this form of evil being extended by the enormous number of bills relating to particular persons, places, or undertakings, which are promoted in
the interests of private individuals and are pushed by the miscellaneous
crew of unrecognized agents called the 'Lobby'. In each House each
of the great parties is in the habit of holding from time to time party
meetings to determine its policy in the House, and the decisions of
the majority at such meetings are deemed binding on the members
and usually obeyed. This is called 'going into caucus'.

The Executive. The President of the United States is chosen by
persons who are elected in each State for that purpose and that purpose
only. In every State the voters (i.e. the same voters as those who elect
members of Congress) elect on the Tuesday after the first Monday in
November every fourth year a number of Presidential electors equal to
the total representation of the State in Congress (i.e. two Senators plus
so many members of the House of Representatives). Thus New York
has 36 Presidential Electors, Pennsylvania 32, Delaware and five other
small States only three each. These Electors meet subsequently and
vote for the President. Should no person voted for receive a majority
of the votes of all the electors appointed, the choice of a President
goes over to the House of Representatives, which elects by States, each
State having one vote only, and an absolute majority being required.
Although it was originally intended that the Presidential electors
should be free to choose whatever person they thought best, it has long
since become the rule that they shall vote for the candidate nomi-
nated by the party which has chosen them as electors; and they are
in fact nothing more than a contrivance by which the people, that is,
the party which commands a majority of votes, chooses the President.
However, as the election takes place by States, and as even a very
small popular majority in a particular state can throw the whole elec-
toral vote of that State for one candidate, while in one or more
other States a very large popular majority can do no more than throw
the electoral vote of the State for the other candidate, it sometimes
happens that the candidate who gets the majority of the electors' votes,
and is therefore chosen, has not obtained a majority of the total pop-
ular votes cast. Another consequence of this device is that whereas
the contest is always very keen in States where parties are equally
balanced, it is quite languid where one party is known to have a
majority, because the greater or smaller size of that majority makes
no difference in the general result over the whole Union. The Presiden-
tial electors are now usually chosen by a popular vote all over each
State, but they were at one time chosen by the State Legislatures,
and also for a time, in many States, by districts. Michigan has recently
reintroduced the district plan.

The President must be thirty-five years of age and a native
citizen of the United States. He is legally re-eligible any number
of times, but custom (dating from George Washington) has estab-
lished the rule that he must not be re-elected more than once. He
receives a salary of $50,000 (10,000£).

The President's executive duties are of five kinds:
(a). He is commander-in-chief of the Army and Navy (and of State militia when in Federal service) and commissions all officers.

(b). He appoints all the chief and many minor officials, but the consent of the Senate is required, and is sometimes withheld, except to what are called Cabinet offices.

(c). He has a general supervision over the whole Federal administration and the duty of seeing that the (Federal) laws are duly executed. Should disorder arise anywhere which the State authorities are unable to suppress, they may invoke his aid to restore tranquility.

(d). He conducts the foreign policy of the nation, and negotiates treaties, which, however, require the approval of the Senate. The power of declaring war rests with Congress.

(e). He may recommend measures to Congress, and has the right, when a bill passed by Congress is sent to him, of returning it with his objections. If in both Houses of Congress it is again passed by a majority of two-thirds in each House, it becomes law notwithstanding his objections; if not, it is lost. This so-called Veto power has been largely exercised, especially by recent Presidents. Between 1884 and 1888 no fewer than 304 bills, most of them private or personal bills, were vetoed, and very few were repassed over the veto.

The Administration or Cabinet consists at present of eight ministers, viz.: Secretary of State (who has the conduct of foreign affairs), Secretary of the Treasury (Finance Minister), Secretary of War, Attorney General (Minister of Federal justice as well as legal adviser), Secretary of the Navy, Postmaster General, Secretary of the Interior (with charge of Indian Affairs, of the management of the public lands, and of pensions), Secretary of Agriculture. None of these, nor any other officer of the Government, can sit in Congress. They are appointed and dismissible by the President, and are primarily responsible to him rather than to Congress, which can get rid of them only by impeachment, a process applicable rather to specific offences than to incompetence, and not applicable at all to mere divergence of policy from that which the majority of Congress desires. The Cabinet is therefore something quite different from what is called a cabinet in European countries. It does not relieve the President of responsibility; he may consult it as much or as little as he pleases, and he need not be guided by its advice.

The Federal Judiciary. There are four sets of Federal Courts:

(a). The District Courts, 55 in number, in which the District Judges sit, receiving salaries of $5000.

(b). The Circuit Courts, held in the nine judicial circuits, and served by the Circuit judges, now 18 in number (salary $6000), together with a judge of the Supreme Court, one such judge being allotted to each circuit.

(c). The Circuit Courts of Appeal, entertaining appeals from the District or Circuit Courts.

(d). The Supreme Court, consisting of a Chief Justice and
eight puisne justices who sit at Washington and have original juris-
diction in cases affecting ambassadors, or where a State is a party to
the suit. In other cases they are a Court of Appeal from inferior
Federal Courts. The salary is $8000 ($8500 for the Chief Justice).

All these judges are appointed by the President with the consent of
the Senate, and hold office for life, unless removed by impeach-
ment. Only four have ever been impeached, and two of these were
acquitted. A place on the Supreme Bench is much desired and
prized; and the permanence of tenure secures a pretty high average
of knowledge and capacity, considering the smallness of the salaries
paid also in the inferior Federal courts.

The jurisdiction of the Federal Courts extends over the whole
Union, but is limited to certain classes of cases, civil and criminal,
the most important whereof are the following.

Cases affecting ambassadors and other foreign ministers, cases of
admiralty and maritime jurisdiction, controversies to which the
United States shall be a party, controversies between States, or
between citizens of different States, or between a State, or any of
its citizens, and any foreign State or its subjects or citizens, cases
arising under the Federal Constitution, or some law or treaty duly
made by the Federal government. If, as frequently happens in the
three last-mentioned sets of cases, the action has begun in a State
Court, there is a full right to have it removed into a Federal Court,
and this may be done even in an action which was supposed to in-
volve questions of State Law only, if in the course of the proceedings
some point of Federal Law arises. The result of these arrangements
is to secure to the Federal Courts the cognizance not only of all inter-
national and inter-State questions, but also of all those which in any
way depend upon Federal Legislation. Thus the arm of the National
Government is extended over the whole Union, each Federal Court
having an officer called the U.S. Marshal to execute its judgments,
and being entitled to demand the aid of the local authorities in case
of resistance.

There is nothing special or peculiar in the powers of the Supreme
Court, or of the American Federal Courts generally; nor have they,
as is sometimes supposed, a right to review and annul the acts either
of Congress or of the State Legislatures. The importance of their
functions arises from the fact that in the United States the Consti-
tution is the supreme law of the land everywhere, so that if any
Statute passed by Congress, or any Constitution enacted by a State,
or any Statute passed by a State Legislature, conflicts with the
Federal Constitution, such Statute or State Constitution is as a
matter of law invalid and null, and must be treated as such by all
persons concerned. The authorities whose function it is to ascertain
and determine whether it does or does not conflict with the Federal
Constitution are the Courts of Law; and as the Supreme Federal
Court is the highest court of appeal in all questions involving the
Federal Constitution, all important and difficult cases are carried to it and its decision is final. The Courts, and especially the Supreme Court, of each State exercise a similar function in cases where a State Statute is alleged to be in conflict with a State Constitution, the latter, of course, as being a law of higher degree, prevailing against the former. No court, however, pronounces upon the validity of a law unless in an action or other regular legal proceeding between parties, for the decision of which it becomes necessary to settle whether or no the law is valid. (In a few States, the Governor or the Legislature may consult the Supreme Court on constitutional points, but the opinions so given by a Court are not deemed to be binding like a judgment in an action.) As in all questions of Federal Law the State Courts are bound to follow and apply the decisions of the Federal Courts, so also in all questions of State Law, when these come before a Federal Court, such Court ought to follow and apply the decisions of the highest court of the particular State in question. That is to say, the Federal Courts are not higher than the State Courts, but have a different sphere of action, nor are they, except as regards questions arising under the Federal Constitution, called to overrule decisions of the State Courts.

General Working of the Federal Government. The salient feature of the Federal or national Government is that it consists of three departments, each designed to work independently of the other two. Thus the Federal Executive, the President and his Ministers, are independent of Congress. The President is elected (indirectly) by the people, and cannot be displaced by Congress (except by impeachment). The Ministers are appointed by the President, and cannot be dismissed by Congress nor even restrained in their action, except in so far as legislation may operate to restrain them; and as Congress is debarred from intruding into certain administrative details, its legislation cannot reach these. The President cannot dissolve Congress, which is elected for a fixed period, and cannot check its legislation, if there is a majority of two-thirds against him in both Houses. The conduct of foreign affairs, however, and the making of appointments belong partly to him and partly to the Senate, so that in this sphere he and one branch of Congress are closely associated. The third department, the Judiciary, is independent of the other two, for though its members are appointed by the President with the consent of the Senate, they cannot be ejected from office except by impeachment. All these departments are deemed to derive their respective powers directly from the people, Congress and the President by election, the Judges from the Constitution which the people enacted and which it is their duty to interpret. Thus the principle of Popular Sovereignty is consistently carried out. That principle is, however, even more conspicuous in the State Governments, because in them not only are all the leading officials directly elected by the people, and (in the great majority of the States) the
judges also, but also because the people constantly legislate directly (without the intervention of the State Legislatures) by enacting State constitutions or constitutional amendments. Although, however, in this aspect the Federal Government (and still more the State Governments) may appear to be very democratic, the following important restrictions have been provided to prevent sudden or violent change. (a) The Legislature, which is the strongest power, is divided into two coördinate and jealous houses. (b) The Legislature is further restrained by the veto of the President. (c) The Legislature is limited to certain subjects and disabled from certain kinds of action. (d) The President is held in check by Congress, which can refuse money, and by the Senate in foreign affairs and appointments. (e) He has, moreover, only a very small standing army at his disposal.

Conjoint Working of the Federal and State Governments. Although the Federal Government is in constant action by its laws, its officials, and its judges over the territory included in the States, comparatively little friction arises between the two sets of authorities. As respects elections, all State elections are conducted under State laws, Federal elections to some extent under Federal laws, so far as these have prescribed certain rules, but chiefly under State laws, because Congress has left many points untouched. As regards finance, all direct taxation is imposed by the State Legislatures, while the Federal Government raises its revenue by duties of customs and excise. The chief difficulties which have been felt of late years are connected with the divergences of law between the different States, especially as regards marriage and divorce, and with the control of commerce and the organs of transportation, especially railroads. The Federal Government can legislate only with regard to trade between the States and to navigable waters within more than one State and railroads so far as they carry traffic between States. Many intricate problems have arisen as to the respective scope of Federal and State action on such matters; but these have, since the Civil War, been peaceably adjusted by the Courts as interpreters of the Constitution.

Extra-State Dominions of the United States. Washington, the capital of the Union, stands in a piece of ground comprising 70 sq. M. which has been set apart as the seat of Federal Government, and is governed by three Commissioners appointed by the President. It is called the Federal District of Columbia. Alaska (purchased from Russia in 1867) is also directly governed by Federal officials (named by the President) and by statutes of Congress. As its population consists almost entirely of semi-civilized or savage Indians, it has no share in the government of the Union. The same remark applies to the Indian Territory lying to the W. of the State of Arkansas, where, however, the principal Indian tribes have made great progress in education and settled habite.

There are also three Territories (Arizona, New Mexico, and Oklahoma). The Union is a union of States only, and these districts,
still thinly peopled, have not yet been admitted to the dignity of
Statehood. Each Territory however enjoys local self-government,
having a legislature of two Houses which can pass Statutes, subject,
however, to the unrestricted authority of Congress to annul them and
legislate directly. In each of these there is a Governor appointed by
the President; and part of the law in force has been directly enacted
by Congress.

Each Territory sends a delegate to the Federal House of Repre-
sentatives who is allowed to speak but not to vote.

*Practical Working of the Government. The Party System.* The
character of the political institutions of the country has been so largely
affected by the political parties that a few words regarding their
organization and methods are needed in order to understand the actual
working of the Government.

Since the adoption of the Federal Constitution in 1788-89, the
people of the United States have been, except for a few years (from
about 1818 till 1826), pretty sharply divided into two parties. Oc-
casionally, three or even four parties have appeared; these however
have been short-lived. From 1789 till 1818 the two great parties
were the Federalists and (Democratic) Republicans; the Federalists
then disappeared, while from about 1830 till 1854 the Republicans,
now called simply Democrats, were opposed by a party called Whigs.
In 1856 a new party who took the name of Republicans came into be-
ing, carried the Presidential Election of 1860 and have continued
until now contending with the Democrats. Minor present parties are
the Prohibitionists and the so-called ‘Populists’ or People’s Party
(comp. Section ix of Introd.). Both the two great parties have created
and maintain themselves by exceedingly strong and well ordered
organizations, existing over the whole country as a body of political
machinery far more effective than has ever been seen elsewhere.
The causes which have made such machinery necessary are chiefly
these three.

Elections are very numerous, because all the chief State and
City officials and all members of representative assemblies are chosen
by the people and chosen for short terms. Even those official posts
which are not directly conferred by popular vote, such as all the
Federal offices, are usually held at the pleasure of the President or
some other high official, who has for the last sixty years been accus-
tomed to appoint members of his own party to them, dismissing those
whom he finds on coming into power, if they belong to the opposite
party. The desire to have or to retain these posts furnishes a strong
personal motive for exertion on behalf of a party, because one’s
livelihood may depend upon it. Moreover the social equality which
prevails generally in America prevents the masses from being dis-
posed to follow men conspicuous by rank, wealth, or intelligence, and
makes it necessary to have organizations in order to supply the ab-
sence of that spontaneous allegiance and natural grouping which do
much to hold parties together socially in the free countries of the Old World. As there are in the United States comparatively few persons with sufficient leisure to devote themselves to political work from purely public motives, it has been thought necessary that this work should be done by those who have a pecuniary interest in the success of their party; and these persons, making such work their profession, have been able to carry this political machine to an unprecedented point of effectiveness.

In every local area which elects an official or a representative (such as a City Ward or a Rural Township) each of the two great parties has a local association which selects from the resident members of the party a candidate to be run for every elective post or office at the next election. The meeting of the local members of the party which makes this selection is called a Primary Meeting. Where an election is to take place for a wider area (such as a Congressional district or a State Assembly district, or a City) the candidate is selected by a party meeting called a Convention, consisting of delegates from all of the primaries within that area. Where the election is that of the President of the United States, the party candidate is selected by a very large body called the National Nominating Convention, consisting of delegates chosen by Conventions held in the several States. The number of delegates to this greatest of all Conventions is double that of the number of Presidential electors plus two delegates from each Territory, that is to say, it is at present 900.

Very rarely does any candidate offer himself for election to any post unless he has been selected by a Primary or a Convention as the party candidate. Sometimes, however, in local elections (especially in cities) a third organization is created in view of a particular election or group of elections, which nominates what is called an 'Independent' or 'Citizens' candidate, outside the regular organizations of the two great parties. And when a third or fourth party (such as the Prohibitionists or the so-called People's Party) exists, it establishes in that part of the country where it has substantial strength, an organization like that of the Democrats or the Republicans; and nominates its candidates in the same way. Great importance is attached to 'getting the nomination', because a large number of voters in each party are disposed (especially in great cities) to adhere to the candidate whom the organization has chosen, with comparatively little regard either to the precise shade of his opinions or to his intellectual capacity. Great pains are therefore bestowed on securing the nomination, and where there are two local factions within a party, the strife between them over the nomination is often more bitter than that between the hostile parties. Bribery, personation, and even physical violence are sometimes resorted to in order to carry a nomination of delegates in a Primary or of candidates in a Nominating Convention; so that in many States it has been deemed needful to pass laws for regulating these party meetings and preventing corruption or
unfairness in connection with them. So, also, when the control of the nomination for the Presidency lies between two prominent and popular party leaders, the Convention is a scene not only of active and protracted intrigue behind the scenes, but of passionate excitement during the voting.

This system of party machinery, and the habit which the voters have of supporting those candidates only whom the official machine nominates, have become one of the main causes of misgovernment in the largest cities. In those cities there is a large poor and comparatively ignorant multitude which, since it pays an exceedingly small part of the local taxation, has a very slight interest in economical and prudent administration. It falls easily under the dominion of leaders belonging to its own class who care little for real political issues, but make their living out of the city offices and the opportunities of enrichment which such offices supply, and it votes blindly for the candidates whom those leaders, through their control of the organization, put forward as the 'regular party candidates'. These candidates are, of course, in league with the men who 'run the machine'; and when they obtain office, they reward their supporters by posts in their gift, sometimes also by securing for them impunity from punishment, for in the lower parts of some cities the nominating machinery has fallen into the grasp of cliques which, if not actually criminal, occasionally use criminals as their tools. Another source of the strength of these dangerous elements in politics has lain in the profuse use of money. Bribery has been not uncommon, both in City, State, Congressional, and Presidential elections. Efforts, however, which seem likely to be successful, have lately been made to repress it by the adoption in nearly all the States of laws creating a really secret ballot. Some States have also sought to limit election expenditure; and it may be said generally that the spirit of reform is actively at work upon all that relates to the election system. Intimidation is rare, except in the Southern States, where it is still occasionally, though much more rarely than twenty years ago, practised upon the negroes. Seeing that the great majority of the negro voters are illiterate and possessed of little political knowledge, white men otherwise friendly to the coloured people justify both this and the more frequent use of various tricks and devices as the only remedies against the vils which might follow the predominance of the coloured vote in those States, where the whites are in a minority.

As visitors from Europe, who usually spend most of their time in the great cities, are apt to overestimate these blemishes in the democratic institutions of the U. S., it is well to observe that they are far from prevailing over the whole country, that they are not a necessary incident to democratic institutions but largely due to causes which may prove transitory, and that they do not prevent the government both of the Nation and of the States from being, on the whole, efficient and popular, conformable to the wishes of the people and
XI. ABORIGINES

sufficient for their needs. — There is no Established Church in the United States, nor is any preference given by the law of any State to any one religious body over any other body, although such was formerly the case in the older States, and might be now enacted, so far as the Federal Constitution is concerned, in any State. However all the States have, each for itself, pronounced in favour of absolute religious equality and embodied such a provision in their respective constitutions. When questions relating to the temporalities of any ecclesiastical body or person come before the courts of law, they are dealt with by the ordinary law like other questions of contract and property. Religious feeling seldom enters into political strife, and there is a general desire to prevent its intrusion either in Federal or in State matters.

XI. Aborigines and Aboriginal Remains,

by

Professor O. T. Mason,

of the Smithsonian Institution.

The aboriginal history of the United States divides itself into two chapters, the Archaeologic and the Ethnographic. The former relates to a period about whose beginning there is much dispute and whose close shades into the latter imperceptibly. The ethnographic chapter opens with the romantic adventures of Ponce de Leon (p. 401) in Florida with the Timucua Indians and is not yet closed.

I. Archaeology. The archaeologist from abroad will find in the United States no such imposing ruins as meet his eyes everywhere in the Old World. Not even with Mexico or Central America or Peru can the ruins scattered over the Federal Republic enter into competition. The same is true of the age of these relics. It has been both alleged and disputed with vehemence, and that by eminent authorities on both sides, that at Trenton (p. 228), Madisonville and Comerstown in Ohio, Little Falls in Minnesota, Table Mountain in California, and elsewhere, palæolithic man, away back in glacial times, left traces of his existence. But the true remains of antiquity within the borders of the United States are the shell-heaps, bone heaps, and refuse-heaps; the ancient quarries, workshops, and mines; evidences of primitive agriculture; graves and cemeteries; mounds and earthworks; pueblos, cliff-dwellings, and cave-dwellings; trails, reservoirs, and aqueducts; pictographs and sculptures; relics of ancient arts and industries; crania and skeletons belonging to vanished peoples. And these relate to a grade of culture upon which all advanced races once stood. These remains and relics are quite unevenly distributed over the States, just as populations and industrial centres are scattered to-day.

Shell-Heaps, Bone-Heaps, Refuse-Heaps. Along the Atlantic Coast, up and down the great affluents of the Mississippi, on the shores of the Gulf of Mexico and of the Pacific Ocean, are vast accumulations of shells, left by former savage tribes. Mingled with the
AND ABORIGINAL REMAINS.

shells are bones of the dead and the apparatus which they used in
their lifetimes. In each locality the mollusks whose remains are
discovered were of those species which still abound in the region. The
most celebrated shell-heaps are found along the New England shores,
in the Chesapeake Bay, throughout Florida, in Mobile Harbour, on
the Tennessee River, at Santa Barbara and San Francisco in Cali-
fornia, and about the shallows in Washington State. Bone-heaps are
found on the plains of Dakota and are the remains of ancient buffalo
feasts. The refuse-heaps are all that is left on ancient Indian camp
sites, and there is scarcely a town in the Union that is not near one
or more of these old habitations of the past.

Quarries, Workshops, and Mines.† The aborigines of the United
States had no other industrial life than that which belongs to the
stone age. They quarried quartz, quartzite, novaculite, jasper, argil-
lite, steatite, catlinite, slate, mica, volcanic rocks, always from the
best sources of the material. The quarrying was, of course, simply
the opening of shallow pits and drifts, by means of the rudest tools
of wood, antler, and bone; and in the exercise of the most rudimentary
engineering. They blocked out the art product at the quarry, leav-
ing millions of spalls and rejected pieces, which resemble somewhat
the so-called palæolithic implements. They manufactured these sub-
stances by flaking, chipping, pecking, boring, sawing, and grinding,
using as tools hammers, saws, drills, polishers, etc., of stone and
other materials at hand. Copper abounded in the W. central states,
the raw material coming from Keweenaw and Ontonagon counties,
Michigan. This copper was not smelted, but treated as a stone. It
was cold-hammered on stone anvils with stone hammers, ground
into shape on sandstone, and finished after the manner of a stone
implement.‡ All the relics of the ancient Americans of this region
are of the neolithic type, though the tourist will doubtless be told
that this is not true and will be shown all sorts of marvellous things.

Primitive Agriculture.+++ Not only are finished implements re-
covered that must have been used in rude tillage; but, in S. Michigan
especially, the whites found that they had been anticipated. Garden
beds or rows were discovered, where maize, pumpkins, beans, and
other indigenous plants had been cultivated.

Graves and Cemeteries.++++ The best-known antiquities of the

United States are the ancient cemeteries, the mounds, and the earthworks. It is very difficult to discover an Indian grave to the E. of the Alleghenies or to the W. of the 100th meridian. Within those limits they occur everywhere. The disposal of the dead was different in all the families of tribes. Inhumation, embalmment, inurning, surface disposal, aerial sepulture, aquatic burial, cremation, all had their advocates and practitioners. The most celebrated cemeteries are at Madisonville (Ohio), near Nashville (p. 357), and near Santa Barbara (p. 497).

'Within this territory are the copper mines of Lake Superior, the salt mines of Illinois and Kentucky, the garden beds of Michigan, the pipe-stone quarry of Minnesota, the extensive potteries of Missouri, the stone graves of Illinois and Tennessee, the workshops, the stone cairns, the stone walls, the ancient roadways, and the old walled towns of Georgia, the hut rings of Arkansas, the shelter caves of Tennessee and Ohio, the mica mines in South Carolina, the quarries in Flint Ridge (Ohio); the ancient hearths of Ohio, the bone beds and alabaster caves in Indiana, the shell-heaps of Florida, oil wells, and ancient mines and rock inscriptions'. [Peet, 'The Mound-Builders: their works and their relics' (Chicago; p. 35).]

Both mounds and earthworks are, however, to be seen sparingly everywhere. The largest mounds in the United States are in Illinois, opposite St. Louis (p. 349), and no one should spend a day in that city without taking a trip across the great steel bridge and visiting the *Cahokia Mound* near E. St. Louis. In the neighbourhood are over fifty others of enormous size. In the cemetery at Marietta (p. 296), and at Grave Creek, on the Ohio river, 12 M. below Wheeling (p. 293), may be seen mounds of great size.† The most famous tumulus in the United States is the *Great Serpent Mound* (p. 347), which, with the land adjacent, is the property of the Peabody Museum, in Cambridge (p. 94).‡

To the E. of the Rocky Mountains, the most interesting remains are the earthworks. And of these there are two sorts, those designed for defence and those erected for ceremonial purposes. The former are found on bluffs and tongues of land with precipitous sides. These natural forts are strengthened by ditch banks and stone heaps and gateways covered within and without by mounds. The latter, on the contrary, are in exposed plains. Their ditch banks are in circles and polygonal figures and the parts are arranged as for religious and social occasions.

Besides those already mentioned the following defensive and ceremonial works may be mentioned (all in Ohio): — the Great Mound, at Miamisburg; Fort Ancient, Warren Co.; the Newark Works; the Alligator Mound,

‡ Putnam, Century Magazine. March and April, 1890.
near Granville; the Stone Fort, near Bourneville; the Fortified Hill in Butler Co.; the Liberty Township Works; and the Hopeton Works.

Consult Thomas's Catalogue for full list (Bulletin of the Bureau of Ethnology, Washington); also Smithsonian Contributions, Vol. I.

**Pueblos, Cliff-dwellings, and Cave-dwellings.** In the drainage of the Colorado and the Rio Grande, within the boundaries of Colorado, Utah, New Mexico, Arizona, and the N. tier of Mexican states are the pueblos and the cliff-dwellings. Twenty-one pueblos along the Rio Grande, between 34° 45' and 36° 30' N. lat., are still inhabited by two different stocks of Indians, the Tañoan and the Keresan. The Zuñi, residing near the W. border of New Mexico, on the 30th parallel, speak an independent language; and the Moki, on the reservation of the same name, N.E. Arizona (see p. 465), dwelling in seven towns or pueblos, belong to the Shoshonean linguistic stock. Besides these inhabited villages of stone and adobe, there are many hundreds in the territory just named that have long been tenantless, and most of them are in ruins. The largest of them and by far the most imposing ruin within the United States is the Casa Grande (see p. 518), or Casa de Montezuma, which, Bancroft says,† has been mentioned by every writer on American antiquity. The material is adobe made into large blocks. Three buildings are standing, one of them sufficiently preserved to show the original form. The largest collection of ruined pueblos in this region yet examined was surveyed by the Hemenway S.W. Expedition in 1888. The group lies on the Salado river, near the town of Phoenix (p. 518).‡

In the cañon regions bordering and opening into the Colorado river channel, especially upon the San Juan and the Dolores and their tributaries, are to be found cliff and cave dwellings innumerable. These are easily explained by the nature of the geologic formations. In the precipitous walls there are strata of soft stone sandwiched between layers of hard material. The action of the elements has carved out these soft layers, leaving a roof above and a floor below upon which the ancient cliff-dweller built his home. Indeed, he did not wait for the frost and the rain to do the work, but with his pick-axe of hard basalt dug out a cave for himself by making a tiny doorway in the face of the cliff and excavating behind this as many chambers as he pleased. Many of these cliff and cave habitations are high up and difficult of access, but they overlook long valleys of arable land.+++ The relics found in this region are the envy of collectors, and the natives still manufacture excellent pottery, to imitate the old. The ancient is far superior in quality to the new, and hundreds of dollars are paid for a single piece, though fragments of the finest ware may be had for the picking up.

**Trails, Reservoirs, and Aqueducts.** For the purposes of war and

Barnes's United States. 2nd Edit.
trade the savages traversed the United States from end to end. They had no beasts of burden save the dog, consequently they made portages from stream to stream, carried their canoes and loads across on their backs, and then pursued their journey. The traces of these ancient paths of primitive commerce may yet be seen. In the same rude manner these savages had learned to store up and conduct water for home use and for irrigation. Especially in the South West are the works of this class to be studied.

Pictographs and Sculptures. The very ancient people and their modern representatives had attained to that form of writing called pictographic. The traveller will see in museums all sorts of figures scratched on bark, painted on skin or wood, etched on bone or ivory, engraved on pieces of stone, and he will often come upon the same designs sketched on cliffs and boulders. These constitute the written language of the aborigines. In true sculpture they were not at all adept and they had no alphabetic writing. Once in a while mysterious bits of stone turn up with Cypriote or other characters thereon, but they never belonged to the civilization of this continent.

Relics of Ancient Art. As before mentioned the native tribes were in the neolithic stone age. Therefore, it is not exaggerating to say that the whole surface of the United States was strewn with relics. In every ancient grave, mound, or ruin they abound. The tourist will have no trouble to find in every town a museum containing these objects and in every hamlet some one whose house is packed with them. So desirable are they that thousands are fraudulently made and palmed off upon the unwary. These spurious objects find their way into foreign collections and very much embarrass the problems of archaeology.

Crania and Skeletons. Much difficulty has been encountered by archaeologists in distinguishing the crania of the truly prehistoric American from those of the Indians encountered by the early explorers. The problem is further embarrassed by artificial deformations and by changes produced by the pressure of the soil. Excellent collections exist in Cambridge, Philadelphia, Washington, Cincinnati, and St. Louis.†

Ethnography. The native tribes that once covered the entire domain of the Union belonged to fifty independent linguistic stocks. Some of these were spread over vast areas, for example, the Algonkian, Athapascan, Iroquoian, Muskogean, Shoshonean, and Siouan. But the majority of stocks occupied small areas, chiefly along the Pacific coast.‡

But a wonderful change has come over the surface of the United States in two centuries. Excepting a few small settlements of In-
Indians here and there, they are gone from the Atlantic States. Only the Cherokees in North Carolina, the Seminoles in Florida, the Iroquois in New York, and the Chippewa tribes about Lake Superior remain to the E. of the Mississippi river. The aboriginal title gave way to the title of discovery, and the feeble Indian title of occupancy has been swept away by the tide of European immigration.

There are at present, as regards title and legal status, several kinds of Indians in the Union.

1. Citizen Indians. The State of Massachusetts and the United States in certain cases have conferred upon Indians the full rights of citizenship.

2. In a few states, notably New York, reservations are granted to Indians and they are protected in their tribal rights therein.

3. Roving Indians are still at large in greater or smaller bands, especially in the Rocky Mountain region.

4. In acquiring its S.W. territory from Mexico the United States inherited three kinds of Indians: the Pueblo Indians, the Mission Indians, and the wild tribes. The status of these is most confusing.

5. But the great mass of Indians in the Union are in some sort of relation to the United States and hold their lands by (1) Executive Order, (2) by Treaty or by Act of Congress, (3) by Patent to the tribe, (4) by Patent to individuals.

For the relinquishment of their ancient homes the United States has also entered into agreements to pay to the tribes certain annuities in money and goods. Under these circumstances there are some of them who are the richest communities in the world. In the Osage tribe every man, woman, and child is worth $1500. The five civilized tribes in the Indian Territory and the New York Iroquois preserve their autonomy and make their own laws, but also have a government agent. Many thousand Indians have their lands 'allotted' and thus have lately become citizens, the title to the land being inalienable for 25 years.†

XII. Physiography of North America,

by

N. S. Shaler,

Professor of Geology in Harvard University.

Although the traveller in North America may be most interested in the people or their social and material accomplishments, he will find it desirable at the outset of his journey to consider the physical conditions of the land, the nature of the climate, soil, and under earth: — circumstances which have gone far to determine the history and development of the people who have come to the country from the old world.

The continent of North America is in many ways sharply contrasted with that of Europe. The last-named land consists mainly of great peninsulas and islands, which are geographic dependencies of the great Asiatic field. It is, indeed, a mere fringe of the great Eurasian continent. North America, on the other hand, is a mass of land distinctly separated from other areas, with a relatively undiversified shore, and with an interior country which is but slightly divided into

isolated areas by distinct geographic features such as seas or mountain-chains. This geographic unity of the N. part of the New World is due, as is the case with all its other conspicuous features, to the geological history of the country; it will therefore be well to preface the account of its detailed features by a very brief description of the steps by which its development was brought about.

In the Laurentian age, the earliest epoch which geologists can trace in the history of the earth, the continent of North America appears to have consisted of certain islands, probably lying in the neighbouring seas beyond the present limits of the land, the positions of which are as yet unknown. In the Cambrian period we find the Laurentian rocks, which were formed on the older sea floors, raised above the ocean level, and constituting considerable islands, the larger of which were grouped about Hudson’s Bay, there being smaller isles in the field now occupied by the Appalachian Mountains and in that of the Cordilleras, as we should term those elevations which lie between the E. face of the Rocky Mountains and the ranges which border the Pacific Coast.

From the débris of the ancient islands which prefigured the continent, together with the deposits of organic remains accumulated in the seas, the strata of the Silurian and Devonian ages were formed. These in turn were partly uplifted in dry land, thus adding to the area of the imperfect continent by the growth of its constantly enlarging island nucleus. Yet other marine accumulations, formed in the now shallowed seas, afforded the beginning of the carboniferous strata. The accumulation of these beds and the slow uprising of the land soon brought the continent to a state where there were very extensive low-lying plains forming a large part of what is now the Mississippi Valley, as well as the field now occupied by the Allegheny Mts., which then had not been elevated, and forming a fringe along the E. coast of the continent. On these plains there developed extensive bogs, which from time to time were depressed beneath the level of the sea and buried beneath accumulations of mud and sand, thus affording the beginning of the coal beds which constitute so important a feature in the economic resources of the country.

After the close of the great coal-making time the Allegheny Mountains were uplifted, and the ranges of the Cordilleras begun in earlier times were much increased in extent. From this period of the new red sandstone or Trias, we may fairly date the probable union of the original scattered islands of the continent, which had now taken much the shape it has at present. The great interior sea, the remnant of which now forms the Gulf of Mexico and which in the earlier ages had divided the Cordilleran from the Appalachian lands, still extended as a narrower water far to the N., but in the Jurassic and Cretaceous time, this Mexican Sea shrunk away with the uplifting of the land, and its place was occupied by a vast system of fresh water lakes stretching along the E. front of the Rocky Mountains.
These basins endured for many geological periods; they were, however, gradually filled with the detritus from the mountains of the West.

In the Tertiary period, the last great section of geologic time, North America gradually assumed its existing aspect. The Great Lakes before mentioned were gradually filled, the lowlands of the S. states and of the Atlantic coast to the S. of New York rose above the sea, and the mountains of the Cordilleras gained a yet greater measure of elevation. In the closing stages of this Tertiary time there came the glacial epoch, during which the ice sheets, now practically limited to Greenland and Alaska, were extended so as to cover nearly one-half of the continent, the margin of the snowy field being for a time carried as far S. as the Potomac and the borders of the Ohio River at Cincinnati, mantling the region to the N. with an icy covering having a depth of several thousand feet. At this stage of the geological history the N. portion of the land was deeply depressed, while the S. portion was much elevated. When the ice went off, the continent, at least in its E. part, remained for a time at a lower level than at present. Only in what we may term the present geologic day has the continent quite recovered from the singular disturbance of its physical and vital conditions which the ice time brought about.

One of the most important results of the geological history of North America has been the development of this continent to a point where its surface is characterized by certain broad and simple topographic features. It is, indeed, on many accounts, the most typical of the greater land-masses. The eastern and western shores are bordered by tolerably continuous mountain ranges; those facing the Atlantic extend though with various interruptions from Greenland to Alabama; those next the Pacific from the peninsula of Alaska to Central America. South of the Rio Grande these Cordilleras form the attenuated mass of the continent in which lie Mexico and the states of Central America. Between these mountain ranges and the neighbouring oceans there is a relatively narrow belt of plains or low-lying valleys. The principal portion of the continental area, however, lies between these mountain systems in the form of a great shallow trough. The southern half of this basin constitutes the great valley of the Mississippi. Its northern portion is possessed by various river systems draining into the Arctic and Atlantic Oceans, of which the Mackenzie and the St. Lawrence are the most important. The last named river system is peculiar in the fact that it is the greatest stream in the world which is fed mainly from lakes.

If we could contrast this over-brief story of the geological development of North America with a similar account of the leading events which have taken place in Europe, we should readily note the fact that the former land has had a relatively simple history. Fewer mountain systems have been developed upon it, and consequently its shores lack the great peninsulas and islands which are so characteristic a feature in the old world. To this same architectural sim
plicity we may attribute the generally uniform character exhibited by the interior portions of the continent.

The conditions of the ancient history of North America have served to provide its fields with an abundant and precious store of the materials which fit its lands to be the seats of a varied and complicated economic life. Of these underground resources we can only note the more important. First among them we may reckon the stores of burnable material: — coals, petroleum, and rock or natural gas, substances which in our modern conditions have come to be of the greatest consequence to mankind. The Coal Deposits of North America are on the whole more extensive, afford a greater variety of fuel, and are better placed for economic use than are the similar deposits of any other continent. They range in quality from the soft, rather woody, imperfectly formed coals known as lignites, to beds which afford the hardest anthracites, coals so far changed from their original condition that they burn without flame much in the manner of charcoal. The greater part of the good coals lie in the region to the E. of the Mississippi, while the lignites and other poorer fuels are found in the country between that great river and the Pacific Ocean. The excellent coals both of the E. and W. were generally formed during the carboniferous age; the lignites and other poorer materials of this nature were almost altogether accumulated in the Cretaceous and Tertiary periods.

The Petroleum of North America occupies a larger portion of the country and affords a more ample supply of the material than those of any other land save the region about the shores of the Caspian Sea, known as the Baiku district. The best of the American wells lie in the basin of the Ohio River. Traces of similar deposits occur at various points in the Cordilleras and on the coast of California. All the more valuable petroleum deposits of America lie in rocks below the lowest coals in strata of the Devonian and Silurian ages, where they were formed by slow chemical change of the fossil remnants of ancient marine life. The abundance of these accumulations of petroleum in North America is due to the fact that the beds in which the fluid has been formed lie in horizontal attitudes, in a position where the fluid has been retained by the unbroken strata notwithstanding the great pressure of the rock gases which tend to drive it forth to the surface.

The Natural or Rock Gases which of late years have played an important part in the industries of this country, serving for fuel and for illuminating purposes alike, owe their origin and preservation to the same conditions which have brought about the accumulation of petroleum. These substances, though the one is fluid and the other gaseous in form, are chemically akin, and are indeed only varied results of the same natural actions. They are both alike often formed in rocks where the strata abound in fossils. The reason why these materials do not often occur in Europe is probably due to the
fact that the strata of that country have been so much ruptured and tilted by the mountain-building forces, which have affected almost every part of that country, that oil and gas have alike escaped to the surface of the earth by passages which these dislocating actions have provided for them. In North America on the other hand, where vast areas of strata still lie in substantially the same position in which they were formed, the substances have been to a great extent retained in the rocks where they were produced.

The store of rock gases known to exist in this country will probably be exhausted within twenty years of the present time. The resources in the way of petroleum are also likely to be used before the middle of the next century. The fuel in the form of coal exists in such quantity that there is no reason to apprehend a serious diminution of the store for many centuries or perhaps even thousands of years to come.

Next in importance after the fuels of North America, we may rank the ores from which Iron can be manufactured. These exist in great quantity in almost every important district of the continent, and at many points they are very advantageously placed in relation to supplies of fuel and to the transportation routes. The largest, though not the richest, store of iron ores in North America lies in the district of the Appalachian Mountains between the Potomac River and S. Alabama. In this field the ores have the general character of those which have afforded the basis of the great industry in Great Britain. As in that country, these Appalachian deposits are very favourably placed in relation to coke-making coals with which they are to be smelted. The other conditions for the development of the great industry are in this district also very favourable, so that experts in the matter look to this field as likely to be the principal seat of iron production in North America.

Next after the Appalachian field, the most important deposits of iron ore in North America lie in the region about the head of Lake Superior. In this field the deposits are of a very high grade, but they are much more costly to mine than those before referred to and they are unfortunately far removed from the coking coals of Pennsylvania and Kentucky, which are the nearest good fuels to the Lake Superior mines. It is now the custom to convey these ores mainly to the coal district about the headwaters of the Ohio River. The Cordillerean district abounds in iron ores, but as these Western iron ores are rarely near coals fit for use in furnaces, they cannot be regarded as of great economic importance. The ores from the region to the E. of the Mississippi afford the basis for an iron manufacturing industry which has already equalled that of Great Britain, and at its present rapid rate of growth gives promise of exceeding that of all European countries before the end of the present century.

The Copper Deposits of North America are to be ranked as next in importance to those which afford iron. Ores of this nature are
extensively diffused in the older rocks of this country, but it is only in N. Michigan and in the Cordilleras that they have been proved to have great economic value. In the Michigan district the material occurs in a metallic form, and in such abundance that, notwithstanding the very high price of labour in that region, the product of the mine goes to the world's markets under conditions which enable the establishments to compete with the production of any other country. In the Cordilleras of North America the metal occurs, as is usual in other lands, in the form of ordinary ores, but the deposits are of such great extent and richness that they have proved very profitable.

The mines producing Zinc and Lead are now practically limited to Missouri and the Cordilleras, though a portion of the former metal is still obtained from New Jersey. A large part of the lead which now enters the markets of this country is obtained from the silver ores of the Rocky Mountain district, and as it is won as a by-product, it is produced at a low cost.

The Gold and Silver Fields of North America, which have considerable economic value, are altogether limited to the mountainous district in the W. part of the continent. The S. portion of the Appalachian system afforded in the early part of this century, with the cheap slave-labour of that country, profitable mines of gold, but efforts to work the deposits since the close of the Civil War have proved universally unprofitable. There are a few successful gold mines in Nova Scotia, but they are commercially unimportant. The evidence goes to show that the Cordillerean region alone is to be looked to for large supplies of the precious metals.

Various other metalliferous ores exist in North America and play a subordinate part in its mining industry. Tin occurs at many points, but it has so far proved unprofitable to work the deposits, the main reason for the failure being the cost of labour involved in the work of production. Doubtless the most important of these less valued elements of mineral resources which the continent of North America affords is the group of fertilizing materials which of late years have come to play so important a part in the agriculture of this and other countries. The Phosphate Deposits of the S.E. part of the United States, particularly those of South Carolina and Florida, are now the basis of a large industry.

The soils of North America have, as the agricultural history of the country shows, a prevalingly fertile nature. In the region to the E. of the Mississippi within the limits of the United States over 95 per cent of the area affords conditions favourable for tillage. This region of maximum fertility extends over a portion of the area to the W. of the great river, but from about the 100th meridian to near the shores of the Pacific the rainfall is prevalingly insufficient for the needs of the farm. Crops can in general only be assured by a process of artificial watering, and the whole of the great Cordillerean field within the limits of the United States, and a large portion of that area in the
republic of Mexico, a district amounting to near one-third of the continent, which would otherwise be fit for agriculture, is rendered sterile by the scanty rainfall. On this account the continent has as a whole less arable land in proportion to its size than Europe; moreover, more than one-fifth of its fields lie so far to the N. that they are not suited for agriculture; thus not more than three-fifths of the continent is naturally suited for husbandry. It should be noted, however, that the fields richest in metals lie in the arid districts, and that in this part of the realm there are areas aggregating more than 50,000 sq. M. which can by irrigation be made exceedingly productive and will afford a wide range of crops.

The climate of North America is prevailingly much more variable than that of Europe. Between the arctic regions and the warm district of the tropics, there are no mountain barriers, and the land is so unbroken by true seas that the winter winds are not tempered or obstructed in their movement. The result is that the summer heat, even as far N. as the northernmost cultivated districts of Canada, is great and commonly enduring, while the winter's cold occasionally penetrates to the borders of the Gulf of Mexico, even S. Florida being liable to frosts of sufficient severity to destroy the more sensitive tropical plants. The only portion of the United States which has tolerably equable atmospheric conditions, is the coast belt of the Pacific from San Francisco to the S. This region has a climate in many ways resembling that of N. Africa.

The peculiarities of surface and of climate which result therefrom give rise in North America to certain classes of storms which are little known in any other land. In the region of the Cordilleras great whirling movements of the air arise in places where the barometer is low, which move with considerable speed to the E. across the country. Passing beyond the Atlantic coast-line, these great circular storms, which generally have a diameter of several hundred miles, continue their way over the ocean, and often after a due time appear on the coast of Europe. In the landward part of their journey these storms rarely have such severity as to damage property. It often happens, however, especially during the spring season, that on the S.E. face of these advancing cyclones, small but very intense whirlings of the air are produced, which are known as tornadoes. These accidents often give rise to winds of singular intensity, movements of the air so energetic that they may disrupt the stoutest buildings, throw railway trains from the track, and by the upward rush of the atmosphere in their centres lift the bodies of men and animals to the height of hundreds of feet above the earth. Fortunately the paths of these tornadoes, or hurricanes, as they are locally called, are relatively very narrow, and the distance to which they course in their N.E. movement is short. The breadth of their destructive path rarely exceeds half-a-mile, and the distance to which the destruction is carried is generally less than twenty miles. Although occasional
visitations of this nature have been experienced throughout all the
United States to the E. of the Rocky Mountains, the district in
which they are really to be apprehended and where they are likely
to prove in a considerable measure destructive to life and property,
appears to be limited to the N. and central parts of the Mississippi
Valley, and the basin of the Ohio River north of Central Kentucky.

The waters of the Gulf of Mexico and of the neighbouring Carri-
bean Sea, as well as the shores of the main land and islands of that
realm, constitute a field where another class of air-whirlings, the
marine cyclones, also termed hurricanes, are frequently developed.
These storms are much more enduring and more powerful than those
formed upon the land; they often march from the regions where they
are developed slowly up the Atlantic coast of the United States un-
til they gradually penetrate to a realm of the sea where the air next
the surface is so cool that they no longer receive the impulse which
led to their development. These marine cyclones find their parallel
in similar atmospheric convulsions which affect the Indian Ocean and
the China Seas. In both realms the disturbance of the atmosphere
is due to the heated condition of the air next the surface of the
ocean, and its consequent upward movement into the upper parts of
the aerial realm. The whirling movement is the simple consequent
of this ascent of the air through a narrow channel. It finds its like-
ness in the whirling imparted to the water in a wash-basin when it
flows through the opening in the bottom of the vessel.

Another class of atmospheric actions in a measure peculiar to
North America is found in the 'Cloud Bursts', or sudden torrential
rains, which occasionally though rarely occur in the E. portion of the
Cordilleras. In these accidents, though the region is on the whole
arid, the rain occasionally falls over an area of limited extent with such
rapidity that the air becomes almost unbreathable, and dry stream
beds are in a few minutes converted into raging torrents. Although in
their characteristic intensity these cloud bursts are limited to certain
parts of the W. mountain district, a conspicuously rapid precipitation
occasionally occurs in the more E. portion of the United States.

In its original state, that in which it was found by the first Eu-
ropians who landed on its shores, the E. part of North America was
seat of the greatest forest of broad-leaved trees, intermingled with
pines and firs, which the world afforded. Although this noble Appa-
lachian forest has suffered much from axe and fire, it still in part
remains in its primal state, forming a broad fringe of arboreal vege-
tation from the Gulf of St. Lawrence to Central Texas, extending
inland to the central portion of the Ohio Valley and up the Missis-
sippi to near its confluence with the Ohio and Missouri Rivers. To
the N. and W. of this great woodland lay a region of generally tree-
less plains. The district of the Cordilleras was scantily forested, and
along the Pacific Coast and on the W. slope of the Sierra Nevada from
Central California to the N., extended noble forests of narrow-leaf
trees. Across the N. part of the continent the heavy growth of timber, somewhat stunted by the severity of the climate, extended from the Pacific to the Atlantic shores. As a whole the continent bore an ampler mantle of forest growth than any part of the old world beyond the limits of the tropics.

The traveller who for the first time visits North America should take care not to hamper his vision by pre-conceptions as to the beauty of natural scenery based upon the physiography of the old world. As a whole the aspect of the N. continent of the new world differs greatly from that of the old. In the former land there are none of those admirable combinations of snow-clad mountains and fertile valleys which lend such a charm to the scenery of Switzerland. In general the surface lacks those elements of detail which contribute so much to the picturesque aspect of a landscape. The scenery of North America is generally characterized by a largeness of mould and simplicity of outline dependent on the relatively uncomplicated nature of its geological history. The plains are vast and but little varied by elevations. The mountains of the Appalachian district have a singular continuity in their ridges, which, though it gives them a certain architectural beauty, deprives them of detail. The grander elevations of the Cordilleras, though attaining to about the altitude of the Alps, rise from a much more elevated base than the Swiss mountains, and therefore make a less striking impression upon the eye. At few points on the continent do mountains or even considerable hills come near to the coast, and the result is that the shore line has a monotony of aspect which is much contrasted with the sea margin of Europe.

The lovers of picturesque beauty in nature may well seek in North America the charm of its primæval forests, the beauty of its great plains when they bear their spring-time flowers, and the attractions which are presented by the greater rivers with their noble valleys and often marvellous gorges. Of these canons or defiles cut by the streams, those of the Cordilleras are by far the greatest in the world. That of the Colorado and that of the Yosemite, each in its way eminently peculiar, and differing one from the other in origin and in aspect, are doubtless the most striking features of the continent, for they are unequalled in any other land.

The history of the aborigines in North America shows that this continent was only moderately well fitted for the nurture of races in their steps of passage from the primitive condition of man towards the ways of civilization. Though a remarkably fertile region, and abounding in game, the land contains none of those fortunate peninsulas, or districts walled about by mountains or the sea, which in the old world have afforded such admirable cradle-places for infant states. Thus it came to pass that in this country any tribe which attained some advance in civilization and became worth plundering was subjected to unending incursions from the neighbouring more savage folk. Only in Mexico and Central America did any of the primitive tribes advance beyond the stages of barbarism. The better fortune of those countries was probably due in the main to their more secluded positions. Moreover in North America the primitive people found no animals which were well suited for domestication or could render much help to man. The only beast which gave much promise of such aid, the bison, though a domesticable animal, has proved on the whole intractable and unfit for the uses of man.

The united conditions of the continent which made it on the whole unsuited for the nurture of peoples in the first stages of their advance has been an advantage to the European folk who have been transplanted to this part of the new world. The simple geographic character of the country has made access to its different parts relatively easy, and brought about its subjugation to the uses of man with marvellous rapidity. Some have feared that owing to the lack of diversities in the conditions of the continent, the people developed upon it would have an excessive uniformity in character and quality. The history of the populations, however, seems to show that the variety in climate, in soil or under-earth products,
and in the occupations which these features require of people, are sufficient to ensure considerable difference in the folk developed in different sections of the land. Under the mask of a common language, which, though varied by provincial peculiarities, is a perfect means of communication among the greater part of the folk to the N. of Mexico, the acute observer will detect varieties in essential quality quite as great as those which separate the people who dwell in different parts of Great Britain, France, or Germany. Though in some part these peculiarities may have been due to the diverse origin of the folk, they are in the main to be attributed to the effects of the local conditions of climate and occupations.

It is evident that the climate of North America, except those parts which have a subtropical character and the regions of the Far North which are too cold for tillage, are admirably suited to the uses of the European peoples from the states in the N. part of that continent. The descendants of the colonies from England, France, and Germany planted on this soil more than two centuries ago between Florida and Labrador have all greatly prospered. They have increased in numbers at a more rapid rate than their kindred of the old world, their average life is as great if not greater, and their endurance of labour of all kinds is in no wise diminished. The history of the Civil War shows that in the essential qualities these men of the new world have lost nothing of their primitive strength.

Fortunately for the transplanted population of America, the conditions of soil, climate, and earth-resources permit the people to continue on the ways of advancement in the occupations of life which were trodden by their forefathers in the old world. The agriculture and the mechanic arts required no change whatever on the part of the immigrants; the nature of the country seemed to welcome them to the new-found shores.

XIII. Climate and Climatic Resorts of the United States,

by

Edmund Charles Wendt, M. D., of New York.

Without some knowledge of the physical geography and topography of a country, an intelligent appreciation of its climatic peculiarities is not possible. This is particularly well seen in relation to the climatology of the United States. Extending from well-nigh arctic to almost subtropical regions, and from the level of the sea to elevations of nearly 15,000 ft.; covering a vast expanse of partly arid inland territory, and showing an enormous coast-line laved by two great oceans, it should not be surprising that every conceivable variety of climate may be found within its borders.

As compared with Europe, perhaps the most noteworthy feature of the American climate consists in its greater range of temperature and comparative dryness. The E. is also strikingly colder than the W. coast as well as the European countries of corresponding latitudes. This circumstance has led to much confusion, and has given the United States an undeserved reputation of being everywhere colder than Europe. It is quite true that, if New York, for example, be compared to cities of the same latitude, like Naples, Madrid, and Constantinople, or if Boston be contrasted with Rome, the American towns will be found decidedly colder. On the other hand if cities on the W. coast, like San Francisco or Portland, be selected for comparison, only trifling differences will appear.

Variations of Temperature. The mean annual temperature varies to
the extent of over 40° Fahr, in different parts of the Union. Extremes of actually recorded temperatures extend from -58° Fahr. to 121° Fahr, in the shade, a range of 177°. Taking the mean temperature of July as representing the hot season, we find in different sections of the country variations of more than 30° — viz. from 60° to over 90° Fahr. Again taking Jan. as a representative cold month, we find a range of over 50° — viz. from 10° Fahr. to above 60°. Now it must not be forgotten that in the United States, perhaps more than elsewhere, temperature and climate are not merely questions of so many degrees of latitude. The lines for similar annual means (isothermal lines) are considerably modified by ocean currents and winds, besides being deflected by the interposition of lofty mountain-chains.

The Mountain Ranges. The two main ranges are the Appalachian System in the E. and the Cordillerean System (Rocky Mts. and Sierra Nevada) in the W. As will be seen later on, the W. highlands have a climate peculiar to themselves. They run from N.W. to S.E. for nearly 5000 M., i.e. from Alaska to Mexico, and gradually slope to the E., so as to fill in from one-third to one-half of the N. American continent. The E. or Appalachian system extends in a S.W. direction from Nova Scotia to Alabama, a distance of over 1500 M. Its width averages hardly one-fifth, and the elevation of its peaks and plateaus not one-half that of the W. highlands. Hence its effect on local climate is much less pronounced (Guyot). Between these great mountain ranges the vast Mississippi Basin stretches out for thousands of miles, from truly arctic regions to the warm waters of the Gulf of Mexico. This basin also includes the Great Lake district, one of the prominent features of the N. states. The climate of this region is controlled by the vast expanse of these veritable ‘inland oceans’.

Three Main Climatic Divisions. In accordance with the brief description just given, we recognize three main climatic divisions in the United States.

1. An Eastern Region, extending from the foot of the Rocky Mts. to the Atlantic seaboard, and including the entire Appalachian system.
2. The Plateau and Mountain Region of the Western Highlands.
3. The Pacific Slope, to the W. of the Sierra Nevada range.

The peculiarities of each region may be briefly stated as follows:

1. The Atlantic seaboard is moderately moist, and, in general, rather equable. It is, however, subject to summer ‘hot spells’, and winter ‘cold snaps’ of a very trying kind. The altitude of the Appalachian system is not sufficient to very materially affect the distribution of heat, winds, and rainfall, so that the change is a gradual one, as we approach the dry interior zone of the Great Mississippi Basin.
The latter region, about 1,245,000 sq. M. in extent, is in general warm and moderately equable. Extensive forests supply adequate moisture to the air, but where trees are sparse, the atmosphere becomes excessively dry. The Great Lakes temper this region on the N. and the Gulf of Mexico warms it on the S. Nevertheless Europeans often complain both of great summer heat and extreme winter cold; sensations which the thermometer rarely fails to justify. The numerous local departures from this general condition cannot be considered here.

2. The Plateau and Mountain Region is dry and cold. The higher peaks are Alpine in character. The great plateaus, situated between the border chain of the Sierra Nevada and the Rocky Mts., are on an average 5000 ft. above sea-level. Some of them are fully 6000 ft. high. The climate there is harsh, cold, and very dry. It is a common mistake, however, to suppose that these elevated plateaus are merely barren wastes. Especially at the lower levels richly fertile valleys are everywhere found to alternate with sandy treeless tracts, salt lakes, and marshy wastes. That there are corresponding differences in local climates can only be alluded to in this place. During the height of summer the days are hot, but as soon as the sun sets, the air grows chilly, and the nights are always cold.

3. The mountain slope of the Pacific is characterized by abruptness and great irregularity. Its climate is varied. The narrow strip bordering on the ocean is much warmer, more humid, and very decidedly more equable than corresponding interior latitudes and the Atlantic coast. This Pacific section is farther distinguished by a well-marked wet season, corresponding to the E. winter, and an equally well-defined dry season, corresponding to the E. summer. Moreover, cool summers and mild winters, as well as the complete absence of those extreme variations, which elsewhere mar the climate of the States, render the Pacific coast pleasantly conspicuous. It is here that some of the most popular winter and summer health resorts have been established.

Some Special Features. In regard to temperature, it is significant that, in spite of the wide range of the thermometer, something like 98 per cent of the entire population inhabit those regions in which the annual means extend from 40° to 70° Fahr. only. Roughly calculated, therefore, the average annual temperature of the whole United States is 55° Fahr. But foreigners are of course more interested in the extremes of heat and cold, which are disagreeably perceptible in almost all the states. The most delightful season of the year is unquestionably the so-called 'Indian summer', i.e. the few Autumn weeks which precede the actual onset of winter. It would be difficult to imagine anything more exhilarating than the crisp air, brilliant sunshine, clear blue skies, and grateful temperature characterizing the closing days of an 'Indian summer' at its best.
XIII. CLIMATE.

The summer temperature is everywhere higher than in Europe, with the exception of certain districts on the Pacific slopes already alluded to. The hottest regions of the country are naturally the southernmost parts of the southernmost states (Florida, Alabama, Louisiana, etc.). Here the annual mean rises to 75° Fahr., which is almost that of tropical climes. In the valley of the Lower Colorado, in California and Arizona, the summer mean rises to 90° Fahr. In Texas temperatures of 110°, and in Arizona and parts of California of 115°, are no great rarity, and yet here the great dryness of the atmosphere makes the heat seem less oppressive than in humid regions at a much lower range of temperature. In almost all the states of the Union several extremely hot days are to be looked for every summer. And in the more prolonged ‘hot spells’ the mortality from heat-stroke and diarrhoeal diseases becomes alarming to a degree quite unknown in Europe. The severity of the winter is most felt in the elevated parts of New England, the higher plains of N. Minnesota and Dakota, and the lofty mountain plateaus of the Rockies. There the usual mean may descend below 40° Fahr. In upper Minnesota the winter mean is only 10° Fahr. On the whole, it may be said that American winters are more severe than those of Europe, always excepting, of course, the S. states. In the Atlantic and Middle states the winter is generally steady. Ice and snow may be counted on during one-half of the three coldest winter months. But to the W. of the Mississippi great irregularities are experienced. Mild and open periods there alternate with intense cold and violent storms. As we approach the Pacific increased mildness is observed. Continuous snow and ice are unknown along the whole W. coast from Vancouver to San Diego. Moreover, the temperature is so equable there that the winter mean is only 5-15° below that of summer. In the S. occasional cold storms are experienced, although the thermometer at New Orleans, for example, rarely descends below the freezing point. Yet the S. winter is fitful and at times trying. It begins and ends early, lasting from about Nov. until February. But there is absolutely no periodicity in the various irregularities observed, so that elaborate calculations based on averages may be rudely upset by the eccentricity of certain seasons. It is always well to be prepared for ‘any kind of weather’ in the United States.

Rainfall. The rainfall is quite unevenly distributed through the United States. In the E. section it is abundant, while the great W. plains and prairies are often parched with prolonged drought. This has led to the general employment there of irrigation, without which agriculture could not flourish. In the strip along the Pacific coast a very plentiful precipitation occurs. The heaviest deposit of rain takes place in the borderlands of the Gulf, namely the S. parts of Louisiana, Mississippi, and Alabama, the E. part of Texas, and the W. coast of Florida. The annual quantity of water amounts to about 65 inches there. But at Philadelphia it is 45 inches, and at
Chicago only about 30. All over the E. the rainfall is abundant in spring and summer. It usually occurs in heavy showers, often accompanied by violent electrical discharges. On the Pacific coast, apart from the regularly recurring winter rains, little or no precipitation of water takes place. But at a short distance inland profuse summer rains are again observed. In the mountainous highlands heavy winter snows augment the annual volume of watery precipitation. The most arid tracts of the United States are in W. Arizona, S. Nevada, and S.E. California. The annual rainfall there descends from 15 to 8 inches and less. Broadly speaking the United States may be said to be favoured by an abundance of rain, with a relatively small proportion of rainy days. Fogs occur in the seaboard states, but they are neither as frequent nor as heavy as those known in many European countries.

Winds. The prevailing winds of the United States are westerly, like those of other countries situated in middle latitudes. Around the Gulf of Mexico the main current of the atmosphere moves in an E. or S.E. direction. Along the Atlantic coast region the predominating winds are S.W. in summer, and N.W. in winter. In a large S.W. district, including Nebraska, Kansas, Colorado, Arkansas, Texas, New Mexico, Utah, and Arizona, the summer winds come from the S., and the winter winds have a N. direction. In the region of the Rocky Mountains the winds are so irregular that none of them can be said to be ‘prevalent’. In the tract between the Mississippi and the Appalachian ranges, both summer and winter winds are S.W. and W. It may be borne in mind that in the United States the S.W. winds blow over an expanse of warm water, while the N.E. winds hail from a frigid ocean, and the N.W. from frozen deserts.

Storms and Blizzards. The regularly recurring winter storms are most violent on the E. seaboard. The term ‘blizzard’ is employed to denote the blinding snow-storms with intense cold and high winds, which have their true home only in the W. but which are sometimes observed in the Atlantic States.†

Climatic Resorts.

The custom of spending the winter in the South and the summer at the seaside has nowhere assumed more formidable proportions than in the United States, and a few of the more important climatic resorts are named and characterised below. Comp. also the notices throughout the Handbook.

Winter Resorts. The best known winter-stations are in Florida, California, the Carolinas, Georgia, and Virginia. A large proportion of the invalids visiting these regions are the victims of consumption, but sufferers from gout, rheumatism, neurasthenia,

† A violent blizzard occurred in New York on March 12th, 1888. The snow was piled up in drifts of 10-30 ft., stopping all communication.
XIII. CLIMATIC RESORTS.

chlorosis, anaemia, diseases of the kidneys, affections of the heart, insomnia, chronic bronchitis, asthma, and over-work are often signally benefited by a stay at one or other of the resorts named below. In making one's choice of a winter's residence, the factor of accommodation should not be lost sight of; and it may be stated generally that the sanitary arrangements of American health-resorts are far superior to most places of the kind in Europe. In some of the hotels every conceivable modern comfort and luxury are provided (comp. pp. 402, 493, 505).

In Florida (RR. 76-82) the temperature is equable, the atmosphere is neither too dry nor too moist, the sunshine abundant, and the soil sandy. Consumptives do well there, especially in the early stages of the disease. The only drawback is the possibility of malaria; but the dangers arising from this source have been grossly exaggerated. — Southern California has, perhaps, the most delightful climate in the world (comp. p. 499). The air is genially warm and dry, yet not enervating as in more tropical climates, and more salubrious general conditions can nowhere be found. Santa Barbara (p. 497), Los Angeles (p. 499), and San Diego (Coronado Beach; p. 506) are among the chief resorts, the first named showing the least variation between the day and night temperatures, while the other two enjoy an almost total immunity from fog. At San Diego the coast-winds are sometimes inconvenient for invalids with throat-troubles. San Bernardino (p. 502) is more inland and has a rather bracing, but not irritating, climate, which some consumptives find more beneficial than that of other Californian resorts. Monterey (p. 493), Santa Cruz (p. 494), Pasadena (p. 500), Redondo Beach (p. 500), and San Rafael (p. 487), have all their special advantages. — Thomasville (p. 398), in Georgia, and Aiken (p. 393), in South Carolina, are much frequented by weak-chested persons, who find benefit in the balsamic fragrance of their pine forests. The advantages of Asheville, North Carolina, have been sufficiently indicated at p. 386. Old Point Comfort (p. 372), Virginia Beach (p. 371), and Newport News (p. 371), in Virginia, are fashionable intermediate stations for invalids on their way back to the North. — Lakewood (p. 247), in New Jersey, and Cumberland Gap Park, in Tennessee (comp. p. 382), are also favourably known. — Colorado Springs (p. 468), Manitou (p. 469), and Saranac Lake (p. 186) are the chief resorts for the high-altitude treatment of consumption.

Summer Resorts. Newport (p. 76), Nahant (p. 101), New London (p. 71), Narragansett Pier (p. 72), Bar Harbor (p. 114), Long Branch (p. 63), Atlantic City (p. 248), Cape May (p. 249), and parts of Long Island (p. 61) are the most fashionable seaside resorts. Sea-bathing in the United States differs somewhat from British and Continental practices. Permanent bath-houses on the beach take the place of bathing-oaches, and the institution of bathing
masters is almost unknown. Men and women bathe together. The temperature of the water of the Atlantic Ocean in summer is so warm (often exceeding 70° Fahr.), that bathers frequently remain in it an hour or more, apparently without harm.

The chief Mountain Resorts are in the Catskills (p. 176), the Adirondacks (p. 183), the White Mts. (p. 134), the Green Mts. (p. 130), the Berkshires (p. 150), and the Alleghenies (pp. 344, etc.).

The United States contains nearly 9000 Mineral Springs. While, however, these waters are chemically equal to any in the world, it must be admitted that their scientific employment for the cure of disease has not hitherto been developed as at the famous European spas. Saratoga Springs (p. 198) has, perhaps, the best claim to ranking with the latter in its mode of life and methods of treatment. The celebrated Hot Springs, Arkansas, are described at p. 456. Among the most popular Sulphur Springs are Blount Springs (Ala.), Blue Lick Springs (Ky.), White Sulphur Springs (p. 342), Sharon (p. 175), and Richfield Springs (p. 206). — Good Iron Waters are found at Sharon (p. 175), Cresson Springs (p. 258), Schooley's Mt. (p. 215), and Milford (N. H.). — Crab Orchard (Ky.), Bedford (p. 257), and Saratoga (p. 198) have good Purgative Springs. — Among well-known Thermal Waters are those of the Hot Springs, Arkansas (see above), San Bernardino (p. 502), Calistoga (p. 488), and Salt Lake (p. 480).

XIV. The Fine Arts in America.

a. Painting and Sculpture,

by

William A. Coffin.

Marvellous progress in the fine arts has been made in the United States since the Centennial Exhibition at Philadelphia in 1876, when popular interest in Art received a decided impulse; and for something more than a decade the influx of American artists returning in large numbers from study in the European art centres, principally from Paris, has had a strongly marked influence on the tendencies of the American school. Before proceeding, however, to the consideration of the conditions in which American art stands before the public at the present day, it is pertinent to give briefly some account of its earlier history.

Previous to the Revolutionary period we find a Scottish artist named John Watson painting portraits in Philadelphia about 1715, and another Scotsman, John Smybert, similarly occupied in Boston from 1725 to 1751. John Singleton Copley, born in Boston in 1737, began to paint portraits there about 1751. He went to London subsequently, became a Royal Academician in 1779, and died in London
in 1815. He painted many celebrities of his time in the Colonies, and his works are among those most highly valued in early American art. Benjamin West, born at Springfield, Pennsylvania, in 1738, painted portraits in Philadelphia in 1756, went to Italy in 1760, and thence to London in 1763. He was elected president of the Royal Academy on the death of Sir Joshua Reynolds in 1792. He died in London in 1820, and his works, both portraits and compositions, are to be found in collections in the United States and England. At the Pennsylvania Academy of Fine Arts in Philadelphia one of his most celebrated pictures, 'Death on the Pale Horse', is in the permanent collection, and the Boston Museum possesses his 'King Lear', another notable work. Charles Wilson Peale, who was a colonel in the Continental army, painted portraits of Washington and other men of the time that are of historical and artistic interest. John Trumbull, son of Jonathan Trumbull, Colonial Governor of Connecticut, a graduate of Harvard and (like Peale) a colonel in the army who had previously given his attention to the art of painting, gave up his commission and went to London to study under West. He is best known as a painter of military pictures representing the battles of the Revolution and the French and English war in Canada, and also painted numerous portraits and miniatures. An interesting collection which includes the most important of his works belongs to the Yale University and is on exhibition in the galleries of the art school connected with the institution at New Haven (see p. 66).

Gilbert Stuart, born at Narragansett, Rhode Island, in 1755, is the most famous of all the portrait-painters of the Revolutionary period, and his work compares very favourably with that of his contemporaries in Europe. He was a pupil of West in London and returned to America in 1792. He settled in Boston, after painting portraits two years in New York, Philadelphia, and Washington, and died there in 1828. The best portraits of Washington are those from his hand, and the list of his other portraits is a long one, including many of the best known men in the first Congresses of the United States and military and civic dignitaries. Portraits by Stuart are in the collections at the Museum of Fine Arts, Boston (p. 90); at the Metropolitan Museum (p. 45), the Lenox Library (p. 38), and the New York Historical Society (p. 42), New York; and at the Pennsylvania Academy of Fine Arts, Philadelphia (p. 237). John Vanderlyn and Thomas Sully (an Englishman who came to America at an early age) were portrait-painters of note contemporary with Stuart and Trumbull. Washington Allston, born in South Carolina in 1779 and a graduate of Harvard in the class of 1800, went to London to study in the schools of the Royal Academy in 1801. He settled in Boston in 1818, and painted historical and religious subjects as well as portraits, and is considered one of the most talented of American artists. One of the best of his works is the 'Jeremiah' in the Yale University collection at New Haven (p. 66), and there
are others at the Boston Museum of Fine Arts and elsewhere. Samuel F. B. Morse (1791-1872), the inventor of the telegraph, who graduated at Yale in 1810 and was a pupil of Allston, devoted himself to historical painting in the beginning of his career in the first quarter of the present century.

On the 8th of November, 1825, a number of young artists and students in New York established the New York Drawing Association. On the 16th of January, 1826, they chose from their number fifteen artists who were directed to choose fifteen others, and the thirty thus selected constituted a new society which was called the National Academy of Design. Among the first fifteen of these founders of the Academy were Thomas S. Cummings, William Dunlap, Asher B. Durand, John Frazee, and Henry Inman. Among the second fifteen were Thomas Cole, William Jewett, Rembrandt Peale, John Vanderlyn, and Samuel Waldo. Thomas Cole was the first American landscape-painter, and Durand and Thomas Doughty were prominent among those who followed his lead in taking up this branch of painting. Inman was a noted portrait-painter, as were Waldo and Jewett, Vanderlyn (who has already been mentioned), and Rembrandt Peale. In the years following the founding of the Academy G. P. A. Healy (who went to Paris to study under Baron Gros and Couture), Thomas Rossiter and William Hunt of Boston (pupils of Couture), William Page, Daniel Huntington, Charles L. Elliott, and Robert W. Weir among others gained wide reputations as portrait and figure painters, and in landscape John F. Kensett and Sanford R. Gifford became especially famous. Some of the contemporaries and the immediate successors in point of historical sequence of these men, elected to membership in the Academy or chosen as Associates, from about the middle of the forties to the beginning of the seventies, form what is sometimes referred to as the ‘Older School’ of American painters. The Academy held its seventy-third annual exhibition in the spring of 1898, and its seventeenth autumn exhibition the same year.

In sculpture the first American artists to be noted are John Frazee, Hiram Powers, and Horatio Greenough, one of whose representative works is the equestrian statue of Washington in the Capitol grounds at Washington (p. 277). Frazee was born in 1790 and Powers and Greenough in 1805. Thomas Crawford, Randolph Rogers, Thomas Ball, W. W. Story, and Henry K. Brown, whose equestrian statues of Washington in Union Square, New York (p. 33), and of General Scott at Washington (p. 288) are especially worthy of mention among the achievements of the earlier American sculptors, should be grouped with Frazee, Powers, and Greenough, though they are chronologically later. This summary brings us to the period uniting the old and new, the time when American art, having made for itself a dignified place in the national civilization, was conservative in its processes and faithful to time-honoured traditions and had not yet felt to any appreciable degree the influences of the great revival.
that followed the appearance of Delacroix and Géricault, the famous men of 1830, and the Fontainebleau group in France. We find Huntington, Baker, Le Clear, Eastman Johnson, J. B. Flagg, Hicks, and others prominent as portrait-painters; Guy, J. G. Brown, Henry, Loop, Mayer, and WilmARTH, noted painters of figure subjects; F. E. Church, Bierstadt, Cropsey, Bellows, Whittredge, Thos. Moran, De Haas, David Johnson, James M. Hart, Wm. Hart, and McEntee the chief painters of landscapes, marines, and cattle-pieces, and J. Q. A. Ward and Launt Thompson, the sculptors of the day. We find in their work sincerity of purpose, much artistic feeling, and individuality. Except in a few cases, however, there is little to show that their art had developed under other than indigenous influences.

American art at the present time, broadly speaking, means art in New York, for though there is much that is of value produced in Boston and Philadelphia and something worth noting here and there in some other cities, the best work of the artists in these places is usually seen in New York. In considering the modern 'Movement' in New York it is fair to say that we cover the whole country, and the condition of the fine arts in the United States may be measured by applying the gauge to what is to be seen in New York. If a few individual factors be thus omitted, it does not affect the test as a whole. This is nearly as true of New York in the United States as it is of Paris in France and much more so than of London in Great Britain. It was in 1877 and 1878 that the first of a little band of artists that has now grown into an army almost, and is sometimes styled the 'New School' and sometimes the 'Younger Men', made their appearance in New York and excited public interest by their work at the Academy exhibitions. They came from their studies in Paris and Munich and with characteristic American promptitude founded a society of their own. Some of the home artists who were in sympathy with their aims joined with them, and the new Society called the American Art Association was formed at a meeting held in New York on June 1st, 1877, at which Augustus St. Gaudens, Wyatt Eaton, Walter Shirlaw, and Mrs. R. W. Gilder were present; and before the first exhibition was held in the spring of 1878 the names of the following artists, among others, were placed on the roll of the Society: Olin L. Warner, R. Swain Gifford, Louis C. Tiffany, J. Alden Weir, Homer D. Martin, John La Farge, William Sartain, W. H. Low, A. H. Wyant, R. C. Minor, and George Inness. The name of the organization was changed in February, 1878, to the Society of American Artists, and it was incorporated under that title in 1882. It has held exhibitions in New York every spring since 1878 with the exception of 1885. Its discarded title, the American Art Association, has meanwhile been assumed by a business company, which conducts sales of collections and deals in works of art. The Society of American Artists has now 125 members, about twenty of whom reside in Europe, and is a progressive, vigorous body,
whose yearly exhibition is one of the most important events in the American art world. Whatever feeling of antagonism to the Academy may have existed at the outset of the new movement has now disappeared, and the Academy and the Society are friendly rivals. But young artists have been coming from Europe and establishing themselves in New York for the past twenty years, and their number increases steadily and rapidly. These younger men are very good painters as a rule; the space at the Academy is too limited to give room for their work and that of the Academicians and associates and other men who, though they do not belong to the Academy, hold a position in American art by reason of long residence and recognized ability; and the Society has been expected to offer the vigorous young school a fitting place to exhibit. It has done this, especially in the past twelve years, since 1886, most successfully. It has recently, in connection with the Architectural League of New York and the Art Students' League, secured a permanent home and spacious galleries in the new building of the American Fine Arts Society (the executive society of the alliance) at No. 215 West 57th St.

The highest standard of excellence is maintained at the exhibitions of the Society of American Artists, where the visitor will obtain an impression of what motives and purposes inspire the younger men and will see a collection of works of art that for individuality in conception and cleverness of treatment may justly be ranked with the best displays offered in the European capitals. The exhibitions at the Academy are somewhat larger, but uneven in quality, though the younger men are usually pretty well represented and the best work of the older school is there shown. Comparison between the two exhibitions will be found to be instructive and interesting. The number of American artists who are well trained is now very large. This is due to study abroad, the strong influence of the French school on the younger men, and the methods now followed in the instruction of pupils in the art schools. The number of those who do thoroughly good work and are individual in the presentation of their motives is altogether too great to give more than the names of a few of them. Perhaps it will not be invidious to mention those of Homer, Chase, Dewing, Mowbray, Brush, Weir, Cox, Thayer, Blashfield, La Forge, Low, Millet, Tarbell, Vinton, Blum, Maynard, H. O. Walker, H. B. Jones, Tryon, Donoho, Platt, and Horatio Walker among the most prominent painters, and St. Gaudens, French, Warner, MacMonnies, Hartley, Adams, and Elwell among the sculptors. The American artists who reside abroad are frequently represented in the New York exhibitions, and Sargent, Abbey, Harrison, Dannah, Gay, Bridgman, Metchers, Pearce, Hitchcock, Vail, McEwen, and others are as well known at home as in Paris. When at the Universal Exhibition at Paris in 1889 the American section in the fine arts department included the works of the artists at home and abroad, it was conceded by many that in interest, in technical excellence, and in
individuality the American exhibition ranked second to none but
that of France itself. At the World’s Fair, held at Chicago in 1893,
the home section was the largest and most interesting, and the works
exhibited were generally allowed to surpass the collections of other
countries in individuality while rivalling them in technical excel-
ence. The intelligent observer who comes to the United States and
takes the opportunity to study American art as it is to-day cannot
but be impressed with the value of its present achievement. The
high place it is destined to occupy in the future is plainly indicated
in the startling rapidity of its progress and the earnestness of pur-
pose of the artists who are each day adding to its renown.

The visitor to New York will find in the autumn an exhibition of
current American art at the Academy; in November and December an ex-
hibition of the New York Water Color Club, a young society organized in
1890, whose purpose it is to hold annual exhibitions in the art season
before the holidays; in February and March the regular annual exhibition
of the American Water Color Society, at the Academy (one of the best
and most interesting of all the exhibitions); and in April and May the
regular annual exhibitions of the Academy and the Society of American
Artists. In addition to these there are usually, throughout the season,
numerous special exhibitions in the galleries of the dealers of the works
of individual artists, and at the American Art Association and the Fifth
Avenue Art Galleries there is a constant succession of exhibitions — some
of them often of great importance, as when notable private collections
are shown before being sold at auction. The Metropolitan Museum (p. 45),
with the valuable additions made recently, compares very favourably with
the great galleries of Europe. The exhibitions of the Architectural League,
held annually in Jan., are interesting to the non-professional visitor, as
the scope of the exhibition includes decorative art, and the architectural
portion of the display has many popular as well as technical features. For
those who wish to be informed as to the facilities for instruction in the
fine arts in New York it may be mentioned that the schools of the Art
Students’ League, where there are over a thousand pupils on the rolls,
rank with the schools of Paris in the quality of the work produced by the
students, and that excellent schools are maintained also by the National
Academy of Design, the Metropolitan Museum, and the Cooper Union.

In Philadelphia annual exhibitions of American art are held at the
Pennsylvania Academy of the Fine Arts (founded in 1805), and the per-
manent collections are valuable and interesting. Exhibitions are also held
by the Art Club of Philadelphia and by the Philadelphia Society of Artists.
In Boston the collections of the Museum of Fine Arts are of great value
both from the artistic and the historical standpoint, and exhibitions of the
work of American artists are given each season by the Boston Art Club
and other societies. In most of the larger cities, such as Chicago, St.
Louis, and Cincinnati, and in many towns in the East and West there are
art institutions and schools, and exhibitions to which New York artists
are among the contributors are held with considerable regularity.

b. ARCHITECTURE,

by

Montgomery Schuyler.

The sources of the settlement of the United States were so many
and so various that we should expect to find a corresponding variety
in the building of the colonies. As a matter of fact, however, by the
time the settlements upon the Atlantic seaboard had become suf-
sufficiently established to project durable or pretentious buildings, the English influence had become predominant, and the colonists took their fashions from England in architecture as in other things. The Spanish settlements within the present limits of the United States were unimportant compared with those farther to the South. The trifling remains of Spanish building in Florida and Louisiana are not to be compared with the monuments erected by the Spaniards in Mexico, where some of the churches in size and costliness and elaboration of detail are by no means unworthy examples of the Spanish Renaissance of the 17th century. The only considerable town on the Atlantic coast that is not of English origin is New York, which was already a place of some importance when the New Netherland s were ceded to Great Britain by the treaty of Breda in 1667. It was built in the then prevailing fashion of Holland. The 'Flemish Renaissance', which has lately appealed to English architects as containing valuable suggestions for modern building, did not impress the new masters of New Amsterdam. The crow-stepped gables and steep tiled roofs of the Dutch settlers were displaced by dwellings and warehouses of English architecture executed by English mechanics. It is unlikely that any specimen of Dutch architecture was erected, either in New York or in Albany (which retained its Dutch characteristics longer), after the beginning of the 18th century. There are now no Dutch buildings left in New York, and it is believed that there is but one in Albany. There are, however, here and there Dutch farmhouses left on Long Island and in New Jersey; a manor-house of the Van Rensse-laers, patroons of Rensselaerswyck, has been re-erected at Williams-town (p. 155), whither it was recently removed from Albany; there is an occasional Dutch church in the oldest parts of New York State and New Jersey; and part of the Philipse manor-house, now the City Hall of Yonkers (p. 166), is of Dutch architecture. These relics are all of the 17th century and are interesting rather historically than architecturally. They do not invalidate the rule that by the time the colonists were able and disposed to erect buildings of any architectural pretensions, their models were the contemporary buildings of England.

The public buildings of the colonial period were mainly churches, and these, where they were more than mere 'meeting-houses', were imitated from the churches of Sir Christopher Wren and his successors. Of these St. Michael's (p. 391), built in 1752 in Charleston, is the most conspicuous and perhaps the most successful. Burke, in his 'Account of the European Settlements in America' (1757), says of it: 'the church is spacious and executed in very handsome taste, exceeding everything of that kind which we have in America'. The design is attributed, on the strength of a contemporaneous newspaper paragraph, to 'Mr. Gibson', but this is probably a mistake for Mr. Gibbs, the architect of St. Martin's-In-the-Fields in London and the Radcliffe Library at Oxford, being at the time one of the most successful of English architects and perhaps the most distinguished
of the immediate followers of Wren. The resemblances between St. Michael’s and St. Martin’s tend to strengthen this conjecture. St. Paul’s (p. 29) in New York (1767) was the most important of the colonial churches of the city and in style resembles St. Michael’s, being ultimately inspired by Wren’s city churches in London.

A local tradition refers the design of the College of William and Mary (p. 372), at Williamsburg, Va., to Sir Christopher Wren himself, but the architecture scarcely bears out the legend. It is, however, in Virginia and in Maryland that the colonial architecture is seen at its best. The great tobacco-planters of those colonies formed a real landed gentry, such as could scarcely be said to exist in any other of the colonies, excepting the holders of manorial grants on the Hudson River, who were much fewer in numbers. The farmers of New England and Pennsylvania were a yeomanry and there were very few landed proprietors in New England who could rival the scale of living of the tobacco-planters, whose estates and agricultural operations were extensive, whose habits were hospitable and commonly extravagant, and who lived up to their easily acquired incomes. They possessed real ‘seats’, and these are the most pretentious and the most interesting examples of colonial domestic architecture. Such mansions as Brandon, Shirley, and Westover in Virginia (see p. 370), and Homewood and Whitehall in Maryland, testify to a high degree not only of social refinement on the part of their owners but of skill on the part of the artisans who built them, for the profession of architecture was almost if not quite unknown to the colonies. The architecture of these mansions consisted in a simple, almost invariably symmetrical composition, often a centre with wings connected with it by a curtain wall, in a careful and generally successful proportioning of these parts and of the stories, which were usually two and very rarely more than three, and in the refined though conventional design and skilful execution of the detail, especially of the detail in woodwork. The porch was the feature of the front, and in houses of much pretension generally exhibited an order, consisting of a pair of columns sustaining an entablature and a pediment. The bricks were imported from England, or often, in the northern colonies, from Holland, and stone was sparingly employed. Many of the country seats of the landed gentry have been piously preserved, but in towns the colonial houses have been for the most part destroyed. Annapolis (p. 274), in Maryland, named after Princess Anne, has been left on one side by the march of improvement and remains to show many specimens of the Georgian architecture, which still give it a strong resemblance to an English town that has remained inactive for a century.

The colonial architecture continued to prevail after the close of the politically colonial period. The first Capitol of the United States at Washington was a very good specimen of it, although the design of it has been obscured by the later additions in a different taste. Although the plan which was accepted was the work of an amateur,
the work of construction was assigned to a trained architect, to whom the design of the building was really due. At the instigation of Jefferson, then President and himself a dabbler in architecture, the architect attempted to compose an 'American order' by conventionalising the foliage of plants peculiar to this continent. Some of the capitals engendered by this essay are to be seen in the interior of the Capitol (p. 279), but it is upon the whole fortunate that no attempt was made to employ them in the exterior decoration. The building was burned by the British in 1814, but was rebuilt with additions and variations during the next decade. To the same period belong the State House of Massachusetts at Boston, the City Hall of New York, and the Merchants' Exchange of Philadelphia, all specimens of educated and discreet architecture, as it was at that time understood in Europe.

The inspiration of these works and of others like them was distinctly Roman. The Greek revival that was stimulated in Europe by the publication of Stuart's work on Athens was somewhat belated in reaching the United States, where the Roman Renaissance of Wren and his successors was in full possession. The Grecian temple was adopted at the national capital as the model of a modern public building about 1835, with such modifications as were compelled by practical requirements. The Treasury, of the Ionic order, the Doric building of the Interior Department, commonly called the Patent Office, and the Corinthian General Post Office were among the first fruits of this cult. From Washington it gradually spread over the United States, Girard College (p. 239) at Philadelphia and the Sub-Treasury and the Custom House at New York being among the finest and most monumental of the American reproductions. For the next 15 years the Grecian temple in stone or brick was commonly adopted for churches as well as for public buildings, while it was reproduced in wood for dwellings of architectural pretensions, either in town or country. In 1851 the extension of the Capitol at Washington was begun. It consists of two wings, fronted with Corinthian colonnades, making the extreme length of the building 750 feet, and the addition of a central dome of cast iron, which attains the disproportionate height of over 300 feet and is, in other respects, not very successfully adjusted to the building which it crowns. The Capitol thus completed became the model for American public buildings. Nearly all the State Houses have followed its general disposition and have included a lofty dome.

Although there are some earlier churches in a style which the designers of them believed to be Gothic, the Gothic revival in the United States may be said to have begun with the erection of Trinity Church (p. 28) in New York in 1846, which remains, perhaps, the most admirable piece of ecclesiastical architecture in that city. Within a few years thereafter Gothic had almost entirely superseded classic architecture as a style for churches, although in commercial buildings
the models of the Renaissance were preferred, and these were imitated in fronts of cast-iron to an extent quite unknown elsewhere. The Gothic designers, however, insisted upon the applicability of their style to all uses and made many essays of more or less interest, in public, commercial, and domestic building, of which there are examples in all the Atlantic cities.

Up to this time, although among the leading American architects were Germans and Frenchmen as well as Englishmen, and an increasing proportion of native designers who had made their studies at the Ecole des Beaux Arts, or in the office of Continental architects, the architecture of the country had upon the whole been a faint and belated reflection of the current architecture of England. This continued to be the case during a brief season of experiments with 'Queen Anne'. But at this time there arose an American architect whose personal force, manifested for the most part in his own free version of the Southern French Romanesque, very deeply impressed his contemporaries and his successors and greatly affected the building of the whole country. This was Mr. H. H. Richardson (1838-86), who came into a national celebrity with the completion of Trinity Church, Boston, in 1877, when the author was thirty-nine years old. In the nine years of life that remained to him, he made such an impression upon his profession that almost every American town bears traces of his influence. His own most noteworthy works, besides Trinity, are the county-buildings at Pittsburg (p. 263), the Senate Chamber, the Court of Appeals, and the Western Staircase of the Capitol of New York at Albany (p. 172), the Albany City Hall (p. 173), the Cincinnati Board of Trade (p. 345), Sever Hall and Austin Hall at Cambridge (p. 94), and a warehouse in Chicago (p. 315). As might have been expected, he has had many imitators, but the extent and the value of his services to American architecture are best seen in the work of architects who have recognized the force that lay in his simple and large treatment, and have recognized also that the force of this treatment was independent of the detail he employed and of the style in which he worked. This lesson has been learned and applied by the architects of many of the towering 'elevator buildings' erected for commercial purposes, which are so marked features of the American cities, and are the unique contribution of American architects to their art. The introduction of the elevator made possible a great increase in the number of stories of a commercial building, which before that introduction were usually limited to five, whereas quite three times that number have been proved to be practicable and profitable. The earliest of the elevator buildings were the Western Union building (p. 29; since partly destroyed and rebuilt) and the Tribune building (p. 30) in New York, and these are but twenty years old. The architectural problem presented by these structurer was entirely new, and no precedents could be invoked for their treatment. Many of the different solutions of it offered by American
architects are of high ingenuity and interest. Boston, New York, Philadelphia, and Chicago offer numerous commercial buildings that are impressive and admirable pieces of architecture, although the conditions of their erection have compelled the designers to disregard many accepted canons of their art, and they seem voluntarily to have disregarded many others. Some of these structures are unmistakable and tolerably consistent examples of historic styles, but others, equally successful, are impossible to classify.

While American architects have been compelled to contribute to architecture a new type in the elevator building, they have won successes not less genuine, though of course less startling, in domestic architecture. Here also they are almost equally independent of convention, and this, as is often apparent in their successful essays, not from ignorance but from deliberate choice. The discipline of the schools has enabled a designer to produce work that is clearly scholarly and as clearly not scholastic. Dwellings of recent erection are to be found in the suburbs of Boston, in the new ‘West Side’ of New York, on all three ‘sides’ of Chicago, and indeed in all the chief towns of the North and North-West that are so far from being examples of styles that they betray a complete freedom of eclecticism and that are yet evidently the work of accomplished and artistic designers. The massiveness of the Romanesque in which Mr. Richardson worked sometimes even in his hands degenerated into a coarseness and clumsiness that are especially repugnant to the spirit of domestic architecture. His imitators have exaggerated these defects and omitted the qualities which in his work atoned for them, and the most successful of recent American dwellings that can be classified as Romanesque are of a lighter and more enriched Romanesque than that which he employed. The French Renaissance of Francis I. has appealed to many of the architects as a style at once free and picturesque and at the same time refined, and some interesting houses have been done in it, especially in New York (comp. p. 37) and Philadelphia. In country-houses, also, American architects have had their successes, and a fairly comprehensive view of their achievements in this kind can be had from a sojourn at any of the watering-places on the coast of New England or New Jersey. Architecturally as well as otherwise Newport is the most interesting of these.

The European historians and critics of architecture who have so long been insisting that ‘Art is not archaeology’ may find in the current building of the United States that precept reduced to practice. An absolute freedom is the rule alike among competent and incompetent architects, subject with the former class to the artistic unity of the resulting work. In commercial and domestic architecture, along with much wildness and crudity, this freedom has produced much that is interesting and suggestive to the European student of architecture, and that gives good hope for the progress of architecture in the United States.
XV. SPORTS.

XV. Sports,

by

Henry Harmon Neill.

Only within recent years have outdoor sports become a popular form of amusement in the United States; previous to that time base-ball and trotting alone claimed attention. To-day, however, nearly every game familiar to Englishmen is played in the Eastern half of the country, and many are known throughout all the states. The growth has been so rapid that its postponement until the present generation now seems surprising. Perhaps the explanation is that in a new country outdoor labour is so general as to forbid outdoor play; or that Americans have until recently been too busy to amuse themselves except after sundown.

To enter into the spirit of American pastimes, an Englishman need only learn to admire the gait of the trotting horse and to admit the merits of base-ball as a substitute for cricket. All other sports are conducted substantially upon English models. The Running Horses (i.e. race-horses) are all of English blood, and the tracks are becoming annually more like those of Great Britain, straight and hilly courses replacing the level oval mile once universal; the Yachts are growing more substantial in build and more English in model; Football as played in the States is a modification of the Rugby game; Lawn Tennis, Cricket, Lacrosse, Golf, and Polo are played in the same way in both countries; while Rowing and Canoeing are equally popular on each side of the Atlantic.

Though the theory that Base-ball is a development of 'Rounders' is vehemently disputed, the 'National Game' is easily understood by anyone familiar with the old English pastime. It is played in every village, town, and city, and by every school, college, university, and athletic club in the country; but the games most worth seeing are those of the (professional) National League, in New York, Boston, Brooklyn, Cincinnati, Chicago, Washington, Philadelphia, Pittsburg, St. Louis, Baltimore, Cleveland, and Louisville. The club 'representing' each of these cities plays a series of home and home games with every other; the winner of the greatest number is the champion of the year. Minor 'Leagues' are the Eastern, Atlantic, and Western, with clubs in the smaller cities. The best amateur games are those of the colleges (especially Harvard, Yale, Pennsylvania, Princeton, Georgetown, and Cornell) and of the larger athletic clubs. The season begins in May and ends in October. A base-ball team consists of nine men, including the pitcher, catcher, and seven fielders. Large salaries (sometimes $10,000 a year) are paid to the best professional players, and the game is the vehicle of a considerable amount of betting in the western states.

Horse Races. See p. 17 under New York. Other meetings are held during the season in or near Chicago, St. Louis, Cincinnati, Louisville, New Orleans, Washington, Saratoga, and elsewhere; but the racing there is not very good.

Trotting Races take place during the season, from May to Sept., on 1500 tracks in the United States owned by as many associations, and at all county and state fairs as well as on many private tracks at brood-farms and elsewhere. Stakes, purses, and added moneys amount to more than $3,000,000 annually; and the capital invested in horses, tracks, stables, farms, etc., is enormous. The tracks are level, with start and
finishes directly in front of the grand stand, and are either 1 M. or \( \frac{1}{2} \) M. in length. They are always of earth, and are usually elliptical in shape, though the 'kite-shaped track' was for a time popular for its increased speed. In this there is one straight stretch of \( \frac{1}{3} \) M., then a wide turn of \( \frac{1}{2} \) M., and then a straight run of \( \frac{1}{2} \) M. back to the start and finish. The horses are driven in two-wheeled 'sulkies' of little weight, and the handicapping is exclusively by time-classes. Records of every race are kept by two national associations. Horses that have never trotted a mile in less than 2 min. 40 secs. are in one class; those that have never beaten 2.35 in another; those that have never beaten 2.30 in a third; and so on down to 2.5, which has been beaten but a dozen times. Races are always trotted in heats, and the winner must win three heats. With a dozen entries (or even six or eight, the more usual number) a race may thus occupy an entire afternoon, and require many heats before a decision is reached. Betting is common at every meeting, but is not so prominent as at running tracks. The best trotting races are to be seen at the tracks of the 'Grand Circuit' and the 'Western Southern Circuit'. These give meetings, of from four to eight days each, in or near New York, Philadelphia, Pittsburg, Cleveland, Buffalo, Rochester, Springfield, and Hartford in the Eastern States, and at Sturgis (Mich.), Grand Rapids (Mich.), Chicago (Ill.), Independence (Iowa), Fort Wayne (Ind.), Cambridge City (Ind.), Terre Haute (Ind.), St. Louis (Mo.), Nashville (Tenn.), and Columbia (Tenn.). - The best brood-farms for the development of trotting horses are in Kentucky and California. Each farm has an annual auction-sale of its produce, either at home or in New York City. At the stables of Mr. Robert Bonner in New York City are some of the fastest trotters in the world; they may be seen upon application to the owner by letter.

Hunting is much in vogue in the neighbourhood of New York, though the place of a fox is generally taken by a 'drag'. There are frequent meets with one of the packs of Meadow Brook, Rockaway, Orange, or White Plains. Boston, Philadelphia, and Washington also support packs. The wild fox is hunted in the Genesee Valley (N.Y.) and at Media (Pa.). Near the cities the sport is indulged in mainly by active business men who cannot spare more than an afternoon for it.

Shooting and Fishing are generally free to all-comers during the legal season, though the number of game and fish-preserves is increasing. The Game Laws are different in each of the States and Territories, and cannot be condensed. The periodical 'Fur, Fin, and Feather' (114 Warren St., New York City), contains them all, with the latest amendments.

Of the 35,000 sq. M. in the state of Maine more than one-half is an almost uninhabited wilderness of forest. Here are 1500 lakes, thousands of streams and rivulets, and miles upon miles of hunting-grounds, where the sportsman may find large game and small and fishing and shooting of almost all kinds. His visit should be made not earlier than the middle of July, when the black fly has passed, and should continue until after the first of October, when the open season for deer, caribou, and moose begins. By law he may fish in fresh water from May to Sept. inclusive, and hunt from Oct. to Dec. inclusive, the greater sport being permitted from the day the quiter ceases. Bears, foxes, wild-cats, and wolves he may kill at any time, and opportunities for doing so are not unlikely to occur. Ducks, geese, loons, and herons abound; and small game of every kind is common. The region may be entered at Greenville, on Moosehead Lake (p. 110), the largest sheet of water in the State. Here guides may be obtained at $3 per day, who furnish canoes, cooking utensils, and tents. It is best, of course, to camp out. For this, one guide is required for each visitor; food will cost about $1 per day, and other equipment may be purchased beforehand, or hired at Greenville or any other point selected for entering the woods. A good rifle, a pole (fishing-rod), lines, flies, reels, stout boots, and plenty of blankets — these are the necessities, and beyond these one may take an outfit as complete or as modest as desired. Care should be taken in the selection of guides. In July and Aug. it is not easy to get good ones. A party of four, with four or five guides, is as large as is desirable.
The Rangeley Lakes (p. 119) are more accessible than Greenville, but
the sport there is not so good; the wilderness, however, may be pen-
etrated in canoes from either point for hundreds of miles, with increasing
chances of game.

The Adirondack Region (p. 133) has a smaller area than the Maine
wilderness, and the shooting is not so good. Deer may be met with,
however, the open season lasting from Aug. 15th to Nov. 1st. But al-
though large hotels, steam launches, and even railroads are now found
throughout the Adirondacks, the trout-fishing is still excellent. The season
lasts from May 1st to Sept. 15th. A large part of the region is owned by
the State and reserved as a public park. August is the best month for a
visit; and the sportsman may go directly to one of the hotels in the region,
relying upon the guides, provisions, and equipments there to be found.

There is also good hunting in the mountains of Pennsylvania, the
Virginias, Tennessee, and North Carolina; and in the Far West the biggest
game is found. Deer are abundant, too, in Louisiana, Mississippi, Florida,
and Alabama, and venison has within recent years been cheaper than beef
in the markets of New Orleans. But the limits of this article forbid more
than a mention of these facts.

Wild Fowl abound on the coast from Maine to Florida; the season for
duck, etc., usually opens about Sept. 1st and continues to April.

Tarpon Fishing in the deep-sea water off Florida, best from Feb. to
May, is a superb sport (comp. p. 397).

Buffaloes are nearly extinct. There are not over 1000 on the con-
tinent; of these 500 are in Yellowstone Park, where the sound of a gun is
never heard. Another herd is preserved in the Corbin Park, New Hamp-
shire (p. 129).

The Mountain Sheep and Rocky Mountain Goat, in the Far West, are
generally protected by law from Jan. to Sept.; in some states they cannot
be legally killed at all.

Bicycling. The roads in the United States are not good, except near
large cities and in a few eastern counties. They are, however, constantly
being improved, and long tours, even across the continent, are now often
made. The League of American Wheelmen, with over 100,000 members and
divisions in every State, is doing what it can to improve the country roads,
and its great influence gives hope of success. Already by political action,
it has secured for the wheelman many rights formerly denied him, includ-
ing the freedom of public parks, in almost all cities, on an equality with
other vehicles. Clubs exist in every city. Annual race-meetings are held
in each State during the riding season; and other meetings are not in-
frequent. Chief among the latter is the annual ‘Wheel about the Hub’
(third Frid., Sat., & Sun. in Sept.) of the Boston Bicycle Club (the oldest
in America, dating from 1878). The Cyclists Touring Club of England is
represented in the United States by a Chief Consul at Boston (Mr. Frank
W. Weston, Savin Hill, Dorchester) and Consuls in many towns and cities;
and manufacturers or dealers, from whom information may be sought and
wheels hired, are to be found in almost every town.

Lawn Tennis. The annual All-comers Tournament is held at New-
port in August; the winner plays the champion of the year before for the
championship at singles. A Western Championship Tournament at doubles
occurs in Chicago in July, and an Eastern in New York, Philadelphia, or
near Boston; the winners of these meet at Newport. The Ladies Cham-
pionships are decided in Philadelphia. All these are open to members of
recognized clubs, American or foreign. There are many minor tournaments
during the season (May to Oct.), usually open to strangers. A Tropical
Championship Tournament is held in St. Augustine, Florida, during the
winter. The National Association is the governing body, and there are
clubs and courts in every city.

Cricket. The best clubs are in Philadelphia (see p. 231); in New York
and Chicago a few Englishmen play, and some of the colleges have elevens.
The game, however, has never secured a good foothold, being generally
considered too Alexandrine as compared with base-ball.
Golf has recently become very popular in the United States, and golf links have been laid out all over the country. There is an Association of American Golf Clubs; and annual competitions are held for the Open and Amateur Championships. Comp. p. 18.

Polo and Court Tennis have their headquarters at Newport. — Lacrosse is mainly a Canadian game, but there is a Lacrosse League in the cities of the Atlantic coast, and the game is played at several colleges.

Rowing. The National Association of Amateur Oarsmen is the governing body, and holds an annual regatta, over a different course each year. Other associations are the New England, the Middle States, the Harlem, and the Southern. The best eight-oared crews are those of Harvard, Yale, Columbia, Cornell, Wisconsin, and Pennsylvania Universities. Harvard and Yale usually race at New London (p. 71) in June; the others either there or on the Hudson River or at Saratoga.

Canoeing. The American Canoe Association holds an annual meeting in Aug., usually in Northern New York. There are canoeists on almost every stream in the country, and many clubs. Sailing is developed at the expense of padding; in other respects the customs are similar to those in England.

Football. The game played is a development of the Rugby game, but is played with teams of eleven a side instead of fifteen. Yale, Harvard, Princeton, Pennsylvania, Cornell, West Point, and Annapolis have the best elevens. They play in Nov. in New York or on their home grounds, having previously met minor teams from other colleges and from the athletic clubs. Chicago has an eleven of college graduates, and the game is making rapid headway elsewhere. Its season is very short, however, beginning in Sept. and closing with November.

Bowling (‘Ten-Pins’) is a favourite amusement of both sexes, throughout the United States, and alleys are attached to most gymnasiums and athletic club buildings, as well as to many summer-hotels and amusement-halls.

Athletics. The track events are the same as those contested in England, though long-distance and cross-country running has far fewer lovers, and the short races (400 yards to 1/2 M.) are more generally contested. An innovation is the very short sprint (30-50 yards), often contested at indoor winter games. In hurdling and jumping the standards are very high; walking is not much practised. The owner of the first pair of ‘spiked shoes’ ever used in the United States, and the winner of the first amateur foot-race ever run here, are still comparatively young men. In weight-throwing the rules differ radically from the English. The chief athletic clubs (outside of New York) are the Boston A. A., the Columbia A. C. (Washington), the Southern A. C. (New Orleans), the Crescent A. C. (Brooklyn), the Olympic A. C. (San Francisco), the Buffalo A. C., the Detroit A. C., the Duquesne A. C. (Pittsburg), and the A. C. of the Schuykill Navy (Philadelphia). Most of these hold spring and autumn meetings; and indoor games are held in armouries and other large halls, so that the season practically lasts throughout the year. It is at its height, however, in June and Sept. Many of the colleges send representatives to the Intercollegiate Athletic Association’s meeting in New York in May; Harvard, Yale, Pennsylvania, and Princeton lead the others. These and many others hold annual meetings in May.

XVI. Educational, Charitable, Penal, and Industrial Institutions.

The object of many visitors to the United States is to study its systems of schools, prisons, or charities, or to inspect the working of its leading industrial establishments. For such visitors the subjoined brief index-lists may be serviceable.
a. Educational Institutions,

by Professor Nicholas Murray Butler of Columbia University.

Public Education is regulated by the several States. The United States Bureau of Education, established in 1867 (Dr. William T. Harris, present Commissioner of Education), maintains a library and educational museum at Washington and issues an annual report. It has, however, no direct authority over education in the States.

Each State maintains an elaborate system of public schools; those of the N. and W. States (e. g., New York, Massachusetts, New Jersey, Michigan, Minnesota, Iowa, California, etc.) are especially well organized and administered. In addition to providing free elementary and secondary education, many of the W. States maintain free universities, the original funds for the endowment of the same having been derived from the sale or rental of public lands given by Congress for the purpose. The largest of these is the University of Michigan at Ann Arbor (p. 301), with over 3000 students. The University of Wisconsin at Madison (p. 323) and the University of California at Berkeley (p. 450) are also worthy of special notice.

As a rule, however, the great colleges and universities are private foundations managed by a corporation or board of trustees. Of these the oldest and most influential is Harvard University (founded in 1636) at Cambridge (p. 94). In 1897-98 the gross annual expenditures of Harvard, including the cost of new buildings, exceeded $1,000,000. About 4000 students are in attendance. The other great universities of this class are Johns Hopkins University at Baltimore (p. 272, founded in 1876), which has had a profound influence on higher education in America; Columbia University in New York (p. 52; founded as a college in 1754, reorganized as a university in 1890); Cornell University at Ithaca (p. 208; founded in 1865); Yale University (p. 65; founded in 1700); Princeton University (p. 228; founded as a college in 1746); the University of Pennsylvania (p. 241); and the University of Virginia, Charlottesville (p. 340; founded in 1819). Among the newly founded institutions are the Catholic University of America at Washington (p. 288), and the University of Chicago (p. 316).

There are nearly 400 colleges in the United States in addition to the great universities. Well-known colleges are Amherst (p. 71), Williams (p. 155), Hamilton (Clinton, N. Y.), Miami (Ohio), Lafayette (p. 250), Rutgers (p. 228), Knox, and Stanford (p. 491).

The leading colleges exclusively for women are Wellesley (p. 70), Vassar (p. 167), Smith (p. 156), and Bryn Mawr (p. 255).

Of the great technical schools for the training of engineers, architects, etc., the most worthy of a visit are the Massachusetts Institute of Technology (p. 88), Stevens Institute of Technology (p. 56), Rensselaer Polytechnic Institute (Troy, p. 160), and Rose Polytechnic Institute (Terre Haute, p. 347).

Of city school systems the best are, perhaps, those of Minneapolis (p. 327), Indianapolis (p. 339), Denver (p. 405), Boston and Brookline (R. 5), and Cleveland (p. 294). Duluth (p. 330), Detroit (p. 298), Springfield (p. 6b), and Denver have the finest high-school buildings and equipment. Kindergartens will be found in the public schools of New York, Washington (p. 27), Boston, Philadelphia (p. 230), San Francisco (p. 481), and elsewhere

b. Correctional and Charitable Institutions,

by Warren F. Spalding.

— Hospital for Dipsomaniacs and Inebriates at Foxborough (Mass.).

Institutions for the Deaf. The most important of these are at Northampton (p. 156), Flint (Mich.). New York City (p. 53), Columbus (p. 290), Indianapolis (p. 339), Jacksonville (p. 452), Hartford (p. 66), Philadelphia (p. 230), Knoxville (p. 382), and Delavan (Wis.).

Reformatory for Youth. Among the largest of these are the institutions at West Meriden (Conn.), Plainfield (p. 229). Baltimore (p. 268), Carroll (Md.), Westborough (Mass.; for boys), Lancaster (Mass.; for girls), Lansing (p. 301), Jamesburg (N. J.), Randall's Island (p. 55), Rochester (p. 210), Westchester (N.Y.), Lancaster (Ohio), Cincinnati (p. 344), Philadelphia (p. 230), Morganza (Pa.), Providence (p. 72), and Waukesha (p. 324).

c. Industrial Establishments.

1. Metallic Industries and Machinery. Homestead and Braddock Steel Works, near Pittsburg (see p. 266); Pennsylvania Steel Co., at Steelton (p. 265) and Sparrow's Point (p. 269); Cambria Steel Co., Johnstown (p. 258); Illinois Steel Co., Chicago (p. 311); iron and steel works at Cleveland (p. 294), Buffalo (p. 211), Wilmington (p. 267), Bethlehem (p. 249), and Birmingham (p. 384); agricultural machinery at Chicago (p. 311); McCormick, Louisville (p. 355), Avery, Columbus (p. 250), Akron (p. 307), Springfield (p. 345), Canton (p. 290), and Hoosick Falls (p. 149); iron and steel works at Bridgeport (p. 65) and Elizabeth (p. 228); silver and plated goods at Providence (p. 72), New York (p. 6), Whiting Co., Meriden (p. 65), Taunton (p. 80), and Attleboro (p. 74); bicycles at Hartford (p. 69); safes at Troy (p. 160) and Buffalo (p. 211); wire at Worcester (p. 65); safes at Cincinnati (p. 344); smelting works at Denver (p. 453); locomotives at Philadelphia (Baldwin's; p. 238), Schenectady (p. 204), and Altoona (p. 257). — 2. Textile Industries. Cotton at Manchester (p. 129), Lawrence (p. 106), Fall River (p. 80), New Bedford (p. 100), Lowell (p. 128), Chicopee (p. 156), Baltimore (p. 238; cotton-duck), Charleston (p. 390), Charlotte (p. 375), and Augusta (p. 393); woollens at Lawrence (p. 106), Lowell (p. 128), and Providence (p. 72); linen at Willimantic (p. 70); carpets at Philadelphia (p. 230) and Lowell (p. 128); silk at South Manchester (Conn.) and Paterson (p. 215); shirts and collars at Troy (p. 160). — 11. Food Products. Flour at Minneapolis (p. 327) and St. Louis (p. 349); malt liquors at St. Louis (p. 349), Milwaukee (p. 319), and Rochester (p. 210); wine at St. Louis (p. 349), Charlotte (p. 340), and in California (comp. p. 456); meat packing at Chicago (p. 318), Kansas City (p. 452), and Omaha (p. 458); sugar at Brooklyn (p. 57) and Philadelphia (p. 241). — 11. Glass and Pottery. Trenton (p. 228); Elwood (Ind.); Findlay (Ohio). Pittsburg (see pp. 264, 265). — V. Carriages. Columbus (p. 290); South Bend (p. 297); Studebaker; Concord (p. 129); Cincinnati (p. 344); New York (p. 6); Cunningham. — VI. Railway Rolling Stock. Pullman (p. 318); Buffalo (p. 211); Wagner; Dayton (p. 345); Philadelphia (locomotives: p. 238); Altoona (p. 257). — VII. Ships. Philadelphia (p. 241); Chester (p. 287); Wilmington (p. 287); San Francisco (p. 481); Cleveland (p. 294); Superior (p. 331; whalebacks); Bath
XVII. Bibliography.

The following is a very small selection of the most recent, interesting, and easily accessible books on some of the main topics on which visitors to the United States should be informed. A few records of the impressions of English travellers are included. Numerous other works of local interest are referred to throughout the text of the Handbook. The asterisks indicate publications of special interest and importance.

°The United States, by Prof. J. D. Whitney, is a mine of information on the physical geography and material resources of the country (1889), while The United States: A Study of the American Commonwealth, edited by Prof. N. S. Shaler (1894), is still more comprehensive in its scope. Comp. Élise Reclus’ Nouvelle Géographie Universelle (vol. xvi, 1892), and Henry Gannett’s United States (vol. ii of North America in Stanford’s Compendium of Geography, new issue, 1893).

The American Geological Railway Guide, by James MacFarlane, is a unique compilation, showing the geological formation at every railway station.

XVII. BIBLIOGRAPHY.

Maps. The leading General Maps of the United States are those of the General Land Office and the U. S. Geological Survey (Washington). The former also publishes a series of maps (10-18 M. per inch) of those states in which public lands have existed (i.e. all except those on the Atlantic seaboard). — The only official Detailed Maps of any part of the United States are those of the Geological Survey, published on three scales (1:62,500 or about 1 M. per inch; 1:125,000 or 2 M. per inch; and 1:250,000 or 4 M. per inch). About 600,000 sq. M. have been surveyed, in various parts of the country. These maps can be obtained only on application to the Director of the Geol. Survey. The U. S. Coast Survey is producing charts of the coast, which may be obtained at Washington or from the agencies of the Survey in the large maritime cities. Charts of the Great Lakes, published by the U. S. Corps of Engineers, may be purchased from the Chief of Engineers (Washington). The maps of the Wheeler and Hayden Surveys, covering extensive regions in the West (4 M. per inch), can now be obtained only of second-hand booksellers. Maps of the whole or parts of their states have been published by the Geological Surveys of New Jersey, New Hampshire, Pennsylvania, Kentucky, Wisconsin, Missouri, Arkansas, Texas, Minnesota, California, etc.
1. From Europe to New York.

An overwhelming proportion of European visitors to the United States land at New York, and the following brief notes on the chief oceanic routes to that port may prove serviceable. Lines also run from European ports to Boston (see p. 81), Philadelphia (p. 230), Baltimore (p. 268), etc. For general hints as to the voyage, see p. xxx.

a. From Liverpool to New York.

This is the route followed by the White Star and Cunard steamship companies. The fastest steamers take about 6½ days from port to port (comp. p. 4), the slowest 8-9 days. The distance varies from 3000 to 3100 nautical miles (ca. 3400-3550 Engl. M.) according to the course followed. New York time is about 5 hrs. behind that of Liverpool.

The Cunarder ‘Lucania’ holds the record for the fastest passages from New York to Queenstown (5 days 8 hrs. 38 min.) and from Queenstown to New York (5 days 7 hrs. 23 min.).

Liverpool, see Baedeker’s Handbook to Great Britain. Passengers usually board the Atlantic steamers from the Landing Stage. As we pass down the wide estuary of the Mersey, we see the crowded docks of Liverpool to the right, while to the left lies New Brighton, with its pier, fort, and lighthouse. The mouth of the river is marked by a lightship, which we reach in about 2 hrs. after starting. Farther on, in clear weather, we see the Welsh coast to the left (S.), where the Little and Great Orme’s Heads are the most prominent points, backed by the distant Snowdon Group. A little later we skirt the S. coast of the Isle of Anglesey, then turn to the left, and steer to the S.W. through St. George’s Channel, soon losing sight of land. The Skerries, with a lighthouse, lie off the N.W. point of Anglesey.

The first part of the Irish coast sighted is usually Carnsore Point, in Wexford, the S.E. corner of the island. In about 12-15 hrs. after leaving Liverpool we enter the beautiful inner harbour of Queenstown (about 240 knots from Liverpool), where a halt is made to take on board the mails and additional passengers. Sometimes the halt is long enough to allow a visit to Queenstown, beautifully situated on Great Island, or even to (10 M.) Cork, which may be reached either by rail (½ hr.; seats to the left) or by the river Lea.

On leaving Queenstown, we skirt the S. coast of Ireland for some distance, passing several bold rocky headlands. The last piece of European land seen is usually the Fastnet Rock (lighthouse), off Cape Clear Island, 60 M. to the S.W. of Queenstown.

In crossing the Atlantic Ocean from E. to W. the steamer descends through about 11 degrees of latitude (Queenstown 51° 50’ N. lat., New York 40° 42’ 43’’). The course varies somewhat according to the season of the year and from other causes. The northerly route
(followed from July to Jan.) takes the steamers over the Grand Bank of Newfoundland (30-80 fathoms), while the southerly route followed for the rest of the year passes to the S. of it. Among the few events which cause a break in the similarity of day to day are the occasional sight of an Iceberg (an object of great beauty), usually seen above 42° N. lat. and between 45° and 50° E. long., and the passing of other vessels. Whales, dolphins, porpoises, etc., are also seen from time to time. The ‘day’s run’ of the steamer, given in nautical miles (7 ‘knots’ = about 8 Engl. M.), is usually posted up every day at noon in the companion-way. The traveller should remember that his watch will gain about $\frac{3}{4}$ hr. daily in going W. and lose the same amount in going E.

The following list of the colours of the funnels ('smoke-stacks') of the principal steamship-lines will help the traveller to identify the steamers he meets. Allen, red, with black and white bands and black top; American, black, with white band; Anchor, black (English flag); Compagnie Générale Transatlantique, red, with black top (French flag); Cunard, red, with black top; Hamburg, buff (express steamers) or black (German flag); Holland-America, black, with green and white bands; North German Lloyd, buff; Red Star, black, with white band; White Star, salmon, with black top.

The competition among the pilots of New York was formerly so keen that the pilot-boat often met the steamer hundreds of miles from land; but this custom has been superseded by the use of steam pilot-boats. The pilot dues vary with the draught of the vessel, but average about $230 (46 l.) for taking the vessel in and out. The first American land sighted is usually either Fire Island (p. 63) or the Navesink Highlands (p. 245), each with a lighthouse. About 3 hrs. after sighting land we approach Sandy Hook Bar, the Highlands standing out boldly to the left. The time of the voyage is reckoned to (or from) Sandy Hook Light Ship. The chief passage across the bar is afforded by the Gedney Channel, which is marked by six buoys with red and white electric lights and is available for large vessels at all states of the tide. Smaller ships may use the South Channel. We leave the lighthouse of Sandy Hook (p. 245; white light) to the left, enter the Lower Bay of New York (p. 24), and steer to the N. toward the Narrows, or entrance to New York Bay proper (p. 24), between the wooded Staten Island (p. 55) on the left and Long Island (p. 61) to the right. On the former are Fort Wadsworth, Fort Tompkins, and a lighthouse; on the latter lies Fort Hamilton, while on a rocky island in the channel is Fort Lafayette, where many Southern prisoners were confined during the Civil War. About 3 M. farther up is the Quarantine Station, off which all vessels anchor until they have been cleared by the officer of the Board of Health. The custom-house officers also usually come on board here (see p. xix). Cases of contagious diseases are taken to two Quarantine islands in the Lower Bay, off South Beach (p. 56). About halfway between the Quarantine Station and New York, to the left, is Robin’s Reef, with a white lighthouse.

As we advance up the beautiful *New York Harbour (p. 24),
the city of Brooklyn (p. 57) lies to the right and Jersey City (p. 56) to the left, while New York lies straight ahead. Liberty or Bedloe's Island, with the colossal statue of Liberty enlightening the World, lies nearly in mid-channel, while Governor's Island, with its old fort, barracks, and military museum, lies to the right, close inshore. To the left, beyond Bedloe's Island, is the small Ellis Island, where emigrants now land and are taken care of until they can be forwarded to their final destinations (comp. p. 26). The large buildings have been re-erected since a fire in 1897. The wonderful *Brooklyn Bridge (p. 31), spanning the East River (p. 24) and connecting New York with Brooklyn, is seen to the right.

The *Statue of Liberty, on Bedloe's Island, presented to the United States by the French Republic, in commemoration of the 100th anniversary of the Declaration of Independence, was designed by Auguste Bartholdi and erected in 1886. It is 151 ft. high (to the top of the torch), is made of copper and iron, and weighs 225 tons. The granite pedestal on which it stands, designed by R. M. Hunt, is 155 ft. high and was contributed by citizens of the United States. A stairway ascends inside the figure to the head, which can accommodate 40 persons and commands a magnificent view of New York and its vicinity (nearly as good from the first balcony). At night the torch is lit by electricity. Steamers run at frequent intervals to Bedloe's Island from the Battery (see p. 26; return-fare 25 c.).

As the steamer approaches her dock, in the North (Hudson) River, the conspicuous features in New York include the Produce Exchange (p. 26), with its square Florentine tower; the Washington Building (p. 27), the Bowling Green Building (p. 27), and many others in Broadway (p. 27), almost hiding the spire of Trinity Church (p. 28); the St. Paul (p. 29) and Park Row Buildings (p. 30); and the lofty gilded dome of the World Building (p. 30). Passengers are landed directly on the wharf, attend to the custom-house examination of their baggage (comp. p. xix), and then drive to their destination, either taking their trunks with them or entrusting them to one of the numerous transfer-agents or express-agents who meet the steamer (comp. p. xxii).

New York, see R. 2.

b. From Southampton to New York.

In 1893 the Inman Line was reconstituted as the American Line (International Navigation Co.), sailing under the American flag, and changed its starting-point from Liverpool to Southampton (3075 knots to New York; 61/2-7/2 days). Passengers are conveyed from London to Southampton (11/4 hr.), where they embark at the new Empress Dock. Southampton time is 4 hrs. 54 min. ahead of that of New York.

Southampton, see Baedeker's Great Britain. The steamer descends Southampton Water and passes through the Solent, affording a good view of Hurst Castle to the right and of the Needles to the left (lighthouse; red flashing light). The time of the voyage is reckoned from this point. To the right lie St. Alban's Head, the Bill of Portland, and Start Point (white flashing light). Eddystone Lighthouse (one fixed and one flashing light) is seen to the right, in Plymouth Bay. The last point seen of the English mainland is Lizard Head, in
Cornwall, and the last European land sighted is the Scilly Isles (lighthouse), about 30 M. to the S.W. of the Land's End. — The rest of the voyage is similar to that described in R. 1a.

c. From Hamburg to New York.

The Express Steamers of the Hamburg-American Line ply to New York via Southampton and Cherbourg (71/2-8 days; from Southampton to Cherbourg, 78 M., in 5 hrs.; from Cherbourg to New York, 3027 M., in 61/2-7 days), and the Mail Steamers run to New York direct (3505 knots, in 10-11 days).

The Express Steamers start from Cuxhaven, at the mouth of the Elbe, 58 M. from Hamburg, to which passengers are forwarded by special train, while the other boats start from Hamburg (see Baedeker's Handbook to Northern Germany) itself (wharf at the Grosse Grasbrook). At Cuxhaven, Southampton, and Cherbourg passengers embark by tenders. Passengers are carried between London and Southampton and between Paris and Cherbourg free of charge, by special trains. New York time is 4 hrs. 51 min. behind that of Southampton and 5 hrs. 35 min. behind that of Hamburg.

Leaving Cuxhaven, the steamer steers to the N.W., passing the three Elbe Lightships and affording a distant view of the red rocks of Heligoland to the right. Various other German, Dutch, and Belgian lights are visible. The first English lights are those of the Galloper Lightship and the Goodwin Sands, while the first part of the coast to come in sight is usually near Dover. Farther on we pass through the Straits of Dover, with the English and French coasts visible to the right and left. The steamer of the direct service keeps on her way through mid-channel, while the express-steamer hugs the English coast, passing Dungeness, Beachy Head, and various lightships. Hastings, between Dungeness and Beachy Head, and Brighton, 15 M. to the W. of the latter, are sometimes visible. In front appears the picturesque Isle of Wight, with Ryde, Cowes, and the towers of Osborne, the marine home of Queen Victoria. The steamer passes through the sheltered Spithead Roads, between the Isle of Wight and the mainland (with Portsmouth to the right), and enters Southampton Water (430 knots), where it generally anchors off Chatham Castle, to receive the British mails and passengers from Southampton (see Baedeker's Great Britain). After leaving Southampton, the steamer proceeds to Cherbourg to take on passengers from Paris and the South and the French, Continental, and Eastern mails. The remainder of the route to New York is similar to that of R. 1b. The docks of the Hamburg Co. are at Hoboken (p. 56), on the W. side of the North River, whence passengers are conveyed to New York by large ferry-steamers.

d. From Bremen to New York.

The Express Steamers of the North German Lloyd (Norddeutscher Lloyd) run to New York (3560 knots, in 7 days) via Southampton, but others run to New York direct. The steamers start from (40 M.) Bremerhaven, at the mouth of the Weser, to which passengers are forwarded by special train. See Baedeker's Northern Germany. The 'Kaiser Wilhelm der Grosse' of this line holds the record for the quickest passages across the Atlantic from Southampton to New York (5 days 20 hrs.) and vice versa (5 days 17 hrs. 8 min.). New York time is 51/2 hrs. behind that of Bremen.
On issuing from the mouth of the Weser, the steamer steers to the N.W., with the Jeldebusen opening to the left. A little farther on it passes the East Frisian Islands. The rest of the voyage is similar to that described in R. 1c. Southampton is about 460 M. from Bremerhaven.

e. From Havre to New York.

This route is followed by the French steamers of the Compagnie Générale Transatlantique. The distance is 3,095 knots and the average time 7-8 days. New York time is 5 hrs. behind that of Havre.

Havre, see Baedeker's Handbook to Northern France. The steamer steers out into the English Channel, affording distant views of Cape La Hague and the Channel Islands to the left, and of the Scilly Islands to the right. The farther course of the voyage resembles that of the steamers of the German and American lines, as above described.

f. From Antwerp to New York.

This is the route of the Red Star Line (3,310-3,310 knots, in 8 days). New York time is 5½ hrs. behind that of Antwerp.

Antwerp, see Baedeker's Handbook to Holland and Belgium. The steamer descends the West Schelde, with the Dutch province of Zeeland on either side, passes (40 M.) Flushing, on the island of Walcheren (right), and enters the North Sea. In very clear weather the towers of Bruges and Ostend may sometimes be distinguished to the left farther on. Several light-ships are passed, and the first English land sighted is the South Forelands, high chalk cliffs, with two fixed electric lights. Their subsequent course is similar to that of the German, French, and American Line steamers (see above).

g. From Rotterdam or Amsterdam to New York.

This is the route of the Holland-America Line, sailing under the Dutch flag (3,400 M., in 9½-10½ days). The steamers from Rotterdam call at Boulogne, those from Amsterdam proceed direct to New York.

Rotterdam and Amsterdam, see Baedeker's Belgium and Holland. The Rotterdam steamers descend the Maas or Meuse and the Nieuwe Waterweg (canal), passing the Hoek van Holland at its mouth, and enter the North Sea. — The Amsterdam steamers reach the North Sea by the Noordzee Kanaal, 15 M. in length. — The subsequent course in each case is similar to that described in R. 1f.

h. From Glasgow to New York.

This is the route of the Anchor Line and the Allan Line (2,900 knots, in 9-10 days; Moville, 2,780 knots, in 8-9 days). Passengers may join the steamer at Glasgow, Greenock, or Moville. The difference of time between Glasgow and New York is 4½ hrs.

Glasgow and the beautiful voyage down the Firth of Clyde are described in Baedeker's Handbook to Great Britain. Among the chief points passed are Dumbarton (r.), Greenock (1.), Gourock (1.), Toward Point (1.), the Isle of Bute (r.), the Cumbrae Islands (1.), the Isle of Arran (r.), and Ayr (1.). On leaving the estuary of the
river the steamer rounds the Mull of Cantyre (right) and proceeds to the W. along the N. coast of Ireland, passing the island of Rathlin and affording a distant view, to the left, of the Giant’s Causeway. It then ascends Lough Foyle to Moville, the port of Londonderry, where mail and extra-passengers are taken on board. On issuing from Lough Foyle the steamer steers at first to the W. and then, after passing Malin Head, the northernmost point of Ireland, to the S.W. The last part of Ireland seen is usually Tory Island (lighthouse) or the island of Arranmore, off the coast of Donegal. The general course followed across the Atlantic by the Glasgow steamers is considerably to the N. of that of the Liverpool boats, not joining the latter till the Banks of Newfoundland (p. 2), with their fogs and icebergs.

Arrival. Strangers arriving in New York by sea will find an explanation of the custom-house formalities at p. xix. All the main steamship landings are near tramway-lines (p. 12), and numerous hacks and cabs are always in waiting (bargaining advisable; fare to hotel for 1-2 pers., luggage included, at least $3). A few hotels send carriages to meet the European steamers. Transfer Agents (see pp. xxii, 15) are also on hand to receive trunks and forward them to any address (25-50 c.). Travellers landing on the New Jersey (or W.) side cross to New York by ferry, and will generally find it convenient to do so in cabs. Those coming by railway from the S. and W. cross the river by ferries in connection with the railways, and claim their baggage at the ferry-house in New York (see below). Travellers from Canada and the North, or from the West by the N. Y. C. R. R. route, arrive at the Grand Central Depot (see p. 40), in the heart of the city, and may use the Elevated Railway (see p. 10) to reach their city destination. Cab-fares, see p. 13.

Railway Stations (Depots). The Grand Central Station, E. 42nd St., between Lexington and Vanderbilt Avenues, is the only terminal station in New York proper. It is a large, handsome, and well-arranged building (restaurant in the basement), and is used by the trains of the New York Central & Hudson River Railroad (entr. from Vanderbilt Ave.; for Canada and the N., Chicago and the W., etc.), the New York & Harlem Railroad (entr. in Vanderbilt Ave.), and the New York, New Haven, & Hartford Railroad (entr. in 42nd St.; for Boston and New England, etc.). Some local trains of the Hudson River Ry., for stations up to Spuyten Duyvil (p. 166), start from the station at Tenth Ave. and W. 30th St., while others, for Van Cortlandt, Yonkers, etc., start at 8th Ave. and 155th St. (p. 11).

The other great railway systems have their depots on the New Jersey side of the North River and convey passengers to and from them by large ferry-boats. The ferry-houses, however, furnish the same opportunities for the purchase of tickets, checking baggage, etc., as the railway-stations, and the times of departure and arrival of trains by these lines are given with reference to the New York side of the river. — Pennsylvania Railroad Station, Exchange Place, Jersey City, reached by ferries from W. 23rd St., Desbrosses St., and Cortlandt St., used by trains of the Pennsylvania Railroad (for all points in the West and South), the Lehigh Valley, and the N. Y., Susquehanna, & Western railways. — Erie Railroad Station, Pennsylvania Ave., Jersey City, reached by ferries from Chambers St. and W. 23rd St., used by the New York, Lake Erie, & Western, the New Jersey & New York, the New York & Greenwood Lake, and the Northern New Jersey railroads. — West Shore Station, Weehawken, reached by ferries from Franklin St. and W. 42nd St., used by the West Shore Railroad (for the same districts as the N. Y. Central Railroad) and the New York, Ontario, &
Western Railroad. — Delaware, Lackawanna, and Western Station, Hoboken, reached by ferries from Christopher St. and Barclay St., used by the Delaware, Lackawanna, & Western Railroad (for New Jersey, Pennsylvania, and Western New York) and the Morris & Essex Railroad. — Central Railroad of New Jersey Depot, Communipaw, reached by ferries from Liberty St. and Whitehall St., used also by the Baltimore & Ohio and the Philadelphia & Reading Railroads.

For Brooklyn stations, see p. 57.

Steamers. 1. OCEAN STEAMSHIPS. The following is a list of the chief Passenger Steamship Companies between New York and Europe, with their docks, city-offices, and days of sailing (comp. R. 1 and p. xviii). White Star Line, Docks 38, 48, & 45, the last at foot of W. 10th St. (office, 11 Broadway; Wed.); International Navigation Co. (American Line, formerly Luman Line), Pier 14, foot of Vesey St. (office, 6 Bowling Green; Wed. and Sat.); Cunard Co., Dock 40, Clarkson St. (office, 4 Bowling Green; Sat. & Thurs.); Holland-America Line, foot of 5th and 6th Sts., Hoboken (office, 39 Broadway; to Boulogne and Rotterdam weekly, to Amsterdam fortnightly); Anchor Line, Dock 58, foot of W. 24th St. (office, 7 Bowling Green; Sat.); Allan Line, pier at the foot of W. 21st St. (office, 53 Broadway); Compagnie Générale Transatlantique, Dock 42, Morton St. (office, 3 Bowling Green; Sat.); North German Lloyd, Hoboken (office, 2 Bowling Green; Tues. & Sat. ; to Gibraltar, Genoa, and Naples weekly); Hamburg American Packet Co., Hoboken (office, 37 Broadway; Sat., Thurs., & Tues. ; to Genoa and the Orient in winter); Red Star Line, Pier 15 (office, 6 Bowling Green; Wed.). — Other ocean-going steamships ply to the ports of S. and Central America, the West Indies, Mexico, Cuba, Florida, New Orleans, Richmond, and other ports of the Southern States, the Mediterranean ports, Boston, Philadelphia, Portland (Maine), Newfoundland, etc. — The times of departure and other information are advertised in the daily papers.

2. RIVER, SOUND, AND HARBOUR STEAMERS. The following are a few of the principal points on the Hudson, Long Island Sound, and N. Y. Harbour, reached by steamer from New York. For full information on these and other lines, reference must be made to current time-tables and daily papers. The larger American river steamboats are very finely fitted up, and the traveller should not omit an inspection of one of the Fall River or Hudson River boats, even if he does not travel by them. They are very unlike European boats, rising in house-like tiers high above the water, and propelled by paddle-wheels and (usually) 'walking-beam' engines, the long shafts of which protrude above the middle of the deck. The 'smoke-stacks' or funnels are also unlike the European pattern. There are good restaurants on board, and a comfortable private state-room may be obtained for a small addition to the regular fare (usually $1-2 per night). The Hudson River boats cease running in winter, but most of the Sound boats ply throughout the year. — To Albany (p. 170), either by the Day Line, the People's Line, or the Citizen's Line (fares, etc., see p. 161). — To Catskill (p. 177), and Hudson (p. 167), either by the Albany Day Line (see above; $1 1/2; 6 1/4 hrs.) or from the foot of Christopher St. ($1; night-boat, 11 hrs.). — To Rondout (p. 169), by the Albany Day Line (see above) or by the 'Mary Powell', Vestry St. ($1). — To Troy (p. 160), by Albany Day Line ($2; 10 1/2 hrs.) or Citizen's Line ($1 1/2; $2 1/2; 12 hrs.; see above). — West Point (p. 168), by Albany Day Line (see above; 75 c.; $3 1/4 hrs. or by the 'Mary Powell' (see above; same fare; 3 hrs.). — To Boston (p. 81), by the Fall River, Providence, Norwich, or Stonington line (fare $2 1/2 acc. to the season; $2 1/2, 11/4 hrs.; for all details, see p. 71). — To Coney Island (p. 62), from W. 22nd St. and Pier 1, hourly or oftener in summer (fare 12 c.; 50 min.). — To Long Branch (p. 245), from Rector St. ($1; 11/4 hrs.); also from W. 22nd St. and Pier 1 (50 c.) — To Providence, Newport, Fall River, Stonington, and New London, see R. 4d (p. 74). — Ferries, see p. 14.

Hotels, Restaurants, etc.

Hotels (comp. p. xxv). The distinction between the four geographical groups in which the hotels of New York are here distributed is a some-
what arbitrary one, but it will perhaps give the traveller some help in selecting his quarters. As a general rule those who wish to be near the business-districts should select a 'Down Town' hotel, or at any rate, one not higher up than 14th St., while the ordinary tourist will probably find himself best suited in or to the N. of Madison Square. For the difference between the 'American' and 'European' plans, see p. xxvi.

**Down Town** (from the Battery to Canal St.). On the European Plan:

*Astor House* (Pl. a; B, 3), 225 Broadway, opposite the Post Office, an old and popular house, much frequented by business-men, R. from $1 1/2; *Cosmopolitan* (Pl. b; B, 2), 127 Chambers St., R. from $1; *Smith & McNeill's*, 195 Washington St. (Pl. B, 2), R. from 50 c.

**Between Canal St. and 14th St.** 1. European Plan: *Bryvoort House* (Pl. f; D, E, 3), at the corner of Fifth Ave. and 8th St., an aristocratic and quiet family hotel, patronised by English visitors, R. from $2; *St. Denis* (Pl. g; E, 3), cor. of Broadway and 11th St., good cuisine, R. from $1; *Hôtel Martin* (Pl. 1, E 3; French), 17 University Place, cor. 9th St., with excellent cuisine, R. from $1; *Albert* (Pl. m; E, 3), 70 University Place, cor. of East 11th St., R. from $1; *Grieff* (Pl. n; E, 3), 19 W. 9th St., a small French house, R. from $1; *Mills House No. 1* (Pl. h; D, 3), Bleeker St., and *Mills House No. 2*, cor. of Rivington and Clinton Sts. (Pl. D, 4), R. 20 c., meals 10-15 c., cheap temperance institutions for men (see p. 32). — 2. American and European: *Broadway Central* (Pl. o; D, 3), 667-677 Broadway (1000 beds), from $2 1/2, R. from $1; *Colonne* (Pl. k; D, 3), 726 Broadway, $2, R. from $1, D. 75 c.; *Hotel Español* e Hispano-Americano (Pl. q; E, 2), 116 W. 14th St. (Spanish).

**From 14th St. to 26th St.** (incl. Union Sq. and Madison Sq.). 1. American Plan: *Westminster* (Pl. s; E, 3), Irving Place, cor. 16th St., a quiet house, patronised by diplomats, from $3 1/2. — 2. European Plan: *Hoffman House* (Pl. t; F, 3), Madison Sq., cor. of 24th St., much frequented by Democratic politicians, R. from $2; *Albermarle* (Pl. v; F, 3), cor. Broadway and 24th St., Madison Sq., R. $2; *Everett Ho.* (Pl. w; E, 3), N. side of Union Sq., cor. 4th Ave. & 17th St., R. from $1 1/2; *Kensington* (Pl. h), cor. 15th St., R. from $1 1/2; *Union Square Hotel* (Pl. z; E, 3), 16 Union Sq., R. from $1; *New Amsterdam*, Fourth Ave., cor. 21st St., R. from $1; *Margaret Louisa Home*, 16th St., practically a moderate-priced hotel for business women (see p. 36; previous application advisable). — 3. American and European Plan: *Fifth Avenue Hotel* (Pl. r; F, 3), Madison Sq., at the corner of 23rd St., long one of the most noted hotels in New York, with accommodation for 1000 guests, frequented by officials and Republican politicians, from $5 per day, R. from $2; *Ashland* (Pl. e2; F, 3), 315 Fourth Ave., cor. 24th St., commercial, $2 1/2-3, R. $1.

**Above Madison Square.** 1. European Plan: *Waldorf-Astoria* (Pl. aa; F, G, 3), a huge double building at the cor. of Fifth Ave. and 34th St., with large and sumptuously decorated ball, dining, concert, and other public rooms, a sun-parlour on the roof, etc. (comp. p. 36), R. from $2 1/2; *Holland House* (Pl. kk; F, 3), Fifth Ave., cor. 30th St., another magnificent hotel, R. from $2; *Imperial* (Pl. mm; F, 3), Broadway, cor. 32nd St., a large and handsomely decorated house, R. from $2; *Manhattan* (Pl. c; G, 3), a 16-story building in Madison Ave., cor. 42nd St., near Grand Central Depot, R. from $2 (fine fresco by C. Y. Turner in the 'Conversation Room'); *Buckingham* (Pl. rr; H, 3), a large family hotel, Fifth Ave., cor. 50th St., R. from $1 1/2; *Normandie* (Pl. nn; G, 2), *Gilsy* (Pl. oo; F, 3), *Vendome* (Pl. D; G, 2), Broadway, cor. 38th, 29th, and 41st Sts., R. from $2; *Grand* (Pl. pp; F, 3), *Cadillac* (Pl. vv; G, 2), *St. Cloud* (Pl. tt; G, 2), *Metropole* (Pl. uu; G, 2), Broadway, cor. 31st, 43rd, 42nd, and 41st Sts., R. from $1; *Grand Union* (Pl. xx; G, 3), 42nd St., opposite the Grand Central Station, R. from $1; *Grenoble* (Pl. uu; G, 3), Seventh Ave., cor. 56th St.; *St. Andrew*, 201 W. 72nd St., cor. of the Boulevard and near the beginning of Riverside Drive (Pl. K, 1), well spoken of; *Winthrop*, 2088 Seventh Ave. (Harlem), R. $1 1/2.

Restaurants. NEW YORK. 2. Route. 9

cor. of Fifth Ave. and 59th St., adjoining Central Park. R. and board from about $5, R. from $2; *Windsor (Pl. ff; H, 3), Fifth Ave., cor. 46th St., a favourite resort of brokers and financiers, from $4, R. from $1 1/2; *Cambridge, Fifth Ave., cor. 33rd St.; Murray Hill (Pl. A; G, 3), Park Ave., cor. 41st St., near the Grand Central Depot, from $4 1/2, R. from $1 1/2; Majestic (Pl. p, K 2; roof-garden), San Remo (Pl. hh; K 2), Eighth Ave., cor. 72nd and 74th Sts., facing Central Park, from $4, R. from $2; Empire (Pl. u; I, 2), cor. W. 63rd St. and Broadway (Boulevard), near Central Park, well spoken of, from $3, R. from $1; Gerlach (Pl. x; F 3), 49-55 W. 27th St., from $4, R. from $2; Sturtevant (Pl. dd; F 3), 1186 Broadway, frequented by army and navy men, from $3, R. from $1; *Park Avenue (Pl. E; F, 3), Fourth Ave., cor. 32nd St., from $3 1/2, R. from $1; Marlborough (Pl. y; G, 2), Broadway, cor. 36th St., $3 1/2, R. $1 1/2.

3. American Plan: Bristol (Pl. bb; G, 3), Fifth Ave., cor. 42nd St., ca. $5; Madison Avenue (Pl. ii; I, 3), Madison Ave., cor. 58th St., from $3; Balmoral, Lenox Ave., cor. 113th St.

Most of the hotels take in guests by the week or month at very considerable reductions of their daily rates (comp. p. xxi); and when two persons occupy one room the charge is often materially diminished. Many of the uptown hotels are almost entirely occupied by permanent guests and are little used by tourists. Fees to waiters and bell-boys are unfortunately necessary in New York hotels.

Boarding Houses. Good board can be procured in New York from $8 a week upwards, varying according to the situation and locality of the house. For $15-20 one should obtain good accommodation in the best neighbourhood (e.g. near Madison Sq.). Above Washington Square and between 7th and Lexington Avenues boarding-houses may be found in every block. Many are in E. 21st St., Gramercy Park, Irving Place, and Madison Ave., while immense numbers can be found on the W. side by a little search (vacancies indicated by slips of paper near the door-bell) or a carefully worded advertisement. Good and cheaper boarding-houses may also be found in Henry St. and the contiguous parts of Brooklyn (p. 57), near the bridge and ferries. A distinct understanding should be come to beforehand, and references should be asked for in houses not specially recommended. Light, heat, service (but not boot-cleaning), and the use of a bath should be included in the price for board.

Furnished Rooms may be obtained in convenient quarters from $4-5 per week upwards, and breakfast is sometimes provided in the same house. But the English custom of living in lodgings, ordering one's own meals, and having them cooked and served by the landlady is unknown in New York.

Restaurants. The distinction made below between à la carte and table-d'hôte restaurants is not necessarily mutually exclusive, but indicates the general custom at the different houses. At all the high-priced à la carte restaurants one portion (except of oysters or desert) is generally enough for two persons, and two portions are abundant for three. Many of the table-d'hôte dinners are wonderfully good for the prices charged, but the à la carte restaurants are usually dear for a person dining alone. The following list divides the restaurants into two groups, above and below 14th St. It is customary to give a small fee to the waiter, varying from 5 c. in the cheaper restaurants to 25 c. in the best. Wine (generally poor and dear, except at the foreign restaurants) and beer (5-10 c. per glass, 10-20 c. per pint) may be usually obtained, but are by no means so universally ordered as in Europe.

Up Town Restaurants (above 14th St.). 1. A la carte. *Delmonico's (Pl. G, 3), N.E. cor. 5th Avenue and 44th St. (formerly in Madison Sq.), a famous house, with high charges; public and private rooms, café, ball rooms, etc.; crowded about 7-8 p.m. and after the theatres. *Sherry's (Pl. G, 3), a similar establishment at the S.W. cor. of the same streets, with a very fashionable patronage. Restaurants at the *Waldorf-Astoria (fine roof-garden restaurant open in summer), Holland Ho., Netherland, Plaza, Savoy, Majestic, San Remo, Manhattan, Hoffman Ho., *Gilsey Ho.,
Everett Ho., Imperial, and other hotels on the European plan, see above; Arena (Muschenheim), 31st St., just to the E. of Broadway, a popular resort, with rooms decorated in a unique manner; FIoriet, 128 Fifth Ave., cor. 18th St., well spoken of; *Bancet & Pastorini, 1140 Third Avenue, small; Dorlon, 6 E. 23rd St. (Madison Sq.), famous for oysters and fish; Shanks, Broadway, between 42nd and 43rd Sts.; Burns, 755 Sixth Ave. and 102 W. 45th St.; O'Neill, 358 Sixth Avenue, cor. 22nd St., less fashionable and expensive; Mouquin, 456 Sixth Avenue; *Petit Vefour, W. 23th St.; Browne's Chop House, 1424 Broadway, between 39th and 40th St. (good cuisine and interesting dramatic pictures; men only); Engel, 73 W. 35th St.; The Studio, 332 Sixth Ave., between 20th and 21st St., frequented for supper after the theatre (men only); Claremont Hotel, near Grant's Monument, see p. 59; Terrace Garden, 59th St., near Lexington Ave.; Columbia Dairy Kitchen, 48 E. 14th St., moderate prices, much frequented at luncheon by ladies; Dennett's Luncheon Rooms, moderate. — 2. Table-d'hôte Restaurants (D. usually from 5 to 8): Morello, 4 W. 29th St., D. with wine $1/4; Moretti, 22 E. 21st St., D. with wine $1; Murray Hill Hotel Restaurant (see p. 9), D. 75 c. (dearer in dining-room of hotel); Plavino, 38 W. 29th St., D. $1; *Purssell, 710 Broadway, D. $1; Riccadonna, 42 Union Sq. E.; Hotel Hungaria, Union Sq. (E. side), D. with wine 70 c.; Gazzo, Metropolitán Opera House building, D. $1.

Down Town Restaurants. 1. A la carte. Café Savarin, in the Equitable Building (p. 29), 120 Broadway, finely fitted up, high charges; *St. Denis Hotel (Taylor's Restaurant), good cuisine and native wines, see p. 8; Sinclair House, charges moderate; *Fleischmann's Vienna Bakery, Broadway, cor. 10th St., tea or coffee, with rolls, 25 c., restaurant upstairs (closed at 8.30 p.m.); Eyrie Restaurant, on the 23rd story of the Tract Society Building, 150 Nassau St. (fine view); Delmonico, 2 S. William St.; *Astor House (p. 8), a much-frequented restaurant (2000-2500 luncheons served daily), with luncheon-counters, etc.; Hoffman Café, 7 Beaver St., and 60 Broadway; *Mouquin, 20 Ann St.; *Solar, 80 University Place, good cuisine (for men); *Hôtel Martin, 17 University Pl., cor. 9th St., French cuisine; Smith & McNeil, 197 Washington St., moderate; *Close's Temperance Eating Rooms, 100 Duane St., much frequented, moderate, good 'dairy' dishes; *Farth's Chop House (Hickey), 64 John St.; Old Tom's Chop House, Thames St. — 2. Tables-d'hôte. *Café Martin, see p. 8, D. $1 1/4; Delite, 86 Fulton St., D. 50, L. 30 c.; *Griffou, 19 W. 9th St., D. 50 c.

Among the places frequented by ladies may be mentioned Purssell's, St. Denis Hotel, and the Vienna Café, see above; Naething's, 118 Fulton St.; the luncheon-room at Macy's (p. 53); the Women's Exchange, 12 E. 30th St.

Oyster Saloons. *Dorlon, 6 W. 23rd St. (Madison Sq.), 96 & 157 Fulton Market; O'Neil, see above; Silsbee, Sixth Ave., near 14th St.; also at nearly all other restaurants and at the Markets.

The Hotel Bars are a characteristic American feature, which may be studied to perfection in New York. Good bars at most of the leading hotels; Stewart's, 8 Warren St., with good pictures (shown to ladies, 9-11 a.m.); the Fog Horn, Ninth Ave., cor. 23rd St. The 'free lunches' given at many bars are elaborate enough to suggest enormous profits on the beverages, which alone are paid for.

Confectioners. Maillard, 1097 Broadway; Huyler, 150 and 363 Broadway and 21 W. 42nd St., also famous for 'ice cream soda' and other refreshing summer-drinks; Brummett, 331 Broadway, 2 W. 14th St., and 293 Sixth Avenue; Purssell's, see above; Macy, 14th St., cor. Sixth Ave. — Soda-water flavoured with syrups of various kinds, 'ice-cream sodas', egg and other 'phosphates', and other non-alcoholic beverages are very popular in America and may be procured at all confectioners and drug-stores (prices from 5 c. upwards). The 'Soda Fountain' at the drug-store is, indeed, a prominent American institution.

City Railroads. Tramways. Post Office, etc.

Elevated Railroads (Manhattan Railway Co., 195 Broadway). A large portion of the passenger traffic in New York is carried on by the four
Elevated Railroads, which now carry fully 200 million passengers annually. There are two lines on the E. side of the city (Second and Third Avenues), and two on the W. (Sixth and Ninth Avenues). The most frequented is the Third Avenue line, next to which comes the Sixth Avenue; but all are disagreeably crowded at business-hours (first and last cars often less so than those in the middle). Apart from this, the 'L', as it is popularly called, affords a very pleasant mode of conveyance, contrasting advantageously with the underground railway in London. The track may be described as a continuous viaduct or bridge, supported on iron columns. The general height is about on a level with the first-floor windows of the houses, but at places it is much higher than this, the Ninth Avenue line attaining an elevation of 65 ft. at 110th St., where it forms a bold curve in passing from Ninth to Eighth Avenue. The stations occur about every five blocks in the lower quarters, and are nowhere more than ½ M. apart. Passengers ascend from the street by the staircases to the right (looking in the direction in which they wish to travel), buy a ticket at the ticket-office, and drop it into the 'chopper-box' at the entrance to the platform. The uniform fare, for any distance, is 5 c.; children under five, free. The trains run at intervals of a few minutes during the day, and during the business-hours morning and evening follow each other with hardly an intermission. The Ninth Avenue trains cease running about 8.30 p.m., and those of the Second Avenue at midnight, but the trains on the Third and Sixth Avenues run all night, at intervals of 10 min. and ¼ hr. respectively. The trains run on all lines on Sunday, at somewhat less frequent intervals. All four lines start from South Ferry, adjoining the Barge Office (p. 26). They vary in length from 3½ M. to 10½ M. Short branches run from the Third Avenue Line to the City Hall, the 84th St. Ferry (these two also from Second Ave.), and the Grand Central Depot. Passengers should ascertain whether or not they change cars at the busy Chatham Sq. station. The Sixth Avenue line proper ends at Central Park (59th St.), but a branch diverges to Ninth Avenue at 53rd St., and about two-thirds of the trains (Harlem trains; red or green signals and lamps) follow this route. The Second, Third, and Ninth Avenue Lines end at the Harlem River (see Plan), the last connecting with the Putnam Division of the N. Y. C. & H. R. R. for High Bridge (p. 54) and points in Westchester County. The Sixth Avenue Line has the cleanest cars and is used by the pleasantest class of passengers, and should therefore be preferred when practicable. The name of the station is announced by the guard on arrival, and the name of the 'next station' on leaving the station. The names are always placarded at the stations, of which the following is a list.

2nd Ave. — South Ferry, Hanover Sq., Fulton St., Franklin Sq., Chatham Sq. (change cars for City Hall), Canal St., Grand St., Rivington St., 1st, 8th, 14th, 19th, 23rd, 34th (change cars for Hunter's Point), 42nd, 50th, 57th, 63th, 70th, 80th, 86th, 92nd, 99th, 111th, 117th, 121st, 127th, 132nd Sts.

3rd Ave. — South Ferry, Hanover Sq., Fulton St., Franklin Sq., Chatham Sq. (change cars for City Hall), Canal St., Grand St., Houston St., 9th, 14th, 18th, 23rd, 28th, 34th (change cars for Hunter's Point), 42nd (change cars for Grand Central Depot), 47th, 53rd, 59th, 67th, 76th, 84th, 89th, 100th, 103rd, 116th, 125th, 129th Sts.

6th Ave. — South Ferry, Battery Place, Rector St., Cortlandt St., Park Pl., Chambers St., Franklin St., Grand St., Bleecker St., 5th, 14th, 18th, 23rd, 28th, 33rd, 42nd, 50th (change cars for 58th St. & Sixth Ave.), St. Ave. & 53rd, 59th, 66th, 72nd, 81st, 93rd, 104th, 116th, 125th, 139th, 135th, 140th, 145th, 155th Sts. (stations from 59th to 104th are on Ninth Ave., 116th to 155th on Eighth Ave.).

9th Ave. — South Ferry, Rector St., Cortlandt St., Barclay St., Warren St., Franklin St., Desbrosses St., Houston St., 14th, 23rd, 30th, 54th, 42nd, 50th, 59th, 72nd, 81st, 93rd, 104th, 116th, 125th, 139th, 135th, 145th, 155th Sts.

There is also an elevated railroad, the Suburban Rapid Transit, in the borough of the Bronx, beyond the Harlem River, connecting with the Second and Third Avenue Lines at 129th St. Stations: 129th, 135rd, 138th, 143rd, 149th, 161st, 166th, 169th Sts., Wendover Ave., 174th, and 177th Sts. (fare 5 c.; free transfer to and from 2nd and 3rd Ave. lines).
Brooklyn Bridge Railway. Trains of three or four cars, propelled by steam and electricity, cross the Brooklyn Bridge (see p. 31) in 5 min., running at intervals of about 45 seconds, and continue in Brooklyn over the Elevated Railroads to all parts of the city (fare 5 c.). At the New York end the platforms communicate directly with the City Hall branch of the Third Avenue Elevated. Comp. p. 57. — Electric Tramways over Brooklyn Bridge, see p. 31.

Tramways. Nearly all the avenues running N. and S. and most of the important cross-streets are traversed by Tramways (Street Cars, Surface Cars), most of which are now operated by electricity ('underground trolley system'). The cross-town cars are still drawn by horses. Uniform fare for any distance 5 c. Overcrowding is nearly as constant, especially on the Broadway cars, as on the Elevated Railroad. Transfer tickets are usually furnished without extra charge for the cross-lines. The cars nominally stop only at the upper crossings going up, and at the lower crossings going down town. Most lines run every few minutes. The following is a list of a few of the chief lines.

A. The North and South Lines. — 1. Broadway Line. From South Ferry (p. 14) through Whitehall St., Broadway, 45th St., and Seventh Avenue to Central Park (59th St.).
2. Columbus Avenue Line. From South Ferry along Broadway as above to 45th St. and thence by 7th Ave., W. 53rd St., and 9th or Columbus Ave. to 109th St. Thence by Lenox Ave. Line (see p. 13).
3. Lexington Avenue Line. From South Ferry by Broadway to 23rd St. and thence by Lexington Ave. to 130th St.
4. Fourth Avenue Line. From the Post Office (p. 29) through Centre St., Grand St., the Bowery, Fourth Avenue, and Madison Avenue to Mott Haven (138th St.).
5. Third Avenue Line. From the Astor House (p. 8) through Park Row, Chatham St., the Bowery, and Third Avenue, to Harlem (p. 53; 130th St.).
6. Second Avenue Line. From the foot of Fulton St. (p. 29) through Fulton, Water, South, Oliver, and Chatham Sts., the Bowery, and Grand, Forsyth, and Houston Sts., and along Second Ave. to Harlem (129th St.), returning by nearly the same route.
7. First Avenue Line. From South Ferry by Water, South, Monroe, Grand, and Houston Sts., Ave. D, 14th St., Ave. A, 23rd St., and First Ave. to Central Park (cor. Fifth Ave. and 59th St.).
8. Sixth Avenue and Amsterdam Avenue Line. From corner of Broadway and Vesey St., through Church St., Chambers St., W. Broadway, Canal, Varick, and Carmine Sts., 6th Ave., 59th St., and Amsterdam Ave., to 125th St.
9. Seventh Avenue Line. From cor. of Broadway and Canal St. by 7th Ave. to 56th St.
10. Eighth Avenue Line. From cor. of Broadway and Vesey St. to Canal St., and thence by Hudson St. and Eighth Ave. to 155th St. (p. 53).
11. Ninth Avenue Line. From the corner of Greenwich and Fulton Sts. (p. 29), through Greenwich St. and 9th Ave., to 125th St.
12. Tenth Avenue Line (West Side Belt Line). From South Ferry, through Whitehall St., Bowling Green, Battery Place, West St., and 10th Ave., to Central Park (cor. Fifth Ave. and 59th St.). The cars pass all the W. side ferries.
13. East River and Avenue A Line (East Side Belt Line). From South Ferry, through Whitehall, South, Broad, Water, South, Grand, and Houston Sts., Ave. D, 14th St., Ave. A, 23rd St., and 1st Ave. to 59th St. (Central Park). This line passes all the E. side ferries.
14. Bleecker Street and Fulton Ferry Line. From Fulton Ferry (p. 29) through Fulton, William, and Ann St., Park Row, Centre, Leonard, Elm, Howard, Crosby, Bleecker, MacDougal, W. 4th, W. 12th, Hudson, and 14th Sts., 9th Ave., and 23rd St., to 23rd St. Ferry. A branch from Bleecker St. connects this line and No. 1 with Brooklyn Bridge (p. 31).
15. City Hall, Avenue B, and Thirty Fourth St. Line. From the Post Office (p. 29), through Park Row, Chatham St., E. Broadway, Avenue B, 14th St., 1st Ave., and 34th St. to 34th St. Ferry (p. 14).
Carriages. NEW YORK. 2. Route. 13

16. Lenox Avenue Line. From 109th St. (cor. Columbus Ave.) by Manhattan Ave., 116th St., and Lenox Ave. to 146th St. (Harlem River). This line connects with No. 2.

Several overhead electric lines also ply from Harlem Bridge (p. 54) and Central Bridge (p. 54) to points in the Borough of Bronx (p. 54), beyond the river.

18. Avenue C Line. From Erie R. R. Ferry, Chambers St. (p. 14), through West St., Clarkson St., Prince St. (in returning Houston St.), the Bowery, Stanton St., Avenue C, 18th St., Ave. A, 23rd St., and 1st Ave. to 34th St. Ferry (p. 14).

19. Forty-second and Grand St. Line. From Grand St. Ferry (p. 14), through Goerck St., 2nd St., Ave. A, 14th St., 4th Ave., 23rd St., Broadway, 34th St., 10th Ave., and 42nd St., to Weehawken Ferry (p. 14).

21. Fourteenth St. Line. From Union Square along 14th St. to 14th St. Ferry and thence by 11th Ave. to 23rd St. Ferry.

22. Christopher and Tenth St. Line. From Christopher St. Ferry (p. 14), through Christopher St., Greenwich Ave., 6th St., Ave. A, and E. 10th St. to Ferry at foot of E. 10th St. (p. 14).

23. Central Cross-Town Railroad. From 23rd St. East River Ferry (p. 14), through Ave. A, 18th St., Broadway, 14th St., 7th Ave., and W. 11th St. to Christopher St. Ferry (p. 14).

24. Twenty-third St. Line. From end to end of 23rd St., with a branch via 2nd Ave., 28th St., and 1st Ave. to 34th St. Ferry (p. 14).

25. Harlem and Manhattanville Cable Line. From E. end of 125th St., through 125th St. and Manhattan St., to Manhattanville (p. 53; 130th St.), on the Hudson, with branch through 10th Ave. to 187th St. (Washington Heights), passing High Bridge (p. 54).

27. Forty-second St. and Boulevard Line. From 34th St. Ferry (East River; p. 24), by 1st Ave., 42nd St., 7th Ave., Broadway, 50th St., Boulevard (p. 35), Grant's Tomb (p. 52), and 129th St., to Fort Lee Ferry (p. 14), W. 129th St. This line runs near Riverside Park (p. 52). A branch-line runs along 42nd St. to Weehawken Ferry, and another runs via 1st Ave., 110th St., and St. Nicholas Avenue to Fort Lee Ferry (p. 14).

Omnibuses (Stagea) run from Bleecker St. through S. Fifth Avenue, Washington Sq., and Fifth Avenue to 82nd St.

Carriages. The cab system is still in a somewhat undeveloped condition in New York, owing partly to the high fares, partly to the abundance of tramway and railway accommodation, and partly to the bad paving of many of the streets, which makes driving, outside the favoured localities, anything but a pleasure. Hackney Carriages, however, are in waiting at the railway stations, ferries, and principal steamboat docks, and are also found on stands at Madison Sq., Union Sq., City Hall Park, and many other points.

The fares are as follows: Hackney Carriages or Coaches, to carry 1-4 pers., generally with two horses, $1 for the first mile, and 40 c. for each 1/2 M. adit.; per hr. $1 1/2, each addit. 15 c. hr. 75 c., waiting 30 c. per 1/4 hr. Cabs and Hansoms for 1-2 pers., 50, 25 c., $1, 50 c., 25 c. One trunk, not exceeding 50 lbs. in weight, free; extra luggage 25 c. per piece. Children under eight years of age, free. Carriages hired from hotels or livery-stables are somewhat dearer. The authorised table of fares should be hung in each carriage. A mile is estimated as equal to twenty blocks from N. to S. and as seven blocks from E. to W. In case of dispute the driver should be told to drive to the nearest police-office or to the City Hall, where a complaint may be made to the Mayor's Marshal, Room No. 1. In all cases a distinct bargain should be made beforehand, and it
is often possible to make one on more favourable terms than the legal fares. — Electric Cabs (same fares) may be found in Broadway, above Madison Sq. They are pleasant for travel on asphalted streets, but they are not allowed to enter the public parks.

The Pennsylvania Railway Company has organized an excellent cab service for passengers arriving at its 23rd St. Station. The fares, which are prominently displayed in each vehicle, are as follows: hansom, for 1-2 pers., $0.25; each addit. mile or fraction 4c.; four-wheeler, $1/2 M., 1-2 pers. 40c., 3-4 pers. 50c., each addit. mile or fraction 20c.; small omnibuses, $1/2 M., 1-4 pers. $1, each addit. pers. 10c., each addit. mile 25c. Trunk 10c., valise carried outside 5c. — The New York Central has a similar service in connection with the Grand Central Station (fares a little higher).

Ferries (see Plan). To Brooklyn, from Catherine St., Fulton St., Wall St., and Whitehall St. (South Ferry). To Williamsburgh or East Brooklyn, from Grand St., Roosevelt St., E. Houston St., and E. 23rd St. To Greenpoint, from E. 10th St. and E. 23rd St. To Hunter's Point, Long Island City, from James Slip and E. 34th St. To Astoria, Long Island City, from E. 52nd St. To Jersey City: from Desbrosses St., from W. 23rd St., and from Cortlandt St. to Pennsylvania Railway Station; from Whitehall St. and Liberty St. to Central of New Jersey Railway Station (Communipaw); from Chambers St. and from W. 23rd St. to Pavonia Avenue and Erie Railroad. To Hoboken, from Barclay, Christopher, and W. 14th Sts. To Weehawken, from W. 42nd St. and Jay St. To Fort Lee, from W. 130th St. (10 c.). To Staten Island, from South Ferry (5 c.). To Randall's, to Blackwell's, to Hart's, and to Ward's Island from E. 26th St. (fares 20-40 c.). To Bedloe's Island and to Governor's Island from the Battery. The 'Brooklyn' or 'Pennsylvania Annex' is an important ferry connecting Brooklyn (Fulton St.), near the Suspension Bridge, with the Penn. R. R. terminus in New Jersey (fare 10c.). The ferries ply at frequent intervals, the more important running every few minutes in the business-hours. Fares generally 1-3c. The ferry-boats are comfortable and very unlike European steamers. One side is devoted to a ladies' cabin, but men may also use this when not smoking. These ferries carry about 200 million passengers yearly.

Post Office. The General Post Office (see p. 29), City Hall Park, is open day and night; closed on Sun., except 9-11 a.m. The Money Order Office, on the second floor, Rooms 40-42, is open daily, except Sun. and holidays, 9-5. The General Delivery windows (for Poste Restante) letters are on the groundfloor, Park Row side. The Registered Letter Office is on the mezzanine floor. Besides the G.P.O. district, the city is divided into about thirty postal districts, each served by a branch post-office or Station, generally designated by letters of the alphabet (Station A, etc.; open 7-5, Sun. 9-11 a.m.), and there are also about 100 Sub-Stations, in druggists' shops, where all the ordinary postal services are rendered, including the issue of domestic or inland money orders. Letters within New York are delivered more expeditiously if the 'station letter' is affixed to the address. Letters are also expedited in delivery if posted on the same side of Fifth Ave. (E. or W.) as their destination. Stamps are also sold in many other shops (chiefly druggists') throughout the city; and letters may be posted in about 2000 Letter Boxes, affixed to lamp-posts, or in any hotel. From 4 to 23 collections, and from 3 to 9 deliveries are made daily according to the district. Letters are collected on Sun. (at less frequent intervals), but not delivered; mail matter may, however, be obtained on Sun., 9-11 a.m., in Park Row Lobby, G.P.O. The time of closing of foreign mails is advertised in the daily papers; the chief European mails are despatched on Wed., Thurs., and Saturday. — Comp. p. xxviii and the New York Post Office Guide (free, on application at G.P.O.).

Telegraph Offices (comp. p. xxviii). Western Union Telegraph Co. (p. 29), 195 Broadway; chief branch-offices, 599, 854, and 1227 Broadway, 16 Broad St., 821 Sixth Avenue, Fifth Ave. (cor. 23rd St.), and 158 E. 125th St. All these are open day and night. There are also about 115 other branch-offices.
throughout the city, including all the principal hotels and the Grand Central Depot, and Atlantic Cable messages are received at about 40 of these. The rate for local messages in New York and Brooklyn is 21 c. per 10 words, and 1 c. for each additional word; for other parts of the United States it varies from 25 c. to $1 per 10 words. No charge is made for address or signature. — Postal Telegraph and Cable Co., 253 Broadway and many branch-offices. The rate per word for cable messages to Great Britain, Ireland, France, and Germany is 25 c.; Belgium and Switzerland 30 c.; Holland, Italy 32 c.; Denmark and Norway 35 c.; Austria-Hungary 34 c.; Sweden 39 c.; Russia 43 c.

Telephone Offices. The telephonic communication of New York is mainly in the hands of the Metropolitan Co., 18 Cortlandt St., which has numerous branch-offices throughout the city, at any of which persons may be put in communication with members of the Telephone Exchange at the rate of 10 c. per 5 minutes. These offices are generally located in hotels, drug-stores, telegraph-stations, ferry-houses, and so on. The 'Long Distance Telephone', at all public ('pay') stations, communicates with Albany, Boston, Philadelphia, Washington, Chicago, etc. (charges high).

Messenger Service. This is carried on by the American District Telegraph Co. (6 Dey St.) and the Postal Telegraph Co. (253 Broadway), which have numerous offices throughout New York, generally in the stations of the telegraph companies. Message boys can be summoned by the 'automatic calls' found in hotels, banks, offices, and many private houses. Fees by tariff (about 30 c. per hour).

Express Service. Broadway below Trinity Church is the headquarters of the numerous express companies of New York, by which baggage may be expressed to all parts of the world. Among the chief, all in Broadway, are: Adams Express Co., No. 59; American Express Co., No. 65; United States Express Co., No. 40; Wells, Fargo & Co., No. 63. For expressing baggage within the United States, the traveller will, however, seldom need to leave his hotel. Among the chief 'Transfer Companies' for transferring luggage within New York and Brooklyn are Westcott (14 Park Place) and Dodd's New York Transfer Co. (1 Astor House and 1323 Broadway); 25-50 c. per trunk, according to distance.

Tourist Agents. Raymond & Whitcomb, 31 E. 14th St., Union Sq.; Thos. Cook & Son, 261 and 1225 Broadway; Henry Gaze & Sons, 113 Broadway.

Theatres. Concerts. Sport. Clubs, etc.

Theatres. Metropolitan Opera House, 1419 Broadway; prices $1.5. — Academy of Music, cor. of Irving Pl. and 14th St., now used for spectacular dramas, etc.; prices 25 c. to $1. — Daly's Theatre, corner of Broadway and 30th St., Shakespearean and modern comedy (Miss Ada Rehan); orchestra stalls $11/2-2, balcony $1-2, 2nd balcony 50-70 c. — Wallack's Theatre, Broadway, cor. 30th St., high-class comedy; $1/2-1/2. — Broadway Theatre, Broadway, cor. 41st St.; comedies, light operas, etc.; $1/2-1/2. — Fifth Avenue Theatre, Broadway, cor. 28th St.; a 'star theatre', with performances by good English and other visiting actors; $1/2-2. — Lyceum, Fourth Avenue, between 23d and 24th Sts.; comedy; $1/2-2. — Star Theatre, Broadway, cor. 13th St.; $1/4-1. — Casino, Broadway, cor. 39th St.; operettas; adm. $1/2-2; in summer, concerts on the roof, see p. 16. — Grand Opera House, Eighth Ave., cor. 23rd St., a large house (2000 seats); popular and spectacular pieces; $1/4-1. — Garden Theatre, in Madison Square Garden (p. 41); comedy; $1/2-1/2. — Manhattan Theatre, Broadway, cor. 33rd St.; $1/2-1/2. — Knickerbocker Theatre, cor. of Broadway and 33th St.; $1/2-2. — Garrick Theatre, W. 39th St., to the E. of Sixth Ave.; $1/2-2. — Bijou Theatre, Broadway, between 30th and 31st Sts.; $1/4-1/2. — Fourteenth St. Theatre, near Sixth Ave.; popular pieces; $1/4-1/2. — Irving Place Theatre (Amberg's), cor. of Irving Place and E. 15th St.; performances in German; $1/2-1/2. — Thaïta, 48 Bowery; formerly, as the Bowery Theatre, the leading theatre of New York, but now relinquished to 'down town' performances in German; $1/4-1. — Third Avenue Theatre, between 30th and
Concerts. Whether owing to the large German element in its population or to other causes, it is undeniable that New York cultivates high class music with distinguished success and enjoys a series of concerts ranking with the best in Europe. The concerts of the Philharmonic Society (founded 1842) are given every 3 or 4 weeks during the season (Nov.-April) in the Carnegie Music Hall (p. 43; conductor, Emil Paur) on Saturdays at 8.15 p.m.; public rehearsals on the Fridays before the concert at 2 p.m., at reduced prices. Other fashionable subscription-concerts are given in the rooms of the Waldorf-Astoria Hotel (p. 8). Excellent concerts are also given by the Arion Society (in the club-house in Park Avenue, p. 41), the Liederkranz (68th St., between Park and Lexington Avenues), the Beethoven Männerchor, the Sängerbund, the Mendelssohn Glee Club (W. 40th St.), etc. The above concerts are mainly attended by members and subscribers, but a limited number of single tickets are obtainable in some cases. Good Sun. evening concerts are given at the Carnegie Music Hall and the Metropolitan Opera House (p. 15). In summer bands play at frequent intervals in Central Park (Sat. & Sun. afternoons), the Battery, Tompkins Square, and several other public gardens and parks. — For details, see the daily newspapers.

Exhibitions of Paintings. Metropolitan Museum, see p. 45; Lenox Library, see p. 35; New York Historical Society, see p. 42; Annual Exhibition at the National Academy of Design (p. 39) in spring and (less important) autumn; Society of American Artists, in the building of the Society of Fine Arts, W. 57th St., betw. Seventh Ave. and Broadway.
(April); Water Colour Society, at the Academy of Design (Jan. or Feb.). Other exhibitions, at irregular intervals, are given by the Art Students' League, the National Sculpture Society, the Society of Decorative Art, the Sal-magundi Club, the Kit-Kat Club, etc. Adm. to the above generally 25 c. There are usually fair collections of pictures for sale in the galleries of the Art Dealers. — Among the finest private collections are those of Mrs. W. H. Vanderbilt, Mr. H. G. Marquand, Mrs. Wm. Astor, Mr. Wm. Rockefeller, Mr. Ed. D. Adams, Mr. August Belmont, Mr. H. O. Havemeyer, Mr. Wm. T. Evans, Mr. Ben. Altman, Mr. R. H. Halsted, Mr. Albert Spencer, Mr. James A. Garland, Mr. Cyrus J. Lawrence, Mr. George Gould (Bemberg's 'Standard Bearer', etc.), Mr. H. P. Whitney, and Mr. T. B. Clarke.

Visitors specially interested will generally be admitted to these on previous application by letter, enclosing card. Visitors are also received at the Studios of the leading artists, many of whom have their regular reception days.

**Sport.** The chief Horse Races near New York are those of the **New York Jockey Club** at Morris Park; the **Brooklyn Jockey Club** at Gravesend between Brooklyn and Coney Island; and the **Coney Island Jockey Club** at Sheepshead Bay. Each holds two 15-day meetings between the middle of May and the end of September (see daily papers). Adm. to each race-track $1; grand stand and paddock each 50c. extra. **Trotting Races** take place at Parkville, near Prospect Park, Brooklyn (p. 60). The famous **Stables of Mr. Robt. Bonner**, owner of Maud S. and Sunol, may be seen on application to Mr. Bonner at 8 W. 56th St. or at the New York Ledger Office, 162 William St. — **Fox Hunting** (with a 'drag' or carted fox) is carried on in Long Island, Staten Island, and New Jersey. — The chief **Yacht Clubs** are the **New York (250 yachts)**, **Seawanhaka**, **American** (steam yachts), **Atlantic**, **Larchmont**, etc.; numerous regattas are held in the harbour and Long Island Sound, and an annual cruise, with racing, is made to Newport. — **Rowing** is best on the Harlem River, where boats may be hired for about 50 c. an hour. There are many clubs here, and a few on the Hudson and on the Brooklyn and Staten Island shores of the harbour. — **Canoeing** is practised all round Manhattan Island. The **New York Canoe Club** has its headquarters at Tompkinsville, Staten Island (p. 56). — **Driving.** The fashionable drive is through Central Park, where many handsome equipages may be seen on fine afternoons. The chief resorts of the owners of 'fast trotters' are Seventh and St. Nicholas Avenues, to the N. of Central Park, and the new 'Speedway', skirting the Harlem River to the N. of 155th St., which is reserved exclusively for fast driving. All who are interested in horses should try to see the scene here. The **Coaching Club** and the **Tandem Club** parade on Saturdays in May in Central and Riverside Parks. Coaching parties and public coaches (seats usually $3) leave the Waldorf-Astoria and the Holland House daily in April, May, and June for points reached via N. New York and Westchester County (comp. p. 57). — **Riding** is best seen and enjoyed in Central and Riverside Parks. The New York Riding Club has a club-house and ring in 58th St., between Fifth and Madison Aves. — **Fishing,** for striped bass, blue fish, weak fish, etc., is practised at various points near New York on the coasts of Long Island and New Jersey. Steamers specially built for deep-sea fishing leave New York every morning in the season and lie out at sea all day (see daily papers). — **Baseball** is played from May to Nov. The chief professional contests take place in the grounds at Eighth Ave. and 157th St., at the end of the Sixth Ave. El. R. R. See daily papers. — **Cricket.** The chief clubs are the **Staten Island,** at Livingston (p. 56); the **St. George,** at Hoboken; the **Manhattan,** at Prospect Park; and the **New Jersey,** at Bergen Point. — **Lawn Tennis.** The chief clubs are the **New York** at Washington Heights and the **Staten Island** and **St. George** mentioned above. Tennis courts are attached to the various athletic clubs, and there are hundreds of courts in Central Park. From May to Oct. strangers may play in the **Tennis Building**, 41st St., near Seventh Ave. — **Racquet Club,** 43rd St., between Fifth and Sixth Aves. — **Cycling.** Among the best-known of the innumerable cycling clubs are the **New York Bicycle Club**, the
Citizens' Club, and the Ixion. Wheels may be hired of the dealers along the Boulevard and elsewhere. Races take place on Sat. in summer at Manhattan Beach and at the Berkeley Athletic Track, Morris Dock. Skating is practised on the lakes in Central Park, Van Cortlandt Park (p. 54), and Prospect Park, and at the St. Nicholas Skating Rink, 66th St., near Columbus Ave. (best). — Athletics. University Athletic Club, 19 W. 34th St.; New York Athletic Club, at the corner of Sixth Ave. and 59th St., with grounds and country club-house on Travers Island, Long Island Sound; Knickerbocker Athletic Club, at the corner of Madison Ave. and 45th St.; Central Turn-Verein (German gymnastic society), with 250 members, 68th St., near Third Ave.; Staten Island Club, see p. 17; Columbia College, with grounds at Williamsbridge; Young Men's Christian Association, with grounds at Mott Haven and five gymnasia (chief club-house at 23rd St., p. 40). The Amateur Athletic Union has its office at 241 Broadway. — Football is played in autumn by the athletic clubs and colleges. Games between leading colleges are played at New York on the last Thurs. and Sat. of November. — Golf. The chief golf-clubs within easy reach of New York are the St. Andrews' at Yonkers (p. 163); the Ardsley, at Ardsley (see p. 57); the Morris County, at Morristown, N. J.; the Dyker Meadow, near Fort Hamilton; the Knollwood, near Elmsford; the Baltusrol, near Short Hills, New Jersey; the Seabright, N. J.; the Meadowbrook, L. I. (p. 63); the Shinnecock Hills (p. 64); the Tuxedo (p. 247); the Oakland, Bayside, L. I.; the Westchester, on Long Island Sound; and the Marine & Field, Bath Beach. — Snooking. The famous rifle-ranges at Creedmoor, Long Island, 13½ m. from the City Hall, now belong to the New York State militia. There are several gun clubs for 'trap' and pigeon-shooting in New Jersey. — Polo is played mainly at the country clubs (see below).

Clubs. The chief clubs, to which strangers can obtain access only when introduced by a member, are the following: Manhattan Club, Fifth Ave., cor. of 34th St., see p. 36; Union League, Fifth Ave., cor. 39th St., see p. 36 (1880 members); Union, Fifth Ave., cor. 21st St. (1500 members; social); University, Fifth Ave., cor. 54th St., for college graduates (2400 members); Century (p. 37), 7 W. 43rd St. (literary and artistic; celebrated meetings on the first Sat. of each month); Metropolitan, Fifth Ave., cor. 60th St. (the 'Millionnaires' Club'); Lotos, 538 Fifth Ave.; Knickerbocker, Fifth Ave., cor. 32nd St. (450 members; sporting and fashionable); Reform, 233 Fifth Ave. (for those interested in political reforms; 2200 members); New York (p. 36), Fifth Ave., cor. 35th St.; St. Nicholas Club, 7 W. 44th St. (300 members; confined to descendants of old New York families); Republican, 450 Fifth Ave. (political); Democratic, 617 Fifth Ave. (political); Authors' Club, 883 Seventh Ave. (Carnegie Music Hall); Press Club, 34 W. 26th St.; Players' Club, 16 Gramercy Park, with interesting pictures and relics; Bar Association, 42 W. 44th St.; Lawyers' Club, 120 Broadway; Grolier Club, 29 E. 32nd St.; Columet Club, Fifth Ave., cor. 28th St.; German Club (Deutscher Verein) (p. 38), 59th St., facing Central Park; Progress Club, Fifth Ave., cor. 63rd St., Hebrew; Harmonie, 43 W. 42nd St., Hebrew; Arion (p. 41), Park Ave., cor. 59th St. (German and musical); Freundschaft (p. 41), Park Ave., cor. 72nd St. (German); Cercle Français, 24 W. 26th St.; Aldine Association, Fifth Ave., cor. 15th St. (Constable Building); Downtown Association, 60 Pine St. (these two lunching clubs); Harvard, 27 W. 44th St.; Military, 751 Fifth Ave.; Catholic, 120 Central Park South; Colonial, 127 W. 72nd St.; United Service, 16 W. 31st St.; Barnard Club, 883 Seventh Ave. (for men and women); Sorosis, a women's club, meeting monthly at Delmonico's; Ladies' New York Club, 28 E. 22nd St.; Women's University Club, Carnegie Hall (receptions on Sat.); Women's Press Club, Carnegie Hall. — Among the chief Country Clubs near New York are the Meadowbrook, Hempstead, L. I. (p. 63); Rockaway, Rockaway, L. I. (p. 63); Westchester, at Westchester; and Richmond, Staten Island (p. 56).

Shops ("Stores"). Many of the New York shops are very large and handsome, easily bearing comparison with those of Europe. The prices,
however, are, as a rule, considerably higher. The chief shopping resorts are Broadway, from 8th to 34th St.; Fifth Ave., from 14th to 42nd St.; Twenty-Third St., between Fifth and Sixth Ave.; Fourteenth St., between Broadway and Sixth Ave.; and Sixth Avenue, from 12th to 23rd St. (the last two localities somewhat cheaper than the others). An evening visit to Grand St. E. of the Bowery (p. 31), will show the shopping of the tenement-districts in full swing. A characteristic feature is formed by the large ‘Dry Goods’ stores, huge establishments in the style of the Bon Marché in Paris, containing almost everything necessary for a complete outfit. Among these may be mentioned Arnold, Constable, & Co., 381 Broadway, cor. 19th St.; Lord & Taylor, 391 Broadway; Altman, 295 Sixth Ave.; John Wanamaker, Broadway, cor. 10th St.; Macy, cor. of 14th St. and 6th Ave.; Stern, 32 W. 23rd St.; McCreery, 391 Broadway, cor. 11th St.; Dinielli, 761 Broadway; O’Neill, 327 Sixth Ave.; Ridley, 309 Grand St.; Siegel-Cooper Co., 396 Sixth Ave.

Booksellers. Charles Scribner’s Sons, 155 Fifth Ave., one of the largest and handsomest book-shops in the world; G. P. Putnam’s Sons, 27 W. 23rd St.; Brentano, 31 Union Sq., cor. 16th St.; Dodd, Mead, & Co., 149 Fifth Ave.; Lemcke & Buchner, 312 Broadway (German books); Dutton, 31 W. 23rd St.; Dyersen & Pfeiffer (late Christlnef), 429 Fifth Ave. (French and other foreign books); Stechert, 9 E. 16th St. (German); Steiger, 25 Park Place (German); Methodist Book Concern, 150 Fifth Ave. — Second-hand Booksellers: Leggat, 51 Chambers St.; Clark, 171 Fulton St.; Bouton, 10 W. 28th St.; E. W. Johnson, 112 E. 42nd St.

Baths. Hot and cold baths may be obtained at all the hotels (25 c.-75 c.) and large barbers’ shops (25 c.). Turkish and Russian baths ($1.411/2) may be obtained at the following: Hoffman House (p. 34); Windsor, at Windsor Hotel (p. 37), 57 E. 46th St.; Copes & Ryan, 18 Lafayette Place; Hoefer (Ariston), cor. Broadway and 55th St.; Everard, 30 W. 28th St.; Produce Exchange, 8 Broadway; Haynes, 41 W. 26th St.; Easton, 7 E. 46th St.; Mayer, 194 Madison Ave.; Riverside Baths, 239 W. 69th St. — Salt Water Swimming Baths, at the Battery (25 c., warm 30 c.). There are also several Free Public Baths, both on the Hudson and the East River, visited annually by 5-6 million bathers (June-Sept.).

Libraries and Reading Rooms. New York Public Library (Astor, Lenox, & Tilden Foundations), see p. 36; Astor Library, see p. 33 (9 to 6); Mercantile Library (p. 32), on introduction by a member (8-9); Lenox Library, see p. 33 (9-6); Cooper Institute Reading Room (see p. 33), open free, 8 a.m. to 10 p.m.; Apprentices’ Library, 18 E. 16th St. (8-9); Y. M. C. A. Reading Rooms, free, at 52 E. 23rd St., 361 Madison Ave., 5 W. 12th St., etc. (8.30-10); Young Women’s Christian Association, 7 E. 15th St. (9-9); New York Free Circulating Library, 226 W. 42nd St. and 49 Bond St., with several branches (9-9; Sun. 4-9); New York Society Library, 109 University Place, founded in 1754 (100,000 vols.; 9-6, reading-room 9-9; for members only); Historical Society (p. 42), for strangers on the introduction of a member (9-6); Harlem Library, 32 W. 123rd St. (25,000 vols. ; 9-9, free); Aquilar Free Library, 197 E. Broadway and various branches (9-9); Mott Memorial Library (medical), 64 Madison Ave. (11-9); New York Hospital Library, 6 W. 16th St. (medical; 10-5); Law Institute Library, Post Office, Rooms 116-122, 4th floor (legal; 35,000 vols.; 9-10); American Institute Library, 115 W. 38th St. (agricultural and industrial; 9-9); Geographical Society, 11 W. 29th St.; College Settlement Association, 95 Rivington St. (Wed., 3.30-5 and 7.30-9; Sat., 10-12). — There are also good libraries at Columbia University (p. 52), the University of New York, and some of the clubs. — Among the finest Private Libraries are those of Robert Hoe; M. C. Lefferts; G. B. de Forest; Augustin Daly (dramatic); F. R. Halsey; E. B. Holden; G. W. Vanderbilt; and C. C. Kathfleisch.

Newspapers. The periodical publications of New York embrace about
50 daily papers, 250 weekly papers and periodicals, and 350 monthly journals and magazines. Among the chief morning papers are the Herald (3c.; Independent), the Times (3c.; Independent), the Tribune (3c.; Republican), the World (1c.; Democratic), the Sun (2c.; Republican), the Journal (1c.; Democratic), the Press (1c.; Repub. and Protectionist), the German Staatszeitung (3c.; Dem.). The chief evening papers are the Evening Post (3c. an excellent Independent and Free Trade organ), the Mail and Express (2c.; Repub.), the evening editions of the Sun and World (1c. each), the Telegram (the evening edition of the Herald; 1c.), and the Commercial Advertiser (Ind.). Most of the daily papers publish Sunday editions; price 5c. Among the weeklies are the Nation, a high-class political and literary journal; Leslie's Weekly, Harper's Weekly, Harper's Bazar (for ladies), the Illustrated American, and other illustrated papers; Life, Puck, Judge, and other comic journals; the Criterion (6c.); the Outlook; the Scottish American Journal (1c.); and numerous technical and professional journals. The leading monthly magazines include the Century, Scribner's, Harper's, the Forum, the North American Review, the Popular Science Monthly, McClure's, Munsey's, Outing, Review of Reviews, St. Nicholas (for children), the Critic, the Bookman, and the Cosmopolitan.

Churches. There are in all about 550 churches in New York, of which one-sixth are Roman Catholic. The services in the Protestant churches usually begin at 11 a.m. and 8 p.m. The Sat. papers publish a list of the preachers for Sunday, and information is freely given at the hotels, at the City Mission, Fourth Ave., cor. 22nd St., or at the Y. M. C. A. The following list mentions a few of the chief congregations.

BAPTIST. Calvary Church, W. 57th St., between Sixth and Seventh Ave. (Rev. Dr. McArthur); Fifth Avenue, W. 46th St., near Fifth Ave. (Rev. W. Faunce); Judson Memorial, Washington Sq. (see p. 35).

CONGREGATIONAL. Broadway Tabernacle, Sixth Ave., cor. 34th St. (Rev. Dr. Jefferson); Pilgrim, Madison Ave., cor. 121st St. (Rev. Dr. Virgin).

DUTCH REFORMED. Colgate, Fifth Ave., cor. 48th St. (Rev. Dr. Coe); Madison Avenue, Madison Ave., cor. 57th St. (Rev. Dr. Kittredge).

FRIENDS OR QUAKERS. Meeting Houses, E. 15th St., cor. rutherford Place, and 144 E. 20th St. (Orthodox).

LUTHERAN. Gustavus Adolphus Swedish Evangelical, 150 E. 22nd St. (Rev. Mr. Stolpe); St. James, 870 Madison Ave. (Rev. Dr. Remensnyder); St. Peter's German Evangelical, Lexington Ave. (Rev. Dr. Moldenhake).

METHODIST EPISCOPAL. Calvary, Seventh Ave., cor. 129th St. (Rev. Dr. McChesney); Cornell Memorial, E. 76th St. (Rev. J. J. Foust); Madison Avenue, 669 Madison Ave. (Rev. A. Longacre); St. Andrew, W. 76th St. (Rev. J. O. Willson); St. James, Madison Ave. (Rev. E. S. Tipple).

Presbyterian. Brick Church, 410 Fifth Ave. (Rev. Dr. Van Dyke); Fifth Avenue, cor. 55th St.; First, 54 Fifth Ave. (Rev. Dr. Duffield); Fourth Avenue, 246 Fourth Ave.; Harlem, 43 E. 24th St. (Rev. Dr. M. Alexander); Madison Square, 506 Madison Ave. (Rev. Dr. Parkhurst); University Place, cor. E. 10th St. (Rev. Dr. George Alexander).

PROTESTANT EPISCOPAL. Cathedral, see p. 51; All Souls, Madison Ave., cor. 66th St. (Rev. Dr. Heber Newton); Calvary, 234 Fourth Ave. (Rev. J. L. Parks); Grace Church, 800 Broadway (Rev. Dr. Huntington; see p. 33); Heavenly Rest, 505 Fifth Ave. (Rev. Dr. Morgan; see p. 37); St. Bartholomew. 348 Madison Ave. (Rev. Dr. Greer); St. George, 7 Rutherford Place (Rev. Dr. Rainford; see p. 42); St. Michael, Amsterdam Ave. (Rev. Dr. Peters); St. Thomas, Fifth Ave., cor. W. 53rd St. (Rev. Dr. J. W. Brown); Trinity, Broadway, at the corner of Rector St. (Rev. Dr. Morgan Dix; comp. p. 28).

ROMAN CATHOLIC. St. Patrick's Cathedral, Fifth Ave. (see p. 37); All Saints, Madison Ave., cor. 129th St.; St. Francis Xavier, 36 W. 16th St.; St. Stephen, 149 E. 26th St.; St. Paul the Apostle, Columbus (Ninth) Ave., cor. 59th St.; St. Gabriel, 312 E. 37th St.; St. Agnes, 143 E. 43rd St.; Sacred Heart, 447 W. 51st St.; St. Joseph, 59 Sixth Ave. There are several German, French, Italian, and Polish R. C. Churches. Numerous services.

SWEDENHURGIAN OF NEW JERUSALEM CHURCH at 114 E. 35th St.

SYNAGOGUES. Beth-El, Fifth Ave., cor. 76th St. (Rev. Dr. Kohler); Sha'arai Tephila, V. 82nd St. (Rev. Dr. de Mendes); Temple Emanu-El,
Fifth Ave., cor. 43rd St. (Rev. Dr. Gottheil); Rodof Sholom, Lexington Ave., cor. 63rd St. (Rev. R. Grossmann); Shearith Israel, Central Park West, cor. 70th St. (Rev. H. P. Mendes).

UNITARIAN. *All Souls*, Fourth Avenue, cor. 20th St. (Rev. T. R. Slicer); *Messiah*, 61 E. 34th St. (Rev. Dr. Robert Collyer and Rev. Minot J. Savage).

UNIVERSALIST. Church of the Divine Paternity, Central Park West, cor. 76th St. (Rev. Dr. Eaton).

Among the chief churches for Coloured Persons are *St. Benedict the Moor* (R. C.), 210 Bleecker St., and the Methodist Episcopal Churches of *Zion* (351 Bleecker St.) and *Bethel* (239 W. 25th St.).

The headquarters of the *Salvation Army* are at 120 W. 14th St.

The Greater New York Fire Department has its headquarters at 157 E. 67th St. The force, which consists of upwards of 2000 men, with 150 steam fire engines, is under the supervision of a Fire Commissioner, with a Deputy Commissioner at Brooklyn (265 Jay St.). Its annual cost is about $2,300,000 (460,000£), and it has to deal yearly with 2500-3000 fires. The service and equipment are excellent, and a visit to an engine-house is interesting. The *Insurance Patrol*, maintained by the Board of Fire Underwriters, co-operates with the firemen in extinguishing fire, besides devoting itself to the special work of rescuing and guarding property.

Streets. Above 13th St. the streets of New York are laid out very regularly and cross each other at right angles, the chief exception being the old thoroughfare of Broadway, which crosses the island diagonally from S.S.E. to N.N.W. The streets in the lower part of the island are generally named after colonial worthies. Higher up those running across the island from E. to W. are numbered consecutively from 1 up to 225, while those running N. and S. are named Avenues and numbered from 1 to 12. In the widest part of the island, to the E. of First Avenue, are the additional short avenues A, B, C and D, while higher up, between Third and Fourth and between Fourth and Fifth Avenues respectively, are Lexington Avenue and Madison Avenue. To the N. of 59th St. the continuations of 8th, 9th, 10th, and 11th Avenues are known respectively as Central Park West, Columbus Ave., Amsterdam Ave., and West End Ave. The numbers in the avenues begin at the S. and run towards the N. Twenty blocks average 1 M. Above 8th St. the cross-streets are known as E. and W. with reference to their position to Fifth Ave., and their numbers begin at this avenue and run E. and W. A new hundred is begun at each avenue. The avenues are usually 100 ft. wide, and the cross streets 60-100 ft. The names of the streets are generally given on the corner lamp-posts. Those of foreign origin are usually anglicized in pronunciation (e.g. Dessbrosses St., pron. Dess-bross-es St.). New Yorkers rarely add the word 'street' after the name of a street; thus one will give his address as 'corner of 5th Ave. and 57th'; while the conductor of the Elevated Railroad will announce a station as 'Grand' or '23rd.'

Police Stations. The Central Police Station and Office of the Commissioners of Police is at 300 Mulberry St., and the city of Greater New York is divided into 80 precincts, each with its police station. The police force consists of about 7600 patrolmen, 'roundsmen', and officers, of which about 5400 belong to Manhattan or New York proper. The 'Broadway Squad' consists of specially fine-looking men.

British Consulate, 24 State St.; Consul General, Percy Sanderson, C. M. G.

Collections. The following is a list of the principal Exhibitions, Collections, etc., with the hours at which they are open.
Aquarium, Castle Garden (p. 26), open free, daily, 10-4 (on Mon. & Tues. 10-3).
Assay Office, United States (p. 25), open daily, 10-2 (Sat. 10-12); free.
City Hall (p. 29), daily, 10-4; free.
Custom House, United States (p. 28), daily, 10-2; free.
Geological Museum at Columbia University (p. 52), daily, 10-4; free.
Grant's Tomb, General (p. 52), daily, till dusk; free.
Libraries.—Astor (p. 33), daily, free; Mercantile (p. 32), daily, free; Lenox (p. 38), daily, free; Columbia (p. 52), daily, 8-10, free.
Madison Square Garden (pp. 16, 41). Visitors admitted to the tower (View),
daily, 10-10; 25 c.
*Metropolitan Museum of Art (p. 45), daily, 10 to dusk; on Mon. and
Frid. 25 c., at other times free; also on Tues. and Sat. 8-10 p.m.,
and on Sun. afternoon.
*Natural History, Museum of (p. 44), daily, 9-5; Mon. & Tues. 25 c., other
days free.
New York Historical Society (p. 42); daily, on introduction by a member.
Picture Galleries. See Metropolitan Museum, Lenox Library, and New York
Historical Society.
Produce Exchange (p. 26); daily; visitors admitted to the balcony; busi-
ness-hours, 9-4; free.
*St. Patrick's Cathedral (p. 37); all day; frequent services.
*Stock Exchange (p. 28); business-hours, 10-3; visitors admitted to the
gallery; free.
Sub-Treasury of the United States (p. 28); daily, 10-3; free (vaults shown
to visitors introduced to the Assistant Treasurer).
*Trinity Church (p. 28); open all day.
World Office (p. 30); visitors admitted to the Dome (View), 9-1; free.
Zoological Garden (p. 44), daily; free.
Principal Attractions. — *Metropolitan Art Museum (p. 45); *Natural
History Museum (p. 44); *St. Patrick's Cathedral (p. 37); Lenox Library
(p. 38); *Walk or drive in Broadway (p. 27) and Fifth Avenue (p. 39);
*View from the World Office (p. 30), Produce Exchange (p. 26), Tract Society
Building (p. 30), Statue of Liberty (p. 3), or Madison Square Garden (p. 41);
*Central Park (p. 43); *Brooklyn Suspension Bridge (p. 31); *Riverside Drive
(p. 52); Grant's Tomb (p. 52); *Columbia University (p. 52); High Bridge
(p. 54); Washington Bridge (p. 54); Stock Exchange (p. 28); *Trinity Church
(p. 28); Tiffany and Vanderbilt Houses (pp. 42, 57); Grace Church (p. 38);
*Harbour (p. 24); Ninth Avenue Elevated Railroad at 110th St. (p. 11).—
In summer the visitor should take a trip in one of the Staten Excursion
Steamers, which start at the foot of Cortlandt St., almost hourly, and
proceed round the Battery, up the E. River, and through Hell Gate and
Long Island Sound to Glen Island (p. 75), affording a good idea of the
configuration of Manhattan Island and of the traffic in the harbour and
rivers (return-fare 40 c.).

Greater New York, constituted by charter in 1897, is the largest
and wealthiest city of the New World, and inferior in population, as
also in commercial and financial importance, to London alone among
the cities of the globe. It is situated on New York Bay, in 40° 42'
43" N. lat. and 74° 0'3'' W. long. It consists of the boroughs of
Manhattan, The Bronx, Brooklyn, Queens, and Richmond, which
have a joint area of 320 sq. M. and an aggregate population (1898)
of about 3,500,000. Its extreme length (N. and S.) is 35 M., its
extreme width 19 M. Manhattan or New York proper, with nearly
2,000,000 inhab., consists mainly of Manhattan Island, a long and
narrow tongue of land bounded by the Hudson or North River on
the W. and the East River (part of Long Island Sound) on the E.,
and separated from the mainland on the N. and N.E. by the narrow
Harlem River and Spuyten Duyvil Creek; but also includes several
small islands in New York Bay and the E. River. Manhattan Island is 13 M. long, and varies in width from about \(\frac{1}{4}-\frac{1}{2}\) M. (at its extremities) to \(2\frac{1}{2}\) M., the general width being about \(1\frac{3}{4}-2\) M. It is very rocky, the chief formations being gneiss and limestone; and except in the S. portion, which is covered with deep alluvial deposits, a great amount of blasting was necessary to prepare sites for houses and streets. For about half of its length from the S. it slopes on each side from a central ridge, and at the upper end the ground rises precipitously from the Hudson to a height of 240 ft. (Washington Heights), descending rapidly on the E. side to the Harlem Flats. The Borough of the Bronx (140,000 inhab.) comprises a portion of the mainland beyond the Harlem River, extending on the N. to a point about 5 M. beyond the limits of the map at p. 55, and also several small islands in the East River and Long Island Sound. Manhattan and The Bronx together form what has hitherto been known, and is still known in ordinary parlance, as the City of New York. This, except when otherwise indicated, will be the meaning of 'New York' in the following pages. The Borough of Brooklyn, hitherto an independent city, is described in R. 3. The Borough of Queens comprises part of Queens County on Long Island, including Flushing (p. 64), part of Hempstead, Jamaica, Long Island City (p. 61), and Newtown. Its outer boundary is \(1\frac{1}{2}-2\frac{1}{2}\) M. to the E. of the map at p. 55. The Borough of Richmond is conterminous with Staten Island (p. 55).

The population of New York in 1890, according to the government census, amounted to 1,515,301; that of the various districts now constituting Greater New York was about 2,500,000. In 1899 New York contained only about 6000 inhab. and in 1776 about 22,000 (comp. p. 25); and at the first United States census (1790) it had 33,131. In 1800 the population was 60,515; in 1820, 123,706; in 1840, 312,710; in 1860, 513,663; and in 1880, 1,306,299. Jersey City (p. 56), Hoboken (p. 56), and other New Jersey suburbs, though in a different state, practically form part of the one huge city on New York Bay, and would add upwards of 400,000 to the population given above. The population is composed of very heterogeneous elements, including about 850,000 Irish, nearly 900,000 Germans, 200,000 English and Scottish, 100,000 Italians, 100,000 Russians, and 10,000 Chinese; and if we exclude the children of foreign parents born in New York, probably not more than one-fifth of the inhabitants can be described as native Americans. A large proportion are Roman Catholics. The death rate is about 20 per 1000.

Greater New York is governed by a Mayor and a Municipal Assembly consisting of two chambers. At the head of each of the separate boroughs is a President. The assessed valuation of taxable property in Greater New York is about \$ 2,500,000,000, or half that of London; its annual revenue is about \$ 65,000,000. Its debt (\$ 200,000,000) is about the same as that of London. The daily water supply amounts to 330,000,000 gallons (London 210,000,000). Other statistics show that Greater New York contains 167,000 buildings, 1200 M. of streets (1000 M. paved), 6600 acres of parks and open spaces, 1200 M. of sewers, 470 M. of tramways, and 65 M. of elevated railways.

The lower and older part of New York is irregularly laid out, and many of the streets are narrow and winding. The old buildings, however, have been almost entirely replaced by huge new piles of
Route 2. NEW YORK. Harbour.

offices, banks, and warehouses. This part of the city is entirely given up to business and is the chief seat of its vast commercial enterprise and wealth. Above 13th St. New York is laid out with great regularity (arrangement of the streets, see p. 21), but the precipitous banks of the Hudson at the N. end of the island (comp. p. 53) have necessitated some deviation from chessboard regularity in that district. Nearly the whole of Manhattan Island, as far as 155th St., is now covered with streets and buildings, but much of the narrow part of the island beyond that point and a still larger proportion of The Bronx (p. 54) have not yet been built over. The names of many of the villages absorbed by the growth of the city still cling to the districts here (Manhattanville, Harlem, Washington Heights, Morrisania, etc.). In proportion to its size New York is, perhaps, somewhat poorly furnished with open spaces, but Central Park (p. 43) is one of the finest parks in the world, and ample open spaces have been reserved beyond the Harlem River (comp. p. 54). The handsomest streets and residences are generally near the centre of the island, the most fashionable quarters being Fifth Avenue, Madison Avenue, and the portions of the cross-streets contiguous to these thoroughfares. The islands in the harbour belong to the U. S. Government, while those in the E. River are occupied by charitable and correctional institutions belonging to the city. New York is connected with Brooklyn by a fine suspension bridge (see p. 31), and a second is building; various schemes for bridging or tunnelling the Hudson also are now in progress or in contemplation. Several bridges cross the Harlem River.

*New York Harbour* (comp. p. 2) is one of the finest in the world, affording ample accommodation and depth of water for the largest vessels. The Upper Bay or New York Harbour Proper, 8 M. long and 4-5 M. wide, is completely landlocked and contains several islands. It communicates through the Narrows (p. 2) with Lower New York Bay, which is protected from the ocean by a bar running N. from Sandy Hook in New Jersey (18 M. from the Battery) towards Long Island. The bar is crossed by two channels, admitting vessels of 25-30 ft. draught. At the Battery the harbour divides into two branches: the Hudson or North River to the left and the East River to the right. The latter is really a tidal channel connecting New York Bay with Long Island Sound. Manhattan Island, between the two rivers, has a water front of about 30 M., all of which is available for sea-going vessels except about 5 M. on the Harlem River (comp., however, p. 54; water front of Greater New York about 350 M.). On the other side of the North River, here about 1 M. wide, lies the State of New Jersey, with the cities of Jersey City, Hoboken, etc. (comp. p. 56; ferries, see p. 14). To the E. of East River is Long Island, with Brooklyn and Long Island City (comp. R. 3). The shipping is mainly confined to the North River below 23rd St., and to the East River
below Grand St. The former contains the docks of the Transatlantic lines, some of which are on the New Jersey side. A walk along South St. shows the shipping in the East River, representing a large proportion both of the foreign and domestic trade of New York. Both rivers are alive with ferry-boats. A pleasant feature of the water-front is formed by the Pier Gardens or Recreation Piers, intended as winter and summer resorts for the inhabitants of the poorer Riverside districts. For the islands, Hell Gate, etc., see pp. 2, 55, 74.

History. Manhattan Island and the mouth of the Hudson are said to have been visited by the Florentine Verrazzani in 1524, but the authentic history of New York begins with the exploration of Henry Hudson in 1609 (see p. 162). The first permanent settlement on Manhattan Island was made by the Dutch West India Co. in 1624, and the first regular governor was Peter Minuit, a Westphalian, who bought the island from the Indians for 60 guilders (about $29 or 5£). The little town he founded was christened New Amsterdam and by 1650 had about 1000 inhabitants. The citizens established farms, traded for furs with the Indians, and entrenched themselves in fortifications. The N. limit of which coincided with the present line of Wall St. (p. 27). Peter Stuyvesant, the last of the four Dutch governors, arrived in 1647. In 1664 the town was seized, in time of peace, by the English under Col. Nicolls, and though retaken by the Dutch in 1673, it passed permanently into English possession by treaty in the following year. The first English governor was Sir Edmund Andros. The name of the town was changed to New York in honour of the Duke of York, to whom his brother, Charles II., had granted the entire province. Among the chief incidents in the Anglo-Colonial period were the usurpation of Leisler, leader of the pro Positive party, in 1689-91, and the Negro Insurrection in 1741, the coloured slaves forming at this time not far short of half the population. In 1765 the delegates of nine of the thirteen colonies met in New York to protest against the Stamp Act and to assert the doctrine of no taxation without representation; and the first actual bloodshed of the Revolution took place here in 1770 (six weeks before the Boston Massacre, p. 83), in a scuffle with the soldiers who tried to remove the Liberty Pole of the Sons of Liberty. At this time New York had about 20,000 inhab. (less than either Boston or Philadelphia); and the Ratzer Map of 1767 showed that the town extended to the neighborhood of the present City Hall Park (p. 29). The town was occupied by Washington in 1776, but after the battles of Long Island and Harlem Heights (see p. 53) the Americans retired, and New York became the British headquarters for seven years. The British troops evacuated the city on Nov. 26th, 1783. From 1785 to 1790 New York was the seat of the Federal Government, and it was the State capital down to 1797. Hamilton, Jay, and Burr were among the prominent men of this period. At the beginning of the present century the city had 60,000 inhab., and since then its growth has been very rapid, the tide of immigration setting in powerfully after the war of 1812, in which New York suffered considerably from the blockade. In 1837 the first steamboat was put on the Hudson (see p. 162), and in 1825 a great impulse to the city's commerce was given by the opening of the Erie Canal (p. 171). The Harlem Railway dates from 1831; the Elevated Railroad from 1877; gas-lighting from 1835; the use of electricity for illumination from about 1881. In the Civil War New York sent 116,000 men to the Federal armies, but in 1863 it was the scene of a riot in opposition to the draft, which cost 1000 lives. For several years the city suffered under the machinations of the so-called 'Tweed Ring', which had gained control of the municipal government; but in 1872 'Boss' Tweed and several of his fellow-conspirators were convicted of embezzlement of public funds and imprisoned. In March, 1869, New York was visited by a terrible 'blizzard', or storm of wind and snow, which cut off all communication with the outside world for several days.
and caused many deaths and much suffering. In 1890 a Commission was appointed by the State Legislature to inquire into the expediency of the consolidation of New York with Brooklyn and other contiguous towns and cities. In 1896 the act to make this consolidation became law, and in 1897 the charter of Greater New York (p. 22) was finally passed. The first mayor of the new city is Robert A. Van Wyck, who came into office in 1898. — Washington Irving (1783-1839) was a native of New York.

Commerce and Industry. The importance of New York as a commercial centre is shown by the fact that fully 50 per cent. of the entire foreign trade of the United States is carried on through its port. In the year ending June 30th, 1897, the value of foreign imports and exports was $1,036,241,470 (207,242,230 ft.). In 1897 the harbour was entered by 4934 vessels, of 7,518,351 tons, and cleared by 4664, of 7,334,647 tons. The duties collected on imports amounted to $119,645,632. About three-fourths of the immigrants into the United States land at New York, the number in the year ending June 30th, 1897, being 180,556. The manufactures of New York, though relatively less important than its commerce, are very varied and extensive, producing in 1890 goods to the value of $788,941,028 (157,788,200 ft.) and employing 365,000 hands.

The S. extremity of the island on which New York stands is occupied by the BATTERY (Pl. A, 3), a pleasant little park, 20 acres in extent, commanding a good view of the harbour but now somewhat marred by the intrusion of the elevated railroad. It takes its name from the old fort erected here by the early Dutch settlers and was long the fashionable quarter for residences. The park contains a statue of John Ericsson (1803-89), the inventor, by J. Scott Hartley, erected in 1893. The large circular erection on the W. side is Castle Garden, formerly the landing-place and temporary quarters of immigrants, which have now been transferred to Ellis Island (p. 3). It was at one time a concert-hall, where Jenny Lind made her first appearance in America (1850), and is now fitted up as the New York Aquarium (adm., see p. 22; 1,635,352 visitors in 1897). The United States Barge Office, a tasteful building with a tower 90 ft. high, a little to the E., is an appendage of the custom-house. The steamers for Bedloe's Island (see p. 3) and Staten Island (p. 55), and also several Brooklyn ferries, start from the Battery.

Looking to the N. from the Battery, we see in front of us two large red buildings: the Washington Building (p. 27) to the left and the Produce Exchange (Pl. A, 3) to the right. The latter, a huge brick and terracotta structure in the Italian Renaissance style, contains numerous offices and a large hall (1st floor), 220 ft. long, 144 ft. wide, and 60 ft. high (adm., see p. 22). The tower, 225 ft. high, commands a fine *View of the city and harbour (elevator).

Whitehall Street, containing the U. S. Army Building, leads hence to the S.E. to the South, Hamilton, and 39th St. ferries to Brooklyn (p. 14). A little to the E., at the S.E. corner of Broad St. and Pearl St., is what remains of the old Fraunces Tavern, where Washington took farewell of his officers in 1783. No. 73, Pearl St., was the first Dutch tavern, afterwards the Stadhuys or City Hall (tablet).

The small open space between the Produce Exchange and the Washington Building is the Bowling Green (Pl. A, 3), the cradle of New York. In the centre is a statue of Abraham de Peyster (1657-1728), by G. E. Bissell, erected in 1895.
The buildings on the S. side, mainly steamboat-offices, occupy the site of Fort Amsterdam, from which the Battery took its name (see p. 26), and which included the governor's house and a chapel. The fort was built in 1626 and demolished in 1787. Its site is indicated by a tablet placed by the Holland Society on No. 4, Bowling Green. A statue of George III., which formerly stood here, was pulled down on the day of the Declaration of Independence (July 4th, 1776) and melted into bullets. The Washington Building (see below) is on the site of the house erected in 1760 by Archibald Kennedy, Collector of the Port of New York, and afterwards occupied by the British generals Cornwallis, Howe, and Clinton. It was here that Benedict Arnold, also occupying a house on the Green, carried on his negotiations with the last-named. The railing round the Bowling Green circle dates from before the Revolution.

At the Bowling Green begins Broadway, the chief street in New York, extending hence all the way to Yonkers (p. 166), a distance of 19 M. Up to 33rd St. Broadway is the scene of a most busy and varied traffic, which reaches its culminating point in the lower part of the street during business-hours. This part of the street is almost entirely occupied by wholesale houses, insurance offices, banks, and the like; but farther up are numerous fine shops ('stores'). Broadway is no longer, as in the Dutch colonial days of its christening, the broadest street in New York, but it is still the most important. The number of immensely tall office-buildings with which it is now lined give it a curiously cañon-like appearance as we look up it. No. 1 Broadway, to the left, is the above-mentioned Washington Building, a lofty pile of offices erected by Mr. Cyrus W. Field, of ocean cable fame; the back and side windows afford splendid views of the harbour. It is adjoined by the still loftier Bowling Green Building (16 stories), designed by English architects and built with English capital. Other conspicuous business premises in the lower part of Broadway are the large Welles and Standard Oil Co. Buildings (to the right, Nos. 18, 26) and Aldrich Court (Nos. 43-45; left), on the site of the first habitation of white men on Manhattan Island (tablet of the Holland Society). Opposite the last is the Tower Building (No. 50), 185 ft. high and only 25 ft. wide. A little higher up, at the corner of Exchange Place, is the Consolidated Stock and Petroleum Exchange (visitors admitted to the gallery). At Nos. 64-68 (right) is the tall light sandstone building of the Manhattan Life Insurance Co., the tower of which is 350 ft. high (fine view of the city, harbour, etc.). To the right, at the corner of Exchange Place, is the Exchange Court Building, with large and excellent bronze statues of Stuyvesant, Clinton, Hudson, and Wolfe, by J. Massey Rhind. To the left, at the corner of Rector St., is the new and imposing Empire Building (20 stories). This brings us to Trinity Church (p. 28), opposite which is Wall St. (see below).

Wall Street (Pl. A, 3), diverging from Broadway to the right, is the Lombard Street of New York, 'the great nerve centre of all American business', and 'the financial barometer of the country', where 'finance and transportation, the two determining powers in business, have their headquarters'. The street, which follows the line of the walls of the Dutch city
consists mainly of a series of substantial and handsome banks and insurance offices. To the left, one block from Broadway, at the corner of Nassau St., is the Manhattan Trust Building, 330 ft. high. At the opposite corner of the same street stands the United States Sub-Treasury (Pl. A, 3; adm., see p. 22), a marble structure with a Doric portico, approached by a flight of steps bearing a large bronze statue of George Washington, by J. Q. A. Ward, erected in 1883. The building occupies the site of the old Federal Hall, in which the first U.S. Congress was held and Washington inaugurated as President. Next to the Sub-Treasury is the U.S. Assay Office (adm., p. 22), where strangers may see the processes of assaying and refining the crude bullion. Opposite, at the corner of Broad St. (see below), is the Drexel Building, a white marble structure in the Renaissance style. Farther along Wall St., at the corner of William St., is the U.S. Custom House (Pl. A, 3), a massive pile of dark-coloured granite, with an Ionic colonnade (columns 35 ft. high). The interior (open 10-3) consists of a huge rotunda, covered by a dome supported by eight enormous columns of Italian marble, with elaborate Corinthian capitals. The Custom House is to be rebuilt. — Farther on, Wall St. crosses Pearl Street (with the Cotton Exchange), Water St., and Front St., and ends at South St. and the ferry to Montague St., Brooklyn.

Broad St., a busy street leaving Wall St. opposite the Sub-Treasury, contains the *Stock Exchange (Pl. A, 3), a high marble building to the right, with other entrances in Wall St. and New St. Strangers, who are admitted to a gallery overlooking the hall (entr., 13 Wall St.), should not omit a visit to this strange scene of business, tumult, and excitement, a wilder scene probably than that presented in any European exchange (business-hours 10-3). The value of railway and other stocks dealt with here daily often amounts to $3,000,000 (6,000,000£), besides government bonds. As much as $64,000 (6,000£) has been paid for a seat in the New York Stock Exchange, and 4000l. is the present value. There are about 1200 members. — Opposite the Exchange, adjoining the Drexel Building (see above), is the Mills Building, an enormous pile in red brick. Broad St. ends at South St., a little to the N. of the Battery (p. 26).

Nassau St., running N. from Wall St., opposite Broad St., contains the office of the *Mutual Life Insurance Co. (Pl. A, B, 3), one of the handsomest business structures in New York, but not seen to advantage in this narrow street. It harbours the New York Chamber of Commerce, the oldest commercial corporation in the United States (1770). A tablet commemorates the fact that this was the site of the Middle Dutch Church (1727). — In Cedar St., between Nassau St. and Broadway, is the handsome new building (1896) of the *New York Clearing House Association, the business of which averages $115,000,000 daily and amounts to $35,000,000,000 (7,000,000,000£) per year.

On the W. side of Broadway, opposite the beginning of Wall St., rises *Trinity Church (Pl. A, 3; comp. p. x), a handsome Gothic edifice of brown stone, by R. M. Upjohn, 192 ft. long, 80 ft. wide, and 60 ft. high, with a spire 285 ft. high (view; permit from rector necessary). The present building dates from 1839-46, but occupies the site of a church of 1696. The church owns property to the value of at least 1,000,000£, producing an income of 100,000£, used in the support of several subsidiary churches and numerous charities (comp. p. 172).

The interior (adm., see p. 22), dimly lighted by stained glass, affords a strange contrast to the bustling life of Broadway. The chancel is at the W. end. The altar and reredos, built as a memorial of William B. Astor, are handsomely adorned with marble and mosaics. The bronze doors are a memorial of John Jacob Astor. In the so-called 'Bishops' Room' is the cenotaph of Bishop Onderdonk; in the vestry is the white marble monument of Bishop Hobart (1775-1880). — In the N.E. corner of
the Churchyard is a Gothic Monument in memory of American patriots who died in British prisons during the Revolution. Adjacent is a bronze statue of Judge Watts, Recorder of New York under the British, erected in 1892. By the S. railing of the churchyard is the grave of Alexander Hamilton (d. 1804; tomb with pyramidal top). Robert Fulton (d. 1815), the father of the steamboat, lies in the vault of the Livingston family, near the S. side of the chancel. Close to the S.E. corner of the church is the monument of Capt. Lawrence, slain in 1813 in his gallant defence of the 'Chesapeake' against the British frigate 'Shannon'. Among the other tombs are those of the ill-fated Charlotte Temple(?), Albert Gallatin (Secretary of the Treasury 1801-13). Gen. Phil. Kearney (d. 1862), and Wm. Bradford (d. 1752), printer of the first New York newspaper. The oldest stone is dated 1631.

Nearly opposite Trinity Church are the building of the *Union Trust Co. (No. 80 Broadway), one of the most successful architectural efforts of its kind in the United States, and the 23-story building of the American Surety Co. (cor. Pine St.; 306 ft. high), the latter containing the United States Weather Bureau, popularly known as 'Old Probabilities'. On the same side, between Pine St. and Cedar St., is the office of the *Equitable Life Insurance Co. (Pl. B, 3), with a well-equipped interior (1500 tenants; view from roof). Several other huge buildings, among them that of the Western Union Telegraph Co. (No. 195), are passed on the left ere we reach Fulton St. (see below).

Fulton Street (Pl. B, 2-4), one of the busiest streets in New York, leads E. to Fulton Market (fish, oysters, etc.) and Fulton Ferry (for Brooklyn) and W. to Washington Market, which should be visited for the sake of its wonderful display of fruit, vegetables, and other provisions.

At the S.E. corner of Fulton St. is the red brick building of the Evening Post (long edited by Wm. C. Bryant), and at the S.W. corner rises the tall and narrow office of the Mail & Express. A little higher up, on the right side of Broadway, are the Park Bank and the enormous St. Paul Building (cor. of Ann St.), with its 26 stories (308 ft. high). Opposite is St. Paul's Church (Pl. B, 3), the oldest church-edifice in New York (1756).

The graveyard contains some interesting monuments (Emmet, the Irish patriot, monument to the S.E. of the church; G. F. Cooke, the actor), and in the portico at the E. end of the church (next Broadway) there is a memorial of General Montgomery, who fell at the storming of Quebec in 1775. The positions of the square pews in which George Washington and Governor Clinton used to sit, in the N. and S. aisles, are marked by tablets on the walls. Comp. p. xxx.

Broadway now reaches the S. end of the open space known as City Hall Park (Pl. B, 3), the site of the ancient 'Commons' or pasturage, in and around which stand several important buildings. In the apex between Broadway and Park Row (p. 30) is the Post Office, a large Renaissance building, with a mansard roof, completed in 1876. Its four façades are respectively 290, 340, 130, and 230 ft. long. On the fourth floor are the United States Courts. About 2500 men are employed here, and nearly 1,400,000,000 letters and other postal packets are annually dealt with (comp. p. 14). — Behind the Post Office, to the N., is the *City Hall (see p. 22), containing the headquarters of the Mayor of Greater New York and other municipal authorities. It is a well-proportioned building in
the Italian style, with a central portico, two projecting wings, and a cupola clock-tower. The architect was John McComb. The rear was built of free-stone, as it was supposed at its erection (1803-12) that no one of importance would ever live to the N. of the building.

The Governor's Room (open to visitors, 10-4), used for official receptions, contains the chairs used in the first U.S. Congress; the chair in which Washington was inaugurated as President, the desk on which he wrote his first message to Congress, Jefferson's desk, and other relics. Among the portraits are those of Hamilton, Lafayette, and several governors of New York. Jefferson is commemorated by a statue. The Council Chamber contains a large portrait of Washington by Trumbull.

To the N. of the City Hall is the Court House (Pl. B, 3; 1861-67), a large building of white marble, with its principal entrance, garnished with lofty Corinthian columns, facing Chambers St. The interior, which contains the State Courts and several municipal offices, is well fitted up. The building, owing to the scandalous 'Ring Frauds', cost 12 million dollars (2,400,000£). Opposite the Court House, in Chambers St., are various City Offices. To the E. of the City Hall is the Register's Office or Hall of Records, for which a new building is to be erected to the N. of Chambers St. To the S.W. of the City Hall, facing Broadway, is a *Statue of Nathan Hale (1735-76), a victim of the Revolution, by Macmonnies (1885).

Park Row (Pl. B, 3), bounding the S.E. side of the City Hall Park, contains the offices of many of the principal New York newspapers, which rank among the largest and most imposing buildings in the city. Perhaps the most solid and satisfactory is that of the *New York Times, by Geo. B. Post, in light-coloured stone, with circular windows; the entrance, however, is disproportionately small. Next to it (to the N.) is the Tribune Building, of red brick with white facings and a clock-tower 285ft. high. The Pulitzer Building, with the World Office, of brown stone, with a dome, is the tallest and largest of all, and a splendid *View of New York is obtained from the dome (310 ft.; elevator; height to apex of lantern 3751/2 ft.). The Potter Building, containing the office of the New York Press, forms one block with the Times building. The tall structure overtopping the latter is the building of the American Tract Society, situated at the corner of Nassau and Spruce Sts. (23 stories, 306 ft. high; restaurant on the top floor, see p. 10). To the right of the Potter Building, opposite the S. apex of the Post Office, is the Ivins Syndicate Building (29 stories; Pl. B, 3), finished in 1898, the towers of which are the loftiest structures in New York (382 ft.; *View). Opposite the newspaper offices, in Printing House Square, is a bronze Statue of Benjamin Franklin (the tutelary deity of American journalism), by Plassman, and in front of the Tribune Building is a seated bronze figure, by J. Q. A. Ward, of its famous founder Horace Greeley, erected in 1872. The grey granite building of the Staats-Zeitung is at the corner of Tryon Place.

The part of Park Row beyond this point, and the adjacent Baxter St. (the 'Bay'), are mainly occupied by Jewish dealers in old clothes
and other articles. Park Row ends at Chatham Square, whence the "Bowery (Pl. C, D, 4, 3), named from the Dutch 'Bauereis' or farms in this part of the town, runs N. to the junction of Third and Fourth Avenues (see p. 42). The Bowery is now full of drinking-saloons, dime museums, small theatres, and hucksters" stalls, and presents one of the most crowded and characteristic scenes in New York, though it is much less 'rowdy' than when Dickens described it in his 'American Notes'. Its residents are mainly Germans and Poles. — Five Points (Pl. B, C, 3), the district (roughly speaking) between Park Row (S.E.), Centre St. (W.), and Grand St. (N.), once bore, and to some extent still bear, the reputation of being the most evil district in New York, the home of rowdies, thieves, and drunkards. Like the Seven Dials in London, it has, however, of late been much improved by the construction of new streets, the removal of old rookeries, and the invasion of commerce. It took its name from the 'five points' formed by the intersection of Worth (then Anthony), Baxter, and Park Streets; and here now stand the Five Points Mission and the Five Points House of Industry (visitors courteously received). Perhaps the most interesting parts of the district now are the Italian quarter in Mulberry St., with its once famous 'Bend' (now a small public park), and Chinatown in Mott St., the slum of which presents some elements of the picturesque. The swinging lanterns and banners of Chinatown give a curiously oriental air to this part of the city. Visits may be paid (in the company of a detective) to the Joss House at No. 16, and the Chinese Restaurant at No. 18 Mott St., to the Theatre at 18 Doyer St., and (if desired) to one of the Opium Joints. — In New Chambers St., leading to the right from Park Row, is the Newsboys Lodging House, erected by the Children's Aid Society, which has given shelter in the last 45 years to about 300,000 boys, at a total expense of about $500,000 (100,000f.) [The Children's Aid Society was founded by C. Loring Brace (d. 1859) in 1853, and is one of the most interesting and praiseworthy benevolent institutions in New York. Its offices are in the United Charities Building, 105 E. 22nd St. (p. 39).] — On the E. side of City Hall Park are the starting-point of the City Hall branch of the Third Avenue Elevated Railroad (see p. 11) and the approaches to Brooklyn Bridge (see below).

The great *East River Bridge (Pl. B, 4; p. 12), generally known as Brooklyn Bridge, connecting New York with the city of Brooklyn (p. 57), is the largest suspension-bridge in the world and is equally interesting as a marvel of engineering skill and as a model of grace and beauty. Its New York terminus is in Park Row, facing the City Hall Park, where it has direct connection with the Elevated Railway (comp. p. 12), while the Brooklyn end is at Sands St. The bridge affords accommodation for two railway-tracks (comp. p. 12), two carriage-roadways (now traversed by electric tramways; p. 12), and a wide raised footway in the centre. It was begun in 1870 and opened for traffic in 1883, at a total expense of nearly $15,000,000 (3,000,000£). It was designed by John A. Roebling, who died in 1869 from an accident, and was completed by his son Washington Roebling. The bridge was taken over by the State in 1875. The toll for one-horse vehicles is 5 c.; pedestrians and bicycles pass free. The surface and elevated roads of Brooklyn cross the bridge to its New York terminus (fare to any part of Brooklyn 5 c.).

The total length of the bridge, including the approaches, is 5990 ft. (1780 m.); and the distance between the piers is 1600 ft. (main spans of Forth Bridge 1700 ft.; Suspension Bridge over the Danube at Budapest 1250 ft.; Menai Suspension Bridge 580 ft.). The width is 55 ft., and the height above high-water 135 ft. The gigantic stone piers, rising 270 ft. above high-water, are built on caissons sunk upon the rocky bed of the
stream, which is 45 ft. below the surface on the Brooklyn side and 80 ft. on the New York side. The bridge itself, which is entirely of iron and steel, is suspended from the towers by four 16-inch steel-wire cables, which are anchored at each end by 35,000 cubic yards of solid masonry. The four cables contain 14,360 M. of wire, and their weight is about 3600 tons. The hanging cables attached to the large ones number 272.

In 1897 the bridge-trains conveyed 45,542,627 passengers, and probably at least 5,000,000 more crossed by the roadway and footway. The largest number of passengers ever carried by the trains in one day was 225,635 (Feb. 11th, 1896). The "View from the raised promenade in the middle of the bridge is one which no visitor to New York should miss. To the N. is the E. River, with its busy shipping; to the S. is the Harbour, with the Statue of Liberty (p. 3) in the distance; to the W. is New York; to the E., Brooklyn. The view by night is very striking.

The most prominent structures in the part of Broadway skirting City Hall Park are the Postal Telegraph Building and the Home Life Insurance Co. (No. 256), the latter a 16-story edifice of white marble, with a high-pitched, red-tiled roof. The section of Broadway above the City Hall Park contains numerous railway-offices and wholesale warehouses of 'dry goods' (i.e. haberdashery, drapery, etc.). At the corner of Chambers St., to the right, is a large marble building erected for the mammoth firm of drapers, A. T. Stewart & Co., but now occupied by offices. To the left is the Chemical National Bank (No. 270), which, with a capital of but $300,000 (60,000l.), holds $30,000,000 (6,000,000l.) on deposit, and pays dividends at the rate of 150 per cent, while its stock is quoted at 4250. At No. 346 Broadway rises the New York Life Insurance Office.

Two blocks to the right (E.) of this point, between Elm St. and Centre St., is the building known as the Tombs (Pl. C, 3; shown by permit from the Commissioners of Public Charities, 66 Third Ave.), the city prison of New York. The original granite building, in a heavy but effective Egyptian style, has been taken down, and a new and more commodious structure has been erected in its place (1898-99). A flying bridge connects the prison with the Criminal Courts, a large building to the N. Adjoining the latter is a tasteful Fire Station.

Farther up Broadway the predominant warehouses are those of clothiers and furriers. The principal cross-streets are Canal Street (once the bed of a stream crossing the Island), Grand Street (see p. 19), and Houston Street.

On the S. side of Bleecker Street, which runs to the left (W.) from Broadway, just above Houston St., is the Mills House No. 1 (Pl. h; D, 3), a 'philanthropic' hotel (comp. p. 8; architect, E. Flagg), somewhat similar in plan to the structures erected by Lord Rowton in London. Visitors will find it interesting to inspect the large covered courts, wash-rooms, laundry, restaurant, etc. It contains 1500 bedrooms. A companion building (Mills House No. 2) has been erected at the corner of Rivington and Clinton Sts. (Pl. D, 4). Near the latter, at the corner of Rivington and Eldridge Sts., is the building of the University Settlement Society, with public halls, club-rooms, a circulating library, and a roof-garden.

To the right, opposite No. 745 Broadway, opens the wide Astor Place (Pl. D, 3), with the handsome building of the Mercantile Library (p. 19), completed in 1891. The library occupies the site of the old opera-house, in front of which, in 1849, took place the famous riot between the partisans of the actors Forest and Macready. It contains a large and handsome reading-room and possesses 260,000 volumes. In the triangular space to the E. of the Mercantile Library is a poor Statue of Samuel Cox, erected by the postmen of New York. — In Lafayette Place, which runs to the
S. from Astor Place, is the *Astor Library (Pl. D, 3), a large red structure with wings, containing about 280,000 volumes. It was originally founded in 1848 by John Jacob Astor and has since been liberally endowed by his sons and grandsons, the united benefactions of the family amounting to about $1,700,000 (340,000 l.). The library possesses the first, second, and fourth folio editions of Shakspere (1623, 1632, 1835) and numerous valuable autographs, incunabula, and MSS. The collection of paintings bequeathed to the Astor Library by J. J. Astor includes two Meissoniers and other good French works. About 100,000 readers use the library annually. The Astor Library now forms part of the *N. Y. Public Library (see p. 36). — Lafayette Place also contains the famous *De Vinne Press, which produces some of the most artistic typography of America. At the junction of Astor Place and Third Avenue stands the *Cooper Institute or Union (Pl. D, 3), a large building of brown sandstone, founded and endowed in 1857 by Peter Cooper, a wealthy and philanthropic citizen, at a total cost of nearly $1,000,000 (200,000 l.). It contains a fine free library and reading-room, free schools of science and art (attended by 3500 students), and a large lecture-hall. The average daily number of readers is about 2000. The Sunday-evening lectures are attended by huge crowds. In front of the Cooper Union is a *Statue of Peter Cooper (1791-1883), by Aug. St. Gaudens, erected in 1897 (pedestal and canopy by Stanford White). — Opposite to the Cooper Union is the *Bible House, the head-quarters of the *American Bible Society, which has published and distributed 65,000,000 copies of the Bible or parts of it, in upwards of 80 different languages and dialects. The society possesses an interesting collection of MSS. and early printed volumes, now kept at the Lenox Library (p. 39).

Beyond Astor Place Broadway passes (right) the large building occupied by *John Wanamaker (p. 19), but originally erected for A. T. Stewart & Co. The street then inclines to the left. At the bend rises *Grace Church (Pl. E, 3; Epis.), which, with the adjoining rectory, chantry, and church-house, forms, perhaps, the most attractive ecclesiastical group in New York. The present church, which is of white limestone and has a lofty marble spire, was erected in 1843-46 from the designs of *James Renwick, Jun. The interior is well-proportioned (open daily, 9-5; good musical services), and all the windows contain stained glass. — At 14th St. Broadway reaches *Union Square (Pl. E, 3), which is beautified with pleasure grounds, statues, and an ornamental fountain. On the W. side of the square, at the corner of 15th St., is Tiffany's, one of the finest goldsmith's and jeweller's shops in the world (visitors welcomed even when not purchasers). Near the S.E. corner is a good *Equestrian Statue of Washington, by H. K. Browne; in the centre of the S. side is a bronze *Statue of Lafayette, by Bartholdi; and in the S.W. corner is a *Statue of Abraham Lincoln (1865), by H. K. Browne. The pavement on the S. side of Union Sq., between Broadway and Fourth Avenue, used to be known as the 'Rialto' or 'Slave Market', as the resort of actors in search of engagements, but the term is now applied to the part of Broadway to the N. of 23rd St.

*Fourteenth Street, which Broadway intersects at Union Sq., is one of the chief arteries of cross-town traffic (tramway), and the part to the W. of Broadway contains many of the busiest shops in the city and presents a scene of great animation and variety. Among the shops may be mentioned *Macy's, at the corner of Sixth Avenue, a large establishment in the style of the Bon Marché in Paris or Whiteley's in London. To the E., between Union Sq. and Third Avenue, are *Steinway Hall (no longer used...
for concerts), the Academy of Music (Pl. E, 3; p. 15), and Tammany Hall (Pl. E, 3; 1887), all on the N. side of the street. Tammany Hall is the seat of the Tammany Society, which was established in 1789 for benevolent purposes, but soon developed into a strong political (Democratic) institution and is now the centre of the party of local politicians named after the building. The name is a corruption of that of Tamenund, a famous Indian seer (see 'The Last of the Mohicans', by Fenimore Cooper, chap. 28), and the officers of the society bear the Indian titles of sachems and the like.

Broadway between Union Sq. and Madison Sq. (see below) is one of the chief shopping-resorts of New York, containing many fine stores for the sale of furniture, dry goods, etc. At 23rd St. it intersects Fifth Avenue (p. 35) and skirts the W. side of *Madison Square (Pl. F, 3), a prettily laid out public garden, containing a bronze *Statue of Admiral Farragut (1801-70), by St. Gaudens (N.W. corner), an obelisk to the memory of General Worth (1794-1849; W. side), a Statue of Roscoe Conkling (1829-85), by J. Q. A. Ward (S.E. corner), and a Statue of William H. Seward (1801-72), by Randolph Rogers (S.W. angle). The statue of Farragut is the finest in New York, and the imaginative treatment of the pedestal is very beautiful. On the W. side of the square are the Fifth Avenue Hotel and the Hoffman House (p. 8). On the E. side (cor. of 25th St.) is the new Appellate Court House, a tasteful building by J. B. Lord. It is to be adorned with twelve lifesize statues.

At the S.E. corner of the square are the Madison Sq. Presbyterian Church (Rev. Dr. Parkhurst) and the Metropolitan Insurance Building (with fine staircases), and at the N.E. corner is the huge Madison Square Garden (Pl. F, 3; see p. 41).

Like 11th St., Twenty-third Street, to the W. of Broadway, is one of the chief shopping-resorts of New York, and its wide side-pavements are generally crowded with purchasers. Perhaps the most notable shop is the large and fashionable 'dry goods' store of Stern Brothers (No. 33). At the corner of Sixth Avenue (p. 42) is the imposing Masonic Temple (Pl. F, 2), surmounted by a dome 155 ft. high and containing a hall to seat 1200 persons. Between Seventh and Eighth Avenues is the lofty Chelsea Apartment House, and at the corner of the latter is the Grand Opera House (Pl. F, 2; pp. 15, 43). To the E. of Madison Sq. Twenty-Third St. passes between the Academy of Design and the T.M.C.A. (see p. 40) and runs down to the E. river.

Between Madison Square and 42nd St. Broadway passes numerous theatres, which follow each other in rapid succession (see p. 15). In the same part of Broadway are numerous large and fine hotels. At 34th St. Broadway crosses Sixth Avenue, passing under the Elevated Railroad. The two small open spaces here, with statues of Horace Greeley (p. 30) and Wm. E. Dodge (1805-83), are known as Greeley and Herald Squares. On the N. is the two-storied concrete building of the New York Herald (Pl. G, 2), in the basement of which the powerful Hoe printing-presses are seen at work. To the right, at the corner of 34th St., is the Broadway Congregational Tabernacle. The Metropolitan Opera House (Pl. G, 2; p. 15), opened in 1883 and rebuilt ten years later, after a fire, stands between 39th St. and 40th St. Seventh Ave. is crossed at 43rd St. Beyond 42nd St. Broadway is uninteresting, but there are some lofty specimens of
apartment-houses or French flats near its head. At No. 1634 (r.) is the American Horse Exchange, the Tattersall’s of New York. At 59th St. Broadway reaches the S.W. corner of Central Park (p. 43) and intersects Eighth Avenue. At the intersection stands the Columbus Monument (Pl. I, 2), by Gaetano Russo, erected in 1892 (the 400th anniversary of the discovery of America) and consisting of a tall shaft surmounted by a marble statue (in all, 77 ft. high). Beyond this point Broadway, now a wide street with rows of trees, runs towards the N.W. to Eleventh Ave., with which it coincides from 108th St. to 162nd. This part of it is usually known as the Boulevard. From 162nd St. Broadway (Kingsbridge Road) runs on to Yonkers (p. 166).

*Fifth Avenue*, the chief street in New York from the standpoint of wealth and fashion, begins at Washington Square (see below), to the N. of West 4th St. and a little to the W. of Broadway, and runs N. to the Harlem River (p. 53), a distance of 6 M. The lowest part of the avenue has now been largely invaded by shops, offices, and hotels, but above 47th St. it consists of handsome private residences, forming, perhaps, a more imposing show of affluence and comfort than any other street in the world. The avenue has been kept sacred from the marring touch of the tramway or the elevated railroad, but it is traversed by a line of ‘stages’ or omnibuses (p. 13). The avenue is wide and well-paved; most of the buildings are of brown sandstone, which gives it a somewhat monotonous air. On a fine afternoon Fifth Avenue is alive with carriages and horsemen on their way to and from Central Park (comp. p. 48), and it is, perhaps, seen at its best on a fine Sunday, when the churches are emptying.

Washington Square (Pl. D, 3), pleasantly laid out on the site of an old burial-ground, contains a bronze Statue of Columbus (1897-82), by Turini. The tasteful Gothic building of New York University, erected on the E. side of this square in 1833-35, was demolished in 1894-95, and a large office building was erected on its site, of which the upper floors only are reserved for academic purposes. Here are located the Law School, the Graduate School, and the School of Pedagogy, the last interesting as the first school of pedagogy in any university to be organized on an equal footing with the other faculties. [The main buildings of the University are now at University Heights (p. 57); the medical department is in E. 26th St.] On the S. side of the square are the Judson Memorial Buildings, including a church. On the N. side is a row of substantial old-time residences, which still retain an air of undeniable respectability. The Washington Centennial Memorial Arch, by Stanford White, spans the S. entrance of Fifth Ave. — University Place, skirting Washington Sq. on the E., runs to Union Sq. (p. 33).

Following Fifth Avenue to the N. from Washington Sq., we pass several substantial old residences and the Brevoort House (p. 8; cor. of 8th St.). At the corner of 10th St. is the Episcopal Church of the Ascension (with good stained-glass windows and a fine altar-piece by La Farge), and at 12th St. is the First Presbyterian Church, both of brown stone, with square towers. In crossing the busy 14th St. (p. 33) we see Union Sq. (p. 33) to the right. At 16th St. is the tall Judge Building.
In 15th St., a little to the W. of Fifth Avenue, is the large building of the New York Hospital (Pl. E, 3); to the E. is the Young Women's Christian Association, in the rear of which (entr. in 16th St.) is the Margaret Louisa Home (p. 8). In 16th St., but extending back to 15th St., are the ornate Church and College of St. Francis Xavier (Pl. E, 2), the American headquarters of the Jesuits (500 pupils).

At the left corner of 18th St. is Chickering Hall (Pl. E, 3), a concert-hall in which Dr. Felix Adler lectures before the Society of Ethical Culture on Sun. morning, and opposite is the substantial Constable Building, with its marble-lined interior. At the S.W. corner of 20th St. (1.) is the Methodist Book Concern, one of the largest book-houses in the world; and at the N.W. corner is the so-called *Presbyterian Building, a solid and dignified office structure by J. B. Baker. This section of Fifth Ave. is the district par excellence of the publishers and booksellers and contains several of the handsome shops mentioned at p. 19. At the N.W. corner of 21st St. is the Union Club (1.). At 23rd St. (p. 34) the Avenue intersects Broadway and skirts Madison Sq. (see p. 34). At the corner of 29th St. is the Calumet Club (No. 267), and in 29th St., a little to the E., is the odd-looking Church of the Transfiguration (Pl. F, 3), popularly known as the 'Little Church round the Corner' and containing a memorial window (by Lafarge) to Edwin Booth, the actor (1898). At the S.W. corner of 30th St. is the handsome Holland House. The Knickerbocker Club (p. 18) stands at the corner of 32nd St. (r.). The whole block between 33rd and 34th Sts., to the left, is occupied by the *Waldorf-Astoria Hotel (p. 8), a huge double-building of red brick and sandstone in a German Renaissance style. The restaurants and other large halls in the interior are freely adorned with mural paintings by American artists, among the best of which is the ceiling (by Blashfield) of the somewhat over-decorated ball-room in the Astoria.—At the corner of 34th St. is the large white marble palace built by Mr. A. T. Stewart as his private residence, at a cost of $3,000,000 (600,000£.), and now occupied by the Manhattan Club (p. 18), the chief Democratic club of New York (1400 members). The New York Club (p. 18) is at 35th St. (left). The Union League Club, the chief Republican club of New York, is a handsome and substantial building at the corner of 39th St., and the interior is very tastefully fitted up (1800 members). — Between 40th St. and 42nd St., to the left, is the disused Reservoir of the Croton Aqueduct, and a little to the E., in 42nd St., is the Grand Central Depot (pp. 6, 40). At the S.E. corner of 42nd St. rises the tasteful Columbia Bank.

The Croton Reservoir (see above) is to be removed and its site used for the erection of a building for the New York Public Library, formed in 1895 by the consolidation of the Lenox and Astor Libraries (pp. 38, 33) and the Tilden Trust Fund. The last, bequeathed by Samuel J. Tilden in 1886, amounts to about $2,500,000. The design of Messrs. Carrère & Hastings has been accepted for the new building, which will be one of the greatest architectural monuments of the city.

The Temple Emanu-El (Pl. G, 3), or chief synagogue of New
York, at the corner of 43rd St., is a fine specimen of Moorish architecture, with a richly decorated interior.

In W. 43rd St., between Fifth and Sixth Avenues, are three handsome buildings, completed in 1890-91. To the right (N.) is the new Century Club (p. 18), a Renaissance structure, with a loggia in the second story and ornamental iron-work over some of the windows. Adjoining the Century Club is the New York Academy of Medicine (Pl. G, 3), a substantial and handsome edifice, with a front of reddish-brown stone, in a semi-Egyptian style. Beyond this are the extensive quarters of the Racquet Club (p. 17).

At the N.E. corner of 44th St. is Delmonico's Restaurant (p. 9), a substantial building with elaborate ornamentation; and at the S.W. corner is Sherry's (p. 9), a rival establishment, equally patronized by the fashionable world (fine ball-room). Between 45th St. and 46th St. (r.) is the elaborately decorated Church of the Heavenly Rest (Pl. G, 3). The Windsor Hotel (p. 9) occupies the block between 46th St. and 47th St. (r.). The Dutch Reformed Church, at the corner of 48th St., is one of the handsomest and most elaborately adorned ecclesiastical edifices in the city. It is in the 14th cent. or Decorated Gothic style and has a crocketed spire, 270 ft. high.

Between 50th and 51st Sts. (Pl. H, 3), to the right, stands St. Patrick's Cathedral (R. C.), an extensive building of white marble, in the Dec. style, and the most important ecclesiastical edifice in the United States. It is 400 ft. long, 125 ft. wide, and 112 ft. high; the transept is 180 ft. across, and the two beautiful spires are 332 ft. high. The building, which was designed by James Renwick, was erected in 1850-79, at a cost of $3,500,000 (700,000£).

The Interior, which seems a little short in proportion to its height, is dignified and imposing, and the fact that all the windows are filled with good modern stained glass adds to the effect. The Transepts are shallow. The massive white marble columns supporting the roof are 35 ft. high. The altars and church-furniture are very elaborate. There are seats for 3000 persons, and standing-room for 5000 more. — Adjoining the cathedral are the two large Roman Catholic Orphan Asylums.

Between 51st and 52nd Sts. (Pl. H, 3), to the left, are the homes of Mr. George W. Vanderbilt and Mr. W. B. Sloane (son-in-law of the late Mr. W. H. Vanderbilt), two brownstone mansions, closely resembling each other and united by a connecting passage. They are adorned with exquisite bands and plaques of carving, which, however, are scarcely seen well enough to be properly appreciated. The railings which surround them are a fine specimen of metal work. The Indiana-stone house above these, at the corner of 52nd St., in a more varied and striking style, is the Residence of Mr. W. K. Vanderbilt, by R. M. Hunt. It resembles a French château of the transitional period (15-16th cent.). The carving on the doorway and window above it almost challenge comparison with the finest work of the kind in European churches. At the N.W. corner of 57th St. is the house of Mr. Cornelius Vanderbilt, by George B. Post, a red brick edifice with grey facings, in the French château style of the 16-17th cent., with a huge ball-room.

St. Thomas's Church (Epis.; Pl. H, 3), at 53rd St., contains
fine interior decorations by La Farge and an altar-piece by St. Gaudens (good choir). To the left, at the corner of 54th St., is the handsome new building of the University Club (adorned with carvings of the seals of eighteen American colleges), and nearly opposite is the tasteful residence of ex-Governor Morton, both by McKim, Mead, and White. The Fifth Avenue Presbyterian Church (Pl. H, 3; cor. 55th St.) is probably the largest in the world of this denomination, and has one of the loftiest spires in the city.

Fifty-Seventh St., both to the E. and W. of Fifth Avenue, contains several very striking façades, which the student of modern domestic architecture should not fail to see. Other interesting windows, porches, and gables may be seen in 34th, 36th, 37th, and other streets near Fifth Avenue.

At 59th St. (Pl. I, 3), where Fifth Avenue reaches Central Park (p. 43), are three huge hotels: the Plaza (p. 9; l.), the Savoy (p. 9; r.), and the Netherlands (p. 9; r.).

In 59th Street, facing Central Park, are the De la Salle Institute, the Deutscher Verein (German Club), the Catholic Club, and the fine row of the Navarro Apartment Houses, named after the chief towns of Spain.

Between 59th and 110th Sts. Fifth Avenue skirts the E. side of Central Park, having buildings on one side only. Among these, many of which are very handsome, may be mentioned the white marble Metropolitan Club (Pl. I, 5), at the corner of 60th St.; the Progress Club, corner of 63rd St.; the Astor House, N.E. corner of 65th St.; the Havemeyer House, corner of 66th St.; the Gould House, corner of 67th St.; the Synagogue Beth-El (Pl. K, 3), corner of 76th St.; the Brokaw House, corner of 79th St.; and the new Mt. Sinai Hospital (Pl. M, 3), between 100th and 101st Sts.

Between 70th and 71st Sts. is the Lenox Library (Pl. I, K, 3), built and endowed by Mr. James Lenox (1800-1880), who also presented the ground on which it stands and most of its contents. Like the Astor Library (p. 33), this is now a part of the New York Public Library (p. 36). The building, erected in 1870-77, is of light-coloured limestone, with projecting wings. Adm., see p. 22. Guide to the Paintings and Sculptures 10 c.

The library proper consists of about 110,000 volumes. It is rich in American history (including the library of George Bancroft, the historian), musical works (bequeathed by Mr. J. W. Drexel), and books relating to Shakespeare and the Bible. It is a free reference-library.

The Vestibule and Central Hall (groundfloor) contain a fine collection of Rare Books and MSS., exhibited under glass. Among the chief treasures are the Mazarin Bible (Gutenberg & Fust, ca. 1455; prob. the first book printed with movable types); Coverdale's Bible (1535); Tyndale's Pentateuch (1530) and New Testament (1536); Eliot's Indian Bible; the first editions of The Pilgrim's Progress, The Complete Angler, Paradise Lost, Comus, and Lycidas; two copies of the First Folio Shakspeare, and also copies of the Second, Third, and Fourth Folios; the Biblia Pauperum (ca. 1450) and other block-books; the Recuyell of the Histories of Troye (Caxton, ca. 1475; the first book printed in English); the Bay Psalm Book, the first book printed in the United States (Cambridge, 1640); the Doctrina Christiana, printed in Mexico about 1544; a magnificent vellum MS. of the Gospels, with illuminations and miniatures by Giulio Clovio; the original MS. of Washington's Farewell Address; and various books, MSS., and maps relating to the discovery of America.
The Picture Gallery, on the first floor, comprises works by A. del Sarto, F. E. Church, A. Bierstadt, Sir David Wilkie, John Constable, Sir H. Raeburn, Munkacy, Sir J. Reynolds, Verboeckhoven, Gilbert Stuart, Sir E. Landseer, Horace Vernet, Copley, Gainsborough, Turner, E. Zamacois, etc.

The Sculptures include works by Hiram Powers (No. 3), Gibson (2), Sir John Steel (7, 10), and Barrias (19). In the vestibule are four ancient Roman busts.

The *Stuart Collections, bequeathed by Mrs. Robert Stuart (d. 1892), along with a sum of $300,000, occupy a gallery over the N. wing. They include a library of 10,000 vols. and 240 modern paintings, comprising works by Girodet, Corot, Rosa Bonheur, Troyon, Meissonier, Delaure, Boudin, Verboeckhoven, Blue, Hiram von Bremen, Cropsey, Kensett, Church, Cole, Inness, J. A. Walker, etc.

The Emmett Collection of MSS. and Prints, on the mezzanine floor, comprises about 10,000 MSS. relating to American history (1750-1800) and a large number of historical prints. In the same department are the Bancroft MSS., the Hardwicke MSS., and the Spanish-American MSS. from the Ternaux and Kingsborough Collections.

The Bible Collection (on the top floor), comprising about 10,000 vols., consists of the editions gathered by Mr. Lenox and the library of the American Bible Society (p. 33).

In Central Park, close to Fifth Avenue at 82nd St., is the Metropolitan Museum of Art (p. 45).

At 120th St. Fifth Avenue reaches Mount Morris Square (Pl. O, 3), the mound in the centre of which commands good views. Beyond Mt. Morris Sq. the avenue is lined with handsome villas, surrounded by gardens. It ends, amid tenements and squalour, at the Harlem River (144th St.; Pl. P, 3).

Fourth Avenue diverges from Third Avenue at the N. end of the Bowery and at first runs N. towards Union Sq. (p. 33), passing the Cooper Union (p. 33) and the Bible House (p. 33). At Union Sq. it turns N.E. At the corner of 18th St. is the Florence Apartment House, at 19th St. is the American Lithographic Co., at 20th St. (r.) is All Souls Unitarian Church, and at 21st St. is Calvary Church. The group of notable buildings at the intersection of 22nd St. (Pl. F, 3) include the Church Mission House (S.E.), the United Charities Building (N.E.; by Jas. B. Baker), the tasteful Bank for Savings (S.W.), and the Fourth Ave. Presbyterian Church (N.W.). The United Charities Building was presented by Mr. John S. Kennedy to the Children's Aid Society (p. 31), the N.Y. City Mission & Tract Society, the Association for Improving the Condition of the Poor, and the Charity Organization Society.

The *National Academy of Design (Pl. F, 3), at the N.W. corner of 23rd St., a tasteful building of grey and white marble faced with blue stone (entr. on 23rd St.; p. 16), is a partial reproduction of the Doge's Palace at Venice. [A new building is to be erected for the Academy of Design on the E. side of Amsterdam Ave., near Columbia University (p. 52), but until its completion the old quarters are retained on lease.]

The National Academy of Design is one of the chief art-institutions of the United States, corresponding to some extent with the 'Academy' in London, and like it consisting of Academicians (N.A.) and Associates (A.N.A.). Exhibitions of works of art are held in spring and autumn (adm. 25c.).
that in the former season being the more important and fashionable. The Schools of Art held here attract numerous pupils and do excellent service. — Other excellent art-schools are those of the Art Students' League, in the building of the American Fine Art Society (p. 16), attended by 1000 pupils.

Opposite, at the S.W. corner of 25th St., is the substantial building of the Young Men's Christian Association (Pl. F, 3).

The Young Men's Christian Association of the City of New York, organized in 1852 and incorporated in 1866, aims at the spiritual, mental, social, and physical improvement of young men by the support and maintenance of lectures, libraries, reading-rooms, social and religious meetings, evening-classes, gymnasiums, and athletic grounds, and by providing attractive places of safe evening resort. In 1869 the large Twenty-third Street Association Building was completed at a cost of nearly $500,000. Since then eight other buildings have been built or purchased by the Association at a cost of $1,150,000, including the large West End Branch in W. 57th St. and the Association Library (40,000 vols.), but exclusive of the Railroad Men's Building, erected by Mr. Cornelius Vanderbilt at a cost of about $250,000. The work is carried on at fifteen different points. The aggregate attendance at the rooms is about 2,000,000 a year, and strangers are always welcome as visitors. The average membership is over 700; the annual expenses are about $175,000, less than one-quarter of which is met by membership fees, the balance being provided by gifts from friends, rentals, and other sources. — The aggregate membership of the Y. M. C. A. in the United States and Canada is about 300,000.

At 27th St., to the left, extending back to Madison Avenue (p. 41), is Madison Square Garden (see p. 16). To the right, at 33rd St., is the huge Armoury of the 71st Regiment, National Guard of New York. At 34th St. Fourth Avenue assumes the name of *Park Avenue, and the portion of it between this point and 42nd St. forms one of the handsomest streets of the city. The Fourth Avenue tramway line is here relegated to a subway below the street, and the ventilating openings are surrounded with small gardens which give a cheerful and pleasant air to the thoroughfare, here 140 ft. wide. On the W. side of the avenue stands the Unitarian *Church of the Messiah (34th St.). At 40th St. is the Murray Hill Hotel (p. 9).

This part of Park Avenue traverses the aristocratic quarter of Murray Hill, bounded by Third and Sixth Avenues, 32nd St., and 45th St. The Murray Mansion, which gave name to the district, has disappeared.

At 42nd St. Park Avenue is interrupted by the Grand Central Depot (Pl. G, 3; see p. 6), the main building of which, practically rebuilt in 1897-98, occupies the whole block between the lines of Park Avenue, Vanderbilt Avenue, 42nd St., and 45th St.

This enormous railway-station, constructed of steel, with grey stucco facades, is nearly 700 ft. long and 240 ft. wide, and is covered with an iron and glass roof, 140 ft. high, with a span of 200 ft. The above dimensions are exclusive of an addition to the E. of the line of Park Avenue, used by incoming trains. About 250 trains (800 cars) arrive at and leave the station daily. It contains 19 tracks, 12 for outgoing and 7 for incoming trains. Comp. p. 6.

For the next ten blocks or so Park Avenue, or what would otherwise be Park Avenue, is occupied by the various lines of railway issuing from the Grand Central Depot, but at 49th St., where the Women's Hospital rises to the right, the avenue begins to re-assert itself, and higher up the railway burrows underneath through a
series of tunnels. Above 67th St., where the street is very wide, Park Avenue may again claim to be one of the finest thoroughfares of New York, and here, as lower down, the openings of the tunnels are pleasantly hidden by small gardens. At the corner of 59th St., to the right, rises the large yellow building of the Arion, a German club. Among the numerous lofty piles of flats is the Yosemite, at the S.W. corner of 62nd St. Between 66th and 67th Sts., to the right, is the large Armoury of the Seventh Regiment (Pl. I, 3), the fashionable regiment of New York, but now somewhat under a cloud owing to its failure to volunteer for active duty against Spain in 1898. The armoury is very finely fitted up, the huge drill-hall is 300 ft. long and 200 ft. wide. At the adjacent corner is the Hahnemann Hospital. The Normal College (Pl. I, 3), between 65th and 69th Sts., is a spacious building in an ecclesiastical Gothic style, with a lofty square tower (1600 female pupils). To the left are the Union Theological Seminary and (70th St.) the Presbyterian Hospital, an effective building, extending back to Madison Ave. (see below). At the corner of 77th St. is the German Hospital. The *Freundschaft Club, at the S.E. corner of 72nd St., has an interior fitted up in a style worthy of its fine exterior. Another great Armoury (8th Regiment) crowns the hill at 94th St. The avenue reaches the Harlem River at 136th St., near the bridge of the Hudson River Railway.

Lexington Avenue, beginning at Gramercy Park and running N. to Harlem Bridge (130th St.) between Third and Fourth Avenues, also contains a number of large and important buildings. Among these are the College of the City of New York (Pl. F, 3), at the corner of 23rd St. (900 students; library of 25,000 vols.); the Hospital for Cripples (Pl. G, 3), 42nd St.; the Women's Hospital (Pl. H, 3), 49th St. (extending to Park Ave., comp. p. 40); and the Synagogues at the corners of 55th, 63rd, and 72nd Sts.

Between Fourth and Fifth Avenues, and parallel with them, runs *Madison Avenue, beginning at Madison Sq. (p. 34) and ending at 140th St. on the Harlem River. Hitherto uninvaded by shops, it forms one of the finest streets of private houses in New York, rivalling even Fifth Avenue in the splendour of its residences. At the beginning of the avenue, at the N.E. corner of the square and occupying a whole block, is Madison Square Garden (Pl. F, 3), a huge erection 425 ft. long and 200 ft. wide (see p. 16). The building includes the Garden Theatre (p. 15). The tower is a copy of the Giralda at Seville (see Baedeker's Spain); at the top is a figure of Diana, by St. Gaudens. — Madison Avenue crosses 42nd St. just above the Grand Central Depot (p. 40) and beyond this point is traversed by tramway-cars. At the N.W. corner of 42nd St. towers the 16-story Manhattan Hotel (p. 8), which cost $2,500,000; at 44th St. is the Church of St. Bartholomew (Pl. G, 3), in the Italian style; and at 45th St. are the Knickerbocker Athletic
Club (p. 18; with gymnasium, swimming baths, etc.) and the Railroad Branch of the Y. M. C. A. (p. 40). At 49th St. stand the old buildings of Columbia University (see p. 52). At the N.E. corner of 50th St., forming three sides of a hollow square, are the huge Villard Mansions, occupied by several families. Opposite, at the back of St. Patrick's Cathedral (p. 37), is the House of the Archbishop of New York (R. C.). At the next corners are the Roman Catholic Orphanages (see p. 37). At 70th St., behind the Lenox Library (p. 38), is the Presbyterian Hospital (p. 41). — At the N.W. corner of 72nd St. rises the Tiffany House (Pl. K, 3), by McKim, Mead, & White, one of the most picturesque and striking residences in America.

The lowest story is of stone, the upper stories of light-coloured brick. The entrance, facing 72nd St., is under a large archway, guarded by a portcullis. Above this is a recessed balcony, and at the S.E. corner is a round turret, reaching to the eaves of the high-pitched roof. Towards Madison Avenue rises a large and lofty gable. The space under the roof forms a spacious studio, containing an interesting collection of objects of art, and is very tastefully fitted up (adm. only by private introduction). The adjoining low house is part of the original Tiffany mansion.

Beyond this point Madison Avenue consists of rows of handsome and substantial dwelling-houses and apartments.

The remaining avenues which traverse Manhattan Island from S. to N. do not demand a detailed description. First, Second, and Third Avenues consist mainly of tenement houses and small retail-shops, while the amenity of the last two is not enhanced by the elevated railroads which follow their course. In First Avenue, between 27th and 28th Sts., is the Medical School of Cornell University (p. 205), established in 1893 through the munificence of Col. O. H. Payne. In its lower part Second Avenue, which is not joined by the railway till 23rd St. (see p. 11), is still a very respectable residential quarter, with the homes of several old New York families. At E. 15th St. it crosses Stuyvesant Square (Pl. E, 4), with the large Church of St. George (polychrome interior). No. 32 E. 15th St. is the home of Richard Henry Stoddard, the poet, a contemporary of Longfellow and Bryant. It contains an interesting collection of literary relics, which may be visited on previous application by letter. — At the corner of 11th St. is the building of the New York Historical Society (Pl. E, 4), founded in 1804 (adm., see p. 22). In the basement is the Lenox Collection of Assyrian Marbles, from Nineveh. On the first floor are the Hall, Committee Rooms, etc. The second floor contains the Library of 75,000 vols., mainly relating to the history of America. On the third floor is the Abbott Collection of Egyptian Antiquities (incl. three mummies of the Sacred Bull). The Gallery of Art, on the fourth floor, contains about 900 works, many of which are ascribed to masters of the first rank. On the staircase and in the vestibule are numerous Portraits.

[St. Mark's Church, in Stuyvesant Place, leading from E. 10th St. to Astor Place, stands near the site of the 'Bowerie' or farm-house of Governor Stuyvesant (comp. p. 31) and contains his tombstone (E. wall; from an older chapel) and other old monuments. Governor Stuyvesant's Pear Tree, which he planted in 1644 as a memorial 'by which his name might still be remembered', stood for 200 years at the N.E. corner of Third Ave. and 13th St. (memorial tablet).]

At the foot of E. 28th St., a little to the E. of First Avenue, is the extensive Bellevue Hospital (Pl. F, 4); and in the same street, to the W. of Third Avenue, is St. Stephen's (R.C.), containing some good paintings and an elaborate altar-piece. The Power House of the Cable Tramway, at the corner of Third Ave. and 65th St., is interesting. — Sixth Avenue, the route of a W. side elevated railway, begins at Carmine St,
Central Park.  

NEW YORK.  2. Route. 43

to the S.W. of Washington Square, and ends at Central Park (59th St.). It is one of the chief seats of retail trade in New York, containing several of the largest 'dry goods' and other shops, among them the enormous premises of the Siegel-Cooper Co. (Pl. E, 2; between 18th and 19th Sts.). Its prolongation beyond the park is known as Lenox Avenue. Among the chief buildings it passes are the *Jefferson Market Police Court, at 10th St., the Greenwich Savings Bank, at 16th St., the Masonic Temple, cor. of 23rd St. (p. 34), and the Manhattan Theatre (p. 15). Statue of Horace Greeley, at the intersection of Broadway, see p. 34. At 41st St. the avenue skirts the pretty little Bryant Park (Pl. G, 3), with a statue of Dr. J. Marion Sims (1813-83) and a colossal bust of Washington Irving (p. 28) — Seventh and Eighth Avenues may almost be called W. side editions of Second and Third Avenues minus the elevated railroad. Among the few conspicuous buildings are the State Arsenal, at the corner of Seventh Avenue and 35th St.; the *Carnegie Music Hall (Pl. II, I, 2), at the corner of Seventh Ave. and 57th St.; and the Grand Opera House (Pl. F, 2; p. 15), in Eighth Avenue, at the corner of 23rd St. The part of Eighth Ave. skirting the W. side of Central Park, and known as Central Park West, has many large apartment houses. At the corner of 72nd St. are the huge Majestic Hotel and the Dakota Flats (Pl. K, 2), conspicuous in many views of the city. Above Central Park Eighth Ave. is traversed by the elevated railroad, which follows Ninth Avenue to 110th St. In Ninth Ave., near 20th St. (Chelsea Sq.), is the extensive building of the Protestant Episcopal Theological Seminary; at 34th St. is the New York Institution for the Blind; and at 59th St. are the large Roosevelt Hospital (Pl. I, 2) and the Medical School of Columbia University (p. 52). Between 77th St. and 81st St. Ninth Avenue skirts Manhattan Square, a bay of Central Park, with the Natural History Museum (p. 44).

The great promenade and open-air resort of New York is *Central Park (Pl. I-N, 2, 3), occupying the centre of Manhattan Island, between 59th and 110th Sts., covering 840 acres of ground, and 2½ M. long by ½ M. wide. It was designed in 1858 by Messrs. Vaux and Olmsted, and cost about $15,000,000 (3,000,000£). The ground was originally a tract of swamp and rock, and its transformation into one of the most beautiful parks in the world is an important monument of American skill and perseverance.

Central Park differs from most English parks in substituting a multiplicity of small picturesque scenes for broad expanses of turf and simple groves of great trees. There are 400 acres of groves, shrubberies, and glades, and 45 acres of ponds. The park is practically divided into two distinct portions by the Croton Reservoirs, 133 acres in extent. There are about 10 M. of fine 'Telford' drives, 6 M. of bridle-paths, and 30 M. of footpaths. Four concealed transverse-roads (65th, 79th, 85th, and 97th Sts.), passing under or over the park drives and walks by arches of masonry, enable ordinary traffic to cross the park without annoyance to visitors. The park is enclosed by a low cut-stone wall and has 20 entrances. The fashionable time for driving and riding is in the afternoon from 4 to 7, and the 'Corso' here almost-challenges comparison with that in Hyde Park. The S. side of the park may be reached by the Sixth Avenue Elevated Railroad, by the Fifth Avenue omnibuses, and by several lines of tramway; and points higher up may be reached by the tramway-lines on Fourth and Eighth Avenues, while the elevated railroads on Third and Ninth Avenues pass within a block or two. Park Carriages stand at the 5th and 8th Ave. entrances to the park and take visitors to the N. end of the park and back for 20 c. each, with the privilege of alighting at any point and completing the round in another carriage. Other hackney-carriages charge 50c. each. Meals may be had at the Casino (near the Mall) and at M'Cowan's Pass Tavern (N. end), and light refreshments at the Dairy.

The chief promenade is the Mall, near the Fifth Avenue entrance, which is lined with fine elms and contains several statues and groups of sculpture, including Shakspeare, Scott, Burns, Halleck, Columbus, and the Indian
Hunter. Near its N. end is the music-stand, where a band plays on Sat. and Sun. afternoons. The *Terrace, at the N. end of the Mall, is a fine pile of masonry, whence flights of steps descend to the Bethesda Fountain and to the Lake, used for boating in summer (boat 30 c. per 1/2 hr., short row 10 c.) and skating in winter. The most extensive *View in the Park is afforded by the Belvedere, which occupies the highest point of the *Ramble, to the N. of the lake. The N. Park, beyond the Croton Reservoir, has fewer artificial features than the S. Park, but its natural beauties are greater and the Harlem Meer (12 acres) is very picturesque. Near the S.E. corner of the park (nearest entrance in 64th St.) are the Old State Arsenal and a small Zoological Garden, the collection in which is apt to be largest in winter, when various menageries temporarily deposit their animals here. On the W. side of the park, in Manhattan Sq. (see p. 43), is the American Museum of Natural History (see below), and on the E. side, opposite 82nd St., is the Metropolitan Museum of Art (see p. 45). To the W. of the latter museum rises *Cleopatra's Needle, an Egyptian obelisk from Alexandria, presented by Khedive Ismail Pasha to the City of New York in 1877. Like the companion obelisk in London, this monolith was originally brought from Heliopolis (On), where it was erected and inscribed by Thothmes III. about 1600 B.C. One of the faces also bears inscriptions added by Ramases II. three centuries later (about the time of Moses). The obelisk is of red syenite, is 69 ft. high, and weighs 200 tons. The bronze crabs at the base are modern reproductions (comp. p. 46). Among the other monuments in the park are statues of Webster, Bolivar, Hamilton, Thorwaldsen, and Morse, allegorical figures of Commerce and the Pilgrim, and several busts and animal groups.

In Manhattan Sq. (see p. 43), on the W. side of Central Park, between 77th and 81st Sts., stands the *American Museum of Natural History (Pl. K, 2), which was incorporated in 1869. Of the two adjoining blocks of which it at present consists that to the N., in red brick with granite trimmings, was erected from the designs of Olmsted and Vaux in 1874-77. The S. block, which possesses a very handsome and solid-looking Romanesque façade of red granite, was designed by Cady, Berg, & See, and will be finished in 1899. Large and imposing as these structures are, they form only about one-ninth of the complete scheme of the museum buildings, which are intended eventually to occupy the entire area (about 18 acres) between Central Park West, Columbus Ave., 77th St., and 81st St. The present entrance is on the S. side of the building, where visitors may either enter the main floor from the top of the arch or the groundfloor from the carriage-drive below and behind it (adm., see p. 22). The Museum received its charter from the State of New York, but the ground and building belong to the City of New York, while the current expenses are defrayed by the Trustees, the City, and private subscriptions. The growth of the Museum has been very rapid, and its collections are now valued at $3,000,000 (600,000£.). It owes large benefactions to private individuals, particularly to past and present members of the Board of Trustees. The interior is admirably arranged and lighted.

Ground Floor. The lowest floor of the S. building, which we enter first, contains the Lecture Room, conveniently fitted up and accommodating about 1000 persons. Free lectures, illustrated by stereopticon views, are delivered here to the school-teachers of New York State, the state giving a grant in aid of this laudable effort to bring the work of the museum into organic connection with the national system of schools.
Other free courses of lectures are given to the general public. The passages leading round the lecture-room to the groundfloor of the N. wing contain the *Jesup Collection of the Building Stones of America.* — The groundfloor of the N. wing contains the Anthropological and Ethnographical Collections, among which may be mentioned the Alaska and N.W. coast series, the Peruvian collections, and the large war-canoe from Queen Charlotte Island (suspended from the ceiling). — The groundfloor of the E. wing is occupied by the *Jesup Collection of North American Woods,* the finest collection of the kind in existence, including, besides the specimens of wood, photographs of the growing trees, maps of their habitats, and beautiful water-colour paintings of their leaves, flowers, and fruit.

**Main Floor.** The main hall is devoted to **Mammalia,** the N. wing to **Birds** (12,000 mounted specimens), each collection being continued in the gallery above. Among the skeletons is one of 'Jumbo,' a huge African elephant brought by Barnum from England to America in 1882 (12 ft. high). The stuffed groups of buffaloes and moose deserve attention, while the collections of **Monkeys** and **Insects** (gallery) are unusually complete. The floor is devoted to the **General Collection of Birds,** the gallery to the **Birds of North America.**

**Second Floor.** In the S. wing of this floor are the collections of **Shells, Gems** (Tiffany Collection, etc.), and **Minerals** (W. wing). In the N. wing are the **Geological and Palaeontological Collections.** In the E. wing are the **Collections of Vertebrate Palaeontology,** including the finest extant display of the extinct mammals of N. America.

**Third Floor.** This floor is occupied by the **Library** (30,000 vols.) and by **Laboratories.**

The **Metropolitan Museum of Art** (Pl. K, L, 3), on the E. side of Central Park, opposite the 81st St. entrance, is a somewhat unpretending building of red brick with granite facings, measuring 345 ft. in length by 235 ft. in breadth, and erected in 1879, 1888, 1894, and 1898. Like the Natural History Museum (p. 44) this is only a fraction of the buildings destined eventually to occupy this site. The museum was incorporated in 1871 and has grown since then with marvellous rapidity. In 1879, when moved into the present building, the collections were valued at about $400,000; their present value is upwards of $9,000,000 (1,800,000l.). Among the chief features of the museum is the **Cesnola Collection of Cypriote Antiquities,** the largest and most valuable collection of Phœnician and archaic Greek art in the world, illustrating the manner in which the arts of Egypt and Assyria were transmitted by the Phœncians and adopted by the Greeks. These objects, which were found by Gen. di Cesnola in 1865 et seq., while U.S. consul in the island of Cyprus, are now distributed throughout the various departments of the museum to which they individually belong. The historical collection of glass is unexcelled in its illustration of the art of glass-making from the earliest times to the present day, and that of Assyrian cylinders is second only to the series in the British Museum. Among the **Ancient Pictures** are good examples of Rembrandt, Van Dyck, Frans Hals, Velazquez, Rubens, Van der Meer, Jacob Ruysdael, and other masters. The **Modern Paintings** are extremely valuable, the French (Meissonier, Delaile, Rosa Bonheur, Corot, etc.), the German, the English, and the American schools being all represented by good examples. The **Musical In-**

struments are also interesting. — The main entrance of the Museum is in the S. façade (adm., see p. 22). Director, General L. P. di Cesnola. General guide 10 c.; catalogue of the paintings 20 c. Most of the objects are labelled.

The museum received its charter from the State of New York, but the building itself and the ground on which it stands are loaned by the City of New York (comp. p. 45). The gifts of private donors, in money and in kind, have been of the most generous nature, and from two-thirds to three-fourths of the costs of maintenance are borne by members of the corporation. In the basement are a restaurant (W. side; moderate prices), and lavatories for ladies (E. side) and gentlemen (W. side). Canes, umbrellas, and parcels are checked at the catalogue stand, to the right of the entrance (no charge). The total number of visitors to the Museum in 1897 was 555,769. — The nearest Elev. Ry. stations are at 76th and 84th Sts., Third Ave. The Fifth Ave. stages pass close by, and the Madison Ave. street-cars within one block.

Ground Floor. On entering by the principal door (Pl. A), we find ourselves in the Hall of Modern Statuary (Pl. 1), which includes examples of Hiram Powers, Gibson, W. W. Story (Salome), Rinckhart, Millet, Albano, Bartlett, Barnard ('I feel two natures struggling within me'), Schwanthaler, Fischer, Thorwaldsen, Canova (Napoleon), and Barye (cast). — To the N. of this hall is the Corridor of Wrought Iron and Bronzes (Pl. 2). On the pier at its N. end (opposite the doorway) is a relief of the Assumption, by Luca della Robbia (1400-1480), an original from the mortuary chapel of the Princes of Piombino. Adjacent is a bronze figure of a Bacchante, by Macmonnies. — To the E. of Hall 1 (to the right on entering) is the Hall of Cypriote and Egyptian Antiquities (Pl. 3). The wall-cases to the W. contain statuettes, amulets, scarabæi, figurines, Græco-Egyptian tombstones, the sarcophagus of a child, and other Egyptian antiquities; in the floor-cases on the same side are mummies. In the centre are standards with swinging leaves, containing textile fabrics from the Fayum (4th cent. B.C. to 11th cent. A.D.). Most of the other objects in this room belong to the Cesnola Cypriote Collection, including heads and other fragments of statues, statuettes (many with traces of colouring), alabaster vases (by the pier adjoining Hall 1), inscribed lamps (N.E. piers), etc. All forms of ancient art, from Assyrian to Græco-Roman, are represented in the sculptures. On the N.W. pier are Assyrian tablets. — To the N. of Hall 3 is the Pavilion of Greek and Cypriote Terracottas (Pl. 4), chiefly containing objects of the Cesnola Collection. In a case on the N. wall are some interesting representations of Venus, from the earliest rude approximations to the human form to works of the best Greek period. The floor-cases of Egyptian antiquities (see above) extend into this room. Four floor-cases contain Greek funereal urns from Alexandria. In the N.E. corner is a staircase (Pl. K) ascending to the upper floor (comp. p. 47). — The Hall of Sarcophagi and Cypriote Statuary (Pl. 5), to the N. of Hall 4, also owes most of its contents to Gen. di Cesnola’s discoveries. These include statues, funereal sculptures, bronzes, and inscriptions. At the N. end of the hall is a fine Sarcophagus, partly in the Assyrian and partly in the Greek style, found at Amathus, a Phœnician city in Cyprus, and dating probably from the 6th cent. B.C. Adjacent, on the wall, are three slabs of Persian tiles. The sarcophagus from Golgoi (ca. B.C. 600) also illustrates the mingling of Assyrian and Greek art. In the N.E. corner, near the Staircase (Pl. K 1), are the original bronze Crabs placed under Cleopatra’s Needle (see p. 44). At the S. end of the room is a fine marble *Sarcophagus from Rome (prob. 2nd cent. A.D.). On the standards is the *Baker Collection of textiles from the Fayum. — The Pavilion of Egyptian Sculptural Casts (Pl. 6), to the N. of Hall 5, contains casts of ancient Egyptian objects. — The Hall of Assyrian and Archaic Greek Sculptural Casts (Pl. 7), in the N.E. corner of the building, contains casts in relief and in the round. — In the Hall of Greek Sculptural Casts (Pl. 8), to the W. of the last, are casts of Greek sculptures of the best period. — The next room, at the N.W. angle of the building, is the Hall of Hellenistic
GREEK, ROMAN, AND RENAISSANCE SCULPTURAL CASTS (Pl. 9), to the S. of which is the PAVILION OF ITALIAN AND GERMAN RENAISSANCE SCULPTURAL CASTS (Pl. 10). — We now return through Rooms 9 and 8 to the CORRIDOR OF ANCIENT AND MEDIEVAL BRONZE REPRODUCTIONS (Pl. 11), which opens to the S. of Hall 8 and chiefly contains reproductions of bronzes from Pompeii and Herculaneum. — This corridor leads, to the S., to the HALL OF ARCHITECTURAL CASTS (Pl. 12), which is lighted from the roof and in general appearance recalls the Architectural Court at South Kensington Museum. Among the chief objects reproduced here are the Pulpit of Santa Croce (Florence), by Benedetto da Majano; a window from the Cortosa (Pavia); the Parthenon; the Pantheon; the Monument of Lysicrates; the Temple of Amen-Ea, at Karnak; the Portico of the Erechtheum; Notre Dame; a bay of the cloisters of St. John in Laterano (12th cent.); the Shrine of St. Sebaldus, Nuremberg, by Peter Vischer (1519); the façade of the Guild House of the Butchers, Hildesheim (1220). In the S.E. corner (above) is a quasi-reproduction of an angle of the Parthenon. On the E. wall is a large painting of Justinian and his Councillors, by Benjamin-Constant. At the other end hang Diana’s Hunting Party, a huge picture by Hans Makart, and figures of Victory, by G. Richter, and Peace, by L. Knaus. On the N. gallery and part of the S. are casts of the frieze of the cella of the Parthenon. — The room to the W. of this central hall is also devoted to ARCHITECTURAL CASTS (Pl. 13), including the Pulpit of Siena Cathedral, by Nic. Pisano (1258). Here, too, is a MEMORIAL MONUMENT TO E. A. Poe (1809-49), erected by the actors of the United States. — Beyond the staircase (K 3) we enter the PAVILION OF CARVED WOOD AND GREEK AND ROMAN ANTIQUITIES (Pl. 14), containing numerous specimens of work in wood, carved and inlaid, Greek vases, and other antiquities. By the wall is a chair that belonged to Rubens, and among the other larger objects are a Cabinet made of American woods, a carved Clock (English, 1640), a lacquer shrine (modern Japanese), an ancient shrine of Buddha, two Norwegian sleighs, and two Sedan chairs. — We finish our tour of the groundfloor with the HALL OF ANCIENT GLASS AND POTTERY (Pl. 15), the contents of which are among the chief boasts of the Museum. By the E. Wall are cases containing Egyptian, Phoenician, Greek, and Roman Glass from the Cesnola Collection, dating from B.C. 800 downwards. It includes exquisite specimens of iridescent glass. The floor-cases on the same side of the room contain the Marquard (Charvet) and Jarvis collections of Ancient, Mediaeval, and Modern Glass. The floor-cases on the other side and the wall-cases to the W. and S. contain the Cesnola collection of Phoenician, Greek, and Graeco-Roman Pottery. Among the finest specimens is the ‘Great Vase of Curium’ in floor-case 7. Above the wall cases hang several interesting Rhodian Amphorae. The Cesnola collections in this room illustrate the history of the ceramic art from B.C. 1500 to the 4th or 5th cent. of our era. Idolium was probably destroyed in the 9th, and Curium in the 6th cent. B.C.

STAIRCASES ascend to the UPPER FLOOR from both ends of Halls 5 and 13. On the walls of Stairway K (S.E.) are a fine painting-like mosaic of Pæstum by Rinaldi, a St. Christopher by Pollajuolo (fresco), the Seasons by J. J. Horemans, a Cherub by Correggio, an Apostle by Dürer, and other old paintings. Stairway K 1 (N.E.) has a hunting-scene by Horemans and other works. On Stairway K 2 (N.W.) are landscapes by R. B. Browning, Kensett, etc. Stairway K 3 (S.W.) is hung with the Muses by Fagnani (portraits of New York ladies), a good specimen of Boucher, a drawing by Mutter (‘In Memoriam’), etc.

UPPER FLOOR. We begin our tour of this floor with Room 1, reached by Staircase K (S.E.).

Room 1 (Gallery of Paintings by Old Masters). The numbering begins on the W. wall, to the right of the door leading to R. 2. No. *5. Sir Joshua Reynolds (1723-92), Hon. Henry Fane and his guardians Inigo Jones and Charles Blair (a large group recalling the so-called ‘Three Graces’ in the London National Gallery); 13. Caspar Netscher (1639-84), Dutch lady; *21. Rubens (1577-1640), Return of the Holy Family from Egypt; *22. Frans Hals (1584-1666), Hille Bobbe of Haarlem; the Sailor’s Venus; 37. Quinten

Room 2, to the W. of R. 1, contains the Loan Collection of Paintings, which changes from time to time. The numbering, which is consecutive with that of the last room, begins to the S. of the S.E. door. Among the permanent possessions of the Museum shown here are the following: 125. Sir Peter Lely (1617-80), Portrait; 127. Carlo Maratta (1625-713), Pope Clement IX.; 140. F. L. Francais (1541-97), Gathering olives; 150. F. D. Millet (b. 1846), A cozy corner; 152. G. J. V. Clairin (b. 1813), Moorish sentinel; 160. W. A. Cofin (b. 1835), Rain; 161. H. D. Martin (1836-97), View on the Seine; 162. Daumant, Emigrants leaving Havre; 164. L. Bisi (1814-69), Milan Cathedral; 163. Wm. Hart (1823-94), Scottish scene; 176. Joseph Jefferson (the comedian; b. 1829), Ideal landscape; 179. Robert Walker (d. 1855), Gen. Ireton; 182. Carlo Marr, The mystery of life; 193. C. Y. Turner (b. 1850), Bridal procession; 196. Reynolds, Portrait.

Gallery 3, which we enter from the N.W. door in Room 2, contains Chinese, Japanese, and other Oriental Porcelain and a collection of Japanese Swords. This gallery overlooks the Architectural Court (p. 47). — The parallel Gallery 4 (entered from the S.W. door of Room 2) contains the Collection of Drawings by Old Masters, Etchings, and Photographs. The drawings include specimens by Raphael, Michael Angelo, Leon. da Vinci, Correggio, Veronese, Tintoretto, Andrea del Sarto, Domenichino, Caracci, Guido Reni, Murillo, Velasquez, Direr, Van Dyck, Rembrandt, Rubens, Teniers, Watteau, Greuze, and Claude Lorrain. Among the etchings are works by Seymour Haden, Turner, Whistler, etc.

Room 5, reached direct from Staircase K or from the S. end of R. 2, contains Modern Paintings, mainly of the American School. The numbering begins to the E. of the middle door on the N. side: 219. Dennis M. Bunker, Portrait of the artist's wife; 221. Gilbert Stuart (1755-1828), Capt. Henry Rice; 222. John Trumbull (1755-1834), Alex. Hamilton; 224. C. W. Peale (1741-1827), George Washington; 232. E. Leutze (1816-68), Washington crossing the Delaware in 1776 (a huge work presented by Mr. John S. Kennedy); 235. Thos. Hovenden (1810-95), Last moments of John Brown; 257. Henry Inman (1804-46), Martin van Buren; 258. G. Stuart, George Washington; 244. Benjamin West (1738-1820), Triumph of Love; 245. Matt. Pratt (1794-1863), The American School, with portraits of West, Pratt himself, and other painters; 247. Vasio Brozik (b. 1852), Columbus at the court of Ferdinand and Isabella (an enormous canvas, presented by Mr. M. K. Jesup); 253. A. B. Durand (1759-1836), In the woods. — The S.E. door leads into —

Room 6, containing a Collection of Old Masters and Pictures of the English School, presented to the Museum by Mr. Henry G. Marquand (valued at $500,000). To the left: 265. Hogarth (1697-1764), Miss Rich; 269. Moroni (1510-78), Portrait; 270. Holbein (1496-1554), Aup. Cranmer; 271. Van Dyck, Lady with a ruff; 272. Leon. da Vinci (1452-1519), Girl with cherries; 273. Rubens, Susannah and the Elders (Susannah a portrait of his second wife, Helena Fourment; painted after 1660); 274. Rembrandt (1607-69), Portrait, of his latest period (1665); 275. Jacob van Ruysdael (1625-81), Landscape; Rembrandt, 276. The Mills; 277. Man in broad-brim hat and wide collar (ca. 1640), 278. Adoration of the Shepherds; 279. Netscher, Card-party;
of Art.

NEW YORK.

2. Route. 49

Room 8 (Coles Gallery) contains tapestry, sculptures, candelabra, malachite and enamel vases, and Capo di Monte ware, bequeathed by Mrs. E.V. Coles. The alcove on the N. side (Pl. 8a) contains a few modern pictures and sculptures. To the left (W.) is a case of volumes containing photographs, with an ingenious arrangement for turning the leaves without exposing them to soiling.

Room 9 (Catharine Lorillard Wolfe Collection). The collection of modern paintings bequeathed to the Museum by Miss C. L. Wolfe (1823-97), along with an endowment of $200,000, contains several fine French and German paintings and also some English and American works. To the left: 357. Falero (b. 1851), Twin stars; 391. Bida (1813-95), Sacrifice of the Mamelukes in 1811; 392. Rousseau (1812-67), Edge of the woods; 393. Lord Frederick Leighton (1830-96), Lachrymac; 396. J. M. W. Turner (1775-1851), Whale-ship; 397. M. Lebor (b. 1833), Opportunity makes the thief; 402. Doré (1833-83), Retreat from Moscow; Meissonier (1815-91), 403. Sign-painter; 406. Adriaen and Willem Van de Velde; 408. Gérôme (b. 1824), Arab boy; 407. F. A. von Kaulbach (b. 1850), Girl's head; 411. Jules Breton (b. 1827), Peasant girl knitting; *412. Couture (1815-79), Idle student; 413. A. Achenbach (b. 1815), Sunset; *417. Jules Breton, Religious procession in Brittany; 418. Marchal (1825-77), Evening in Alsace; 419. Defregger (b. 1839), German peasant girl; 422. Bouguereau, (b. 1825), Brother and sister; 426. Louis Haghe (1806-85), A toast in the guard-room; 427. Meissonier, General and adjutant; 428. Narcisse Diaz (1808-75), Holy Family; 436. Detaille (b. 1845), Skirmish between Cossacks and the Old Guard; 437. Horace Vernet (1789-1863), Study for a picture of the Corsos; 443. Vibert (b. 1840), The startled confessor; 444. Henner (b. 1829), Bather; 448. Gabriel Max (b. 1840), The last token; 449. Isabey (1804-80), Banquet-hall; 451. Schenck (b. 1828), Lost (a scene in Auvergne); 453. Cabanel (1823-89), The Shulamite Woman (Song of Solomon, 8); *457. Ludwig Knaus (b. 1829), Holy Family; 458. Roybet (b. 1840), Game of cards.

Room 10 (Wolfe Collection continued). To the left (of S. door): 466. Fortuny (1838-74), Camels at Tangiers; 467. Rosa Bonheur (b. 1822), Hound; 468. Daniel Huntington (b. 1816), John David Wolfe, father of Miss C. L. Wolfe; 471. Boldini, Gossip; 472. Cabanel, Portrait of Miss Wolfe; 473. Boughton (b. 1834), Puritan girl; 479. Detaille, Cuirassier; 481. Dupré (1812-89), Haywagon; 483. Decamps (1803-60), Night patrol at Smyrna; 484. Knaus, Old
woman and cats; 485. Van Marcke (1827-91), Cattle; 487. Bonnat (b. 1833), Fellah woman and child; 490. Munkacsy (b. 1846), Pawnbroker's shop; 491. Vibert, A reprimand; 492. Burqye (d. 1883), Baahi Bazouk; 493. Berne-Bellecour (b. 1835), The Intended; 494. Troyon (1810-65), Dutch cattle; 497. Merle, Falling leaves; 499. Rosa Bonheur, Weaning the calves; 500. W. von Kaulbach (1805-74), Crusaders before Jerusalem (a large allegorical work); 501. Le Febvre (b. 1834), Girl of Capri; 506. Troyon, White cow; 508. Piloty (1826-86), The Wise and Foolish Virgins; 509. Lambart (b. 1825), Cat and kittens; 510. Desgoffe (b. 1830), Still-life (original objects in the Louvre and selected by Miss Wolfe for the artist); 518. Schreyer (b. 1828), Arabs on the march; 519. Le Roux (b. 1829), Roman ladies at the tomb of their ancestors; 521. Gérôme, Prayer in a Cairene mosque; 524. Hans Makart (1840-84), Dream after the ball; 527. Wappers (1803-74), Confidences; 525. Cou (1837-83), The storm; 528. Bonnat, Roman girl; 529. Pasini, Entrance to a mosque; 533. Rousseau, River-scene; 532. Corot (1796-1875), Ville d'Avray.

Room 11 contains Memorials of George Washington, Benjamin Franklin, and Lafayette, including portraits (among others two by Chinese artists and the earliest known portrait of Washington, a miniature), busts, medallions, etc.

We now pass, by the N.E. door of R. 11, into Room 12, which, with Room 13, contains Modern Paintings, including some French masterpieces, several German, English, and Dutch paintings, and many American works.

Room 12. The numbering begins to the N. of the S.W. door: 556. Cari Marr, Gossip; 557. Julius Schrader (b. 1815), Alex. von Humboldt, with Chimborazo in the background. — 554. Meissonier, Friedland, 1807 (one of the few large canvases of this painter, intended, in the master's own words, to represent 'Napoleon at the zenith of his glory, and the love and adoration of the soldiers for the great Captain for whom they were ready to die'). It was bought by Mr. Henry Hilton for $66,000 (13,200 l.) and presented by him to the Museum. — 539. C. H. Davis (b. 1856), Evening; 542. Josef Israels (b. 1824), Bashful suitor; 543. Maignan, 'L'attentat d'Anagni', an incident in the life of Pope Boniface VIII.; 549. Picknell (1852-97), Bleak December; 550. J. Alden Weir (b. 1852), Idle hours; 552. Bastien-Lepage (d. 1885), Joan of Arc; Mauve (1838-88), 553. Spring, 555. Autumn; 563. Francois Auguste Bonheur (brother of Rosa; 1824-84), Woodland and cattle, with fine sunlight effect; 564. Fortuny, Spanish lady; 567. George Inness, Evening; 566. E. Detaille, Defence of Champigny, a masterpiece, presented by Mr. Hilton; 565. Manet (1833-83), Boy with a sword; 570. Lhermitte (b. 1841), Vintage; 571. Koller, Hugo van der Goes painting the portrait of Mary of Burgundy; 573. Baixeras (b. 1862), Barcelona boatmen; 577. C. F. Ulrich (b. 1858), Glass-blowers of Murano; 579. Meyer von Bremen (1813-86), Evening-prayer (a small water-colour); 582. Dupré, Balloon; 583. Eliau Vedder (b. 1836), Sentinel; 586. Inness, Autumn oaks; 588. Kensett, Long Island Sound; 592. Robert Wylie (1839-77), Death of a Vendeen chief; 597. Bargue, Footman asleep.

the original picture, was purchased by Mr. Cornelius Vanderbilt, on the
dispersal of the Stewart collection, for $58,000 (11,600l.), and given by him
to the Museum. — 655. T. W. Wood, War episodes; 659. Walter Gay (b.1856),
‘Les Fileuses’; 661. Dannot (b.1853), Quartette; 662,663. Kensett, Landscapes.
Room 14, or Gallery of Metallic Reproductions, contains reproductions
of ancient, medieval, and modern plate, chiefly in Russian and English
collections. — The N.W. door leads to —
Room 15, with the *Moore Collection, presented to the Museum in 1891
and including Chinese porcelain, Japanese textiles, bronze-work, and
basket-work, European, Egyptian, Greek, and Roman glass, Oriental
ornaments, and Arabic metal-work. — Room 16, to the E., is reserved for
Temporary Exhibits. — Room 17, entered from R. 15, is devoted to Chinese
Porcelain. — Room 18 contains Japanese Arms and Armour. — In Room 19
are Collections of Old Lace, presented by Mrs. Astor, Mrs. Smillie, Mrs. Stuart,
Japanese Porcelain.
Room 22, to the S. of R. 21, is the Gallery of Gems, Coins, Gold and
Silver Ornaments, and Miniatures. The lower wall-cases to the E. contain
the *Cesnola Collection of Cypriote Ornaments (mainly from Curium), con-
taining beautiful specimens of gold jewellery, libule, rings, votive or-
naments, etc. Some are of gold plated with silver. The sard with Boreas
and Orithyia is a very fine example of Greek art emerging from the archaic
stage, and the chalcedony with the Rape of Proserpine 'may safely be
placed at the head of all that is known in the archaic style.' — In the
lower S. cases is the Johnston-King Collection of Engraved Gems. In the
lower W. cases are the Baxter, Drexel, and Phoenix Collections of Objects in
Gold and Silver and Gems. In the upper row of cases to the E. are the
Cyprus W. Field Medals commemorating the Atlantic Cable, the Moses Lazarus
Collection of Miniatures and Snuff Boxes, and the Avery Collection of Spoons.
At the S. end of the room is the Bryant Vase, by Tiffany, presented to
the poet on his 80th birthday. In the upper W. cases are Icelandic Orma-
ments, War Medals, etc. In the N.W. corner are Old Silver Plate and Battersea
Enamels. The cases in the middle of the room contain the Parman Col-
lection of Greek, Roman, & Egyptian Coins (on loan).
Room 23 is devoted to Fans and Textile Fabrics. — Room 24. European
Porcelain, presented by Mr. Henry G. Marquand. — Room 25. Small Greek,
Etruscan, and Roman Antiquities (bronzes, vases, etc.). — Room 26. Miscel-
naneous Objects. — Room 27, 28. Drexel and Crosby-Brown Collections of
Musical Instruments. — Room 29 (to the S.). American Antiquities, including
ancient and modern idols and fetishes of New Mexico, pottery, etc.

Near the N.W. corner of Central Park, beginning at 110th St.
and extending thence to 123rd St., is the long and narrow Morningside
Park (Pl. N, 0, 2), with its long flights of steps and massive
retaining walls. It affords good views of Central Park, Washington
Heights, the Harlem River, and the high part of the Sixth Ave.
El. Ry. (comp. p. 11). — On the W. this park is bounded by
Morningside Avenue and Morningside Heights, the site of several
important new buildings. At the corner of Morningside Ave. and
112th St. is the new Episcopal Cathedral of St. John the Divine
(Pl. N, 2), designed by Heins and Lafarge, the corner-stone of which
was laid in 1892, but the building of which has not progressed very
far. To the N. of this, in the block bounded by Morningside Ave.,
10th Ave., 113th St., and 114th St., is the large and handsome new
building of St. Luke's Hospital (Pl. N, 2), constructed of white
marble and white pressed brick, with a tower and clock over the
main entrance. — To the N.W. of this point, on a magnificent site,
110-150 ft. above the Hudson River, are the new buildings of
*Columbia University* (Pl. N, O, 1, 2), the oldest, largest, and most important educational institution in New York. It has about 300 professors and instructors and over 2000 students, and ranks with the foremost universities of America. Among its alumni are Gouverneur Morris, John Jay, Alexander Hamilton, and De Witt Clinton. The buildings are open on week-days from 9 to 6 (reading-room till 10 p.m.). The grounds contain about 20 acres.

Columbia was founded by royal charter in 1754 under the name of King's College, and the first college-building was erected near the lower end of the island. In 1776 the college was suspended owing to its 'Tory' proclivities, but in 1784 it was re-incorporated as Columbia College. In 1787 it was transferred to an independent board of trustees. In 1857 the college was removed to the corner of 49th St. and Madison Ave. (see p. 42), where it remained until its transference to the present site in 1897. In 1890 the institution was reorganized on a broad university basis, and it now consists of Columbia College proper, affording an undergraduate course in classics and science, and of the six university faculties of Law, Medicine, Applied Science, Political Science, Philosophy, and Pure Science.

The finest of the new buildings is the *Library*, designed by Chas. F. McKim and erected at the cost of Mr. Seth Low, President of the University. It is a Greek structure surmounted by a flat dome, and stands upon a lofty terrace approached by several broad flights of steps. The interior, which is admirably equipped, contains about 250,000 volumes; the 'artificial moon' for lighting the large circular reading-room is interesting. To the N. of the library is the *University Hall*, of which the lower part only, containing a gymnasium and swimming tank (lighted through the water), has been erected. The other buildings already finished are Schermerhorn Hall (natural sciences), Havemeyer Hall (chemistry and architecture), Fowler-weather Hall (physics and astronomy), and the *Engineering Building*. All these are equipped with every modern improvement. The finished plans contemplate the erection of other similar buildings (one for the College), a Chapel, and a Students' Club House, completing a great quadrangle with the Library in the middle. On the Engineering Building is a tablet commemorating the battle of Harlem Heights (p. 53).

The medical school of Columbia is the *College of Physicians and Surgeons* in 59th St., between 9th and 10th Avenues, which is handsomely endowed (by the Vanderbilt family) and thoroughly equipped. The total endowment of the University is $12,000,000, and the value of its buildings and collections is $7,000,000. Affiliated with the University and forming part of its educational system are Barnard College for Women (Pl. N, O, 1; 250 students) and Teachers College (Pl. O, 1; 400 students), which occupy adjacent buildings.

The stately *Riverside Drive or Park* (Pl. K-O, 1), skirting the hills fronting on the Hudson from 72nd St. to 127th St. (ca. 3 M.), is one of the most striking roads that any city can boast of and affords beautiful views of the river. Handsome houses are springing up along it, and it bids fair to become the most attractive residential quarter of New York. At 88th St. is a copy of *Houdon's Statue of Washington* (p. 367). Near the N. end of the drive, on Claremont Heights (W. 122nd St.), is the *Tomb of General Ulysses S. Grant* (Pl. O, 1; 1822-85), a huge and solid mausoleum of white granite, erected in 1891-97 at a cost of $600,000 (120,000 L.), from a design by J. H. Duncan. The monument, which is somewhat disappointing in its general proportions and effect, consists of a lower story in the Doric style, 90 ft. square, surmounted by a cupola borne by Ionic columns. The total height is 160 ft.
The arrangement of the interior is analogous to that of Napoleon's tomb at the Hôtel des Invalides, and the general effect is much more impressive than the exterior. The red porphyry sarcophagus containing the body of Gen. Grant is placed in an open crypt below the centre of the dome; by its side is a similar sarcophagus destined for his wife. The pendentives of the dome are adorned with alto-reliefs emblematic of the life of Gen. Grant, by J. Massey Rhind.

Near Grant's tomb is a Ginkgo Tree, planted in his memory by Yang-Yu, representing Li-Hung Chang (tablets in English and Chinese).

Park Carriages ply along Riverside Drive from W. 72nd St. to the Grant Monument and back for a fare of 25 c. (stop-over a tickets, available for any later carriage, issued without extra charge). — The S. end of the Drive may be reached by the Columbus Ave. cable-cars (p. 42) or by the Sixth Ave. El to 72nd St. (1/2 M.). Visitors in Central Park may use the omnibuses running from the cor. of Fifth Ave. and 72nd St. to the S. end of Riverside Drive. The N. end of the Drive may be reached by the cable-cars on 125th St. (p. 13).

Visitors to Grant's Tomb may obtain luncheon at the Claremont Hotel (Pl. O, 1), at the extreme end of Riverside Drive.

To the N. of Riverside Park lies the district of Manhattanville, containing many old residences and the Convent of the Sacred Heart (Pl. P, 2), with its fine grounds. A fine viaduct crossing the Manhattanville valley is designed for a N. prolongation of the Riverside Drive. The Sheltering Arms, at the corner of Amsterdam Ave. and 129th St., is a refuge for destitute children. In 143rd St., between Amsterdam Ave. and West End Ave., is the Coloured Orphan Asylum. Between 153rd and 155th Sts., adjoining the river, is Trinity Church Cemetery (Pl. Q, 1, 2), in two sections united by a bridge over the Boulevard. This was the scene of the hardest fighting in the battle of Harlem Heights (Sept. 16th, 1776).

The picturesque district of *Washington Heights, extending from about this point to Spuyten Duyvil Creek and from the Hudson to the Harlem, repays a visit and affords fine views of the Hudson and the Palisades (p. 162).

This district, which is now a favourite residence quarter, was the ground of desperate conflicts during the Revolutionary period. A few remains still exist, between 152nd and 156th Sts., of Fort Washington (on the highest point of the island, 250 ft. above the river), which was heroically but unsuccessfully defended against the British in Nov., 1776, after the battle of Harlem Heights. Before and during the latter battle Washington had his headquarters at old Jumel House (161st St., overlooking the Harlem), then the home of Col. Roger Morris and his wife (Washington's old love, Mary Phillips). The house was afterwards bought by Mme. Jumel, with whom Aaron Burr lived here 'during the days of his octogenarian love', and is now preserved as a museum by the 'Daughters of the American Revolution'.

The Grange, the home of Alex. Hamilton, lies at the corner of Tenth Ave. and 141st St. Near the house are 13 trees planted by Hamilton to symbolise the 13 Original States. The house originally occupied by Audubon, the naturalist, is on the river, at the foot of 155th St.

At the corner of Eleventh Ave. and 162nd St. is the Institution for the Deaf and Dumb, at 176th St. is the Juvenile Asylum, and at Amsterdam (Tenth) Ave. and 491st St. is the Isabella Home, a handsome Renaissance building for the aged. The rocky bluff on which the latter stands is known as Fort George, from a redoubt built here during the Revolution. Extensive improvements are taking place here in all directions, and a fine new drive (the Speedway) has been formed along the river (comp. p. 17).

Of the bridges crossing the Harlem River two only call for special
remark: High Bridge and Washington Bridge. *High Bridge, at 175th St., constructed to carry the Croton Aqueduct (see below) across the Harlem, is 1460 feet long and consists of 13 arches, the highest of which is 116 ft. The water is carried across in iron pipes protected by brick-work, and above is the bridge-way, for walkers only (*View). There are restaurants at both ends of the bridge (Park Hotel, at the W. end). A good view is also obtained from the embankment of the Reservoir, at the end of the bridge, or the adjoining Water Tower. A little farther up, at 181st St., is the *Washington Bridge, constructed in 1886-90 at a cost of nearly $2,700,000 (540,000£). It is of steel, except the stone abutments and small parts of iron, and has a total length of 2400 ft., with two central arches, each of 510 ft. span. The roadway, which is asphalted, is 150 ft., the lower centre of the arches 135 ft. above the river.

A convenient way to visit these two bridges is to take the Sixth Ave. El. Ry. to 155th St. and go thence by the Putnam Division of the N. Y. C. & H. R. Railroad (without descending to the street; fare 5c.) to the foot of High Bridge. We then cross the bridge and walk along the W. bank of the Harlem to Washington Bridge, whence we return by street-car to 125th St. (El. Ry. on Eighth Ave.). A hard climb is avoided by reversing this route.

The Central or McComb's Dam Bridge (Pl. Q, 3) and the Viaduct connecting it with the top of Washington Heights (155th St.) are other important engineering works of recent date.

The Water Supply of New York is obtained from the watershed of the Croton, a stream in Westchester Co., about 40 M. from New York. The Old Croton Aqueduct, which crosses the High Bridge (see above), was constructed in 1842 and has a capacity of about 100 million gallons a day. The New Croton Aqueduct, a wonderful piece of engineering, constructed in 1883-90, at a cost of about $25,000,000 (5,000,000£), is in the form of a tunnel, 14 ft. high, at an average depth of 150 ft. below the surface. It is carried under the Harlem River at a depth of 300 ft. below the river-bed, and has an estimated daily capacity of about 300 million gallons. Both aqueducts discharge their waters at Central Park, where the large reservoir (see p. 43) has a capacity of 1,000,000,000 gallons. The iron mains distributing the water through the city have an aggregate length of 750 M. The dam of the Croton Water Works at Quaker Bridge is 1350 ft. long, 277 ft. high, and 216 ft. wide at the base.

An act was passed in 1876 for the improvement of the navigation of the Harlem River (which is simply a tidal channel) by the construction of a Ship Canal. This was completed in 1885, at a cost of $2,700,000, and affords a channel from Long Island Sound to the Hudson River for vessels drawing not more than 10 ft.

The Borough of the Bronx, or that part of New York to the N. and E. of the Harlem, is at present of comparatively little importance to the visiting stranger, though daily increasing in interest and amenity. It takes its name from the small river Bronx, and includes Morrisania (perpetuating the name of Gouverneur Morris), West Farms, Fordham, Mott Haven, Williamsbridge (a favourite Sun. resort of French residents), and several other villages now incorporated with the city. — Large new park-spaces have been reserved here, but are not yet fully laid out. Among these are Van Cortlandt Park (1070 acres), Bronx Park (655 acres), Crotona Park (135 acres), and Pelham Bay Park (1740 acres), adjoining Long Island Sound,
4 M. to the E. of Bronx Park and 15 M. from the City Hall. All these either are, or are to be, connected by boulevards. In Van Cortlandt Park is the Van Cortlandt Mansion, built in 1748 and now fitted up as a Museum of Colonial Relics (open, 12-5.30; Sat., 10-5.30; Sun., 2-5.30). The S. part of Bronx Park is occupied by the grounds of the *New York Zoological Society (open free), with an area of 260 acres (London Zoological Garden, 36 acres).

The primary object of this society is to secure herds of large N. American quadrupeds and to place them as far as possible in surroundings identical with or closely resembling their natural habitats. Thus the bison have a range of 15 acres, the wapiti 15 acres, the moose 8 acres, and so on. Among other novel features is the effort to make the animals accessible to artists and students, and several studios have been provided in the larger buildings. — The park is open free five days a week, including Sun. and holidays; on the remaining two days, adm. 25 c. It is at present most easily reached by the Third Ave. El. R. R. to Tremont Ave. (5 c.) and electric car thence to West Farms (9 c.).

The Botanical Gardens, at the N. end of Bronx Park, promise to be of equal importance. They contain a large museum.

Jerome Avenue, beginning at McComb’s Dam Bridge, and Westchester Avenue (Pl. Q, 5) are favourite drives (comp. p. 17). The Bronx is traversed by several lines of tramways, by the Suburban Elevated Railway (to 177th St.; p. 11), and by the Harlem, New York Central, and New Haven and Hartford railways (p. 6).

The Islands in the East River contain various charitable and correctional institutions belonging to the city or the state, permission to visit which may be obtained from the Commissioners of Public Charities, 66 Third Ave. (ferry from E. 26th St.). Blackwell’s Island (Pl. H-K, 5), 120 acres in extent, is a long narrow island, extending from about 50th St. to 86th St., and containing the Penitentiary, Female Lunatic Asylum, Workhouse, Alms Houses, and Charity Hospital. To be ‘sent to the Island’ is the New York euphemism for committal to the Penitentiary. Ward’s Island (Pl. M, N, 5; 200 acres), opposite 110th St., has the Manhattan State Lunatic Asylum and State Emigrant Hospital. Ward’s Island is separated from Astoria and Blackwell’s Island by Hell Gate (Pl. M, 5), a sharp bend in the river, through which the water rushes at a great rate. The sunken reefs which formerly made it highly dangerous to navigation were removed by nitro-glycerine explosions in 1876 and 1885. On Randall’s Island (Pl. N, O, 5), to the N. of Ward’s and opposite the Harlem River, are the Idiot Asylum, the House of Refuge, and the Nursery, Children’s, and Infants’ Hospitals. — The Islands in the Harbour have been described at p. 2.

Environs of New York.

(1) Staten Island (ferry from Whitehall St. to St. George in 1/2 hr.; fare to St. George 5c., thence to any other station between Erastina and South Beach 5c.). — Staten Island, on the S. side of New York Harbour, separated from New Jersey by the Staten Island Sound and the Kill van Kull and from Long Island by the Narrows (p. 2), has an area of about 60 sq. M. and (1890) 51,693 inhabitants (in 1895 estimated pop. 65,000). It is conterminous with the Borough of Richmond (p. 29). The surface of the island is diversified and hilly (highest point, 415 ft.), and it is dotted with small villages and the villas of New Yorkers. The hills afford good views of New York Harbour and the ocean. Among the best of its fine drives is the Richmond Terrace, skirting the N. shore. From St. George (St. George Hotel) railways (Staten Island Rapid Transit) run to the W. along the N. shore, to the S.E. to Fort Wadsworth and South Beach, and to the S. to Tottenville, diverging from the South Beach line at Clifton. The first-men-
tioned line passes (1 M.) New Brighton (Castleton, from $3; Pavillion, from $3, etc.), the largest village in the island, with numerous villas and hotels; 1¾ M. Sailors' Snug Harbor, with a large Seamen's Asylum (income $100,000), on the lawn of which is a fine statue of its founder R. R. Randall, by St. Gaudens; 2½ M. Livingston, with the Staten Island Cricket Club, the Staten Island Athletic Club, etc.; 4 M. Fort Richmond, with the house (now St. James Hotel), in which Aaron Burr died in 1836; 5½ M. Erastina (Bayside), with the pleasure-resort called the Erastina Grove. Beyond Erastina the railway crosses the Sound to New Jersey. — At (1 M.) Tompkinsville (Nautilus), on the South Beach line, are the headquarters of the Seawanhaka Yacht Club (p. 17) and the New York Yacht Club (p. 17); ¼ M Stapleton, the birthplace of Commodore Cornelius Vanderbilt (1784-1877), who took the first step towards amassing his huge fortune by starting a ferry to New York; 2½ M. Clifton, with a house once occupied by Garibaldi; 3½ M. Fort Wadsworth (p. 2); 4½ M. Arrochar (Arrochar Park Hotel); 5½ M. South or Richmond Beach, a popular day-resort for New Yorkers (boating, bathing, etc.). — The longest line is that running S. to Tottenville. Beyond Clifton (see above) it passes (6 M.) Grant City (Atlantic Inn), with the mausoleum of the Vanderbilt family; 9½ M. Giffords, a fishing-resort; 11 M. Woods of Arden, with picnic grounds; 13 M. Princess Bay, another fishing-place; 16 M. Tottenville (Excelsior Hotel), with the old Billow House (ca. 1640), where Gen. Howe met Franklin and John Adams after the battle of Long Island (p. 58). Tottenville is connected by ferry with Perth Amboy (p. 244). — Electric Tramways, mostly starting at St. George, also traverse the island in various directions (to Prohibition Park, Midland Beach, etc.). — Many points in the interior of the island are still very quiet and primitive, and the pedestrian will find numerous pleasant walks. For farther details, see Kobb's 'Staten Island'.

(2). NEW JERSEY SHORE. The cities on the right bank of the Hudson or N. River, immediately opposite New York, though practically forming part of that city, are in a different state (New Jersey) and under independent government. They offer little of special interest for the tourist. — Jersey City (Taylor's Hotel, E.P.), the southernmost and largest, with a population of (1855) 12,713, contains many glass-works, sugar-refineries, machine-shops, foundries, and other industrial establishments, the stations of about half the railways centring at New York (comp. p. 6), and the docks of a few of the Transatlantic steamship companies. With the exception of a few churches and a new city-hall, it has almost no handsome buildings. — To the N. of Jersey City lies Hoboken (Meyer's Hotel, S 2½-3. R. from S 1; Nagel's Hotel, S 2½; Busch), with large silk-factories and (1855) 54,683 inhab., a large proportion of whom are Germans. It also contains the wharves of some European steamships. Stevens Park, on the river, contains the Stevens Institute, a polytechnic school of good reputation. Castle Stevens, the house of its founder, the late Commodore Stevens, is on the hill above. Farther to the N. are the Elysian Fields, an open common, affording good views of the river, but now much neglected. — Beyond the Elysian Fields lies Weehawken, with about 2000 inhabitants. It was the scene of the duel between Alex. Hamilton and Aaron Burr. An electric tramway runs hence along the Palisades (fine views) to Hudson Heights (5 c.), Edgewater (10 c.), Fort Lee (see below), and Linwood or Cotyerville (20 c.). — Guttenberg (3626 inhab.), on the hill behind Weehawken, has a large brewery, with a beer-garden on the roof. — Behind Hoboken lies Hudson City, with the Schützen Park, a favourite resort of the Germans of New York. — Fort Lee, on the site of the revolutionary fort of that name, at the point where the higher part of the Palisades (p. 162) begins, nearly opposite 170th St., is now the property of an Association, which has built a hotel and pavilion and laid out the small Palisades Park. Boating and bathing are among the attractions. It is reached by ferry from Canal St. (15 c.) or by ferry from 120th St. to Undercliff and thence (1½ M.) by electric car or stage. The "View from the Palisades farther up is very fine.
(3) Brooklyn, Coney Island, and other resorts on Long Island, see R. 3.

Among other points to which excursions are easily made from New York are Long Branch and the other seaside resorts of the New Jersey coast (see R. 39); Yonkers, Dobbs Ferry, Tarrytown, and other points on the Hudson (see R. 21); Glen Island (p. 75), New Rochelle, and other places on Long Island Sound (R. 4); and Greenwood Lake (p. 217).

From New York to Putnam Junction (Brewster), 54 M., railway (Putnam Division of N. Y. C. & H. R. R.) in 2-2½ hrs. This line, passing the suburban resorts of Westchester County, begins at the 155th St. station of the Sixth Ave. Elevated Railroad (comp. p. 54). — 1 M. High Bridge (p. 54); 2 M. Morris Heights. — 3 M. Fordham or University Heights, with the handsome new buildings of New York University (comp. p. 39). These buildings, splendidly situated on a high bluff commanding a fine view of the Harlem, the Hudson, the Palisades, and Long Island Sound, include a beautiful Library, designed by Stanford White (40,000 vols.; especially rich in Oriental and Germanic literature), a Hall of Languages, a Chemical Laboratory, a gymnasium, etc. The university, which was founded in 1831 as an undenominational corporation on a liberal basis, is now attended by 1800 students, taught by 150 instructors. — 5 M. Van Cortlandt, the station for Van Cortlandt Park (p. 54), is the junction of a branch-line to (3 M.) Yonkers. — At (8 M.) Dunwoodie, with a large Roman Catholic college, we pass over the Croton Aqueduct (p. 54). — 10½ M. Nepperhan. — 13 M. Mt. Hope and (15 M.) Ardsley are the seats of two of the leading golf-clubs of the United States. — 18 M. Elmsford; 21½ M. Tarrytown (p. 166). At (33½ M.) Croton Lake we cross the lake by a lofty bridge. 42 M. Baldwyn, the junction for (2 M.) Mahopac Falls; 45 M. Lake Mahopac, a summer resort; 49½ M. Carmel, on Lake Gleneida. At (54 M.) Putnam Junction (Brewster) we join the line described below.

From New York to Chatham, 127 M., railway (Harlem Division of N. Y. C. & H. R. R.) in 3½-4½ hrs. This line is much used by residents of the suburban districts to the N. of Manhattan Island. — From New York to (12 M.) Woodlawn, see p. 64. Our line crosses the boundary of Greater New York (p. 22) and follows the course of the Bronx River (to the left). 23½ M. White Plains; 25 M. Kensico, near Lake Kensico; 37 M. Mt. Kisco; 44 M. Golden's Bridge, the junction of a line to (7 M.) Lake Mahopac (see above); 52 M. Brewster (p. 68), junction of the N. E. R. E. to Hartford (see p. 68); 61 M. Pawling (700 ft.); 76 M. Dover Plains; 82½ M. Millerton; 104½ M. Copake Iron Works, 5 M. from Mt. Washington (p. 144). At (127 M.) Chatham we reach the Boston and Albany R. R. (see p. 148).

Coney Island, Rockaway Beach.

Brooklyn. — Hotels. Margaret, 97 Columbia Heights, from $2½; St. George, Clark St., § 2½-5, R. from § 1; Pierrepont House, Montague St., cor. Hicks St., from § 2½, R. from § 1; Mansion House, Brooklyn Heights, opposite Wall St., § 3-5, all near Brooklyn Bridge; Clarendon, Washington St., R. from § 1; Brandon, 292 Washington St., E. P.

Railway Stations. Flatbush Avenue Station, Flatbush Ave., cor. 4th Ave., and Bushwick Station, for the trains of the Long Island Railroad (for all points on Long Island); Union Depot, Fifth Ave., cor. 36th St., for Coney Island, Unionville, West Brighton, etc.; Brooklyn & Brighton Beach Station, cor. Atlantic and Franklin Avenues, for Brighton Beach.

Elevated Railroads. Six lines of Elevated Railway, similar to those in New York (p. 10), traverse Brooklyn in various directions (fare 5c). Four of these begin at the New York end of Brooklyn Bridge (with branches to Fulton Ferry), and one starts at the foot of Broadway (opp. Grand St., New York).

Tramways, propelled by electricity ('trolley lines'), traverse Brooklyn
in all directions and extend to the Ocean resorts at Coney Island, etc. Most of them now start at the New York end of the East River Bridge (p. 31), the toll for crossing which is included in the fare of 5 c. In 1897 these street-railroads carried over 200 million passengers.

Brooklyn, with an estimated population (1898) of 1,200,000, was formerly the fourth city of the United States in size and industrial interest, but now forms one of the boroughs of Greater New York (see p. 22). It lies immediately opposite New York, at the W. end of Long Island, and covers an area of about 65 sq. M. It is popularly known as the ‘City of Churches’, containing no fewer than 450 ecclesiastical edifices, and has also been called the ‘Dormitory of New York’ from the fact that so many of its residents are New York business men, returning to Brooklyn in the evening.

Brooklyn (Breuckelen) was founded by Wallen in 1623, the first settlement being near Wallabout Bay (p. 74). The most outstanding event in its history is the battle of Long Island (Aug. 26th, 1776), fought on the heights behind the town, in which the British defeated the Americans (see p. 60). It was incorporated as a town in 1788, when its population did not exceed 1500, and as a city in 1834 (pop. about 30,000). — The value of Brooklyn’s manufactures in 1890 was $253,000,000 (50,600,000$). They include sugar and oil refining, ship-building, meat-packing, and the making of chemicals, cordage, carpets, and boilers. Its commerce is also very important. In 1890 Brooklyn contained 833,547 inhabitants.

FULTON STREET, the Broadway of Brooklyn, begins at Fulton Ferry (p. 14), almost under the shadow of Brooklyn Bridge, and runs hence first to the S. and then to the E., with a total length of 6 M. It is traversed by the Elevated Railroad and several tramways. Following it from the bridge or ferry, we soon reach (10 min.) an open space in front of the Borough Hall (Pl. A.5), a white marble building, with an Ionic portico and a tower. Opposite is a spirited statue of Henry Ward Beecher (see p. 59), by J. Q. A. Ward. To the E. of Borough Hall is the County Court House, a handsome edifice in a Corinthian style. Behind Borough Hall, adjoining the Court House, are the Municipal Buildings and the Hall of Records. — At the corner of Washington St. and Johnson St., a little to the N. of Borough Hall Square, is the Post Office, a really fine building, but not seen to advantage. Adjacent is the tall building of the Brooklyn Daily Eagle, a model newspaper office, to which visitors are welcome.

From Borough Hall Square Montague Street, containing the Academy of Music (good concerts), the Art Association Building (exhibitions of pictures), and the Brooklyn Library (140,000 vols.), leads W. to the river, ending in a terrace which commands an excellent View of New York and the harbour. The district in which we now find ourselves, known as Brooklyn or Columbia Heights, is, perhaps, the pleasantest part of the city and contains many of the finest residences. In this quarter are the three hotels mentioned at p. 57, numerous large apartment-houses, and many of the leading clubs (Hamilton, Jefferson, Brooklyn, Excelsior,
Plymouth Church. BROOKLYN. 3. Route. 59

Crescent Athletic). In front of the Hamilton Club (cor. Remsen and Clinton Sts.) is a Statue of Alex. Hamilton, by W. O. Partridge, erected in 1898. The 'Heights' rise abruptly from the river to an elevation of 70-100 ft., leaving at their base room for a single narrow street. Stores and residences have been sunk into the front of these bluffs, forming a series of unique 'cave dwellings'. The chief street of the 'Heights' and a fashionable Sunday promenade is Clinton Street, extending from Fulton St. (crossing Montague St.) to Gowanus Bay. In this street, at the corner of Pierrepont St. (the street before Montague St.), is the handsome building of the Long Island Historical Society, which possesses a library of 60,000 vols. and a small museum. In Pierrepont St. are the Dutch Reformed Church and the Unitarian Church of the Saviour (cor. of Monroe Place). At the corner of Montague St. is Holy Trinity Church, the leading Episcopal church of Brooklyn, with a spire 275 ft. high. In Remsen St., the next cross-street, at the corner of Henry St., is the Congregational Church of the Pilgrims (Rev. Dr. Storrs), with a piece of the original 'Plymouth Rock' (see p. 98) immured in its façade. A little farther on in Clinton St., at the corner of Livingston St. (left), is the handsome Church of St. Ann (Episcopal). Clinton St. then crosses Atlantic Avenue, a wide and busy street descending on the right to the ferry for Whitehall St., New York (p. 14).

Plymouth Church, the most famous ecclesiastical edifice in Brooklyn, where the late Henry Ward Beecher (d. 1887) drew crowds for 40 years, stands at the N. end of the Heights, in Orange St., between Hicks St. and Henry St., 1/4 M. from Brooklyn Bridge. It is a large building without architectural pretensions.

Returning to Borough Hall and continuing to follow Fulton St. towards the E., we soon reach, at the corner of Bond St. (right), the building of the Young Men's Christian Association, with a fine gymnasium. Fort Greene Place, 1/2 M. farther on, leads to the left to the small (3 min.) Fort Greene Park, laid out on the site of the Revolutionary earthworks known as Fort Greene. To the right Fort Greene Place leads to the (5 min.) Flatbush Station (p. 57). Clinton Avenue, nine blocks farther on, is, perhaps, the handsomest street in Brooklyn.

In Ryerson St., between Willoughby and De Kalb Avenues, about 1/4 M. to the E. of Clinton Ave., are the extensive buildings of the Pratt Institute, one of the best equipped technical institutions in the world, founded and endowed in 1884-87 by Mr. Charles Pratt, 'to promote manual and industrial education, and to inculcate habits of industry and thrift'. Its schools of technology, domestic science, art, music, mechanics, etc., are attended by 3400 students. Visitors are admitted on Mon., Wed., & Frid., 10-12 and 3-5 (in winter also 7.30-9.30 p.m.); the Technical Museum is open on Mon. and Frid., 7.30-9.30 p.m., and on Wed., 3-5. The Library, built in 1895, contains 65,000 vols. and a large collection of prints. None interested in technical education should fail to visit this institution (schools closed, June 15th to Sept. 15th). The Froebel Academy, 636 Lafayette Ave., is under the direction of the Pratt Institute.
Clinton Avenue ends on the N. at the U.S. Navy Yard on Wall-about Bay, the chief naval station in the country, employing 2000 men (open on week-days, 8-5; entr. at cor. of Sands St. and Navy St.). The yard proper covers about 45 acres, while 43 acres more belong to it. Among the most prominent features of the yard are two Dry Docks, 465 ft. and 307 ft. long respectively. Some war vessels are generally moored here, while others are on the stocks. To the E. is the U.S. Naval Hospital, with its pillared front. Between the Navy Yard and the Hospital is the immense Wallabout Market, covering an area of 45 acres. Its buildings are of brick, in the Dutch style, and include a quaint clock-tower.

The largest of the Docks of Brooklyn is the Atlantic Basin, about \( \frac{1}{2} \) M. to the S. of the Bridge, with an area of 40 acres and 2 M. of wharfage. About \( \frac{1}{4} \) M. farther S., on Gowanus Bay, are the Erie Docks.

Perhaps Brooklyn's chief attraction for strangers is the beautiful *Prospect Park*, finely situated on an elevated ridge in the S.W. part of the city and commanding excellent views of Brooklyn, New York, the harbour, the ocean, and Long Island.

The principal entrance is at the end of Flatbush Ave. (tramway from Fulton Ferry), and the Plaza in front of it is adorned with a "Memorial Arch" for soldiers and sailors of the Civil War, surmounted by a fine quadriga, by Fred. Macmonnies (b. at Brooklyn in 1864), and with a fine statue, also by Macmonnies, of *James Stranahan* (1808-93). Drive through the park in the park-carriages 25 c. each. The water-tower near the main entrance furnishes the finest view of the city and island.

Prospect Park, which has an area of 520 acres, is not so elaborately laid out as Central Park, but has, perhaps, more natural beauty. It contains many fine trees. The lake at the S. side is 60 acres in extent. On the slope of Look-Out Hill (185 ft. above the sea) is a Monument (erected in 1895) in memory of the Maryland troops who fell in the battle of Long Island (p. 58), which is also commemorated by a tablet in Battle Pass. Concerts are given here on Sat. and Sun. afternoons in summer. In other parts of the park are a bust of *John Howard Payne* (1792-1852), author of 'Home, Sweet Home', statues of Lincoln and *Gen. G. K. Warren*, and several other monuments. — From the Plaza the *Eastern Parkway*, a fine boulevard, 200 ft. wide, runs E. to the (2½ M.) part of Brooklyn known as East New York. Near the S. entrance begins the *Ocean Parkway*, a similar boulevard, which runs all the way to (5 M.) Coney Island (p. 62) and forms one of the pleasantest approaches to that resort. It is flanked on either side by a broad cycle-path. The "Drive from Prospect Park to Fort Hamilton (1¼ hr.; Crescent Club House) affords continuous views of New York Harbour.

Ninth Avenue and other streets adjoining Prospect Park contain some of the finest residences in Brooklyn. Among the largest and handsomest buildings bordering on the Park are the huge Riding and Driving Club (near the Plaza) and the "Montauk Club (cor. 8th Ave.).

*Brooklyn Forest Park*, in the N.E. part of the borough, is 540 acres in area and deserves a visit for its fine trees and beautiful views.

Following Ninth Avenue towards the S. from the S.W. entrance of Prospect Park, we soon reach (1½ M.) the N.E. entrance of *Greenwood Cemetery*, one of the most beautiful cities of the dead in America, rivalling Prospect Park in the charms of its undulating surface and extensive views. It is 475 acres in extent. Carriages take passengers round the chief points for 25 c. each.
The principal (N.) entrance is in Fifth Ave. (cor. 25th St.). The entrance gateway is an elaborate structure of brown stone, 142 ft. wide, with bas-reliefs and a tower 100 ft. high. Plans of the cemetery may be obtained here (10 c.), showing the positions of the graves. Among the monuments of special interest, either from their subject or treatment, are those to the New York Volunteers (Section H), Roger Williams (p. 72; Sec. 190), De Witt Clinton (p. 171; 103), Elias P. Hove (the inventor of the sewing machine; H), S. F. B. Morse (inventor of the electric telegraph; 25), Henry George (1839-97), the founder of the "Single Tax" movement, (at the top of Ocean Hill), the magnificent mausoleum of John W. McKew, Horace Greeley (p. 30; 35), Henry Ward Beecher (p. 59; 140), Lota Monroe, John Matthews (64), the Pilots (111), the Firemen (2), Peter Cooper (p. 33; 101), A. S. Scribner (160), James Gordon Bennett (107), and the Brooklyn Theatre Fire Victims (N.). The expensive monument of Charlotte Canda (92) scarcely justifies its reputation. One of the chief attractions of Greenwood is the beauty of the blossoming of the dog-wood (Cornus Florida) at the end of May or beginning of June.

Among other points of more or less interest not included in the above rapid survey are the Roman Catholic Cathedral (cor. Lafayette and Vanderbilt Aves.); the Equestrian Statue of General U. S. Grant, by W. O. Partridge, erected in front of the Union League Club, Bedford Ave., in 1896; the Fire Headquarters, in Jay St.; the Germania Club, in Schermerhorn St.; the Armouries of the 13th and 23rd Regiments, in Sumner Ave. and Bedford Ave.; the Long Island College Hospital and St. Peter's Hospital, in Henry St.; St. Mary's Hospital, in Buffalo Ave.; the Brooklyn Public Library, Bedford Ave., established in 1896; the handsome Roman Catholic church of St. Augustine, cor. Sixth Ave. and Sterling Place; the Reformed Church, cor. Seventh Ave. and Carroll St.; the Polytechnic Institute, Livingston St.; the Young Men's Christian Association, 502 Fulton St.; the Young Women's Christian Association, cor. Flatbush Ave. and Schermerhorn St.; and the Cemetery of the Evergreens. — The Brooklyn Institute, founded in 1824 and rechartered in 1890, is an academy of arts and sciences with about 4000 members. It contains 25 departments, each of which holds regular meetings and courses of lectures. A grant of 81/4 acres of Prospect Park land has been made to the Institute, which has erected on it a large building, 425 ft. square, containing lecture-halls, class-rooms, laboratories, art galleries, and a restaurant.

To the N. of Brooklyn, and separated from it by Newtown Creek, lies Long Island City (Long Island City Hotel, R. from § 1), a place of no particular interest, with (1893) 30,506 inhabitants. It is made up of Hunter's Point, Astoria, and Ravenswood, the last of which contains pleasant residences and extensive nurseries. In Hunter's Point (ferry to 54th St., New York) is the terminus of the Long Island Railroad (trains for all points in Long Island; comp. Pl. G, 5).

Long Island, a narrow, fish-shaped island, 120 M. long and 8-20 M. wide, extends along the coast of New York and Connecticut from the mouth of the Hudson to a point beyond the mouth of the Connecticut River, enclosing between itself and the mainland the comparatively sheltered waterway of Long Island Sound (p. 74). Its area is 1680 sq. M. and its population (1890) 1,029,097 (incl.
Route 3.  LONG ISLAND.

Brooklyn; now about 1,400,000). The surface is generally level. A sandy barrier, at some distance from the main shore, extends along nearly the whole S. coast of the island, broken at intervals by narrow inlets; and here are situated Coney Island and other popular seaside-resorts of the New Yorkers. The N. shore is hilly and well wooded. In the E. part of the island are several summer-resorts of a higher class than Coney Island, affording good sea-bathing, sailing, fishing, shooting, and golfing. Some of the oldest settlements in the state are on Long Island, and the historical student will find many points of interest. Comp. the annual guidebook of the Long Island R. R., by H. F. Gunnison.

Coney Island, the name given to the westernmost section of the flat sand-bar above mentioned, is a strip of white sand, 5 M. long and 1/4-1 M. wide, separated from the mainland by a small creek and from the next section of the bar (Rockaway Beach) by a narrow inlet opening into Jamaica Bay. The island is divided into four distinct parts: West End or Norton's Point, West Brighton, Brighton Beach, and Manhattan Beach. Those who merely wish to see Coney Island for a few hours should go to West Brighton and return via Manhattan Beach. The hotels at the latter are the best places to pass the night. It is estimated that at least 10 million visitors resort to Coney Island every season (June-Sept.), and hundreds of thousands are sometimes there on the same day. The prices at the hotels and restaurants are highest at the E. end, and lowest at the W. end of the island; but at the dearer houses one portion is generally ample for two persons.

West End or Norton's Point (Norton's Hotel), the old original Coney Island, now known as Sea Gate, has a number of pleasant residences and the headquarters of the Atlantic Yacht Club. It is connected with Brighton and West Brighton by electric cars.

West Brighton, about the middle of the island, is the most crowded and characteristic, though not the most fashionable part of it; and the scene here on a fine Sunday in summer beggars description. The beach swarms with all the peripatetic shows of a popular seaside-resort; and among the permanent attractions are two iron Piers (1000-1300 ft. long) and a tall Observatory ("View). West Brighton may be reached from New York by steamer from Pier 1 (at the Battery) or from W. 23rd St. (return-fare 50c.), or by steamer from Whitehall St. to Bay Ridge and thence by the Sea Beach R. R. (same fare); from Brooklyn by the Prospect Park and Coney Island R. R. (return-fare 25c.), by the Bath and Coney Island R. R. (same fare), by electric car, by the Brooklyn Elevated R. R., or by the Ocean Parkway (p. 60). It is connected with (1/4 M.) Brighton Beach by a fine drive called the Concourse and by an elevated railroad (5 c.).

Brighton Beach (Hotel Brighton) consists of a huge hotel, a refreshment pavilion, several bathing-houses, and a theatre, in which variety actors perform in summer. It is specially frequented by the Brooklynites, who reach it either via West Brighton (see above) or by the Brighton Beach and Brooklyn Railway (10 c., return-fare 20 c.).

Manhattan Beach (Manhattan Beach Hotel, on the European plan, a huge wooden structure, 660 ft. long; Oriental, Amer. plan, for more permanent guests) is the most fashionable part of Coney Island and the most comfortable for ordinary tastes. The hotels have large pleasure-grounds and bathing accommodations for many hundreds of visitors (adm. to amphitheatre overlooking the Manhattan bathing enclosure, 10 c.), and music is furnished afternoon and evening by a good band. Light opera is given in summer. The beach is illuminated by electricity, and a display of fireworks is given almost nightly. Manhattan Beach may be reached from New York by ferry to Hunter's Point (see p. 14) and thence by train; from the Flatbush Ave. station at Brooklyn (return-fare 20 c.); or by
LONG ISLAND. 3. Route. 63

electric cars from Brooklyn Bridge and from Broadway and Fulton St. Ferries.

Rockaway Beach (Carman House), the next section of the sand-bar is a less crowded and somewhat cheaper edition of Coney Island. The trip to it from New York by steamer (1½ hr.; return-fare 50 c.; see advts. in daily papers) affords an excellent survey of New York Harbour and Coney Island. It may also be reached by railway from Long Island City (34th St. ferry; comp. p. 61). A tubular iron pier extends into the ocean for 1200 ft. — Farther to the E. are the summer-resorts of Arverne, Edgemere, and Far Rockaway.

Long Beach (*Long Beach Hotel, § 4-5), the next sand-strip, is one of the best bathing-beaches on Long Island, and is frequented by summer residents rather than by excursionists. It is reached by railway via Long Island City (comp. p. 61; return-fare 50 c.). Farther to the N. is the Great South Beach, a curious strip of sand 40 M. long and 1¼-5 M. wide. Fire Island (Surf House), at its W. extremity, is reached by ferry from (S.M.) Bay Shore. The light of Fire Island Lighthouse is often the first object in America seen by the visitor from Europe, and the signal-station here announces the approach of the steamers 4 hrs. before they reach their docks (comp. p. 2). The Great South Bay, between the South Beach and the main coast, is a favourite shooting (wild-fowl) and fishing ground, and the villages along its shores (on the S. division of the Long Island R.R., see below) are much frequented in summer by New Yorkers.

The other points on Long Island are all reached by the Long Island Railway, the chief divisions of which are given below.

From Brooklyn to Greenport, 94 M., railway in 3-3½ hrs. (fares $2.80). This is the main line; the trains start at Flatbush Ave. Station (p. 57), and are joined at Jamaica (see below) by simultaneous sections from Long Island City (p. 61). — From (7 M.) Woodhaven Junction a branch-line runs to Rockaway Beach (see above). — 2½ M. Jamaica, the junction of the Montauk Division (see below); 13 M. Queens, the station for Creedmoor (p. 18). Beyond (15 M.) Floral Park we quit the Borough of Queens (Greater New York). — 18½ M. Mineola, the junction of lines running N. to Glen Cove (with the fine mausoleum of Mr. Charles Pratt, founder of the Pratt Institute, p. 59), Sea Cliff, and Oyster Bay (good yachting), and S. to Valley Stream (see below). Just to the N. lies Garden City (Garden City Hotel, from § 4), laid out by A. T. Stewart as a model suburban residence for New Yorkers and containing a handsome Episcopal cathedral built by him. Adjacent is Hempstead, with Camp Black, a large cantonment established for the mobilisation of New York troops in the war with Spain (1898) and as a permanent encampment for the reserve forces of the East. Hard by are the headquarters of the Meadowbrook Hunt Club, with a good golf-course. — 25 M. Hicksville is the junction of a branch-line to Setauket, Port Jefferson, Wading River, and other resorts on the N. shore. — 41 M. Brentwood, a pleasant resort among the pines; 48 M. Ronkonkoma, station for the lake of that name (The Gables); 65 M. Manor, junction of a short line to Eastport (p. 64); 73 M. Riverhead. We now skirt the N. shore of Peconic Bay. — 94 M. Greenport (Wyandank Hotel, $2-2½), a fishing-village and sea-bathing resort near the E. end of Long Island. — A steam-ferry plies hence to Shelter Island (Prospect Ho., Manhasset Ho., § 4; Bay View Ho., § 2½-3), in Gardiner's Bay, much frequented by New Yorkers in summer. The early records of the Quakers here are full of interest.

From Brooklyn to Montauk, 116 M., railway in 4 hrs. (fares $3.45). This line, which gives access to the resorts on the S. shore of Long Island, diverges to the right from that above described at (9½ M.) Jamaica. — 16½ M. Valley Stream is the junction of the branch to Far Rockaway (see above), etc. At Woodbury, on this branch, is a monument to Culluloo Telawaxana (d. 1818), the last of the Rockaway Indians. — 23 M. Freeport (Woodcleft Inn); 28½ M. Massapequa (The Massapequa). — 37 M. Babylon (Argyle Ho., $3-3½; Watson Ho., $3-3½), a small town (3000 inhab.) and seaside resort. — 48 M. Islip (Lake House); 45 M. Oak-
Route 4. NEW ROCHELLE. From New York
dale, with the fine estate of Mr. W. K. Vanderbilt. — 52 M. Bay Shore
(Prospect House), another fashionable resort, is connected by ferry with Fire
Island (p. 63). — 54 M. Patchogue (Roe's Hotel, $3-4; Laurel Ho., $ $2'/2-3/2;
Ocean Avenue Ho., $2'/2-3), with 4000 inhab., is one of the largest summer
resorts on the island. Blue Point, the S. extremity of Patchogue Bay, lends its
name to the well-known oysters. — 58 M. Bellport (Hotel Bellport; Goldthwaite
Ho., $2'/2-3; Wyandotte, $2'/2 and (66'/2 M.) Moriches (Hotel Brooklyn,
$2'/2-3; Beach View, $2'/2; Ocean Ho., $2, etc.) are two other favourite
resorts. — 70 M. Eastport; 74'/2 M. Westhampton. — 89'/2 M. Shinnecock Hills
is well known as the seat of one of the leading golf-clubs in the United
States (18 holes). It takes its name from the Shinnecock Indians, a remnant
of whom still occupies a reservation close by. — 89'/2 M. Southampton,
sometimes called the 'Newport of Long Island', is the summer home of
many wealthy New Yorkers. — 95 M. Bridgehampton is the junction of a
short branch-line to Sag Harbor (American Ho., Nassau Ho., $2), once
one of the chief whaling ports in America. — 101 M. Easthampton (Gar
diner's Hotel), one of the quaintest and most interesting villages in the
state, is visited annually by many artists, who paint its picturesque wind-
mills and other sights. It was the home of John Howard Payne (p. 60), and
the Rev. Dr. Lynman Beecher was pastor here from 1838 to 1841. — The
railway ends at (106 M.) Montauk, which is about 7 M. from the bold bluffs
of Montauk Point (lighthouse), the E. extremity of the island. Here lies
Camp Wikoff, established in 1898 for the troops returning from Cuba. To
the N. is Gardiner's Bay (p. 63), with Gardiner's Island, one of the innumer-
able claimants to being the hiding-place of Capt. Kidd's treasures, and
the only one in which treasure was really found.

The only other point on Long Island that need be mentioned is Flush-
ing, with 8336 inhab., which lies 8 M. to the W. of Long Island City (rail-
way) and contains the residences of many New Yorkers.

4. From New York to Boston.

231 M. RAILWAY (New York, New Haven, and Hartford Railroad to
Springfield; Boston and Albany Railroad thence to Boston) in 5'/2-7'/4 hrs.
(fare $3, sleeping-berth $1-1'/2, seat in drawing-car $1); four express
trains daily, including one at night (11 p.m., arriving at 6.15 a.m.). Din-
ing-car on the afternoon train (D. §1) and buffet-cars on other day-trains.

The train starts from the Grand Central Depot (p. 6), runs
through the long tunnels under Park Avenue (see p. 40), crosses
the Harlem River, and traverses the somewhat unkempt environs of
New York. We have a glimpse of Columbia University (p. 52) to
the left. To the right, at (9 M.) Fordham, are the large buildings
of the Jesuit St. John's College and the cottage occupied by
Edgar Allan Poe in 1844-49. A little farther on, to the left, lies
Woodlawn Cemetery (with the large mausoleum of Jay Gould),
and beyond (12 M.) Woodlawn our line diverges to the right from
the New York and Harlem R. R. and skirts Long Island Sound
(p. 74). — 161'/2 M. New Rochelle, founded by Huguenot refugees in
1691. Thomas Paine (1737-1809) had a farm here, granted to him
by New York State, and is commemorated by a monument. Leland
Castle, on Castle Hill, erected in 1857 and elaborately decorated
inside with frescoes and coloured marbles, is now used as a semin-
ary by Ursuline nuns. — 24 M. Rye, the station for (2 M.) Rye
Beach (Hotel, $3), a summer-resort on the Sound. — Beyond
(25½ M.) Port Chester we cross the Byram River and enter New England. — 28 M. Greenwich (Kent Ho., $5; Green Court Inn, $2½; Lenox House, $2½; Held House, $3, at Indian Harbor, 1 M. to the S.E.), the first station in Connecticut (pron. Connécticut; the 'Nutmeg State'), is a small town with 10,131 inhab., pleasantly situated on heights overlooking Long Island Sound. It was settled in 1640 and contains the villas of many New Yorkers.

33½ M. Stamford (Arlington, $2-3; Shippan Point Ho., Waverley, finely situated on Shippan Point, 13/4 M. to the S., $2-3), with 15,700 inhab., is a town of the same age as Greenwich and is also a favourite residence and summer-resort of New York merchants (steamer to New York 35c.). — 41½ M. South Norwalk (Mahackemo, $2-2½) is the station for (1½ M.; tramway) Norwalk (Norwalk House, $2; pop. 17,747), another summer-resort, and the junction of a branch-line to Danbury (p. 149). — 51 M. Fairfield (Merwin House, $3; St. Marc, $2½) has, perhaps, the best bathing-beach on Long Island Sound.

56 M. Bridgeport (Atlantic House, $2½-3; Windsor, $2), a flourishing city of (1890) 48,866 inhab., lies on an inlet of the Sound, at the mouth of the Peguonnock River. It possesses important manufactures of sewing-machines (Wheeler & Wilson, Howe), small-arms, ammunition, carriages, and other articles (total value in 1890, $22,000,000). The winter-quarters of Barnum & Bailey's Circus are at Bridgeport. Golden Hill, above the town, with numerous villas, affords good views; and Seaside Park contains a Soldiers' & Sailors' Monument and statues of Elias Howe and P. T. Barnum. Bridgeport is the junction of the Berkshire Division of the N. Y. N. H. & H. R. R. (R. 18). Steamers daily to New York (50c.). — Farther on the train crosses salt-marshes and reaches —

73 M. New Haven (New Haven House, $4; Tontine, R. from $1; Garde, near the station, commercial, $2-2½; Tremont, $2-2½; Rail. Restaurant; cab 50c. per drive, 2 pers. 35c. each), the largest city of Connecticut and seat of Yale College, is a well-built city, situated at the head of a bay of (4 M.) Long Island Sound and surrounded by hills. It is known as the 'City of Elms', from the fine trees which shade its streets, and carries on a considerable trade and numerous manufactures (value in 1890, $29,000,000). The town was founded in 1638. In 1800 it had about 5000 inhab., and in 1890 it had 81,298.

From the large Union Depot, which adjoins the Harbour, Meadow Street (electric tramway) leads to the N. to (1½ M.) the *Public Green, on which are the City Hall, three Churches, and the Free Public Library. At the back of Centre Church is a monument to John Dixwell, the regicide.

In College St., which skirts the W. side of the Green, are the substantial buildings of *Yale University, which is second in dignity and importance to Harvard alone among the universities of

Baedeker's United States. 2nd Edit.
Route 4.

NEW HAVEN. From New York

America. Besides the Academic Department, it has schools of Science, Theology, Medicine, Law, and Fine Arts.

Yale University (250 instructors and 2500 students) was founded at Killingworth in 1700 and established at New Haven in 1717. It was named in honour of Eliza Yale (1648-1721), a native of New Haven, who became Governor of Madras and of the East India Co. He presented it with 400l. Perhaps the most eminent of its Presidents was Timothy Dwight (1795-1817), and the list of its alumni includes Eli Whitney (inventor of the cotton-gin), Samuel Morse, Jonathan Edwards, Noah Webster, Theodore Winthrop (author of 'Cecil Dreeme'), E. C. Stedman, J. Fenimore Cooper, N. P. Willis, etc.

From the Public Green we enter the university 'campus' or quadrangle by an imposing tower-gateway known as Phelps Hall. Among the buildings in the campus are the Art School (adm. 25c.), containing a good collection of Italian, American, and other paintings and sculptures; the Osborn Hall; Battel Chapel; the Vanderbilt Dormitory; the Alumni Hall; Dwight Hall; and the College Library, containing over 250,000 vols., including those left by Bp. Berkeley. The campus also contains statues of the Rev. Abraham Pierson, first Rector of Yale (1701-08), President Woolsey (1801-39), and Prof. Silliman (1779-1864). The other chief buildings of the University include the Peabody Museum of Natural History, at the cor. of Elm and High Sts., in which the mineralogical collections are especially fine; the Sheffield Scientific School (four halls in College St.), admirably equipped; the Gymnasium (Elm St.); the Divinity School (cor. Elm & College Sts.); the Observatory (Prospect St.); the Chemical and Physical Laboratories (Library St.); and the Medical School (York St.).

The Old Burying Ground, in Grove St., at the head of High St., a little to the right of the Green, contains the graves of Sam. Morse (1791-1872), Noah Webster (1758-1843), President Timothy Dwight (1792-1817), Theodore Winthrop (1828-61), and Eli Whitney (1765-1825). — To the N. from Grove St. runs Hillhouse Avenue, the most beautiful of the elm-shaded streets of New Haven. It ends at what was once Sachem's Wood.

Environs. East and West Rocks are two masses of trap-rock on the plain near the city. The East Rock (360 ft.), 2 M. from the Green (tramway via State St.) has been made a public park and is surmounted by a war-monument (inn; View). The West Rock (400 ft.), 2 1/4 M. to the N.W. of the Green (tramway through Chapel St.), ascended with more difficulty, is also a good point of view. Goffe and Whalley, two of the regicides, lay concealed here in the Judge's Cave. At Edgewood, near the foot of the West Rock, is the home of Donald G. Mitchell ('Ik Marvel'). — Savin Rock (Sea-View Ho., §3) is a bold promontory, commanding a view of Long Island Sound (p. 74; tramway from the Green). — Another favourite resort (tramway) is Morris Cove, on the opposite side of the city. — A steamer plies daily from New Haven to New York in 5 hrs. (75 c., return-fare §1.25, state-room §1).

Beyond New Haven the train turns to the left and runs inland (N.). To the left we obtain a good view of the East and West Rocks (see above). The line follows the Quinnipiac valley. 92 M. Meriden (Winthrop, §2 1/2-4), a town of 30,000 inhab., with important manufactures of silver ware (Britannia Co.), cutlery, tinware, and other goods. — 99 M. Berlin, another tinware-making place. At (105 M.) Newington we cross the New England R. R. (see p. 67).

110 M. Hartford (*Allyn House, §3-4; Hartford, §3-4, R. from §1; Capitol, §2-2 1/2; *Heublein, R. from §1; New Dom, §2-2 1/2; American Hotel; United States Hotel, §2-3; Rail. Restau-
to Boston. HARTFORD. 4. Route. 67
rant; cab 50 c. for 1-2 pers. to any point in the city), the capital of Connecticut, is finely situated on the Connecticut River, at its confluence with the Park River, 50 M. from Long Island Sound. It contains extensive manufactories of steam-engines, small-arms (Colt’s Factory), bicycles (Pope Manufacturing Co.), etc., and is noted for its powerful insurance companies (assets $160,000,000). A Dutch fort was established here in 1633, and the town was founded three years later. Its population is (1890) 53,230. — The Union Depot is near the centre of the town. To the S.W. of it, beyond the Park River, lies *Bushnell Park, containing the handsome white marble *Capitol, a conspicuous object in most views of the town. The Senate Chamber contains a good portrait of Washington, by Stuart. In the E. wing of the groundfloor is a statue of Nathan Hale (p. 30), and in the W. wing are the tombstone of Gen. Putnam (p. 103) and a statue of Governor Buckingham (1858-66). The Statue of Gen. Putnam, in the grounds, is by J. Q. A. Ward. Fine view from the Dome (250 ft.). — Following Capitol Avenue to the E. and then turning to the left, along Main Street, we reach (right) the Wadsworth Athenæum, containing a gallery of paintings and sculptures, a library, and the collections of the Historical Society (9-4). Adjacent is the Etna Life Insurance Building, and a little farther on is the Post Office. Opposite is the Connecticut Mutual Life Insurance Co. By continuing to follow Main St. in the same direction, we reach (20 min.) the State Arsenal.

Near the State House are the High School, the Hartford Orphan Asylum, and the Hartford Theological Institute. — About 1 M. to the S. is Trinity College, an E.E. building by Burges of London. — The Colt Firearms Factory is in the S.E. part of the city, and near it is the handsome *Church of the Good Shepherd, erected in memory of Col. Colt, inventor of the revolver, by his wife.

A tablet at the corner of Charter Oak Place marks the site of the ‘Charter Oak’, where in 1687 a colonial gentleman hid the charter of Connecticut (now in the Capitol), to save it from the clutches of Sir Edmund Andros (p. 25). Charter Oak Park is famous for its trotting races. — Among other large buildings are the Retreat for the Insane, the Deaf and Dumb Asylum, the Old Folks Home, and the City Hospital.

Among past and present residents of Hartford are Mr. S. L. Clemens (‘Mark Twain’; 351 Farmington Ave.), Mr. Charles Dudley Warner (37 Forest St.), Mrs. Harriet Beecher Stowe (d. 1896), and Mrs. Sigourney. — Many pleasant Drives may be taken in the vicinity (Talcott Mt., Tumbledown Brook, etc.). — Steamers ply daily to New York, Sag Harbor (p. 54), etc. — An Electric Tramway connects Hartford with (17 M.) Rockville (fare 20 c.).

From Hartford to Newburg, 112 M., New England Railroad in 4½ hrs. This line connects New England with the Hudson River and points beyond (Pennsylvania, etc.). — 5 M. Newington (p. 66); 9 M. New Britain (Ruswin, § 2½-3), the birthplace of Elihu Burrit (1810-79), the ‘Learned Blacksmith’, a busy town with 19,007 inhab., engaged in making locks, jewellery, and hardware. 14 M. Plainville. — 33 M. Waterbury (Scovill, Franklin, § 2½-3), a prosperous manufacturing town with 23,646 inhab. and the junc-
tion of the Naugatuck R. R., well known for the cheap 'Waterbury watch-es', of which about 300,000 are turned out here yearly. — 57 M. Hawley-
ville; 63 M. Danbury (p. 149); 73 M. Brewster (p. 57). The line now turns
to the N. 98 M. Hopewell Junction; 104 M. Fishkill. — 111 M. Fishkill Landing,
and thence by steam-ferry to (112 M.) Newburg, see p. 167.

Beyond Hartford (Capitol conspicuous to the right) the train continues to follow the same general direction (N.N.E.), crossing the Connecticut River. A good deal of tobacco is grown in this part of the valley. Between (127 M.) Thompsonville and (132 M.) Longmeadow we enter Massachusetts (the 'Bay State').

136 M. Springfield (Massasoit House, $3-5, R. from $1; Cooley's,
$21/2; Worthy, E.P.; Haynes' Hotel, $21/2-3; Railway Restaurant),
a pretty little city on the E. bank of the Connecticut, dating from
1636, carries on a great variety of industries, the most important
of which is the manufacture of small-arms. Pop. (1895) 51,522.
The United States Armory, in a park to the E. of the station
(reached via State St.), employs about 500 hands and turns out
30,000 Springfield rifles annually (apply at office for a pass; no adm.
on Sun.). View from tower. The Arsenal contains 225,000 stand of
arms. During the Civil War 800,000 guns were made here, and
during the war of 1898 the ordinary force and output of the Arm-
oury were quadrupled. Among the principal buildings are the
*Church of the Unity, Christ Church, the Memorial Church (N. end
of city), the *Court House, the *Railway Station (these two de-
signed by H. H. Richardson), the City Hall, the *Art Building
(Oriental collections, modern American paintings, etc.; natural
history collections on groundfloor), and the City Library (100,000
vols.). A visit may also be paid to *Forest Park (S.; ponds covered
with lotus-plants), Stearns Park (with the *Puritan, a statue by
St. Gaudens), and the two Cemeteries. Good views are obtained
from Crescent Hill Road (S.) and from the bridges. — The 'Spring-
field Republican' is one of the best newspapers in the country.

At Springfield our train joins the Boston and Albany R. R. and
turns to the E. (right). Little of interest is passed before Worcester.
151 M. Palmer (Rail. Restaurant), a junction of various lines.

190 M. Worcester (Bay State, $21/2-4; Lincoln, $21/2-3;
Commonwealth, $2-21/2; Rail. Restaurant; cab 50c. for each pers.,
tramways 5c.), the second city of Massachusetts and 'heart of the
Commonwealth', with (1895) 98,767 inhabit., occupies a pleasant
hill-girt site near the Blackstone River. Its manufactures are of a
most heterogeneous character, the staples being iron, copper, and
steel wire, machinery, envelopes, boots and shoes, organs, and pianos
(value of manufactured products in 1890, $39,860,000 or 7,972,000£.).

From the *Union Depot, by H. H. Richardson, we proceed to
the W. through Front St. to (5 min.) the Common, which contains a
War Monument and a Memorial of Col. Timothy Bigelow.

On the W. side of the Common rises the City Hall, an impos-
ing building of white marble, completed in 1898. This faces Main Street, which we at first follow towards the right, to Lincoln Square. Just on this side of the square, to the left, stand two Court Houses and the building of the American Antiquarian Society (open 9-5, except Sat. afternoon).

This society, one of the leading learned bodies of America, was founded in 1812 and possesses a valuable library of 100,000 vols. (esp. rich on American subjects) and an interesting collection of relics. The collection of newspapers, comprising over 4000 vols., extends from the Boston News Letter of 1704 down to the present day.

In Lincoln Sq. stands the old Salisbury House, an interesting specimen of a Colonial mansion. In Salisbury St. is the new Worcester Art Museum, erected at the cost ($100,000) of Mr. Stephen Salisbury and opened in 1898 (2-6; adm. 25 c., free on Sat. & Sun.; closed on Mon.). Among its permanent contents are a few oil-paintings, engravings, and casts. Loan exhibitions are held from time to time.

Highland Street leads to the W. from Lincoln Sq. to Elm Park and (1 M.) Newton Hill (670 ft.), which commands an extensive "View of the city and its surroundings. — Salisbury Street runs N.W. to (1/2 M.) Salisbury Pond, on which are the huge Wire Works of Washburn & Moen (interesting processes). The old Bancroft House, in which George Bancroft (1800-1891), the historian, was born, is in this street, 1 M. from the square. — Belmont St. leads to the E., between Millstone Hill and Bell Pond, to (1/2 M.) the enormous "State Lunatic Asylum (1000 patients; "View)."

Following Main St. to the left (S.) from the Common, we pass the imposing new Post Office (left) and several churches and reach (11/2 M.; to the right) the large, though not handsome Clark University, opened in 1887 and intended rather for the endowment of research than for ordinary educational purposes. The Chemical Department is admirably equipped. — Main St. ends 1/2 M. farther on at Webster Square.

From this point an Electric Tramway runs through Cherry Valley to Leicester and (12 M.) Spencer. — A pleasant walk of 2 M. may be taken round Coe's Pond, to the W. of Webster Sq.

Among other buildings of interest are the Free Public Library (80,000 vols.), Elm St.; the High School, Walnut St.; the Natural Historical Society's Museum, Foster St. (9-5); All Saints' Church, Irving St.; the Polytechnic Institute; the Oread Institute; and the College of the Holy Cross (R. C.), commandingly situated on Mt. St. James (690 ft.), to the S. of the town.

Among the pleasantest excursions from Worcester is that to Lake Quinsigamond (Island Ho.), a popular resort 2 M. to the E., reached by electric railway.

Beyond Worcester the train makes an abrupt turn to the right (S.) and passes Lake Quinsigamond (left; comp. above). — 213 M. South Framingham (Old Colony Ho., Winthrop, $2; pop. 9500), a manufacturing place and junction of several railways.

The railway to (29 M.) Lowell passes (7 M.) Sudbury, near which is an old Colonial tavern, the original of Longfellow's 'Wayside Inn'.

Cochituate Lake, to the left, near (217 M.) Natick (9118 inhab.),
is one of the sources of Boston's water-supply. To the right of
(220 M.) Wellesley (Elm Park Hotel) are the buildings of *Wellesley College, one of the best-known colleges for women in the United
States, situated in a beautiful park (700 students). — 224 M. Auburndale (Woodland Park Hotel, $3–3\frac{1}{2}$); 225 M. West Newton; 227 M. Newtonville; 228 M. Newton, all included in the wealthy suburban city of Newton (27,590 inhab. in 1895). 230 M. Brighton, with a large cattle-market and slaughter-houses. To the left is the Charles River. The train then skirts the N. end of Brookline (p. 96; stat. Cottage Farm), affording a good view (left) of the Charles River, Cambridge (p. 93), Boston (with the gilded dome of the State House), and Charlestown Heights (p. 95). In entering Boston we pass over the 'Back Bay' (p. 92), with The Fens to the right.

234 M. Boston (Southern Union Station), see R. 5.

b. Via Willimantic and the Air Line.

New York, New Haven, and Hartford R. R. to (127 M.) Willimantic and thence by New York and New England R. R. to (36 M.) Boston. This, the so-called 'Air Line' route (referring to the 'Air Line Division' of the N. Y. N. H. & H. R. R. from New Haven to Willimantic), is the shortest route (213 M. in 5-7\frac{1}{2} hrs.) between the two cities (fares as above). Its best train is the 'New England Limited' at 1 p.m. (in each direction), with parlor-cars.

From New York to (73 M.) New Haven, see R. 4a. The 'Air Line Division' (see above) here diverges to the right from the line to Hartford. 97 M. Middletown (McDonough, $2–3$), the junction of the line from Saybrook to Hartford, is a busy town of 9013 inhab., on the Connecticut River. It is the seat of the Wesleyan University (300 students; *View from the chapel-tower; good library and collections of natural history), the Berkley Divinity School (Episcopal), and the State Insane Asylum. — 98 M. Portland, with fine quarries of red sandstone. Beyond (106 M.) East Hampton, with its sleigh-bell works, we cross the (109 M.) Lyman Viaduct, 1200 ft. long and 140 ft. high. — 127 M. Willimantic (Hooker Ho., $2$; Rail. Restaurant), a manufacturing borough on the river of the same name, with 8648 inhab., is the point where we join the N. E. R. R. and is also the junction of the Central Vermont R. R. (see p. 71). — 152 M. Putnam, the junction of lines to Worcester (p. 68) and Norwich (p. 75). 160 M. East Thompson, the junction of a line to Webster and Southbridge. We now enter Massachusetts. 176 M. Blackstone Junction; 178 M. Woonsocket Junction; 186 M. Franklin; 193\frac{1}{2} M. Walpole. At (201\frac{1}{2} M.) Dedham, a pleasant residential town, we reach the Charles River. 204 M. Readville (p. 74); 205\frac{1}{2} M. Hyde Park; 208\frac{1}{2} M. Dorchester, a suburban district of Boston. The train crosses the South Bay, traverses South Boston, and enters the S. Union Station at —

213 M. Boston (see R. 5).
NEW LONDON.

4. Route.

71

c. Via Providence and the Shore Line.

232 M. N.Y. N. H. & H. RAILROAD in 5-7 hrs. (fares, etc., as above). — Vestibuled trains with through-carriages run on this route between Boston and Washington, the train being carried between Harlem River and Jersey City (see p. 56) by steamboat (D. on steamer $1).

From New York to (73 M.) New Haven, see p. 64. The 'Shore Line Division' of the N. Y. N. H. & H. R. R. crosses the Quinnipiac and continues to follow the shore of Long Island Sound, of which it affords fine views. Beyond (77 M.) Fair Haven we pass through cuttings and two tunnels. 82 M. Branford (Branford Point House, Double Beach House, and several other summer-hotels, $2-21/2), with the handsome Branford Library, and (85 M.) Stony Creek (Indian Point Ho., Bay View Inn, etc., $2) are popular bathing resorts. — 89 M. Guilford (Sachem's Head, $2-4) was the birthplace of the poet Fitz-Greene Halleck (1790-1867). A house here, dating from 1635, is one of the oldest buildings in New England. — At (103 M.) Saybrook (Sea Shore Hotel, 2 M. from the station, $21/2), near the mouth of the Connecticut River, we intersect the Conn. Valley Division, which begins at Fenwick, 2 M. to the S., and runs to Middletown, etc. (see p. 70). Beyond Saybrook we cross the wide Connecticut.

124 M. New London (Crocker House, $21/2-31/2; Fort Griswold Ho.), across the river, $31/2-41/2, a small city on the right bank of the Thames, with 13,757 inhab, and an excellent harbour, defended by Fort Trumbull (seen from the station) and Fort Griswold (on the other side of the river). There is a Soldiers' & Sailors' Monument in front of the station. Just above the town is a small U. S. Navy Yard. Whaling and sealing are carried on, though by no means on the same scale as of old. The Yale and Harvard boat-race is decided here in June or July, and several other colleges have boat-houses on the Thames. The Public Library is handsome.

The Oeisk (134 ft. high), which stands out so prominently on the Groton Heights, on the E. bank of the river (ferry 4c.), was erected to commemorate the burning of the town by Arnold and the massacre of Fort Griswold on Sept. 6th, 1781 (*View from the top; adm. 10c.). — At the mouth of the Thames, 3 M. from New London, is the Pequot House ($3-4), a favourite resort (steamer from New London). — Steamers also ply from New London to White Beach, Newport (p. 76), Block Island (see below), Norwich (p. 75), Sag Harbor (p. 64), New York, etc.

Block Island (Ocean View, $31/2-5; Spring Ho., $31/2; Manisses, National, $21/2-31/2; Eureka, $2-3, etc.), an island 8 M. long and 2-4 M. broad, situated 10 M. from the coast of Rhode Island, is a much-frequented summer-resort (mean summer temp. 73°). It is also reached by steamer from New York direct and from Providence and Newport (comp. p. 76).

From New London to Brattleboro, 121 M., New London Northern R.R. (a branch of the Central Vermont R.R.) in 5 hrs. — 13 M. Norwich, see p. 75; 30 M. Willimantic (p. 70); 65 M. Palmer. — 85 M. Amherst (Amherst Ho., $21/2), with 4000 inhab., is chiefly interesting as the site of Amherst College, one of the leading educational institutions of New England (founded in 1821; 400 students). Among the chief buildings of the college are the Memorial Chapel, the Walker Hall, the Library (70,000 vols.), and the Gymnasium. Its collections of Assyrian sculptures, minerals, casts,
72 Route 4. PROVIDENCE. From New York

and ancient tracks in stone are of great importance. Amherst was the home of the poetess Emily Dickinson (1830-86). - 100 M. Miller Falls (p. 148); 109 M. Northfield (The Northfield, § 2-3), the home of the evangelist Dwight L. Moody, with permanent schools and annual religious conferences; 111 M. South Vernon (p. 157). - 121 M. Brattleboro, see p. 157.

We now cross the Thames by a huge swing-bridge (view), to (127 M.) Groton (p. 71). - 135 M. Stonington (Columbia, $2), a quiet town with 7184 inhab., is the terminus of the 'Stonington Line' of steamers from New York (see p. 74).

Steamers ply daily from Stonington to (4 M.) Watch Hill and Fisher's Island. - Watch Hill (Watch Hill Ho., Ocean, Larkin, $4; Plympton, Atlantic, Columbia, $3) is a sea-bathing place at the S.W. extremity of Rhode Island (comp. below), commanding fine views. - Fisher's Island (Munnatawket Hotel, $31/2; boarding-houses) is a long narrow island, close to the shore, frequented for bathing and fishing.

Beyond Stonington the train turns inland and enters Rhode Island, the smallest state in the Union ('Little Rhody'; 50 M. by 40 M.), but first in the proportion of manufactures to population. We cross the Pawcatuck and reach (144 M.) Westerly (Dixon Ho., $21/2-3), whence steamers ply to Watch Hill (see above). Between (155 M.) Carolina and Kingston the train passes through the famous Cedar Swamp (Narragansett Fort), where King Philip and his Indians were almost annihilated in Dec., 1675. - 161 M. Kingston, the junction of a line to (9 M.) Narragansett Pier.

Narragansett Pier (Gladstone, Rockingham, $4-6; Matheuson, Columbus, Green's Inn, $3-5; Atwood, Revere, $4; Tower Hill, on Narragansett Heights, $2-3; Atlantic, Massasoit, Metattoxet, $21/2-4; Arlington, $2-4, and many others; also Lodging and Boarding Houses), second only to Newport among the Rhode Island seaside-resorts, has a splendid beach and good opportunities for boating, fishing, and driving. Good views are obtained from Narragansett Heights (200 ft.) and the top of Hazard's Castle (165 ft.). Among the other attractions is a large Casino. The rocks are fine both in form and colour. Point Judith (p. 75) lies 5 M. to the S., and at Hammond's Mills, 7 M. to the N., is the house in which Gilbert Stuart (p. lxxxiii) was born in 1755. Commodore Perry (1785-1819; p. 77) was a native of Narragansett. Steamers ply daily to Newport (p. 76) and Providence (see below).

168 M. Wickford Junction, for (3 M.) Wickford, whence steamers ply daily to Newport (comp. p. 76).

188 M. Providence. - Hotels: NARRAGANSETT, cor. Broad St. and Dorrance St., $3-6; DORRANCE, Westminster St., R. from $1; NEWMAN, Aborn St., R. from $1. - Electric Tramways through the chief streets. - Steamers to New York, Newport, Mount Hope, Block Island, etc. - British Vice-Consul, Mr. George A. Stockwell.

Providence, one of the capitals of Rhode Island and the second city in New England, with (1890) 132,146 inhab., is pleasantly situated on Providence River (the N. arm of Narragansett Bay), at the influx of the Seekonk River.

Providence was founded by Roger Williams in 1636, after his expulsion from Massachusetts. It carries on important manufactures of cotton and woollen goods, steam-engines (Corliss Co.), silver-plate (Gorham Co.), jewellery, iron, etc. (total value, in 1890, $73,000,000 or 14,600,000l.).

Near the large new Union Railway Station, in the centre of the town, completed in 1897, stands the handsome City Hall, with a
medallion of Roger Williams on the façade (*View from the tower). In front is a Soldiers' & Sailors' Monument, and facing this, at the other end of Exchange Place, is a Statue of General Burnside (1824-81). Westminster Street, the chief business-thoroughfare, runs hence towards the S.W., and from it an Arcade, 225 ft. long, leads to the left to Weybossett St. — A little to the N. of the station stands the new *State House, a huge Renaissance structure of Georgia marble and pink granite, finished in 1898, and surmounted by a dome. Among the other prominent buildings are the Post Office, the Roman Catholic Cathedral, and the Rhode Island Hospital. The handsome Public Library, opened in 1898, occupies the block bounded by Washington, Greene, and Fountain Sts. — The most interesting part of the town, however, lies on the E. side of the Providence River, reached by a bridge near the Union Depot. Just beyond the bridge, at the corner of College St. and Benefit St., is the County Court House, next to which is the Athenaeum, containing a library of 60,000 vols. and some interesting portraits (one by Sir Joshua Reynolds) and a small painting on ivory by Malbone ('The Hours').

About ¾ M. up the hill (cable-car on College St.) are the buildings of Brown University, founded in 1764, in a campus shaded with fine old elms (700 students). University Hall, the oldest part, dates from 1770. Some of the new buildings are handsome. The Ladd Observatory stands on Tip-Top Hill. To the N., at the corner of Waterman St. and Prospect St., is the University Library (90,000 vols.), and next to it is the hall of the Rhode Island Historical Society, with interesting relics. Hard by, in Meeting St., is the Brown Women's College, with 150 students. — Prospect Hill Terrace, near the University, commands a fine *View of Providence.

Among the interesting old buildings in Providence are the Friends' Meeting House (1759); the Ives House, at the corner of Brown St. and Power St., near the University, with an interesting portico; the Tillinghast House (1710); the Hopkins House (1750); the John Brown House, Power St., cor. of Benefit St., a fine example of its date (1786); the Whipple House, Abbott St. (ca. 1660); and the Betsy Williams House (1775), Roger Williams Park.

At the S. end of the town is the Roger Williams Park, containing a statue of Roger Williams (1607-83). On the Seekonk River, near the E. end of Power St., enclosed by a railing, is the What Cheer Rock, the first landing-place of Roger Williams.

Among the pleasant points in the environs of Providence are Cranston, 4 M. to the S.W., with the Narragansett Trotting Park; Mount Hope, seat of King Philip, near (14 M.) Bristol, on the E. shore of Narragansett Bay; Hunt's Mill (5 M.); Pawtucket, Silver Spring (clam-bakes), Rocky Point (clam-bakes), and other places on Narragansett Bay. — The sail down *Narragansett Bay to Newport (there and back 7½ c.) is very attractive (comp. p. 80).

From Providence to Worcester, 43½ M., railway in 1¼-1½ hr. — This line ascends the pretty industrial valley of the Blackstone. At (7 M.) Lonsdale are the grave and monument of William Blaxton (see p. 83; to the right). 16 M. Woonsocket (pop. 20,830). — 43½ M. Worcester, see p. 68.
From Providence to Boston we follow the 'Old Colony Division' of the N. Y. N.H. & H. R.R. 193 M. Pawtucket, a city with 27,633 inhab., and large thread and other mills, was the place where cotton-manufacturing was introduced into the United States by Samuel Slater in 1790. The Slater Mill is still standing. — 201 M. Attleboro, in Massachusetts, with manufactories of plate and jewellery; 208 M. Mansfield; 2181/2 M. Canton Junction. — 223 M. Readville (p. 70), with its well-known trotting-track, is the nearest station for an ascent of Great Blue Hill (650 ft.), the highest of the Milton Hills (p. 97; fine view), now part of a State Reservation of 4230 acres. At the top is an observatory, well known to the scientific world. — The train approaches Boston (Park Square Station) through (224 M.) Hyde Park and the suburbs of Jamaica Plain and Roxbury.

232 M. Boston, see R. 5.

d. By Steamboat.

1. Steamboat to Newport and Fall River in 10-11 hrs. (Pier 19, N. River, foot of Warren St.); Railway thence to Boston in 1 1/3 hr. (through-fare $4; state-room $1-2).

2. Steamboat to Stonington in 8-10 hrs. (Pier 36, N. River) and Railway thence to Boston in 2 1/4-3 3/4 hrs. (fares as above). Passengers need not leave their state-rooms at Stonington till 7 a.m.

3. Steamboat to New London ('Norwich Line') in 10-12 hrs. (Pier 40, N. River) and Railway thence to Boston in 4-5 hrs. (fares as above).

4. Steamboat to Providence in 10-12 hrs. (Pier 36, N. River; in summer only) and Railway thence to Boston in 1 1/4 hr. (fares as above).

The steamers on all these lines are well fitted up and contain good restaurants, etc.; those of the Fall River Line ('Priscilla', 'Puritan', 'Plymouth', 'Pilgrim', and 'Providence') are especially large and luxurious (comp. p. 7). All run at night, leaving New York about 5 or 6 p.m., and all proceed through Long Island Sound, so that one general description suffices. Each line runs directly to its terminus, without intermediate stops. Cabin-berths are included in the fares on all night-steamers, but state-rooms are extra. Fares are reduced 25 per cent, in winter. The trains in connection are timed to reach Boston about 6-9 a.m. The hours in the reverse direction are similar.

The steamers of all the lines start in the North River (p. 24) and proceed round the Battery (p. 26), affording fine views of the city and harbour. To the right lie Ellis, Liberty, and Governor's Islands (p. 3). Passing the last, we bend to the N., enter the East River (p. 24), and pass under the stupendous *Brooklyn Bridge (p. 31), which is seen to great advantage from the steamer's deck. Beyond the bridge, to the right, opens Wallabout Bay, with the U. S. Navy Yard (p. 60). On both sides are wharves crowded with shipping. Farther up we pass between Blackwell's Island (p. 55) and Long Island City (p. 61), and then thread Hell Gate (p. 55), with Ward's Island and Randall's Island (p. 55) to the left.

We now leave the East River and enter Long Island Sound, which extends for a distance of 115 M. between Long Island (see p. 61) on the right and the coasts of New York and Connecticut on the left. Its width varies from 3 M. to 30 M. As we enter the
Sound, we pass Barrien's Island, the Brothers, and Riker's Island. To the right is Flushing Bay, with the town of Flushing (p. 64). The steamer threads a narrow channel, passes Throgs's Neck (with Fort Schuyler; to the left), and enters a wider part of the Sound. Little Neck Bay, to the right, is famous for its clams. Among the islands which conceal the mainland-coast here are City Island, Hart's Island (with the paupers' cemetery of New York), and Hunter's Island. Glen Island, near New Rochelle (p. 64), is a favourite picnic-resort (see p. 22). On Sand's Point, to the right, is a lighthouse (revolving white light). Among the chief points on the mainland farther on are Greenwich (p. 65), Norwalk (p. 65), Bridgeport (p. 65), New Haven (p. 65), and Saybrook (p. 71), at the mouth of the Connecticut River. The lights passed are Captain's Island (fixed white), Stratford Lightship (flash white), Falkner's Island (revolving white), and Cornfield Lightship (fixed red), to the left; and Eaton's Neck (fixed white), Plum Island (revolving white), and Little Gull Island (fixed white), to the right. We are here about 7 hrs. out from New York. The Norwich Steamer now heads for shore, enters the Thames, and stops at New London (p. 71), where passengers disembark and proceed by train to Boston (see below).

From New London to Boston, 108 M., railway in 4-5 hrs. The train follows the bank of the Thames (view to the right). S M. MASSAPEAG.
13 M. Norwich (Wauweagan Ho., § 2-2 1/2; Buckingham, § 2), an attractive manufacturing city with 16,156 inhab., pleasantly situated between the Yantic and Shetucket, which here unite to form the Thames. Among its chief buildings are the Court House, the Free Academy, and St. Patrick's Cathedral. The Slater Memorial contains a fine collection of drawings and photographs of masterpieces of art, casts, a library, etc. The old Indian Cemetery, in Sachem St., has been the burial-ground of the Mohicans or Mohégans from time immemorial, and contains an obelisk to their famous chief Uncas (d. 1683). On Sachem's Plain, near Greenville (1 3/4-2 M. from Norwich), another monument marks the spot where Uncas captured and executed Miantonomoh, Sachem of the Narragansetts (1643). About 5 M. to the S. of Norwich is Mohegan, with a handful of half-breeds who represent the 'last of the Mohicans'. Steamers run from Norwich to New York (twice weekly), Watch Hill (p. 72), Block Island (p. 71), Fisher's Island (p. 72), and other points.

At Norwich our line diverges to the right from the Central Vermont R. R., which runs to Brattleboro, etc. (comp. p. 71), 14 1/2 M. Greeneville (see above). At (29 M.) Plainfield we intersect the Providence division of the N. E. R. R. About 4 M. to the W. of (35 M.) Danbctison is Brooklyn, the home of General Israel Putnam (see p. 108). At (47 M.) Putnam (p. 70) we join the main line of the N. E. R. R. Hence to (108 M.) Boston, see R. 4b.

The Stonington Steamer passes the mouth of the Thames, runs inside Fisher's Island (p. 72), and reaches its landing-place at Stonington (see p. 72), while the Fall River and Providence steamers keep on their course outside of Fisher's Island.

From Stonington to Boston (94 M., in 2 3/4-3 3/4 hrs.), see R. 4c.

We now pass out of Long Island Sound, Montauk Point (p. 64) lying nearly due S. To the left, beyond Fisher's Island, is Watch Hill (p. 72; fixed white light), while Block Island (p. 71; light) lies off to the right as we begin to bend towards the N. The revolving white light of Point Judith, 5 M. to the S. of Narragansett Pier (p. 72), next shows ahead, to the left; and in rounding this head-
land, if anywhere, we may experience a little rough weather. Passing Narragansett Pier (p. 72; left), we keep to the right of the Beaver Tail Light (fixed white), on Conanicut Island (p. 80), steer between Goat Island (with Fort Wolfcott; left) and the mainland (Fort Adams; right), and enter Newport harbour.

**Newport.** — Hotels. Ocean House, burned down in 1898; New Cliffs Hotel, with view of the sea, from $4 1/2; Aquidneck House, Pelham St., $2 1/2-3/2. Few of the hotels of Newport compare favourably with those of other large watering-places, as the fashionable visitors reside almost entirely in the so-called 'cottages' or in boarding houses, such as the Muenchinger King Cottage (fashionable and expensive; from $5 a day), the Club Cottage, Robinson's, and Kingsley's.

**Electric Tramways** run from Commercial Wharf and Broadway to Easton's Beach (5 c.); also to Morton Park and 'One Mile Corner', connecting with line to Stone Bridge and Fall River. Public Brakes or 'Barges' run from Washington Sq. (also from rail. stat. and wharves) along Bellevue Ave. to Bailey's Beach (10 c.); also from Bailey's Beach round the Ocean Drive (50 c. each). Hack (bargaining advisable) about $1 per hr.; round the Ocean Drive (1-4 pers.) $3-5; from wharf or station to the hotels 50 c. (1-2 pers.). Hotel Omnibus 50 c.

**Bathing.** The use of bathing-cabin and costume at First or Easton's Beach costs 25 c. Full costume obligatory. The popular hour is 11-12.

**Boats** may be hired at Kingsley's, Long, and Spring Wharves. Newport is a favourite port for Yachts and Yacht Racing.

Steamboats ply frequently to Block Island, Conanicut Island, Narragansett Pier, Providence, Wickford, etc., starting from the Commercial Wharf. The New York steamer starts at the Old Colony Wharf.

Railway Station (for Boston, etc.), West Marlborough St., below Washington Sq. Another route to Boston (and also to New York) is by steamer to Wickford and thence by rail via Wickford Junction and the Shore Line (comp. p. 72).

Casino, Bellevue Ave. Concerts 11 a.m. to 1.30 p.m. (50 c.), and on Sun. 8-10 p.m. (25 c.); music and dancing on Mon. & Frid. 9.30 a.m. to 11.30 p.m. ($1); adm. at other times 25 c. — The Harbour Fête, generally held in Aug., is attended by a brilliant illumination of the town, waterfront, and shipping.

**Principal Attractions.** Those who have but one day to spend at Newport should make their way to the First Beach (p. 73), via Town Park and the Old Mill (p. 77); walk hence by the Cliff Walk (p. 78) to Bailey's Beach (p. 79); and then take the Ocean or Ten Mile Drive (p. 75). Other interesting points are Purgatory (p. 78), the Hanging Rocks (p. 73), and Second Beach (p. 78).

Newport, the undisputed 'Queen of American Seaside Resorts', occupies a low plateau near the S.W. extremity of Rhode Island (see p. 80), rising from a fine harbour which opens on the E. side of Narragansett Bay. It is one of the two capitals of the State of Rhode Island (comp. p. 72) and contains (1890) 19,457 inhabitants. This population is, however, very largely increased in summer (June-Sept.), when visitors flock to the town from all parts of the United States, taking up their abode for the most part in the luxurious country-houses and private villas known here as 'cottages'. The older part of the town adjoins the harbour, but the new and fashionable quarters lie higher up and farther back, extending across to the ocean side of the narrow island.

The chief reason of Newport's popularity is said to be its balmy and equable climate, but the natural beauty of its cliffs and surroundings
would alone justify its reputation. The fashionable people of the whole N.E. part of the United States spend the early months of summer here as regularly as they pass the later amid the Berkshire Hills (p. 450).

Newport was settled in 1639 by William Coddington and other dissenters from the Puritan church of Massachusetts, and a century later had about 5000 inhabitants. In 1770 Newport was surpassed by Boston only in the extent of its trade, which was considerably greater than that of New York. About this time a visitor to New York wrote back to the "Newport Mercury" that at its present rate of progress New York would soon be as large as Newport. It suffered greatly during the Revolution, however, and never recovered its commercial importance, so that in 1870 its population was no larger than in 1770. During part of the Revolutionary struggle Newport was occupied by the French allies of the Americans, who were so favourably impressed with Rhode Island, that they sought to have it ceded to France. Wm. Ellery Channing (1780-1842) was a native of Newport, and Bishop Berkeley (1694-1753) lived here from 1729 to 1731 (see p. 78).

The central point of Old Newport is WASHINGTON SQUARE or the PARADE, within a few minutes' walk of the railway-station and steamboat-wharf. Here are the State House (1738-43; with portrait of Washington, by Stuart), the City Hall, a Statue of Commodore O. H. Perry (1785-1819), the hero of Lake Erie (p. 294), the Perry Mansion, and the Roman Catholic Church (with an Ionic portico).

Following Touro St. to the E., we pass (left) the Synagogue (1762; said to be the oldest in the United States), the Newport Historical Society (10-4; interesting relics), and (5 min.) the picturesque Hebrew Cemetery. Touro St. ends here and BELLEVUE AVENUE, the fashionable promenade, begins, running to the S. (right). To the right is the Newport Reading Room. A little farther on, to the left, is the Redwood Library (1748), a Doric building, containing 40,000 vols. and some sculptures and paintings (open 12-2). The fine Fern-leaf Beech, at the corner of Bellevue Ave. and Redwood St., should be noticed. Nearly opposite this is TOURO PARK, given to the town by Judah Touro (1775-1854), one of the numerous wealthy Hebrews who at one time lived in Newport. In this park stands one of the most interesting relics of Newport, the *Round Tower or Old Stone Mill, the origin of which is still somewhat of a mystery, though the inferential evidence is pretty strong that it was built by Gov. Arnold in the 17th cent. and not by the Norsemen in the 11th. Arnold certainly describes it in his will as "my stone-built wind-mill", and there is no doubt that it was used in this capacity, though Longfellow treats it more respectfully in his "Skeleton in Armor". The park also contains statues of M. C. Perry (1794-1858) and W. E. Channing (see above; erected in 1893); and on its S. side stands the Channing Memorial Church.

A few hundred paces farther on, Bath Road (electric tramway) leads to the left from Bellevue Ave. to the (10 min.) First Beach.

Bellevue Avenue soon passes the Casino (left), a long, low, many-gabled building, containing a club (introduction necessary), a theatre, etc. (concerts, see p. 76). The Lawn Tennis Championship of America is decided in the courts attached to the Casino (Aug.). A little farther on, on the same side, stood the Ocean House (p. 76). The avenue then passes between a series of magnificent villas (see New York Book Co.'s Plan of Newport, 25 c.), among which the white marble house and wall, built by
Mr. W. K. Vanderbilt but now owned by Mrs. O. H. P. Belmont, are conspicuous to the left (about 1 M. farther on). The avenue then turns sharply to the right and ends at Bailey's Beach (p. 79).

**First or Easton's Beach**, a strip of smooth hard sand, 3/4 M. long, affords some of the best and safest surf-bathing on the Atlantic coast. Besides the bathing-houses (see p. 76) there is a handsome pavilion, containing a restaurant and hot and cold baths. Behind the beach lies Easton's Pond, and at its farther (E.) end is a group of cottages. **Easton's Point**, forming the E. barrier of the beach, affords an excellent view of Newport.

From the E. end of the beach a road leads round Easton's Point to (3/4-1 M.) *Purgatory*, a curious fissure in the conglomerate rocks, 150 ft. long, 7-14 ft. wide, and 50 ft. deep, resembling the so-called Chasms, near Manorbier in S. Wales (see Baedeker's Great Britain). Numerous legends attach to it, one relating how a youth leaped it at the challenge of his lady-love and then renounced her in the spirit of the hero of 'The Glove' by Schiller: 'Not love it is, but vanity, sets love a task like that'. Just beyond Purgatory is Sachuest or Second Beach, where the surf is much heavier than at Easton's Beach. To the N. of Sachuest Beach is Paradise Valley, with the picturesque Paradise Rocks, ending in the Hanging Rocks, below which Bishop (then Dean) Berkeley was wont to sit. Here, it is said, he composed his 'Alciphron, or the Minute Philosopher', and also the lyric containing the much-quoted verse:

'Westward the course of empire takes its way,
'The first four acts already past,
'A fifth shall end the drama with the day,
'Time's noblest offspring is the last.'

Bishop Berkeley's residence (Whitehall), in Berkeley Ave., to the N. of Paradise Road, is not far off. Money is now being raised to preserve it. Those who have come thus far by carriage (the road passes near the beaches) may continue along Indian Avenue to Bootheden, once the residence of Edwin Booth.

At the W. end of Easton's Beach begins the famous *Cliff Walk*, which runs along the winding brow of the cliffs for about 3 M., with the ocean on one side and the smooth lawns of the handsomest 'cottages' in the town on the other (fine views). No fences intervene between the walk and the cottage-grounds. Passing two groups of smaller cottages, clustered round a central hotel (New Cliffs Hotel), we pass a vacant lot and reach the finely kept enclosure of Mrs. Gammell's Heirs, containing four villas. At the end of it are the 'Forty Steps', descending to the rocks, with an outlook platform commanding a fine *View* (to the E., Easton's Point, Sachuest Point, and West Island in the distance; below, to the right, Ellison's Rocks). Crossing Narragansett Avenue, which leads from this point to Bellevue Ave. (p. 77), we enter the Robert Goelet Place, which contains one pretty villa and one somewhat pretentious mansion. A little farther on we pass the *Twombly-Lorillard-Wolfe Cottage*, a long many-gabled red building, in which the low rambling style of architecture developed in the Newport cottage is seen to great advantage. The next house is that of Mr. Cornelius Vanderbilt, an imposing structure rebuilt in 1895, with its rustic summer-house on Ochre Point, where we turn to the right (W.). Farther on we cross Marine Avenue, and enter the grounds of Mr. Perry Belmont, ad-
to Boston.

NEWPORT. 4. Route. 79

joining which lay the enclosed rose-garden of the late George Ban-
croft (1800-1891), the historian. Beyond the red villa of Mr.
J. J. Astor we pass the white marble palace built by Mr. William
K. Vanderbilt (see pp. 77, 78), a magnificent dwelling, but hardly in
keeping with the genius loci. Passing Sheep Point, the path descends
to a lower level. Opposite the picturesque stone house of Mr. F. W.
Vanderbilt we cross a small rocky bridge. To the left is Rough
Point. We then cross the Ledge Road, leading from Bellevue Ave.
to the Land's End, off which lies Coggeshall's Ledge. Crossing the
hill, we finally reach Bailey's Beach, a small bay with a long row
of bathing-houses, which has of late years become the most fashion-
able bathing-resort of the Newport cottagers.

From Bailey's Beach we either return to town by one of the 'barges'
running along Bellevue Ave. (p. 76), or we may begin the beautiful
Ocean Drive, which skirts the coast of the peninsula to the S. of
the town for about 10 M., commanding magnificent views (2-2½ hrs.;
comp. p. 76). Ocean Avenue, forming the first part of the drive,
begins at Bellevue Ave. and runs to the W. past Bailey's Beach.
To the left, at the W. arm of the beach, is the Spouting Rock,
where the water, after a storm, rushes through an opening in the
rock and is forced to a height of 40-50 ft. At Lily Pond we turn to
the left (S). Looking over the bay to the left, we see Gooseberry
Island, with the house of the Newport Fishing Club. We now cross
a bridge over a small inlet and see to the left, on Price's Neck, the
United States Life-Saving Station. At Brenton's Point (View) the
road turns to the right and runs towards the N., soon passing Castle
Hill, the residence of Alex. Agassiz. We then turn again to the
right, with the ocean behind us, and soon turn to the left into
Harrison Avenue or the Fort Road. To the right lie the Golf Links
and Club House. On the point to the left, projecting into Narragansett Bay, stands Fort Adams (see below), and ahead of us lies
Newport Harbour. On a rocky islet to the left, a little farther on,
is the Lime Rock Lighthouse, in charge of Ida Lewis, the 'Grace
Darling' of America. Turning again towards the bay, we follow the
road skirting the harbour, and regain the Parade (p. 77) through
Thames Street, the chief business-street of the old town.

The so-called 'Neck', embracing the district between the Ocean Drive and
the harbour, has been laid out in numerous winding drives. — Among
other points of interest in or near Newport may be mentioned Trinity
Church, in Church St., dating from 1725 and often preached in by Bp.
Berkeley (with old square pews, etc.); the First Baptist Church, in Spring St.
(1844); Vernon House (tablet), cor. Clarke St. and Mary St., headquarters
of Count Rochambeau, the French commandant in 1780; the Sayer or Ban-
nister House (tablet), the headquarters of Gen. Prescott, the commander of
the British army of occupation in 1777; the U. S. Naval Training Station
and War College, on Coaster Harbor Island (3 p.m. till sunset); Clayne
House, a boys' school on the mainland, opposite Coaster Harbor Island,
with many rare trees in its grounds; the new Naval Hospital, opened in
1876; Fort Adams (fine view), near Brenton's Cove, 3 M. from the town by
road, but easily reached by boat across the harbour, with room for a
garrison of 3000 men (guard-mount and dress-parade at 9 a.m. daily, ex-
except Sun.; battalion drill, Wed. 4-5; band-practice, Mon., Wed., & Frid. at 3 p.m.; Fort Wollcott, with the U. S. Torpedo Station, on Goat Island (no admission); Morton Park, at the S. end of Thames St.; and Miantonomoh Hill (view), on the N. side of the city (1/2 M.; at the end of Malbone Road). — The steamer to Wickford (see p. 72; 12 M., in 1 hr.) passes between Conanicut Island to the left and the islands of Prudence, Hope, and Despair to the right. Jamestown (Gardiner Ho.; Thorndike; Bay View Ho., $21/2), on Conanicut, is a growing summer-resort; the headland nearest Newport, known as the Dampplings, is crowned with a ruined fort. From Wickford to Boston (21/2-3 hrs.) and to New York (5-8 hrs.), see p. 72. Fall River (see below) is 18 M. from Newport by railway.

Rhode Island, the Indian Aquidneck ('Isle of Peace'), which was bought from the Indians in 1639, is about 15 M. long and 3-4 M. wide, with a population of 22,560. Its present name, which is supposed to have been given to it from a fancied resemblance to the Isle of Rhodes, has been extended to the whole state (its full official title, however, being Rhode Island and Providence Plantations), far the larger portion of which is on the mainland. It is fertile and well farmed, and much of its surface is picturesque. The island is connected with the mainland by a railway bridge and an ordinary road-bridge.

Leaving Newport, the Fall River steamer steers between Prudence Island (see above) and Rhode Island, and enters Mt. Hope Bay, opening off the N.E. corner of Narragansett Bay. On the peninsula to the left lies Bristol, connected by rail with Providence (comp. p. 73). In 1 hr. we reach Fall River (Mellen Ho., $2 1/2-5; Wilbur Ho., $2), which lies to the right. The river to which it owes its name rises a little to the E. and falls about 140 ft. in 1/2 M., affording admirable water-power to the mills which make the town one of the chief cotton-manufacturing places in New England. Total value of industrial products in 1890, $31,335,000 (four-fifths cotton goods). Pop. (1890) 74,398. Passengers for Boston here disembark and finish their journey by railway.

From Fall River to Boston, 51 M., railway in 11/2-1 3/4 hr. — The train skirts the E. side of Mt. Hope Bay and then crosses it to (6 M.) Somerset. 13 M. Taunton (City Hotel, $2 1/2-3), an industrial town with 25,443 inhab., is the junction of several local lines. 32 M. Stoughton Junction; 40 M. South Braintree, junction of a line to Plymouth (see p. 97). At Brookdale Farm, near (41 M.) Braintree, is the establishment of the New England Kennel Club, with many fine dogs. — 43 M. Quincy, a thriving suburban city (16,723 inhab.), famous as the home of the Adams and Quincy families. The first railroad in the United States was constructed in 1826 to carry granite from the large quarries of Quincy to (4 M.) the nearest tide-water. — Beyond (45 1/2 M.) Atlantic the train crosses the Neponset River and various arms of Boston Harbour, traverses Dorchester and South Boston, crosses the Fort Point Channel, and enters the Southern Union Station at (51 M.) Boston (p. 81). — Trains also run from Fall River to (54 M.) Boston via (20 M.) Middleboro and (27 M.) Bridgewater (p. 100), connecting with the above-mentioned line at South Braintree. — The express-trains running in connection with the steamers diverge from the above line at Taunton and run to Boston (Park Sq. Station; p. 81) via Mansfield (p. 74).

From Fall River to New Bedford (p. 100), 14 M., railway in 35 min.

The Providence Steamer, on entering Narragansett Bay, steers to the left of Beaver Tail Light and Conanicut Island (see above), rounds Warwick Neck, and proceeds through the beautiful Narragansett Bay to Providence (p. 72). From Providence to Boston by railway (45 M., in 11/4 hr.), see p. 74.
5. Boston.

Railway Stations. 1. Southern Union Station (Pl. D, 3, 4; restaurant), bounded by Atlantic Ave., Summer St., Beach St., and the harbour, the largest railway-station in the world (810 ft. long and 700 ft. wide; area \(11\frac{1}{2}\) acres; greatest single span of roof 228 ft.), completed in 1898 at a cost of $14,000,000. It contains 28 tracks on the main floor (used by the New York, New Haven, & Hartford, and the Boston & Albany railways) and a four-track loop for suburban service on the lower floor. — 2, Northern Union Station (Pl. B, 2), Causeway St., another huge building with a frontage of 370 ft., used by the Boston & Maine and Fitchburg railways. — 3, Providence or Park Square Station (Pl. C, 4, 5; restaurant), at the head of Columbus Ave., for the Providence Division of the N.Y., N.H. & H. R. R. — 4, Boston, Revere Beach, & Lynn (Pl. D, 3), Atlantic Ave.

Hotels. *Touraine* (Pl. t; C, 4), at the cor. of Tremont and Boylston Sts., a large and sumptuously equipped house, with internal decorations in the style of the Château de Blois, a handsome library with 4000 well-chosen volumes, a view over the Common, and a telephone in every room; R. from $2 (without bath) or $3 (with bath), meals à la carte. — *Ven

dome* (Pl. a; B, 5), cor. of Commonwealth Ave. and Dartmouth St., from $5; *Brunswick* (Pl. b; B, 5), cor. of Boylston and Clarendon Sts., from $5, R. from $2; *Victoria* (Pl. c; B, 5), at the cor. of Dartmouth and Newbury Sts., R. from $2, these three in the pleasantest part of the city. *Parker House* (Pl. d; C, 3), School St., R. from $1; *Young's* (Pl. e; C, 3), Court St., near the head of State St., R. from $1; *Adams House* (Pl. f; C, 4), 553 Washington St., R. from $1; *United States* (Pl. h; D, 4), near the Southern Union Station, $2 1/2, R. from $1; *Thorndike* (Pl. i; C, 4), Boylston St., opposite the Public Garden, R. from $1 1/2; *Copley Square Hotel* (Pl. k; B, 5), $3 1/2-7, R. from $1 1/2; *Revere House* (Pl. j; C, 3), Bowdoin Sq., R. from $1; *Bellevue* (Pl. m; C, 3), Beacon St., a good family hotel, R. from $1; *American House* (Pl. n; C, 3), Hanover Sq., R. from $1; *Quincy House* (Pl. o; C, 3), Brattle Sq., $3-5, R. from $1; *Langham* (Pl. p; C, 7), 1679 Washington St., at the S. End, $2 1/2, R. from $1; *Reynolds* (Pl. q; C, 4), 623 Washington St.; *Boston Tavern* (Pl. r; C, 3); *Savoy*, 599 Washington St.; *Clare's*, 577 Washington St.; *Crawford House*, Scolly's, these five commercial houses, R. from $1; *Maverick*, 23 Maverick Sq., E. Boston, E.P. — *Boarding Houses* are numerous and comfortable, especially on Beacon Hill (Pinckney St., Mt. Vernon St., etc.) and in Columbus Ave. and other streets at the S. End; rates from $7 a week. *Furnished Apartments* are also easily obtained, from $4 a week. Ladies may hear of good boarding and lodging houses at the Women's Educational & Industrial Union, 264 Boylston St.

Restaurants. At the *Touraine* (orchestra from 6 to 8 and 10 to 12 p.m.), *Parker House*, *Young's*, the *Adams House*, the *Thorndike*, the *Victoria*, the *United States* (meals 75 c.), the *Bellevue*, the *Reynolds*, and most of the other hotels mentioned above; *Winter Place Hotel*, Winter Place, off Winter St., good cuisine; *Dooling*, 157 Tremont St.; *Mieusset*, 836 Washington St.; D. 75 c.; *Martins*, 11 Bosworth St., D. with wine 75 c.; *Damiano*, 11 Avery St., D. 50 c.; *Vercelli*, 10 Hayward Place, these two Italian; *The Moulton*, 24 Summer St.; *McDonald*, 132 Tremont St. (frequented by ladies); *Boston Tavern* (see above), for men; *German Café*, in the basement of the Hôtel Touraine, much frequented after the theatre; *Old Elm*, Tremont St., a characteristic German resort, with good beer; *Marston's*, 23 Brattle St.; restaurants at the *Providence* (upstairs room) and other railway-stations; *Thompson's Spa* (luncheon counter), 219 Washington St.; *Luncheon Room* at the Women's Educational Union, 264 Boylston St.; *Afternoon Tea Room*, 360 Boylston St. — *Huyler's*, 146 Tremont St., for ices, etc.

Baedeker's United States. 2nd Edit.
Mt. Desert, Provincetown, Plymouth, Isles of Shoals, Nahant (from Battery Wharf), Revere Beach, Gloucester, etc. (wharves on the W. side of the harbour). Steamers also run from Rowe's Wharf (Pl. D, 2) to Nantasket Beach, Hull,ingham, and other points in Boston Harbour. — Ferries ply to Chelsea (3 c.) and East Boston (1 c.; see Map).

Tramways (nearly all electric) traverse the principal streets and run to the various suburbs (fare 5 c., transfers 8 c.). The system is an excellent one as far as outlying points are concerned, and the construction of the Subway (see p. 83) has done much to relieve the congestion of cars in the main business-streets of Boston. The electric cars stop only at points indicated by a white band on the posts. — Carriages. Per drive within the city proper, each pers., Hacks 50 c., Herdies and other Cubs 25 c.; from points S. of Dover St. or W. of Berkeley St. to points N. of State, Court, and Cambridge Sts., 1 pers. $1, each pers. addit. 50 c. (herdies 50 c., 25 c.); longer distances in proportion. Double fares from midnight till 6 a.m. Ordinary luggage free. Fare per hour $1-$13/2, with two horses $13/4-2$.

Places of Amusement. Tremoni Theatre (Pl. C, 4); Boston Theatre (Pl. C, 4), the largest in New England; Boston Museum (Pl. C, 3), the oldest theatre in the city; Hollis Street Theatre (Pl. C, 4); Columbia Theatre (Pl. 7; D, 5); Park Theatre (Pl. C, 4); Castle Square Theatre (Pl. C, 5), with good performances of plays and English opera at a uniform price of 25 c. or 30 c.; Grand Opera House (Pl. 11; D, 5), Washington St.; Bowdoin Square Theatre (Pl. 8; C, 3); Keith's Theatre (Pl. C, 4), with a continuous variety performance (prices 25 c. to $13/2); Bijou (Pl. C, 4); Dudley Street Opera House, 113 Dudley St.; Howard Athenaeum (Pl. C, 3), Palace Theatre (Pl. 16; C, 3), Lyceum, variety performances at low prices; Turnhalle (Pl. C, 5), 29 Middlesex St. (occasional performances in German); Italian Theatre, North St. — The celebrated Boston Symphony Concerts are held in the Music Hall (Pl. C, 3; Frid. afternoon and Sat. ev'g. in winter). Other good concerts are given in the same hall and in Steinway Hall, Chickering Hall, the Tremont Theatre, Tremont Temple, and the Mechanics' Hall (Pl. B, 6; for large gatherings). Good smoking Concerts (the so-called 'Pops') are given at the Music Hall in summer. The Händel & Haydn, Harvard Musical, Cecilia, Apollo, and Orpheus are among the best of the musical societies. — The free lectures of the Lowell Institute (tickets on previous application) are delivered in winter at the Institute of Technology (p. 83). — Art Exhibitions are held regularly in the rooms of the Boston Art Club (Pl. B, 5), Dartmouth St. — Good Flower Shows are held in Horticultural Hall (Pl. C, 3). — The Baseball Grounds are in Walpole St., at the S. End. — A Lawn Tennis Tournament is held annually at the grounds of the Longwood Club. — Public Golf Links at Franklin Park (p. 92). — Charles River Park, near the Cambridge end of Harvard Bridge (Pl. A, 6), with bicycle track, etc. — The Chutes, Huntington Ave., beyond Massachusetts Ave. — Horse Races at the Country Club (see below) and Mystic Park.

Clubs. Somerset (Pl. B, 4), 42 Beacon St.; Algomaquins (Pl. A, B, 5), 217 Commonwealth Ave.; St. Botolph (Pl. B, 5), 2 Newbury St., with Sat. evening reunions in the style of the Century Club at New York (p. 18) and frequent art-exhibitions; Union (Pl. C, 3), 8 Park St.; Temple (Pl. C, 4), 25 West St.; Poirot (Pl. B, 4), cor. of Beacon and Spruce Sts.; University (Pl. 21; A, 5), 270 Beacon St.; Century, 146 Boylston St.; Elysium, 218 Huntington Ave. (Hebrew); Suffolk, 4/2 Beacon St.; Point & Clay Club, 419 Washington St.; Tavern Club (Pl. 20; C, 4), 4 Boylston Place; Boston Art Club, cor. of Dartmouth and Newbury Sts.; 20th Century Club, 14 Ashburton Place, with weekly lectures on questions of social interest; Turnverein, 29 Middlesex St., German; Boston Athletic Association (Pl. B, 5), Exeter St.; New England Women's Club, 5 Park St.; Press Club, 14 Bosworth St.; Women's Press Club; Appalachian Mt. Club, Tremont Building; Camera Club, 50 Bromfield St.; New Riding Club, Parker St., near Back Bay Park; Country Club, Clyde Park, Brookline; Union Boat Club, foot of Chestnut St. — Among the numerous Dining Clubs, which are a characteristic Boston institution, are the Saturday Club and the Papyrus, besides several of a political, commercial, or professional complexion; while other good clubs, meeting periodically at
the members' houses, are the Wednesday Evening Club (founded 1777), the Thursday Evening Club, and the Round Table (sociological).

Post Office (Pl. C, 3), Devonshire St., open from 7.30 a.m. to 7.30 p.m., Sun. 9-10 a.m. (see p. 88). Branch Offices at Copley Sq. (p. 89), at Washington St., cor. of Brookline St. (Pl. C, 6), etc.

Acting British Consul, Mr. W. H. Stuart, 13 Exchange Place (Pl. C, 3).

Bibliography. For details, see Edwin M. Bacon's 'Boston Illustrated' (25 c.), 'Dictionary of Boston' (75 c., in cloth $1), and 'Walks and Rides about Boston' ($1.25); also Henry Cabot Lodge's 'Boston' ('Historic Towns Series') and S. A. Drake's 'Old Landmarks and Historic Personages of Boston'.

Boston, the capital of Massachusetts, the chief town of New England, and one of the oldest and most interesting cities in the United States, lies at the head of Massachusetts Bay, about 200 M. to the N.E. of New York. Boston proper occupies a peninsula between the Charles River and the arm of the bay known as Boston Harbour and was originally founded on three hills, Beacon, Copp's, and Fort, which, however, have been materially cut down. The city limits also include East Boston, on Noddle's or Maverick Island, on the other side of the harbour; South Boston, separated from the old city by an arm of the harbour; Charlestown, on the other side of the river; and the suburban districts of Brighton (W.), Roxbury (or Boston Highlands), West Roxbury (including Jamaica Plain), and Dorchester (S.). Boston is connected with the city of Cambridge (p. 93) by several bridges across the Charles. The old town is cramped and irregular, and its streets are narrow and crooked; but the new parts, especially the district known as the Back Bay (p. 92), formed by filling in the tide-water flats on the Charles, are laid out on a very handsome and spacious scale. The chief retail business-streets are Washington Street and Tremont Street, both of which, and especially the former, rank among the most crowded thoroughfares in Christendom. Among the finest residence streets are Commonwealth Avenue (p. 92), Beacon Street (p. 92), Marlborough Street, Newbury Street, and Mt. Vernon Street. A characteristic feature of the residence quarters is seen in the luxuriant vines of 'Boston ivy' (Ampe-lopsis Veitchii), which cover many of the buildings (especially beautiful in autumn). The population of Boston in 1895 was 496,920, including a large proportion of Irish Roman Catholics.

History. The Indian name of the peninsula on which Boston lies was Shawmut ('Sweet Waters'), and the early colonists called it Trimoun-taine or Tremont. The first English settler was a reclus Anglican clergyman, the Rev. William Biaxtor or Blackstone (ca. 1623), but soon after the arrival of the Salem Colonists, who migrated to this peninsula in 1630 (see p. 102), he transferred his rights to them (1634) for 30L and moved into the wilderness (comp. p. 73). The new settlers named the place Boston in honour of the native city of some of their leaders, and Gov. Winthrop made it the capital of the colony. The little town increased with some rapidity and soon carried on a considerable sea-going trade (first wharf built in 1673). In the middle of the 18th cent. Boston was probably the largest and most important town in America, containing about 25,000 in-hab., and outstripping New York and Philadelphia. The first American newspaper ('Boston News Letter') was published here in 1704. Boston's share in the Revolution is well known. The 'Boston Massacre' (see p. 87) occurred on Mar. 5th, 1770, and the 'Boston Tea Party' on Dec. 6*.
16th, 1773. During the war Boston was occupied by British troops, but on Mar. 4th, 1776, Washington crossed from Cambridge, took possession of Dorchester Heights (now a part of South Boston, p. 83), and compelled the evacuation of the city (Mar. 17th). Since the Revolution Boston's upward course has continued steadily, with a few interruptions, of which the embargo of 1807-15 was perhaps the most important. It received its city charter in 1822, having then a population of about 50,000. In 1840 this number had risen to 93,383, in 1860 to 177,840, in 1880 to 362,899, and in 1890 to 448,477. In 1872 the chief business portion of the city was devastated by a fire, which destroyed property to the value of $70,000,000 (14,000,000£). From 1830 to 1860 Boston was the headquarters of the Abolition Party, led by William Lloyd Garrison and Wendell Phillips.

It is of great interest to study a plan of Boston, showing the original area of the peninsula and the extent to which it has been increased by filling in the tidal flats all round it (see, e.g., H. C. Lodge's 'History of Boston'). This process has more than doubled the area of the peninsula (780 acres; now about 1900 acres), while the total area now comprised within the municipal limits is over 27,000 acres (43 sq. mi.). The hills have been partly levelled, and indeed the whole face of the ancient city has been entirely altered, with the exception of three old burial-grounds and a few buildings. The original peninsula was connected with the mainland on the S. by a narrow 'Neck', little wider than the present Washington St., which runs along it. Boston has often been described as the most English of American cities, and in many respects this is true, though it must not be understood to indicate a conscious or voluntary imitation of English standards. Mere wealth probably counts for less in Boston than in any other large American city. As a literary centre Boston was long supreme in the United States and still disputes the palm with New York. A list of its distinguished literary men would include Hawthorne, Emerson, Longfellow, Holmes, Lowell, Everett, Agassiz, Whittier, Motley, Bancroft, Prescott, Parkman, Ticknor, Channing, Theodore Parker, Henry James, T. B. Aldrich, and Howells among the names more or less closely associated with Boston. Among the most eminent of its sons in other spheres are Benjamin Franklin (born at No. 17 Milk St., the site of which is now covered by an office-building, with a bust of Franklin), Daniel Webster (138 Summer St.; inscription), and Charles Sumner (20 Hancock St.). Paul Revere lived at No. 19 North Sq. (Pl. C, 2). Prescott wrote his 'Conquest of Peru' and 'Philip II.' at No. 55 Beacon St., where he spent the last 14 years of his life; and George Ticknor occupied part of the house at the corner of Park St. and Beacon St. where Lafayette lodged in 1824. The Atlantic Monthly is published at Boston (Houghton, Mifflin, & Co., 4 Park St.).

Commerce and Industry. Boston is, perhaps, the wealthiest city in America in proportion to population. Its total valuation in 1897 was $1,012,557,256 (202,511,450£). Boston capital has been very largely instrumental in the development of the West. Its foreign commerce is very extensive; the total value of its exports in 1897 was $104,494,690, of its imports $85,688,449. Among the chief articles are grain, live-stock, fish, wool, sugar, hides, chemicals, and coals. In the same year its harbour was entered and cleared by 4003 vessels (exclusive of coasters), of 3,637,500 tons burden. Its manufactures are very varied, employing (1890) 95,000 hands and producing goods to the value of $245,850,000. Among the staples are leather, boots and shoes, hardware, machinery, and cotton. Boston is the second wool market of the world (coming after London only), its sales in 1897 amounting to 389,635,000 lbs.

*Boston Common (Pl. B, C, 3, 4), a park of 48 acres in the heart of the city, shaded by fine elms and other trees and crossed by many pleasant walks, has been reserved for public use since 1634 and is carefully guarded for this purpose in the charter of 1822. Perhaps no other city-park in the world is more closely entwined with the historic interests and warm affections of the surrounding population.
The Soldiers' Monument, on a hill near the centre of the Common, was designed by Martin Milmore and erected in 1871-77. It stands near the site of the Old Elm, which was older than the city and was blown down in 1876. The adjoining sheet of water is known as the Frog Pond. On the Mall abutting on Tremont St. is a monument in memory of Crispus Attucks and others killed in the Boston Massacre. The 'Long Path' (see 'The Autocrat of the Breakfast Table') extends from Joy St. (Pl. C, 3) to Boylston St. (Pl. C, 4). Near Park St. (N. end of the Common) is the tasteful Brewer Fountain. — Open-air concerts are given on the Common on Sun. afternoons in summer.

On the S. side of the Common is the Central Burying Ground (Pl. C, 4), laid out in 1796 and containing the graves of Gilbert Stuart (1754-1828), the portrait-painter, and Julien (d. 1805), the restaurateur (after whom the well-known soup is named). — To the N. of the Common, adjoining Tremont St., is the Old Granary Burial Ground (Pl. C, 3), which contains the graves of several early governors of Massachusetts, the parents of Benj. Franklin, the victims of the Boston Massacre, Samuel Adams (1722-1803), John Hancock (1737-93), Paul Revere (1735-1815), James Otis (1725-83), and numerous other Boston worthies (permit at the City Hall).

On the S.W. side the Common is bounded by Charles St., on the other side of which is the Public Garden (Pl. B, C, 4), 2½ acres in extent, the site of which half-a-century ago was a tidal flat. The show of flowers here in spring and summer is very fine. Among the monuments in the Public Garden are an equestrian Statue of Washington, by Ball, statues of Edward Everett (1794-1866; by Story), and Sumner (1811-74; by Ball), and a group commemorating the Discovery of Ether, by J. Q. A. Ward. [Few either of these or of the other statues in Boston do credit to its taste for art.] Pleasure-boats ply on the artificial sheet of water in the centre. — At the S.W. corner of the Public Garden stands the Arlington Street Church, built in 1859, by the congregation of which Dr. W. E. Channing (p. 77) was pastor from 1803 to 1842.

That part of the Common adjoining Tremont St. and known as the Tremont St. Mall is now occupied by eight small buildings covering the staircase entrances to the stations of the Subway, a wonderful piece of engineering designed to relieve the traffic of the congested districts by affording an underground passage for the electric cars. The subway was begun in 1895, was partly opened for traffic in 1897, and was completed in 1898 at a total cost of about $4,500,000. No visitor to Boston should fail to see this commodious, airy, and well-lighted tunnel.

The main subway extends from the junction of Tremont St. and Shawmut Ave. (Pl. C, 5) to (1½ M.) the N. Union Station (Pl. B, 2), passing below Tremont St., Scollay Sq. (Pl. C, 3), and Haymarket Sq. (Pl. C, 2). A branch-subway, beginning in the Public Garden, opposite Church St. (Pl. C, 4), runs under Boylston St. to the corner of Tremont St. (Pl. C, 4). Some sections are constructed of steel, embedded in cement, with arches of brick or concrete; other sections are of masonry. The interior at the stations is lined with glazed white brick. At places there are 'sub-subways', one track passing below another, and at other points there are four tracks.

Near the N.W. angle of the Common, on Beacon Hill, stands the State House (Pl. C, 3), an imposing building surmounted by a huge gilded dome and preceded by a Corinthian portico and a flight of steps. The architect of the original building facing Beacon St., of which the general appearance has been preserved, was Charles Bulfinch (1795). It was, however, enlarged in 1853-56; and another huge extension, much larger than the original erection, was accom-
plished in 1889-98. The new part consists mainly of yellow brick with trimmings of white marble and numerous columns and pilasters. The whole building is now 401 ft. long, 242 ft. wide, and 110 ft. high (to top of lantern on dome, 150 ft.). On the terrace in front are statues of Daniel Webster (1782-1852) and Horace Mann (1796-1859). The dome is illuminated at night.

Interior. We first enter the Doric Hall, containing statues of Gov. Andrew (by Ball) and George Washington (by Chantrey). This opens on the handsome new "Memorial Hall (to be finished in 1900), above Mt. Vernon St., which will contain a collection of flags carried by Massachusetts regiments in the Civil War and other historical relics. — The Senate Chamber occupies the former House of Representatives, on the first floor of the old building. It is adorned with busts of Washington, Lincoln, Sumner, Franklin, Lafayette, and other eminent men. — The House of Representatives, a handsome elliptical chamber on the second floor of the extension (W. side), is finished in white mahogany. Over the clock hangs a codfish, an emblem of one of the former chief sources of the State's prosperity. — At the N. end of the building is the fine State Library (100,000 vols.), the chief treasure of which (exhibited under glass) is the 'History of the Plymouth Plantation', generally known as the 'Log of the Mayflower', written with his own hand by William Bradford, Governor of Plymouth Colony (1589-1657). This MS., discovered in London in 1846, was presented to Massachusetts in 1893. — Among the other fine apartments shown to visitors are the Governor's Room and the Reading Rooms of the Senate and the House of Representatives. — In Room 437 is an interesting Educational Museum.

On the E. side of the new part of the State House a small park has been laid out. Here, as nearly as possible on the original site, has been erected (1898) a reproduction of the Beacon Monument, raised in 1790 to commemorate the success of the Revolution and removed in 1812. The bronze tablets belonged to the first monument.

In Beacon St., opposite the State House, is the beautiful Shaw Monument, by St. Gaudens, erected in 1897 in honour of Col. Shaw and his regiment (the first coloured regiment raised in the Civil War). This is probably the first instance of a relief placed as a monument by itself instead of against a building.

In Beacon St., just below the State House, stood the old Hancock Mansion (site indicated by a tablet on the balustrade).

We now follow Beacon Street towards the N., passing (left), at the corner of Bowdoin St., the Unitarian Building (Pl. C, 3), the headquarters of the American Unitarian Association, opposite which is the new Congregational Building (1898). Adjoining the latter is the *Boston Athenaeum (Pl. 2; C, 3), an institution founded in 1807 and now containing a library of 220,000 vols. (open to members only). On the groundfloor are the rooms of the American Academy of Arts and Sciences. — In Somerset St., which diverges to the left, are the general building of Boston University (Pl. C, 3), the various departments of which are attended by 1300 students, and the New England Historic-Genealogical Society, with valuable collections of books and MSS. (9-5). Here, too, is the back of the New County Court House (Pl. C, 3), a massive granite building in the German
Renaissance style, the front of which faces Pemberton Square. The building is 450 ft. long. The imposing central hall is adorned with emblematic figures by D. Mora, a statue of Rufus Choate (1799-1859), by Dan. French, etc. We, however, proceed to the right, through School Street, in which, to the left, at the corner of Tremont St., stands King's Chapel (Pl. C, 3), built in 1754 on the site of the first Episcopalian church of Boston. The adjoining burial-ground, the oldest in Boston, contains the graves of Gov. Winthrop (1588-1649) and other worthies. In School St., to the left, is the City Hall (Pl. C, 3), behind which is the Old Court House (Pl. C, 3). In front of the City Hall are statues of Franklin (1706-90), by Greenough, and Josiah Quincy (1772-1864; mayor for six years in succession), by Ball.

School St. ends at Washington Street (Pl. C, D, 2-7), the most crowded thoroughfare in Boston, with many of the best retail-shops. To the left is the Old Corner Book Store, a favourite haunt of literary men, past and present. Following Washington St. ('Newspaper Row') to the left, we soon reach, at the corner of State St., the *Old State House (Pl. C, 3), an unpretending edifice, dating from 1748 and restored as far as possible to its original appearance, even to the figures of the British lion and unicorn on the roof.

The 'Boston Massacre' (p. 83) was the result of an encounter between a British sentry here and the crowd. The rooms, including the old Council Chamber and Hall of Representatives on the upper floor, contain a collection of historical relics and paintings (9.30-5; free). On the top-floor is the Curtis Collection of Photographs of Ancient Boston Buildings. The main facts of the building's history are given in appropriate inscriptions.

Opposite are the tall Sears and Ames Buildings (good view from roof).

State Street (Pl. C, D, 2, 3), the headquarters of financial life, leads hence to the N.E. to the Custom House (Pl. D, 2), a massive granite building in the shape of a Greek cross, surmounted by a dome. State St. ends at Atlantic Ave. and Long Wharf (Pl. D, 2). Change Alley, diverging to the left from State St., leads to *Faneuil Hall (Pl. C, 2, 3; open 9-5), the 'cradle of American liberty', originally built and presented to the city in 1742, by Peter Faneuil, a Huguenot merchant, but rebuilt after a fire in 1761.

The Hall proper, on the upper floor, is 76 ft. square and has no seats. It is used for public meetings and was the scene of numerous important gatherings in Revolutionary, Abolition, and later times. The British officers used it as a theatre in 1775-76. It contains a large picture by Healy (Webster addressing the Senate) and portraits of eminent Americans (copies). — The floor above the hall is occupied by the Ancient and Honorable Artillery Co., the oldest military organisation in the country (1638; comp. Baedeker's London).

Adjacent is Quincy Market (Pl. C, 2). — The Chamber of Commerce (Pl. 5; D, 3) stands at the corner of Atlantic Ave. and India Wharf. — At T Wharf, Atlantic Ave., is a Fisheries Exhibition (open free; Frid. all day, Sat. till 2 p.m.).

Devonshire Street leads to the right (S.) from State St. to the Government Building (Pl. C, 3), a huge edifice by Mullet, in his
usual Mansard-roof style, occupying the entire block between Milk St., Devonshire St., Water St., and Post Office Sq. The Post Office occupies the groundfloor, the basement, and part of the first floor, while the rest of the building is devoted to the U. S. Sub-Treasury (10-2) and the U. S. Courts (2nd floor). The allegorical groups above the main entrance are by D. C. French.

The Post Office, though it itself escaped, adjoins the district destroyed by the fire of 1872 (p. 84) and now covered with substantial business blocks. The financial quarter is crowded into the small territory bounded by State, Washington, Milk, and Broad Sts. (Pl. C, D, 3); the wool trade is centred in Federal and High Sts. (Pl. D, 3); the leather and boot and shoe trade spreads over Summer, Bedford, Lincoln, and South Sts. (Pl. C, D, 4), and also part of Pearl St. (Pl. D, 3) and Atlantic Ave. (Pl. D, 2, 3); while the wholesale dry-goods business affects Winthrop Sq. and Franklin, Chauncey, Kingston, and Bedford Sts. (Pl. C, D, 3, 4). The large retail dry-goods stores of Boston rank with those of New York (p. 19). Among the most noted are Jordan, Marsh, & Co., R. H. White, and Shuman (Washington St.), Hollander (Boylston St.), Houghton & Dutton (Tremont St.), and Hovey (Summer St.).

We now follow Milk Street (Pl. C, 3), to the E., back to Washington St. At the corner of Devonshire St., opposite the Post Office, is the Equitable Building, the roof of which affords an excellent view. At the corner of Washington St. stands, perhaps, the most sacred shrine in Boston, the *Old South Meeting House (Pl. 15; C, 3), built in 1729 on the site of an earlier church of wood, which lay near Gov. Winthrop's house.

Benjamin Franklin was baptised in the original church in 1706, and here Judge Sewall made his confession of repentance for his share in the witchcraft delusion of 1692. Some of the most stirring meetings of the Revolutionary times were held here, and from its doors the disguised Bostonians who threw the tea into the harbour in 1773 (pp. 83, 84) started for their enterprise. The British turned it into a riding-school in 1773, but it was afterwards restored to its sacred uses. The Annual Election Sermon was delivered here, with few interruptions, from 1712 to 1872. It barely escaped the fire of 1872 and was afterwards used as a post-office. It now belongs to a patriotic society and contains an interesting collection of historical relics (9-6; adm. 25 c.). Lectures on local history are delivered in the Old South in winter.

Boylston Street (Pl. A-C, 4-7), diverging from Washington St. to the right (W.), skirts the Common and Public Garden and leads to the Back Bay (p. 92). To the left, at the end of Columbus Ave., a short distance from Boylston St., we see the tower of the handsome *Providence Station (Pl. C, 4, 5). In front of this station is the Emancipation Group, by Ball; the negro is a portrait of Archer Alexander, the last slave captured under the 'Fugitive Slave Law' in Missouri. — At the corner of Berkeley St. (right) stands the Museum of Natural History (Pl. B, 5; 9-5, 25 c.; free on Wed. & Sat.), with a library of 20,000 vols. and good zoological, ornithological, entomological, and mineralogical collections. Opposite is the Young Men's Christian Association. Adjacent is the Massachusetts Institute of Technology (Pl. B, 5), the leading institution of the kind on the W. side of the Atlantic (1200 students; fine apparatus and collections). — Opposite is the large Brunswick Hotel (p. 81).
Boylston St. now reaches *Copley Square (Pl. B, 5), which offers perhaps the finest architectural group in Boston, including Trinity Church, the Museum of Fine Arts, the new Public Library, the Second Church (Unitarian), and the New Old South Church.

*Trinity Church (Pl. B, 5), on the N. side of the square, the masterpiece of H. H. Richardson and a typical example of 'Richardsonian' architecture, is deservedly regarded as one of the finest buildings in America. It was practically completed in 1877 at a cost of $800,000 (160,000£); the two W. towers and the admirable carving of the porch (by Cairns and Mora) date from 1896-98. Its style may be described as a free treatment of the Romanesque of Central France (Auvergne).

The building is in the form of a Latin cross, surmounted by a massive central *Tower*, 210 ft. high, suggested by the lantern of the Old Cathedral of Salamanca (see Baedeker's Spain). The interior is very elaborately decorated by La Farge. The *Stained-glass Windows* include fine specimens of La Farge, Burne Jones and William Morris, Henry Holiday, and Clayton & Bell. It is interesting to compare the painted English windows with La Farge's work, in which only the faces and hands are painted, the rest being in coloured glass. Adjoining the chancel is a bust of *Dean Stanley* (1815-81). The adjacent *Chapel* is connected with the church by very effective open cloisters, in which is preserved the tracery from a window of the ancient church of St. Botolph, Boston, England. — The *Rev. Phillips Brooks* (d. 1893), late Bishop of Massachusetts, was rector of Trinity Church for 22 years.

The *Public Library* (Pl. B, 5), on the S. side of the square, designed by McKim, Mead, & White and erected in 1888-96, is a dignified and imposing, simple and scholarly edifice, which forms a worthy mate to its vis-à-vis, Trinity Church. Its style is that of the Roman Renaissance. It is 228 ft. long, 225 ft. wide, and 68 ft. high (to the cornice), and encloses an open court, 140 ft. long and 100 ft. wide. The total cost, exclusive of the site, was $2,368,000. The library is open to the public, 9 a.m. to 10 p.m. in winter (summer till 9 p.m.; Sun. 2 to 9 or 10). It is the largest free library in the world (ca. 700,000 vols.), circulating 1,199,658 vols. for home use in 1897.

**Exterior.** Among the chief features of the exterior are the reliefs over the main entrance (arms of the Library, City, and State; by *Augustus St. Gaudens*), the medallions below the cornice representing the book marks of famous printers, and the inscribed names of eminent men. The platform in front of the entrance is to be embellished with two groups of statues by *A. St. Gaudens*.

The *Interior* is excellently arranged and equipped and affords accommodation for 1½ million volumes. The *Vestibule*, of Knoxville marble, contains a statue of Sir Harry Vane (1612-62), by Macmonnies. — The *Entrance Hall* has a floor of white marble, inlaid with brass. Overhead are commemorated several eminent Bostonians. — The corridor to the right leads to the *Periodical Reading Room*, where about 1300 periodicals are displayed.

The *Catalogue Room*, from the Entrance Hall a superb marble *Staircase*, 20 ft. wide, embellished with figures of lions, in Siena marble, by *Louis St. Gaudens*, ascends to the first floor. Its windows overlook the *Central Court*, with its turf, fountain, arcade, and open-air walk, to which readers may resort in hot weather. The panels of the staircase-hall contain *Frescoes* by *Puvis de Chavannes*, representing the Muses greeting the Genius of Enlightenment and figures of Philosophy,
Physics, History, Epic Poetry, etc. It is instructive to compare the effectiveness of these works from the hand of an expert with the comparative failure of the wall-paintings upstairs, executed by artists whose well-deserved fame is not based on decorative painting. — On the first floor is *Bates Hall* (so called in honour of an early benefactor of the library, a member of the firm of Baring Bros.), the great general reading-room, which is 217½ ft. long, 42½ ft. wide, and 50 ft. high. — To the right is the *Delivery Room*, adorned by not very perspicuous scenes illustrating the Quest of the Holy Grail, by Edwin A. Abbey. The books, which are kept in huge stacks, are expeditiously transferred to this room by ingenious mechanical appliances. — To the left are the *Children's Reading Room*, the *Patent Library*, and the *Newspaper Reading Room* (300 papers, in all languages). — We now ascend to the second floor, passing a small balcony overlooking Bates Halls. *Sargent Hall* is adorned with somewhat complicated frescoes by John S. Sargent, the meaning of which may be deciphered with the aid of keys provided for the purpose. The valuable special collections of the library housed on this floor include the Ticknor Collection of Spanish and Portuguese Books, the Barton Library (with one of the finest existing collections of Shakspereiana, including both the early folios and the early quartos), the Bowditch Mathematical Library, the Prince Library (MSS. and early New England books, including two copies of the Bay Psalm Book (see p. 38), and two copies of Eliot's Indian Bible, 1663-55), the Barlow Library (Americana; including a Latin copy of the letter of Columbus to the King and Queen of Spain in 1493), the John Adams Library (2800 vols.), the Franklin Collection, the collection of works on early American history, the John A. Lewis Library (including many early books printed in Boston), and the Tosti Collection of Engravings. The *Brown Musical Library* (8000 vols.) occupies a separate room. Another is devoted to Art.

The *Second Church* (Pl. B, 5), rebuilt on its present site on the N. side of Copley Sq. in 1873-74, was the church of the three Mathers (p. 93) and of Ralph Waldo Emerson (1829-32).

The *Museum of Fine Arts* (Pl. B, 5), on the E. side of Copley Sq., a somewhat restless piece of architecture, of red brick, with terracotta details, contains some valuable collections (open daily 9-5, Mon. 12-5, Sun. 1-5; adm. 25 c., free on Sat. & Sun.; catalogue of sculptures 50 c., of paintings, etc., 25 c.). In 1897 the total number of visitors was 228,458.

The *Ground Floor* is mainly devoted to a large and excellent collection of *Casts*, chronologically arranged and surpassed in importance by those of Berlin and Strassburg only. — The two rooms to the right of the main staircase contain a *Collection of Egyptian Antiquities* (including many fine specimens from the Egypt Exploration Fund). — The room immediately to the left of the staircase contains *Greek and Graeco-Roman Vases and Glass, Terracottas, Small Objects from the Temple of Assos, Phrygian Sarcophagi, Cypriote Antiquities*, etc. In the extension towards the E. (right), in a case by itself, is a fine Athenian *Cratera* (ca. 470 B. C.), with scenes from the Trojan War. In another case are 28 small figures of Eros. Other cases contain iridescent glass and Tanagra figurines. — The next room to the S. contains a small but valuable collection of *Greek and Roman Antiquities*, mainly acquired with the bequest of Mrs. Perkins. In the middle: Young Apollo, marble statue, with arms wanting, feet restored (probably a Roman copy of a Greek original); *Statuette of Aphrodite*, after Praxiteles; Attic Grave Monument (ca. 400 B. C.), in the form of a vase. By the walls: *Torso of a goddess*, an original Greek work; marble head of Hercules, probably a copy of a type by Lysippus; head of a Greek poet (Menander?); Roman portrait-head of Corbulo; archaic lion in red sandstone; bronze statuette of Hercules; ideal Greek *Head* (ca. 380 B. C.); *Head of Alexander the Great*; *Hermes* (torso and head);
Bronze Bust of Arsinoë (?) : painted Greek gravestone (under glass; ca. 400 B.C.). A small case contains archaic figurines from Tanagra. The case below the window holds coins and gold ornaments.

First Floor. The N. side contains the Collection of Paintings, many of which are on loan and frequently changed. — On the wall of the staircase is the Mosque of the Great Moguls at Delhi, by Vereschagin. — Turning to the right at the head of the main staircase, we enter the First Picture Gallery, which contains works of the Italian, French, and Spanish Schools, including specimens of Botticelli, Moretta, Palma Vecchio, Garofalo, Antonello da Messina, Pinturicchio, Guercino, Tintoretto, Watteau, Greuze, Boucher, Salvador Rosa, Reynolds, Gainsborough, Constable, Hogarth, etc. — The door to the right leads to the Print Rooms (see below); that in front to the —

Allston Room (American School), which contains works by Washington Allston, Gilbert Stuart, Copley, Trumbull, Benjamin West, etc. No. 512 (unfinished) is one of the three portraits of Washington painted by Stuart from life. No. 121 (Martha Washington) and No. 122 (Washington at Dorchester Heights) are also by Stuart. There are many other interesting portraits.

Dutch Room. Dutch, Flemish, and German Schools, including works by Teniers, Maes, Rubens, Van Dyck, Metsys, Rembrandt (two good portraits), Roger van der Weyden, Metsu, Netscher, Ruysdael, Cuyp, etc. — This room also contains a Collection of Miniatures.

The Fourth and Fifth Picture Galleries contain Modern Works, including specimens of Corot, W. M. Hunt, Regnault, George Fuller, Elihu Vedder, Brush, Thayer, Whistler, Rousseau, Troyon, Meissonier, Millet, Delacroix, L'Hermitte, Gérôme, etc. We now reach the —

Southern Corridor, which contains a few Paintings, Illuminated MSS., Japanese Armour, the Collection of Japanese Paintings, and the highly valuable Morse Collection of Japanese Pottery. [By far the larger part of the Japanese paintings, prints, and designs are stored away downstairs, where they are accessible to students.] — From the other end of the corridor we enter the —

Japanese Room, containing one of the finest collections in the world of Japanese Bronzes, Enamels, Lacquer Work, Weapons, Ivory and Wood Carvings, Gold and Silver Ornaments, etc. — The right door leads to the —

Coin Room, which contains collections of Coins, Electrotype Reproductions of Coins, Gold and Silver Ware, Watches, Rings, Fans, etc. — The —

Metal Room contains Italian Bronzes (Renaissance), Oriental Metal Work, Electrotype Reproductions, etc. — The —

Pottery and Porcelain Room contains extensive collections of Ming, Fu-tien, Sèvres and English China, Indian and Mexican Pottery, German and Venetian Glass, Chinese and Japanese Porcelain, Enamels, etc. — The first door to the right leads to the —

Lawrence Room, fitted up with carved oak of the 16th cent. and containing some old cabinets. It is adjoined by the Room of Wood Carving, Arms, and Armour, from which we enter the —

Textile Gallery, containing Gobelins, Beauvais, and other tapestry, Italian embroideries, laces, etc. — We have now made the circuit of the building and regained the hall at the head of the staircase.

The three Print Rooms (see above) contain varying selections of Prints and Engravings, a visitors' guide to which is hung on the walls. The Museum now possesses about 40,000 prints. The Third Print Room is adjoined by the —

Room of Water-Colours and Drawings, communicating with the Fifth Picture Gallery (see above), among the contents of which are 21 drawings and water-colours by J. F. Millet and 27 water-colours by Wm. Blake.

In the Attic and Basement are rooms occupied by the School of Drawing and Painting. The basement also contains the fine Art Library and many thousand specimens of textiles of various times and nationalities, arranged for the use of students and designers.

The *New Old South Church (Pl. B, 5), so called as the successor of the Old South Church (p. 88), is a fine building in an Italian
Gothic style, with a tower 248 ft. in height. It was built in 1874-75. The marbles and ornamental stone-work are fine.

Among other noteworthy buildings in this part of the city are the Boston Art Club (Pl. B, 5), at the corner of Newbury and Dartmouth Sts. (exhibitions, see p. 82); the Hotel Vendome (Pl. a, B 5; p. 81), at the corner of Dartmouth St. and Commonwealth Ave.; the Boston Athletic Association (Pl. B, 5; p. 82), Exeter St.; the University Club (Pl. 21; A, 5), Beacon St.; the Harvard Medical School (Pl. B, 5; p. 94), at the corner of Exeter and Boylston Sts.; the *First Baptist Church (Pl. B, 5), at the corner of Clarendon St. and Commonwealth Ave., generally known as the Brattle Square Church, a fine building by H. H. Richardson, with a Florentine tower embellished with bas-reliefs and figures of angels; the *Central Congregational Church (Pl. B, 5), Berkeley St., a beautiful building, with fine stained-glass windows; the *First Church (Unitarian; Pl. 9, B 5), Berkeley St., cor. of Marlborough St.; Emmanuel Church (Pl. B, 5), Newbury St.; the Normal Art School (Pl. B, 5), at the corner of Newbury and Exeter Sts.; the Horace Mann School for the Deaf, Newbury St.; the Spiritual Temple (Pl. B, 5), at the corner of Newbury and Exeter Sts.; and the Mt. Vernon Church (Pl. 14; A, 6), with a good memorial window by La Farge, at the corner of Beacon St. and Massachusetts Ave.

*Commonwealth Avenue (Pl. A, B, 4-6), which runs parallel with Boylston St., is one of the finest residence-streets in America, with its double row of trees and handsome houses. It is 240 ft. wide and is adorned with statues of Alex. Hamilton (Pl. B, 4; 1757-1804; by Rimmer), John Glover (Pl. B, 5; 1732-97; by Milmore), William Lloyd Garrison (Pl. B, 5; 1805-79; by Warner), and Leif Ericson, the leader of the Norsemen who are supposed to have landed at Point Allerton (p. 96) in the 11th cent. (Pl. A, 6; by Miss Whitney).

*Beacon Street (Pl. A-C, 3-6), beginning on Beacon Hill, skirting the W. side of the Common, and then running parallel with Commonwealth Ave., is the aristocratic street of Boston par excellence. Its back-windows command a fine view of the Charles River. No. 296 was the home of Dr. Oliver Wendell Holmes.

The Back Bay (Pl. A, B, 4-6), the fashionable W. end district traversed by the above-named streets, was at the beginning of the present century occupied by dreary mud-flats, salt-marshes, and water, and its reclamation was a work of immense toil and expense (comp. p. 84). The *Back Bay Fens (Pl. A, 7) have been skilfully laid out by Mr. F. L. Olmsted on the site of the unsightly swamps which formerly lay here and form the first link in the splendid chain of parks and boulevards, of which Franklin Park is the chief ornament. At the end of Boylston St. is a memorial of John Boyd O'Reilly (1844-90), by D. C. French. — *Franklin Park is 520 acres in extent and lies in W. Roxbury (reached by electric car). Its natural beauties have been skilfully taken advantage of by Mr. F. L. Olmsted, and many of its drives and walks are very beautiful (park-carriages 25 c. each). The park includes a public golf-course, tennis grounds, etc. Extensive view from the Overlook.

The North End (Pl. B, C, 1-2) of Boston, embracing the site of Copp's Hill (p. 83), now one of the poorer districts and occupied mainly by foreigners, contains some points of considerable his-
torical interest. The Copp's Hill Burial Ground (Pl. C, 2; key kept by sexton; see notice on gate), dating from 1660, contains the graves of Increase, Cotton, and Samuel Mather (1639-1723, 1663-1728, 1706-85). Adjacent, in Salem St., is Christ Church (Pl. 6; C, 2), the oldest church now standing in the city (1723), on the steeple of which the signal-lanterns of Paul Revere were displayed on April 18th, 1775, to warn the country of the march of the British troops to Lexington and Concord (p. 124). Between Copp's Hill Burial Ground and the river is the small North End Park (Pl. C, 1), laid out in 1895-96.

Boston has long been famous for its Charitable Institutions. The Perkins Institute for the Blind, in South Boston (p. 83), indissolubly associated with the names of Laura Bridgman and Helen Keller, is one of the best known of these and has a large library of raised-letter books (visitors admitted on Thurs. at 11 a.m.; 15 c.). Others are the Massachusetts General Hospital (Pl. B, 3); the New England Women's Hospital in Roxbury, entirely managed by women; the Eye & Ear Infirmary (Pl. B, 3); the Old Ladies' Home (Pl. B, 4); the City Hospital (Pl. D, 7); the Children's Hospital; the Carney Hospital, in South Boston; and the Homeopathic Hospital (Pl. 12; D, 7). The Criminal and Reformatory Institutions are mainly on the harbour islands (p. 96) or in S. Boston.

Among other points of interest in Boston proper are the Cathedral of the Holy Cross (R.C.; Pl. D, 6), a large edifice in Washington St. (365 ft. long), in front of which is a Statue of Columbus, erected in 1892; the Church of the Incarnate Conception (Pl. 13; D, 7), Harrison Ave. (good music); the Church of the Advent (Pl. 1; B, 4), Brimmer St. (high-church Epis.; good music); the New England Conservatory of Music (Pl. 8; C, 6), Franklin Sq. (1800 pupils); the Boys' English High & Latin School (Pl. 4; C, 6), between Montgomery St. and Warren Ave. (the oldest school in America, dating from 1635, and the largest building for public school purposes in the country); the Girls' High & Latin School (Pl. 10; C, 6), W. Newton St.; the Armoury of the First Corps of Cadets (Pl. C, 5); the new building of the Massachusetts Historical Society, in Boylston St., beyond Massachusetts Ave., with many interesting relics; the Tremont Building, at the corner of Beacon and Tremont Sts. (view from upper stories); the Youth's Companion Building (Pl. 22; C, 5), at the corner of Columbus Ave. and Berkeley St.; the Pope Cycling Co.'s Building (Pl. 17; C, 5), adjoining the last; the new Masonic Temple (1888), at the corner of Tremont and Boylston Sts. (Pl. C, 4); the Tremont Temple (Pl. C, 3), with its curious façade and a large hall used as a free Baptist church and for other purposes; the Charlesbank (Pl. A, B, 2, 9), a small park, with open-air gymnasium and playgrounds; and the Marine Park at South Boston (band on Sun., evening in summer), with a statue of Adm. Farragut (by H. H. Kitson), public bath-houses, and two large piers, one of which leads to Castle Island (p. 96). Liverpool Wharf (Pl. D, 3), formerly Griffin's Wharf, was the scene of the Boston tea-party (p. 88). The statues not yet mentioned include those of Samuel Adams (p. 55), by Miss Whitney, in Adams Sq. (Pl. C, 3); Gov. Winthrop (p. 83), Scollay Sq. (Pl. C, 3), by Greenough; and small figures of Columbus and Aristides in Louisburg Sq. (Pl. B, 4).

The Warren Museum of Natural History, 52 Chestnut St. (Pl. B, 4), is of special interest to anatomists (adm. on application to Dr. Warren, 58 Beacon St., or Dr. Dwight, 235 Beacon St.). It contains the only perfect skeleton of the mastodon.

Cambridge (no good hotels), an academic city with (1895) 81,643 inhab., lies on the N. bank of the Charles River, opposite Boston, with which it is connected by several bridges traversed by electric tramways. It was founded as the fortified 'Newe Towne' in 1630-31, and received its present name in 1638. The road connecting
Watertown and Charlestown is older than the town and was probably laid out over an Indian trail. The interest of Cambridge centres in the fact that it is the seat of *Harvard University*, the oldest, richest, and most famous of American seats of learning.

*Harvard College* was founded by the Commonwealth of Massachusetts in 1636, and received in 1838 a legacy of about $800,000 from the Rev. John Harvard, a graduate of Emmanuel College, Cambridge. Its growth through public fostering and private endowment has been continuous; and it is now attended by about 4000 students, taught by 40 professors and instructors. The faculty of Arts and Sciences includes Harvard College proper, or the academic department (1900 students), the Lawrence Scientific School (science, mining, engineering), and the Graduate School. The Professional Schools embrace divinity, law, medicine, dentistry, veterinary medicine, and agriculture. The list of distinguished alumni includes the names of John Adams (class of 1755), John Quincy Adams (1787), W. E. Channing (1798), Edward Everett (1811), W. H. Prescott (1814), George Bancroft (1817), R. W. Emerson (1821), O. W. Holmes (a native of Cambridge; 1829), Sumner (1830), Motley (1831), Lowell (a native of Cambridge; 1838), E. E. Hale (1839), and Thorace (1837). Among its presidents and professors have been Josiah Quincy, Edward Everett, Jared Sparks, Joseph Story, Asa Gray, Jeffries Wyman, Benj. Peirce, Agassiz, Longfellow, Holmes, and Lowell.

The main buildings of the University are grouped near the centre of old Cambridge, about 3½ M. from Boston, and enclose two spacious quadrangles, shaded by fine elms. The so-called ‘Yard’ has two main entrances, with gates erected in 1890 (W. end) and 1891. Among the buildings are *University Hall* (1815), with the college-offices; *Massachusetts Hall* (1720), the oldest college building now standing; *Harvard Hall* (1766); *Gore Hall* (1841), with the *University Library* (500,000 vols.; numerous interesting relics and autographs); the Boylston Chemical Laboratory; *Sever Hall* (1880), a good example of H. H. Richardson; *Appleton Chapel*, the tiny and outgrown *Holden Chapel* (1744); the *Phillips Brooks Memorial House* (1893); and several dormitory buildings (Hollis, Stoughton, Holworthy, Matthews, etc.). — On the N. side of Appleton Chapel, facing Cambridge St., is the *Fogg Art Museum* (1895), with collections of casts, photographs, and engravings (open daily, incl. Sun., 1-5, Sat. 9-5). — On the other side of Cambridge St. is *Memorial Hall*, by Ware and Van Brunt, erected in memory of the members of the University who fell in the Civil War. It includes a *Vestibule*, with tablets of marble bearing the names of the fallen; the *Sanders Theatre*, in which the graduation ceremonies are held, with a statue of *President Josiah Quincy* (1772-1863), by W. W. Story; and a large *Hall*, containing numerous interesting portraits and stained-glass windows, and used daily as a dining-hall by 1000 students. To the W. of the building is a modern ideal *Statue of John Harvard* (1867-88), by D. C. French. — We now follow Kirkland Ave. (on the N. side of Memorial Hall) to the right and then *Divinity Ave.* to the left. In the latter, to the left, are the *University Museums* (9-5), containing valuable collections of natural history (*Agassiz Museum*) and archeology (*Peabody Museum, Semitic Museum*). The *Glass Flowers* in the former (W. wing, 2nd floor), made by the Blaschkas of Hosterwitz (near Dresden), are of unique interest; they are so perfect as to stand the test of a microscope. Opposite the Museums are the *Divinity Hall* and the *Divinity Library*. The *Lawrence Scientific School*, the *Hemenway Gymnasium*, the Jefferson Physical Laboratory, Hastings Hall (the most elegant of the College dormitories), and the *Law School* (Austin Hall; by H. H. Richardson) all lie to the W. of Memorial Hall. The Botanic Garden and the admirable observatory are ¾ M. to the N.W. *Perkins Hall* and *Conant Hall*, two new dormitories, stand to the N. of the Museums. The buildings of the Medical, Dental, and Veterinary Schools are in Boston (comp. p. 92), and the *Bussey Institution* (Arboretum) is at Jamaica Plain p. 96). — The chief *Athletic Ground* of Harvard is the *Soldiers’ Field* (20 acres), on the S. bank of the Charles, with the fine *Corey Athletic Building*. The *Boat Houses* lie on the N. bank of the Charles.
The Common, to the W. of the University buildings, contains a Soldiers' Monument and a Statue of John Bridge (1578-1665). Near its N.W. angle is the venerable Washington Elm, under which Washington assumed command of the American army on July 3rd, 1775. To the S. of the Elm is Radcliffe College, for women, named in honour of the Englishwoman Anne Radcliffe (Lady Moulson), the first woman to give a scholarship to Harvard (1640). Here about 350-400 young women receive instruction from Harvard professors and are granted the degrees of A. B. and A. M., countersigned by the President of Harvard University. Adjacent is the Shepard Memorial Church. To the W. of this is the Episcopal Theological School, with St. John's Memorial Chapel. — Opposite the S. end of the Common stand the First Parish Church, with a Gothic steeple, and Christ Church, built of materials brought from England and containing a fine set of chimes. Between them is the burying-ground of the old town.

'Like Sentinel and Nun, they keep
'Their vigil on the green;
'One seems to guard, and one to weep
'The dead that lie between'. (O. W. Holmes.)

A little farther on, in Brattle St., facing towards the Charles River, is Craigie House, built in 1759 by Col. Vassall and occupied by Washington in 1775-76, but winning its chief interest from the fact that it was the home of Henry W. Longfellow from 1837 till his death in 1882. It contains many interesting relics of the poet. In Elmwood Ave., which leads to the left from Brattle St. farther on, is Elmwood, the home of James Russell Lowell (1819-91), which, with its grounds, is to be preserved as a public park.

Following Brattle St. or Mt. Auburn St. for about 1 M. (electric car on the latter), we reach the entrance to Mt. Auburn Cemetery, which is very beautifully laid out and contains the graves of Longfellow, Lowell, Sumner, Everett, Josiah Quincy, Rufus Choate, Channing, Motley, Agassiz, Prescott, Phillips Brooks, Oliver Wendell Holmes, and many other distinguished men. Fine view from the tower on the highest point. The Chapel contains some interesting statues.

Among the other important buildings of Cambridge are the City Hall, Main St., designed by A. W. Longfellow; the Public Library, at the corner of Broadway and Irving St.; and the Manual Training School, opposite the last — all three presented to the city by Mr. F. H. Rindge, a native of Cambridge. The Epworth Methodist Church, near Austin Hall, may also be noted. The Riverside Press and the University Press are also interesting. At Cambridgeport are the famous telescope-makers, Alvan Clark & Co. The total value of the industrial products of Cambridge in 1890 was $36,000,000.

Charlestown (Pl. A, B, 1), on the right bank of the Charles River, settled in 1829 and containing 40,000 inhab., is now incorporated with Boston, with which it is connected by railway and other bridges. The most prominent feature of Charlestown is the Bunker Hill Monument (Pl. A, 1), a granite obelisk 221 ft. high, erected in 1825-42.
to commemorate the battle of Bunker or (more properly) Breed's Hill (June 17th, 1775). The *View from the top (adm. 20 c.) includes Boston, Boston Harbour, the Charles and Mystic Rivers, Cambridge, the Blue Hills, etc. Adjacent is a bronze statue of Col. Prescott, by Story, and in the building at the base of the monument is one of Gen. Warren (killed in the battle). Charlestown also contains a Navy Yard (Pl.B, 1; 87 acres; open 9-4), a Soldiers' Monument, and a Monument to John Harvard (p. 94; in the old burial-ground).

The Environ of Boston are very attractive and afford opportunity for many pleasant excursions (numerous historical points now marked by tablets). First in point of interest is the beautiful *Harbour, dotted with numerous islands. It is about 20 M. long from N. to S. and 8 M. wide from E. to W. and has a minimum depth of 23 ft. at low water. The Main Ship Channel, or entrance to the harbour, is between Point Allerton on the S. and the Brewsters, with Boston Light, on the N. Steamers ply regularly from Rowe's, Forster's, and India Wharves to the favourite resorts. Among these are Hull (The Pemberton, $4; Oregon Ho., $3), with the headquarters of the Hull Yacht Club; Hingham (see p. 97); and Nantasket Beach (Rockland Ho., $4; Atlantic House, $3-$4; Nantasket Hotel, from $2, frequented by day-trippers), a fine strip of beach, 5 M. in length, which offers a scene of great animation on Sundays and holidays. A narrow-gauge railway (electric motors) runs from Hull along Nantasket Beach to Old Colony House (see p. 97). Among the chief islands in the harbour are Castle Island (p. 93), with the old Fort Independence; Governor's Island, with Fort Winthrop; Deer Island, with the House of Industry; Long Island, with the City Poorhouses; and George's Island, with the strong Fort Warren. The lights and beacons include Deer Island Light, Long Island Light, Nix's Mate, Bug Light, and Boston Light, at the entrance to the Harbour.

Steamers also ply regularly in summer to Nahant (p. 101; 25 c.), while excursion-trips are made to the North Shore (p. 103), Provincetown (p. 100), Plymouth (p. 97), and other points in Massachusetts Bay.

The most beautiful of the suburban neighbours of Boston is *Brookline, which lies to the S.W. of the city and contains many very handsome residences embowered in trees. It is connected with Boston by railway and electric tramway. One of the most charming of the many charming places here is Holm Lea, the home of Prof. C. S. Sargent, the well-known arboriculturist. Among the buildings of the village proper may be mentioned the Unitarian Church and the new Public Baths. Near Brookline is the large Chestnut Hill Reservoir, the drive round which is a favourite one from Boston. To the S. of Brookline lies Jamaica Plain, with Jamaica Pond (on the W. bank, the home of the late Francis Parkman, the historian), and the Arnold Arboretum, one of the finest institutions of the kind in the world (fine hemlock wood at its S. end; view from the central hill). A little farther to the S. is the pretty *Forest Hills Cemetery, with a fine monument to the sculptor Martin Milmore, by D. C. French (relief of Death staying the sculptor's hand). The cemetery abuts on *Franklin Park (see p. 92). All these places may be easily combined in one afternoon's drive and are accessible by electric car. The Martin Luther Orphan Home, in the district of West Roxbury, occupies the Brook Farm, where a small group of cultivated people, led by George Ripley, made their famous attempt to found a socialistic community (1841-47). Hawthorne, Margaret Fuller, and Channing were among those connected with this experiment. — Chelsea (Broadway, $2; Carleton, $1-$2-$3), to the N. of E. Boston, on the Mystic River, contains a Soldiers' Monument, a Soldiers' Home, a Marine Hospital, a Naval Hospital, and well-known Art-Tile Works. — Those who are fond of rowing and canoeing should go by the Boston & Albany R. R. or by electric car to (11 M.) Riverside (boat-houses, etc.), situated on a lovely reach of the Charles River. On the
edge of the river is Norumbega Park, a pleasure-resort with a restaurant, a rustic theatre, concerts, electrical fountain, boat-house, and other attractions (adm. 10 c.; return-ticket by Commonwealth Ave. Street Railway, incl. adm. 25c.). On the river-bank, about 1 M. below, is a tower erected by Prof. Horsford on what he believed to be the site of the ancient Norumbega.

Other favourite resorts within easy reach of Boston are Newton (see p. 70); the Blue or Milton Hills (views), 8 M. to the S. (comp. p. 74); Revere Beach (p. 101); Arlington Heights (view), reached by train from Boston or by electric car via Cambridge; and the Middlesex Fells (p. 125). Longer excursions may be made to Concord (p. 124) and Lexington (p. 125), Providence (p. 72), Newport (p. 76), etc.

From Boston to New York, see R. 4 to Portland, see R. 9; to the White Mts., see p. 134; to Nantucket and Martha's Vineyard, see p. 98; to Plymouth, see R. 6; to Cape Cod, see R. 8; to Campobello and Grand Manan, see R. 13; to Albany, see R. 17; to Canada, see R. 15.

6. From Boston to Plymouth.

a. Via Whitman.

37 M. Old Colony System of N. Y., N. H., & H. R. R. (Southern Union Station) in 1 1/4-1 1/2 hr. (fare 90 c.).

From Boston to (11 M.) South Braintree, see p. 80. 15 M. South Weymouth; 19 M. Abington. From (21 M.) Whitman a branch-line runs to (7 M.) Bridgewater (p. 100). 30 M. Plympton, at the S. end of Silver Lake; 33 M. Kingston. The monument at Duxbury (see below) is now seen to the left, as the train skirts Plymouth Bay.

37 M. Plymouth, see below.

b. Via South Shore.

46 M. Old Colony System of N. Y., N. H., and H. R. R. (Southern Union Station) in 1 3/4-2 hrs. (fare 90 c.).

From Boston to (10 M.) Braintree, see p. 80. Our train turns to the left (E.). 12 M. Weymouth. — 17 M. Hingham (Lincoln Ho., $ 3; Cushing Ho., $ 2), a quaint village on Boston Harbour, settled in 1635, with the oldest occupied church in New England (1681). In the graveyard (*View) is the grave of J. A. Andrew (d. 1867), the famous 'War Governor' of Massachusetts, marked by a statue. — 18 M. Old Colony House is the junction of a branch-line to Nantasket Beach and Hull (see p. 96). — 2 M. Cohasset (Black Rock Ho., $ 2-3), a delightful shore-resort, with numerous fine villas lining the beautiful *Jerusalem Road. — 27 M. Scituate, an old fishing village, frequented for sea-bathing, was the birthplace of Samuel Woodworth (1785-1842), author of 'The Old Oaken Bucket'. About 4 M. offshore is the Minot's Ledge Lighthouse. — 34 M. Marshfield was the home of Daniel Webster, where he died in 1852. — 38 M. Duxbury (Brunswick Ho., $ 2 1/2) was the home of John Alden and Miles Standish, and a monument 110 ft. high, surmounted by a statue, has been erected near the site of the latter's house. — 42 M. Kingston, and thence to (46 M.) Plymouth, see above.

Plymouth (Samoset Ho., $ 2 1/2-3; The Elms, new; Plymouth Baedeker's United States. 2nd Edit.
Rock Ho., plain, $2; Hotel Pilgrim, $2\frac{1}{2}-3\frac{1}{2}, 3$ M. to the S.E., reached by electric car), an industrial village and summer-resort with (1895) 7957 inhab., lies on the sheltered bay of the same name, opening off the W. side of the larger Cape Cod Bay (p. 100). It is of abiding interest as the landing-place of the Pilgrim Fathers (Dec. 20th, 1620) and the site of the first settlement in New England.

On leaving the railway-station we proceed to the W. to Court St., which we follow to the left. At the corner of Chilton St., to the left, is *Pilgrim Hall* (open daily; 25c.), containing numerous interesting relics of the Pilgrims, paintings of their embarkation and landing, old portraits, etc. — Farther on, to the right, at the corner of Russell St., is the Court House. North St., to the left, leads to the *Plymouth Rock*, on which the landing was made, a granite boulder, now enclosed by a railing and covered with a canopy. The retrocession of the sea has left the rock at some distance above the water. Cole's Hill, opposite the rock, was the burial-place of the early settlers (1620-21), and some human bones found here are now preserved in a chamber in the canopy over the Rock.

We now follow Water Street to Leyden Street, which we ascend to the right, passing (left) the site of the first house. On reaching Town Square we ascend by the path to the right to the ancient *Burial Hill*, with the graves of many of the early settlers, including Gov. Bradford (d. 1667).

A fortified church was erected here in 1622. The View embraces Plymouth Bay, with the Gurnet Lighthouse; Duxbury, with its monument (p. 97); Cape Cod; the Pilgrim Monument (see below); the Manomet Hills (to the S.), etc. — To the S. is Watson's Hill, where the Pilgrims made a treaty with Massasoit in 1621.

We may now descend on the N.W. side of Burial Hill and follow Allerton Street to the N. to (\(\frac{1}{4}\) hr.) the *National Monument to the Pilgrims*, consisting of a granite pedestal 45 ft. high, surmounted by a figure of Faith, 36 ft. high, and surrounded by seated figures, 20 ft. high, representing Law, Morality, Freedom, and Education. The monument was completed in 1888. It is about \(\frac{1}{4}\) M. from the railway-station, which we regain by following Cushman St. to the E.

The *Environs* of Plymouth contain hundreds of small lakes and ponds, of which Billington Sea is the largest. Large quantities of the trailing arbutus or Mayflower (*Epigaea repens*) are found here in spring. — *Manomet Bluffs* (Manomet Ho., § 2), to the S.E. of Plymouth, are frequented in summer.

7. From Boston to Martha’s Vineyard and Nantucket.

Old Colony System of N. Y. N. H. & H. R. R. to (72 M.) Wood’s Hall in 2\(\frac{1}{2}-3\) hrs.; Steamer thence to Cottage City in 1\(\frac{1}{2}\) hr. (through-fare $3.35$, return-fare $3$), to *Nantucket* in 3 hrs. (through-fare $3.35$, return-fare $4$). — An alternative route (same fares) is by train to (1\(\frac{1}{2}\) hr.) New Bedford (p. 100) and thence by steamer (1\(\frac{1}{2}\) hr. and 4 hrs.).

From Boston to (55 M.) Buzzard’s Bay, see R. 8. — The train here diverges to the right from the line to Provincetown and runs
to the S. along the shore of Buzzard's Bay. 57 M. Monument Beach; 59 M. Pocasset; 68 M. Falmouth (Menauhant Hotel, $2-3), the station for Falmouth Heights (Tower's Hotel, $2 1/2-3).

72 M. Wood's Hole (Nobska Hotel, $2) is a small maritime village with a Marine Biological Laboratory and a station of the U. S. Fish Commission, which attract many naturalists and students in the summer months. It is reached from New York via Fall River. Steamers ply hence at frequent intervals to (7 M.) Cottage City, on Martha's Vineyard.

Martha's Vineyard is an island off the S. coast of Massachusetts, 23 M. long and 10 M. across at its widest part. Its inhabitants (4238 in 1895) were formerly occupied in the whale-fisheries, but now owe most of their prosperity to the summer-visiters. The chief resort of the latter is Cottage City (Naumkeag, Pawnee, $2 1/2-3 1/2; Island Ho., Narragansett, Wesley, Oakwood, $2-3), pleasantly situated on the N. E. side of the island. At the large Camp Meeting Grounds 20,000 Methodists assemble every August. A narrow-gauge railway runs to the S. to (5 M.) Edgartown (Sea View Ho., $2) and (8 M.) Katama (Mattakeset Lodge); and there are also summer-settlements at Vineyard Haven (Rudder Grange, from $2 1/2; Tashmoo Ho., $2), with a fine harbour, and West Chop (The Cedars, $3; West Chop Inn, $2-2 1/2). Gay Head, the W. extremity of the island, commands a fine view; the cliffs are 200 ft. high (lighthouse). Part of this end of the island is reserved for the remnant of the Indian inhabitants.

Steamers ply daily from Cottage City to Nantucket (see below) and New Bedford (p. 100) and weekly to Portland (p. 107) and New York (p. 6).

The sandy, treeless island of Nantucket, with (1895) 3016 inhab., lies 12-15 M. to the E. of Martha's Vineyard, but the steamboat course from Cottage City to the quaint town of Nantucket (Nantucket, $2 1/2-4; Ocean Ho., $3; Springfield, Hill Side, $2 1/2-3 1/2; Veranda, Sea Cliff, $2 1/2; Point Breeze, Bay View, $2-3), on the N. side of the island, is about 26 M. Nantucket, like Martha's Vineyard, was once a great whaling-place, but now depends mainly on fishing, farming, and summer-visiters. Catching bluefish is one of the chief amusements of the last. The Athenaeum contains a collection of curios from all parts of the globe. A narrow-gauge railway runs to (10 M.) Siasconset (pron. 'Sconset'; Ocean View Ho., $3), at the E. end of the island. Sankaty Head (90 ft.), 1 M. to the N. of Siasconset, bears a lighthouse and affords a fine ocean-view. At Surfside (Surf Side Ho., $4), 3 M. to the S. of Nantucket, a splendid surf rolls in after a storm. In 1890 the island contained 3268 inhabitants. Both Martha's Vineyard and Nantucket were settled in the 17th cent. and possess buildings and relics of considerable historical interest. Nantucket, in particular, is very quaint and picturesque.
8. From Boston to Provincetown.

Cape Cod.

120 M. OLD COLONY SYSTEM of N. Y. N. H. & H. R. R. (Southern Union Station) in 4½ hrs. (fare $2.95, return-fare $4.80). — Steamers also ply daily to Provincetown from Battery Wharf (50 M. in 4 hrs.; return-fare $4). From Boston to (11 M.) South Braintree, see p. 80. 20 M. Brockton, an industrial city with (1895) 33,165 inhab.; 27 M. Bridgewater, a pleasant village, with (1895) 4686 inhab., a large State Normal School, foundries, and iron-works. — 35 M. Middleboro, a manufacturing town with (1895) 6689 inhab., is the junction of lines to Fall River and Newport (see p. 80, etc. — From (46 M.) Tremont a branch-line runs, via Marion and Mattapoisett (two pleasant little summer-resorts), to (15 M.) Fairhaven (with its fine public library), opposite New Bedford (ferry).

New Bedford (Parker Ho., $2½-3½; Mansion Ho., $2-3), a pleasant little city at the mouth of the Acushnet, was formerly an important whaling port and is now a busy centre of the manufacture of cotton (1,250,000 spindles; products valued at $8,185,256 in 1890). Pop. (1890) 56,251. It contains many fine old mansions and substantial public buildings. Many dismantled whalers still lie in the harbour. A beautiful drive runs round Clark's Point, with Fort Taber (good sea-views). — New Bedford is reached direct from Boston by railway (56 M.) in 1½ hr.

From Tremont our train now runs to the E. 49 M. Wareham. 51 M. Onset Junction, for the line to (1½ M.) Onset Bay, a seaside resort. 56 M. Buzzard's Bay, near which are the seaside homes of ex-President Cleveland and Mr. Joseph Jefferson, is the junction of the line to Wood's Holl (see R. 7).

At (62 M.) Sandwich begins Cape Cod, which stretches hence towards the E. for 35 M. and then to the N. and N.W. for 30 M. more.

The Cape gradually tapers in width from 10 M. to about 1 M. and consists almost entirely of sand, with few rocks or large trees. It encloses Cape Cod Bay (comp. p. 93 and see Map). The inhabitants, genuine descendants of the Pilgrims, are still very quaint and primitive in many of their ways. They form excellent seamen. The Cranberry Bogs produce one of the most lucrative crops of the Cape, and the scene at the cranberry harvest (Sept.-Oct.) is not unlike hop-picking in England. Fast pickers can earn $4-5 a day at the rate of 10 c. per 'measure' of 6 quarts. Some use an ingenious picking-machine.

69 M. West Barnstable is the station for (6 M.) Osterville, a sea-bathing resort on the S. shore of the Cape. 73 M. Barnstable (Barnstable Inn, well spoken of); 76 M. Yarmouth, junction of a short line to (3 M.) Hyannis and (4½ M.) Hyannis Harbor. 85 M. Harwich is the junction of a branch-line to (7 M.) Chatham, whence stages run to Chatham Beach Hotel ($2-3). The line now turns to the left (N.). 89 M. Brewster; 94 M. Orleans; 97 M. Eastham; 106 M. Wellfleet; 111 M. Truro, with a dangerous beach guarded by Highland Light.

120 M. Provincetown (Gifford Ho., Pilgrim Ho., $2; Central, $1½-2) is a quaint old fishing-town (cod and mackerel) with (1895)
4555 inhab. and a fine land-locked harbour formed by the final crook of Cape Cod. The Mayflower anchored here on Nov. 11th, 1620. Good view from High Pole Hill. There is a lighthouse on Race Point.

9. From Boston to Portland.

a. By the Eastern Division of the Boston and Maine Railroad.

108 M. Railway in 3½-4½ hrs. (fares $2½; parlor-car 60 c.). This line runs near the E. coast of Massachusetts, New Hampshire, and Maine, affording frequent views of the ocean (seats to the right). Beyond Portland it runs on to (244 M.) Bangor and (450 M.) St. John's (Canada); comp. R. 10a.

Leaving the N. Union Station in Causeway St. (see p. 81), we cross the Charles River. To the right lies Charlestown, with the Bunker Hill Monument (p. 95). At Prison Point we see the State Prison to the right and the McLean Insane Asylum to the left. Beyond (1½ M.) East Somerville we cross the Mystic. — From (4½ M.) Chelsea (p. 96) a tramway runs to Revere Beach (several hotels), a popular holiday resort of Boston's lower classes, with admirable bathing facilities. It is also reached by the narrow-gauge Boston, Revere Beach, and Lynn R. R., which runs along the beach to Point of Pines (hotel) and (9½ M.) Lynn (see below). The train traverses salt-marshes, crosses Chelsea Creek and the Saugus, and reaches —

11½ M. Lynn (Seymour, Kirtland, $2-3; Algonquin), an industrial city of (1895) 62,354 inhab., with a handsome City Hall and a Soldiers' Monument. It is one of the largest boot and shoe manufacturing towns in the world, producing 12-15 million pairs annually, valued at 25 million dollars. The General Electric Co. employs 2500 hands. View from High Rock. Fine Public Forest Park.

Omnibuses (1½ c.) run from Lynn to Lynn Beach (Red Rock Ho., $4) and (4 M.) Nahant (Hotel Tudor, from $4; Hotel Nahant, $2½-3; Fairview, $2½), a curious rock-built promontory, with fine cliffs and beaches, connected with the mainland by a narrow neck of sand. Nahant contains the seaside homes of so many leading Bostonians as to have been called 'Cold Roast Boston'. Steamboat, see p. 96.

13 M. Swampscott (Lincoln Ho., Ocean Ho., $3-4), a Bostonian seaside resort, with charming combinations of rocky bluffs and sandy beaches. The main line station is about 1½ M. from the sea, and carriages from the hotels meet the chief trains.

A small branch-line diverging here runs along the beach to Marblehead (18 M. from Boston), passing Phillips Beach, Beach Bluff (Hotel Preston, $3½-4; Elms, $2½-3), Clifton (Crowninshield, $2½-3½), and Devereux (Devereux Mansion, $2½-3), all frequented for sea-bathing.

Marblehead (Hotels at Clifton, Devereux, and Marblehead Neck), a seaside town with (1895) 7671 inhab., dates back to early in the 17th cent. and is one of the oldest and quaintest places in New England. It lies on a rocky peninsula and has a fine harbour. Its maritime commerce has, however, deserted it long since, and its chief industry now is the making of shoes. Fishing is also carried on. Among the most noteworthy of the old colonial buildings is the National Bank, built as a mansion for Col. Lee in 1768, with materials brought from England. The Old Fort, to the S. of the town, commands an excellent view. St. Michael's Church dates from 1714. Abbot's Hall, with its lofty tower, contains the town-offices
and a public library. A granite monument near the station commemorates the capture of a British ship in 1776 by a Marbleheader. Marblehead was the birthplace of Elbridge Gerry (of 'Gerrymander' fame; 1744-1814) and is the scene of Whittier's poem 'Skipper Ireson's Ride'. The famous encounter between the 'Chesapeake' and the 'Shannon' took place off the coast here, and most of the crew of the 'Constitution' were recruited in the town. See Samuel Roads' 'History of Marblehead' and Bynner's historical novel 'Agnes Surriage'.

Marblehead Neck (Nanepashemet House, § 3-5), forming the outer arm of the harbour and connected with the mainland by a narrow causeway, is a popular bathing-place and the headquarters of the Eastern and Corinthian Yachting Clubs. The Marblehead course is one of the favourite yacht-racing resorts on the coast, and the little harbour is no stranger to such famous boats as the 'Volunteer', the 'Mayflower', and the 'Puritan'. The numerous islands off the Neck lend great picturesqueness to the sea-view.

As we approach the next station, the notorious Witch Hill (comp. p. 103) is seen to the left.

16 M. Salem (Essex House, $ 2), the mother-city of Massachusetts, is a quiet and ancient town with (1895) 34,473 inhab. and a good harbour flanked by two crumbling forts. Its former commerce with the East Indies has now given way to a small coasting trade, and a few manufactures are also carried on.

Naumkeag, on the site of Salem, was first visited by Roger Conant, one of the Cape Ann immigrants, in 1626, and a permanent settlement was made here by Gov. Endicott two years later. Gov. Winthrop landed here in 1630, and for a time Salem was the capital of Massachusetts. In 1692 Salem was the scene of the extraordinary witchcraft delusion, of which mention is made below. The legislature of Massachusetts met at Salem in 1774 (the last time under the English Crown) and issued a call for a Continental Congress. Privateersmen from Salem were very active during the war. After the war Salem engaged in the East India trade, and many of its citizens attained great wealth and influence. Indeed it is said that about 1810 a Salem merchant was the largest ship-owner in the world. Among the famous natives of Salem are Nathaniel Hawthorne (1804-64), who was Surveyor of the Port here from 1846 to 1850; W. H. Prescott (1796-1859), the historian; Maria S. Cummins (1827-66), author of 'The Lamplighter'; Petrie (1809-50), the mathematician; and W. W. Story, the sculptor (1819-95). Comp. Osgood and Batchelder's 'Historical Sketch of Salem' and Hunt and Robinson's 'Visitors' Guide'.

Essex Institute, 132 Essex St., contains interesting collections of historical paintings, portraits, and relics (open 9-5); and Plummer Hall, next door, on the site of Prescott's birthplace, contains the Salem Athenaeum Library. Behind Plummer Hall is the First Church, the oldest Protestant church in America (1634; apply to the Secretary, Essex Institute). The Peabody Academy of Sciences, also in Essex St. (No. 161), contains ethnological and natural history collections and the East India Marine Museum.

At the head of Derby Wharf, at the S. end of the city, is the old Custom House in which Hawthorne was employed for four years (see above) and the scene of the introduction to 'The Scarlet Letter'. The quaint gambrel-roofed house in which he was born is No. 21 Union St., a narrow side-street extending from Essex St. to Derby St. The Turner House, 34 Turner St., is pointed out as the 'House of the Seven Gables'.
The Roger Williams House, 310 Essex St., in which Roger Williams resided in 1635-36, is said to have been the scene of the preliminary examinations of some of the witches in 1692. The County Court House contains original records of these trials. Galloes or Witch Hill, on which the witches were put to death, is 1 M. to the W. of the city (near the tramway to Peabody; see below).

Davens or Salem Village, the actual scene of the outbreak of the witchcraft delusion of 1692, lies 5 M. to the W. of Salem, on the old Andover highroad (electric tramway). Twenty innocent persons were put to death through the denunciations of eight girls (varying in age from 11 to 20), who met in the house of Samuel Parris, the too credulous minister of the parish. The house has been pulled down, and its site is marked only by a slight depression in the soil. Other spots that became memorable during this Reign of Terror are still pointed out; and a good account of it will be found in books by Upham and Nevins (1893). They all lie in the township of Davens. The farm-house in which Gen. Putnam (1718-90) was born stands about 1 M. beyond Salem Village, at the intersection of the Andover and Newburyport roads.

About 2 M. to the N. of Salem (railway) is Peabody, the birthplace of the philanthropist George Peabody (1795-1869). The Peabody Institute, which he founded and endowed, contains the jewelled portrait of Queen Victoria given by her to Mr. Peabody. He is buried in Harmony Grove Cemetery, a little to the W. A tramway-trip may also be taken to (20 min.) The Willows, a picnic resort overlooking the North Shore and the outer harbour.

A charming "Drive may be taken from Salem along the 'North Shore' to (2 M.) Beverly, (9 M.) Manchester, (12 M.) Magnolia, and (15 M.) Gloucester (comp. below), traversing beautiful woods, passing numerous fine country-houses, and affording views of the sea. The drive in the opposite direction to (4 M.) Swampscott and (6 M.) Lynn is also attractive.

A short branch-line runs from Salem to (4 M.) Marblehead (p. 101), and it is also the junction of lines to Lawrence, Wakefield, Lowell, etc.

On leaving Salem the train passes through a tunnel, 200 yds. long, and crosses the North River.

18 M. Beverly (Trafton Ho., $2), another ci-devant seaport, with (1895) 11,806 inhab., now given over to the making of shoes, is the junction of a branch-line to Gloucester and Rockport.

From Beverly to Gloucester and Rockport, 17 M., railway in $3/4$ hr. (fare 43 c.). This line follows the so-called North Shore, with its fine series of beaches and the innumerable seaside villas of well-to-do Bostonians, to the extremity of Cape Ann. Among the numerous authors and artists who have frequented this lovely bit of sea-coast are Longfellow, Holmes, Whittier, Bayard Taylor, W. M. Hunt, J. Freeman Clarke, Susan Hale, and James T. Fields. Passing Montserrat, Pride's Crossing, Beverly Farms, and West Manchester, all with handsome country-houses, we reach (7 M.) Manchester-by-the-Sea (Masconomo, $4^{1/2}$-5; Brownland Cottages, from $4$; Manchester Ho., $1^{1/2}$-2), described by William Black as "a small, scattered, picturesque-looking watering-place, overlooking Massachusetts Bay, the Swiss-looking cottages of wood dotted down everywhere on the high rocks above the strand". One of its special features is the Singing Beach, the white sand of which emits a musical sound when stirred. The Coolidge Memorial Library is interesting. — From (9 M.) Magnolia Station omnibuses run to (2$1/2$ M.) Magnolia (Magnolia, $3^{1/2}$-6; Ocean Side, $3^{1/2}$-4; Hesperus, $3$-4; Oak Grove, $2^{1/2}$), another pleasant little watering-place on a rocky bluff, adjoining by the fine Crescent Beach. The beautiful woods round Magnolia are among its special charms. A little to the E. is the wonderful Rafe's Chasm (60 ft. deep and 6-10 ft. wide), opposite which is the black reef of Norman's Woe, immortalized by Longfellow in "The Wreck of the Hesperus". A handful of Penobscot Indians generally camp near
Magnolia in summer and sell baskets, etc. The plants which have given name to the place (in bloom in July) grow in a swamp near the station, 13 M. Gloucester (Surfside, $2 1/2-3 1/2), a quaint and foreign-looking city with (1895) 28,211 inhab., is said to be the largest fishing-port in the world, employing 5-6000 men in its fleets. Among the foreign vessels which put into its safe and capacious harbour are several Sicilian barques, bringing salt for the fish-canners. Gloucester is a great resort of artists, owing partly to the picturesqueness of the town itself and partly to the fine scenery of Cape Ann (p. 103). The outer harbour is protected by Eastern Point, with a lighthouse at its extremity. Here lies (2 1/2 M.) East Gloucester (Hawthorne Inn, $ 2 1/2; Beachcroft, Delphine, etc., $ 2), reached by electric tramway from the station, a pleasant sea-bathing resort, affording a striking View of many-spired Gloucester. Elisabeth Stuart Phelps (Mrs. Ward) has her summer-home here (see her 'Old Maid's Paradise').

The Bass Rocks and Good Harbor Beach (The Moorland, $2 1/2) lie a little to the N.E., facing the twin lighthouses on Thatcher's Island. Near West Gloucester lies the picturesque Mount Anne Park. A favourite outing from Gloucester is that 'Round the Cape' (14 M.), and excursions may also be made to (3 M.) Race's Chasm (p. 103) and to Norman's Woe (p. 103).

The railway ends at (17 M.) Rockport, where a huge breakwater is being constructed by the U. S. Government. An electric tramway runs hence, passing large granite quarries, to (2 M.) Pigeon Cove (Pigeon Cove Ho., $3-3 1/2), a summer-resort near the end of Cape Ann. Cars also run from Rockport to the (1 1/2 M.) Land's End (Turk's Head, $3-5). To complete the round of the Cape we go on by electric tramway to Lanesville, Bay View, Annisquam, and Riverdale, and so back to Gloucester.

Returning to the main line, we soon reach (23 M.) Hamilton & Wenham. The former is the seat of the Myopia Hunt Club, with the best golf-links in New England. The ice of Welham Lake is known almost all over the world; the ice-houses are seen to the left. — 28 M. Ipswich (Agawam Ho., $2-2 1/2), a quaint little town, with 4439 inhabitants. We cross the Parker River.

37 M. Newburyport (Wolfe Tavern, $2-3), 'an ancient seablown city at the mouth of the Merrimac', with (1895) 14,552 inhab., has, like other old New England coast-towns, turned from maritime commerce to manufactures (boots, cotton, silver, etc.). The Public Library (State St.) occupies an old colonial mansion in which Washington and Lafayette were entertained. The Marine Museum, in the same street, contains oversea curiosities. In High St. is a good Statue of Washington, by J. Q. A. Ward. George Whitefield (1714-70), the famous preacher, is buried in the Old South Church (Federal St.), behind which is the house in which William Lloyd Garrison (1805-79) was born. The old mansion of the eccentric Lord Timothy Dexter is in High St.

Omnibuses and Steamboats (on the Merrimac) ply daily from Newburyport to (4 M.) Salisbury Beach (Seaside Ho., $2), which extends for 6 M. to the N. of the Merrimac. A tramway runs to (2 1/2 M.) Plum Island (Plum Island Ho., $2 1/2-3), a long sand-dune running S. from the mouth of the Merrimac for 9-10 M. A steamboat also ascends the Merrimac to (11 M.) Haverhill. Other points of interest in the neighbourhood are (3 1/2 M.) Indian Hill Farm, the home of Ben. Perley Poore (1820-87; relics); the Devil's Den, a cave 2 M. to the S.; the Chain Bridge and Hawkswood, on the Merrimac, 3 M. to the N.

A branch-railway from Newburyport runs to (5 M.) Amesbury, long the home of John G. Whittier (1807-92), who has celebrated this whole neighbourhood in his poems. His house is maintained as a memorial of the poet.
In leaving Newburyport we cross the Merrimac by a bridge 500 yds. long (view). Beyond (39 M.) Salisbury (electric line to Salisbury Beach) we traverse the Folly Hill Woods and enter New Hampshire ('Granite State'). Farther on we cross salt marshes. 46½ M. Hampton (Whittier Ho., $2) is the station for Hampton Beach (Leonia, $3-4; *Boar’s Head, $2-3; Hampton Beach Ho., $2-3), 3 M. to the S.E. (stages at the station), and from (49 M.) North Hampton stages run to (3½ M.) Rye Beach (Farragut, $4-5; Sea View, $3½, etc.), the most frequented of the New Hampshire beaches. At the N. end of the part of Rye Beach known as Jenness Beach is Straw Point, a station of the submarine cable to England and also a U. S. life-saving station. — 51½ M. Greenland is the station for (2¼ M.) the N. end of Rye Beach.

57 M. Portsmouth (*Rockingham, $4; Kearsarge, $2-3; Langdon, $2), the only seaport of New Hampshire, is situated on a peninsula 3 M. from the mouth of the Piscataqua. It is a quaint and quiet old town, with 8827 Inhab. and pleasant tree-shaded streets. Many of the old colonial houses are interesting. St. John’s Church, rebuilt in 1806, contains some curious old relics. The Athenaeum contains a library and museum. On Continental or Fernald’s Island, in the river, is the Kittery U. S. Navy Yard (ferry from Daniel St.), where the ‘Kearsarge’ was built. This island is connected by a bridge with Kittery, a village on the N. bank, with some interesting Colonial houses. T. B. Aldrich (b. 1836), James T. Fields (1817-81), and B. P. Shillaber (‘Mrs. Partington’; 1814-90) were born at Portsmouth. In Vaughan St. (No. 32) is the house to which Daniel Webster brought his young bride in 1808. Seavey’s Island was occupied in 1898 by the captive seamen of Adm. Cervera’s fleet.

Stages run daily to (2½ M.) Newcastle (*Wentworth Ho., $4½), a summer-resort on an island at the mouth of the harbour. Close by, at Little Harbor, is the interesting old mansion of the Wentworth family (1750).

From Portsmouth to the Isles of Shoals, 10 M., steamer several times daily in 1 hr. The *Isles of Shoals are nine rocky islands, 6-9 M. from shore, frequented as summer-resorts on account of their pure sea-air and immunity from mosquitoes. The chief are Appledore (Appledore Ho., $3½, 700 beds) and Star Island (Oceanic Ho., $3, 700 beds). On White Island, to the S.W., is a powerful lighthouse. See Celia Thaxter’s ‘Among the Isles of Shoals’ and Lowell’s ‘Appledore’.

From Portsmouth to York Beach, 10 M., railway in ¾ hr. — York Beach (Marshall, § 3-3½, Albracca, § 2-3, Yorkshire Inn, § 2½, and Harmony, § 2½-3, station York Harbor; Garrison, § 2½-3, at the Long Sands, Long Beach station; *Passaconaway Inn, $3, Young’s, $2½-4, Fairmount, § 2½, Ocean Ho., Atlantic, § 2-3, etc., York Beach station) is another long stretch of sand, with numerous hotels and summer-cottages. At its N. end is Cape Neddick, with the rocky ‘Nubble’ (lighthouse) off its extremity; and 4½ M. farther to the N. is ‘Bald Head Cliff’ (85 ft. high). To the N. of this is Ogunquit Beach (Cliff Ho., § 2-3). York Harbor is the fashionable resort, but the Passaconaway Inn, some way to the N. of York Beach station, is also frequented by the best class of visitors. Inland from York Beach rises (6 M.) Mt. Agamenticus (673 ft.; *View).

On leaving Portsmouth we cross the Piscataqua and enter Muine. At (67 M.) Conway Junction diverges a line to North Conway (p. 136).
At (74 M.) North Berwick the Eastern Division of the Boston and Maine R. R. crosses the Western Division, and becomes in reality the W. or inland route. [The stations on both routes are the same, but as most of them lie near the sea they are better described in R. 9 b (see below).]

108 M. Portland, see p. 107.

b. By the Western Division of the Boston and Maine Railroad.

115 M. Railway in 3–4 hrs. (fares as above).

The train starts from the N. Union Station (p. 81) and follows practically the same course as the E. Division till beyond the Mystic (comp. p. 101). It then keeps due N., while the E. Division turns to the N.E. 7 M. Melrose, with a winter-resort named the Langwood Hotel. To the left are *Middlesex Fells, 1800 acres of forest, crag, and pond, reserved as a public park. — 10 M. Wakefield, the junction of a line to (30 M.) Newburyport (p. 104).

23 M. Andover (Mansion Ho., $2–3), an academic town with (1895) 6145 inhab., is best known through the Andover Theological Seminary, the chief educational institution in America of the Congregationalists (about 50 students). The Phillips Academy, the Pynchard High School, and the Abbott Female Seminary also enjoy a considerable reputation. Mrs. Beecher Stowe (1811–96) moved to Andover just after publishing 'Uncle Tom's Cabin' (comp. p. 109), and is buried in the private cemetery of the trustees of Phillips Academy. Mrs. Ward (Eliz. Stuart Phelps) was born here and wrote 'The Gates Ajar' in the still-standing Phelps House. At North Andover (on the Peabody & Lawrence branch) are the large Stevens Cotton Mills. — 26 M. South Lawrence lies on the right bank of the Merrimac, opposite Lawrence (Franklin Ho., $2–3; Brunswick, $2), one of the largest industrial cities of New England, with (1895) 52,164 inhabitants. Its numerous large and substantial Cotton and Woollen Mills, employing 13,000 hands and producing annually 160 million yds. of cloth, line both sides of the Merrimac and are driven by water-power supplied by the construction of a huge dam in 1845 (fall of 28 ft.; 10,000 horse-power; value of manufactures in 1890, $26,400,000). The Pacific Mills, with 5000 hands, are among the largest cotton and worsted mills in the world; their annual produce amounts to 100,000,000 yds. of material, their pay roll to 380,000.

Beyond South Lawrence we descend along the right bank of the Merrimac† to (323/4 M.) Bradford (with an old and famous academy for girls) and (331/4 M.) Haverhill (Webster, $21/2), a shoe-manufacturing town with (1895) 30,209 inhab. (manufactures in 1890, $25,340,000). In Main St. is a poor statue of Hannah Duston (p. 130). The poet Whittier was born in 1807 near Lake Kenoza (the scene of 'Snowbound'); house marked by a bronze

† Some trains cross the Merrimac and enter Lawrence proper.
tablet), 1 M. to the N.E. of Haverhill. A branch-line runs from Haverhill to (16 M.) Newburyport (p. 104).

We now leave the Merrimac and enter New Hampshire (p. 105). 41 M. Newton Junction, for Merrimac. To the left lies Country Pond; to the right rises Morse Hill (312 ft.). 51 M. Exeter (Rail. Restaurant; pop. 4284), with another Phillips Academy, which has numbered among its pupils Daniel Webster, George Bancroft, and Edw. Everett. To the right flows Exeter River. — 68 M. Dover (American Ho., $2\frac{1}{2}$), a cotton and woollen manufacturing city, with 12,790 inhab., settled in 1623, lies on the Cochecho.

Dover is the junction of lines to (28 M.) Alton Bay, on Lake Winnipesaukee (p. 181), and to Portsmouth (p. 105).

Entering Maine, we cross the Salmon Falls River at (72 M.) Salmon Falls, with cotton-mills; and at (78 M.) North Berwick the W. Division intersects the E. Division (see p. 106). 85 M. Wells Beach (Bay View Ho., $1-2$). To the right we have a view of the sea. From (90 M.) Kennebunk a line runs to (5 M.) Kennebunkport (*Ocean Bluff Ho., $3-4$; Parker Ho., $3-3\frac{1}{2}$; Glen Ho., $2-3$), an old maritime village at the mouth of the Kennebunk, now in repose among summer visitors, who congregate chiefly on Cape Arundel.

99 M. Biddeford (Thatcher, $2$; Goose Rocks, $1-2\frac{1}{2}$) and (100 M.) Saco (Saco Ho., $2$), two busy towns (14,443 and 6075 inhab.), on opposite sides of the Saco River, which here falls 55 ft. and furnishes power for cotton-mills, saw-mills, and machine-shops.

Steamers descend the Saco to (3 M.) Biddeford Pool (Evans Ho., $2\frac{1}{2}$) at its mouth, connecting at Camp Ellis with Orchard Beach Railway (see below).

104 M. Old Orchard Beach (*Old Orchard Ho., Fiske, Seashore, $3-4$; Aldine, $2\frac{1}{2}-3$; Everett, Lawrence Ho., $2-3$), one of the best and most popular bathing-beaches in New England. The pier here, built in 1898 and 1950 ft. in length, claims to be the longest ocean-pier in the world. The train runs close to the beach, with the large hotels to the left. The beach extends from the Saco to (10 M.) Scarborough; the beach railway runs from Camp Ellis (see above) to Old Orchard Beach Junction, on the E. Division.

From (109 M.) Scarborough omnibuses run to (3 M.) Scarborough Beach (Checkley, $2\frac{1}{2}-3\frac{1}{2}$; Atlantic, Jocelyn, $2\frac{1}{2}$), 2 M. to the S. of which is Prout's Neck (Southgate Ho.). — Farther on, the train crosses the Fore River and enters the Union Station at —

115 M. Portland. — Hotels. Congress Square, $2\frac{1}{2}-5$; Falmouth House, Middle St., in the centre of the town, $2-4$; Preble House, Monument Sq., $2\frac{1}{2}-4$; West End, opposite the Union Station, $2-3$.

Steamboats run regularly from Portland to Boston (daily, in 8 hrs.; $1$, stateroom $1-2$), New York ($3$, including stateroom), Eastport and St. John, Mt. Desert and Machias (see p. 113), and the Kennebec River. Small steamers ply frequently from the Custom House Wharf to Harpswell, Peak Island, Cushing's Island, and other points in Casco Bay. In winter Portland is the American port of the Allan Ocean Steamers.

Electric Tramways run through the principal streets, to the railway stations, and to various points in the environs.

British Vice-Consul, Mr. J. B. Keating.
Portland, the largest city in Maine, with (1890) 36,425 inhab., is finely situated on a hilly peninsula projecting into Casco Bay. Its harbour is deep and well protected, and its commerce with the West Indies and Great Britain is considerable. The number of trees in its streets have earned for it the name of 'Forest City'.

The town was originally founded in 1632 and was at first named Machigonne or Casco and afterwards Falmouth. It suffered severely at the hands of the French and the Indians and in 1775 was almost entirely destroyed by the British. After the war it was rebuilt and in 1786 received the name of Portland. Among the distinguished natives of Portland are Longfellow (1807-82), N. P. Willis (1807-67), 'Fanny Fern' (Mrs. Parton; 1811-72), Neal Dow (1803-97), and Commodore Preble (1761-1807), of Tri-politan War fame.

Most of the principal buildings are in Congress Street, which runs the whole length of the peninsula, from the Western Promenade on Bramhall's Hill (175 ft.) to the Eastern Promenade on Munjoy's Hill (160 ft.). The Observatory (fee) on the latter affords an excellent *View of the city, the bay, the White Mts. (p. 134), and the Sandwich Mts. (panorama by Abner Lowell). Near the middle of Congress St. is the City Hall, a large light-coloured building, with a dome; and hard by, in Middle St., is the tasteful Post Office, with a Corinthian portico. A little to the E. of the City Hall, Congress St. passes Lincoln Park (right) and the Roman Catholic Cathedral (left), and a little farther on is the Eastern Cemetery, with the graves of Commodore Preble (see above) and Commanders Burrows and Blythe of the 'Enterprise' and 'Boxer' (p. 112). At the intersection of Congress St. and State St. (see below) is a good Statue of Longfellow, by Franklin Simmons. The War Monument in Monument Sq. is by the same artist.

Among the other chief buildings are the Custom House, near the Boston steamboat-wharf; the Maine General Hospital; and the buildings of the Y. M. C. A., the Natural History Society, and the Maine Historical Society and Public Library. Deering's Oaks, the city park, lie a little to the N. of the W. end of Congress St.—State Street, leading from Deering's Oaks to the harbour, contains some good specimens of old Colonial houses and two fine churches (St. Luke's Cathedral and St. Dominic's). — The house in which Longfellow was born stands at the corner of Fore St. and Hancock St., close to the Grand Trunk R. R. Station. The Wadsworth Mansion, in which he lived, is next door to the Preble Hotel (see p. 107).

The Environs of Portland are attractive. Pleasant drives may be taken to Evergreen Cemetery (2½ M.); to Falmouth Foreside, 6 M. to the N.; and to (3 M.) Cape Cottage Hotel ($3), the (8 M.) Ocean Home ($3), and (9 M.) the Twin Lighthouses, all on Cape Elizabeth, to the S.

*Casco Bay, an admirable yachting water, is crowded with pretty wooded islands, many of which are favourite summer-resorts, especially (3 M.) Cushings' Island (*Ottawa House, $3-4, much frequented by Canadians; fine cliffs), Peak Island (2½ M.; Peak Island Ho., $2; Oceanic Ho., Avenue Ho., $1½-2, and many others; frequented by day-excursionists), Long Island (4 M.; Casco Bay Ho., Granite Spring Ho., Dirigo Ho., $1½-2), and Little Chebeague (6 M.; Sunnyside, $2-3, Waldo, $3).

a. Via Bangor.

190 M. Maine Central Railroad to (180 M.) Bar Harbor Ferry in \(\frac{5}{2} - \frac{7}{4}\) hrs.; steam-ferry thence to (10 M.) Bar Harbor in \(\frac{3}{4}\) hr. (through-fare $5; parlor-car $1.25, sleeper $2). From Boston to Bar Harbor by this route in \(\frac{9}{2} - 12\) hrs. (fare $6\frac{1}{2}, parlor-car $1.50, sleeper $2).

Portland, see p. 107. The line runs to the N., affording a good retrospect of the city, and soon crosses the Presumpscot. 11 M. Cumberland Junction (p. 118). We cross the Grand Trunk Railway at (15 M.) Yarmouth Junction (comp. p. 121). — 30 M. Brunswick (Toniine, $2-2\frac{1}{2}; Rail. Restaurant), a flourishing town of 6012 inhab., lies at the head of the tidal waters of the Androscoggin, which forms three small falls here. It is the seat of Bowdoin College (near the station), one of the leading institutions of learning in New England (3-400 students). The Walker Art Building, belonging to the college, is adorned with frescoes by Elihu Vedder, Abbott Thayer, Kenyon Cox, and John Lafarge, and contains about 150 paintings, including some good portraits and works attributed to Hogarth, Brouwer, Berghem, Hondekoeter, Van Dyck ("Portrait), Rubens, and Teniers. ‘Uncle Tom’s Cabin’ was written at Brunswick, while Mrs. Stowe’s husband was a professor at Bowdoin (pron. ‘Bowden’) College (1851-52). Longfellow was also a professor at Bowdoin College in 1829-35; and Hawthorne, Longfellow, Governor Andrew (p. 97), and Chief Justice Fuller are among its alumni.

Brunswick is the junction of the line to Bath and (56 M.) Rockland (see E. 10b). Lines also run hence to (20 M.) Lewiston (p. 118) and Lewiston Junction (p. 118).

Beyond Brunswick we cross the Androscoggin and run to the N. along the Kennebec (to the right). 48 M. Iceboro, with the largest ice-houses in the world (on the river; 1,000,000 tons of ice are shipped from the Kennebec yearly to all parts of the world); 56 M. Gardiner, a city with 5491 inhab., engaged in wood-sawing in summer and ice-cutting in winter.

63 M. Augusta (Augusta Ho., Cony Ho., $2), the capital of Maine, with 10,527 inhab., lies on both sides of the Kennebec, about \(\frac{1}{2}\) M. below the huge Kennebec Dam, which affords ample water-power for its factories. The principal buildings are the Post Office, the Lithgow Library, the City Hall, and the solid granite *State House, the dome of which commands a beautiful *View. On the E. side of the river are the huge State Insane Asylum and the Kennebec Arsenal. Augusta was the home of Mr. J. G. Blaine (d. 1893). There is a Soldiers’ Monument. In 1898 a memorial tablet was placed on the historic Fort Western (1754). Steamers ply from Augusta to Gardiner (see above), connecting with large boats for Portland, Boston, etc.

In leaving Augusta we cross the Kennebec, which now runs to our left. Beyond (80 M.) Winslow we cross it again, near its confluence with the Sebasticook. — 82 M. Waterville (Elmwood Ho.,
$2-2\frac{1}{2}$; Rail. Restaurant), with 7107 inhab., large cotton-mills, and a Baptist college (Colby College; 220 students), is the junction of the Lewiston division of the Maine Central R. R. (see p. 118) and of a branch-line to (18 M.) Skowhegan (5068 inhab.). Gen. Ben Butler (1818-93) was a student of Colby College. The trotter ‘Nelson’, which long held the record for stallions (2.103\(\frac{3}{4}\)), was reared on a farm adjoining Waterville. On the Kennebec near Waterville are the Taconic Falls. — The train now crosses and leaves the Kennebec, and passes over the watershed between that river and the Penobscot. From (96 M.) Burnham a branch-line runs to (34 M.) Belfast (5294 inhab.), on Penobscot Bay; and from (103 M.) Pittsfield another runs to (8 M.) Hartland. To the right flows the Sebasticook. 110 M. Newport is the junction of a line running N. to Dexter, Dover, and (66 M.) Moosehead Lake (see below).

137 M. Bangor (Bangor Ho., $2-2\frac{1}{2}$; Penobscot Exchange, Bangor Exchange, Windsor, $2$; Rail. Restaurant), the third city in Maine, with 19,103 inhab., is commandingly situated on the Penobscot, at the head of navigation and 60 M. from the ocean. Its chief industry is the sawing and shipment of timber, about five million ft. of lumber being annually floated down to it from the vast forests of Northern Maine. Among its chief buildings are the Custom House, the Theological Seminary, and Norumbega Hall.

From Bangor to St. John (in New Brunswick), 205 M., railway in 6$\frac{3}{4}$-7$\frac{1}{4}$ hrs. (from Boston to St. John, 450 M., in 15-17 hrs.). This line is a continuation of that described above from Portland to Bangor, and passes through a district of great importance to the sportsman. The following are the chief stations: — 13 M. Oldtown, the junction of the line to Moosehead Lake (see below). The second railway in the United States, opened in 1836, ran from Oldtown to Bangor. — 59 M. Mattawamkeag, the junction of a line to Greenville (Moosehead Lake) and thence to Lake Megantic and Sherbrooke (p. 111). — Beyond (115 M.) Vanceboro (Rail. Restaurant) the train crosses the St. Croix, enters New Brunswick (Canada), and passes on to the Canadian Pacific Railway. 121 M. McAdam Junction, for the line to (43 M.) St. Andrews ("Algonquin Hotel, $3-5"). — 161 M. Fredericton Junction, for (22 M.) Fredericton (Queen’s, Barker, $2-2\frac{1}{2}$; pop. 6502), the capital of New Brunswick, whence we may descend the St. John River (fine scenery) by steamer to (84 M.) St. John (see Baedeker’s Canada). — 205 M. St. John (Dufferin, Royal, $2\frac{1}{4}$; Victoria, $2-3$; New Victoria, $2-2\frac{1}{4}$; Aberdeen), the commercial metropolis of New Brunswick (pop. 39,179) and sixth city of the Dominion of Canada, finely situated at the mouth of the St. John River. For details, see Baedeker’s Canada.

From Bangor to Greenville (Moosehead Lake), 59 M., Bangor & Aroostook Railroad in 4 hrs. (fare $2.30). This line diverges to the left from the Maine Central R. R. at (13 M.) Oldtown (see above) and traverses a sparsely peopled district, with some picturesque scenery. — At (40 M.) Milo Junction the railway forks (branch to Ashland, see p. 111). — 53 M. Dover is the junction of the line from Newport and Dexter (see above). — 89 M. Greenville (Moosehead Inn, Ewolety Ho., $2-2\frac{1}{2}$; Lake Ho., $2$), at the S. end of Moosehead Lake. [Another railway-route from Bangor to Greenville runs via Newport and joins the above route at Dover.]

Moosehead Lake, the largest in Maine, with 400 miles of shore-line (35 M. long, 1-15 M. wide), lies about 1000 ft. above the sea and is drained by the Kennebec River. Its waters abound in trout and other fish, and the forests surrounding it are well stocked with moose, caribou, deer, and ruffled grouse. Black flies and mosquitoes are very troublesome
to Mount Desert. MOOSEHEAD LAKE. 10. Route. 111

here in June and July. About 25 steamers ply on the lake. — From Greenville a small steamer, connecting with the regular trains, plies in summer to (17 M.) Mt. Kineo (1760 ft.; *View), which projects into the lake on the E. side, so as to narrow it down to a channel 1 M. across. The *Mt. Kineo Hotel ($2/2/1; 500 beds) is a favourite resort of anglers and their families. The steamer goes on from Mt. Kineo to (18 M.) the N. end of the lake, whence a portage of 2 M. leads to the upper waters of the Penobscot River. Other steamers make the round trip every week-day. Enterprising travellers may descend the Penobscot and the lakes along it in birch-bark canoes (with guides) to Mattawamkeag (p. 110; 6-8 days). A good view is obtained to the E. of Mt. Katahdin or Katahdin (5200 ft.), which is also visible from Moosehead Lake (to the N.E.) in clear weather. Greenville is also a station on the Canadian Pacific Railway from St. John, via Mattawamkeag (comp. p. 110), to Lake Megantic (84 M. from Greenville; frequented by sportsmen) and Sherbrooke (151 M. from Greenville; see p. 110). This line traverses an excellent sporting district (comp. Baedecker's Canada).

From BANGOR to ASHLAND (166 M.) and LIMESTONE (204 M.), Bangor & Aroostook Railroad in 6½-8 hrs. (fares, $6.40, $7.25; parlor-car to Caribou §1). This railway, completed in 1896, opens up the hitherto little accessible ‘Aroostook Region’, which is full of opportunities for the sportsman and angler. The arrangements for guides, camps, and inns are similar to those in the Moosehead district. Full information may be obtained from the General Passenger Agent of the railway, at Bangor. — From Bangor to (40 M.) Milo Junction, see p. 110. At (46 M.) Brownville Junction, where a short branch-line diverges to (9 M.) the Katahdin Iron Works (Silver Lake Ho.), we cross the Canadian Pacific Railway (comp. Baedecker's Canada). We then traverse the districts of Sacoctic and Seboit Lakes, on which are numerous camps and sporting stations. 75 M. Norcross (Norcross Ho., $2), for Twin Lakes; 80 M. Millinocket, for Millinocket Lake. — 50 M. Staceyville (East Branch Ho., §1) and (103 M.) Sherman (Aroostook Ho., §1) are the nearest rail. stations to Mt. Katahdin (see above), which rises about 19 M. to the W. — From (104 M.) Patten Junction a short line runs to (6 M.) Patten (Patten Ho., §2), a sporting centre. — At (124 M.) Ashland Junction the line forks. The right branch runs to the E. to (140 M.) Houlton (Snell Ho., Exchange, §2), where it connects with the C. P. R. (comp. Baedecker's Canada), and thence to the N. to (180 M.) Fort Fairfield Junction (for a line to Aroostook, see Baedecker's Canada), Caribou (200 M.; Vaughan, Burleigh, §2), and (216 M.) Limestone (Bangor & Aroostook Ho., §1½). From Caribou the line is to be prolonged to (24 M.) Van Buren. — The left branch runs to the N. from Ashland Junction (see above) to (166 M.) Ashland (Ashland Ho., Exchange, §1½).

The Bar Harbor branch crosses the Penobscot and runs from Bangor toward the S.E. The chief station is (167 M.) Ellsworth, a ship-building place with 4804 inhab., at the head of navigation of Union River. We pass Green Lake (well stocked with landlocked salmon and trout) on the left and another small lake on the right. At (173 M.) Franklin Road we have our first view of Mt. Desert (right). 180 M. Mt. Desert or Bar Harbor Ferry (Bluffs Hotel, $2½; Rail. Restaurant). The train runs alongside the steamer, which crosses *Frenchman Bay to (190 M.) Bar Harbor (p. 114), sometimes calling first at (185 M.) Sorrento (Sorrento Hotel, $3-5, with good café-restaurant), a pleasant resort on the mainland.

b. Via Rockland.

156 M. MAINE CENTRAL RAILROAD to (86 M.) Rockland in 3¾ hrs.; Steamer from Rockland to (70 M.) Bar Harbor in 6-7 hrs. (through-fare $3½).

As far as (30 M.) Brunswick this route coincides with that above described. Here we diverge to the right and soon reach (38 M.)
Bath (Shannon, Phœnix, $2), a small ship-building town with 8723 inhab., on the Kennebec, 12 M. from the sea.

Small steamers ply from Bath down the Kennebec to Popham Beach (Rockledge, $3-4; Riverside, $2), Boothbay (Boothbay Ho., $2), Squirrel Island (Squirrel Inn, $2 1/2), and other points in the charming archipelago at the mouth of the river. A little to the E. of the estuary of the Kennebec is the historic peninsula of Pemaquid, off which the American brig 'Enterprise' captured the British brig 'Boxer' after a hard contest (Sept. 4th, 1814). Both commanders were killed (see p. 108).

Through-carriages for Rockland are carried across the river to Woolwich. 56 M. Newcastle & Damariscotta. To the left lies Damariscotta Lake.— 86 M. Rockland (Thorndike Hotel, $2 1/2; *Bay Point, at the breakwater, $3 1/2-4), a ship-building and lime-burning city, with 8174 inhab., is situated on Owl's Head Bay, an inlet of Penobscot Bay. Steamers ply hence to Boston, Portland, Bangor, Mt. Desert, and several of the islands in Penobscot Bay. We here leave the railway and embark on the Mt. Desert steamer.

About 8 M. to the N. (reached by electric tramway or steamer) lies Camden (Bay View, $2 2/12; Mountain View, $2), a favourite seashore-resort, backed by fine hills (Mt. Megunticook, etc.) rising to a height of 1300-1450 ft.

Two steamers, following somewhat different routes, ply at present from Rockland to Bar Harbor.

That of the Boston & Bangor Steamship Co. leaves Rockland in the morning, on the arrival of the steamer from Boston to Bangor, and steers to the E., between the islands of North Haven on the left and Vinal Haven and Calderwood's Neck on the right, passing through the so-called Fox Island Thoroughfare. It then crosses Isle-au-Haut Bay, with the Isle au Haut (so named from its height) lying at some distance to the right. We next enter the Deer Island Thoroughfare, threading our way amid the archipelago of small islands to the S. of Deer Isle and touching at Stonington, on Deer Isle itself (small steamers hence to Isle au Haut). Farther on we pass Swan Island and the Placentia Isles (both to the right), while the mountains of Mt. Desert come in sight ahead. Passing Bar Harbor Head (lighthouse), at the S. end of Mt. Desert (left), we soon turn to the N. (left) and steer between Mt. Desert and Cranberry Island. After calling at South West Harbor (p. 117) and North East Harbor (p. 116), on opposite sides of the entrance to Somes Sound (p. 117), the steamer steers to the E., with Greening's Island and Bear Island (lighthouse) to the left and Sutton Island to the right, and calls at Seal Harbor (p. 116). It then turns again to the N. and runs along the fine E. coast of Mt. Desert, passing Otter Cliffs, Great Head (p. 115), etc. Egg Rock Lighthouse lies at some distance to the right. About 5-6 hrs. after leaving Rockland we reach Bar Harbor (p. 114), passing the pretty little Porcupine Island.

The steamer of the Portland, Mt. Desert, & Machias Co. leaves Rockland every Wed. & Sat. at 5.20 a.m. It first steers to the N. through the beautiful archipelago of Penobscot Bay, leaving North Haven (see above) to the right, and passing the long Islesboro (Isles-
boro Inn, $3½-4) to the left. To the left, too, on the mainland, rise the Camden Hills (p. 112). About 2 hrs. after leaving Rockland we reach Castine (Acadian Hotel, $2½-3; Pentagoet Ho., Castine, $2), a pleasant little town on a peninsula projecting into the bay, now a favorite summer-resort. The early historical associations with Baron Castine are celebrated by Longfellow. The steamer next retraces its course for a time, turns to the left (E.), and enters the narrow Eggemoggin Reach, between the mainland on the left and Little Deer and Deer Islands on the right. It touches here at Sargentville and Sedgwick, two resorts on the mainland, and at Deer Isle. Quitting this sound we steer first to the N.E. round Naskeag Point and then to the S.E. between some small islands, and join the steamer-route above described near the Placentia Islands (p. 112). We reach Bar Harbor (p. 114) about 5 hrs. after leaving Castine.

Beyond Bar Harbor the steamer goes on to (4 hrs.) Machiasport (p. 114).

The island of *Mount Desert, the Indian Pemetic, lying just off the coast of Maine, in Frenchman Bay, about 110 M. to the E. of Portland, is 15 M. long, 4-12 M. wide, and 100 sq. M. in area. In 1890 it contained 5337 inhab., but this number is immensely increased during summer. Within a moderate compass it contains a considerable variety of picturesque scenery, and its mountains, or rather hills, rising abruptly from the sea, have no parallel along the whole Atlantic coast of the United States and are much more imposing than their moderate elevation would suggest.

History. Mount Desert (accent on the first syllable) was first sighted in 1604, by Champlain, who gave it the name of 'Isle des Monts Deserts'. In 1613 a small French colony, sent out by Mme. de Guecheville, to convert the Indians, planted the settlement of St. Sauveur on Somes Sound (see below), but it was soon destroyed by the English (see Parkman's 'Pioneers of France in the New World'). In 1688 Louis XIV. granted the island to M. de la Motte Cadillac; but it was not till 1786 that his granddaughter, Mme. de Gregoire, came over to claim the property,—a claim that was allowed by the State of Massachusetts in 1787. The island has, however, long since passed out of the possession of this family. It was about 1850 that Mt. Desert was first visited by artists and other summer-guests, but it was not till ten or fifteen years later that Bar Harbor (p. 114) began to be what it now is—one of the most frequented and fashionable summer-resorts in the United States.

Physical Features. The mountains of Mt. Desert are mainly confined to the central S. parts of the island, where they run N. and S. in roughly parallel ridges, separated by narrow, trough-like valleys. The place of one of these valleys is taken by Somes Sound, which penetrates to the heart of the island. Thirteen main peaks are reckoned, the highest of which is Green Mt. (1227 ft.) in the S.E. corner. Numerous small mountain lakes and streams afford trout and land-locked salmon fishing. Prof. Shaler finds evidence that even the highest summits of Mt. Desert were submerged beneath the sea for some time after the disappearance of the ice of the glacial epoch. — The Climate of Mt. Desert is usually cool and refreshing in summer, but fogs are rather frequent. The water is too cold for much bathing. There are several good roads and numerous well marked footpaths, especially in the vicinity of Bar Harbor. The Bar Harbor...
Village Improvement Association has lately constructed many new paths and trails, and a ‘Path Map’ of the E. part of the island has been issued (1896; price $1). On the N. the island is connected with the mainland by a bridge.

Approaches. Most of the usual approaches to Mt. Desert are indicated in R. 10. We may also go from Boston to Bar Harbor by a steamer of the Boston & Bangor Steamship Co., which starts daily at 5 p.m. and connects at Rockland early next morning with the Bar Harbor boat of the same company (see p. 111; through-fare $4, stateroom $1-2). Or we may proceed by land to Portland and there take the steamer ‘Frank Jones’ of the Portland, Mt. Desert, & Machias Co. which starts at 11 p.m. on Tues. & Fris. or on arrival of the 7 p.m. train from Boston, calls at Rockland next morning, and proceeds thence to Bar Harbor (comp. p. 112; through-fare $4-1/2, stateroom $1-1/2-2). — Comp. Sherman’s ‘Bar Harbor Guide’.

As nine-tenths of the visitors to Mt. Desert land at Bar Harbor, it is convenient to begin with that watering-place.

Bar Harbor. — Hotels. LOUISBURG, Atlantic Ave., $4-5; MALVERN, Kebo St., $3; ST. SAUVER, $3-4; LYNAM’s, BELMONT, Mt. Desert St., $2-1/2-3; NEWPORT HOUSE, near the steamer-wharf, $2-1/2-3; MARLBOROUGH, Main St., R. from $1; ROCKAWAY, R. from $1; BIRCH TREE INN, $2-3; PORCUPINE, Main St., R. from $1. Decreased rates by the week or month, and before or after the height of the season. — Boarding Houses, $4-10 per week; Furnished Lodgings from $2-3 upwards. — ‘Sprout’s Restaurant, Main St.

Carriages. With one horse $11/2 per hr., with two horses (1-6 pers.) $2-1/2. To the different places of interest on the island by tariff. — The favourite carriage is the ‘Buckboard’, an excellent easy-riding conveyance for hilly roads, made here to hold 2-15 persons.

Steamers to Rockland, see p. 112; Boston, p. 109; Machiasport, p. 113; Mt. Desert Ferry, p. 111. Steamers also ply to Bangor, to Sorrento (p. 111) and Sullivan, to (4 M.) Winter Harbor (Grindstone Inn), on the other side of the bay, and to Seal Harbor (p. 116), North East Harbor (p. 116), South West Harbor (p. 117), and Somesville (p. 117).

Boats for rowing, sailing (cat-boats), and fishing can be hired at moderate rates; also steam-launches. Row-boat 85c. per hr., with man 75c.; canoes, with Indians to paddle, 75c. per hr. — Yachts frequent the harbour in large numbers. — A visit of the Atlantic Squadron of the U.S. Navy is often one of the events of the season at Bar Harbor, and is accompanied by a round of gaieties.

Kebo Valley Club, Eagle Lake Road, for golf, tennis, dinners, and dances; Mount Desert Reading Room and Club, Birch Point; both open to strangers on introduction by a member. — Canoe Club, Bar Island. — Indian Encampment, with baskets and curiosities for sale.

Comp. the current issue of the Bar Harbor Record (5c.).

Bar Harbor, a popular watering-place frequented by 10-20,000 visitors every summer and almost vying in importance with Newport (p. 76), lies on the E. coast of Mt. Desert, on Frenchman Bay, opposite the pretty little Porcupine Islands and within 2 M. of the N.E. base of Green Mt. (p. 115). Its name is derived from the bar, uncovered at low water, which connects it with Bar or Rodick’s Island. The principal street is Main Street (running S. from the steamboat-wharf), from which West St., Cottage St., and Mt. Desert St. run to the W. A fine view is had, across the harbour, of the hills on the mainland, and numerous pleasant walks and drives may be made in the neighbourhood. A huge breakwater, now in construction, will render the harbour one of the best on this coast.

The following Walk of 41/2 M. shows most of the points of interest in Bar Harbor itself. Starting at the steamboat-wharf and passing the
Rockaway Hotel, we enter the 'Shore Walk or Tow Path, which, like the Cliff Walk at Newport (p. 78), runs between the sea on one hand and beautiful villas and lawns on the other. The Mt. Desert Reading Room (see p. 114) stands at the beginning of the walk. A little farther on, off the shore, is Balance Rock. The stone tower farther on is at the end of a bowling-alley belonging to the Villa Edgemere. From Reef Point a path runs to the E. towards Main St. Just before reaching Wayman Lane, also leading to Main St., we pass a handsome house called The Briars. Beyond the lane we pass The Lodge, Redwood, and Kenarden Lodge, and reach (¾ M.) the pretty little Cromwell Harbor, whence a private road leads to (1/4 M.) the S. end of Main St. Turning to the right, we follow Main St. for 10 min. and then turn to the left into Mt. Desert St. At the (10 min.) end of this street we descend Eden St. or the Duck Brook Road to the right to (5 min.) the bridge over Eddy Brook. Continuing to follow this road for about 1 M., with villas on both sides, the grounds on the right extending down to the bay, we reach the Duck Brook Bridge, whence a pleasant Footpath ascends to the left along the brook and through the trees to (2 M.) the Eagle Lake road (see below). The so-called Bay Drive begins at the Duck Brook Bridge. In the meantime, however, we turn at the bridge and retrace our steps along Duck Brook Road to (1/2 M.) Highbrook Road, which diverges to the right and runs circuitously over the hill, rejoining Duck Brook Road (Eden St.) about 1/2 M. farther on. In Highbrook road, to the left, is Stanwood, the summer-home of Mr. James G. Blaine (d. 1899). We finally return (10 min.) to Main St. through West St. or Cottage St., which both run to the left from Duck Brook Road.

EXCURSIONS. The ascent of *Green Mountain (1527 ft.) is, perhaps, the best excursion to begin with. We may drive the whole way to the top (4 M.) by a rough road (toll 25 c. for each horse and for each passenger, 10 c. for each walker), diverging to the left from the road to Eagle Lake (the prolongation of Mt. Desert St.) about 1 ¾ M. from the village. Walkers may ascend by the same route (1½-2 hrs.), but will do better to follow the Path ascending the gorge between Green Mt. and Dry Mt. (comp. Map; sign-posts). The View from the top includes Bar Harbor, Frenchman Bay, almost the whole of Mt. Desert, the ocean, and the coast of Maine. Good walkers may descend along the ridges (route marked by cairns) to (1 hr.) the Otter Creek Road (p. 116) and return by it to Bar Harbor. — Mt. Kebo (405 ft.), between Green Mt. and Bar Harbor, is ascended by a path (2 M.). — Dry Mt. (1285 ft.) is ascended by a steep and picturesque path. — A very pleasant trip for walkers is to go to (3 M.) *Eagle Lake (2 M. long, 1/2 M. wide, and 215 ft. above the sea; trout and land-locked salmon fishing); traverse it by boat; follow a forest path from its S. end, below the Bubbles (see below), to (1 M.) Jordan Pond; cross by boat to the lower end of Jordan Pond (or follow the path along the E. shore); and walk thence to (2 M.) Seal Harbor or (2½ M.) Asticou (comp. p. 116). The boat may be ordered by telephone from the Jordan Pond House (rftmst.), at the lower end of Jordan Pond, or (less certain) may be signalled for with the flag provided for the purpose at the N. end. With this trip may be combined an ascent of the Bubbles (815 and 780 ft.; path from N. end of Jordan Pond) or Pemetic Mt. (1262 ft.; steep, rough trail, known as the ‘Goat Trail’). The descent may be made to Bubble Pond (path) or to the foot of Jordan Pond (path).

*Ocean Drive to Schooner Head, Great Head, and the Otter Cliffs, returning through the Gorge, is a fine round of 12 M. (8 1/2 for each passenger). We leave Bar Harbor by Main St. and drive towards the S. At (3½ M.) Schooner Head, named from a white stain resembling the sails of a schooner, are the Spouting Horn (seen to advantage in rough weather only) and the Anemone Cave. About 1 M. farther on we diverge to the left from the road to visit the bold and massive promontory of *Great Head, towering 140 ft. above the
water and affording a fine view. To the S. lies Sand Beach, near which our road runs to (1½ M.) Otter Cliffs. To visit the *Otter Cliffs (180 ft.; *View), we again diverge to the left from the road. We now turn to the right (N.) and drive back to (6 M.) Bar Harbor through the Gorge, between *Newport Mts. on the right and *Dry Mt. (p. 115) on the left.

Another favourite drive is to (1½ M.) *Duck Brook (p. 115) and thence by the Bay Drive (*View) to (1½ M.) Hulls Cove, the former home of Mme. de Gregoire (p. 113). We may return via the so-called Breakneck Road and Eagle Lake (6 M.); and we may extend the drive beyond Hulls Cove to (2 M.) the Otaws (caves and archway; visited by boat at high water, or on foot at low water). — The so-called "Twenty-Two Mile Drive leads via the Eagle Lake Road to (7 M.) the N. end of *Somes Sound (p. 117); then runs on the E. side of the Sound to (4½ M.) North East Harbor; follows the coast thence via Seal Harbor (*Sea Cliff Drive) to (7 M.) Otter Creek; and returns to (5½-6½ M.) *Bar Harbor via either the Gorge (see above) or the Ocean Drive (p. 115). — *Somesville (p. 117) is about 9 M. from Bar Harbor.

Short Steamboat Excursions may be made to Seal Harbor, N.E. Harbor, S.W. Harbor, *Somesville, Winter Harbor (p. 114), Sorrento (p. 111), and Sullivan. The voyage Around the Island (1 day) is recommended.

**Seal Harbor (Glencove, Seaside, $2),** in a cove on the S. side of the island (9 M. from Bar Harbor), has one of the largest beaches on the island. It is a good centre for walkers. About 2½ M. (road) to the N. is *Jordan Pond, 1½ M. long and ¼-½ M. wide (trout-fishing; boating), between Jordan and *Sargent Mts. on the W. and *Pemetic Mts. (p. 115) on the E. At its N. end rise the Bubbles (p. 115). *Green Mt. (p. 115) and Sargent Mts. (see below) are often ascended from Seal Harbor.

**North East Harbor** is a narrow inlet, penetrating the S. coast for 1 M. about 2 M. to the W. of Seal Harbor, and the group of cottages and hotels (Kimball Ho., $2-3; Clifton Ho., Rock End, nearest the wharf, $2) that bears its name lies on the promontory between it and Somes Sound. Like Seal Harbor and South West Harbor, it is a favourite resort of those who prefer quieter and less fashionable quarters than Bar Harbor offers. The steamboat-landing is on the E. side of Somes Sound (see p. 117). Opposite the mouth of N.E. Harbor is *Bear Island (with a lighthouse), and a little farther out are *Sutton Island and the two Cranberry Isles. At the head of the cove, 1½ M. from the steamboat-landing, lies the prettily-situated *Asticou (Savage's Harbor Cottages, $2; Robert's Ho., $2), at the base of *Mt. Asticou (*View).

*Sargent Mt. (1344 ft.), the highest but one on the island, rises about 2 M. to the N. of Asticou. We follow the road leading N. to the (1 M.) *Upper Hadlock Pond, diverge here to the right, and follow the path on the E. side of the pond, crossing the brook near its head. Beyond (½ hr.) a small waterfall the route to (3½-4 hr.) the top is indicated by "blazes" on the trees and by small cairns on the ledges. Sargent Mt. may also be ascended on the S. side by a path diverging to the left from the path to Jordan Pond (see p. 117) and crossing *Ceda Mt. (compl. Map). The *View includes a great part of the island, with the Bubbles, *Green Mt., and Pemetic to the E., and Brown Mt. and the hills beyond Somes Sound to the W.; also Frenchman Bay, with Schoodic Mt. (Gouldsborough Hills) on its farther shore, and the sea, with numerous islands. The descent may be made on the N. by a path and wood-road leading to McFarland Hill, or on the E. by a trail following the pretty *Deer Brook to the head of *Jordan Pond (see above).
In the last case we pass a pretty little lake near the top of Mt. Sargent. Another route leads by the "Bluffs," rising from Jordan Pond below Jordan Mt. — From Asticou to Jordan Pond and Eagle Lake, see p. 116. — Drives may be taken to Bar Harbor (p. 114; $2 each), to (7 M.) Somesville (see below; $1 1/4 each), etc. Rowing and sailing trips are made to the above mentioned Islands and to S.W. Harbor. Somes Sound may be visited by steam-launch ($5-10).

South West Harbor (Island Ho., Claremont Ho., near the steam-boat-wharf, $2-2 1/2; Ocean Ho., Stanley Ho., on the opposite side of the harbour, $2), on the W. side of the entrance to Somes Sound, is called at by nearly all the regular steamers. Boating, deep-sea fishing, and fine sea views are its chief attractions. About 3 M. to the S. is the Sea Wall (Hotel, $1 3/4), a curious pebble ridge, 1 M. long and 15 ft. high. Off the harbour lies Greening Island, a favourite spot for picnics.

The road to (6 M.) Somesville (see below) runs to the N., between Dog Mt. (670 ft.) and Robinson Mt. (700 ft.) on the right and Beech Mt. (855 ft.) and Carter Nubble (480 ft.) on the left. About 1 1/4 M. from the village, beyond Norwood Cove, a road to the right runs to the S. of Dog Mt. and Flying Mt. (300 ft.) to (1 M.) Fernald Point, on Somes Sound, believed to be the site of the French colony of St. Sauveur (see p. 113). 'Father Biard's Spring' (see 'The Jesuit's Ring', by A. A. Hayes) is shown here. Farther on, the Somesville road skirts Denning Pond (left) for 1/2 M. Somesville, see below.

— Dog Mt., Beech Cliff, and Flying Mt. are good points of view, easily ascended from S.W. Harbor. — Favourite drives lead to (15 M.) Bar Harbor (p. 114), via Somesville or Town Hill, and to Bass Harbor, 4 M. to the S.W.

Perhaps the finest boating excursion from S.W. Harbor is to Somes Sound (see below), which may be conveniently made by steam-launch (to Somesville and back in half-a-day). — A small steamer makes daily trips from S. W. Harbor and N. E. Harbor to Islesford (Little Cranberry) and Great Cranberry Isle (fine surf at Deadman Point).

*Somes Sound runs into the S. part of Mt. Desert Island for about 6 M., with an average width of 1/2-1 M. Its scenery is fine, and no one should fail to ascend it by small steamer or row-boat (sailing dangerous on account of sudden squalls).

As we enter the Sound proper, we have Fernald Point (see above) on the left and Manchester Pt. (Indian Head Ho.) on the right. The finest point on the fjord is *Eagle Cliff*, the wall-like front of Dog Mt. (to the left), rising sheer from deep water to a height of 5-600 ft. (good echo). Farther on, between Robinson Ml. (left) and Browns Ml. (right), the Sound narrows to 1/3 M., expanding again higher up. To the right opens a fine view of Sargent Ml. (p. 116). To the left are Granite Quarries, which supplied the material used in the piers of Brooklyn Bridge (p. 31). At the head of the Sound we enter Somes Harbor and reach the village of Somesville (see below).

Somesville (Somes Ho., $2), the oldest settlement on the island, is a small village, frequented mainly by driving parties from Bar Harbor, S.W. Harbor, or N.E. Harbor, who ascend Beech Cliff (see below), dine or sup at the hotel (famous for broiled chicken and 'popovers'; meals $1), and return in the afternoon or evening.

Beech Cliff (ca. 500 ft.), 2 M. to the S.W. of Somesville (road to within 10 min. of the top), commands a splendid 'View, with Denning Pond (see above) lying sheer below its precipitous E. face. To the W. is Great Pond (4 M. long), beyond which rises the double-peaked Western Mt. (1073 and 971 ft.).
12. From Portland to the Rangeley Lakes.
   a. Via Lewiston and Farmington.

139 M. Maine Central Railroad to (92 M.) Farmington in 3½ hrs. Narrow Gauge Railroad thence to (18 M.) Phillips and (47 M.) Rangeley in 2½-3½ hrs. (through-fare $5.15).

From Portland to (11 M.) Cumberland Junction, see p. 109. Our train diverges here to the left and runs parallel with the Grand Trunk Railway (p. 121), which it intersects at (29 M.) Danville Junction (p. 121). Coaches run hence to (5 M.) Poland Springs (p. 119). — 32 M. Rumford Junction is the point of divergence of R. 12b. — At (35 M.) Auburn we cross the Androscoggin, obtaining a good view of the Lewiston Falls (52 ft.). Just across the river is (36 M.) Lewiston (Exchange, $2-2½), the second city in Maine, an important manufacturing place (cotton and woollen goods, etc.), with 24,701 inhabitants. The City Hall and Bates College (150 students) are among the chief buildings.

The train now follows the Androscoggin for some distance. To the right are the buildings of the Maine Agricultural Society. 46 M. Leeds Junction, where the Androscoggin Division of the Maine Central Railway, which we follow, diverges to the left.

The main line goes via Oakland (junction for Norridgewock, Madison, and Anson) to (34 M.) Waterville, where it joins the route described at p. 109. Lake Maranacook is, perhaps, the prettiest of the numerous sheets of water passed on this line. — A branch-line also connects Leeds Junction with (27 M.) Brunswick (p. 109).

The train to Farmington runs through a pleasant hilly country, following the general course of the Androscoggin, which it nears at (75 M.) Livermore Falls. From (84 M.) Wilton coaches run to (13 M.) Weld Pond, frequented by trout-fishers. At (91 M.) West Farmington we cross the Sandy River on a long curved trestle. — 92 M. Farmington (The Willows, $2-3; Stoddard Ho., $2), a prosperous village of 1200 inhab., where we change carriages for Rangeley.

The narrow-gauge Sandy River Railway runs through a picturesque district, with Blue Mt. to the left, to (11 M.) Strong (junction of a line to Kingfield, 15 M.) and (18 M.) Phillips (Phillips Ho., Elmwood, $3; Barden Ho., $2). Thence we continue by the Phillips & Rangeley Railway to (47 M.; 139 M. from Portland) Rangeley (Rangeley Lake Ho., $2½-3½), on the N. bank of Rangeley Lake. To the right of this line rises Saddleback Mt. (4000 ft.; *View).

b. Via Rumford Falls.

113 M. Maine Central Railroad to (32 M.) Rumford Junction in 1-1½ hr.; Portland & Rumford Falls Railway thence to (53 M.) Rumford Falls in 2-2½ hrs.; Rumford Falls & Rangeley Lakes R. R. thence to (28 M.) Bemis in 1½-1½ hr. (through-fare $4.50). This route is standard gauge all the way, and through-carriages run from Portland to Bemis.

From Portland to (32 M.) Rumford Junction, see above. The through-carriage for Bemis is here attached to the Rumford Falls
train, which starts at Lewiston (p. 118). — Our line runs towards the N., crossing the G. T. R. (R. 14) near (36 M.) Empire. — 38 M. Poland Springs (809 ft.; *Poland Springs Ho., $3 1/2-5, 500 beds; Mansion Ho., $2-3), the chief inland watering-place of Maine, with good mineral water. The springs are 2 M. from the station (carr. 50 c.). Stages run from the station to (3 M.) Wilson Springs (The Wilson, from $3), a similar resort. — 43 M. Mechanic Falls, also on the G. T. R. (p. 121); 57 M. Buckfield. Beyond (64 M.) Hartford the line begins to ascend steadily. To the left lies Lake Anasagunticook. 69 M. Canton. At (71 M.) Gilbertville we approach the Androscoggin, which flows to the right. 77 M. Peru; 81 M. Dixfield.

85 M. Rumford Falls (600 ft.; Hotel Rumford, $2-3), a new and active little town, with 3000 inhab. and manufactures of woollen goods, chemicals, and paper. It owes its importance to the Falls of the Androscoggin, which descend 160 ft. in three leaps and are said to have a capacity of 40,000 horse-power. Coaches run hence to (15 M.) Bryant’s Pond (p. 121) and to (22 M.) Andover (Andover, French’s, $2), whence connection is made by buckboard with the foot of Lake Welokenebacoook (see below).

We now follow the tracks of the Rumford Falls & Rangeley Lakes R. R., passing a few unimportant stations.

113 M. Bemis (Camp Bemis, $2) lies at the foot of Lake Moose-lucemaguntic (see below) and is regularly called at by the steamers.

The *Rangeley or Androscoggin Lakes, a group of half-a-dozen small lakes, 1200-1500 ft. above the sea, connected with each other by water-ways, and covering a total area of about 80 sq. M., are a veritable sportsman’s paradise and also offer the attraction of beautiful scenery and pure air. Large trout (up to 10 lbs.) abound in the lakes, and moose, deer, and other game in the forests. There are numerous hotels and camps round the lakes, with simple and inexpensive accommodation; expert guides ($2 1/2-3 a day) are easily procured. Several clubs for fishing and hunting have their headquarters here. Mosquitoes and black flies are not troublesome after July. Warm clothing is desirable. Small steamboats afford almost continuous passage from Rangeley Lake to Lake Umbagog (see below). For other routes to the lakes, see p. 121.

Rangeley Lake or Lake Oquossoc, the north-easternmost of the group, is 9 M. long and 1-3 M. wide. From Rangeley (p. 118) a steamer plies to Mountain View Ho. (§ 2-2 1/2) and the Outlet, at the foot (W. end) of the lake, 11/2 M. to the N. of which is Indian Rock, with the headquarters of the Oquossoc Angling Association. — Lake Moose-lucemaguntic (8 M. × 2 M.) is next in order, with inns at Haines Landing, Bemis (see above), and the Upper Dam (S. end). Connected with this lake on the N. is the smaller Lake Cupsepytic. — Below the Upper Dam are Lakes Molechuckamunk (Upper Richardson; 5 M. × 1-2 M.) and Welokenebacoook (Lower Richardson; 5 M. × 1 1/2 M.). From the S. arm (Lakeview Inn) of the latter to Andover, see above and p. 121.

— From the Middle Dam (Anglers’ Retreat, § 2), on the W. side of Lake Welokenebacoook, a road leads to (5 M.) Lake Umbagog (1256 ft.), 9 M. long and 1-2 M. wide, at the S. end of which lies the Lakeside Hotel. The White
130 Route 13.  

EASTPORT.

Mts. (p. 134) are visible from this lake. Coach hence to Bethel, see p. 121; steamer to Errol's Dam, see p. 121; coach from Errol's Dam to Berlin Falls, see p. 121; to Colebrook, see p. 124.

Steamers also run from Lakeside and Errol's Dam up the Magalloway River to (30 M.) Lake Parmachenee (Camp Caribou), another favourite sporting resort, 2500 ft. above the sea.

13. From Boston to Eastport and St. John by Sea (Campobello; Grand Manan).

Steamer of the International Steamship Co. 1-5 times weekly (acc. to the season) to (260 M.) Eastport in 17 hrs. ($4.25) and to (320 M.) St. John in 19-20 hrs. (fare $6.50; stateroom $1-2; meals extra). The steamers usually leave Commercial Wharf about 8 or 9 a.m. Some call at Portland (p. 107), while others proceed direct to Eastport. The latest information should be obtained from the agents of the company (Commercial Wharf and 211 Washington St.) or from the daily papers. Baggage for Canada is examined on board the steamer, between Eastport and St. John.

Railway Route from Boston to St. John, see p. 110. Eastport is also reached by following this route to St. Andrews (p. 110), and thence by the steamer down the St. Croix (15 M.). For details, see Baedeker's Canada.

For the beautiful sail down Boston Harbour, see p. 96. The direct steamer (see above) soon passes out of sight of land, and it is only on the longest days of summer that the coast of Maine becomes dimly visible to the left before nightfall. Grand Manan (see below), with its fine cliffs, lies to the right, but is passed in the dark. When the tide serves, the steamer reaches Eastport by the Narrows, between Lubec on the left and the island of Campobello (see below) on the right. At the entrance of this channel is Quoddy Head Light (.), marking the E. limit of the United States. When the tide is unfavourable, we pass outside Campobello and approach Eastport from the E., with Deer Island to our right.

Lubec (Hillside Ho., § 2-3; Merchants' Hotel, § 2), at which the steamers call in summer, is a pleasant little watering-place with the most lighthouse in the United States. The Young Men's Christian Associations of New England hold encampments at (7 M.) N. Lubec (Theckmattano, §21/2-3) in summer.

260 M. Eastport (Quoddy Ho., §2-3), the easternmost settlement of the United States, with 4908 inhab. and an abandoned fort, is finely situated on a small island in Passamaquoddy Bay, connected with the mainland by a bridge. Its inhabitants are mostly fishermen and keepers of summer boarding-houses.

Steam ferries run at frequent intervals to (3 M.) Lubec (see above) and (21/2 M.) Campobello (see below). A steamer runs regularly to (18 M.; 2 hrs.) Grand Manan (see below), while river-steamers ply to St. Andrews (p. 110) and up the St. Croix to St. Stephen, Robinson, and Calais (comp. Baedeker's Canada).

Campobello (Tyn-y-Coed Hotel, §31/2-5; The Owen), a picturesque island between Passamaquoddy Bay and the Bay of Fundy, just on the Canadian (New Brunswick) side of the international boundary, is now much frequented in summer by New Yorkers, Bostonians, and others. For a detailed account of its attractions, see Baedeker's Canada.

Grand Manan (Marble Ridge Ho., §31/2), another Canadian island, 22 M. long and 3-6 M. wide, lies at the entrance to the Bay of Fundy, 9 M. from the American coast. It is also a frequented summer-resort, and some of its cliffs and headlands are very fine.
On leaving Eastport the steamer once more heads for the E.,
crosses the neck of Passamaquoddy Bay, and ascends through the
Bay of Fundy (comp. Baedeker's Canada). The coast of New Brun-
wick is in sight to the left all the way to St. John (3 hrs.). As we
enter St. John Harbour, we pass Partridge Island on the right, while
the suburb of Carleton is seen to the left. St. John makes a partic-
icularly picturesque effect as seen from the water.

320 M. St. John, see p. 110.

14. From Portland to Montreal and Quebec.

a. Vià the Grand Trunk Railway.

Grand Trunk Railway to (297 M.) Montreal in 11-12 hrs. (fares $7 1/2,
drawing-room car $4 1/2, sleeping-berth $2); to (318 M.) Quebec in 12-
15 hrs. (fares $8 1/2, $2). This route forms a pleasant approach to Canada,
skirting the N. margin of the White Mts. (p. 134; views to the left). From
Boston to Canada by this route takes 3-4 hrs. more.

Portland, see p. 107. The train crosses (3 M.) the Presumpscot
River (*View of Casco Bay to the right). At (11 M.) Yarmouth we
intersect the Maine Central R. R. (comp. p. 109) and then turn to
the left (N.W.). As far as (27 1/4 M.) Danville Junction the Maine
Central R. R. (see p. 122) runs parallel to our line (to the left). —
We now again cross the Maine Central R. R. and turn towards the W.
29 1/2 M. Lewiston Junction, for Auburn and (6 M.) Lewiston (p. 118);
36 M. Mechanic Falls (p. 119); 47 M. South Paris, the station for
(2 M.) Paris Hill (830 ft.), to the E. of which is Mt. Mica, where
mica, beryls, tourmaline, and other minerals are found. From
(62 M.) Bryant's Pond (700 ft.) coaches run to (15 M.) Rumford
Falls (p. 119) and to (21 M.) Andover (see p. 119).

We have now fairly left the level coast districts and entered
the mountains. 70 M. Bethel (1000 ft.; Lovejoy, $2), a small
summer-resort, with mineral springs, pleasantly situated above the
'intervals' of the Androscoggin.

Coaches (fares $2 1/2) run regularly from Bethel to (23 M.) Lakeside
Hotel, at the S. end of Lake Umbagog (p. 119). The road leads through wild
and picturesque scenery, ascending the valleys of the Androscoggin and
Bear River and affording distant views of the White Mts. (p. 134).

Beyond Bethel we obtain numerous fine views of the White Mts.
(p. 134; to the left), while the Androscoggin runs on the right.
Near (86 M.) Shelburne (725 ft.), in New Hampshire, we have views
of Mt. Madison and Mt. Moriah to the left and Mt. Hayes to the right.

91 M. Gorham (860 ft.; meal-station), see p. 138.

Beyond Gorham our train turns to the N.W., intersects the B. &
M. R. R., and ascends along the Androscoggin, affording a good view
of Mt. Adams to the left, to (98 M.) Berlin Falls (Berlin Ho., $2;
Sinclair Ho., $1 1/2-2), where the river pours tumultuously through
a narrow pass, descending 200 ft. within a mile. Coaches run hence
to (22 M.) Errol's Dam (Umbagog Ho., $2), whence steamers ascend
the Androscoggin to (3 M.) Lake Umbagog (p. 119).
FROM BERLIN FALLS TO WHITEFIELD, 29 M., railway in 1 1/4 hr. (fare $1.04). — This line crosses the Grand Trunk Railway at (5 M.) Gorham (p. 138) and runs to the W. along the Moose River. 10 M. Randolph; 19 M. Highlands. From (21 M.) Meadows a branch runs to the right to (3 M.) Jefferson (p. 144). 24 M. Warren Junction; 26 M. Hazen’s Junction. — 29 M. Whitefield (p. 133).

The train now leaves the Androscoggin, which turns to the N. Beyond (103 M.) Copperville (1080 ft.; view) we follow the Upper Ammonoosuc to (122 M.) Groveton (Melcher Ho., $2), the junction of the Boston & Maine R. R. (to the White Mts. and Wells Junction; see p. 133). This is the starting-point for an ascent of the Percy Peaks (3150 and 3335 ft.; 2 1/2-3 1/2 hrs.). The line now passes into the Connecticut Valley (to the right, the white Percy Peaks). From (134 M.) North Stratford, where our line intersects the Maine Central R. R. (see pp. 123, 124), coaches run to (1 1/2 M.) Brunswick Springs. We now cross the Connecticut, enter Vermont (the ‘Green Mountain State’), and run through forest. 149 M. Island Pond (1500 ft.; Stewart Ho., $2; Rail. Restaurant), with the frontier custom-house (baggage examined).

At (165 M.) Norton Mills we enter Canada. Hence, via (196 M.) Sherbrooke and (221 M.) Richmond, to (297 M.) Montreal and (318 M.) Quebec, see Baedeker’s Canada.

b. Vià the Maine Central Railroad.

To (286 M.) Montreal in 12-16 hrs. (fare $7 1/2; parlor-car $1 1/2; berth $2); to (321 M.) Quebec in 14 1/2 hrs. (fare $8 1/2; sleeper $2). This line traverses the centre of the White Mts. (seats to the right; observation-cars attached to the trains in the mountain-district). Through parlor and sleeping cars run from Portland to Montreal and Quebec.

Portland, see p. 107. The train starts from the Union Station, crosses the Presumpscot twice, and runs towards the W. 6 M. Cumberland Mills, with manufactures of paper. — 17 M. Sebago Lake Station, at the S. end of Sebago Lake (265 ft.; Sebago Lake Ho., $2), a pleasant, islet-dotted sheet of water, 13 M. long, 10 M. wide, and 100 ft. deep in its deepest part.

Steamers ply from this point across Sebago Lake, through the Songo River (6 M.), and across Long Lake (13 M. long and 2 M. wide), to (32 M.) Harrison (Elm Ho., $1 1/2; there and back in 8 hrs.; a pleasant trip). From Harrison coaches run to (14 M.) South Paris (p. 121).

Beyond (25 M.) Steep Falls we follow the valley of the Saco, the falls of which are seen near (34 M.) West Baldwin. From (37 M.) Bridgton Junction a narrow-gauge line runs to (16 M.) Bridgton, on Long Lake (see above), the usual starting-point for an ascent of (10 M.) Pleasant Mt. (2020 ft.; *Mt. Pleasant Ho., on the top, $2), which commands a splendid *Panorama of the White Mts. — 50 M. Fryeburg (420 ft.; Oxford Ho., $2-3), a summer-resort, is 10 M. to the N. of Pleasant Mt. (see above). Daniel Webster taught in the Academy here. — We now enter New Hampshire (p. 105). Beyond (55 M.) Conway Centre we cross the Saco, and enter the district of the White Mountains (R. 16). 60 M. North Conway (520 ft.; see
p. 136), the junction of the Boston & Maine R. R. We now ascend more rapidly. To the right are Middle Mt., Hurricane Mt., and Mt. Kearsarge (comp. pp. 136, 137); to the left, the long ridge of Moat Mt. (p. 137), with the 'Ledges'. 62½ M. Intervale (p. 136). The train traverses the beautiful Conway 'intervales'. From (65 M.) Glen Station (p. 137) coaches run to (3 M.) Jackson (p. 137). The train turns to the left and crosses the Saco. Beyond (71 M.) Upper Bartlett (Bartlett Ho., $2; Rail. Restaurant), where an 'observation-car' is added to the train, we twice cross the Saco, then turn to the N., and cross Sawyer's River (station) and Nancy's Brook. To the left rises the triple-peaked Mt. Carrigain (4700 ft.). 78 M. Bemis. To the right are Mt. Crawford (3130 ft.), Mt. Resolution (3436 ft.), and the Giant's Stairs (3512 ft.); to the left is Mt. Nancy (3944 ft.).—The line now bends to the N.W. and enters the famous Crawford or White Mountain Notch, a narrow defile, about 3-4 M. long, with the towering walls of Willey Mt. (4313 ft.) on the left and Mt. Webster (3928 ft.) on the right. The train ascends rapidly (1:44), at a height of 100-350 ft. above the river, and affords, perhaps, better views than the road (comp. p. 140). The deep ravine below (82 M.) Frankenstein Cliff (stat.) is crossed by a dizzy trestle, 80 ft. high and 500 ft. long. 88 M. Willey House (p. 140). To the right (ahead) we have a good view of Mt. Washington. The Willey Brook is crossed by another lofty trestle (80 ft. high). To the right are the Silver and Flume Cascades (p. 140). The train skirts the E. slope of Mt. Willard (2570 ft.; p. 140), leaves the Notch by its narrow Gateway (p. 140), and reaches the plateau on which lies the (86 M.) Crawford House (1890 ft.; p. 139). We now begin the descent, with the Ammonoosuc to the right. Near (89 M.) Mt. Pleasant House we cross the Ammonoosuc and begin to descend along its right bank. At (90 M.) Fabyan's (p. 141) we connect with the railway to the summit of Mt. Washington (see p. 144). 92 M. White Mt. House; 93 M. Zealand, the junction for the line to Bethlehem Junction, Maplewood, Bethlehem Street, and the Profile House (see p. 142); 94 M. Twin Mountain House (p. 141). We now skirt the shoulder of Cherry Mt.

100 M. Quebec Junction, where the Quebec (Upper Coos) Division of the Maine Central R. R. diverges to the right, connecting with the Canadian Pacific and the Quebec Central Railways.

From Quebec Junction to Quebec, 221 M., in 10 hrs. We pass Cherry Pond, cross the B. & M. R. R., and reach (5 M.) Jefferson (p. 144), situated on a spur of Mt. Starr King (4090 ft.), which rises to the right. The railway skirts the Israel River. — 12 M. Lancaster (870 ft.; Lancaster Ho., §2½-3; Rail. Restaurant), pleasantly situated on the Israel River, with 3373 inhab., is a favourite summer-resort and commands distant views of the White Mts. Mt. Prospect (2090 ft.; Prospect Ho., §3), 2 M. to the S.E., is a good point of view. To the E. are the Pilot Mts. Jefferson (p. 144) is 7 M. to the E.S.E. — We now pass from the White Mt. district and enter the Coos District. The train again crosses the B. & M. R. R. at Lancaster, and farther on twice crosses the Connecticut, which here forms the boundary between Vermont and New Hampshire. At (33 M.) North Stratford our line intersects
the Grand Trunk Railway (see p. 122). We ascend to the N. through the valley of the Connecticut. From (46 M.) Colebrook (1030 ft.; Nirvana, $4-7; Monadnock Ho.) a coach runs to (10 M.) the *Dixville Notch (The Balsams, § 3-4), a fine ravine, 2 M. long, with its most striking points (Table Rock, etc.) marked by sign-posts. Coaches run from the Notch to (11 M.) Errol's Dam (p. 121). From (53 M.) West Stewardson stages run to the (12 M.) Connecticut Lakes (2530 ft.; Connecticut Lake Ho., $1-2-2), the source of the Connecticut.

At (55 M.) Beecher's Falls we enter Canada (luggage examined). Hence to (221 M.) Quebec, see Baedeker's Canada.

From Quebec Junction the main line descends along the Ammonoosuc to Whitefield (p. 133) and (107 M.) Scott Junction, where it crosses the B. & M. R. R. It then crosses the Connecticut and enters Vermont. At (110 M.) Lunenburg (Heights Hotel, $11-2-2) we pass on to the St. Johnsbury & Lake Champlain R. R. Beyond (118 M.) Miles Pond we meet the Passumpsic and follow it down to (133 M.) St. Johnsbury (p. 133), where we join the main route of the B. & M. R. R. to Canada. Thence to (286 M.) Montreal, see R. 15c.

15. From Boston to Montreal.

a. Via Rutland and Burlington.

336 M. Fitchburg Railroad from Boston to (114 M.) Bellows Falls in 33 1/4-4 hrs.; Rutland Railroad from Bellows Falls to (120 M.) Burlington in 33 1/4-5 hrs.; Central Vermont Railroad from Burlington (to 76 M.) St. John's in 2 1/4-3 hrs.; Grand Trunk Railway thence to (27 M.) Montreal in 3 1/4-1 hr. (through-fare $9; parlor-car $11 1/2; sleeper $2 1/2).

Boston, see p. 81. Leaving the North Union station (p. 81), the train crosses the Charles, affording a view to the right of the Bunker Hill Monument (p. 95). At the State Prison (right) the line wheels to the left (W.) and passes through Somerville. To the left lies Cambridge (p. 93), where we have a glimpse of the Harvard College buildings. — 10 M. Waltham (Crescent, $2-3; Waltham, $2-2 1/2), a city of 20,876 inhab., with cotton-mills and the works of the American Waltham Watch Co. (the largest in the world, producing 550,000 machine-made watches annually). We have our last view of the Charles here, to the left. To the right is Prospect Hill (480 ft.). — 13 M. Kendal Green is the station for Weston, with golf-links and the country homes of many Bostonians. A little farther on we pass Lake Walden (right), a favourite haunt of Thoreau (1817-62; see 'Walden'), but now frequented by picnic parties instead of recluses.

20 M. Concord (Thoreau House, $2 1/2), a village with 5175 inhab., situated on the Concord River, here formed by the junction of the Sudbury and the Assabet, is of abiding interest as the home of Hawthorne and Emerson, Thoreau and the Alcotts. It may be fittingly described as the American Weimar or Stratford-on-Avon and has kept its literary association less tainted by commercialism than either of these places. The following brief account should be supplemented by Mr. George B. Bartlett's interesting little volume on 'Concord: Historic, Literary, and Picturesque' (with plan).
On leaving the Fitchburg Railroad Station we proceed to the right along Thoreau Street to Sudbury Street, which we follow to the left. To the left, where Sudbury St. joins Main Street, stands the Free Public Library, containing many interesting autographs. Following Main St. to the right, we cross the Mill Brook and reach a square whence several streets radiate. Here stands the house of the Concord Antiquarian Society, with an interesting museum (small fee).

If we follow Lexington Street to the right, which was the route of the British retreat in 1775 (see below), we reach (5 min.), to the right, at the point where Lincoln St. diverges, the white House of R. W. Emerson, still occupied by his daughter. Here the ‘Sage of Concord’ was visited by Frederika Bremer, Margaret Fuller (Countess d’Ossoli), etc. A little farther on, to the left, is Orchard House, long the home of the Alcott Family, of which Louisa M. Alcott (1832-88), author of ‘Little Women’, is the most widely known member. To the W. of the house is the building used by the Concord School of Philosophy, which was established by A. Bronson Alcott (1799-1888) in 1879 and counted Emerson, Ben. Peirce, Dr. W. T. Harris, and Col. T. W. Higginson among its lecturers. The next house (left) is The Wayside, the home of Nathaniel Hawthorne in 1852-64, with the tower-study in which he wrote ‘Septimius Felton’ and other works.

We now return to the above-mentioned square and follow Monument Street to the N., crossing the Lowell R. R. and reaching (12 min.; to the left) the Old Manse, built for the Rev. Wm. Emerson in 1765 and occupied after him by the Rev. Dr. Ripley and many other eminent divines. This was the birthplace of R. W. Emerson, and in the study above the dining room he wrote ‘Nature’ and Hawthorne his ‘Mosses from an Old Manse’. Adjoining the grounds of the Old Manse is the bridge over the Concord River, where the ‘minute-men’ of the neighbourhood encountered the British soldiers on April 19th, 1775, and ‘where the embattled farmers stood and fired the shot heard round the world’. Beyond the bridge is a fine commemorative statue of the ‘Minute Man’, by Dan. C. French.

Bedford Street, running to the E. from the central square, leads to (10 min.) Sleepy Hollow Cemetery, one of the most romantic burial-grounds in America. Among the illustrious dead buried here are Ralph Waldo Emerson (1803-82; grave marked by a huge block of pink quartz), Nathaniel Hawthorne (1804-68; grave surrounded by a low hedge of arbor vitae), Henry Thoreau (comp. p. 124), and the Alcotts (see above). — George Bartlett (d. 1896; see p. 124) is commemorated by an inscription on a rock near the union of the Sudbury and Assabet. — The Concord rivers are very picturesque and a row on one or other of them may fitly wind up the visit.

A line runs from Concord to (10 M.) Lexington (Russell Ho., $3; also reached direct from Boston by the Boston & Maine R. R., 11 M., or by electric car), where the first battle between the British and Americans took place (April 19th, 1775; comp. above). Pop. (1895) 3498. A monument has been erected to the militia-men who fell here; the Town Hall contains interesting relics.

At (22 M.) Concord Junction we cross the N. Y. N. H. & H. line to Lowell (p. 128) and connect with an unimportant branch of the B. & M. R. R.; to the right is the State Reformatory. 25 M. South Acton. From (36 M.) Ayer Junction various lines radiate.

50 M. Fitchburg (Fitchburg Ho., American Ho., $2-21/2), a busy industrial city on the Nashua River, with (1895) 26,409 inhab., the junction of lines to Worcester (p. 68) and South Framingham (p. 69). In the centre of the town are a large Soldiers’ Monument and the Walker Free Library, with its art-collections.

The train now begins to ascend. To the right runs the Nashua. From (53 M.) Wachusett coaches run to the S. to (6 M.) Mt. Wachusett (2108 ft.; Summit Ho., $2-21/2; *View), which may
also be reached from Princeton (*Wachusett Ho., $2-3), on the
Worcester line (see p. 145). At (60 M.) South Ashburnham the
Cheshire branch diverges to the right (N.) from the main line
(55x48) (which goes on to the Berkshire Hills and Troy, N. Y.; see
p. 145). — At (88 M.) Winchendon diverges the Monadnock branch
to Peterboro (Tucker’s Tavern, $2). From Peterboro a stage (75 c.) runs to (6 M.) the lovely summer-resort of
Dublin (Leffingwell, $3-4; Boulderstone, $2-3), finely situated near the
N.W. base of Mt. Monadnock. It is also reached via Harrisville, on the
Boston & Maine R. R.

The train now enters New Hampshire. From (82 M.) Troy a
coach (fare 55 c.) runs to (5 M.) the Mountain House ($2-2½), about
halfway up Monadnock Mt. (3186 ft.; *View), one of the finest
mountains in New England. 92 M. Keene (Cheshire Ho., $2½-3;
City, $2), a beautiful little city with 7446 inhab. and manufact-
ures of wooden ware and furniture. — Beyond (104 M.) West-
moreland the train begins to descend into the valley of the Con-
necticut. 110 M. Walpole (Dinsmore Ho., $2½), a charming sum-
er-resort on the Connecticut. We now cross the river to —

114 M. Bellows Falls (280 ft.; Town Hotel, $2-3; Rocking-
ham, $2-2½; Commercial, $2; Rail. Restaurant), in Vermont, a
picturesque summer-resort. The wooded Mt. Kilburn, on the New
Hampshire bank, affords a fine view of the village and the rapids
in the river (fall of 40 ft.). At Bellows Falls we intersect the Con-
nnecticut River Division of the B. & M. R. R. (see p. 157) and pass
on to the tracks of the Rutland R. R., which crosses the Green Mts.
(comp. p. 130), affording beautiful views.

At first we now traverse the pretty valley of the Williams River,
passing (128 M.) Chester (570 ft.) and other small summer-resorts.
We then pass into the equally attractive valley of the Black River
and soon begin to ascend the E. slope of the Green Mts. (comp.
p. 130). Near (137 M.) Cavendish (910 ft.) are valuable quarries of
serpentine marble. 144 M. Ludlow (1080 ft.; Echo Lake, Ludlow,
Goldard, $2) is an attractive summer-resort. — From (148 M.)
Summit (1510 ft.) we descend rapidly to —

167 M. Rutland (560 ft.; Berwick Ho., $2½-4; Bardwell Ho.,
$2), a town of 11,760 inhab., chiefly engaged in quarrying and
cutting the marble (see below), and in the Howe Scale Works. It
is the junction of the Delaware & Hudson R. R. (to Saratoga, etc.)
and of the Bennington & Rutland R. R. (Troy, Albany, etc.).

Excursions may be made from Rutland to (7 M.) Claremont Springs
(Hotel, $2½; coach); to (10 M.) Killington Peak (4210 ft.; Hotel near the top,
$2½; *View), one of the highest of the Green Mts.; to Mt. Jda, etc. — Ver-
mont produces three-fourths of the marble quarried in the United States,
and Rutland is the centre of the industry, which employs many thousand
men. The Sutherland Falls Quarry, at Proctor (see below), is probably the
largest single quarry in the world. The marble of Vermont is said to be
whiter and more durable than that of Carrara.

172 M. Proctor (see above). In a gorge near (176 M.) Pittsford
(360 ft.) is a curious ice-cave, where thick ice may be found at mid-
to Montreal.  

BURLINGTON.  15. Route. 127

summer (guide necessary). — 183 M. Brandon (300 ft.), with marble quarries, rich deposits of bog-iron, and mines of kaolinite, used here in making mineral paint. Stages run hence to (8 M.) the pretty Lake Dunmore (Lake Dunmore Ho., Mountain Spring Hotel, $21/2-4), surrounded by mountains. Near this lake is the equally attractive Silver Lake (hotel). From (189 M.) Leicester Junction (350 ft.) a branch-line runs to (17 M.) Ticonderoga (p. 203). 200 M. Middlebury (340 ft.; Addison Ho., $2-21/2), the seat of a college, is a good centre for excursions to (11 M.) Breadloaf Inn (1600 ft.; $3-4), Snake Mt. (1310 ft.; *View), and other points among the Green Mts. We descend along the Otter Creek to (213 M.) Vergennes (190 ft.; Stevens Ho., $2-21/2), 8 M. from Lake Champlain, of which we obtain views, backed by the Adirondacks (R. 25), to the left.

234 M. Burlington (110 ft.; Van Ness Ho., $21/2-31/2; Burlington, $2-31/2), beautifully situated on a hill rising from the E. shore of Lake Champlain (p. 202), is the chief city of Vermont and one of the largest lumber-marts in America, the lumber coming chiefly from Canada. Pop. (1890) 14,590. Near the public square in the centre of the town, which is well built and laid out, are the Post Office, the City Hall, the Court House, and the Young Men's Christian Association. The Roman Catholic Cathedral and St. Paul's Episcopal Church are conspicuous among the churches.

The University of Vermont, on a hill 365 ft. above the lake, is attended by 550-600 students.

The handsomest of its buildings is the Billings Library, designed by H. H. Richardson, and containing a fine collection of books in the Scandinavian languages. The University Tower commands a magnificent *View (best at sunset) of the city, Lake Champlain (with Juniper Island opposite Burlington), the Adirondacks (incl. Mt. Marcy and Whiteface), and the Green Mts. (to the E.; Mt. Mansfield, Camel's Hump, etc.). In the University Park is a Statue of Lafayette, by J. Q. A. Ward.

Col. Ethan Allen (see p. 130; monument) is buried in Green Mt. Cemetery; Lake View Cemetery, to the N.W., is also worth visiting.

Pleasant walks and drives may be taken along the Winooski, to Shelburne Point, Mallet's Bay (6 M.), etc., and longer excursions to Mt. Mansfield (p. 131), Camel's Hump (p. 131), and other Green Mts. peaks. Steamers on Lake Champlain to Port Kent (Ausable Chasm), Plattsburg, etc., see R. 27.

Beyond Burlington our line (Central Vermont R. R.) runs N., passing the picturesque gorge and falls of the Winooski, to (251 M.) Essex Junction (Rail. Restaurant), where we join the line from White River Junction (comp. p. 131). Views of the Green Mts. to the right and peeps of Lake Champlain and the Adirondacks on the left.

266 M. St. Albans (400 ft.; American Ho., $2; Rail. Restaurant), a pleasant village with 7771 inhab., finely situated on rising ground, 21/2 M. from Lake Champlain. It contains the car-shops of the Central Vermont R. R. and is an important market for butter and cheese. The elm-shaded square in the centre of the village is embellished with a handsome electrically illuminated fountain.

Addis Hill (500 ft.), 3/4 M. to the N.E. of St. Albans, and Bellevue Hill (1300 ft.), 2 M. to the S.W., command *Views of the Green Mts., Adiron-
128 Route 15. LOWELL. From Boston

docks, and Lake Champlain (afternoon-light best). — St. Albans Bay (Lake View Ho., St. Albans Point Ho., $2) affords good bass and lake fishing.

From St. Albans to Richford, 23 M., railway in 1 1/4-2 1/4 hrs., along the Missisquoi River. — 10 M. Sheldon Springs (Riverside: Portland, 1 1/2 M. from Sheldon station, $1 1/2), with alkaline and mineral springs used for cutaneous diseases, dyspepsia, and liver complaints. The Missisquoi forms rapids here. — 28 M. Richford (American Ho., $2), see p. 134.

From (272 M.) Swanton Junction a branch-line runs to (14 M.) Rouse's Point (p. 160; passing Alburgh Springs) and (132 M.) Ogdensburg (p. 226). 279 M. Highgate Springs (Franklin Ho., Commercial, Lakeside, $2-3), near Missisquoi Bay (muskolenge, black bass, pickerel; duck-shooting), with effective alkaline springs. A little farther on the train passes into Canada (Province of Quebec). Beyond (291 M.) Stanbridge we see the Rougemont and Beloeil to the right, rising in isolation from a flat plain. Crossing the Richelieu at (309 M.) St. John's, we join the Grand Trunk Railway. Hence to —

336 M. Montreal (Bonaventure Station), see Baedeker's Canada.

b. Via Lowell and Concord.

335 M. Boston & Maine Railroad (Concord Division) to (145 M.) White River Junction in 4 1/2-5 hrs.; Central Vermont Railroad thence to (163 M.) St. John's in 5 1/4-6 hrs.; and Grand Trunk Railway thence to (27 M.) Montreal in 3 1/2-4 hr. (through-fare $9; parlor-car $1 1/2; sleeper $2).

Boston, see p. 81. The train starts from the N. Union Station (Causeway St.; p. 81), crosses the Charles and the Fitchburg R. R. (p. 124), and runs to the N.W. through Somerville and Medford. At the latter is Tuft's College, a Universalist institution with 600 students and the interesting Barnum Museum of Natural History (with the stuffed skin of the elephant 'Jumbo'). To the right lie the picturesque *Middlesex Fells (p. 106), to the left the Mystic Lakes. 8 M. Winchester, with a State Aviary (Mongolian pheasants), was the birthplace of Phillips Brooks (p. 89), Theodore Parker (p. 84), and George Bancroft (p. 84). 10 M. Woburn, an industrial town with (1895) 14,178 inhab., a fine public library (by H. H. Richardson), and the residences of many Bostonians, was the birthplace of Count Rumford (1753-1814). At (15 M.) Wilmington the branch to Lawrence (p. 106) diverges to the right. Beyond (22 M.) N. Bil-lerica we cross the Concord River and reach (26 M.) Lowell (Merrimac Ho., American Ho., $2 1/2-3; St. Charles, $2-2 1/2; Richardson's, E. P.), at the confluence of the Concord and Merrimac, the third city of Massachusetts (pop. 84,367) and one of the most important industrial cities in the United States. In 1890 its huge mills and factories, run mainly by the water-power furnished by the Pawtucket Falls on the Merrimac (32 ft.; seen from the bridge), employed 29,000 hands and produced goods (woollen cloth, carpeting, etc.) to the value of $40,600,000 (8,120,000 lbs.). Dickens gives a graphic description of Lowell in his 'American Notes' (chap. 4), but many of its features have changed since his day, and the mill
to Montreal. MANCHESTER. 15. Route. 129

operators are now mainly French Canadians, while the names over the shops and the talk heard in the street are also mostly French. The centre of the city is MONUMENT SQUARE, with the City Hall, Memorial Hall, a War Monument, and a Statue of Peace after Rauch.

Beyond Lowell the line follows the Merrimac (seats to the right), and beyond (32 M.) Tyngsboro (*View) it enters New Hampshire. — 39 M. Nashua (Tremont, $2-21/2; Laton Ho., $2; Rail. Restaurant), a pleasant town of 19,311 inhab., at the confluence of the Merrimac and the Nashua, with manufactures of iron, cotton, carpets, etc. The Roman Catholic church of St. Francis Xavier, erected in 1893, is, perhaps, the finest in the state.

From Nashua to Keene, 57 M., railway in 21/4-21/2 hrs. (fare $1.65). Stages run from (9 M.) Amherst (birthplace of Horace Greeley, p. 30) to Ponemah Springs (hotel) and from (12 M.) Milford to Mount Vernon, a summer-resort on the Quohquinespassawessannagwog River. 16 M. Wilton; 27 M. Greenfield. At (23 M.) Hancock Junction (named after John Hancock, first signer of the Declaration of Independence, one of the early owners) we cross a branch from Peterboro (p. 126) to Contoocook and Concord (see below). — Coaches run from (43 M.) Harrisville to Dublin (p. 126). — 57 M. Keene, see p. 126. — One train runs through to (91 M.) South Vernon (p. 157).

The train now runs to the N. through the pretty valley of the Merrimac. — 57 M. Manchester (New Manchester Ho., $21/2-31/2; Windsor, E. P.; Oxford City, $2; Rail. Restaurant), the largest city in New Hampshire (44,126 inhab.), with manufactures of cotton goods and prints (value in 1890, $19,000,000). Its water-power is furnished by the Amoskeag Falls, on the Merrimac. Good view of mills to the left.

From Manchester to Henniker, 26 M., railway in 1¼ hr. (fare 74 c.). From (10 M.) Parkers, on this railway, a short branch-line runs to (6 M.) New Boston (The Tavern), a favourite resort for driving and sleighing parties from Lowell, Manchester, Nashua, and Concord, and also frequented by more permanent guests. At (26 M.) Henniker we join the above-mentioned line from Hancock Junction to Contoocook.

At (66 M.) Hooksett and other points we cross and recross the Merrimac. To the W. is Pinnacle Mt. (view).

75 M. Concord (250 ft.; Eagle, $21/2-41/2; American House, $2; Rail. Restaurant), the capital of New Hampshire, with 17,004 inhab., is a pleasant tree-shaded city on the W. bank of the Merrimac, with carriage-works and quarries of line granite. Among the chief buildings are the State Capitol, the State Library, the City Hall, and the Insane Asylum. Count Rumford (p. 128) lived here for some years. About 2 M. to the W. is St Paul's, a well-known boys' school, with about a dozen separate buildings.

From Concord to Claremont Junction, 57 M., railway in 21/2 hrs. (fare $1.70). — 12 M. Contoocook, see above. — From (27 M.) Bradford coaches run to (5 M.) Bradford Mineral Springs (Hotel, $2). — 35 M. Lake Sunapee Station lies at the S. end of Lake Sunapee (950 ft.), a pretty, hill-girt sheet of water, 9 M. long and 1-3 M. wide, on which a small steamer plies. The chief resorts on the lake are Burkehaven (The Burkehaven, $2-3), Blodgett's Landing, and Sunapee (Ben Mere Inn; Sunapee Harbor Hotel, $2). There is a U. S. Fish Hatchery at Pike Brook, Soo-Nipi Park. — About 3 M. from 43 M.) Newport is the Blue Mountain Forest Park, a huge game preserve formed by the late Mr. Austin Corbin, covering 25,000 acres and

BAEDEKER'S United States. 2nd Edit. 9
enclosed by a wire fence 24 M. long. Its denizens include buffaloes, elks, moose, and wild boars (from Germany). Visitors are allowed to drive through the park. — 55 M. Claremont. — 57 M. Claremont Junction (see p. 157).

At Concord our present route diverges to the left from the main line, which runs via Lake Winnipesaukee and Plymouth to Wells River Junction (see pp. 131, 132). As we cross the Contoocook, near (82 M.) Penacook, we see on Duston's Island, to the right, a colossal Statue of Mrs. Hannah Duston of Haverhill, who here killed 10 or 12 of her Indian captors and made her escape. — Daniel Webster (1782-1852) was born 2 M. to the S.W. of (94 M.) Franklin. From this station a branch-line runs to (13 M.) Bristol, whence stages ply to (5 M.) Newfound Lake (600 ft.), a favourite summer resort with several small hotels and boarding-houses. — Our line bends to the left (W.), soon passing Webster Lake (right) and Highland Lake. From (106 M.) Potter Place coaches run to (4 M.) the Winslow House, high up on the slope of Mt. Kearsarge (2943 ft.; not to be confounded with Mt. Kearsarge in the White Mts., p. 137), the top of which (*View) is reached thence by a bridle-path. Beyond (127 M.) Canaan (955 ft.), to the left, lies Mascoma Lake, with a Shaker village on its S. bank. Beyond (140 M.) W. Lebanon we cross the Connecticut and reach —

145 M. White River Junction (365 ft.; Rail. Restaurant; Junction Ho., $2), where we cross the Passumpsic Division of the Boston & Maine R. R. and join the Central Vermont R. R.

From White River Junction to New York and to Quebec, see p. 158. — A branch-line runs to (14 M.) Woodstock (Woodstock Inn, well spoken of), the birthplace of Hiram Powers (1805-73), the sculptor, and Geo. P. Marsh (1801-82), the diplomatist and Norse scholar.

Our line ascends through the picturesque *Valley of the White River, which flows down through the Green Mts. Beyond (153 M.) West Hartford we cross the river (*View). 158 M. Sharon (500 ft.), the birthplace of Joseph Smith (1805-44), founder of Mormonism. At (177 M.) Randolph (680 ft.) the scenery becomes wilder and the higher summits of the Green Mts. come into sight. At (192 M.) Roxbury (1015 ft.) we cross the watershed and begin the descent to Lake Champlain. On a hill to the right, at (199 M.) Northfield, is Norwich University, a military college.

209 M. Montpelier Junction, whence a short branch-line runs to (3 M.) Montpelier (520 ft.; Pavilion, $2-3 1/2), the capital of Vermont, on the Winooski, with 4160 inhab. and a handsome State House, surmounted by a dome 124 ft. high. In the portico is a Statue of Ethan Allen (1737-89; p. 127). In the building of the Y. M. C. A. is the Montpelier Art Gallery, chiefly consisting of paintings (original and copied) by Thomas W. End. The State Library is a tasteful building. — Near (214 M.) Middlesex (635 ft.) the Winooski passes through the Middlesex Narrows, a rocky gorge 1/4 M. long, 60 ft. deep, and 30 ft. wide. — 219 M. Waterbury (430 ft.; Waterbury Ho., $2) is a good centre for excursions.
Lake Winnipesaukee. 15. Route. 131

An electric railway runs from Waterbury to the N. to (10 M.) Stowe (Brick Hotel, §2), a favourite summer-resort amid the Green Mts. Mt. Mansfield (4364 ft.), the highest of the Green Mts., is ascended hence by a good road (9 M.) and affords a splendid view. It has three distinct peaks, the Forehead, Nose, and Chin, of which the last is the highest. The road ends at the base of the Nose (Summit Ho., §2-3), whence a path ascends to the Chin (2½-1 hr.). The view from the Nose is, however, almost as good, including Lake Champlain and the distant Adirondacks. Mt. Mansfield may also be ascended by a path on the W. side, leading from Jeffersonville through the Smuggler's Notch. — Excursions may also be made from Stowe to Moss Glen Falls, the Camel's Hump (see below), etc.

Camel's Hump (4090 ft.) is now seen to the S.W. (left) and may be reached from (223 M.) North Duxbury (road 3 M., path 3 M.). To the N. (right) we see the Bolton Falls. Beyond (237 M.) Wills-ton we enjoy a retrospect of Mt. Mansfield and Camel's Hump.

From (241 M.) Essex Junction to (335 M.) Montreal, see R. 15a.

c. Via Concord, Plymouth, Wells River, and Newport.

343 M. Boston & Maine Railroad to (235 M.) Newport in 7½-8 hrs.; Canadian Pacific Railway thence to (103 M.) Montreal in 4-4½ hrs. (fares as above). — This route runs via Lake Winnipesaukee (see below) and also forms one of the approaches to the White Mts. (p. 134; views to the right).

From Boston to (75 M.) Concord, see R. 15b. Our present line crosses the Merrimac and runs towards the N. About 4 M. from (84 M.) Canterbury is a large Shaker village. To the left rises Mt. Kearsarge (p. 130). On the hill above (93 M.) Tilton is a Memorial Arch (55 ft. high), erected in honour of the Tilton family. Beyond Tilton, where we leave the Merrimac, we cross and recross the Winnipesaukee River and skirt Lake Winnisquam. Ahead (left) rise the Sandwich Mts. 102 M. Laconia (Eagle, §2-2½). — 104 M. Lakeport (Mt. Belknap Ho., §2), at the extremity of Long Bay, an inlet of Lake Winnipesaukee, is the junction of a branch-line to (17 M.) Alton Bay (see below), at the S. end of Lake Winnipesaukee.

Lake Winnipesaukee or Winnipesogee (470 ft.; 'Smile of the Great Spirit' or 'Beautiful Water in a High Place'), the largest lake in New Hampshire, is an irregularly shaped sheet of water, 25 M. long and 1-7 M. wide, surrounded by picturesque hills and dotted with innumerable islands. Its waters (10-300 ft. deep) are singularly clear and are well stocked with fish. The villages on the shores of the lake are favourite summer-resorts, and are centres for numerous charming excursions. Small steamers traverse the lake (see below), which is generally reached either at Alton Bay, Weirs, or Wolfeborough (see below).

Alton Bay (Winnipesaukee House, §2) lies at the end of the narrow fjord, 5 M. long, forming the S. extremity of the lake. Among the excursions made from this point is the ascent of Belknap Mt. (2395 ft.; view; afternoon-light best), 12 M. to the N.W. (carriage-fare there and back $1½). Nearer points of view are Mt. Major, Prospect Hill, and Sheep Mts. Merry Meeting Lake lies 3 M. to the E. Besides the above-mentioned route, Alton Bay is reached via Lawrence and Dover (see p. 107).

From Alton Bay a small steamer plies to (9 M.) Wolfeborough (Kings-wood, §2 1½-3½; Sheridan, Wolfeboro Hotel, §2; many boarding-houses), the largest village on the lake (3200 inhab.), pleasantly situated on the E. bank. The favourite excursion is to Copple Crown Mts. (2100 ft.), 6½ M. to the S.E. (carriage, $1½ each), the view from which includes Mts. Ossipee and Chocorua to the N. (with Mt. Washington in the distance on a clear
day) and extends to the ocean on the S.E. Tumble Down Dick, to the N., of Copple Crown, also affords a good view. Wolfeborough may also be reached via Salem, Portsmouth, and Sanbornville (see p. 134).

From Wolfeborough steamers run across the lake to (14 M.) Weirs (comp. below: $80c.) and up the lake to (17 M.) Centre Harbor (80c.), both routes affording beautiful views, including Mt. Washington.

Weirs (Hotel Weirs, Lakeside, Winnecoette, §2-3), on the W. side of the lake, is a popular summer camping-ground of various ecclesiastical and other bodies. It is a station on the B. & M. R. R. (see below), and steamers run to Lakeport (p. 131).

Centre Harbor (600 ft.; Senter Ho., with good lawn-tennis courts, $2/1/2-3; Moulton, $2-21/2; boarding-houses), at the N.W. extremity of the lake, is, perhaps, the pleasantest point to sojourn. About 4 M. to the N.W. (carr. to the foot, bridle-path to the top 11/2 M.) rises Red Hill (2038 ft.), commanding a splendid View, with the Sandwich Mts. (Chocorua, etc.) to the N. and N.E. To the W. of Red Hill, about 3 M. from Centre Harbor, lies Squam Lake, a smaller edition of Lake Winnipesaukee (Asquam Ho., on Shepard Hill, on the W. bank. Centre Harbor Hill (1 M.) is a good point of view. Drives may be taken 'Round the Ring', to Ossipee Park, to Plymouth (see below), etc. — Coaches run from Centre Harbor to (18 M.) West Ossipee, whence Mt. Chocorua (3508 ft.; View), one of the most finely shaped mountains in New England, may be ascended via Tamworth.

From Lakeport (p. 131) the train runs to the N. along the bays on the W. side of Lake Winnipesaukee. 109 M. Weirs (see above); 112 M. Meredith, 5 M. from Centre Harbor (see above). To the right is Lake Waukewan. We now turn away from Lake Winnipesaukee. 121 M. Ashland. At (123 M.) Bridgewater we cross the Pemigewasset (g soft; 'place of crooked pines').

126 M. Plymouth (*Pemigewasset Ho., $2-1/2, meal-station; Livermore Ho., $2.), in the beautiful valley of the Pemigewasset, 7 M. to the W. of Squam Lake (see above). A good view is obtained from Walker's Hill, close to the village; and *Mt. Prospect (2070 ft.), 4 M. to the N.E., commands a splendid panorama of the Franconia Mts. (N.), Sandwich Mts., and Lake Winnipesaukee. Plymouth is known for its buckskin gloves, and contains the old court-house where Daniel Webster made his first plea. Nathaniel Hawthorne died at the Pemigewasset House in 1864.

From Plymouth to Lincoln, 21 M., railway in 1 hr. This line ascends the *Valley of the Pemigewasset and leads to the heart of the Franconia Mts. (see p. 142). Fine views. — 20 M. North Woodstock (*Deer Park Hotel, $81/2; Fair View, §2) is finely situated at the S. end of the *Franconia Notch, 10 M. from the Profile House (see p. 142; stage). — 21 M. Lincoln.

Our train now ascends the valley of the Baker River. Small stations. 145 M. Warren (Moosilauke Ho., $2) is the starting-point of the stage to the (10 M.) top of *Mt. Moosilauke ('bald place'; 4790 ft.), which has been conspicuous to the right for some time (Tip-Top Ho., at the top, $3; The Moosilauke, at the base, $3). The View of the White Mts., the Franconia Mts., and the Connecticut Valley is very fine. — Near (150 M.) Warren Summit (1060 ft.), the highest point on the line (path to the top of Mt. Moosilauke, 5 M.), the train passes through a deep rock-cutting. At (168 M.) Woodsville, at the mouth of the Ammonoosuc (p. 139), we cross the Connecticut to —
169 M. Wells River (Rail. Restaurant), where our line joins the Passumpsic Division of the Boston and Maine Railroad. Wells River is also the junction of lines to the White Mts. and Montpelier (see below).

From Wells River to Groveton Junction, 52 M., railway in 2½-3 hrs. (fare $1.90). This line runs into the heart of the White Mts. (see R. 16) and forms part of one of the regular through-routes from New York and Boston (comp. p. 134). The White Mt. expresses from the latter city do not cross the river at Wells River. — The train ascends along the Ammonoosuc, 4 M. Bath; 9 M. Lisbon; 15 M. Sugar Hill (village, see p. 144); 20 M. Littleton (Chiswick Inn, from § 3; Thayer's, The Maples, § 2-3), a pleasant resort, from which stages run to (6 M.)Franconia (p. 144). — 25 M. Wing Road is the junction of the line to (4 M.) Bethlehem Junction, (6 M.) Twin Mt. House, (11 M.) Zealand, (12 M.) White Mt. House, and (13 M.) Fabyan's (comp. p. 144). [From Bethlehem Junction a narrow-gauge railway runs to (2 M.) Maplewood, (3 M.) Bethlehem Street, and (10 M.) the Profile House; see p. 123.] — 31 M. Whitefield (p. 139), the junction of a line to Jefferson, Gorham, and Berlin (see p. 123); 42 M. Lancaster (see p. 123). — 52 M. Groveton Junction, see p. 122.

From Wells River to Montpelier, 39 M., railway in 1½ hr. — 23 M. Marshfield (1110 ft.). — 39 M. Montpelier, see p. 130.

Beyond (181 M.) Barnet we leave the valley of the Connecticut, which bends to the N.E., and ascend along the Passumpsic, which we cross 25 times in 24 M. — 190 M. St. Johnsbury (St. Johnsbury Ho., Avenue Ho., $2-2½), a busy little town of 6667 inhab., with the Fairbanks Scales Works (700 hands), a Soldiers' Monument, a Museum of Natural Science, and an Art Gallery. It is the junction of lines to (22 M.) Lunenburg (p. 124) and (96 M.) Swanton (p. 128). — 199 M. Lyndonville, with the Great Falls of the Passumpsic. About 6 M. to the N.E. of (208 M.) West Burke lies the beautiful Willoughby Lake, between Mt. Annanance (2500 ft.) and Mt. Hor (1500 ft.). At (213 M.) Summit Station (1050 ft.) we cross the watershed between the Connecticut and the St. Lawrence.

235 M. Newport (700 ft.; *Memphremagog Ho., $2-3; Newport Ho., $1½-2), a village with 3000 inhab., is prettily situated at the head (S. end) of Lake Memphremagog and is a good centre for excursions. Good view of the lake from Prospect Hill, Jay Peak (4018 ft.), 12 M. to the W., commands a wide prospect. *Lake Memphremagog ("beautiful water"); 470 ft.), a lovely sheet of water, 30 M. long and 2-4 M. wide, lies one-fifth in Vermont and four-fifths in Canada. It is enclosed by rocky shores and wooded hills, and its waters abound in lake-trout (salmo conifinis), pickerel, perch, and bass.

A small steamer plies daily between Newport (see above) and Magog, at the N. end of the lake (there and back about 6-7 hrs.). Passing Indian Point and the Twin Sisters, we cross the Canadian line near Province Island. On the W. (left) shore we stop at (12 M.) the Owl's Head Hotel ($2-3), at the foot of the prominent Owl's Head (9270 ft.), which is ascended hence in 1½-2½ hrs. The *View includes, on a clear day, Montreal and the Green, White, and Adirondack Mts. Farther on the steamer passes Long Island and calls at some small landings. On the E. shore are the country-houses of several wealthy Montrealers, and on the W. rises Mt. Elephantus (Revere Ho.). Georgeville (Camperdown Hotel), on the E. bank, 20 M. from Newport, is a quiet and inexpensive watering-place. — Magog (Park's House), at the N. end of the lake, at its outlet through the Magog River, is a good fishing-station and is connected by railway (C. P. R.)
with (19 M.) Sherbrooke (p. 122). Mt. Orford, 5 M. to the W., affords a good view of the Canadian pine-forests to the N. and W.

From Newport our line runs towards the N.W. to (266 M.) Richmond, where we cross the Canadian frontier. Hence to (343 M.) Montreal, see Baedeker's Canada.

Montreal is also reached from Newport by the Grand Trunk Railway via Stonestead Junction, Massawippi, Lennoxville, and Sherbrooke (comp. Baedeker's Canada).

d. Via Portsmouth and North Conway.

365 M. Boston and Maine Railroad to (139 M.) North Conway in 5-1/2 hrs.; Maine Central Railroad thence to (50 M.) Lunenburg in 21/2-23/4 hrs.; St. Johnsbury & Lake Champlain Railroad thence to (23 M.) St. Johnsbury in 3/4-1 hr.; Boston and Maine Railroad thence to (45 M.) Newport in 11/2-2 hrs.; Canadian Pacific Railway thence to (109 M.) Montreal in 4-1/2 hrs. (through-fare $10.50). Passengers for Quebec (fare $11; sleeper $2.50) may travel either via Quebec Junction and the Upper Coos R. R. (p. 123) or via Sherbrooke and the Quebec Central R. R. (p. 121). — This line forms the shortest and quickest approach to the White Mts. (R. 16) and is also one of the regular routes to Lake Winnipesaukee (see p. 131).

From Boston to (57 M.) Portsmouth and (67 M.) Conway Junction, see R. 9a. — Our line here diverges to the left (W.). 69 M. South Berwick; 70 M. Salmon Falls (p. 107); 73 M. Somersworth. — 79 M. Rochester (Dodge's, City, Brunswick, Wrisley, $2), a small manufacturing town with 4683 inhab., is the junction of lines to (29 M.) Portland (see p. 107) and to (18 M.) Alton Bay, on Lake Winnipesaukee (see p. 131). — 87 M. Milton. From (97 M.) Sunbornville (Rail. Restaurant) a branch-line runs to (12 M.) Wolfeborough, on Lake Winnipesaukee (see p. 131). Beyond (116 M.) Ossipee Centre we have a view of Lake Ossipee to the right. 122 M. West Ossipee. To the left are seen the Ossipee Mts. and the Sandwich Mts. (p. 131), with the finely-shaped Chocorua as their Eastern flanksman. We pass between Elliot Pond (left) and Silver Lake (right). Near (126 M.) Madison is the largest erratic boulder (granite) known in the United States, and probably in the world (75 ft. long, 40 ft. wide, 30-37 ft. deep; prob. weight 7-8000 tons). 133 M. Conway (Conway Ho., $2-3), on the Saco River, is a quieter centre than N. Conway for the many pleasant excursions of this region. Mount Mt. (p. 137) is conspicuous on the left, and Mt. Kearsarge (p. 137) on the right.

139 M. North Conway, see p. 136. From North Conway to (212 M.) St. Johnsbury, see R. 14b; from St. Johnsbury to — 365 M. Montreal, see R. 15c.

The chief Routes from Boston to the White Mts. are given at p. 131 and above. The main gateways are North Conway (p. 136), reached in 41/2-8 hrs. (return-fares $6/4-9 acc. to route); Bethlehem (p. 142; 7 hrs.; $9-10); and Plymouth (p. 132; 31/2 hrs.; $43/4-51/4).

The chief direct Route from New York is via Wells River to Fabyan's or Bethlehem (comp. R. 20a; 101/2 hrs.; return-fare $17), but many travellers
approach via Boston and North Conway or Plymouth (comp. RR. 15c, 15d; 12 hrs.; return-fare $17.50). A cheaper route is by steamer to Portland (p. 107) and thence as in R. 14.

Travellers from Montreal approach via Gorham (p. 138) or St. Johnsbury (comp. R. 15c); from Quebec the popular route is via the Quebec Central and Maine Central railways to Fabian's (comp. p. 123).

Excursion (i.e. return) tickets at reduced fares are issued in summer and autumn in all cases, giving alternative routes in going and returning, ample 'stop-over' privileges, and a liberal allowance of time. Through-carriages are run to the principal points in the Mts., and parlor or sleeping cars are attached to all the chief trains (about $1 2/2 extra). The variety of combinations in which the trip is possible is too great to be detailed here, but full information, with maps, time-tables, and illustrated guidebooks, may be obtained on application from the railway-companies interested (comp. p. xxv). Circular Tour Tickets are also issued by Raymond & Whitcomb and Thos. Cook & Co. (p. xxv). For the shorter excursions travellers should ask for the 'one-day excursion tickets'.

Season. The White Mts. may be comfortably visited any time from June to October inclusive, and pedestrians will find the earlier and later months preferable to the warmer and more crowded months of July and August. The colouring of the autumn leaves is an additional attraction in Sept. and October. Black flies and mosquitoes are somewhat troublesome in June. The larger hotels do not open before July.

Time. The chief points of the White Mts., including Mt. Washington, the Crawford Notch, Bethelhem, and the Profile House, may be visited in a week or even less; but it is highly desirable to spend at least 2-4 weeks in the district. A visit to Lake Winnipesaukee (p. 131) may be conveniently combined with one to the White Mts.

Hotels. The hotels vary from the large and fashionable summer caravanserais down to small, unassuming, and inexpensive inns and boarding-houses. As a general rule, they are good of their kind; and a special word of praise is due to the waiting of the students (male and female) at some of the larger houses. The rates vary from $1 1/2 to $5 a day and from $5 to $23 a week.

Outfit. Walkers should be provided with the plain outfit suggested at p. xxv, and should be prepared for both rain and cold, especially at the higher elevations. In July and August, however, the temperature in the valleys is pretty high, and light clothing suffices. Frequent change of dress has become all too usual at the larger hotels, but those whose object is rather outdoor exercise than indoor frivolity need not yield to this custom more than they choose.

Guides are seldom found in the White Mts., as most of the main routes are easily followed. They are, however, sometimes useful for the less well-known excursions (see § 2-3 a day); and the pedestrian should, at any rate, refrain from visiting the less-frequented routes alone. C. E. Love and Hubbard Hunt, of Randolph, are trustworthy guides for the Great Range (§ 3-4). A good pocket compass is useful, especially in the woods.

Carriages ('Buckboards', etc.) are easily obtained at all the chief resorts. Those hired from the hotels are expensive, but more reasonable terms may be obtained from livery-stable keepers and farmers.

The Appalachian Mountain Club (Tremont Building, Boston), founded in 1876 and now numbering 1000 members, has done good service in the White Mts. in making paths, setting up sign-posts, and preparing maps. Its quarterly periodical, Appalachian, contains much valuable information. Admission-fee $5, annual subscription $3.

The White Mountains form the central portion of the Atlantic system of mountains extending from the peninsula of Gaspé to the Carolinas. In the ordinary use of the term, they cover an area of 1300 sq. M. in the state of New Hampshire, extending from the Androscoggin and Upper Ammonoosuc on the N. to the base of
the Sandwich Range on the S. (a distance of 30 M.), and from the Maine frontier on the E. to the valley of the Connecticut on the W. (45 M.). The higher mountains rise from a plateau about 1500-1600 ft. above the sea, and attain an extreme elevation of 5-6000 ft. They are roughly divided into two main groups, the White Mts. proper to the E. and the Franconia Mts. to the W., but with numerous subordinate groups. In the original and narrowest sense the name of White Mts. is restricted to the Great or Presidential Range, extending for about 13 M. from Mt. Madison on the N.E. to Mt. Webster on the S.W. The summits of this range culminate in Mt. Washington (6293 ft.), the highest point to the E. of the Rockies and to the N. of N. Carolina. The great mass of the White Mts. consists of granite, overlaid by mica slate. The scenery of the White Mts. is of a very beautiful and varied nature; and though few of the summits are sharp enough to deserve the name of peaks, many of them (such as Mt. Washington and Mt. Lafayette) are of very noble outline. They are now visited annually by many thousands of summer-guests, and all the chief points are of easy access. The first white visitor is said to have been Darby Field, in 1642.

The following account notices the chief tourist centres.

North Conway (520 ft.; *Kearsarge Ho., $2\frac{1}{2}-4$; Sunset Pavilion, $3-3\frac{1}{2}$; McMillan; numerous boarding-houses), charmingly situated on a low terrace above the 'intervals' of the winding Saco River (pron. 'Sawco'), is a favourite resort with those who like to combine the softer beauties of the valley with excursions into the mountains. To the W. rises Moat Mt., to the E. the Green Hills, and to the N.E. Mt. Kearsarge and Hurricane Mt., while to the N. and N.W. more distant views are obtained of Mt. Washington and other lofty summits. About 1\frac{1}{2} M. to the N. lies the pretty and sequestered little hamlet of Intervale (550 ft.; *Intervale Ho., $2\frac{1}{2}-4$; Bellevue, $2\frac{1}{2}$; Clarendon, $2$; stat., p. 123); and near the foot of Mt. Kearsarge (p. 137), 1 M. to the N.W., is Kearsarge Village (The Ridge, $3\frac{1}{4}$).

To Echo Lake and the Ledges, 2-2\frac{1}{2} M. From the Kearsarge Ho. we follow the road to the N. to (7 min.) the Sunset Pavilion, take the road to the left here (which soon passes below the railway), and cross the (7 min.) Saco by a covered bridge. A few hundred paces farther we cross a branch of the river. About 8 min. farther on, at another brook, the road forks, the left branch leading to Echo Lake, the right to the Devil's Den (see p. 137). We follow the former. At the (12 min.) cross-roads we continue in a straight direction. 3 min. *Echo Lake (925 ft.), a tiny lake, finely situated at the base of a bold rocky bluff which has been prominent during most of our walk. This is the White Horse Ledge (so called from a patch of white rock), one of a series of so-called Ledges (100-900 ft.), or cliffs, in which Moat Mt. ends on this side. Following the bank of the lake towards the N. and disregarding roads leading back to the right, we reach (7 min.) a path leading through wood to the left, which ultimately crosses a fence and reaches (8 min.) a road. We follow the road in the same direction past a quarry, just beyond which are a small refreshment
but and the Devil's Den, under an overhanging slab of rock. We now return to the point whence we emerged from the forest-path, and follow the road to the left. At (6 min.) the highroad (white farm-house) we turn to the right. 10 min. Bridge, where we diverged to the left for Echo Lake (see p. 136). [By turning to the left on regaining the highroad and following it for 3/4 M., we reach a sign-board pointing to Diana's Baths.]

To Artists' Falls, 1/4 M. We proceed to the S. from the Kearsarge Ho., past the Maine Central R. R. Station, to (10 min.) the bridge over Artists' Brook; then turn to the left and follow the road, crossing another bridge, to (12 min.) the North Conway Keasly Institute (formerly Artists' Falls Hotel). A path to the right leads to (5 min.) the Forest Glen Mineral Spring (alkaline). To reach the falls we take the right branch of the fork opposite the spring, and in 5-6 min. more reach their side. The Artists' Falls are small, but pretty in wet weather.

Ascent of Mt. Kearsarge (5-6 hrs. there and back). Going N. from the Kearsarge Ho., we take the (3 min.) second turning to the right (sign post 'to Kearsarge Village'), cross the railway, and (5 min.) turn to the left. This road leads through Kearsarge Village (see above) to (1 1/4 M.) a small church, where we turn to the right. 1/3 M. Farm House (carr. to this point, 50 c. a head; horse hence to the top $2; guide, unnecessary, $2; ascent hence in 1/4-2 1/4 hrs.). The path, which is steep and stony at first, comparatively easy in the middle, and steep towards the top, begins behind the farm-house, crosses fields, and enters (8 min.) the wood. 25 min. Path leading back to the right to Prospect Ledge ('View of Saco Valley, Moat Mt., etc.). About 10 min. farther up we pass a small spring (to the right). In 10 min. we emerge from the wood and reach the rocky ledges, and soon see a small cairn a little to our right. It is not easy to give directions from this point, but by noting the worn part of the rocks and keeping a look-out for the cairns, we reach the top in about 1 hr. more. At first we keep to the right and then swing round to the left to approach the summit from the W. The noble 'View from the pyramidal Mt. Kearsarge, Kearsage, or Pequawket (3270 ft.; rfrnt. at hut at the top) includes the Saco Valley to the S. and W.; Mt. Chocorua and the bare ridge of Moat Mt. to the S.W.; Moosilauke (p. 132; in the distance), Mt. Hancock, Mt. Carrigain, and Mt. Lafayette, to the W. and W.N.W.; and most of the main summits of the White Mts., including a grand view of Mt. Washington, to the N.W., and the Wild-Cat and Carter Mts., with the Carter Notch between, to the N.; several lakes and ponds, including Lake Sebago, to the E. and S.E. The other Mt. Kearsarge (p. 130), 60 M. off, is seen to the left of Chocorua. The descent may be made to Bartlett (p. 123). In descending to N. Conway a little care is necessary to follow the route over the ledges. In the wood we keep mainly to the right, as nearly as possible straight down the incline.

Moat Mountain (N. peak, 315 ft.; 'View) may be ascended in 3-4 hrs., from North Conway by a path (sign-posts and cairns) beginning near (3 M.) Diana's Baths (see above). — Middle Mt. (1850 ft.), another good point of view, is ascended in 1 hr. by a path beginning near the Forest Glen Mineral Spring (see above). The adjoining Peaked Mt. (1 hr.) and Sunset Hill (855 ft.), a 'cub' of Hurricane Mt., are also easily ascended.

Among the favourite drives from N. Conway are those 'Around the Square' (5 M.), the 'Dundee Drive' (12 M.), and to Jackson Falls (9 M.; see below). The distance through the White Mountain Notch (p. 139) to the Crawford House (p. 139) is 20 M.

Coaches run regularly from N. Conway to (9 M.) Jackson (see below), passing (5 M.) Glen Station (p. 123).

b. Jackson and the Peabody Glen.

Jackson (760 ft.; *Wentworth Hall, with annex-cottages, $4-5; *Gray's Inn, $2-3; Jackson Falls Ho., $2 1/2-3; Iron Mt. Ho., Glen Ellis Ho., $2 1/2; Eagle Mt. Ho., $2-3; boarding-houses) is overshadowed by Iron Mt. (2725 ft.) and Thorn Mt. The *Jackson
Falls, on the Wild-Cat River, near the hotels, are pretty. Good fishing. There is a small golf-course attached to Wentworth Hall.

Excursions are made hence to Goodrich Falls, 1½ M. to the S. (fine after heavy rain only); up the glen of the Wild-Cat Brook to the (8 M.) Carter Notch (3320 ft.), between Wild-Cat Mt. (4415 ft.) and the Carter Dome (4860 ft.); to the top of (1 hr.) Thorn Mt. (2265 ft.); to (4½ M.) Fernald Farm (view of Mt. Washington); to the (3 M.) Winnuketa Falls, etc.

Coaches ply to (4 M.) Glen Station and (9 M.) N. Conway. Carriage to (20 M.) the top of Mt. Washington $6 each, incl. toll (there and back $8); to Gorham (see below) $5 each.

The road from Jackson to the Peabody Glen runs to the N. along the Ellis River, passing through the wooded Pinkham Notch (2018 ft.) and affording glimpses to the left of the deep ravines of Mt. Washington. About 7 M. from Jackson a path to the right (sign-board) leads to the (1/4 M.) *Glen Ellis Falls (70 ft.), and a little farther on, to the left (sign-board), diverges that to the (3/8 M.) Crystal Cascade (80 ft.; hence to Tuckerman’s Ravine, see p. 146). A steep road to the left farther on joins the (1½ M.) carriage-road from the site of the Glen Ho. to Mt. Washington (p. 144), 2 M. above the toll-house. About 1½ M. farther on, to the right, is a path leading to (1/4 M.) Thompson’s Falls and Emerald Pool (guide-board).

11 M. (from Jackson) Site of the Glen House (1630 ft.), a large summer-hotel, burned down in 1894 and not rebuilt. This, owing to its fine situation on the Peabody River, at the N.E. base of Mt. Washington, with Mts. Clay, Jefferson, Adams, and Madison forming a grand line of summits to the N. of it, was long a favourite centre for excursions in the White Mts. and particularly for the ascent of Mt. Washington, the carriage-road to the top of which begins here (comp. p. 146). There is now no accommodation for tourists here.

Among the ascents conveniently accomplished from this point are those of Carter Dome (4860 ft.; to the Carter Notch, 3-4 hrs.; thence to the top 1½-2½ hrs.) and Mt. Wild-Cat (4415 ft.; 1-1½ hr.). The latter commands a fine View of Mt. Washington. — Good walkers may reach the top of Mt. Washington via Mts. Madison, Adams, Jefferson, and Clay in 9 hrs. (with guide); and the Appalachian Club has also constructed a blazed path along the whole Carter Range (8 M.; fine views) to Mt. Moriah (p. 139).

On the Peabody, about 3½ M. to the N., are the so-called Garnet Pools, and a visit may also be paid to the Osgood Cascades, 1½ M. to the N.W. — *Tuckerman’s Ravine, see p. 146.

Beyond the Glen House site the road descends through the *Peabody Glen, affording a series of fine views. By crossing (2 M.) the bridge over the Peabody and turning to the right, we may reach a point revealing the profile of Imp Mt. Farther on our road crosses the river and soon reaches —

19 M. (from Jackson) Gorham (see below).

c. Gorham.

Gorham (810 ft.; *Alpine House, $3; Willis Cottage, $1-2), the N. gateway to the White Mts., is a village with about 2000 inhab., finely situated at the confluence of the Androscoggin and the Peabody and commanding a charming view of hill and valley. To
Mountains.

CRAWFORD HOUSE. 16. Route. 139

the S. is the Peabody valley, with Mts. Moriah and Carter to the left; to the N.E., Mt. Hayes; to the N.W., the Pilot Mts. The peaks of the Presidential Range (see p. 136) are concealed by Pine Mt. (2440 ft.), which rises in the S.W. foreground, but they are well seen from adjacent points. Numerous delightful excursions can be made in the neighbourhood (see below).

A good point of view in the immediate vicinity is the Lary Farm (3/4 M. to the N.). — Perhaps the best of the shorter walks is that to the top of Mt. Hayes (2000 ft.), 2 M. to the N.E. The easy and well marked path begins at the N. end of the suspension-bridge over the Andros-coggin and ascends directly, through wood, to (1½ M.) the ridge and (1/2 M.) the summit. The "View includes (from left to right) Mt. Moriah, Imp Mt., and Carter Mt. to the S.; the valley of the Peabody (Pinkham Notch), a little to the right; to the S.W., Mt. Washington, the low Pine Mt. (in the foreground), Mt. Madison, and Mt. Adams; to the W., Cherry Mt., Owl's Head, and (more to the right) Randolph Mt. and Mt. Starr King; to the N.W., the Pilot Mts., Deer Mt., and the twin Percy Peaks. Some authorities consider this the best view of Mt. Washington.

Mt. Surprise (2300 ft.), a spur of Mt. Moriah, to the S.E. of Gorham, may be ascended in 2 hrs. by a path through wood (boy to show its beginning desirable), and commands a fine "View of the Presidential Range. — A seldom-used path (guide necessary) leads hence to the (2-3 hrs.) top of Mt. Moriah (4005 ft.; "View).

Randolph Hill (1700 ft.; Randolph Hill Ho.), 5 M. to the W. of Gorham, is reached by a good road, affording fine views of the Presidential Range.

Mountain wagons run from Gorham in connection with the train via the Glen House site (p. 138) to the top of (16½ M.) Mt. Washington (5 hrs.; return 3 hrs.; fare $8; comp. p. 146). Stages also ply to (19 M.) Jackson (4 hrs.; fare $4; comp. p. 139).

Pleasant drives may also be taken along the S. bank of the Andros-coggin to (1 M. to the E.) Gilead Bridge, returning on the N. bank by the Lead Mine Bridge (3½ M. from Gorham; "View); to the N., along the ‘Milan Road’ to (6 M.) the Berlin Falls (p. 121) and (1½ M.) Milan Corner; and W. to (57 M.) the Crawford House (see below) and the White Mt. Notch (see below) via (17 M.) Jefferson, the ‘Cherry Mt. Road’, the White Mt. House (p. 141), and the Fabian House (p. 141; splendid views). A grand walk for a good pedestrian would be to ascend Mt. Madison (p. 138) and proceed thence via Mrs. Adams and Jefferson (see p. 138) to Mt. Washington (guide necessary; 1-2 days).

Gorham is a station on the Grand Trunk Railway from Portland to Montreal (see p. 121), and on the B. & M. line from Berlin to Whitefield (comp. p. 133, and see Map, p. 134).

d. Crawford House and the Notch.

The *Crawford House (1900 ft.; $3-4½ a day, $17½ a week), one of the most deservedly popular hotels in the White Mts., occupies a solitary site on a small plateau, ¼ M. above the N. entrance to the White Mt. Notch. The small pool in front of the house is the source of the Saco River, flowing to the S. through the Notch to Maine and the sea, while the Ammonoosuc, also rising close to the hotel, flows N. (and then W.) to the Connecticut. The railway-station (p. 123) is near the hotel. To the W. rises Mt. Tom (p. 140) and to the E. Mt. Clinton (p. 140), while in front, enclosing the Notch, are Mt. Willard (p. 140; r.) and Mt. Webster (p. 140; l.)

The railway route through the *White Mountain Notch (1915 ft.)
has been described at p. 123 and affords some of the finest, though most fleeting, views of it. The Notch is seen to greater advantage in descending. The road and river enter the Notch through a rocky *Gateway, 25 ft. wide, while a separate cutting has been made for the railway (above, to the right). To the left is the rock known as the Elephant's Head (*View). Within the Notch various fantastic names have been given to rocks supposed to resemble human faces, etc. About 3/4 M. from the Crawford Ho., to the left, the Flume Cascade descends, in three leaps, from a height of 250 ft.; and 1/4 M. farther on is the graceful *Silver Cascade, with a total fall of 900 ft., of which about 300 ft. are seen from the road. The Willey House (1325 ft.), a small inn 3 M. from the Crawford Ho. and 300 ft. below the railway, was the scene of a terrible disaster in Aug., 1826. The whole Willey family, 9 in number, rushing from the house to escape a land-slip, apparently descending directly upon it, were overtaken and crushed, while the house escaped harm through the splitting of the land-slide by a rock. The Notch proper ends just below the Willey Ho., but it is well worth while to continue the walk or drive to Bemis, whence, if necessary, we may return by railway. At the (11/4-11/2 M.) Cow or Avalanche Brook (the second brook below the Willey Ho.), we may cross the railway and ascend to the right to (13/4 M.) the *Ripley or Sylvan Glade Falls (110 ft.), about 1 M. above which is the Sparkling Cascade. Continuing to follow the road along the Saco, we reach (2 M.; 61/2 M. from the Crawford Ho.) Bemis Brook, whence an ascent of 1 M. along its course brings us to the picturesque *Arethusa Falls (175 ft.). Bemis (rail. stat., p. 123) is 2 M. farther down. The Mts. to the left at this part of the road are the Giant's Stairs (3423 ft.), Mt. Resolution (3400 ft.), and Mt. Crawford (3100 ft.), while Mt. Nancy (3810 ft.) towers to the right. Drivers may go on from Bemis to (181/2 M.) North Conway (p. 136).

*Mt. Willard (2786 ft.), easily ascended by a carriage-road(2 M.), crossing the railway below the station, commands a splendid *View of the Notch (afternoon-light best). Near the top (S. side) is a cavern known as the Devil's Den, accessible by ropes only. The Hitchcock Flume, 350 ft. long and 50 ft. high, is reached by a path to the left, 1/4 M. from the summit. — Ascent of *Mt. Washington, see p. 146. — Ascents of Mt. Chilton (4275 ft.), Pleasant (4780 ft.), Franklin (5025 ft.), and Monroe (5390 ft.), see p. 146. — The ascents of Mt. Webster (3376 ft.) and Mt. Jackson (4012 ft.) are fatiguing and unremitting. — The views from Mt. Tom (4040 ft.) and Mt. Field (4300 ft.) are also obscured by trees, but that from the easily ascended Mt. Avalon (ca. 3400 ft.), a spur of Mt. Field, is fine and almost unrestricted. — A better view is obtained from Mt. Willey (4381 ft.; 2-3 hrs.; well-marked path beginning a little to the S. of Moore's Brook Station, 31/2 M. from the Crawford House).

Pleasant short walks may be taken to (3/4 M.) Beecher Cascades (path crossing a foot-bridge over the railway and ascending through wood on the left bank of the stream), *Pearl Cascade (1 M.), Bugle Cliff (3/4 M.), Red Bench (11/2 M.; view of Mt. Washington), and the Shapleigh Path (1 M.). Gibbs Falls (11/2 M.) are reached by turning to the left and ascending through wood and along a brook.

In the height of the season the proprietors of the Crawford Ho. and the Fabyan Ho. (p. 141) make arrangements for the so-called Grand
Mountains.  

**FABYAN HOUSE.**  

16. Route.  

Circuit, by which passengers ascend to the top of *Mt. Washington* by railway (comp. p. 145), drive from the summit to *Glen Station* (p. 123), and return thence by train.

Between the *Crawford House* and (4 M.) *Fabyan’s* (p. 141) the road and railway descend 330 ft. (80 ft. per mile).

e. *Fabyan House, Mt. Pleasant House, Twin Mt. House, and Zealand.*

The *Fabyan House* (1570 ft.; $3-4\frac{1}{2}$ a day, $15-28$ a week), a large and popular hostelry, stands on the site of the *Giant’s Grave*, a drift-mound on the *Ammonoosuc* river, 4 M. to the N. of the *Crawford House* and near the S. base of *Mt. Deception* (3700 ft.). It commands fine views of the mountains and is the junction of the railway to the top of *Mt. Washington* (see p. 145; comp. pp. 123, 133).

The *Mt. Pleasant House* ($4\frac{1}{2}$ a day, from $21$ a week), ½ M. to the S.E., has recently been rebuilt on an enlarged and improved scale. Its golf-links are excellent. A bridle-path ascends hence to the top of *Mt. Stickney* (view). The old *White Mt. House* ($2\frac{1}{2}$), ¾ M. to the N.W. (rail. stat., see p. 123) is smaller and cheaper. Both send conveyances to meet the trains at *Fabyan’s*.

**Upper Falls of the Ammonoosuc, 3\frac{1}{4} M.** We cross the railway in front of the *Fabyan House* and follow the road to the right (notice about key on gate refers to carriages only). ½ hr. (left) *Monument to E. A. Crawford*, one of the earliest settlers in the White Mts. The *Falls* (30-40 ft. high) are picturesque, with their grey granite walls, water-worn basins, and grand mountain-background. — The (1¼ M.) *Lower Ammonoosuc Falls* are near the *White Mt. House*. — A road leads from the *White Mt. Ho.* to a view-point on the S. spur of *Mt. Deception* (see above).

The *Twin Mountain House* (1375 ft.; $3-3\frac{1}{2}$; rail. stat., p. 123) is pleasantly situated on the *Ammonoosuc*, 5 M. to the W. of the *Fabyan House*, but does not command so fine a view. The mountains opposite it are *Mt. Hale* (4100 ft.; left) and the *North Twin* (4783 ft.; right), the latter concealing the *South Twin* (4922 ft.).

The path to the top of the *North Twin* M. is now in good order and marked with sign-boards (3-4 hrs.). The continuation thence to the *South Twin* is reported as still easy to follow.

From *Zealand* (p. 123), 1 M. to the E. of the *Twin Mt. Ho.*, a road leads to (7 M.) *Zealand Pond* and (9 M.) *Thoreau Falls*, which descend 200 ft. in ½ M., in the deep valley between *Mt. Bond* on the right and the *Willey Mt.* (p. 140) on the left. The narrow-gauge line to *Bethlehem* and the *Profile House* (see below) also begins at Zealand, running along the standard-gauge line to *Bethlehem Junction*.

f. *Bethlehem and Maplewood.*

*Bethlehem* and *Maplewood* are reached by a short narrow-gauge railway from *Bethlehem Junction* (comp. p. 123 and above).

The train from *Bethlehem Junction* (p. 123) soon reaches —

2 M. *Maplewood*, a small station for a group of hotels and summer cottages. The *Maplewood* (1490 ft.; $4\frac{1}{2}$; 400 guests), one of the handsomest and most fashionable hotels in the White Mts., commands a splendid distant *View of Mt. Washington*. Adjacent are the *Maplewood Cottage* (from $3$ a day and $10\frac{1}{2}$ a week) and a *Golf Course*. Public conveyances run frequently to *Bethlehem* (10 c.). *Mt. Agassiz* (p. 142; 2 M.) is ascended by a path beginning behind the
Maplewood Hotel and proceeding through wood past (1 M.) a view tower. The Bethlehem excursions (see next page) may all be made from Maplewood.

3 M. Bethlehem (Sinclair House, $31/2; Altamonte, $21/2-31/2; Highland Ho., $3; The Alpine, well spoken of, $21/2; The Uplands, $21/2-3; Turner Ho., The Arlington, $2-21/2; and many others), with 1000 inhab., finely situated 1460 ft. above the sea and 260 ft. above the Ammonoosuc, is visited annually by 10-15,000 summer guests. Its lofty situation makes it cool in summer, and it commands magnificent views of the White Mts., while the Green Mts. are visible to the W. The 'White Mountain Echo' is published here.

Mt. Agassiz (2400 ft.), which rises at the back of the village, is ascended in 3/4-1 hr. We follow the road leading S. from the Sinclair Ho. to (25min.) a house with a sign referring to the toll to Mt. Agassiz (25c., payable only by those who wish to enter the view-tower). Here we turn to the left and follow the path through wood to (25 min.) the top. The 'View includes mountains on every side, the names of which are given by rough mountain-indicators on the top of the view-tower. Mt. Washington is seen to the E., Mt. Lafayette to the S., the Green Mts. to the W. The descent may be made to Maplewood (p. 141; not advisable in waning light, as the 'trail' through the woods is not very distinct. — Creft's Ledge, 2 M. to the E. (reached by a path beginning beyond the Maplewood Hotel), and Wallace Hill, 31/4 M. to the W., are other good points of view. — Favourite drives are the Cherry Valley Drive (5 M.), Around the Heater (6 M.; views of Franconia Mts.), to (7 M.) Twin Mt. Ho., to (71/2 M.) Sugar Hill, to (10 M.) Profile House (also reached by train, see p. 141), to (15 M.) Jefferson, and to (17 M.) Crawford House. To reach the top of Mt. Washington via Fabyan's takes 2-21/2 hrs. by train.

g. The Franconia Mts. Profile House.

The Franconia Mts., included in the wider acceptation of the name White Mts. (see p. 136), is the small group of summits between the Twin Mt. Range on the E. and the Pemigewasset Range on the W. The sharp-peaked Mt. Lafayette (p. 143) is the monarch of the group, and the Profile House is the chief tourist centre. On the W. the range is bounded by the Franconia Notch (p. 143), though in popular speech the term includes the mountains to the W. of this valley. Most of the Franconia Mts. are densely wooded.

The Profile House is reached from Bethlehem Junction by a narrow-gauge railway, 10 M. long, which runs through wood and affords little view. To the right, as we approach the terminus, lies Echo Lake. — Route to the Profile House from Plymouth, through the Pemigewasset Valley, see p. 132.

The Profile House (1974 ft.; $4-5), perhaps the largest of the White Mt. hotels, stands, with its group of cottages, at the N.end of the Franconia Notch (p. 143), to the W. of Mt. Lafayette.

About 1/2 M. to the N. of the hotel, to the right (E.) of the road, is the pretty little 'Echo Lake, where fine echoes are aroused by bugle (small fee; steam-launch round the lake, 1-5 pers. 75 c., each addit. pers. 15 c.). At the foot of the lake is Artists' Bluff, a good point of view. — Eagle Cliff (1470 ft. above the hotel), close to the hotel on the E., is a fine specimen of rock-formation (well seen from Profile Mt.). — Profile Mt. or Mt. Cannon (4107 ft.), opposite the Eagle Cliff, is ascended in 2-21/2 hrs. by a somewhat steep path beginning to the S. of the hotel and running first through wood and then over rocky ledges. *View of Mt. Lafayette. The Cannon Rock lies a little below the summit, on the E.
Mountains.  FLUME HOUSE.  16. Route. 143

side. The Profile Ledges (p. 143), reached from above by a somewhat steep scramble (no path), afford one of the best points of view. — Bald Mt. (2310 ft.), to the N. of Echo Lake, is easily ascended in 1/4 hr. by a cart-track diverging to the right from the road, 1 M. to the N. of the hotel (*View; afternoon-light best). — Mt. Lafayette (5270 ft.) is ascended in 2 1/2-3 1/2 hrs. by a steep bridle-path diverging to the left from the road in front of the hotel and skirting the S. side of Eagle Cliff (to Eagle Lakes, 1 1/4-1 1/4 hr.; thence to the top about as long). The sharp pyramidal summit commands a splendid *View, including the Pemigewasset Valley to the S., the Connecticut Valley and the Green Mts. to the W., and Mt. Garfield (close at hand) and the Presidential Range to the N.E.

Most of the excursions from the Flume House (see below) can be made from the Profile House at a small additional expenditure of time.

The *Franconia Notch is a narrow wooded defile, 5 M. long, traversed by the Pemigewasset River and flanked by the Franconia Mts. on the E. and the Pemigewasset Range on the W. It lies about 2000 ft. above the sea, and the enclosing mountains rise 1500-3000 ft. higher. Frequent coaches run through the Notch to (5 M.) the Flume Ho. and thence to (5 M.) North Woodstock (p. 132).

Starting from the Profile House to walk or drive through the Notch to (5 M.) the Flume House (see below), we soon reach a sign-board by the roadside marking the best point of view for the *Profile or Old Man of the Mountain, a curious freak of nature formed by three protruding and disconnected ledges, 1200 ft. above us, on the side of Cannon or Profile Mt. (right; see Hawthorne’s ‘Great Stone Face’). Below the Profile, to the right of the road, 1/2 M. from the hotel, is Profile Lake (boats). The road for the most part runs through wood and affords no views. About 2 1/2 M. from the hotel, to the right, a bridle-path diverges to (1 1/4 M.) Lonesome Lake, on Cannon Mt., 1000 ft. above the road. To the left, 1/2 M. farther on, is a sign-post indicating the way to Walker’s Falls (1 1/2 M.) and Cataract (1 M.). These lie in the White Cross Ravine, below Mt. Lincoln (5098 ft.), to the S. of Mt. Lafayette. To the right, 1 M. farther on, is the Basin, a small pool by the roadside, where the imaginative see the form of a human foot and leg in the rocks. A small brook coming in here may be ascended to (3/4 M.) the Tunnel Falls.

5 M. The *Flume House (1430 ft.; $3 1/2), at the S. end of the Franconia Notch, is smaller, quieter, and cheaper than the Profile House, and well situated for excursions. It lies at the base of Mt. Pemigewasset, opposite Mt. Liberty and Mt. Flume.

A sign-post in front of the hotel indicates the route to (3 1/4 M.) the *Flume, a fine rocky gorge, 700 ft. long, 60-70 ft. high, and 10-20 ft. wide. It is traversed by a foaming stream, up which the path is carried by wooden galleries and bridges. Extensive traces are still discernible of the landslip of 1888, which carried away the boulder formerly suspended in the narrowest part of the ravine. — Another sign-post in front of the hotel points to (1 1/2 M.) the *Pool, a basin in the solid rock, 150 ft. wide and 40 ft. deep, over-shadowed by cliffs 150 ft. high. — The fine (3 M.) *Georgianna or Harvard Falls (two leaps of 80 ft.) are reached by a path leaving the highroad to the right at a farm-house (guide), 1 M. to the S. of the Flume House.

Mt. Liberty (4472 ft.; view) may be ascended in 3-4 hrs. (descent 2-3 hrs.) by an Appalachian Mt. Club path via the Pool and Langton’s
Jefferson. The White Falls. This path is continued to the (2 M.) top of Mt. Haystack. A comparatively easy walk leads along the ridge from Mt. Liberty to Mt. Lafayette. — The ascent of Mt. Flume (4340 ft.; *View) is somewhat arduous. — Mt. Pemigewasset (2560 ft.), ascended by a steep bridle-path in 1/2-1 hr., is a good and easily reached view-point.

Franconia (920 ft.; Forest Hill Hotel, $3-31/2; Franconia Inn, $21/2-31/2, etc.), situated on the Gale River, 6 M. to the S. of Littleton (p. 133; daily coaches), 4 M. to the S.W. of Bethlehem, and 4 M. to the N.E. of the Profile Ho., is frequented by many summer-visitors. It affords good views of the Franconia Mts. and is a fair centre for excursions.

Sugar Hill (1350 ft.; Sunset Hill Ho., $31/2; Hotel Look Off, $31/2; Miramonte, $21/2, etc.), 21/2 M. to the S.W. of Franconia, is another favourite resort (rail. station, see p. 133). The *View from the summit of the ridge (1780 ft.) from which the village takes its name is superb. A golf-course was laid out here in 1897.

h. Jefferson.

Jefferson (1440 ft.; Waumbek, $4-41/2; Plaisted Ho., $3-31/2; The Jefferson, $3; Stalbird Ho., Grand View Ho., $2), situated on a spur of Mt. Starr King, above the Israel River, is a station on the Concord and Montreal R. R. and lies about 2 M. from Jefferson station on the Maine Central line (p. 123; hotel-omnibuses to meet the trains), 12 M. to the N. of Fabyan's, and 17 M. to the W. of Gorham (comp. p. 139). It commands what many consider the finest general *View of the White Mts.

Mt. Starr King (3915 ft.), the southernmost summit of the Pilot Range, is ascended by a well-marked path from the Waumbek Ho. in 11/2-21/4 hrs. The *View embraces the White Mts., the Franconia Mts., the Green Mts., the valley of the Connecticut, and the Pilot Mts. (to the N.). — Owl's Head (3270 ft.; view) is generally ascended from its W. side by a path (11/2 hr. fee) beginning at King's Farm, 6 M. from Jefferson Hill. — About 5 M. to the S.E. of Jefferson, on the road to Gorham, is the Mt. Adams House ($2), 31/2 M. beyond which begins 'Lowe's Path' up *Mt. Adams (5805 ft.; *View; 21/2-31/2 hrs.). [A path diverging to the left from Lowe's ascends through King's Ravine.] — Bray Hill, a low eminence 6 M. to the S.W. of Jefferson, affords a good view.

The Drive from Jefferson to (17 M.) Gorham (comp. p. 139) or (19 M.) the Glen House Site affords a splendid, unimpeded *View of the N. side of the Presidential Range; and that to (16 M.) the Crawford House (p. 139) is also fine. Other favourite drives are the rounds via Stag Hollow and the Valley Road (9 M.), and via Blair's Mills, the Valley Road, and Cherry Mt. Road (18 M.). Lancaster (p. 123) is 7 M. to the W.N.W.

i. Mount Washington.

Mt. Washington (6290 ft.), the highest mountain in the United States to the E. of the Rockies and N. of N. Carolina, deserves its rank as monarch of the White Mts. as much for the grandeur of its form as for its height. On the N. and E. it is furrowed by several huge ravines, of which Tuckerman's (see p. 146) is the best-known. — See W. H. Pickering's 'Walking Guide to the Mt. Washington Range'.

The group of buildings at the top includes the Summit House, a comfortable inn in which the night may be spent ($5 a day, meal or bed $11/2); a U. S. Signal Service Station; a view-tower (small fee); the office of 'Among the Clouds', a daily paper published here in summer; the old Tip-Top House (disused); stables; an engine-house, etc. The summit is now
Mountains. MOUNT WASHINGTON. 16. Route. 145

annually visited by about 10,000 people. Warm clothing should be brought, as even at midsummer the temperature is very low (30-50°). A temperature of 60° below zero has been observed in winter.

Botanists will find much to interest them in the flora of Mt. Washington, the plants on and near the summit being identical with those of the Arctic Circle. The happiest hunting-ground is the so-called ‘Alpine Garden’, a terrace to the E. of and below the cone. See the Geology of New Hampshire.

The ordinary starting-points for the ascent of Mt. Washington are the Fabyan House, the Crawford Ho., and the Glen Ho. site, while the route over the Northern Peaks (p. 147) is a favourite one with tried pedestrians. Travellers should ascend one way and descend another. The routes from the E. side (p. 146) are, perhaps, the finest. A good walker can ascend from the Crawford Ho. and descend to the Glen Ho. site in one day.

The **View** from Mt. Washington is one of the finest and most extensive in the Eastern States, reaching into Canada on the N. It is particularly grand at sunrise or sunset, but the summit is sometimes swathed in mist or clouds for days at a time. The atmospheric phenomena are often very interesting.

**View.** To the N., across the 'Great Gulf', rise Mts. Clay, Jefferson, Adams, and Madison; a little farther to the right are Mt. Hayes, the Androscoggin Valley, and Mt. Moriah. Gorham is hidden by Pine Mt. To the N.E. we look over the deep valley in which the Glen House lay to Mt. Carter, to the right of which follow the Carter Dome, Carter Notch, and Mt. Wild-Cat. In the distance, towards the N.E., are the Rangeley Lakes and mountains on the Canadian border. To the E. we see Baldface, Mt. Pleasant (with its hotel), and other lower mountains, in the State of Maine. To the S.E. are the pyramidal Mt. Kearsarge and other hills round North Conway, with the Ellis River flowing down to join the Saco. Directly below us is Tuckerman's Ravine. Lake Sebago is also seen, while Portland and the ocean are visible on a clear morning. To the S. are Ossipee Lake and Lake Winnipesaukee, with Mt. Chocorua between them, while more in the foreground are the Giant's Stairs, and Mt. Webster, rising over the White Mt. Notch. The stream seen here is the Mt. Washington River. On the other side of the Notch (S.W.) rise Mts. Nancy, Carrigain, Willey, and Field, while Mt. Moosilauke appears on the horizon a little more to the right. The Lakes of the Clouds lie below Mt. Monroe, in the S.W. foreground. To the S. of W. the finely-shaped Mt. Lafayette is seen among the other Franconia Mts.; while almost due W. opens the valley of the Ammonoosuc (with the Fabyan Ho.), with the Green Mts. and even the Adirondacks visible in the distance. To the N.W. are Cherry Pond, Jefferson, and the Israel River, with Mt. Starr King and the Percy Peaks in the distance. The most distant points said to be visible in exceptionally favourable weather are Mt. Beloell (p. 125), 130 M. to the N.W.; Mt. Wachusett (p. 125), 126 M., and Mt. Monadnock (p. 126), 104 M. to the W. of S.; and Mt. Whiteface (p. 189), 130 M. to the W.

**Ascent of Mt. Washington by Railway.** A branch-line runs from the Fabyan House (p. 141) to (6 M.) Marshfield or Ammonoosuc Station (2670 ft.; Marshfield Ho.), the starting-point of the Mt. Washington Railway, which was constructed on the cog-wheel principle in 1866-69 and ascends on the W. side of the mountain. The distance to the summit (31/10 M.) is accomplished in 1 1/2 hr. (return-fare $4); the average gradient is 1:4, the maximum gradient 1:2 3/4. The season begins in July, and two or more trains run daily. This is by far the most frequented ascent.

The train ascends steeply through wood. 3/4 M. Cold Spring. Beyond (1 M.) Waumbek Junction (3910 ft.; water-station) the trees become thinner. At Jacob's Ladder (5470 ft.; water-tank), a long trestle-work, 30 ft. high
in the middle, the gradient is at its steepest. We now pass the forest line and enjoy fine views. To the left are the 'humps' of Mt. Clay, with the 'Great Gulf' yawning below them and the peaks of Mts. Jefferson and Adams above. From the (21/4 M.) Gulf Tank (5800 ft.) to the summit the ascent is easier. We see the carriage-road to the left, and pass the monument (right) erected on the spot where Miss Bourne died of exhaustion in 1855, 3 M. The Summit House (see p. 145). — It is possible, but rough and fatiguing, to ascend on foot from Marshfield to the top along the railway (3-4 hrs.).

Ascent from the E. side. An excellent carriage-road (average gradient 1:8) was constructed from the Glen House (see p. 138) to (8 1/2 M.) the Summit House in 1854, and mountain-carriages ascend by this route from Gorham in 5 hrs. (return-fare $8 each, incl. toll; descent $3). Toll for foot-passengers 17c. — Walkers may also ascend from the Pinkham Notch via Tuckerman's Ravine in 4-6 hrs.

a. By Road. From the Glen House site the road at first ascends rapidly through wood, and 2 M. up is joined by the new road mentioned at p. 138. 3 1/2 M. Halfway House (3840 ft.). At (4 M,) the Ledge we emerge from the trees and obtain a fine View of the 'Great Gulf', with the other peaks of the Presidential Range beyond it. The road now ascends, less steeply, along the edge of the Great Gulf. It then turns sharply to the left (S.S.E.) and ascends along a shoulder, making another loop to the right ('Cape Horn') farther up ('Views). The final ascent of the cone is steep.

b. On Foot through Tuckerman's Ravine (4 1/2-6 hrs.; a fatiguing route, but guide not necessary for mountaineers). We reach the ravine either by a footpath made by the Appalachian Club from the Crystal Cascade (see p. 138), or by a path, diverging to the left from the Mt. Washington road, 2 M. from the Glen House site (sign-post), and joining (2 M.) the Crystal Cascade path.

'Tuckerman's Ravine is a huge gorge on the S.E. side of Mt. Washington, enclosed by towering rocky walls 1000 ft. high. Following the Appalachian path from the Crystal Cascade, through wood, we reach the (1 1/2 M.) Hermit Lake, a small tarn, commanding magnificent views. A rough walk of 3/4 M. (1/2-3/4 hr.) brings us hence to the 'Snow Arch', in the ravine proper, formed by the stream flowing under the huge masses of snow piled up here in winter. The arch is generally to be seen till August. From the Snow Arch we may reach the summit by a hard climb of 1-1/2 hr.; the route is marked by white paint on the rocks. Tuckerman's Ravine is often visited as an excursion from the Summit Ho. (there and back 3 hrs.); the descent to the Glen Ho. takes 3-3 1/2 hrs. (view best in descending).

Ascent from the Crawford House (4-6 hrs.; guide unnecessary in clear weather). The path is well marked and commands very extensive views.

The path begins to the E. of the Crawford House and ascends through wood on the W. side of Mt. Clinton (to the left the path to Gibbs Falls, p. 140). In 11/2-2 hrs. we reach the summit of Mt. Clinton (4275 ft.; view) and have behind us the worst part of the route. The path now leads along a ridge to the N.E., descends about 270 ft., and then re-ascends. The regular path leads to the right over the S.E. shoulder of Mt. Pleasant (4780 ft.), but a less distinct trail to the left leads to the (9 1/2 hr.) top ('View'), where the footpath from the Fabyan Ho. comes in (see p. 147). We now descend in the same general direction to the Red Pond, on the plateau (4400 ft.) between Mt. Pleasant and Mt. Franklin. To the right, beyond the pond, is Oakes Gulf (3000 ft.; care necessary here in foggy weather). Mt. Franklin (5038 ft.), reached in 1 1/2 hr. from Mt. Pleasant, is another good point of view. Between Mt. Franklin and Mt. Monroe the path runs along a ridge, without much change of level. It leads round the S. peak of Mt. Monroe and bends to the N. To the E. is Boot's Spur, to the left the small Lakes of the Clouds (5060 ft.). 3/4-1 hr. Mt. Monroe (5390 ft.)
reached by a detour of 1/2 hr. from the main path, commands one of the
best near views of Mt. Washington. The path next passes the gap (5100 ft.)
between Mt. Monroe and Mt. Washington, and ascends over the rocky
ledges on the S. side of the latter (the last part, up the cone, steep) to
(1-1/2 hr.) the top of Mt. Washington (p. 144).

The Davis Path (6-8 hrs.) from the Crawford Ho., ascending between
Mts. Crawford and Resolution and over the Giant’s Steps, is now seldom
used and is not easily found without a guide.

Ascent from the Fabyan House (43/4-51/2 hrs.).

This path diverges to the right from the railway, halfway between the
Fabyan House and the Base Station, follows an old ‘logging road’ for some
distance, and ascends the W. side of Mt. Pleasant, at the (11/2-2 hrs.) top
of which it joins the Crawford Path (see above).

Route over the Northern Peaks (1-11/2 day, with guide).

The “Walk over Mts. Madison, Adams, Jefferson, and Clay to the summit
of Mt. Washington forms a fine but trying excursion for good mountaineers
with trustworthy guides. It is possible to do it in one long day, but it
is preferable to take two days and pass the night in the Madison Spring
Hut of the Appalachian Mt. Club (4800 ft.; open to all).

The “Views are very grand. Mt. Madison (8380 ft.) may be ascended from
the Glen House site by a somewhat overgrown path in 3-4 hrs.; it may
also be ascended on the N. side by a path beginning at the Ravine House,
61/2 m. to the W. of Gorham (comp. p. 139). In passing from Mt. Madison
to Mt. Adams, we dip about 450 ft., and the Madison Spring Hut is in this
depression, near Star Lake. Mt. Adams (5805 ft.) may also be ascended by
the path (‘Lowe’s Path’) mentioned at p. 144. Storm Lake (4940 ft.) lies in
the hollow between Mt. Adams and Mt. Jefferson (5736 ft.; *View of Mt.
Washington). Between Mt. Jefferson and Mt. Clay (5554 ft.) we descend
735 ft., and between Mt. Clay and Mt. Washington (p. 144) 940 ft.

17. From Boston to Albany.

a. By Boston & Albany Railroad.

202 M. Railway in 58/4-9 hrs. (fare $41/2; parlor car $1; sleeper
$1.50). To (38 M.) Saratoga in 11/4 hr. more (see p. 197). Through-trains
run by this route to St. Louis, Chicago, Cincinnati, etc.

From Boston (p. 81) to (99 M.) Springfield, see R. 4a. The line
to New York (see p. 68) diverges here to the left (S.), while
our line crosses the Connecticut and runs nearly due W. through the
valley of the Agawam. 108 M. Westfield, with manufactures of whips
and cigars. The train now begins to ascend along the Westfield
River, and the hills grow higher. 119 M. Huntington (400 ft.). Beyond
(126 M.) Chester (620 ft.) the line climbs rapidly through a rocky
and wooded valley, contracting at places to a wild ravine. Deep
rock-cuttings. Numerous small lakes. Near (134 M.) Becket
(1200 ft.; Claflin Ho., $2) we reach the flat top of the Hoosac Range
(ca. 1400 ft.), and farther on we begin to descend again into the
Berkshire Valley, skirting the Housatonic River. For a description
of the Berkshire Hills, see R. 19. The descent to (145 M.) Dalton
(1050 ft.; Irving Ho., $2) is rapid and the scenery picturesque. —
151 M. Pittsfield (1010 ft.), junction of the Berkshire Division of
the N. Y. N. H. & H. R. R., see p. 154.

From Pittsfield to North Adams, 20 M., railway in 3/4 hr. 9 M.
Chester; 14 M. Adams, the nearest station to Greylock (p. 155; ascent
arduous from this side). — 20 M. North Adams, see p. 155.
To the N. (right), at some distance, rises the double-peaked Greylock (p. 155). The train now crosses the Housatonic, turns to the left (S.), passes (155 M.) West Pittsfield (with a settlement of Shakers), and at (162 M.) State Line enters the State of New York. We leave the Berkshire Valley by crossing the Taghkanic or Taconic Range (ca. 2000 ft.) and then traverse an undulating wooded district. 177 M. Chatham, the junction of lines to Hudson (p. 167), Lebanon Springs (p. 154), and New York (comp. p. 57); 185 M. Niverville, with a fine park, much resorted to from Albany. Beyond (200 M.) Rensselaer we cross the Hudson by a fine bridge (view).

202 M. Albany, see R. 22.

b. Via the Hoosac Tunnel.

193 M. Fitchburg Railroad to (191 M.) Troy in 6-8 hrs.; New York Central of Delaware and Hudson Railroad thence to (7 M.) Albany in \( \frac{1}{3} \) hr. (fares as above). Saratoga (p. 197) is reached by this line, via Johnsonville, in 6\( \frac{1}{2} \)-8 hrs. Through-trains run to the Western cities. The line skirts the N. margin of the Berkshire Hills (R. 19; views to the left).

From Boston to (60 M.) South Ashburnham, see pp. 124-126. At (65 M.) Gardner the branch from Worcester (p. 68) to Winchendon crosses the main line.

From Princeton, on this branch, midway between Worcester and Winchendon, stages run to Mt. Wachusett (p. 129).

From (82 M.) Athol a branch of the Boston & Albany R. R. runs to Springfield (p. 68). Beyond (97 M.) Miller's Falls we see Mt. Toby (1275 ft.) to the left and Lake Pleasant to the right. We then cross the Connecticut and the Deerfield and reach (105 M.) Greenfield (Mansion Ho., $2 1/2; well spoken of; American Ho., $2; Rail. Restaurant), a favourite summer-resort and the junction of the Conn. River Division of the B. & M. R. R. It has a tasteful Soldiers' Monument. Excursions may be made hence to (3 M.) Deerfield (p. 157), Turner's Falls (41/2 M.), the Coleraine, Leyden, and Shelburne Gorges, etc.

The train now follows the pretty valley of the Deerfield, with Arthur's Seat (930 ft.) to the right, and beyond the *Deerfield Gorge reaches (119 M.) Shelburne Falls (Hotel, $2), where the river descends 150 ft. in two or three distinct falls. To the N. (right) of (128 M.) Charlemont rises Poconotuck Mt. (1890 ft.). The stream is crossed, and the scenery becomes wilder. A little farther on we penetrate the Hoosac Range (2400 ft.) by the (135 M.)*Hoosac Tunnel (765 ft.), which is 43/4 M. long (transit of 9 min.; Mt. Cenis Tunnel 71/2 M.) and was constructed in 1855-74 at a cost of $20,000,000 (4,000,000 l.). It is the longest tunnel in the United States.

143 M. North Adams, see p. 155. The train descends the valley of the Hoosac. To the left rises Greylock (p. 155), to the right East Mt. (2200 ft.). 148 M. Williamstown, see p. 155. We turn to the N.W. (right), cross a corner of Vermont, and enter New York State.
164 M. Hoosick Falls; 166 M. Hoosick Junction, for a branch-line to (11 M.) Bennington (p. 160) and (68 M.) Rutland (p. 160).

At (175 M.) Johnsonville the railway forks, the left branch leading to Troy (see below), and the right to (189 M.) Mechanicville (p. 158) and (212 M.) Rotterdam Junction (p. 214).

From (188 M.) East Saratoga Junction, on the latter branch, a line runs to (18 M.) Saratoga (p. 197).

191 M. Troy, see p. 160. Thence to (198 M.) Albany, see R. 20 c.

18. From New York to Pittsfield (Berkshire Hills).

155 M. New York, New Haven, and Hartford Railroad in 4½-6 hrs. (fare $3.25; parlor-car $1).

From New York to (41½ M.) South Norwalk, see R. 4a. The Danbury Division of the N. Y., N. H., & H. R. R. here diverges to the left from the main line and ascends along the Norwalk River, traversing a pretty wooded country, becoming hillier as we proceed. 43 M. Norwalk (p. 65); 49 M. Wilton; 54 M. Branchville (340 ft.), the junction of a short line to Ridgefield (800 ft.), the birthplace of 'Peter Parley' (S. G. Goodrich; 1793-1860); 59 M. Redding, the birthplace of Joel Barlow (1755-1812), author of the 'Columbiad'. — 62 M. Bethel, a prosperous little place with 2335 inhabitants.

The Shepaug Railroad runs from Bethel to (83 M.) Litchfield (1200 ft.; Hawk-Hurst, $3-4; U. S. Hotel, $2-3), a summer-resort in a pretty, hilly district, near Bantam Lake (hotel, $2). Pop. (1890) 2246. It was the birthplace of Henry Ward Beecher (1813-87) and Mrs. Beecher Stowe (1812-96).

65 M. Danbury (Turner Ho., New England Hotel, $2), a town of 16,552 inhab., with large hat-factories, is the junction of the New England R. R. (p. 68). — At (71 M.) Brookfield Junction (340 ft.) we pass on to the Berkshire Division of the railway and are joined by the line from New Haven and Bridgeport. The hills now 'begin to show mountainous symptoms'. At (73 M.) Brookfield the Housatonic, the beautiful valley of which we henceforth follow, comes into view on the right. To the left is the Still River. We cross the Housatonic as we near (80 M.) New Milford (New England Ho., New Milford Ho., $2), and thereafter have it to the left. Above (93 M.) Kent (Kent Inn, $2), a prettily situated village, the valley contracts. 101½ M. Cornwall Bridge. To the left rises the Sharon Ridge (1500 ft.). — 112 M. Falls Village (550 ft.; Falls Village Inn, $2), near the *Falls of the Housatonic (130 ft.). A coach runs hence to Salisbury. To the left (2¼ M.) rises Mt. Prospect (1475 ft.), a good point of view. — 117½ M. Canaan (670 ft.; Warner Ho., $2) is a good centre for excursions.

Canaan Mt. (1500 ft.), 1 M. to the S.E., affords a view of the Housatonic Valley, the Twin Lakes, and the Berkshire Hills (R. 19). The Twin Lakes lie 1½ M. to the W. Excursions may also be made to Campbell's Falls (7½ M.), Sage's Ravine (7 M.; p. 181), etc.

Canaan is also a station on the Philadelphia, Reading, & New England R. R., which runs hence to the N.E. to Norfolk and Winstead and to the S.W. to Twin Lakes, Lakeville, and State Line (p. 148), all pleasant resorts.
We now pass from Connecticut into Massachusetts and enter the district of the Berkshire Hills proper (R. 19).

The Taconic or Taconic Mts. rise to the left, and the Hoosac Range to the right. Beyond (120 M.) Ashley Falls we cross the Housatonic. 124 M. Sheffield (see below); 129½ M. Great Barrington (p. 151). — 132 M. Van Deusenville is the junction of a line to West Stockbridge, State Line, and Albany (p. 170). Monument Mt. (p. 152) rises to the right. — 154 M. Housatonic; 137 M. Glendale. We cross the river once more and bend to the right (E.). — 139½ M. Stockbridge (p. 151). In the next few miles we cross the Housatonic several times. 140 M. South Lee; 144 M. Lee (p. 153); 146½ M. Lenox Dale. At (148½ M.) Lenox Station omnibuses from the hotels at (2½ M.) Lenox (p. 153) meet the trains. 151 M. New Lenox. We cross the river for the last time in entering — 155 M. Pittsfield (p. 154; Rail. Restaurant).

From Pittsfield to (20 M.) North Adams, see p. 155.

The district known as the Berkshire Hills, corresponding practically to Berkshire County (pop. 86,292 in 1890) in the W. part of Massachusetts, is 50 M. long from N. to S. and 20-25 M. wide from E. to W., covering an area of about 1300 sq. M. On the W. it is bounded by the Taconic Mts. and the State of New York; on the E. by the Hoosac Mts., a S. prolongation of the Green Mts.; on the S. by Connecticut; and on the N. by Vermont. The region confined between the two mountain-ranges is broken up into a number of smaller valleys, interspersed with isolated hills; and for the gentle loveliness of a hill-country, as contrasted with a mountain country, it is unsurpassed in the United States and has few rivals elsewhere. The Hoosac flows through the district towards the N. to join the Hudson, and the Housatonic flows S. towards Long Island Sound, while innumerable small lakes and brooks add to its attractions. The praises of the Berkshire Hills have been repeatedly sung by Longfellow, Bryant, Whittier, Hawthorne, Beecher, and others. — The name of the Taconic Mts. is well known in geology, as the non-fossiliferous Taconic formations are regarded as a distinct system, intermediate between the Archæan rocks and the Potsdam sandstone. — Perhaps the best Season to visit the Berkshires is in autumn, as the brilliant autumnal tints of the American woods are seen here to perfection. Fashion has decreed that the seaside sojourn at Newport should be followed ere returning to town by a ‘fall’ visit to the Berkshire Hills, and many people stay here till well on in November. Lenox (p. 153) is the most fashionable resort, but Stockbridge (p. 151), one of the loveliest villages in America, is perhaps an equally good centre for casual travellers; while Pittsfield (p. 154), Great Barrington (p. 151), and other places also form good headquarters. The Hotels are usually good and not exorbitant. The Roads are well-adapted for driving and cycling. Carriage Hire is lower than at Newport or in the White Mts.

Pittsfield is reached from New York in 4½ hrs. (fare $3½; see R. 18) and from Boston (see R. 17a) in 4½-5 hrs. (fare $3.40).

The S. half of the district has hitherto been the best known, and the following description enumerates the chief points in order from S. to N. Comp. the ‘New Book of Berkshire’, by Clark W. Bryan.

Sheffield (675 ft.; Bacon House; rail. stat., see above), a quiet little village on the Housatonic, attracts a few summer-visitors and is known for its marble-quarries, which supplied the material
for Girard College (p. 239). Pop. (1895) 1897. Tobacco is largely
grown in the neighbourhood.

**Mt. Washington** (2625 ft.; view), sometimes called the Dome or **Mt.
Everett**, one of the highest of the Taconic Mts., rises 5 M. to the W., and is
frequently ascended hence (road to the base: path to the top 1½ hr.). — The
Sheffield Elm, mentioned in the 'Autocrat of the Breakfast Table', is 1 M.
to the S. of the centre of the village. — Other pleasant points are Bear's
Den, 1 M. to the W.; *Sage's Ravine, 6 M. to the S.W.; Twin Lakes, 5 M. to
the S.; and *Ashley Falls (4 M.). The *Bashkisha Falls, 7½ M. to the W., are
also visited hence.

From Sheffield we may proceed to the N., along the Housatonic,
either by road (a pleasant drive) or railway, to (6 M.) —

**Great Barrington** (720 ft.; *Berkshire Inn, Main St., $2½-3; The
Taghkannuc, Berkshire Heights; Miller Ho., Collins Ho., $2; rail. stat., p. 150), beautifully situated in a hollow surrounded by
hills, the slopes of which afford good views of the picturesquely
spired town and the valley. Pop. (1895) 4794.

The railway-station lies to the W. of Main Street, shaded by fine elms,
to which we turn to the S. (right). We pass the Post Office (l.) and Town
Hall (r.) and in a few minutes reach (r.) the Episcopal Church, built of
blue limestone, and the large Berkshire Inn. Opposite, concealed by
a massive stone wall and trees, is *Kellogg Terrace, a magnificent mansion
of blue limestone, with red-tiled roofs, erected by the late Mrs. Hopkins-
Searles, in a French Gothic style, at a cost of $1,500,000 (300,000£). It is
most elaborately fitted up (no admission). A good distant view of it
is obtained from the hill on the opposite side of the river. The *Grounds
contain a fine fountain (jet 80 ft. high). — The handsome *Congregational
Church and the *Hopkins Memorial Manse (cost $100,000) are on the same
side of the street, a little to the N. of the Post Office. The former con-
tains a magnificent organ (3954 pipes, 60 speaking stops) and an 'echo'
organ, concealed in the walls and operated by 2½2 of electric wire.
The parsong is said to be the finest in the United States.

William Cullen Bryant (1794-1878), the poet, was for several years
(1815-25) town-clerk of Great Barrington, and many of the town records
are in his handwriting. His house (the 'Henderson Place') stood on the
site occupied by the Berkshire Inn, but has been moved farther back and is
now an annex of the hotel. Dr. Samuel Hopkins, the hero of Mrs. Stowe's
'Minister's Wooing', lived at Great Barrington for 25 years.

A few hundred yards to the N.W. of the station is the pretty little
Mansfield Pond. The Berkshire Heights (983 ft.), 1 M. to the N. of the
station, command a fine *View. About ½ M. to the S. is Mt. Peter, a good
point of view. To the E., across the river, rise Mt. Bryant (1450 ft.) and
East Mt. (1740 ft.). Belcher's Cove lies at the N. end of the village.

To the S.E. (5 M.) lies Lake Buel, in the hill on the W. side of
which is a chasm known as the Ice Gulf, where ice is found nearly all
summer. — *Monument Mt. (p. 152) is 4½ M. to the N.

The direct road from Great Barrington to (7½ M.) Stockbridge
(railway, see p. 150) runs on the E. side of the Housatonic, with
Monument Mt. (p. 152) to the left and Bear Mt. (p. 153) to the right.

**Stockbridge** (830 ft.; Red Lion Inn, $3; Edwards Arms Hall,
p. 152, $2½; boarding-houses), one of the most typical and
charming of New England villages, with its immemorial elms and
immaculate neatness, 'sleeps along a level plain just under the rim
of the hills'. Pop. (1895) 2077.

In Main St., opposite the road leading to (½ M.) the railway
station (p. 150), is the tasteful Episcopal Church, adjoining which is a War Monument. Following Main St. towards the left (W.), we pass, on the left, the Sedgwick Mansion, the old home of the Sedgwick family. To the right, nearly opposite, is Edwards Hall, now an inn, where Jonathan Edwards (1703-58) wrote his famous treatise on 'The Freedom of the Will'. It is recognizable by the three little windows above the ponderous old door. Beyond Edwards Hall is the Casino, with tennis-courts, etc. Nearly opposite (left) is the Congregational Church, in front of which is a Bell Tower, erected by David Dudley Field to the memory of the Indian Mission and his deceased grandchildren. The most interesting part of the Cemetery (right) is the enclosure of the Sedgwick family, with the grave of the authoress Catherine M. Sedgwick (1789-1867). The Edwards Monument, also to the right, was erected in 1871 by the descendants of Jonathan Edwards. To the left is the beautiful Dwight Place, beyond which, on the same side, is the interesting *Old Burial Ground of the Stockbridge Indians, with an appropriate monument (*View). The road diverging to the right at the Edwards Monument leads to a Park, laid out and presented to the town by Cyrus W. Field (view).

In the part of Main Street to the E. of the Episcopal church is the Jackson Library and Reading Room (10,000 vols.; open to strangers). A little farther on is the Academy, with Laurel Hill behind it.

To Ice Glen, 1 1/4 M. From the railway-station we follow the track to the left (E.) to (6 min.) a style to the right, where we cross the fence. The path to the glen runs to the right (up the hill). *Ice Glen, a cleft in Bear Mt. (see p. 153), is a wild, cold, and narrow rocky ravine, in the caverns of which ice may be found in midsummer and which forms a startling contrast to the surrounding scenery. At (15-20 min.) the upper end of the glen we pass through a gate into a pasture, across which we descend by a faint path to (5 min.) the road (gate here marked 'Path to Ice Glen'). Following the road to the right, we regain the station in 1/4 hr.

*FROM STOCKBRIDGE TO MONUMENT Mt. (there and back 9-10 M., or 3-4 hrs.). From the Stockbridge Inn we descend Main St. to the left. It bends to the left, passes the Indian Burial Ground (see above), and (7 1/2 M.) crosses the Housatonic. We then turn to the left and in a few hundred paces cross the railway. Avoiding the road to the right here, we continue in a straight direction to (3 1/4 M.) the cross-roads, where we keep to the left. The road soon dwindles to a lane and begins to ascend. 3/4 M. Smith's Farm, 325 ft. above Stockbridge (view). Here we should ask the way across the pasture, which ascends to the left to (8 min.) a gate leading into the wood. The route through the forest is by an old and winding cart-track, now seldom used for driving. In 20 min. it is joined by another track from the right. A few yards beyond this, to the left, is a small patch of grass, with a slab of rock. A steep footpath ascends hence over rocks to (5-10 min.) the chaotic, rocky top of *Monument Mt. (1250 ft.), which commands a magnificent *View of the Housatonic Valley and the Berkshire Hills. The rock-formations (white quartz) are very fine, especially one huge detached pinnacle known as the 'Pulpit'. Ladies or others who object to scrambling should now return to the cart-track and either retrace their steps or follow it to the left to (25 min.) the Great Barrington road. A little time is saved, however, by descending the indistinct path on the other side of the summit, which merges (1/4 hr.) in a grassy wheel-track, that joins (3 min.) the above-mentioned cart-track about 10 min. from the Great Barrington road. Here we turn to the left for (3 3/4 M.) Stockbridge, a dusty highroad walk which we may
avoid by having a carriage to meet us. About 1 M. from Stockbridge we
pass the stump (32 ft. in girth) of a huge willow.

From Stockbridge to Lenox via Lake Maheenac and Bald Head,
8-9 M. We follow the road leaving Main St. at the Episcopal church and
take the first road to the left (sign-post 'to Lenox 6 M.'). The road ascends
Prospect Hill ('View of Stockbridge') and for a mile or two is lined with
handsome 'places'. To the right is Rattlesnake Hill. After about 3 M. we
see 'Lake Maheenac' or the Stockbridge Bowl (ca. 920 ft.) below us to
the left. At the (1 M.) fork near the N. end of the lake we follow the
left branch ('to Lenox and Pittsfield'). At (¾ M.) the next fork we again
keep to the left, passing (on the lake, to the left) the scanty remains of
the house in which Nathaniel Hawthorne lived in 1849-51, and wrote the
'House of the Seven Gables' and other works. ¾ M. Opposite the pretty
home of Mr. Higginson, we take the central of three roads (driving to
this point advisable in hot or dusty weather), and immediately afterwards
follow the road to the left between two private roads. A very little far-
ter on we ascend to the right by a steep lane. In 20-30 min. we see
the bare grassy top of Bald Head or Mt. Prospect (1555 ft.) to the right,
which we reach by crossing the fence and grass to (3 min.) the cairn.
*View to N. and S., including Lenox, the Stockbridge Bowl, and Mon-
ument Mt. We may now return to the lane and follow it round a wooded
hill and down to (2½ M.) Lenox. Or we may descend the cart-track in
the hollow between Bald Head and the wooded summit to the N., which
leads toward Lenox but soon dwindles to a trail and finally disappears
(this route not advisable for ladies or elderly people). At (10-15 min.)
the foot of the hill we emerge from the wood on a field, where we climb
the fence and continue in the general direction of (1½ M.) Lenox, which
is seen in front. There are so many private roads here, that it is im-
possible to give precise directions, but it is scarcely possible to go far
wrong. Lenox, see below.

Excursions are also made from Stockbridge to Mohawk Lake, 2½ M.
to the W.; Lake Averic, 3 M. to the N.W.; Eldon's Cave, in Tom Ball Mt.,
3½ M. to the W.; over the old Burgoyne Road (Bear Mt.; views); Lee
(4 M.); Great Barrington (1½ M.); West Stockbridge (5 M.), etc.

Lee (355 ft.; Morgan Ho., $2), 4 M. to the N.W. of Stockbridge, is a
village with paper-mills and quarries of marble (used for the Capitol at
Washington, etc.). Pop. (1895) 4056. A fine drive may be taken through
the Hopbrook Valley to Fernside (1160 ft.; Fernside Inn), Tyringham, and Mon-
terey (12 M.). Highlawn Farm, a famous horse-breeding establishment, lies
¾ M. to the N.W., on Laurel Lake (p. 154).

Lenox (1270 ft.; Curtis House, $3-5; Flint Ho., $2-3; nu-
erous boarding-houses), beautifully situated on a ridge, 2½ M.
to the W. of the railway-station (p. 150) and 6 M. to the N. of Stock-
bridge, is the Newport of the Berkshires and makes an even greater
impression of wealth and luxury than the real Newport. Pop. (1895)
2872. The main street, shaded with elms, contains the hotels, a
Club, a Public Library, etc., while the slopes and crests of the sur-
rounding hills are covered with large and often beautiful country
houses. Driving, riding, golf (tournaments in autumn), and lawn
tennis (tournament in Oct.) are the favourite amusements; horse
races are held in the Lee Pleasure Park, and the annual 'Tub Parade'
(of carriages) is a regular institution. Fanny Kemble (1811-93) and
Henry Ward Beecher (1813-87) are among the most famous of for-
er Lenox residents.

The best way to see Lenox is to hire a carriage, with an intelligent
driver, and spend 2-3 hrs. in driving about the network of excellent pri-
ivate roads (open to light vehicles only) of which the place consists. The
grounds of many of the houses are open to the carriages of visitors. The *Sloane and Lanier Places adjoin each other and command a superb *View. Perhaps the finest grounds are those of the Rathbone Place. The Stokes House is built round a tree. The new *Foster Mansion, by Thos. Hastings of New York, is a picturesque Renaissance structure of white marble and red brick, 

The Drives and Walks round Lenox are very attractive, and one can scarcely go wrong in any direction. Among the favourite excursions are those to the top of Bald Head (2½ M.; see p. 153); the Stockbridge Bowl (2½ M.; p. 153) and Stockbridge (6 M.; p. 151); Laurel Lake and the Highlawn Farm (p. 153), 2½ M. to the S.E.; North Lenox Mt. and Yokun's Seat (2080 ft.), 4½ M. to the N.W.; Pittsfield (6 M.; see below); the settlement of the Lebanon Shakers (see below) and Perry's Peak (2080 ft.; view), 9 M. to the N.W.; October Mt., 4 M. to the N.E. Richmond, 4½ M. to the W., is celebrated for its parallel trains of boulders, described by Sir Chas. Lyell. Short walks may be taken to (¾ M.) the Ridge, the (1 M.) Pinnacle, the Lily Pond (1½ M.), the Schermerhorn Woods, etc.

**Pittsfield** (1010 ft.; *Maplewood, North St., $3-4½; American Ho., open all year, $2½-3; Burbank Ho., commercial, $2-3; Beach Grove, $2; Rail. Restaurant), the chief city of Berkshire County, with (1895) 20,461 inhab., is finely situated on a plateau surrounded by hills. It was named in 1761 in honour of the elder Pitt.

The public green in the centre of the city, named the 'Heart of Berkshire', bears the original statue of the *Massachusetts Colour Bear*, by Laun Thompson, which has been reproduced at Gettysburg (p. 259). Among the buildings round the green are two *Churches*, the white marble Court House, and the Berkshire Athenæum (with the Berkshire Historical Society). The Bishop Training School for Nurses, the House of Mercy, the Old Ladies' Home, and the small R. C. Cathedral of St. Joseph may also be mentioned. Pittsfield is the headquarters of the *Agassiz Association* for the study of natural history, which has 1000 local 'chapters' in different parts of the world and over 20,000 members (president, H. H. Ballard). Among the many interesting and attractive private residences are the *Appleton or Plunkett House*, in East St., where Longfellow wrote 'The Old Clock on the Stairs' (clock still in the house); the quaint old *Kellogg Place*, also in East St.; and *Elmwood*, Broad St., with its beautiful grounds. The *Cemetery* contains fine old trees and a large red granite obelisk. Oliver Wendell Holmes lived for some time at a small villa, 2 M. to the S., on the road to Lenox; and the Rev. Dr. John Todd (1800-1874), author of the well-known 'Lectures to Children', was long pastor of the Congregational Church. Electric cars traverse the principal streets.

About 2 M. to the W. of Pittsfield lies *Lake Onota*, on the E. shore of which a public park has been laid out. The excursion may be continued in the same direction, across the *Taconic Mts.*, to (7 M.) *Lebanon Springs* (Columbia Hall, 83-4; Field Inn, $2-3), the waters of which are useful in cutaneous and liver complaints. The Shaker village of *Lebanon* is 2 M. to the S. of the Springs (interesting Sunday services). — *Pontoosuc Lake*, reached by electric car, lies 2½ M. to the N. of Pittsfield, on the road to (20 M.) Williamstown (p. 153). *Lanesboro*, 2½ M. farther on, was the birthplace of 'Josh Billings' (H. W. Shaw; b. 1818). — On the slopes of the *Taconic Mts.*, to the N.W. of Lake Onota, are the *Lula Cascade* (4 M.) and *Berry Pond* (5 M.). — Among the 'Opes', or view-commanding vales, in this neighbourhood, is the *Ope of Promise*, affording a view of the 'Promised Land'. — The *Balanced Rock* is 2 M. to the N. of Lake Onota and 2 M. to the W. of *Pontoosuc Lake*. — *South Mt. (1570 ft.), 2 M. to the S., commands a view of Pittsfield, Lake Onota, Greylock, etc. — Other favourite points for excursions are *Potter Mt., 8 M. to the N.W.;* the *Wizard's Glen*, 4 M. to the N.E.; the *Wahconah Falls, 8 M. to the N.E.; Lake Ashley* (1500 ft.), 6 M. to the S.E.; *Perry's Peak* (see above; 8 M.), etc. — A little to the N.E. of the city is the fine *Allen Stock Farm* (trotting-horses).

The N. part of Berkshire County is much less known than the
Hills. WILLIAMSTOWN. 19. Route. 155

S., and there is no important centre for visitors between Pittsfield and North Adams and Williamstown, 20 M. to the N.

North Adams (700 ft.; Wilson Ho., $2½-3; Richmond Ho., Mansion Ho., $2), a manufacturing city in the narrow valley of the Hoosac, with (1895) 19,135 inhab., is a station on the Fitchburg Railroad (see p. 148) and the terminus of a branch of the Boston & Albany R.R. (see p. 147). It is connected with (6 M.) Adams (p. 147) and (5 M.) Williamstown (see below) by electric tramways.

About 1 M. to the N.E. of North Adams is the Natural Bridge, a narrow rocky archway spanning the Hudson Brook at a height of 50-60 ft. — The W. end of the Hoosac Tunnel (p. 147) is 2 M. to the S.E. of N. Adams, and a favourite excursion is over the Hoosac Mt. (2270 ft.) to (9 M.) the E. end of the tunnel and Hoosac Tunnel Station (Rice’s Hotel, $2).

Ascent of Greylock (8 M.; road), the highest mountain in Massachusetts, now kept as a state reservation. We follow the Williamstown road (to the W.) for a short distance and then turn to the left into the road through the Notch (views), passing (1½ M.) the Notch Brook Cascade, 30 ft. high. About 3 M. from N. Adams the new road, constructed by the Greylock Park Association, diverges to the right and leads through wood to (5 M.) the summit (easy gradient). About halfway up we have a view into the Hopper (1000 ft. deep). At the top is a view-tower (40 ft. high). The *View from Greylock (3535 ft.) includes Adams, N. Adams, Pittsfield, the valleys of the Hoosac and Housatonic, and most of the Berkshire Hills. Farther off are the Catskills to the S.W., the Green Mts. to the N., Mt. Monadnock and Wachusett to the E., and Mts. Tom and Holyoke to the S.E.

Williamstown (595 ft.; Greylock, with dépendance, the Taconic Inn, $3-4; Idlewild, at S. Williamstown, 5 M. from the rail. station, $2½; Duncan Ho., $2), 5 M. to the W. of N. Adams and 1 M. to the S. of the rail. station (p. 148; omn. 25 c.; electric tramway), lies on the Green River, an affluent of the Hoosac. Pop. (1895) 4887. It is the seat of Williams College (350-400 students), the buildings of which are the chief feature of the village. The most modern is the Mark Hopkins Memorial Hall (1890); the President’s House is a good specimen of Colonial architecture. The old Van Rensselaer Mansion of Albany (comp. p. 171) has been re-erected here as the chapter-house of the Sigma Phi Fraternity. President Garfield, a graduate of the college, is commemorated by a window in the chapel. The streets are prettily laid out, without fences, and are shaded by fine trees.

In Flora’s Glen, 1 M. to the W., Bryant is often, but erroneously, said to have composed his ‘Thanatopsis’, at the age of eighteen. — The *Hopper (see above), a huge gorge enclosed by Mt. Prospect, Bald Mt., and Greylock, is 5 M. to the S. — The top of Greylock is 10 M. distant by the new road (see above). — The Taconic Range rises about 3 M. from Williamstown, and good views are afforded by Mt. Belcher, Mt. Hopkins (Berlin Mt.; 2790 ft.), and other summits. The chief passes over this range are the Petersburg Pass (2075 ft.), the Berlin Pass (2490 ft.), the Kidder Pass (bridle-path), and the Johnson Pass. — The Snow Glen is 7 M. to the N.W., 2 M. to the N. of the Petersburg Pass. — Among the favourite drives are the ‘Short Oblong’ (2 M.) and the ‘Long Oblong’ (10 M.). Longer drives may be taken to Pittsfield (20 M.), Lebanon Springs (20 M.), Hoosick Falls (17 M.), etc.
a. Via Connecticut Valley.

From New York to (136 M.) Springfield, see R. 4a. We here join the Connecticut River Division of the B. & M. R. R., which ascends the beautiful *Valley of the Connecticut, chiefly on the W. bank of the river (views mainly to the right). 140 M. Chicopee (Kendall, Columbian, $2½), an industrial town of (1895) 16,420 inhab.; with cotton-mills, a bronze-foundry, etc. Chicopee Falls, 2 M. to the E., also with cotton-mills, was the home of Edward Bellamy (d. 1898), author of 'Looking Backward' and 'Equality'. Tobacco is grown in this part of the valley. — The train crosses the Chicopee River on leaving Chicopee, and the Connecticut on entering (144 M.) Holyoke (95 ft.; Windsor, Hamilton, $2-3), an industrial city with (1895) 40,322 inhab., possessing the greatest water-power in New England and said to be the chief paper-making place in the world (250 tons daily; value of manufactures in 1890, $24,500,000). The river has a fall of 60 ft. and is bridled by a huge dam, 1000 ft. across. From Holyoke a mountain-railway, opened in 1895, ascends to the top of Mt. Tom (1215 ft.; *View; see also below). — Beyond (149 M.) Smith's Ferry we pass between Mt. Holyoke (see below) on the right and Mt. Tom (see above) on the left. From (151 M.) Mt. Tom a branch-line runs to (3½ M.) Easthampton, a manufacturing town and the seat of Williston Seminary, a leading school in preparing boys for college. — We now pass the famous 'Ox Bow' of the Connecticut, which lies to the left and is no longer the main channel of the river.

153 M. Northampton (125 ft.; Norwood, $2½-3; Hampton House, Mansion Ho., $2½), 'the frontispiece of the book of beauty which Nature opens wide in the valley of the Connecticut', is a lovely elm-shaded city of (1895) 16,746 inhab., on the W. bank of the Connecticut. It is widely known as an educational centre.

The chief of its educational institutions is Smith College, one of the leading colleges for women (1000 students). It possesses an art-gallery, a music-hall, a gymnasium, etc. Other large buildings are Memorial Hall (with the Public Library), the State Lunatic Asylum (1 M. to the S.W.), the new High School (1895), and the Clarke Institution for Mutes. The last stands on Round Hill, which commands a good view of the town. Mr. George W. Cable, the novelist, is one of the instructors at Smith College.

The chief of the numerous delightful excursions from Northampton is that to the top of *Mt. Holyoke (955 ft.; Prospect Ho., at the top, $2½),
2 M. to the S.E. A carriage-road leads to a small mountain-railway which surmounts the last 600 ft. (return-fare $1; toll for walkers 50 c.). The exquisite View from the summit includes the Connecticut Valley, the Hoosac Mts. and Greylock (W. and N.W.), Mt. Tom (S.W.), Springfield and the E. and W. Rocks at New Haven (S.; on an exceptionally clear day), Mt. Wachusett (E.), Amherst (p. 71) and Monadnock (N.E.), and the Green Mts. (N.). — Mt. Nonotuck (850 ft.; Eyrie Ho.), the N. peak of Mt. Tom (p. 156), is easily reached via Mt. Tom station (p. 156; View). — Hadley (Elmwood Ho., $1/4-2), a beautiful New England village, 2½ M. to the N.E. of Northampton, is celebrated for its magnificent Avenue of elms. The regicides Goffe and Whalley lived in concealment at Hadley for 15 years (1664-79). At South Hadley, 4½ M. to the S., and connected with Holyoke by electric tramway, is the Mt. Holyoke College for Girls (400 pupils). — Amherst (p. 71) is 7 M. to the N.E. of Northampton. Both Hadley and Amherst are connected with Northampton by the Mass. Central R. R. (B. & M. system).

Beyond Northampton the train passes near the Great Bend of the Connecticut and then leaves the river. Hadley (see above) is seen to the right. 157 M. Hatfield (150 ft.). From (164 M.) South Deerfield (205 ft.) we may ascend Sugar Loaf Mt. (710 ft.), which rises to the right. Mt. Toby (p. 148) is on the opposite side of the river. A little farther on, to the right, is a monument marking the battlefield of Bloody Brook, where Capt. Lathrop and 80 young men, 'the flower of Essex Co.,' were killed by Indians in 1675. 169 M. Deerfield (220 ft.), a pretty village at the foot of Deerfield Mt. (700 ft.), with (1895) 3007 inhabitants. The building of the Pocumtuck Valley Memorial Association contains a collection of relics. — The train crosses the Deerfield and at (172 M.) Greenfield (see p. 148) intersects the Fitchburg R. R. Beyond (179 M.) Bernardston the Connecticut again comes into sight on the right, and this part of the valley is very picturesque. Tobacco and maize are cultivated. 186 M. South Vernon is the junction of a line to Nashua (p. 129) and of the New London Northern R. R. to New London (p. 71).

196 M. Brattleboro (Brooks Ho., $2 1/4-3; American Ho., $2), a large village with (1890) 5467 inhab., charmingly situated on the W. bank of the Connecticut, is the centre of the maple-sugar industry of Vermont. It was the birthplace of Wm. M. Hunt (1824-79), the painter, and Richard M. Hunt (1828-95), the architect. The Public Library contains 15,000 vols. and some natural history collections. The Estey Organ Works here turn out 20,000 organs yearly. In the Cemetery (view) is an elaborate monument to the notorious Jim Fisk (1835-72). A road ascends to the top of Wantastiquet Mt. (1364 ft.; view), on the opposite side of the river. Mr. Rudyard Kipling's American home lay 3 M. to the N. of Brattleboro. — 220 M. Bellows Falls, see p. 126. — We now cross to the E. bank of the river and leave Vermont for New Hampshire. Beyond (238 M.) Claremont Junction (line to Concord, see p. 129) we cross the deep gorge of the Sugar River by a bridge 105 ft. high. We recross the Connecticut River to (246 M.) Windsor (Windsor Ho., $2), the station for an ascent of *Mt. Ascutney (3320 ft.; Rfmt. Ho., at the top; *View).
260 M. White River Junction (Rail. Restaurant), see p. 130. The shortest route to Montreal diverges to the left here and runs via Montpelier Junction and St. Albans (see R. 15b). Trains for Quebec and Montreal via Sherbrooke continue to follow the Connecticut Valley to Wells River (see below). The next station on the latter route is (265 M.) Norwich, whence omnibuses run to Hanover (The Wheelock, $2-3), 3/4 M. to the S.E., the seat of Dartmouth College (650 students), the alma mater of Daniel Webster, George Ticknor (author of a History of Spanish Literature), G. P. Marsh (the philologist), Rufus Choate, and Chief-Justice Chase. The College Park is pretty, and its Art Gallery contains some interesting portraits.

The train crosses the Ompompanoosuc. 296 M. Newbury, a pretty village in the Ox Bow ‘intervales’ of the Connecticut.

300 M. Wells River (Rail. Restaurant), see p. 133. Route hence to Montreal and Quebec, see R. 15c.

b. Via Albany (or Troy), Saratoga, and Lake Champlain.

384 M. New York Central & Hudson River Railroad to (142 M.) Albany in 3½-4 hrs.; Delaware & Hudson Railroad thence to (242 M.) Montreal in 9-10 hrs. (through-express in 12-13 hrs.; through-fare $10.65, parlor-car $2, sleeper $2; best views to the left as far as Albany, then to the right).

This is the shortest and most direct route from New York to Montreal, Lake George, and Lake Champlain. Those who have not seen the Hudson should go by steamer to Albany (see p. 161); and they may also leave the train for the steamer on Lakes George and Champlain.

From New York to (142 M.) Albany, see R. 21. Beyond Albany we follow the tracks of the Delaware and Hudson Railroad, which traverses a very interesting district, skirting Lake George (p. 200), Lake Champlain (p. 202), and the Adirondack Mts. (p. 183). — The line passes the Rural Cemetery and reaches (148 M.) West Troy, with a large United States Arsenal, situated on the Hudson, opposite Troy (p. 160). — 152 M. Cohoes (Harmony, $2-2½), a prosperous manufacturing city with (1890) 22,509 inhab., situated at the Falls of the Mohawk River (75 ft. high, 900 ft. wide), which the train crosses here by a long bridge (view of falls to the left). — At (154 M.) Waterford Junction the Albany division unites with the main line coming from (6 M.) Troy. — At (159 M.) Mechanicville, where the Fitchburg Railroad joins ours (see p. 149), we turn to the N.W. (left) and quit the Hudson. 165 M. Round Lake (Wentworth, $2½; Windsor, Orient, $2), with a well-known Methodist camp-meeting ground and summer-schools (lake to the right). — 173 M. Ballston Spa (Lincoln, Eagle, Medberry, $2), with mineral springs, now little visited, is the junction of a line to Schenectady (p. 204) and Binghamton (see p. 216).

180 M. Saratoga Springs (Rail. Restaurant), see p. 198.

Beyond Saratoga the train runs to the N.E. and crosses the Hudson at (197 M.) Fort Edward (St. James, Hudson, $2), where,
however, all traces of the fort, built in 1755, have disappeared. Passengers for the Lake George steamer diverge here (see below).

**From Fort Edward to Caldwell, 15 M., railway in 3/4-hr. The railway ascends the Hudson, which here makes numerous falls. — 5 M. Glens Falls (300 ft.; Rockwell Ho., 21/2; American Ho., The Van Cott, 3), an industrial city with (1890) 9509 inhab., where the Hudson forms a picturesque *Fall of 50-60 ft. The island below the fall is the scene of some well-known incidents in Cooper's *Last of the Mohicans*. — Beyond Glens Falls the train passes Glen Lake (r.), reaches a height of 575 ft., and then descends rapidly through a wooded defile, affording fine views of lake and mountain. To the left, 2 M. from Caldwell, is the Williams Rock, a boulder marking the spot where Col. Ephraim Williams (founder of Williams College, p. 155) was killed and his 1200 men were defeated by the French and Indian army of Dieskau, which was in turn defeated, also with the loss of its commander, by Sir William Johnson (Sept. 8th, 1755). Hard by, just to the left of the railway, is the Bloody Pond, into which the dead bodies were thrown. — 15 M. Caldwell (400 ft.), see p. 201.

Beyond Fort Edward our train leaves the Hudson and descends the valley of Wood Creek. 209 M. Fort Ann, the site of a fort of 1757, near which Gen. Putnam was defeated and captured by the French and Indians in 1750. — 219 M. Whitehall (Hall Ho., $2), the junction of a line to Rutland (p. 126), is a lumbering village of (1890) 4434 inhab., situated at the foot of Skene Mt. (525 ft.) and at the S. extremity of Lake Champlain (p. 202).

The train crosses the South Bay and follows the W. bank of Lake Champlain, which is at first more like a river than a lake. — 241 M. Fort Ticonderoga (see p. 203), at the foot of Mt. Defiance (870 ft.), is the junction of a line to (5 M.) Baldwin, on Lake George (see p. 202), and the starting-point of the steamer on Lake Champlain to Plattsburg, etc. (see p. 203). — The train threads a tunnel.

243 M. Addison Junction, for a line to Leicester and Rutland (p. 126); 251 M. Crown Point (p. 203); 259 M. Port Henry (p. 203). The Adirondack Mts. now rise prominently to the left. From (270 M.) Westport (p. 188) coaches run to Elizabethtown, Keene Valley, and Lake Placid (see p. 189). The train passes behind Split Rock Mt. (1035 ft.; right) and emerges on the wider part of Lake Champlain (views). The rocks to the left rise precipitously. — 284 M. Willoughby. — 296 M. Port Kent (p. 204), the junction of a line to (3 M.) Ausable Chasm (p. 187) and Keeseville. — 306 M. Hotel Champlain and Bluff Point (see p. 204).

309 M. Plattsburg (100 ft.; Fouquet Ho., 21/2-1; Witherill, Cumberland, 2-3; *Rail. Restaurant, meals 75 c.), a small town with 7010 inhab., is pleasantly situated on the W. shore of Lake Champlain (comp. p. 204), at the mouth of the Saranac River. It is a convenient starting-point for excursions on the lake, and it is the junction of branch-railways to Ausable and Saranac Lake (p. 186). It is 10 hrs. from New York by express-train. The U. S. Military Post at Plattsburg consists of 12 companies and is one of the largest and most important in the country (dress parades, guard-mounts, etc.). About 2 M. to the S., adjoining the grounds of the Hotel.
Champlain (p. 204), is Cliff Haven, the headquarters of the Roman Catholic Summer School of America, corresponding in organisation and importance to the Protestant gathering at Chautauqua (p. 307). The attendance is very large. The reading circles of several states have small hotels or club-houses of their own.

From Plattsburg to Ausable Forks, 20 M., railway in 1½ hr. (fare $1). — The line runs to the S.W. through the valley of the Little Ausable. From (23 M.) Ausable Forks coaches run to Wilmington ($1) and Lake Placid ($2 1/2).

Our line now leaves Lake Champlain and traverses a somewhat monotonous district. 319 M. West Chazy (Adirondack Inn, $2) is the junction of an alternative route to Montreal. — 334 M. Rouse’s Point (Windsor, $2 1/2-3), at the N. end of Lake Champlain, is the frontier-station. We then descend along the left bank of the Richelieu to (357 M.) St. John’s (p. 128). Hence to — 384 M. Montreal, see Baedeker’s Canada.

c. Via Troy, Rutland, and Burlington.

400 M. New York Central & Hudson River Railroad to (148 M.) Troy in 4-5 hrs.; Fitchburg R. R. thence to (30 M.) White Creek, in 1 1/2 hr.; Bennington & Rutland R. R. thence to (51 M.) Rutland in 1½-2 hrs.; Rutland Railroad thence to (67 M.) Burlington in 2-2 1/2 hrs.; Central Vermont R. R. thence to (101 M.) Montreal in 3½-4 hrs. (through-train in 13-14 hrs.; fares as above). — This line is the direct route from New York to Burlington (p. 127) and the Green Mts. (p. 130).

From New York to (142 M.) Rensselaer, see R. 21b.

148 M. Troy (Troy Ho., from $3; Fifth Avenue, $2 1/2-3; Mansion Ho., $2-2 1/2; Windsor, R. from $1), a busy industrial city of (1890) 60,956 inhab., at the head of the steam-navigation of the Hudson. Its chief products are iron, Bessemer steel, railway rolling-stock, cotton and woollen goods, collars, and shirts. The Rensselaer Polytechnic Institute is a celebrated engineering school. The Music Hall, Post Office, and Court House are among the most prominent buildings. The fine new Public Library contains a statue of Miss Emma Willard (1787-1870). The Soldiers’ & Sailors’ Monument is in Washington Square. Troy is famous for its laundries.

Troy is an important railway-centre, lines diverging in all directions (New York; Burlington and Montreal; Boston via the Hoosac Tunnel, etc.). The main line of the Del. & Hudson R. R. begins here and unites with the Albany division at Waterford Junction (p. 188).

Our train turns to the right (N.E.) and runs over the Fitchburg R. R. to (178 M.) White Creek. We then run towards the N., with the Green Mts. at some distance to the right. 180 M. N. Bennington, 201 M. Manchester (690 ft.; Equinox Ho, $4), a summer-resort at the base of Mt. Equinox (3816 ft.), the View from which includes the Catskills, the Berkshire Hills, Lake George, and Lake Champlain.

232 M. Rutland (Rail. Restaurant), and thence to — 400 M. Montreal, see R. 15a.
21. From New York to Albany.

a. By Steamer.

144 M. The finely-equipped steamers of the Hudson River Line ('Albany Day Line') leave New York every morning (except Sun.) in summer (May 26th to Oct. 15th) from Desbrosses St. Pier at 8.40 a.m. and 22nd St. (N. R.) at 9 a.m., and reach Albany about 6 p.m., calling at seven intermediate points (fare $2, return-fare $3 1/2). The largest steamer of this line (the 'New York') is 341 ft. long and has a speed of 22 M. an hour. Passengers by this line may see the most picturesque part of the Hudson in one day, returning from West Point, Newburg, or Poughkeepsie by the sister boat, which reaches New York at 5.30 p.m. No freight is carried by the Day Line. — The People's Line Steamers leave Pier 47 (foot of Canal St.) every week-day at 6 p.m., reaching Albany at 6 a.m. next day and making no intermediate stops (fare $1 1/2, return $2 1/2, berth 50 c.). — The Citizen's Line Steamers leave Pier 46 daily, except Sat., at 6 p.m. and reach Troy about 6 a.m., calling at Albany on Sun. only (fare $1 1/2, return $2 1/2, berth 50 c.). — The 'Mary Powell' plies every afternoon from the foot of Desbrosses St. to (95 M.) Roundout and Kingston (5 1/2 hrs.; fare $1, return-fare $1 1/2).

Those who wish to see the beauties of the Hudson should, of course, select the 'Day Line'; but the night-boats afford a comfortable and easy mode of travel. Good restaurants on board all the steamers (meals à la carte). Through railway-tickets to Albany by the N. Y. C. R. R. or the West Shore R. R. are available on the Day Line steamer, and vice versa.

The Hudson River rises in the Adirondack Mts., 4000 ft. above the sea (comp. p. 183), and flows into the Atlantic Ocean at New York after a nearly due S. course of 300 M. Its chief tributary is the Mohawk, which joins it on the W., a little above Troy. The mountains of the Hudson are part of the Appalachian system, the Highlands (see p. 163) being a continuation of the Blue Ridge. The Hudson has sometimes been called the 'American Rhine', but this title perhaps does injustice to both rivers. The spacious and stately characteristics of the Hudson, from the Palisades to the Catskills, are as epic as the loveliness of the Rhine is lyrical. The Hudson implies a continent beyond. For vineyards it has forests. For a belt of water, a majestic stream. For graceful and grain-goldened heights, it has imposing mountains. There is no littleness about the Hudson. . . . No European river is so lordly in its bearing, none flows in such state to the sea. Of all our rivers that I know, the Hudson, with this grandeur, has the most exquisite episodes. Its morning and evening reaches are like the lakes of a dream' (G. W. Curtis). The E. bank, for many miles above New York, is sprinkled with handsome country-houses. The effect of the tide is perceptible as far as Troy, and the river is navigable for.
large steamers for 150 M. Sailing-vessels and yachts are abundant in the lower part of its course, while numerous 'tows' of coal-barges, grain-barges, and lumber-rafts are also encountered. Beyond the influence of salt water the Hudson freezes solid in winter, affording an ample harvest to the ice-cutter and a magnificent field for the exciting sport of ice-boat sailing. Its name is derived from Henry Hudson, a British navigator in the Dutch service, who in 1609 ascended the river in the 'Half Moon' as far as Albany, in search of a water-passage across the Continent. According to Ruttenber ('Indian Tribes of the Hudson River') the E. bank of the Hudson and part of the W. bank were occupied by the Mohicans, while the W. bank below the Catskills belonged to the Leni Lenapes (Delawares) and above Cohoes to the Mohawks (Iroquois). The first steamboat that plied regularly for passengers was the 'Clermont' of Robert Fulton, which ran between New York and Albany in 1807.

The Photo-Panorama of the Hudson, published by the Bryant Literary Union (Evening Post Building, New York; price 31), shows both sides of the river from Albany to New York, 'accurately represented from 800 consecutive photographs'.

In the following description the terms right (R., r.) and left (L., l.) are used with reference to persons ascending the river.

As the steamer starts from its dock, we enjoy a good view of New York Harbour to the S. On the right lies Manhattan Island, with the city of New York, while to the left, in the State of New Jersey, are Jersey City (p. 56), Hoboken (p. 56), and Weehawken (p. 56). Among the most conspicuous points to the right are the huge office-buildings in Broadway and Park Row (pp. 27-30), the dome of the 'World' Office (p. 30), the Post Office (p. 29), the Dakota Flats (p. 43), St. Luke's Hospital (p. 51), Riverside Park (p. 52), General Grant's Tomb (p. 52), Columbia University (p. 52), and the Convent of the Sacred Heart (p. 53). To the left are Stevens Castle (p. 56), the Elysian Fields (p. 56), Union Hill Observatory, St. Michael's Observatory, the West Shore Railroad Station (p. 6), the Guttenberg Brewery (p. 56), and Pleasant Valley. Near the end of Manhattan Island, 10-11 M. from the Battery, we pass between Fort Lee (p. 56), with its hotel, on the left, and the site of Fort Washington, captured by the British on Nov. 15th, 1776, on the right. At Fort Lee begin the *Palisades, an extraordinary ridge of columnar basaltic rocks, not unlike the Giant's Causeway, rising almost vertically to a height of 200-500 ft. and extending along the W. bank of the Hudson for about 15 M. The width of the mountains of which they form the E. escarpment is 1/2-1 1/2 M., and the W. slope is quite gentle. The beauty of the Palisades has, of late, been somewhat marred by quarrying and blasting operations. — To the right (13 M.) is Spuyten Duyvil Creek (p. 166).

161/2 M. (r.) Mt. St. Vincent Convent, the buildings of which include Fonthill, formerly the home of Edwin Forrest, the actor. It is the American headquarters of the Sisters of Charity.

17 M. (r.) Yonkers (p. 166), with the old Phillipse Manor House. 21 M. (r.) Hastings (p. 166). Opposite is Indian Head (*View), the highest point of the Palisades. About 1/2 M. farther on (l.) is the boundary between New Jersey and New York, both banks henceforth belonging to the latter. — 23 M. (r.) Dobbs Ferry (p. 166).
24 M. (r.) Irvington (p. 166). Sunnyside, Irving's house, $\frac{3}{4}$ M. above, can scarcely be distinguished from the steamer. Opposite (1.) lies Piermont, with the long pier of the Erie Railroad. About 2 M. to the S.W. of Piermont is the old village of Tappan, where André was executed (Oct. 2nd, 1780). — The Palisades here lose their wall-like character, and the Hudson expands into the lake-like expanse of the Tappan Zee, 10 M. long and 3-4 M. wide.

25 M. (r.) Lyndhurst (see p. 166), the residence of the late Mr. Jay Gould (d. 1892), loftily situated, with a tall tower.

27 M. (r.) Tarrytown (p. 166), whence a steam-ferry plies across the Tappan Zee to (3 M.) Nyack (Prospect Ho., Tappan Zee Ho., $\$ 4$; *St. George Hotel, with restaurant, near the landing, $\$21/2$), a brisk little village, the terminus of the Northern Railroad of New Jersey. The Dutch Church in Sleepy Hollow (p. 166), about $\frac{3}{4}$ M. above Tarrytown, is hardly distinguishable.

30-32 M. (1.) S. Hook Mt. (750 ft.) and N. Hook Mt. (610 ft.). Rockland lies just beyond the latter.

32 M. (r.) Sing Sing (p. 166), with the low white-marble prison at the water's edge.

33 M. (r.) Estuary of Croton River and Croton Point (p.167). Here, off Teller's Point, the extremity of the peninsula, the 'Vulture' anchored when she brought André to visit Arnold (see below).

The steamer now enters Haverstraw Bay, which is 4 M. wide.

37 M. (1.) Haverstraw (p. 168), at the N. base of High Torn (820 ft.). The Highlands (see below) are visible in the distance.

40 M. (1.) Stony Point, at the N. end of Haverstraw Bay, now marked by a lighthouse, was the site of a fort taken by the British on June 1st, 1779, and re-captured at the point of the bayonet by Gen. Wayne (p. 255) six weeks later. The river here is only $\frac{1}{2}$ M. wide, and on the E. bank is Verplanck's Point, the site of Fort Lafayette. — 41 M. (1.) Tompkin's Cove, with limestone quarries. — 43 M. (1.) Kidd's Point or Caldwell's Landing; r. Peekskill.

The river makes an abrupt bend to the left here, and the Dutch mariner Jan Peek is said to have followed the Peekskill (r.) under the idea that it was the Hudson, until his ship ran aground. Above Caldwell's Landing rises the Dunderberg (865 ft.), and to the N. of Peekskill is Manito Mt., with the camp of the New York State National Guard. — We here pass through the S. gate of the *Highlands, the beautiful hill-girt section of the river extending from this point to near Newburgh (p. 164).

46 M. (r.) Anthony's Nose (900 ft.), a lofty summit, deriving its name, according to Diedrich Knickerbocker's familiar and humorous account, from the 'refulgent nose' of the Dutch trumpeter, Anthony van Corlear. Nearly opposite are Iona Island, Bear Hill (1350 ft.), and the sites of Forts Clinton and Montgomery.

50 M. (r.) Sugar-Loaf Mt. (765 ft.), near the S. base of which lay Beverly House, Arnold's headquarters, where he received the
news of André’s capture and whence he made his escape to the ‘Vulture’. Opposite are the Buttermilk Falls, 100 ft. high (insignificant except after heavy rain), on the bluff above which is the large and finely situated Cranston’s Hotel (p. 168).

52 M. (l.) West Point (p. 168), the site of the well-known Military Academy, of which the domed library and other buildings are visible. The Battle Monument (p. 169) is conspicuous. To the N. is the West Point Hotel (p. 168), and above the ‘Post’ rises Fort Putnam (596 ft.). Steam-ferry to Garrison’s (p. 167).

Passing West Point, the steamer turns sharply to the left. To the right, on the point known as Constitution Island, was long the home of Miss Warner (1818-85; buried in West Point Cemetery), author of the ‘Wide, Wide World’.

541/2 M. (l.) Crow Nest (1405 ft.), immortalized in J. R. Drake’s ‘Culprit Fay’. — r. Cold Spring (p. 167), at the foot of Mt. Taurus or Bull Hill (1425 ft.).

56 M. (l.) *Storm King or Butter Mt. (1530 ft.), with Cornwall (p. 169) at its N. base. — r. Breakneck Mt. (1635 ft.). Between these hills is the N. Gate of the Highlands, issuing from which we pass the little Potopel’s Island (r.). The mountains now trend to the N.E.

61 M. (l.) Newburgh (see p. 169). Washington’s Headquarters (see p. 169), a one-storied stone building, with a timber roof, surrounded by trees and distinguished by a flag-staff, are seen just below the town. On the opposite bank lies Fishkill (p. 167; steam-ferry).

67 M. (l.) Duyvil’s Dans Kammer, a low flat rock on a promontory.

70 M. (l.) Marlborough, with fine Arbor Vitae trees.

The *Poughkeepsie Railway Bridge, which here spans the Hudson, constructed on the cantilever principle, is 2260 yds. long (11 1/4 M.) and 200 ft. above high-water.

77 M. (r.) Hudson River State Hospital for the Insane. Numerous handsome residences are passed on the right, and large ice-houses on the left. It is estimated that the ice-industry of the Hudson represents a capital of $5,000,000 (1,000,000$l.) and gives employment in winter to 15,000 men. Many of the estates on both banks are still in the hands of the ‘Knickerbocker’ families to which they were originally granted.

82 M. (r.) Hyde Park (p. 167). Just above is the residence of F. W. Vanderbilt, almost opposite which (l.) is the home of John Burroughs, the author.

87 M. (r.) Dinsmore Point, with the house of the late Wm. B. Dinsmore, long president of the Adams Express Co., which began
in 1840 with two men, a boy, and a wheel-barrow, and now has 8000
men and 2000 waggons and carries parcels over 25,000 M. of railway.
91 M. (1.) **Kingston** and **Rondout** (see p. 169), at the mouth
of the **Delaware and Hudson Canal** (p. 170). Opposite lies **Rhine-
cliff Landing** (p. 167; ferry 13 c.).
99 M. (r.) **North Bay** (above **Cruger's Island**), where Fulton
built the 'Clermont' (p. 162), with the aid of Chancellor Livingston,
who was a member of the influential New York family of that name.
100 M. (r.) **Tivoli**, whence a ferry runs to —
102 M. (1.) **Saugerties** (p. 170), with a lighthouse.
The **Catskill Mts.** (R. 24) now bound the view on the left.
**Overlook Mt.** (3150 ft.), with its hotel, rises nearly opposite Tivoli,
and next to it is **Plattekill** (3130 ft.), above Saugerties.
103 M. (r.) **Clermont**, the original seat of the Livingston family,
descended from the Earls of Linlithgow (comp. above). Nearly oppo-
site is **Maiden**, above which rises **Kaaterskill Mt.**, with the **Kaaterskill Hotel**
and the **Catskill Mt. House** (p. 178).
108 M. (r.) **Germantown Station**. Just beyond this point we
have the best view, to the left, of the supine figure of the 'Man in
the Mountain', whose knee, breast, and face (from S. to N.) are
formed by different peaks of the Catskills. **Round Top** (3470 ft.),
one of the highest of the Catskills, rises to the N. of the man's head.
115 M. (1.) **Catskill** (p. 177), at the mouth of the **Kaaterskill Creek**. This was the highest point reached by the 'Half-Moon'
(p. 162), but Hudson sent small boats up as far as **Waterford**
(p. 158), 4 M. above Troy. Numerous large **Ice Houses** to the left.
120 M. (r.) **Hudson** (p. 167). Steam-ferry to **Athens** (1.). The
scenery is now less attractive. — 127 M. (1.) **Coxsackie** (ferry). —
125 M. (r.) **Stuyvesant**. Numerous flat islands are passed. — 136 M.
(r.) **Schodack.** — 1. **Coeymans** (pron. Queemans), behind which rise
the **Helderberg Mts.** (p. 175). — 141 M. (r.) **Castleton.** Extensive
dyes have been made from this point onwards to improve the channel.
148 M. (r.) **Van Rensselaer Place or Fort Crano** (1642), the house
in which a surgeon of the British army composed 'Yankee Doodle'
in 1757.
150 M. (1.) **Albany** (see p. 170), with the **Capitol** towering
above the other buildings, is connected by three bridges with **Rens-
selaer** (pp. 167, 168).
156 M. (r.) **Troy**, see p. 160.

143 M. **New York Central and Hudson River Railroad** in 23/4-13/4 hrs.
(fare $3.10; parlor-car $4). This line affords good views of the W. bank
of the Hudson (sea to the left).

**New York**, see p. 6. The train leaves the Grand Central Depot,
traverses the Park Avenue tunnel (comp. p. 40), passes 125th Street
Station, and crosses the **Harlem River** by a huge four-track swing-
bridge of steel, completed in 1896. Among the buildings seen to
the left are Grant's Tomb (p. 52), St. Luke's Hospital (p. 51),
and Columbia University (p. 52). The line turns to the W. (left)
beyond (5 M.) 138th Street, and skirts the Harlem to High Bridge
(p. 54) and (11 M.) Spuyten Duyvil, on Spuyten Duyvil Creek (p. 22),
so named, says the legend, from the Dutch trumpeter Anthony van
Corlear, who 'sware most valorously that he would swim across it
in spite of the Devil (en spyt den duyvil)', but 'sank for ever to
the bottom' (see W. Irving's 'Knickerbocker History of New York').
The creek formed the S. boundary of the 'Neutral Ground' in the
Revolutionary War. — Spuyten Duyvil lies on the E. bank of the
Hudson, which we now follow closely, obtaining good views of the
Palisades (p. 162), on the opposite side. The line passes several
of the riverine suburbs of New York, but runs at too low a level to
afford views of them (comp., however, R. 21c). 14 M. Mount St.
Vincent, with a large convent (p. 162). — 16 M. Yonkers (Getty Ho.;
Wynnstay), a thriving town, with (1890) 33,033 inhab. and the
residences of many New Yorkers. It occupies the land of the
Philipse estate (comp. p. 162), and the manor-house (1682), in front of
which is a Soldiers' Monument, is now the city-hall. — 20 M. Hasting.
— 21 M. Dobbs Ferry (Bellevue), a picturesque suburban
city-hall. — 23 M. Irvington, on the bank of the Tappan Zee, with 'Sunnyside', the home of Washington Irving, the E. end of which is covered with ivy, grown from a slip
given to Irving at Abbotsford by Sir Walter Scott. The house has
lately been enlarged. The Paulding Manor (Lyndehurst; see p. 163)
is a fine old building. Nevis is a stately mansion built in 1836 by a
son of Alex. Hamilton and named in honour of his father's birth-
place. — 26 M. Tarrytown (Franklin Ho., $2-3; Mott Ho., $21/2),
on a hill rising from the river.

This was the scene of Major André's capture in 1780 (spot marked
by a monument) and is the centre of a district rich in reminiscences of
the Revolutionary War. It is, perhaps, still better known from its connection with Washington Irving (1783-1859), who was churchwarden of
Christ Church here (restored in 1897) and is buried in the graveyard of the
old Dutch Church, 3/4 M. to the N., built in 1699 with bricks brought from
Holland. The latter church lies in 'Sleepy Hollow', which is traversed by the
Pocantico or Mill Brook, with the bridge across which 'Ichabod Crane'
rushed helter-skelter from the pursuit of the 'Headless Horseman'. The
'Castle', a huge stone building with four towers, is now a girls' school.
Among the most beautiful estates near Tarrytown is Rockwood Hall, the
seat of Mr. Wm. Rockefeller. Opposite Tarrytown lies Nyack (p. 163).

31 M. Sing Sing (American Hotel, Phoenix, $21/2), a prettily
situated town with (1890) 9352 inhab., is the seat of the State Pri-
son, the large buildings of which are seen to the left. The Croton

† According to another version of the story, the ivy was brought from
Melrose Abbey.
Aqueduct (p. 54) here crosses a ravine by a stone arch, 70 ft. high and 88 ft. in span. — The train then crosses the mouth of the Croton River (6 M. up which is the Croton Reservoir, p. 54) and intersects Croton Point. Across the Hudson, which is here at its widest (Haverstraw Bay, 4 M.), is the village of Haverstraw (p. 163). Further on the train is frequently carried across creeks and bays on low trestle-work. — 42 M. Peekskill (Eagle, $2–3), a pretty little town with (1890) 9676 inhab., on Peek’s Kill, opposite the Dunderberg (p. 163; ferry to Caldwell’s Landing). The train penetrates Anthony’s Nose (p. 163) by a tunnel 70 yds. long, passes (47 M.) Highlands Station (view of the hills across the Hudson), and reaches (50 M.) Garrison’s (Highland Ho., loftily situated, $2 1/2–3), opposite West Point (p. 168; ferry 15 c.). 53 M. Cold Spring (ferry to Cornwall-on-the-Hudson, p. 169); 56 M. Storm King, opposite the hill of that name (p. 164); 58 M. Dutchess Junction.

59 M. Fishkill Landing, the W. terminus of the Highland Division of the N. Y. N. H. & H. R. R. (p. 169), lies at the mouth of the Matteawan Creek, opposite Newburgh (p. 169; ferry 9 c.).

The Newburgh, Dutchess, & Connecticut R. R. runs hence to (38 M.) Millerton, passing (29 M.) Millbrook (500 ft.; Halcyon, from $4; Millbrook Inn, $4), a favourite summer-resort.

74 M. Poughkeepsie (200 ft. above the river; Nelson Ho., $3–3 1/2; Morgan Ho., $2 1/2–3; Rail. Restaurant), a city of (1890) 22,290 inhab., was settled by the Dutch in 1698 and contains some handsome buildings, including a large State Insane Asylum. The name (pron. Poképsy) is a corruption of the Indian Aper-keep-sinck (‘safe harbour’). The Eastman Park is pleasantly laid out.

About 11/2 M. to the E. lies Vassar College (600 students), perhaps the most famous of the American colleges for women, founded and endowed by Matthew Vassar, an Englishman, at a cost of $1,000,000 (200,000l.). Its main building, 500 ft. long, is modelled after the Tuileries. — The fine Cantilever Bridge (see p. 164) was built in 1886-89 to provide direct communication between New England and the coal-fields of Pennsylvania. — Poughkeepsie is the headquarters of ice-boat sailing (comp. p. 162).

80 M. Hyde Park; 84 M. Staatsburg. The river-banks are now much less precipitous. — 89 M. Rhinecliff, terminus of the Philadelphia, Reading, & New England R. R. About 2 M. to the E. lies Rhinebeck (Rhinecliff Hotel, $2). A steam-ferry plies hence to Kingston (p. 169). The Beeckman House, near Rhinecliff, is a good specimen of a Dutch house of the 17th century. — From (99 M.) Tivoli a ferry plies to Saugerties (p. 170). The Catskills (p. 176) are now prominent on the other side of the Hudson. From (111 M.) Catskill Station a steam-ferry runs to the town of Catskill (p. 177), the chief avenue of approach to the Catskill Mt. (R. 24).

115 M. Hudson (Worth Ho., $2 1/2; Waldron Ho., $2), a small city with (1890) 9970 inhab., lies on the slope of Prospect Hill (200 ft.), at the head of ship-navigation (steam-ferry to Athens, p. 170). The Kinderhook & Hudson Railway runs hence through a pleasant country to (18 M.) Niverville (p. 148). — 142 M. Rens-
selaer (comp. p. 165). Our train here crosses the Hudson, while trains for Troy and other points to the N. (comp. R. 20c) continue on the E. bank of the river.

143 M. Albany (Rail. Restaurant), see p. 170.

c. Via Railway on the West Bank.

142 M. West Shore Railroad in 4½-5½ hrs. (fare $3.10; sleeper $1.50, parlor-car $1). This line affords better views than that on the E. bank, but starts from Weehawken (p. 56; ferry from Franklin St. ½ hr., from 42nd St. ¼ hr.).

The train starts at Weehawken (see p. 56; Rail. Restaurant) and passes through a long tunnel into the valley of the Hackensack, which runs through marshes to the left. As far as Nyack our line runs parallel with the Northern New Jersey Railroad (to the right). All view of the Hudson is at first cut off by the Palisades (p. 162).

11 M. West Englewood; 20 M. Tappan (p. 163); 25 M. West Nyack, 1¼ M. to the W. of Nyack (p. 163). At (27 M.) Valley Cottage the S. Hook Mt. (p. 163) rises to the right. 29½ M. Conger's is the station for Rockland Lake (150 ft.), 1 M. to the S.E., an important source of New York's ice-supply. The train now threads a tunnel and emerges on Haverstraw Bay (p. 163; *View of the Hudson). To the left is High Torn (p. 163). 33 M. Haverstraw, with extensive brick-fields. The line now hugs the river. 42 M. Iona Island (p. 163); 44 M. Fort Montgomery (p. 163). From (40 M.) Jones Point a spiral railway (views) is to ascend to the top of the Dunderberg (p. 163; pleasure grounds). 47½ M. Cranston's, a large summer-hotel ($4-5), 250 ft. above the river (*View).

48½ M. West Point (West Point Hotel, adjoining the Parade Ground, $3½-4), the seat of the well-known Military Academy for training officers for the U.S. army, is finely situated on the W. bank of the Hudson, overlooking the Highlands (p. 163). The railway station is on the level of the river, but the parade-ground and the principal buildings of the 'Post' occupy a plateau about 150 ft. above. West Point was first fortified in 1778, and this 'Gibraltar of the Hudson' was an important point in the Revolutionary War, though no actual fighting took place here. Arnold was commander of the post at the time of his treason. Washington recommended the site for a military academy, but it was not till 1802 that it was established.

The West Point Military Academy usually contains about 300 cadets, who are nominated, between the ages of 17 and 22, by Members of Congress and appointed by the President. The discipline is essentially military, and the course of instruction (4 years) is very thorough. The instructors are officers of the army. The cadets go into camp in July and Aug., but the most interesting drills are held in April, May, Sept., and Oct.; dress-parades are held all the year round, weather permitting.

Visitors will find an introduction convenient, but can see most of the points of interest without one.

Ascending from the landing by a good road cut in the cliffs, we pass, on the right, the Riding School (visitors admitted to the galleries). The horsemanship of the senior cadets is wonderfully good, and no one should neglect an opportunity to see their exercises. On the higher ground immediately to the W. of the Riding School is the Headquarters Building, and farther on we reach in succession the Library (with a dome), the
to Albany.  NEWBURGH.  21. Route. 169

Chapel (allegorical painting by Weir; captured flags), the Academic Building (by R. M. Hunt), the Cadet Barracks, and the Gymnasium. To the S. of the Academic Building is the Cadet Mess Hall, with portraits of Grant, Sherman, Sheridan, and other officers.

All military exercises take place on the fine Parade Ground, 40 acres in area. The tall Battle Monument (78 ft. high), near the flag staff, was erected in 1894; it consists of a column surmounted by a Victory by Macmonnies. In the N.W. corner is a statue of Gen. Sedgwick, in the S.E. corner one of Col. Thayer. To the N.E., in an angle of Fort Clinton, is a monument to Kosciuszko. Just below the crest of the hill, to the N. of the library, is a monument to Dade’s Command (p. 413). On the E. side of the Parade Ground is the Curtiss Memorial Hall.

The so-called ‘Flirtation Walk’, on the river-side, leads to Kosciuszko’s Garden, a spot frequented by that heroic Pole. The Officers’ Quarters are on the N. side of the Parade Ground; and the Soldiers’ Barracks are on a lower level, below and to the W. of the West Point Hotel.

The views from different parts of the Post are beautiful, but the visitor with a little time to spare should ascend to Old Fort Putnam (996 ft.). We follow the road ascending the hill behind the new Gymnasium and at (3 min.) the cross-roads take the third road to the left (second to the right), which brings us in 10-15 min. to the ruins of the Old Fort. Here we can walk round the ramparts, obtaining a magnificent View in all directions: up and down the Hudson, nearly the whole of the Highlands, Newburg, the buildings of the Post (at our feet), the red-domed observatory on a lower hill to the S., Cranston’s Hotel (p. 165), etc. — A fine road (Views) leads from West Point to (7 M.) Cornell (see below) over the slopes of Crow Nest (p. 164) and Storm King (p. 164), and the energetic visitor may easily ascend one or both of these mountains (Views).

Leaving West Point the train tunnels under the Parade Ground and skirts the bases of Crow Nest (p. 164) and Storm King (p. 164), commanding fine views of the mountains on the other side of the Hudson. 53 M. Cornwall (Elmer Ho., $2 1/2-3), a popular summer resort, with Idlewild, for 15 years the home of N. P. Willis (1807-67).

58 M. Newburgh (*Patatine, $ 3-4; U. S. Hotel, $ 2), a city and coaling port of (1890) 23,087 inhab., finely situated on the W. bank of the Hudson, 130-300 ft. above the water. The chief point of interest here is the old Hasbrouck Mansion, to the S. of the city, which was Washington’s headquarters in 1782-83 and dates in part from 1750 (interesting relics; adm. free; catalogue 25 c.). It was here that Washington was offered the title of king by the officers of the army. In the N.E. corner of the grounds is the so-called Tower of Victory, with a statue of Washington (view).

Newburgh is the junction of a branch of the Erie Railway (running into Pennsylvania) and connects across the Hudson, at Fishkill Landing, with the Highland Division of the N. Y. N. H. & H. R. R. (comp. p. 167).

The line continues to follow the Hudson closely. — 73 M. Highland is the station for the steam-ferry to Poughkeepsie (p. 167).

89 M. Kingston (Rail. Restaurant) and Rondout (Mansion Ho., $2-2 1/2), the one on the heights a little back from the river and the other at the mouth of the Rondout Creek, have been united in one city with (1890) 21,581 inhab., cement works, and a trade in coal. The Senate House of Kingston, built in 1676 and the first home of the N. Y. State Legislature, contains an interesting collection of Dutch and other relics. Kingston was burned by the British in 1777.
Kingston is the junction for the Ulster & Delaware R. R., one of the approaches to the Catskill Mts. (see R. 24c), and connects by steam-ferry with Rhinecliff (p. 167). — Rondout is the termination of the Delaware and Hudson Canal, which was constructed in 1825-28 to tap the Pennsylvania coal-fields and runs to (108 M.) Honesdale (p. 251). About 2½ million tons of coal are annually brought over it.

From Kingston to Campbell Hall, 33 M., Walkill Valley R. R. in 1½-2 hr. This line is of importance to the tourist mainly as giving access to Lakes Mohonk and Minnewaska (see below). The station for both of these is (15 M.) New Paltz (Locust Grove Ho., Tamney Ho., § 2), which may also be reached from New York via the N.Y., Ontario, & Western R. and the Erie R. R. (through-fare to Lake Mohonk about $3½, to Minnewaska about $4½). Stages run in connection with the trains from New Paltz to (6 M.) Lake Mohonk (fare $1.25, when not included in the railway ticket, trunk 50 c.) and to (10 M.) Minnewaska (fare $1.50). — *Lake Mohonk (1200 ft.) is a charming little sheet of water, situated near the summit of Sky Top (1700 ft.), one of the Shawangunk Mts., 6 M. to the W. of New Paltz. Fine views are enjoyed in all directions over a scene in which the wild and the gentle are mingled in picturesque variety. On the margin of the lake stands the *Mohonk House, a huge hotel with accommodation for 400 guests ($3-5 a day, $15-30 a week, acc. to season). The mountains are traversed by fine walks and drives, and fishing and bathing are also among the attractions. — About 6 M. to the S. of Lake Mohonk and 10 M. to the S.W. of New Paltz, at an elevation of 1800 ft., is *Lake Minnewaska, on the banks of which are two similar hotels, the Wildmere and the Cliff ($2-3 a day, $11-20 a week). All three hotels belong to the same owner and are managed on a strictly temperance plan. Moreover *visitors are not expected to arrive or depart on the Sabbath. The life generally is much quieter than at most large American summer-hotels. The Mohonk House opens about June 1st and closes about Oct. 20th; the Minnewaska season begins in mid-June and closes about the end of September. — On the crest of the mountains above Lake Mohonk, overlooking the valleys of the Rondout and the Walkill, is the Mountain Rest, a boarding-house for 50 guests ($2 a day, $9-15 a week). — The *Mohonk Conferences, held every autumn, discuss the means of improving the condition of the American Indian.

The train now runs at some little distance from the river. 100 M. Saugerties, at the mouth of the Esopus Creek (rail. stat., 1 M. from the river), near the Plattekill Clove (p. 181).

111 M. Catskill, the junction of the Catskill Mt. Railway and another portal to the Catskill Mts., see p. 177. 115½ M. West Athens; 121 M. Coxsackie. At (129 M.) Ravena the line for Buffalo and the West diverges to the left.

142 M. Albany, see R. 22.

22. Albany.

Hotels. *Ten Eyck (Pl. b; D, 4, 5), at the N.E. corner of State and Chapel Sts., $4, R. from $2; Kenmore (Pl. a; D, 4), N. Pearl St., $3; Stanwix Hall (Pl. c; D, 5), Broadway, near the railway-station, from $2½, R. from $1; Globe, State St., $2-2½; Keeler's, Broadway, for men only, R. from 75 c.; Mansion Ho., 357 Broadway, $2. — Railway Restaurant.

Tramways (chiefly electric; fare 5 c.) run through the main streets and to Waterlilt (p. 174), Cohoes (p. 158), Troy (p. 160), West Albany, and Rensselaer.

Steamers ply to New York (see R. 21a), Newburg (p. 164), New Baltimore, and Troy (p. 160), and Steam Ferry Boats run to Rensselaer (p. 167) and Bath.

Cabs. For each pers., 1 M. 50 c., 2 M. 75 c., 3 M. $1.

Theatres. Empire, State St., above S. Pearl St.; Leland Opera House, S. Pearl St. (Pl. C, 5); Harmanus Bleecker Hall, see p. 174.

Post Office (Pl. D, 5), Broadway, corner of State St.
Albany, the capital of the State of New York, is a thriving commercial city with (1890) 94,923 inhab., finely situated on terraced hills rising from the W. bank of the Hudson, at its confluence with the Erie and Champlain Canals. It is well built on the whole, with many really handsome buildings, and retains much of the clean, comfortable, and easy-going character of its original Dutch foundation. Brewing and stove-making are its chief industries, and it has a large timber market. Albany is united with the E. bank of the Hudson by a road-bridge and two railway-bridges (comp. p. 165).

Albany was founded by the Dutch in 1609, and was thus, next to Jamestown in Virginia (p. 370), the oldest European settlement in the Thirteen Original States. A stockade was erected here in 1624 and named Fort Orange, but in 1664, when the place passed into the hands of the British, it was re-christened Albany in honour of the future James II. The small town long carried on a lucrative fur-trade with the Indians, but did not contain more than 5000 inhab. at the beginning of the present century. It received a city charter in 1698 and became the State capital in 1795.

In 1629 the 'Patroon' system of Holland was established on the Hudson. The first Patroon was Killian van Rensselaer, of Amsterdam, a director of the Dutch West India Co., who, along with others, received from the States General a grant of land extending along the Hudson for 24 M. from the Mohawk River to Beeren Island, below Albany, and running inland for 24 M. from each bank. The Patroon was practically a feudal lord, with the absolute title to the soil, and his tenants were little more than serfs. The property was created a manor in 1685, and soon after the Van Rensselaer heir bought out the other co-proprietors. The manor was not entailed, but its descent was regulated by the law of primogeniture. The patroonship was inherited through five generations but became obsolete after the Declaration of Independence. The last patroon, Gen. Stephen van Rensselaer, died in 1839. After the Revolution the obligation of paying rent to the Patroon produced the so-called 'Anti-Rent War' which convulsed the State of New York and caused the troops to be called out several times. The rights of the Van Rensselaers were sustained by all the State Courts. Col. Church purchased the rights of the Van Rensselaers in 1853, and most of the tenants have acquired the fee-simple of their lands.

The Erie Canal, which connects Lake Erie at Buffalo with the Hudson at Albany, was constructed in 1817-25 at an original cost of $7,500,000 (1,500,000l.), since increased to $38,000,000 (19,600,000l.), including maintenance, enlargement, feeders, and connections (Champlain Canal, etc.). It is a monument of the foresight of Gov. De Witt Clinton (p. 61), who pushed on the work in spite of all opposition, and gave New York its start as the commercial metropolis of America. The canal is 360 M. long, 7 ft. deep, 56 ft. wide at the bottom, and 70 ft. wide at the surface. It descends 570 ft. by means of 72 locks. It is chiefly used for the conveyance of grain, salt, and timber; and the annual amount of goods carried over it is 3,000,000 tons, valued at $300,000,000 (60,000,000l.). The canal is now being reconstructed, at an immense cost.

Albany has long been an important political centre. In 1754 a provincial congress that met here formed a plan of union that made possible the concerted action of the Colonies a little later; and in more recent times the little knot of Albany politicians has practically determined the nomination and election of several Presidents of the United States. The 'Albany Regency' was the name given by Thurlow Weed to a powerful junta of Democratic politicians here in 1824-37, including Martin van Buren.

Bret Harte was born at Albany in 1839.

The large new Union Railway Station (Pl. D, 4) lies close to Broadway, the chief commercial thoroughfare, running nearly...
parallel with the Hudson. A little to the S., at the corner of State St., stands the Post Office (Pl. D, 5).

*State Street, 150 ft. wide, ascends directly from the river to the (1/4 M.) Capitol (see below), crossing Pearl St. (N. and S.), which runs parallel with Broadway and contains the best shops. To the right, at the corner of James St., is the Mechanics' and Farmers' Bank, with an inscription stating that it occupies the site of the house of Anneke Janse Bogardus (1663), whose heirs made such valiant and long-continued efforts to recover from Trinity Church (p. 28) the old family property in New York. On the same side, just below N. Pearl St., is the New York State National Bank, bearing an inscription to the effect that it is the oldest bank-building continuously used as such in the United States (since 1803).

The chief buildings in N. Pearl Street (Pl. D, 4) are the Albany Savings Bank, the Young Men's Christian Association, and the Kenmore Hotel (W. side). S. Pearl St. ends at (2 1/4 M.) Norman's Kill. — Schuyler St., 3/4 M. from State St., runs to the right from S. Pearl St. to the interesting old *Schuyler Mansion (Pl. C, 6), now a R. C. asylum, built for Gen. Philip Schuyler in 1760-61. Alex. Hamilton was here married to Elizabeth Schuyler in 1780, and a dent in the old staircase is said to have been made by the tomahawk of one of a party of Indians who tried to carry off Gen. Schuyler in 1781. Gen. Burgoyne was entertained here with his staff after his capture at Saratoga. Washington, Franklin, Carroll of Carrollton, etc., were also guests of this house, and Pres. Millard Fillmore was married here.

A little farther up State St., to the right, is the large new Ten Eyck Hotel (p. 170); to the left is the State Museum of Natural History (Pl. C, 4; daily, 9-6), containing zoological, botanical, mineral, and agricultural collections, mainly illustrative of the State of New York. Opposite stands St. Peter's Episcopal Church (Pl. C, 4).

The *Capitol (Pl. C, 4), commandingly situated at the top of State St. hill, with a small park in front of it, is a huge structure in the French Renaissance style, built in the form of a quadrangle, 300 ft. wide and 400 ft. deep, with a central tower (to be 300 ft. high) and Louvres towers at the angles. The central court is 137 ft. long and 92 ft. wide; above the dormer windows are the arms of the Stuyvesant, Schuyler, Livingston, Jay, Clinton, and Tompkins families. The building is one of the largest in the United States and covers an area of three acres (comp. p. 232). It is built of a light-coloured granite, which contrasts pleasantly with the red-tiled roofs. It was begun in 1867, and was completed, with the exception of the tower, in 1898. Its total cost is estimated at $25,000,000. The original design was by Thomas Fuller, but this has been considerably modified in construction. 'If anyone had come up to me and told me in French, old or new, that the new Capitol was "le château de Monseigneur le duc d'Albanie", I could almost have believed him (E. A. Freeman).

The Eastern Approach is the principal one. It extends out from the building for 166 ft., provides for an entrance to the groundfloor through an arcade and to the first floor through a broad portico
reached by 77 steps, and gives dignity to the chief façade of the building.

**Interior** (guidebooks and photographs for sale at stall inside N. entrance; guides obtainable on application at the Superintendent's Office).

The **Ground Floor**, which is occupied by offices and committee-rooms, is connected with the upper floors by elevators and by three handsome staircases. The **Assembly Staircase**, in the N.E. corner, built of freestone, is fine but ill-lighted and somewhat gloomy. The **Senate Staircase**, in the S.E. part of the building, is of warm red sandstone, with round and pointed arches and much fine tracery and decoration. The **Western Staircase**, in the centre of the W. side, is of light-red sandstone, with treads of reddish-brown freestone, and is considered one of the finest staircases in the world. It consists of a double stairway, ascending to the top of the dome (119 ft.), and is profusely adorned with carvings of historic scenes, foliage, and historic and symbolic heads, all shown off to great advantage by the colour and texture of the stone.

The **First Floor** also is mainly occupied by offices. In the S.E. corner is the **Governor's Room** or **Executive Chamber** (60 ft. × 40 ft.), with mahogany wainscoting and ceiling and hangings of Spanish leather. The elaborate coloured marble decorations of the **S. Corridors** are very effective. Near the E. end of the N. side (below the Assembly Chamber) is the **Old Court of Appeals**, now used by the Agricultural Department. It has a fine carved oak ceiling.

The **Second Floor**. The **Assembly Chamber** (in the centre of the N. side), 140 ft. long and 84 ft. wide (including the galleries), was originally covered by the largest groined arch in the world (56 ft. high), supported by four massive columns of marble. The N. and S. walls were decorated with two monumental frescoes by Wm. M. Hunt, but these are now concealed by a wooden ceiling, while the arched roof, having proved unstable, has been removed. Visitors admitted to the galleries when the house is in session.

- The **Court of Appeals**, at the E. end of the S. side, is a fine room (53 ft. long and 55 ft. wide), adorned with red oak, marble, and Mexican onyx. Next to it is the **Senate Chamber**, one of the most sumptuous legislative halls in the world, the elaborate design of which is due to **Mr. H. H. Richardson** (p. xci). It is 100 ft. long, 60 ft. wide, and 50 ft. high (including lobbies and galleries). Among the chief decorative features are the oaken ceiling, the panelling of Mexican onyx and Tennessee marble, the gilded frieze, the open fireplaces, the chandeliers, and the stained-glass windows. The galleries are supported by arches of yellow Siena marble, borne by dark-red granite columns. 'When I say that the arches in the Senate Chamber seemed to me, as far as their general conception goes, worthy to stand at Ragusa, some will understand that I can say no more' (Freeman). — The **Lieut. Governor's Room** is entered from the W. lobby of the Senate Chamber. — The valuable **State Library** (167,000 vols.) occupies a magnificent room extending completely across the W. side of the building.

The **Third or Gallery Floor** (reached by elevator or small staircase). On the N. side are Committee Rooms and entrances to the Galleries of the Assembly Room. On the S. side are Committee Rooms, the entrances to the Senate Galleries, and the **Bureau of Military Statistics** (W. end; open 9-5), with a collection of State flags used in the Civil War, photographs, memorials of Lincoln, and other relics.

To the N.E. of the Capitol Park, at the corner of Eagle St. and Maiden Lane, is the **City Hall** (Pl. C. 4), a striking and beautiful building by **H. H. Richardson** (1881-83), in a free S. French Gothic style, with a fine tower. It is adjoined on the N. by the **State Hall**, containing part of the collections of the Natural History Museum (p. 172). Opposite are the **Academy Park** and the **Albany Academy** (for boys), where Joseph Henry first demonstrated the theory of
the magnetic telegraph by ringing a bell by electricity transmitted through a mile of wire strung round the room.

By following Eagle Street towards the S. we reach the Albany Medical College (good museum) and, at the corner of Madison Ave., the R. C. Cathedral of the Immaculate Conception, a large Gothic building, with spires 210 ft. high. The elaborate interior is lighted by numerous stained-glass windows. A little farther on, below Elm St., is the Governor's Mansion.

— To the S. of this point lies *Beaver Park* (Pl. A, B, 5, 6).

To the W. of the Capitol State St. is continued (street-cars) to (*1/2 M.) *Washington Park* (Pl. A, B, 3, 4), which, though not very large (100 acres), is beautifully laid out (views of Catskills and Helderbergs). It contains a small lake. In Willett St., on the E. side of the park, is the *State Normal College* (Pl. B, 4), an imposing building. — In Lake Avenue, to the E. of Washington Park, is the *Dudley Observatory* (beyond Pl. A, 4), a well-equipped and well-endowed institution, which has done good astronomical work (visitors admitted on previous written application to the Director).

In *Washington Avenue* (Pl. B, C, 3, 4), is the handsome *Harmanus Bleecker Hall*, transformed into a theatre in 1898. Adjoining, at the corner of Lark St., is the *State Armoury* (Pl. B, 3), with its great round arches.

In S. Swan St., a little to the N. of Washington Ave. and only a few minutes' walk from the Capitol, is the new Episcopal *Cathedral of All Saints* (Pl. C, 4), the first regularly organised Protestant cathedral erected in the United States.

In its present condition the building dates from 1884-87; but the towers, the transepts, and the courses above the triforium (at present replaced by a temporary roof) have still to be added. With its noble proportions (length 270 ft.) and tasteful details, it promises to be one of the most beautiful churches in America. Its style is English Gothic. The architect is *Mr. R. W. Gibson*. The six nave windows commemorate six of the oldest Dutch families in Albany, and the rest of the church is largely made up of similar memorials in the shape of pillars, windows, etc.

We may go on from here by electric car (5 c.) to (20 min.) the *Rural Cemetery* and (*1/2 hr.) *Waterlily* (p. 170). Visitors to the *Catherdral Cemetery* have *1/2 M. to walk* (to the left) after leaving the car, when they reach the tasteful lodge of the cemetery to the right and the gate of the St. Agnes R. C. Cemetery to the left. The chief lion of the Rural Cemetery is the figure of the *Angel at the Sepulchre*, by E. D. Palmer, to reach which we turn to the left at the lodge and follow, as nearly as possible, the railing of the St. Agnes Cemetery, until we reach the top of the S. Ridge (*Views). Close by is the tomb of Gen. Schuyler (p. 172) and a little to the N. is that of President Arthur (1830-86).

Among the other buildings of Albany may be mentioned *St. Joseph's Church* (R. C.), at the corner of Ten Broeck St. and Second St.; the Child's Hospital; the Penitentiary (Pl. A, 5); the County Hospital; and the *Alms Houses*.

The old *Vanderheyden Place* (1725), mentioned in 'Bracebridge Hall', stood near 'Elm Tree Corner' (cor. of State St. and Pearl St.), on a site now occupied by the Perry Building; and at the N.E. corner of State and Pearl St. was the quaint *Lydius House*.

Among points of interest within easy reach of Albany, besides the Hudson River places of R. 21, are *Sturteva* (p. 197), the Catskills (p. 176), the Adirondacks (p. 183), *Howe's Cave* (p. 175), *Sharon Springs* (p. 175), *Cooperstown* (p. 175), and *Lake George* (p. 200). *Shakers*, 8 M. to the N.W., was the original Shaker settlement in America (1774) and is the burial-place of Mother Ann Lee (d. 1784).
23. From Albany to Binghamton.

143 M. **Delaware and Hudson Railroad (Susquehanna Division)** in 4 1/2-6 1/4 hrs. (fare $4.25; parlor car 75 c.).

The line ascends towards the W. At (11 M.) Voorheesville (p. 214) we cross the West Shore R. R. To the left are the *Helderberg Mts.*, whence the Helderberg limestone formations are named. At (27 M.) Delanson, where the line from Mechanicsville and Saratoga joins ours, we see to the right the singular trestle-work of the *Dodge Coal Storage Apparatus.*

39 M. *Howe’s Cave* (780 ft.; *Cave House, $2-3*) is the station for one of the most remarkable caverns in America.

*Howe’s Cave*, an old underground water channel, in the Lower Helderberg limestone, is entered from the Cave Hotel (adm. $1, incl. guide and dress; time of visit 3-4 hrs.) and is named from its discoverer Lester Howe (1842). The stalactite and stalagmite formations are often very beautiful, and appropriate names have been given to the chief points of interest, which include the ‘Stygian Lake’, crossed by boat. Visitors are conducted to a point about 3 M. from the entrance, but the cave extends several miles farther.

45 M. Cobleskill (Augustan, $2) is the junction of a branch-line to (13 M.) Sharon Springs and (22 M.) Cherry Valley.

Sharon Springs (Pavilion, finely situated, $3 1/2-4; *Sharon House, Mansion Ho., $2-3; Howland Ho., $2; Fethers, $1 1/2*), charmingly situated in a pretty little wooded valley, 1200 ft. above the sea, has frequented sulphur and chalybeate springs, chiefly used for bathing. Just below the Falls, at the old bridge to the N., the stream forms a pretty waterfall, 60 ft. high. The piazza at the back of the Pavilion Hotel commands an extensive *View over the Mohawk Valley* (p. 205), with the Adirondacks in the background. The view from *Prospect Hill*, 3 1/2 M. to the N.W., on the road to Cherry Valley, is still finer.

22 M. Cherry Valley (1320 ft.), another little summer-resort, with hotels and boarding-houses. In 1778 the inhabitants were all massacred or taken prisoner by the Tories and Indians. A pleasant drive may be taken to (14 M.) Richfield Springs (p. 206; stage).

50 M. Richmondville; 67 M. Schenevus. A little farther on we cross the water-shed between the Mohawk and the Susquehanna. — 75 M. Cooperstown Junction, for a short line to (16 M.) Cooperstown.

Cooperstown (1240 ft.; *Fenimore Ho., $2-3; Park Hotel, $2; Templeton Lodge*, a boarding-house, well spoken of, $2 1/2), a village of 2657 inhab., prettily situated at the lower (S.) end of Otsego Lake, was founded in 1786 by Wm. Cooper, father of J. Fenimore Cooper (1789-1851), the novelist, who lived and died here and immortalized the district in his romances.

*Otsego Lake* (the ‘Glimmerglass’ of Cooper), 9 M. long and 3/4-1 1/2 M. wide, is one of the prettiest of the New York lakes. The *Susquehanna* issues from it at the foot of Lake St.

To reach the site of the old *Cooper Mansion*, where the novelist lived from 1834 to his death in 1851, we descend Main St. and turn to the right at Fair St. (first cross-street beyond the Park Hotel). It is marked by a statue, and the grounds around it have been converted into a park, open to the public. The building opposite the main entrance contains a library and a collection of relics referring to Cooper and Cooperstown. Cooper is buried in the Episcopal graveyard, reached by turning to the left beyond the site of the house.

Two small steamers ply regularly on Otsego Lake, connecting at the N. end with coaches for (7 M.) Richfield Springs (p. 206). The drive or walk round the lake (ca. 20 M.) is a pleasant excursion.
Susquehanna at the foot of Main St., we reach (5 min.) cross-roads, where walkers may ascend the steps to the right through wood. In 13 min. we cross a road and, keeping to the left, reach (3-4 min.) the summer-house on Prospect Rock (4440 ft.), commanding a splendid view of Cooperstown and the lake. Returning to (3-4 min.) the road we crossed, we descend it to (10 min.) the above-mentioned fork. We then continue our route along the lake, the pretty tree-shaded road recalling that along the W. bank of Windermere. 7 min. Cemetery, containing a monument to Fenimore Cooper. About 2-3 min. farther on a path descends to the left to the Pauty Spring. About 1/2 M. beyond the cemetery is a rough path (right) ascending to (10 min.) Natty Bumpo's Cove (view). Point Judith, with Kingfisher's Tower, is 1 M. farther on.

In following the W. shore of the lake we pass many of the places mentioned in Cooper's 'Deer-slayer'. 1/2 M. Hannah's Hill and Musk Rat Cove; 2 1/2 M. Leatherstocking Falls; 3 M. Three Mile or Wild Rose Point, where Hetty Hutter landed. Adjacent is Mohican Glen. From Five-Mile Point (Tunnicliiff Inn, § 2) a road ascends to the top of Mt. Otsego (2800 ft.; inn and view-tower), commanding an extensive view. 6 M. Hutter's Point, near which take place the final scenes of the story. A white buoy in the lake marks the site of 'Hutter's Castle'. The Steamboat Landing is about 2 M. farther on.

Numerous other walks and drives may be made from Cooperstown. It is 13 M. from Cherry Valley and 20 M. from Sharon Springs (p. 175).

82 M. Oneonta (1085 ft.), with railway-workshops and a trade in hops; 99 M. Unadilla (Hotel Bishop, $ 2), a pleasant summer resort. — 119 M. Ninveh, the junction of a branch to Wilkesbarré (p. 251). — 133 M. Sanitaria Springs, with sulphon-phosphate and other mineral springs, has a huge and admirably equipped Hydropathic Establishment ($ 1 1/2-3 per day, from $ 7 a week). — 127 M. Tunnel Station, where we thread a tunnel 1/2 M. long.

143 M. Binghamton ($ 60 ft.), see p. 216.

The chief gateways to the Catskill Mts. are Kingston (p. 169) and Catskill (p. 177), both situated on the W. bank of the Hudson and both reached from New York by Steamer (R. 21a; fares $ 1, $ 41/2), by West Shore Railroad (R. 21c; § 1.76, § 2.18), or N. Y. C. & H. R. Railroad (R. 21b) and ferry (§ 1.76, § 2.33). Through-tickets are issued on these routes to the chief resorts in the mountains (e.g. to Catskill Mt. Ho., § 2.75 to $ 3.93), and prompt connections are made. The Mts. may be approached from the N.W. via Stamford (p. 183).

The 'Catskills', the Indian Onti Ora or 'Mts. of the Sky', are an outlying group of the great Appalachian system, running parallel with the Hudson for about 12-15 M., at a distance of 8-9 M. from its W. bank. They lie mainly in Greene Co., New York, and cover an area of about 500 sq. M. Their name is of Dutch origin and is generally referred to the wild-cats that infested them, though this explanation is doubtful (kill = stream, gorge). Towards the E. their declivity is very abrupt, and as seen from the Hudson they appear like an almost vertical wall 2000-3000 ft. high. On the other sides the slopes are more gradual. Deep ravines, known as 'Coves' (South African Dutch Kloof), are cut into many of the mountains by mountain-torrents. The highest summits are Slide Mt. (4205 ft.; p. 182) and Hunter Mt. (4025 ft.; p. 181). An additional attraction of the Catskills is the part they play in the scant legendary lore of America (comp. p. 177). Their picturesque scenery, cool and healthy atmosphere, and easy accessibility have made them a favourite summer-resort; and numerous good hotels and boarding-houses (mostly open June-Sept.) now sprinkle the entire district (see below). The most frequented of these are the Kaatskill Hotel and the Catskill Mountain House (see pp. 179, 178). A glimpse at
the chief points of interest may be obtained in a day by a round-trip from Catskill to either of the above hotels and thence via Stony Clove and the Kaaterskill Railroad to Tannerville, Phoenicia, and Kingston (or in the reverse direction); but a stay of 1-3 weeks is desirable for a closer acquaintance with the mountains. The Catskill railways generally cease running in winter. Fair trout-fishing is obtained in the mountain-streams. The red sandstone to which the name Catskill has been attached belongs to the latest Devonian formations of America.

a. From Catskill to the Catskill Mountain House and the Hotel Kaaterskill.

Catskill (95 ft.; Prospect Park Hotel, with view of the Hudson, $3-4; Grant House, 1 M. to the W., with view, $3-3½; Summit Hill Ho., Union, Irving Ho., $2-3), a village with 4920 inhab., is finely situated on the W. bank of the Hudson, at the mouth of the Catskill Creek. There are numerous pleasant walks and drives in the vicinity, and boating and fishing may be enjoyed on the two rivers. It is a station of the Hudson steamers (p. 165) and the West Shore R. R. (p. 170).

Catskill is the starting-point of the narrow-gauge Catskill Mountain Railroad, which runs hence to (13 M.) Cairo (35-45 min.) and to (16 M.) Palenville (3½-1 hr.). The railway ascends the Catskill Creek to (8 M.) South Cairo and (10 M.) Cairo Junction, where the Cairo branch (3 M.) diverges to the right.

Cairo (345 ft.; Columbian, $2-3; Winter Clove Ho., $2) is an unpretending little summer-resort, commanding a good view of the Catskills.

Beyond Cairo Junction the train skirts the base of Cairo Round Top Mt. 12 M. Lawrenceville. — 14 M. Mountain House Station, where the road to the (4 M.) Catskill Mt. House (p. 178) begins.

The Road from the Mountain House Station to the Mountain House (4½ M.) ascends very rapidly, and good walkers can accomplish the distance almost as fast as a carriage. After passing through (½ M.) the toll-gate at the foot of the mountain, we turn to the left and ascend to Sleepy Hollow, the scene of Rip van Winkle’s famous adventure, and to (1 M.) the Rip van Winkle House (127½ ft.). A slab of rock is pointed out as the actual spot of his twenty years’ slumber! Farther on the road toils up the ‘Dead Ox Hill’, rounds ‘Cape Horn’, passes the ‘Short Level’, again turns abruptly to the left, climbs ‘Featherbed Hill’, traverses the ‘Long Level’, passes the top of the Otis Elevating Railway (see below), and leads to the W. or rear entrance of the Catskill Mt. Ho. (see p. 178).

15½ M. Otis Junction, the starting-point of the Otis Elevating Railway, which leads directly to Otis Summit in 10 min., ascending 1600 ft. in its length of 11½ M. (fare 75 c.). The top of this railway is only 100 yds. from the Catskill Mt. House (p. 178), with which it is connected by a covered walk. It reduces the time of the journey from Catskill to the Mountain Ho. to 1 hr. (from New York 3½-4 hrs.). Passengers for the Hot. Kaaterskill, the Laurel House, etc., go on by the Kaaterskill branch of the U. & D. R. R. (p. 181).

16 M. Palenville (Stony Brook Ho., $2-3; Maple Grove Ho., Pine Grove Ho., Richmond, Drummond Falls Ho., $2; Palenville Ho., 1 M. from the station, $2), finely situated at the entrance to the Kaaterskill Clove (p. 178), lies 3 M. from the Kaaterskill Hotel.
Palenville is much frequented by artists, and many pleasant walks and drives may be made from it. Coaches run hence to Haines's Falls and Tannersville (p. 181; $1).

Some travellers prefer to drive all the way from Catskill to (12 M.) the Mountain House or the (13 M.) Kaaterskill Hotel.

The *Kaaterskill Clove is a narrow wooded ravine, like the 'Notches' of the White Mts. (pp. 139, 143), enclosed by South Mountain (see below) on the right and High Peak (p. 173) and Round Top (p. 179) on the left. A rough road ascends through the Clove, crossing the creek 1 M. from the station. 1/2 M. Artist's Grotto and La Belle Falls. A little farther on are two landslips. At (1 M.) Profile Rock we cross the creek (profile seen by looking back from the bridge). 1/4 M. Fawn's Leap; 1/4 M. Buttermilk Falls; 1/4 M. Bridge over Lake Creek. Here we may either turn to the right and follow the lateral ravine to (1 M.) the Kaaterskill Falls or take the path up the Clove proper to (1/4 M.) Haines's Falls (p. 181). The road ascends to (1 1/4 M.) the Haines House (p. 181).

The *Road from Palenville to the Hotel Kaaterskill (3 M.; see above; coach-fare $1 1/2, trunk 50 c.) runs from the station to the W. through the village, then turns to the right, and ascends along the N. side of the Kaaterskill Clove (see above). In 1 1/2 M. we cross the so-called Gulf, with the Point of Rocks and Indian Head high above us to the right, and about 1/2 M. farther on we bend back on our course and proceed for some distance to the E., climbing towards (1/2 M.) the head of the Gulf, several hundred feet above the point where we crossed it below. To the left diverges the Ledge Drive (p. 179). In 1/2 M. more we reach the hotel (p. 179).

The Catskill Mountain House (2225 ft.; $3-4 per day, $14-21 per week, acc. to room and season; 400 beds) is magnificently situated on the ridge of South or Pine Orchard Mountain (2500 ft.). The **View from the rocky ledges in front of the hotel is of a unique beauty and interest.

The E. escarpment of the mountain rises so abruptly from the plain, that the effect is almost as if we were leaning out of the car of a balloon or over the battlements of a castle 2000 ft. high. The plain between the mountains and the Hudson, 10 M. off, is spread out at our feet like a low-relief map, with checkerboard squares of fields, patches of woodland, villages, and farm-houses. Catskill is distinctly seen due E., and Athens (p. 165) and Hudson (p. 167) may be made out a little more to the N. The moving trains on the banks of the Hudson are curiously distinct and minute. The E. background is formed by the blue Berkshire Hills (p. 150), over which the shadowy White Mts. (p. 134) are sometimes visible.

Walks. By following the road leading towards North Mt. and North Lake and taking the first path to the right, we soon reach (10 min.) the Artist's Rock, on the E. ledge of N. Mt. (view), beyond which the path ascends some steps and reaches (3 min.) Prospect Rock, which commands a very extensive *View. The ledge-path next leads to (5 min.) Sunset Rock, beyond which it bends to the left to (7 min.) Jacob's Ladder and the Bear's Den (**View). The ledge-path ends at Newman's Ledge (view of Sleepy Hollow, p. 177), 10-12 min. beyond the Bear's Den. — The path to the left at the fork, 5 min. beyond the Bear's Den, ascends towards the crest of North Mountain (3300 ft.), a walk round which takes in all 4-5 hrs. The path crosses the 'Burnt District' to (20 min. from Bear's Den) the cavity called the Cellar. Here we bend towards the left and walk round the crest to (1/2 hr.) the so-called *First Outlook, at the top of the mountain, and (10 min.) the Second Outlook. The trail descending from this point through the trees is sometimes a little difficult to follow; but there is little danger of being lost if the general direction of the hotel be taken at the Outlook and followed by compass. An additional help in case of doubt is the water-pipe leading to the hotel (1 1/2-2 hrs.). It is advisable not to try this walk alone. — By following the path to the left at the entrance to the North Mt. walk, passing the E. end of North Lake, and
Mountains.  HOTEL KAATERSKILL.  24. Route. 179

ascending along the stream, we reach (1/2 hr.) Mary's Glen, with small waterfalls. We may return by crossing the stream above the falls and following a path leading S.W. to (1/4 hr.) the main road, which we reach at the Charcoal Pit, 1/2 M. from the hotel.

The Catskill Mt. House is about 1 M. to the N.E. of the Kaaterskill Hotel (see below), and the excursions made from the latter (see below) can all be made from the former also.

The *Hotel Kaaterskill (2496 ft.; $4-5 per day; $21-25 per week; 1500 beds, including dépendances), the most fashionable resort in the Catskills, is situated on one of the highest points of South Mt. (see p. 178) and commands a view little, if at all, inferior to that from the Mountain House (see p. 178). Immediately to the S.W. rise High Peak (3660 ft.) and Round Top (3470 ft.), thickly clad with timber from top to bottom, and due W. is Hunter Mt. (4025 ft.)

Kaaterskill Station (p. 182) lies about 3/4 M. to the W., at the end of South Lake (p. 182).

Walks. Most of the paths, roads, and points of interest are clearly indicated by sign-posts and arrows painted on the rocks.

1. To the Catskill Mt. House, 1-1/4 M. Different paths, indicated by sign-posts, begin in front (E.) and to the N. of the hotel, and lead via the Fairy Spring, the Mossy Path, the Druid Rocks, the Lemon Squeezer, and the Ledge Path. The last skirts the E. edge of the mountain, affording fine views of the Hudson Valley, the best from the so-called (1/2 M.) Grand View. A short digression may be made to the left to the top of South Mountain (2900 ft.; *View). — A pleasant round may be made by going via the Ledge Path and returning via the Druid Rocks, making a complete circuit of South Mt.

2. Palenville Overlook, 13/4 M. The path leads to the E. from the hotel. The *Overlook (1600 ft.) commands a fine view of Kaaterskill Clove (p. 178).

3. Inspiration Point and Sunset Rock, 1 M. A path beginning at the hotel-stables (to the S. of the hotel) leads through low wood, crossing a road, to (1/2 M.) a point on the Ledge Drive, where stands a sign-post indicating the path to (1/4 M.) Inspiration Point (*View), overlooking Kaaterskill Clove. Thence we follow the path along the brink of the Clove to (1/4 M.) *Sunset Rock (220 ft.), which commands a magnificent view of the Clove and of the tree-clad mass of High Peak (see above). — We may continue this walk to Kaaterskill Falls (see below), either by the paths on the level of the rock or by descending the ladder-steps to the bottom of the Clove. The easiest route to follow is the path to the extreme right ("To Hotel Kaaterskill"), which ascends to (5 min.) the Ledge Drive. We follow this road to the left, and in about 1 M., turning twice to the left, reach the Laurel House and the Falls (see below).

4. Laurel House and Kaaterskill Falls, 1 M. We may either follow the road leading to the S.W. from the front of the Hotel and joining (3/4 M.) the Ledge Drive (see above), or we take a path leading W. from the Annex to (4 min.) an old "logging road", which leads to the left and joins the Ledge Drive near the Laurel House. — The Laurel House (2065 ft.; $2 1/2-4 per day; $15-25 per week) is situated at the head of the Kaaterskill Falls, 300 yds. from the railway-station mentioned at p. 181. — The *Kaaterskill Falls, in an imposing rocky amphitheatre, reached by a flight of steps behind the hotel (adm. 25c.), are 260 ft. in height, in two leaps of 180 ft. and 80 ft. In dry weather the water is dammed up at the head of the falls and turned on for visitors like the Lichtenhain Waterfall in the Saxon Switzerland. A little lower down are the Bastion Falls (40 ft.). — A good view of the Falls is obtained from Prospect Rock, on the S. side of the Clove, reached by a path (1/2 M.) from the Laurel House.

5. To Hottie's Falls, 2 1/2-3 1/2 M. The most direct route is by a forest path from Prospect Rock (see above), which comes out on (1 M.) Featherbed Lane (p. 180), about 1/2 M. from the Falls. This route is a little
difficult to find unaided, but the following is quite distinct. To the Laurel House, as above, 1 M. Hence we follow the road to the W., crossing the railway. On reaching the (1/2 M.) main road we follow it to the left for 1 1/4 M. We then descend to the left by Featherbed Lane to the (1/2 M.) bottom of the Clove, turn to the right, and reach the (1/4 M.) Haines's Falls House (p. 181), where a placard indicates the way to the Falls (p. 181).

Other short walks may be made to (1/2 M.) the Boulder and to the points mentioned in connection with the Mountain House at p. 178.

The ascent of North Mt. (p. 178) takes about 1 hr. — That of High Peak (3660 ft.) takes 1 1/2-2 1/2 hrs. from the Haines's Falls House (p. 181) and is rather toilsome, but the view is very fine.

Longer Excursions, by railway or carriage, may be made to Tannersville and Onteora Park (p. 181; 5-8 M.), Stony Clove (see below), Catskill (p. 177), Sleepy Hollow (p. 177), Overlook Mt. (see below), Flattekill Clove (p. 181), etc.

b. From Kingston (Rondout) to the Hotel Kaaterskill.

49 M. ULSTER AND DELAWARE RAILROAD in 2 1/2-3 hrs. (fare $2.75). This line skirts the S. and W. sides of the Catskills. Through-carriages run by this route from New York and Philadelphia to Tannersville, Haines's Corners, the Laurel House, the Hotel Kaaterskill, and many other points. The Day Line steamers connect directly with the railway at Kingston Point.

The regular terminus of the railway is at Rondout (p. 169), but the track has recently been extended to Kingston Point, the steam-boat landing 2 M. to the E. After leaving Rondout the train stops at (4 M. from Kingston Point) the Union Station in Kingston (p. 169). The line ascends gradually through the beautiful valley of the Esopus. 10 M. Stony Hollow (441 ft.). — 11 M. West Hurley (530 ft.) is the starting-point of the road (coach $1.50) to (9 M.) the top of Overlook Mt. (3150 ft.), near which stands the Overlook Mt. House ($3; 2980 ft.; 300 beds), a favourite resort, the View from which, embracing the Hudson, the Highlands (p. 163), and the Catskills, is considered by some authorities the finest in the district. Mead's Mountain House ($2), about halfway up the mountain (7 M. from the railway), is well spoken of. — Near (20 M.) Shokan (535 ft.) High Point Mt. (3100 ft.) is conspicuous to the left. The train now turns to the N., disclosing, to the left, a fine semicircle of mountains, sending off radiating spurs to a common centre (the two most to the right are Mt. Cornell, 3680 ft., and Mt. Wittenberg, 3775 ft.). Near (23 M.) Boiceville we twice cross the Esopus. — Beyond (26 M.) Mt. Pleasant (700 ft.) the valley contracts; to the left rises Panther Mt. (3825 ft.), Indian Head (3580 ft.) and other high mountains are seen to the right.

29 M. Phoenicia (800 ft.; Tremper House, $3-4; Martin, $2), the junction of the Stony Clove Railroad (see below), is pleasantly situated and a good centre for excursions (to the top of Mt. Wittenberg, Stony Clove, Woodland Valley, Big Indian Valley, etc.). — We now leave the main line and ascend by the Stony Clove branch (views to the left) through Stony Clove, a beautiful wooded ravine between Mt. Sheridan (2490 ft.) and Hunter Mt. (4025 ft.) on the left and Mt. Tremper (3840 ft.) and Stony Mt. (3855 ft.) on the
Mountains.  

TANNERSVILLE.  

24. Route. 181

right. — 31 M. Chichester, with a chair factory; 34 M. Lanesville, with a fine view (left) of the Diamond Notch, Hunter Mt.; and Big West Kill Mt. (3900 ft. to the W.). To the left are deep ravines between the spurs of Hunter Mt. At (39 M.) Stony Clove we reach the top of the pass (2070 ft.) and begin to descend. — 41 M. Kaaterskill Junction (1700 ft.), whence the Kaaterskill Division diverges to the right (through-cars).

The Stony Clove R. R. goes on to (43 M.) Hunter (1605 ft.; St. Charles, $2 1/4; Prospect Ho., $2 1/2; Hunter Ho., $2 1/2-3; Central, $2), close to the base of the Colonel's Chair (3040 ft.) and 2 M. to the N. of Hunter Mt. (see above), both of which summits may be ascended hence. Fine drives may be taken to the Overlook Mt. Ho. (14 M.) and the Hotel Kaaterskill (11 M.); and nearer points of interest are Mossy Brook (1 M.), Onteora Park (see below), and Stony Clove.

The Kaaterskill Railroad ascends towards the E. — 44 M. Tannersville (1860 ft.; Roggen's Mountain Hotel, $2-2 1/2, open all the year; Sohmer, Waverley, Blythewood, Fabian Ho., Campbell Ho., $2 1/2) occupies one of the most conveniently central situations in the Catskills.

Crum Hill (2300 ft.), 3/4 M. to the S., easily ascended in 1/2 hr., affords a good view, including the Kaaterskill Falls (p. 170). — About 2 M. to the N. is Onteora Park (Bear & Fox Inn), a cottage colony belonging to a club which includes several well-known writers, artists, and musicians. The enclosure is private, but visitors will generally be allowed, on application at the gate, to ascend to (20 min.) the top of Onteora Mt. (2380 ft.), the view from which includes High Peak, Round Top, the Kaaterskill Hotel, Twin Mt., Sugar Loaf, Plateau Mt., Hunter Mt., Round Hill, Thomas Cole Mt., Black Dome, and Black Head. — Parker Mt. is separated by the Parker Notch from Star Rock (2515 ft. to the W.), another good point of view. — The Black Dome (3990 ft.), about 3 M. to the N.N.E. of Parker Mt., affords a fine panorama of the valley in which Tannersville lies and the mountains enclosing it. Slide Mt. (4200 ft.; p. 182), the highest of the Catskills, is seen to the right, over the shoulder of Hunter Mt. — To the S. of Crum Hill (see above) extends the fine Plattekill Clove (road), between Round Top and High Peak (p. 179) to the left and Sugar Loaf or Mink Mt. (3783 ft.), Twin Mt. (3647 ft.), and Indian Head (3585 ft.) to the right. About 6 M. from Tannersville are the Plattekill Falls (60 ft.), near which is the Plattekill Mt. House. A new road ('Views) ascends to the right to (6 M.) the Overlook Mt. House (p. 150). — About 3 M. to the S. of Tannersville, on the slope of Sugar Loaf Mt., is Elka Park, the property of the Lieder-Kranz ('L.K.') of New York, with a nice club-house. This is adjoined by the Schoharie Manor, a similar association, with a large club house in the Colonial style. — Among other points within easy reach of Tannersville are Haines's Falls (see below), Kaaterskill Falls, Clove, and Hotel (pp. 178, 179), and Stony Clove (p. 180).

Beyond Tannersville the train soon reaches (46 M.) Haines's Corners (1920 ft.; The Antlers, $2 1/2; Haines's Falls Ho., Glen Park Ho., $2), the nearest station to (1/2 M.) Haines's Falls (see below).

Haines's Falls, at the head of Kaaterskill Clove (p. 178), consist of two main leaps, 150-160 ft. and 80 ft. high, with other plunges lower down, making in all a descent of 475 ft. in 1/2 M. The water is dammed up in dry weather and the sluices opened for visitors (fee 25c.). The environment of the falls is very picturesque. The bridge above the falls leads to Twilight or Haines's Falls Park, another cottage-colony like Onteora Park (see above). Adjacent is Sunset Park. — From Haines's Falls to the Kaaterskill Falls and Hotel, see p. 179.

The train now traverses wood to (48 M.) Laurel House Station
(2065 ft.), 300 yds. from the Laurel House and the Kaaterskill Falls (see p. 179). The falls are seen to the right just before we reach the station.—49 M. Kaaterskill Station (2145 ft.), situated at the W. end of South Lake, a pretty little sheet of water. The road to the (3/4 M.) Hotel Kaaterskill crosses the bridge to the S. and leads through wood. — From this point the railway has lately been extended to (1 M.) Otis Summit, the station for the Catskill Mt. Ho. (p. 178), where it connects with the Otis Elevating Railroad (p. 177).

c. From Rondout (Kingston) to Bloomville.

89 M. Ulster and Delaware Railroad in 3 1/2-4 hrs. (fare $2.61; parlor car 50 c.). Through-cars from New York, comp. p. 160.

From Kingston Point (Rondout) to (29 M.) Phoenicia, see p. 180. To the left, beyond Phoenicia, rises Mt. Garfield (2650 ft.). From (35 M.) Shandaken (1060 ft.; Palace, $3; Clarendon) coaches run through the Deep Notch to West Kill and Lexington. — 38 M. Big Indian (1210 ft.; Joslyn Ho., 2 M. up the valley, $2) lies at the mouth of Big Indian Valley, with the headwaters of the Esopus.

This is the starting-point for a visit to (11 M.) Slide Mt. (see below). A road ascends Big Indian Valley (stages to Winnisook Lodge in summer, fare 75 c.), with Big Indian or Balsam Mt. (3600 ft.) to the right and Panther Mt. (3825 ft.) to the left. Several small hotels are passed. 5 M. Dutcher's Panther Mt. House (2000 ft.; unpretending, $1 1/2), the nearest hotel to Slide Mt., where a guide may be obtained. The road ends, 3 M. farther on, at Winnisook Lodge, a hunting-club and preserve. Hence a path (steep at first, then easy; 1-2 hrs.) ascends to the left to the top of Slide Mt. (4205 ft.), the highest of the Catskills. The *View from the tower here is very extensive, embracing about 70 peaks in the Catskills, Mt. Everett in Massachusetts (due E.; p. 151), etc. Slide Mt. is included in a large State Reservation. — A road leads across from the head of Big Indian Valley into (4 1/2 M.) Woodland Valley, near Phoenicia (p. 180).

The gradient here is very steep. 41 M. Pine Hill (1660 ft.; Rip van Winkle Ho., Cornish Ho., Winterton, Brewerton, Alpine, $2 1/2; Ul'er, $2-3; Mountain Inn, etc.), pleasantly situated below the railway to the right. — 43 M. Grand Hotel Station (1885 ft.) is the culminating point of the line, on the watershed between the Hudson and the Delaware. To the right stands the *Grand Hotel ($4 1/2), one of the most fashionable resorts of the Catskills, finely situated on the slope of Summit Hill (2500 ft.). It commands a splendid *View, including Belle Ayr, Big Indian, and Slide Mts. Adjacent are several smaller hotels.

The train now descends, making a bend to the left, to (46 M.) Fleischmann's (formerly Griffin's Corners; 1515 ft.), which lies like a toy-town in the valley to the right. 50 M. Arkville (1345 ft.; Hoffmann Ho.; Commercial Ho., $1 1/2; *Ackerly Ho., at Margaretville, 1 M. from the station, $2 1/2). We now descend along the E. branch of the Delaware. — 61 M. Roxbury (1500 ft.). — 67 M. Grand Gorge (1570 ft.), between Bald Mt. (left) and Irish Mt. (right).

A stage runs hence to (5 M.; fare 50 c.) Prattsville, with the curious Pratt Rocks, carved into fantastic shapes and painted white by old Col. Pratt.
ADIRONDACK MOUNTAINS.  25. Route.  183

73 M. South Gilboa (1845 ft.).
76 M. Stamford (1765 ft.; Churchill Hall, $2 1/2-3 1/2; Grant Ho., $2-3; Simpson Terrace, Westholm, Delaware Ho., $2), pleasantly situated near the source of the W. branch of the Delaware, is a quiet and inexpensive summer-resort. The favourite excursion is to the top of Mt. Utsayantha (3365 ft.; view; 2 1/2 M. by road).

In summer four-horse coaches run from Stamford, through the beautiful Charlotte Valley, to (20 M.) Davenport Centre, where they connect with the railway to Cooperstown (p. 179).

80 M. Hobart (1615 ft.; Commercial, $1 1/2-2). — 89 M. Bloomville (1550 ft.; Bloomville Ho., $1 1/2) is the terminus of the railway. Numerous other points on the N. and W. sides of the Catskills are frequented as summer-resorts.

25. The Adirondack Mountains.

Approaches. The principal gateways to the Adirondack Mts. are Plattsburg (p. 159); Port Kent (p. 204); Westport (p. 188); Utica (p. 206); Malone (p. 197); and Saratoga (p. 197); and in the following description it will be most convenient to follow the routes leading from these points into the heart of the mountains. The Adirondacks are within 10-14 hrs. of New York by railway (comp. RR. 20b, 20d), and the additional time required to go from the nearest railway-station to any point mentioned below can be easily calculated from the data in the text. Plattsburg is 12 hrs. from Boston via Burlington (comp. R. 19a). Fare from New York to Plattsburg $8, parlor-car $2, sleeper $2; to Port Kent, $7.60; to Westport, $6.80; to Saratoga, $4.20; to North Creek (p. 195), $5.95.

General Features. The Adirondack Mountains, in the N. part of the State of New York, stretch from near Canada on the N. to near the Mohawk River on the S. (120 M.), and from Lakes George and Champlain on the E. to an indefinite and irregular line on the W. (ca. 80 M.), covering an area of about 8,000 sq. M. The mountains, which run in five parallel ranges from S.W. to N.E., rise from an elevated plateau and many of them are over or nearly 5000 ft. high. The highest range, or Adirondacks proper, is on the E. side of the district; and the loftiest peaks are Mts. Marcy (5345 ft.), McIntyre (5112 ft.), Skylight (4920 ft.), Haystack (4948 ft.), Gray Peak (4900 ft.), Dix (4842 ft.), Basin (4825 ft.), and Whiteface (4870 ft.). The whole of the district (the so-called 'Adirondack Wilderness'), except the highest peaks, is densely covered with forest, much of which is still virgin and almost unexplored. Lumbering is carried on very extensively, and huge quantities of spruce, hemlock, and other timber are annually sent down to the Hudson and St. Lawrence. The geological formations of the Adirondacks are mainly granitic and other primary rocks. In the valleys lie more than 1000 lakes, varying in size from a few acres to 20 sq. M. (Schoon Lake) and in height above the sea from 807 ft. (Schoon Lake) to 4320 ft. (Tear of the Clouds). The Hudson River rises in the Tear of the Clouds (p. 192), and the Raquette, Saranac, Ausable, and numerous other rivers and streams connect the labyrinth of lakes. This combination of mountain, lake, and forest is, perhaps, unrivalled elsewhere, and the scenery is of great and varied attraction. The fauna of the district includes catamounts or 'panthers' (Felis Concolor; rare), black bears, wild-cats, numerous deer, otters, badgers, rabbits, black eagles, hawks, loons, wild ducks, partridges, herons, etc.; while the lakes and streams are well stocked with trout and bass. There are no rattlesnakes or other venemous serpents. — A movement is on foot to set apart about 4000 sq. M. of the Adirondacks as a State Park like the Yosemite (p. 500), but all but 900 sq. M. of this are still in private hands.
Resorts. The most frequented and fashionable region is the district of the Saranac and St. Regis Lakes (pp. 185, 186), which are closely environed by hotels and summer-camps. Lake Placid (p. 189) is now almost as frequented, while Keene Valley (p. 190), perhaps the gem of the district, is daily growing in favour. The Blue Mt. and Raquette Lake region (p. 195) is somewhat more remote from the ordinary run of travel; while the less mountainous districts to the W. are rarely penetrated by visitors except in search of sport.

A fair general idea of the attractions of the Adirondacks may be obtained by the following tour. From Plattsburg (p. 159) to Paul Smith's (p. 185); thence, via the St. Regis and Saranac Lakes, to Saranac Village and Lake Placid, as described at pp. 185-187; from Lake Placid to Adirondack Lodge (p. 193); thence to Summit Rock in the Indian Pass (p. 193) and back; from Adirondack Lodge to Keene Valley (p. 190), either by road or (preferable for good walkers) over Mt. Marcy (p. 193); thence to Elizabethtown (p. 183) and Westport (p. 183). This tour may be accomplished in 8-10 days. Those who have longer time may add the Tupper, Long, Raquette, and Blue Mountain Lakes in the ways suggested at pp. 186, 194-196.

Sport. Deer, which are the chief object of the Adirondack sportsman, are generally killed by 'Still-hunting'. The somewhat unsportsmanlike practice of driving them into the water by hounds and shooting them from a boat and 'jack-hunting' (with a light at night) are now prohibited. The State Game Laws, which the visitor should study carefully, impose stringent limitations on the indiscriminate massacre of the deer, and there are now various reservations (comp. pp. 190, 194) in which the game is strictly preserved. An occasional shot at a bear may be had in the remoter recesses, but the visitor need scarcely count on this as among the possibilities. The shooting of Partridges (raffed grousse, Bonasa umbellus) is carried on with the aid of dogs. Good Fishing is obtained in many of the lakes and ponds. The intending sportsman should put himself at once into communication with the local talent. His outfit should be as plain, strong, and limited in extent as possible. Comp. also p. xxv.

Camping is one of the chief features of Adirondack life; the camps varying from the luxurious permanent 'Camp' of the regular visitor down to the makeshift lean-to's of the sportsman. Camping Parties of ladies and gentlemen are frequently organized, and, with good guides, a cook, and efficient equipments, afford a very pleasant variation of ordinary summer pleasures. — Flies and mosquitoes are troublesome in June and July.

Guides are to be found at all the chief resorts, and the regular charge is $3 a day, which includes the use of their boats and cooking and table ware. Their keep is also paid by the traveller. When a guide is dismissed at a distance from his home, he expects the full daily fee and allowance for food on his return-journey. For short trips one guide and boat can take two persons, but for longer expeditions there should be a guide to each traveller. The boats are small and light, so that they are easily transported over the 'carries' between the lakes on the guide's shoulders. When horses are used for the carries the employer pays for the transportation. Nothing but small hand-baggage can be taken in the boats.

The Adirondack Guides' Association, organized in 1891, issues certificates and badges to its members. In the absence of a graduated tariff, the same fee is demanded for a short walk as for a severe day's work.

The Hotels of the Adirondacks are generally comfortable, and some of the larger ones may even be termed luxurious. Prices vary greatly according to the style of the house and its situation.

Expenses. The expenses of a rapid tour through the Adirondacks are apt to be somewhat high, as the guide's fee ($3) and keep ($1-1/2) have to be added to the traveller's personal expenses ($5-5). Camping and sporting parties live, of course, much more cheaply than hotel-guests.

The information in the following pages will suffice for a rapid tour through the Adirondacks, but those who contemplate a prolonged stay or shooting and camping parties should procure the guidebook of S. R.
ST. REGIS LAKE HOUSE.  25.  Route.  185

Stoddard of Glen Falls, N. Y. (with maps; price 25 c.), which contains details of routes, outfit, and supplies.

a. From Plattsburg to St. Regis, Tupper, Saranac, and Placid Lakes.

83 M. Chateaugay Railroad to (73 M.) Saranac Lake in 3 1/2-4 hrs. (fare $3; from New York $8.80); thence to (10 M.) Lake Placid in 1/2 hr. (fare $1; from New York $9.80).

Plattsburg, see p. 159. The train passes the U. S. Barracks (p. 159) and runs to the W. through the valley of the Saranac. It crosses the river before and after (12 M.) Cadizville and then ascends to the right, leaving the river. Beyond (17 M.) Dannemora (1810 ft.), with Clinton Prison, we make a wide sweep to the left, round Johnson Mt. To the left is Lyon Mt. (3810 ft.) — 28 M. Chazy Lake (1500 ft.; Chazy Lake Ho., $2 1/2-4; steamboat from station 50 c.), at the S. end of Chazy Lake (4 M. long, 1 M. wide; trout-fishing).

From (34 M.) Lyon Mountain, an iron-mining village, coaches run to (31 1/2 M.) Ralph's ($3 a day; fare 75 c.) and to the (41 1/4 M.) Chateaugay Hotel ($3) and Merrill's ($2 2/3; fare 75 c.), on the E. side of Upper Chateaugay Lake (4 M. by 1 M.). A small steamer plies on the Chateaugay Lakes and a coach runs from the N. end of the Lower Lake (31 1/2 M. x 3 3/4 M.) to (6 M.) Chateaugay Station, on the Ogdensburg and Lake Champlain R.R. — The railway now bends to the S. (left), affording a good view of Chateaugay Lake to the right. 54 M. Loon Lake Station, at the N. end of Loon Lake (2 M. long), connects by stage (75 c.) with (2 1/2 M.) Loon Lake House ($4-5), at the S. end. To the right are Loon Lake Mt. and Long Pond. At this point our line runs parallel with the Adirondacks Division of the N. Y. C. & H. R. R. (see p. 197). — At (61 M.) Rainbow we see Rainbow Lake (p. 197) to the right. — 66 M. Bloomingdale is the station for Paul Smith's, 7 M. to the W. (sandy, uninteresting road; stage $1; see below). — 73 M. Saranac Lake (see p. 186). — We now follow the tracks of the Saranac & Lake Placid R. R., opened in 1893. — 77 M. Ames Mills; 78 M. Ray Brook (Hotel, $3); 82 M. Lyons. — 83 M. Lake Placid (see p. 189). The station lies about 1 M. from the S. end of the lake (carr. fare to most of the hotels 25 c.; trunk 25 c.).

The St. Regis Lake House, known as Paul (properly Apollos) Smith's, a hotel (500 beds; $4-5 a day, $21-30 a week) on the N. bank of the Lower St. Regis Lake (1620 ft.; 2 M. x 1 M.), is one of the most fashionable resorts in the district and may be made the starting-point for a guide-boat tour of the N. Adirondack lakes. It is only 4 M. from Paul Smith's on the Adirondack & St. Lawrence Division of the N. Y. C. & H. R. R. (see p. 197). Both the St. Regis Lakes are surrounded by numerous camps, and good fishing and shooting are obtained in the neighbourhood. Near Paul Smith's is a large Sanitarium, managed by Sisters of Mercy.
The following *Round Trip* is frequently made from Paul Smith's, and affords an excellent idea both of the attractions of the Adirondacks and of the ordinary methods of travelling.

The circuit is about 40-45 M., and 3 days should be allowed for it, though more may profitably be spent, especially if any digressions are made. Those who make the round trip quickly should engage their guide and boats for the whole journey; others may hire from place to place (comp. p. 184). The guides should be expressly instructed to go by the distinctly preferable 'Seven Carry Route', as otherwise they will select the 'Big Clear Route', on which two horse-carryes ($1 and $1/2) save them some work and add to the tourist's expenses. If desired, heavy baggage may be sent to Saranac Village by railway.

Leaving Paul Smith's, we cross the Lower St. Regis Lake by boat (1/2 M.); row to (3/4 M.) Spitfire Pond; cross this pond (1/2 M.), and row to the (1/2 M.) Upper St. Regis Lake (1625 ft.), which we cross to (2 M.) its S. end. To the W. rises St. Regis Mt. (2890 ft.).

Here begins the carry to (1 1/2 M.; fee for horse $1) Clear Lake ('Big Clear'), a pretty little lake, well stocked with fish, on the N. bank of which stands the Lake Clear Hotel ($3; well spoken of). Clear Lake is 2 M. long, and a carry of 4 M. leads from its S. end to Saranac Inn (horse for boat $1/2; seat in a carriage 50 c.).

On the Seven Carry Route we traverse six short carries and six small ponds and reach (3 M.) Little Clear Pond, which is 1 M. long and 2 M. from Saranac Inn (9 M. from Paul Smith's). In either case we cross the Adirondack & St. Lawrence Division of the N. Y. & H. R. R.

*Saranac Inn* ($4; telegraph-office) lies at the N. end of Upper Saranac Lake, 13/4 M. from Saranac Inn Station on the Adirondack and St. Lawrence R. R. (see p. 197).

*Upper Saranac Lake* (1575 ft.), 7 1/2 M. long and 1/2-3 M. wide, is one of the largest sheets of water in the district. It is dotted with islands and surrounded by thickly wooded and hilly banks. Good fishing and shooting. Small steamers ply on the lake (fare 75 c., round-trip $1), calling at the Sweeny Carry (Wawbeek Lodge, $4, with tel. office), on the W. bank, Indian Carry (Rustic Lodge, $2 1/2), at the S. end, and Bartletti's or the Saranac Club, on the E. side.

Wawbeek Lodge is 8 M. to the E. (stage $1 1/2) of Tupper Lake Village, on the N. Adirondack R.R. (see p. 197). — The Sweeny Carry (3 M.; horse for boat $2, seat in buckboard 50-75 c.) leads to Raquette River (Tromblee's Inn, $2), which may be ascended, with the help of a horse-carry ($1 1/4, seat in carr. 50 c.) round the Raquette Falls (Raquette Falls Hotel, $2 1/2), to (ca. 20 M.) the N. end of Long Lake (p. 190). Or we may descend the river to (11 M.) Tupper Lake (p. 197).

Indian Carry crosses to (1 M.) the Stony Creek Ponds (1640 ft.; Hiawatha Hotel, $2 1/2) and to (3 M.) Axton, on the Raquette River (about 8 M. from Tromblee's).

A short carry from the landing for Bartletti's (1/4 M.; horse, unnecessary, 50 c.) leads to the stream flowing into the (1/2 M.) Middle Saranac Lake, more often called Round Lake (1545 ft.), a nearly circular sheet of water, 21/2 M. in diameter. This little lake is sometimes lashed by violent squalls coming down from the hills,
Mountains. AUSABLE CHASM. 25. Route. 187

and it is advisable to keep an eye on the weather. To the S.E. rises Ampersand Mt. (3430 ft.; *View), the trail to the top of which (ca. 21/2 M.) leads through the woods and is not easy to follow without a guide. At the N.E. corner of Round Lake we enter its pretty outlet, descending to (21/2 M.) the lower lake and passing about halfway a series of rapids, where a short carry is necessary.

*Lower Saranac Lake (1540 ft.), 5 M. long and 3/4-11/4 M. wide, is one of the prettiest of the Adirondack lakes, surrounded by wooded hills and thickly sprinkled with islands, said to number fifty-two. Near the lower (N.E.) end of the lake lies Saranac Lake Village, with the station of the Chateaugay R. R. (p. 185), and one of the chief centres of the district for hotels, guides, and outfits.

The *Ampersand Hotel ($4-7) is pleasantly situated on high ground on the N. bank of the lake and is adjoined by golf-links. The Algonquin ($3-4) lies on the S. shore of the lake (omn. from station 50 c.). The Del Monte ($3-4) is 1 M. to the N., the Edgewood Inn ($2-3) 1 M. to the W. of the village. The *Berkeley (21/2-4) is the chief hotel in the village itself. The Adirondack Sanitarium (for consumptives) lies 1 M. to the N.E.—H. H. Miner, taxidermist, near the Saranac Lake House, has excellent stuffed specimens of the fauna of the Adirondacks.

Saranac Lake is 10 M. by road (railway, see p. 185) from Lake Placid (see p. 189). The road turns to the right in the village, 11/2 M. from the lake, and passes (21/2 M.) the Ray Brook House (p. 185). At (3 M.) the fork the left branch leads to (3 M.) Lake Placid, the right to (5 M.) North Elba (p. 189).

We may now return to Paul Smith's by railway (see p. 197).

b. From Port Kent to Ausable Chasm and Lake Placid.

Port Kent lies on the W. shore of Lake Champlain (see p. 204), nearly opposite Burlington (p. 127; steamer), and within 81/2 hrs. by railway of New York (comp. R. 20b; fare $7.60).

A short branch—railway runs in 20 min. from Port Kent to (21/2 M.) Ausable Chasm (*Ausable Chasm Hotel, finely situated, $4) and to (6 M.) Keeseville.

The **Ausable Chasm is, perhaps, the most wonderful piece of rock-formation to the E. of the Rockies, and should not be omitted by any traveller who comes within a reasonable distance of it. The Ausable River, a large and rapid stream, here flows through a rocky gorge only 20-40 ft. wide, between perpendicular walls of Potsdam sandstone, 100-175 ft. high. Waterfalls and rapids add to the attractions. A visit to the chasm has been facilitated by paths and bridges; and the boat-ride through the rapids affords a novel and exciting but perfectly safe experience. Numerous interesting fossils (lingula antiqua, trilobites) have been found here.

The Entrance to the chasm (adm. 75 c., boat-ride 50 c.) is a little to the N. of the *Trestle Bridge, a few minutes from the Ausable Chasm Hotel. At the head of the chasm (to the left) are the *Rainbow or Birmingham Falls, 70 ft. high, while near the point where we enter are the lower Horse-shoe Falls. Following the path to the right over the ledges (smooth as if made artificially), we round the Elbow, beyond which, across the
stream, rises the Pulpit Rock (135 ft.). Below the Split Rock (1.) we cross the stream. Farther on more or less appropriate names are attached to the various phenomena, such as the Devil's Oven (r.), Hell Gate, Jacob's Ladder (r.), the Devil's Punch-Bowl (l.), Jacob's Well (l.), Mystic Gorge (l.), Shady Gorge (r.), the Long Gallery, Point of Rocks (l.), Hyde's Cave (r.), Column Rocks (r.), and the Post Office (l.; so-named for very obvious reasons). We are now in the Upper Flume, at the lower end of which we cross to the flat Table Rock, where the boat-ride begins and where many visitors turn back. Here, to the right, tower the Cathedral Rocks and the Sentinel, 100 ft. high. The boat at first passes through the Grand Flume, the rocky sides of which are 475 ft. high, while at one place the river is 60 ft. deep and only 12 ft. wide. Emerging from the Flume, we pass through a quiet pool and enter the Rapids, through which we sweep swiftly to the landing-place at the foot of the chasm. We may now either walk or drive back to the (11/2 M.) hotel.

Coaches run daily in summer from the Ausable Chasm Hotel to (32 M.) Lake Placid (p. 189; fare $4), via (31/2 M.) Keeseville, (13 M.) Ausable Forks Station (p. 160), and (21 M.) Wilmington (p. 190).

c. From Westport to Elizabethtown, Keene Valley, and Lake Placid.

Adirondack Lodge. Indian Pass.

Westport (*Westport Inn*, overlooking the steamboat-wharf, $2-4; Richards, $2; The Westport, at the rail. station, not to be confounded with the Westport Inn, $2, unpretending) is a village of 563 inhab., on the W. shore of Lake Champlain, 25 M. to the S. of Port Kent (p. 187) and 10 M. to the N. of Port Henry (p. 203). It is the chief gateway to, perhaps, the finest part of the Adirondacks, coaches running hence, via (9 M.) Elizabethtown ($1), to Keene Valley (24 M.; fare $21/2), Lake Placid (36 M.; $4), and Adirondack Lodge (36 M.; $41/2). It is within 71/2 hrs. of New York by fast train (comp. R. 20h; fare $6.51).

The Road to Elizabethtown (9 M.) is pleasant, but calls for no special remark. — Elizabethtown (600 ft.; Windsor, $3; Mansion Ho., $21/2-3; Maplewood Inn, open the whole year, $2-3), a village with 573 inhab., is prettily situated on the Boquet River, in the well-named Pleasant Valley.

Among the points of interest in the neighbourhood are Cobb Hill (1790 ft.), just to the S.W. of the town, with golf-links; Raven Hill (1970 ft.), to the E.; and Hurricane Mt. (3655 ft.), 5 M. to the W. (cart-road; path to the summit 2 M. more), a fine point of view. On the W. side of Hurricane Mt. is the Willey House ($3). — A road leads to the S., via the (8 M.) Split Rock Falls, (10 M.) Euba Mills, and (23 M.) Schroon River P. O., to (32 M.) Schroon Lake (p. 194; coach thrice weekly, $21/2). — To the N. a road leads to (22 M.) Keeseville (p. 187), via Poke o1 Moonshine Mt. and Augur Lake.

The *Road from Elizabethtown to Lake Placid* (28 M.; from which the roads to Keene Valley and Adirondack Lodge diverge) passes through one of the most beautiful parts of the Adirondacks. It leads to the W., passing between Hurricane Mt. (see above) on the right and several lower hills on the left. 10 M. Keene Valley (see
Mountains

LAKE PLACID.

25. Route. 189

p. 190) opens to the left. Our road turns N. to (2 M.) Keene Village or Keene Centre (1000 ft.; Hotel, D. 75 c.). Beyond Keene the road turns sharply to the left (S.E.) and ascends to the (4 M.) beautiful *Cascades Lakes (2040 ft.; well stocked with trout), with Pitch Off Mt. (3520 ft.) rising so abruptly to the right as barely to leave room for our passage. Cascade Mt. (4090 ft.) rises equally sheer on the other side of the lakes. The *Cascade Lake House (6 M. from Keene; $3, D. $1) is a favourite resort of fishermen and others. Ahead of us we now obtain a fine *View of the mountains enclosing Lake Placid.

— 4 M. Ames's Mountain View House ($2). Among the mountains seen to the S. (left) are Mrs. Marcy and McIntyre (p. 193), the two loftiest peaks in the district. At North Elba, about 1 M. farther on, the road to (5 M.) Adirondack Lodge (p. 193) diverges to the left, and after 1 M. more the road through the Wilmington Notch (p. 190) leads to the right. Just beyond this point we cross the Ausable River, and on the left, 1/2 M. farther on, is a sign pointing to (1/2 M.) John Brown's Farm (see below). 1 M. North Elba Post Office, where the road to (2 M.) Lake Placid diverges to the right from the main road, which goes on to (10 M.) Saranac Lake Village (p. 187).

*Lake Placid (1860 ft.), 4 M. long and 2 M. broad, is surrounded by finer and higher mountains than any other of the larger Adirondack lakes, and numerous hotels and cottages have been built on its banks. It contains three islands, Hawk, Moose (owned by the Placid Park Club), and Buck. At its S. end it is closely adjoined by the small Mirror Lake (1858 ft.), 1 M. long and 1/3 M. wide. Boating and fishing are carried on on both lakes, and golf-links have been laid out. The beautifully-shaped Whiteface Mt. (see below) is conspicuous at the N.E. end of Lake Placid, while McKenzie Mt. rises to the W. The *View to the S. includes the following peaks (named from left to right): Gothic, Saddleback, Basin, Marcy, Colden, and McIntyre, with Indian Pass (p. 193) to the right of the last. Small steamers ply on Lake Placid.

Most of the hotels and other houses are clustered round the S. end of Lake Placid and Mirror Lake. *Stevens House (1935 ft.; $4), on the ridge between the two lakes; Mirror Lake House ($3-4), at the S. end of Mirror Lake; Grand View House ($3 1/2-7), to the S. of the Stevens Ho.; *Lake Placid House ($3), a small and comfortable house, to the E. of the Stevens Ho., with view of both lakes; *Ruisseau Mont, to the N. of the last ($4-6); White Face Inn, in a sequestered site on the S.W. side of Lake Placid, $3; Castle Rustico, Undercliff ($12-20 per week), W. bank of Lake Placid. The Summer Camp of Mr. E. D. Bartlett, near the White Face Inn, is one of the finest in the Adirondacks.

Excursions. The path to (3 M.; ca. 2 hrs.) the top of *Whiteface Mt. ($570 ft.) begins at the N. end of Lake Placid (guide desirable; road in progress). The *View includes the main Adirondack peaks (S.), Lake Champlain (E.), and the Saranac and Tupper Lakes (W.), while on the N. it reaches to Canada and the St. Lawrence. The descent may be made by bridle-path and cart-track to (6 M.) Wilmington (p. 190). — McKenzie Mt. ($190 ft.) may be ascended in 2 hrs. (no path). — *John Brown's Farm (route, see above) is in a lonely spot, 3 M. from Lake Placid. The sturdy old
Abolitionist (comp. p. 292) had his home here from 1849 till his death (1859), and now lies buried in a small enclosure near the house, with a huge boulder marking the spot (shown by the present occupant of the house, who has photographs for sale). Adjacent is a monument with the names of twenty persons who bought the John Brown Farm and presented it to the State, to be kept as a public park (1896). Walkers may cut off 2 M. of the route to Adirondack Lodge (p. 193) by descending to the Ausable from John Brown's, crossing the river by stepping-stones, and following a path through the woods, which joins the road in 2 M.

The ROAD THROUGH THE WILMINGTON NOTCH TO AUSABLE FORKS (26 M.) diverges to the left (N.) from the road to Elizabethtown, at a point 4 M. from Lake Placid (see p. 1-9; coach $2/2). The "Notch" (10 M.) is a defile on the S.E. flank of Mt. Whiteface (see p. 189), through which flows the W. branch of the Ausable, scarcely leaving room for the road. Wilmington (Bliss House, §2), 6 M. farther on, is a good starting-point for an ascent of Whiteface (see p. 189; saddle-horse §4, guide §3). At Ausable Forks (10 M. farther on), where the two branches of the Ausable unite, we reach the railway (see p. 100).

Among the numerous other excursions made from Lake Placid are those to Adirondack Lodge (10 M.; see p. 193) and Keene Valley (21 M.; see below).

**Keene Valley** (approaches, see pp. 188, 193), extending for 8 M. to the S. from Keene Village (p. 189), is, in its combination of the gentler and the sternier beauties of scenery and its convenience as a centre for all kinds of excursions, perhaps the most desirable headquarters in the Adirondacks. It is watered by a branch of the Ausable, and is enclosed by two mountain-ranges, including Hopkins Peak, the Giant of the Valley, and Noon Mark on the E., and Mt. Porter, Twin Mts., and the Wolf's Jaws on the W. The autumn colouring of the trees is often rich beyond expression.

The valley is traversed by a good road, which passes various hotels and (5 M.) Keene Valley Village (1030 ft.). The following list of the hotels names them in consecutive order from N. to S., as we penetrate the valley; but the tourist is advised to fix his quarters as near the head of the valley as possible. Estes House (§2), on the E. bank of the river, at the foot of Prospect Hill; Adirondack House (§3), to the W. of the village; Tahawus House (§2-3), in the village, to the right; St. Hubert's Cottage, to the right, near the head of the valley. St. Hubert's Inn (1350 ft.; from §4) is a large and well-managed house at the head of the valley, occupying the site of the well-known Beede House, which was burned down in 1890. It is surrounded by groups of private cottages, many of the occupants of which take their meals at the hotel. The View is superb. Immediately facing St. Hubert's Inn, to the S.E., rises Noon Mark, with the long ridge of the Giant and Hopkins Peak to the left and the conical Mt. Colvin to the right. To the N. we look down the Keene Valley, and to the S.W. is the road to the Ausable Lakes, between Mt. Colvin and Mt. Resegonia. In front of St. Hubert's Inn lie the St. Hubert Golf Links. Adjacent is a small circulating library. — On the farm of Glenmore, at the N. end of the valley, is the Summer School of Philosophy.

The following Excursions are described with St. Hubert's Inn as centre, but it will be easy to make the necessary rectification for other starting-points in the valley. — Keene Valley has an excellent Guides' Union, a list of the members of which may be obtained at the hotels. The regular fee is $3 a day for any excursion; a graduated tariff is an obvious desideratum which has not yet been adopted. — Many new trails are being constructed by the Adirondack Trail Improvement Society.

Ausable Lakes, ca. 15 M. (there and back). This is the favourite excursion from Keene Valley and should on no account be omitted. The lakes are included in the Adirondack Mountain Reserve, a tract of about 40 sq. M. to the S. of Keene Valley, bought and controlled by a com-
pany. Ordinary tourists, however, are freely admitted to the Reserve, though none but the authorized guides are permitted to have boats on the upper lake. The entrance to the Reserve is a little to the S.W. of St. Hubert's Inn (toll for carr. $1/2-1, walkers free). A good road, constructed by the company, leads hence to the (3 1/2 M.) *Lower Ausable Lake (1960 ft.; boat-house, with租房, boats to hire, etc.), a small sheet of water, about 2 M. long, surrounded by beautifully wooded mountains descending sheer to the water. To the left rises Indian Head (2535 ft.; View), a knob of Mt. Colvin; to the right are the finely formed Gothics and Mt. Resegonia or Sawteeth. [From the boat-house we may make a trip by boat (1-3 pers. 16 c., each pers. addit. 5 c.) to (10 min.) the landing for Rainbow Falls, a veil-fall of about 100 ft. (rainbow 12-2 p.m.).] From the upper end of the lake a good trail leads to (1 1/4 M.) the *Upper Ausable Lake (1990 ft.), which is 3/4 M. long. 'In the sweep of its wooded shores, and the lovely contour of the lofty mountains that guard it, this lake is probably the most charming in America' (Warner). To the right (named from left to right) are Skylight, Haystack, Mt. Bartlett, Basin, Saddleback, Gothic, and Resegonia; to the left, Colvin and the Boreas Range. (Mt. Marcy is not seen from either lake.) The lake is surrounded with camps belonging to the guides, where meals are usually cooked and eaten before returning. Many parties also spend days here in one of the camps, the charge being 25c. per night for each person. Before returning we may row up the inlet of the lake as far as (1/2 hr.) the Elk Lake Trail (see below) and then follow the general course of the stream (avoiding paths to the left) to (20 min.) Panorama Bluff, which commands a splendid View of the mountains (from left to right: Allen, Skylight, Marcy, Haystack, Bartlett, Basin, Saddleback, Gothics, Resegonia). Route to Mt. Marcy, see p. 192. — A trail beginning about 13/4 M. above the Upper Ausable Lake, a little beyond the Marcy trail (p. 192), leads to the E. over the Boreas Mt. Range to (3 1/2 M.) Elk Lake (1850 ft.), whence a road leads S. to (5 M.) the road from Tahawus (p. 194) to Schroon River P. O. (p. 194; 5 M. to the E.).

**Short Walks.** The Russell Falls are reached in 10 min. by a path descending from the back (S.W. corner) of St. Hubert's Inn. — The foot of Roaring Brook Falls, descending for about 300 ft. over a cliff on the W. side of the Giant, is about 3 1/4 M. to the E. of the hotel. We follow the Port Henry road to (10 min.) the fork, turn to the left, cross a small bridge, and then cross a field to the right to bars leading into the wood. The cart-track in a straight direction leads to the foot of the falls. By following the Port Henry road for 11/2 M. farther, we reach Chapel Pond (1600 ft.; right). A steep path, a little farther on, to the left, ascends to (20-30 min.) the Giant's Washbowl (2250 ft.), a solitary mountain-tarn at the foot of a gigantic cliff. A new trail (marked by 'blazes' on the trees) leads hence to the W. to (1 M.) the top of Roaring Brook Falls (see above), whence we regain the road by descending on the right side of the stream (a round in all of 4-5 M., taking 2-3 hrs.). — With the last-mentioned walk may be combined a visit (2 hrs. more) to Round Pond and Boquet Falls (trails indistinct; guide desirable). — To reach the (3 M.) Cathedral Rocks we follow the Ausable Lake road for 1/2 M. and then cross a rustic bridge to the right. With this may be combined a visit to the small Cathedral Falls (someone to point out the way desirable). — **Artist's** or Chapel Brook, 11/2 M. We proceed as in the Roaring Brook Walk to (20 min.) the bars leading into the wood, and follow the first path to the right. The scenery somewhat resembles the Torrent Walk at Dolgeley.

**Ascents.** The following ascents are condensed, by permission, from papers by Mr. Frank W. Freeborn in 'Appalachia' (p. 130). Experts may dispense with guides in the first six. — **Noon Mark** (3550 ft.; 11 1/2 hrs.). We diverge to the right from the Chapel Pond road, just beyond the last cottage on the right (Prof. Felix Adler's), and follow the broad path, which soon climbs along the left side of a ravine to (35-45 min.) a bare ledge (view). The path then follows a gentle ridge and (in 25-35 min.) begins to ascend steeply to (30-40 min.) the top. The *View includes Keene Valley and its bounding mountains, Mt. Dix, with its curious knob (S.), Nipple-
top, and the Marcy group. — Mt. Colvin (4074 ft.; 2-3 hrs.). The path leaves the Ausable Lakes road to the left, about 1/4 M. on this side of the lower lake, and ascends the left side of Indian Head (p. 191; sign-boards). 35 min. Path to (5 min.) Wizard’s Washbowl, to the left. 1 1/2 hr. (l.) Path to (6 min.) High Falls. 5 min. (l.) Trail to Fairy Ladder Falls and Nippletop (4620 ft.). 35 min. (r.) High white cliff, a little beyond which are a large rock and a small spring (r.). 20 min. Top (highest point reached by ladders). The “View to the N. includes the Ausable Lakes and the highest peaks of the Adirondacks (named from left to right: Skylight, Marcy, Haystack, Basin, Saddleback, Gothic, with Sawteeth in front, and Wolf’s Jaw). — Giant of the Valley (4622 ft.; 2 1/2-3 1/2 hrs.). The path diverges to the left from the track to Roaring Brook Falls, just beyond the bars (1920 ft.) mentioned at p. 190. 12-15 min. We follow the path to the left, 15-20 min. Corderoy Bridge, beyond which we follow ‘blazes’ through the wood to the left and reach (3 min.) the brook. A foot-worn trail, also indicated by blazes, ascends hence steadily for 1-1 1/4 hr. (The right branch at the fork is of easier gradient.) Then follows 1 1/2-2 1/2 hr. ‘s scramble over rocks to the end of the S. spur. Hence to the top 1 1/2 hr. more. (A little to the N.E. of the Signal is a small pool of water.) The “View includes Lake Champlain and the Green Mts.; and Mt. Washington (p. 144) is said to be visible in clear weather.” — Hopkins Peak (3135 ft.; 2 1/2-3 hrs.). We follow the road down the valley for about 3 M., and reaching the Tahawus Ho. (p. 199) turn to the right and cross the Ausable. We then turn to the right and follow the road to (10 min.) a house, at the back of which the path begins. 11 1/2-1 3/4 hr. Spring, a little beyond which the path emerges on the bare ledges. (It is well to mark this point in some way as a guide in returning.) 20-40 min. Top. Good view of the Giant, etc. — Mt. Baxter (2400 ft.; 1 1/2-2 1/2 hrs.). The path begins about 1 1/2 M. to the W. of the cottage of ‘Old Mountain Phelps,’ which is 3/4 M. from the Tahawus Ho. The “Balcony, a bare ledge on the W. summit, commands a splendid “View of Keene Valley, and it is hardly worth while to climb (20 min. more) to the top of the highest (middle) peak. — The Gothics (4740 ft.; 2 1/2-3 1/2 hrs.). The trail begins to the right of the Ausable Lake road, 2 M. from St. Hubert’s Inn. It is not very clear at first, but, after crossing (1/4 hr.) the Ausable, improves. 3 min. Cascade. 1 1/2 hr. Ridge at right angles to our course, which the trail skirts to the right. 1 1/2 hr. Hollow, with swampy pool. The (15-20 min.) top commands a good near “View of Mt. Marcy, with Mt. McIntyre to its right. Lake Placid and Whiteface are seen in the distance (N.). Dix Mt., with its singular notch, is conspicuous to the E. — Mt. Marcy or Tahawus (‘Cloud-splitter’; 5345 ft.; two days; guide necessary), the highest of the Adirondacks. This is a grand but somewhat fatiguing excursion, which should not be lightly undertaken. The night is spent in Boulder Camp (see below), and the descent may be made to Adirondack Lodge (p. 193). Campers on the Upper Ausable Lake can make the trip in one day (ascent 4-5 hrs., descent 3-4 hrs.). The path (7 M. long) begins at the little bay called ‘Cold Slough’ in the inlet of Upper Ausable Lake, about 1 1/2 M. beyond its S. end, and at first crosses boggy ground. 25 min. Path diverging to the left (our path straight on). 3 1/4 hr. Lookout Point, a high sandy bank. The path becomes steeper and in 40 min. crosses Marcy Brook. 10 min. Path leading to the right to (5 min.) Boulder Camp (see above). The main path becomes steep and wet. 40 min. Col between Skylight (l.; 4920 ft.) and Mt. Marcy, with a spring of good water and the remains of Summit Camp. The trail crosses a tract of low balsams to (25 min.) the open ledges, beyond which there is no trail. The top is reached in 1 1/4 hr. more. The “View embraces the whole of the Adirondacks, with Lake Champlain and the Green Mts. to the E. To the S.E., between us and the dark Haystack, lies the deep and narrow Panther Gorge (3350 ft.). At our feet (S.W.) lies the Tear of the Clouds, a small lake 4320 ft. above the sea, which is the highest source of the Hudson. The trail from the top to Adirondack Lodge is 7 1/2 M. long (p. 193). — Among other mountains that may be ascended from Keene Valley, with guides, are Dix Mt. (4842 ft.; one long day), Haystack (4818 ft.; one day), Nippletop (4655 ft.; 8 hrs.), and Mt. Porter (E. end, 3790 ft.; 31 1/2-41 1/2 hrs.).
Schroon Lake (p. 194) is reached from Keene Valley by the Port Het road (see p. 191) to (8 M.) Euba Mills, and thence as at p. 188. — There is no very direct or easy route connecting Keene Valley with the Long Lake and Blue Mountain district. Perhaps the best route is by the trail over the Boreas Mt. Range (p. 191) or by the Tahawus Trail (see below). Or we may go via Saranac Lake as described at p. 186. Lastly, we may return by train, via Westport, to Saratoga, and proceed thence as in R. 25d.

*Adirondack Lodge (2160 ft.; $4 a day, from $16 a week), a comfortable little hotel, completely hidden in the dense forest to the N. of Mt. McIntyre and 5 M. from the highroad (transfer-coach $1; comp. p. 189), is a favourite resort of anglers, sportsmen, and pedestrians. It is tastefully built in the style of a rustic log-house, while the internal fittings are in a corresponding style, the bark being left intact on part of the furniture. In front of the house lies the pretty little Clear Lake, reflecting the form of Mount Jo, opposite Mt. McIntyre. The view from the tower extends over an ocean of forest, with not a sign of human habitation. Beyond the hotel (to the S.) all roads cease, and the only means of communication are 'trails' through the virgin forest, sometimes followed by the 'blazes' only (guides generally desirable). — Indian Pass, see below.

Excursions. To Avalanche Lake, 5 M. The trail leads to the S., through the woods. This pretty little lake (2860 ft.) lies between Mt. McIntyre and Mt. Colden. The trail is continued along its W. side to (11/2 M.) Lake Colden (2770 ft.; log-camp). From Lake Colden a trail leads to the W. to (7 M.) the Adirondack Club (p. 194), via (2 M.) Calamity Pond. — Mount Jo is climbed in 1/2-3/4 hr. and affords a good view. — Mt. McIntyre (5112 ft.), the highest but one of the Adirondacks, is ascended hence in 2-3 hrs. (descent 11/2-2 hrs.; path steep, esp. towards the top; guide desirable, but may be dispensed with by an expert who has received a few directions). The trail winds round the W. side of Mt. Wright (to our left). About halfway up are the small Crystal Falls. The View includes Mt. Marcy (close by, to the S.E.), Lake Colden (but not Avalanche Lake), Avalanche Mt., Saranac Lakes, the finely formed Gothics, the noble form of Whiteface, the splendid precipice of Wallface (see p. 194), Mt. Seward, etc. Lake Champlain is said to be visible in clear weather. — Mt. Marcy (p. 192) is climbed hence by a trail 71/2 M. long, in 4-5 hrs. (descent 21/2-31/2 hrs.; guide necessary). The first half of the ascent is generally very muddy and fatiguing. Those who mean to descend to Keene Valley telegraph for a boat to meet them at the inlet of Upper Ausable Lake (comp. p. 191), and should arrange to pass the night in Boulder Camp (p. 192). View, see p. 192. — A trail leads through the woods from Adirondack Lodge to (6-6 M.) John Brown's Farm (p. 189). — The South Meadow Trail (easy to follow) diverges to the right from the road to the highroad, 1 M. from the Lodge, and leads to the W. via the South Meadow Marshes, and then to the N. to the highroad, which it reaches about 2 M. to the W. of the Cascade Lakes (p. 189). This is the shortest route for walkers to Keene Valley, but is uncomfortable in wet weather.

From Adirondack Lodge through the Indian Pass to the Adirondack Club, Lake Henderson, and Tahawus, 23 M. (9-10 hrs.; guide necessary).

The trail begins at the S. end of Clear Lake and leads through the woods. A divergence of a few hundred yards on either side of the path would bring us into virgin forest, where, perhaps, no white man had ever been before. After about 5 M. (2 hrs.) we reach a small open camp, where meals are sometimes cooked by the guide. The next mile involves a good deal of rough clambering over rocks (no danger) and leads us to (1/2 hr.) Summit Rock, in the centre of Indian Pass (2040 ft.), a magni-

Baedeker's United States. 2nd Edit.
194 Route 25.

WALLFACE. Adirondack

ificant ravine between Mt. McIntyre and Mt. Wallface. In front of us the "View stretches over a sea of forest to (5 M.) Lake Henderson, 1300 ft. below us, while to the right the majestic rocky wall of "Wallface (3890 ft.) rises sheer to a height of 1300 ft., one of the grandest cliffs in the New World. The headwaters of the Hudson, flowing to the S., and the Ausable, flowing to the N., rise here so close to one another that they are said to mingle in time of flood. [Those who do not wish to go on by this route to the Blue Mt. country may turn back here, as this view commands the entire pass and the trail farther on is rough and neglected. Good walkers, however, may go on to Lake Henderson and return to Adirondack Lodge by the Lake Golden route (see p. 193), spending a night, if desired, at the Adirondack Club (see below).] Our path then begins to descend rapidly, at first over rocks. Farther on it is easier and more gradual. In 5 M. (2 hrs.) from Summit Rock we reach Lake Henderson (1875 ft.), the E. bank of which we follow to (2 M.; 1/4 hr.) the deserted hamlet of Adirondack or the Upper Iron Works, where accommodation may be procured in the house of the Adirondack Club (§ 3), which holds 40 sq. M. of the surrounding country as a game and fish preserve. Mt. Marcy (p. 193) may be ascended hence in 5-6 hrs. by a trail (12 M.) leading via Calamity Pond to Lake Colden (as described at p. 193) and then striking to the right and passing the Tear of the Clouds (p. 192; guide necessary). To the W. rises (4 M.) Mt. Santanoni (1645 ft.), and to the N.W. (8 M.) Mt. Seward (4355 ft.). The Iron Works were established in 1826 by a Mr. Henderson, who was killed by an accident at Calamity Pond (p. 193) in 1845, after which they were abandoned. — From the Adirondack Club a fair road leads to the S., passing Lake Sanford (1800 ft.; 3½ M. long), to (21 M.) Tahawus Post Office. Hence we may either drive to the right (W.) to (19 M.) the Sagamore, at Long Lake (p. 196), or to the left (E.) to (19 M.) Schroon River Post Office, 8 M. to the N. of Schroon Lake (see below).

d. From Saratoga to North Creek.

From Saratoga to North Creek, 57 M., Adirondack Railway in 2½ hrs. (§ 2; sleeping-cars from New York to North Creek without change § 2; from Saratoga to Blue Mt. Lake § 2½h).

Saratoga, see p. 197. The train runs to the N., passing Hilton Park (p. 199; r.). Near (17 M.) Corinth we reach (r.) the Hudson, the pretty upper valley of which we follow. At (22 M.) Hadley we cross the Sacandaga (bridge 96 ft. high).

Hadley is the station for Luzerne (Wayside Inn, § 3½; The Elms, § 3½), a pleasant summer-resort beyond the Hudson, on the pretty little Lake of Luzerne.

The wooded sugarloaf hill to the right, beyond Hadley, is known as the Potash Kettle (1735 ft.). The valley contracts, and the hills are prettily wooded. — 49 M. Riverside (815 ft.) is the starting-point of the stage-coaches for (7 M.) Schroon Lake (see below).

The coaches run viâ (6 M.) the Pottersville House (§ 2, D. 75c.) to the landing at the lower end of the lake, whence a small steamer plies to the hotels at its (9 M.) head (fare from Riverside § 2), touching at the Watch Rock Hotel (§ 3½), on the E. shore, the Taylor House (§ 2½—3), on the W. shore, and other points. — Schroon Lake (807 ft.), 10 M. long and 1-2 M. wide, is surrounded by rugged hills and affords good fishing. Near its head lies the village of Schroon Lake, with numerous hotels, the largest of which are the Leland House (§ 3—3½), the Adirondack Inn (§ 2½), the Ondawa (§ 2), and the Windsor (§ 1½). The road (stages) to the N. runs hence viâ (4 M.) the beautiful Paradox Lake and Schroon River Post Office (p. 188) to (22 M.) Euba Mills (p. 188), where it forks, one branch going to (6 M.) Keene Valley (p. 190), the other to (10 M.) Elizabethtown (p. 188).
Mountains. RAQUETTE LAKE. 25. Route. 195

57 M. North Creek (975 ft.; Adirondack Hotel, $2-3) is the terminus of the railway and the starting-point of the coaches to Blue Mt. Lake.

From North Creek to Blue Mountain Lake, 30 M., coach in 5-6 hrs. (fare $3). This is not a very attractive drive, especially as the road is bad and passes through an extensive 'burnt district'. — To the left rises Gore Mt. (3540 ft.). 5 M. North River Hotel (D. 75 c.). The road now quits the Hudson and ascends rapidly. Mt. Marcy (p. 193) may be seen in the distance to the right. We cross (17 M.) Indian River (poor inn). 18 M. Indian Lake Post Office (inn); 20 M. Cedar River (Hotel, $2). We cross the watershed (1760 ft.) between the Hudson and the Raquette. — 29 M. Blue Mountain Lake (see below).

Blue Mountain Lake (1800 ft.); 3 M. long and 2 M. wide, lies at the base of Blue Mt. (3760 ft.), which rises to the N.E.

The hotels on the lake are the Prospect House (500 beds; $4), on the S. shore; Blue Mt. Lake House ($3-4), at the E. end; Blue Mt. House (225 ft. above the lake; $2-2½), at the foot of Blue Mt. — Blue Mountain (3760 ft.) is ascended by a bridle-path in 2 hrs. — A road leads N. from Blue Mt. Lake, through the woods, to (10 M.) Long Lake Village (p. 196; stage in 3 hrs., fare $1½).

From Blue Mountain Lake to Raquette Lake, 12 M., steam launch in 3 hrs. (fare to Marion Carry 75 c., to the Hemlocks or the Antlers $1.25, to Forked Lake Carry $1.75). — The little steamer traverses Blue Mt. Lake, affording a good view of Blue Mt., passes through a small outlet into Eagle Lake (with Eagle's Nest, a solitary farm-house on the N. bank, formerly the home of 'Ned Buntline', the author), and then threads another connecting stream and reaches the narrow Utowana Lake, 2½ M. long. At the W. end of this lake we leave the boat and pass across a short carry (½ M.) to the Marion River, the intricate course of which we descend in another steam-launch to (6 M.) Raquette Lake, where we disembark at the Hemlocks or the Antlers.

*Raquette Lake (1775 ft.), the most irregularly shaped of the Adirondack lakes, with numerous promontories and bays, is about 10 M. long (5 M. in a direct line) and 1-2½ M. wide. It is surrounded by low hills, and the environs forests teem with game.

The following are the Lake Raquette hotels: *Antlers ($3-4), on the W. bank; The Hemlocks ($3-3½), near the Marion River Outlet; Sunset Camp, on Wood's Point, to the N. of The Hemlocks ($2); Blanchard's Wigwam ($2), W. bank. — The Private Camps round Raquette Lake are the most elaborate in the whole district, and *Camp Pine Knot (P. Huntington, Esq.), on the S. side of the promontory below the Marion River, is, perhaps, the most beautiful place of the kind in America, if not in the world. An introduction to the owner of one of these camps will double the pleasure of a visit to the lake.

To the S.W. of Raquette Lake stretches the Fulton Chain of Lakes (1680-1800 ft.), eight in number, a favourite resort of sportsmen and anglers. They are reached hence via the Brown Tract Inlet, and a small steamer plies on some of the lakes. They may be approached from Utica by the Adirondack & St. Lawrence Railway (p. 196). — Other parts of this W.
district of the Adirondacks are frequented by sportsmen; but the means
of locomotion are scanty and the accommodation somewhat primitive.

From Raquette Lake to Long Lake, 12 M., by small boat,
with guide. From the N. end of Raquette Lake we cross a short
carry (1/2 M.) to Forked Lake (1750 ft.; Forked Lake House, $2 1/2),
a picturesque sheet of water, with several private camps.

Those who are bound for the Tupper Lakes (p. 197) cross Forked Lake
(pron. ‘Forked’) to the N., pass through the outlet into (6 M.) Little Forked
Lake, and thence proceed, by boat (2 1/2 M.) and carries (5 1/2 M.), via Carry
Pond, Bottle Pond, and *Rock Pond, to (8 M.) Little Tupper Lake (p. 197).

We turn to the right (E.) on Forked Lake and from its E. end
descend through the picturesque Raquette River to (8 M.) Long Lake,
about 2 M. of the route being the ‘carries’ required to pass the
Buttermilk Falls and other unnavigable parts of the river.

Long Lake (1615 ft.), 14 M. long and 1/2-1 M. wide, is pretty,
though tamer than many of the other lakes. To the right and left
as we enter it are Mt. Sabattis and the Owl’s Head (2825 ft.). On
the right (E.) bank, about 2 M. below the head, is the Grove House
($2 1/2), a great hunting and fishing resort; and about 1 M. farther
on, on the same side, is Long Lake Village, with the Sagamore
House ($3-4) and Long Lake House ($2).

Nearly opposite Long Lake Village begins a boat and portage route
to Little Tupper Lake (p. 197) via Clear Pond, Little and Big Slim Ponds,
and Stony Pond. — Stage to Blue M. Lake, see p. 195.

Farther on Long Lake expands. At its lower end (W. bank) is
the small Island House ($2). To the right rises Mt. Seward (p. 194).
From Long Lake to Upper Saranac Lake, see p. 186.

e. From Utica to Malone via the Tupper and Saranac Lakes.

187 M. Adirondack and St. Lawrence Railway (N. Y. C. R. R. system)
in 6 hrs. (fare $5; parlor-car $1). Through-carriages run from New York
to all points in the Adirondacks reached by this railway (to Tupper Lake
Junction in 10 hrs., $8.10; to Saranac Inn in 10 1/2 hrs., $8.50; to Malone
in 12 hrs., $9; parlor-car or sleeper $2). The line traverses the whole
of the Adirondack Wilderness from S. to N.

Utica (Rail. Restaurant), see p. 206. — The line runs towards
the N.W. 13 M. Trenton Falls, see p. 206. We cross the West
Canada Creek. 21 M. Remsen, see p. 206. At (43 M.) McKeever we
cross the Moose River. — 52 M. Fulton Chain is 11/4 M. from Old
Forge (Forge Ho., $3-3 1/2), whence a small steamer ascends the
Fulton Lakes (see p. 195) to the head of Fourth Lake (Cedar Isle
Camp, $2 1/2-3; Rocky Point Inn, $3-4; Hess Inn, $2-4; Eagle
Bay Hotel, $3; Bald Mt. Ho., on Third Lake, $3). Thence we may
ascend by small boat and ‘carries’ to (3-4 hrs.) Raquette Lake
(p. 195). — 63 M. Big Moose; 81 1/2 M. Nehasane Park (private
station of Dr. Webb); 84 M. Boy Lake. From (88 1/2 M.) Long
Lake West stages run to (5 M.) Little Tupper Lake (p. 197) and
(18 M.) Long Lake (see above). — 100 M. Childwold, the station for
(5 M.; coach $1) the Childwold Park House ($3-4), on Lake
Massawepie.
Mountains. MALONE. 25. Route. 197

107 1/2 M. Tupper Lake Junction is 1 1/2 M. (stage) from Tupper Lake Village (Altamont, $2 1/2-5), the terminus of the Northern Adirondack R. R. (see below), situated on Raquette Pond, 2 M. below the foot of Tupper Lake (see below). In summer a steamer plies hence to the head of the lake, calling at the various hotels. The station is 8 M. from Wawbeek Lodge (p. 186), on Upper Saranac Lake.

Tupper Lake (1555 ft.), 7 M. long and 3 M. wide, is surrounded by low but wild hills and is much frequented by sportsmen. It contains several islands. On the E. bank, near the N. end, are the Mt. Morris Ho. and the Redside Ho. (Moody's; $2). — From the head of Tupper Lake we may proceed by boat and portages to (4 1/4 M.) Round Pond, cross this (2 1/2 M.) by boat, and carry to (1 M.) Little Tupper Lake. — Little Tupper Lake (1730 ft.) is 4 M. long and 1 M. wide. — From Little Tupper Lake to Long Lake, see p. 190; to Raquette Lake, see p. 195.

The line now passes several small lakes. — 122 M. Saranac Inn Station, 13/4 M. from Saranac Inn (p. 186; omn. 50 c.). From (125 1/2 M.) Lake Clear (1 1/2 M. from Lake Clear Ho., p. 186) a branch-line runs to the right to (5 M.) Saranac Lake and (15 M.) Lake Placid (see p. 186). To the left lies Clear Lake (p. 186). — 130 M. Paul Smith's is 4 M. from the St. Regis Lake House (see p. 185; stage). — To the left, at (133 M.) Rainbow Lake Station (Rainbow Lake Hotel, $2-3), we see Rainbow Lake (3 M. long; trout). 142 M. Loon Lake Station is 3 1/2 M. from Loon Lake House (p. 185; stage). The line now runs parallel to the Chateaugay Railway (p. 185) for some distance and then skirts the Salmon River. 154 M. Mountain View (hotel); 156 1/2 M. Owl's Head.

167 M. Malone (Howard, $2-3), an industrial village with (1890) 4896 inhab., is a station on the Central Vermont Railway from Rouse's Point to Ogdensburg (see p. 207). Hence to Montreal, see p. 161.

The Tupper Lakes and the St. Regis Lake House may also be reached by the Northern Adirondack R. R., starting from Moira (p. 207), another station on the Central Vermont line to Ogdensburg, 14 M. to the W. of Malone.

Railway Stations. Delaware and Hudson Station, Division St., near the back of the U. S. Hotel, for New York, Albany, the Adirondacks, etc.; Mt. McGregor Railway Station, Catherine St.; Fitzhugh R. R. Station, Henry St., for Saratoga Lake, Boston, etc.

Hotels. Grand Union, occupying the square between Broadway, Congress, Federal, and Washington Sts., and enclosing a large tree-shaded court, with 2400 ft. of street-front and 2000 beds, $5; United States Hotel, Broadway, cor. Division St., an enormous structure 300 yds. long, with nearly 2000 beds, $5; Congress Hall, Broadway, between Spring St. and East Congress St., with 1000 beds, $3-4; Windsor, Broadway, cor. E. William St., a fashionable house, from $4; Clarendon, Broadway, cor. William St., frequented by Southerners, $4; "Worden, Broadway, cor. Division St., $3, open all the year round; American-Adelphi, next door to the U. S. Hotel, $3-3 1/2; Columbia, near the Clarendon, from $2 1/2; Excelsior Spring Hotel, Excelsior Park, $3; Huestis ($2 1/2), Alderman ($2 1/2), and many other small hotels and boarding-houses, at all prices. — Dr. Strong's Sanitarium, Circular St., with good baths, $2 3/4.
Horse Races in July and Aug. at the Race Course, Union Avenue.—
*Floral Fete,* held in September.

Post Office, in the Arcade, opposite the U. S. Hotel.

Saratoga Springs (300 ft.), the most noted inland watering-place in the United States and in some respects the most remarkable in the world, is situated on a level and monotonous plateau near the E. edge of the State of New York, 180 M. to the N. of the city of New York and 12 M. to the W. of the Hudson. The saline mineral springs which have made the fame of the place are about 30 in number (see below). The permanent population of the town is about 12,000, but in the height of the season (July and Aug.) this is often more than quadrupled.

The name is supposed to be derived from Indian words meaning 'place of the swift water'. The springs were known to the Indians for centuries, and Jacques Cartier heard of their virtues in 1535. The first white man to use them is believed to have been Sir William Johnson (p. 205), the adopted sachem of the Mohawks, who was brought hither by these Indians in 1767 and recovered his health by drinking the High Rock Spring (p. 199). Hotels and boarding-houses began to be erected early in the present century, and since then the progress of the place has been very rapid, in spite of its want of fine scenery or commercial advantages. No more effective picture of the wealth of the United States can be seen anywhere than at Saratoga during July or Aug., though Newport (p. 76) and Lenox (p. 153) show a greater refinement of luxury. Saratoga is also a popular place for 'conventions' of politicians, lawyers, bankers, etc. — Large quantities of the water are exported to all parts of the United States and Europe. — The battle of Saratoga (Oct., 1777), resulting in the surrender of Sir John Burgoyne to the Americans, was fought some distance to the S. of the Springs (see p. 200).

The Hotels of Saratoga afford accommodation for about 20,000 visitors. The two at the head of the list are among the largest, if not the very largest, hotels in the world; and a visit to their enormous ball-rooms, dining-rooms, and piazzas should not be omitted. The dining-room of the Grand Union is 275 ft. long.

Most of the Springs lie in a shallow valley stretching to the N.E. from Broadway (see p. 199), and rise through a fault in the underlying rock (slate, limestone, and sandstone), the strata being tilted above those to the N. Some are chalybeate, others contain iodine or sulphur, and all are strongly impregnated with carbonic acid gas. Their temperature is usually 46-50° and most of them are pleasant to drink. They are both tonic and cathartic in working, and are considered efficacious in dyspepsia, liver complaints, calculus, rheumatism, etc. They should not be too freely indulged in without medical advice.

Broadway, the principal street of Saratoga, containing the chief hotels, the best shops, and the finest private residences, runs N. and S. for a distance of 3 M. and is shaded by fine elms. Most of the springs are in or near it. Proceeding to the right (S.) from the U. S. Hotel we soon reach, to the left, Spring St., just to the N. of Congress Hall (p. 197), with the Hathorn Spring, a saline spring containing bicarbonate of lithia. To the S. of Congress Hall is Congress Spring Park, a prettily laid out little park (adm. 5c.), with a small deer-paddock. Near the entrance are Congress Spring (saline, with magnesia; resembling the Kissingen Rakoczy) and Columbian Spring (chalybeate), the former the most widely known of the Saratoga waters and extensively used as a cathartic in
bilious disorders. A band plays in the park thrice daily, and Sunday and other concerts are given. — Behind Congress Hall is the Hamilton Spring (similar to the Columbian), and a little to the N., in Philadelphia St., are the handsome Saratoga Baths (Turkish, Russian, and other baths) and the Patterson Spring (cathartic). Continuing to follow Broadway towards the S., we reach (left) the Convention Hall, erected for the conventions mentioned at p. 198 (5000 seats). Adjacent is the *Pompeia (adm. 50 c.), a unique reproduction of the House of Pansa at Pompeii (destroyed A.D. 79), erected by Mr. Franklin W. Smith (comp. p. 402).

The Art Gallery annexed to the Pompeia contains a painting of Rome in the time of Constantine (50 ft. × 7 ft.) and many illustrations of art and history.

Washington Spring rises opposite, in the court of the Clarendon Hotel. — Ballston Avenue, a little farther on, leads to the right, passing an Indian Camp (baskets, etc., for sale), to (1¼ M.) Geyser Park and Lake, with the Geyser or Spouting Spring (rising from a depth of 132 ft.). The Saratoga Vicky, the Saratoga Kissingen (both alkaline), the *Champion Spouting Spring (throwing its water to a height of 30 ft.), the Carlsbad Spring (saline and cathartic), and the Lafayette Spring (cathartic) are in the same neighbourhood.

Following North Broadway to the left (N.) from the U. S. Hotel, we pass the Town Hall (right) and reach a part of the street lined with handsome private residences. At (3/4 M.) Third Street we turn to the left and reach the entrance to *Woodlawn Park, a fine expanse of 1200 acres, belonging to Judge Hilton and containing his house, but freely open to the public.

The park is traversed by walks and drives in all directions. The trimmer part near the houses, ornamented with dubious statuary, is less attractive than the wilder part, to the N. Views are obtained of the Catskills (S.), the Green Mts. (E.), and the foothills of the Adirondacks (N.). — We may continue our walk through the park to (2½ M.) Glen Mitchell, with a Roman Catholic college, and return by Broadway.

Returning along Broadway, we turn to the left at Rock St., cross the railway, and reach a group of springs in Spring Avenue.

The High Rock Spring, the earliest known (comp. p. 198), bubbles from a conical rock, 3½ ft. high, formed by its deposits. Below is the Star Spring. To the S. are the Selter Spring, the Magnetic Spring (baths), the Flat Rock or Imperial Spring (behind the Town Hall), the Pavilion Spring, and the Royal Spring (600 ft. deep). To the N. are the Empire Spring, the Red Spring and Bath House (with a large proportion of iron; useful for affections of the skin), and the Saratoga 'A' Spring.

Following Spring Avenue towards the N.E., we reach (3¼ M.) the Excelsior Spring Hotel (p. 197; left), opposite which is the entrance to the Excelsior Spring and Bottling Works, prettily situated in Excelsior Park, near which is the Union Spring. — About 1¼ M. to the E. are the White Sulphur Spring (baths) and Eureka Spring.
— We may now return towards Broadway by one of the paths through the pretty patch of woodland to the S.W. of the Excelsior Spring, emerging (10 min.) upon East Avenue. Here we turn to the left
and then follow Lake Avenue (right), past the handsome Armoury, the Academy, and the Fitchburg Railroad Station, to (6 min.) Broadway.

Environ. The favourite short Drive from Saratoga is that to 'Saratoga Lake, 4 M. to the S.E. We follow Union Avenue, which leads to the left from Broadway at Congress Hall. On the left we pass another Indian Camp and on the right the Racecourse, one of the best tracks in the United States, and Yaddo, the residence of Mr. Spencer Trask, to the beautiful grounds of which visitors are admitted. The lake, on which small steamers ply, is 7 M. long and is frequented for boating and fishing. Near its N. end is the 'Lake House (formerly Moon'), a favourite resort for game and fish dinners and for 'Saratoga Chips' (fried potatoes; sold in paper packets or served with meals). Riley's, on Little Lake, 1/4 M. to the S.W., is a similar resort. An electric tramway (return-fare 20 c.) runs from the Grand Union Hotel to Saratoga Lake. — Gridley's Ponds, a fishing-preserve near the racecourse, are much frequented by ladies and others (fee $.1 per pound of trout caught). — Ballston Spa (7 M.; p. 159), Round Lake (12 M.), and Lake Luzerne (see p. 194; 20 M.) may be reached by road or railway; and longer excursions may be made to the Adirondacks (p. 183), Lake George (see below), Lake Champlain (p. 202), etc.

A branch of the Fitchburg Railroad runs to (12 M.) Schuylerville, whence the Battlefield of Saratoga (p. 188), with its national monument, may be visited. Memorial tablets mark the chief points of the battle-ground.

From Saratoga to Mt. McGregor, 10 M., railway in 3/4 hr. (return-fare $.1). — The top of the hill (1200 ft.) commands an exquisite View. The Balmoral Hotel, burned down in Dec., 1897, had not been rebuilt when this work went to press. The cottage in which Gen. Ulysses Grant died in 1885, near the site of the hotel, is now State property and is shown to the public.

27. Lake George and Lake Champlain.

Lake George (325 ft.), a picturesque sheet of water in the State of New York, to the S.E. of the Adirondack Mts. (p. 183), is 33 M. long from N. to S. and 3 1/4 - 3 M. wide. It is flanked on both sides by wooded mountains, sometimes descending to the water in bold crags, and is dotted with pretty islands (220 in all). It is sometimes called, perhaps with more zeal than discretion, the Como, the Windermere, or the Loch Lomond of America. At the N. end it discharges into Lake Champlain, 245 ft. below it, from which it is separated by a ridge 4 M. wide.

Lake George has long been a favourite summer-resort, and there are many hotels, large and small, on its banks, while camp-life is also in high favour. It is usually approached by the route to Caldwell described at p. 159; and a steamer plies twice daily thence in 2 1/2 - 3 hrs. to Baldwin, at the foot of the lake (fare $1.50; restaurant on board, meals 75 c.). Fair fishing for lake-trout, perch, and bass is obtained in the lake (boat with fisherman $3 a day). — See S. R. Stoddard's 'Lake George and Lake Champlain' (25 c.); and comp. Francis Parkman's 'Historic Handbook of the Northern Tour'.

Lake George was first seen by white men in 1642, when three Frenchmen, including the Jesuit Jogues, were brought thither as captives of the Iroquois. Father Jogues named it the Lac du Saint Sacrement; the Indian name was Audiatarootie ('place where the lake closes'), and Cooper tried in vain to attach to it the romantic title of Lake Horican ('silvery waters'). The present name was given to it in honour of George II. The position of Lake George on the highway between the English colonies and Canada gave it a prominent rôle in the Anglo-French
struggles of the 17-18th cent., and more than one battle has been fought on or near its waters (comp. below and p. 202). Its associations with the romances of Cooper lend it an additional interest.

Caldwell (Fort William Henry Hotel, a large house with 800 beds, $4-5; Lake House, $3 1/2-4; Central Hotel, Carpenter, Arlington, $2), the terminus of the railway mentioned at p. 159, is a small village, beautifully situated at the head (S. end) of Lake George, and much frequented as a summer-resort (good boating and fishing). It lies at the E. base of Prospect Mt. (2020 ft.; Prospect Mt. Ho., with restaurant, $3 1/2), the top of which is reached by an inclined railway (train every 1/2 hr.; fare 50 c.). To the E. rises French Mt. (1520 ft.).

The Fort William Henry Hotel stands near the site of the old Fort William Henry, built by the English in 1755 to command the head of the lake. Two years later it was captured by General Montcalm at the head of 8000 men; and the massacre of 1500 helpless men, women, and children by his Indian allies has left an indelible stain on the memory of that gallant Frenchman (see the descriptions in Cooper's 'Last of the Mohicans' and in Parkman). A few relics of the fort subsist. — About 1/2 M. to the E. are the picturesque ruins of Fort George, dating from 1759. — It was at this spot that the army of Gen. Abercrombie started in a fleet of boats for its disastrous expedition against Fort Ticonderoga (1758; see Cooper's 'Satanstoe'), and a year later Lord Amherst set out hence with the army that finally expelled the French from Lakes George and Champlain.

The steamer down the lake leaves Caldwell after touching at various hotel-landings and crosses to the Crosbyside Hotel ($2-2 1/2), at the foot of French Mt. On the same side, 1 M. to the N., is St. Mary's Convent, the summer-retreat of the Paulist Fathers of New York. We pass Tea Island, Diamond Island, and Long Island. To the right are Kataskill Bay and Pilot Mt., at the foot of which are some small hotels frequented by anglers ($ 1/2-2 per day). Opposite is the Marion House ($3-4).

8 1/3 M. Buck Mt. (2335 ft.). — The steamer steers between Dome Island (r.), in the widest part of the lake, and Rectuse Island (l.), connected by a bridge with the tiny Sloop Island.

9 1/2 M. (left). Bolton (*Sagamore, situated on an island connected with the mainland by a bridge, from $4; *Mohican Ho., $3; Bolton Ho., Lake View Ho., $2 1/2-3), the largest village on the lake after Caldwell, is a good centre for excursions. Black Mt. (see below) stands out well to the E.N.E. Above Bolton extends Ganouskie or North West Bay, 5 M. long, formed by a tongue of land jutting out southwardly into the middle of the lake.

11-12 M. (r.) Shelving Rock Mt. (1135 ft.; Hundred Island House, Pearl Point Ho., $2 1/2-3), descending abruptly into the lake.

Off the shore is Fourteen Mile Island (The Kenesaw, $2 1/2), at the entrance to the *Narrows, between Tongue Mt., Three Mile Mt., and Five Mile Mt. (2260 ft.) to the left, and Mt. Erebos and the sombre Black Mt. (2660 ft.; *View) to the right. The Narrows are crowded with islands, through which the steamboat holds a devious course.
13 M. (r.) Paradise Bay, a favourite goal of small excursion steamers.
14 M. (r.) Black Mt. Point (to top of Black Mt., 11/2-21/2 hrs.).
17 M. Harbor Islands, where a body of 400 English were surprised by the Indians in 1757 and nearly all killed or captured.
18 M. (l.) Deer’s Leap Mt. — (r.) Hulett’s Landing (Hotel, $2½), whence Black Mt. is ascended from the N.
18½ M. (l.) Bloomer Mt., forming, with Deer’s Leap Mt., the Twin Mts., as seen from the N.
19 M. (l.) *Sabbath Day Point, a fertile cape at the outlet of the Narrows, was the scene of a battle between the Colonists and the Indians and French in 1756 and between the Americans and the Indians in 1776, in both of which the first-named won. Generals Abercrombie and Amherst (see p. 201) both landed here. Good view up and down the lake.
21 M. (l.) Silver Bay (Silver Bay Ho., $2½).
26 M. (l.) Hague (Phoenix Hotel, Uncas, $2; Hillside Ho., Rising Ho., Trout Ho., $1½-2), a favourite fishing-resort, backed by the ridge of the Three Brothers. — The lake again contracts.
28 M. (r.) Anthony’s Nose, rising abruptly from the water’s edge.
30 M. (l.) Rogers’ Slide (1080 ft.) and *Rogers’ Rock Hotel ($3).
32 M. (l.) Baldwin (Baldwin Ho., $2), where we leave the steamer for the train. Lord Howe’s Point, just to the N., was the landing-place of the English army in 1758. Offshore lies Prisoners’ Island, where the French are said to have confined their captives.

From Baldwin to Fort Ticonderoga, 5 M., railway in 11/2 hr. (fare 75 c.). This short railway, connecting Lake George with Lake Champlain, descends rapidly (245 ft.) round the slope of Mt. Defiance (p. 203). At the village of Ticonderoga (Burleigh Ho., $2½-3½), about halfway, the outlet of Lake George forms a picturesque waterfall (left). — Fort Ticonderoga, see p. 203.

*Lake Champlain (100 ft.), 120 M. in length, 1/4-12 M. in width, and 50-400 ft. deep, lies between New York on the W. and Vermont on the E. and extends on the N. for a short way into Canada. Its shore-line is indented by numerous bays and inlets, and there are about fifty islands, one of which is 30 sq. M. in extent. The Vermont shore is generally level and fertile, with the Green Mts. in the background, while the W. shore is broken and diversified by the foothills of the Adirondacks. Besides the city of Burlington (p. 127) there are numerous towns and villages on its banks. A considerable navigation is carried on on its waters, and it communicates with the Hudson by a canal and with the St. Lawrence by the river Richelieu.

The name of the lake recalls Samuel de Champlain, Governor of Canada, who discovered it in 1609. Its Indian names were *Canadiari Quaranti (‘gate of the land’) and *Petouboque (‘waters that lie between’). Like Lake George, it was for a century and a half the scene of repeated conflicts between the English and the French; and in 1759 it finally passed
LAKE CHAMPLAIN. 27. Route. 203

into the possession of the former. The most interesting contests are mentioned below in connection with their scenes of action.

Steamboats (good restaurants on board) ply regularly from Fort Ticonderoga (see below) to Plattsburg (p. 159; 5½ hrs.), calling at all important intermediate points; from Westport (p. 183) to North Hero (p. 204; 5½ hrs.); and from Westport to Vergennes (p. 121; woman-pilot). — For the railways along its banks, see RR. 15, 20.

The S. extremity of Lake Champlain, from Whitehall (p. 159) to (24 M.) Fort Ticonderoga, is so narrow as to resemble a river rather than a lake, and has been sufficiently described in R. 20 b. Steamboat-navigation begins at Fort Ticonderoga.

Fort Ticonderoga (Fort Ticonderoga Hotel, near the old fort, $2) is a railway-station and steamboat-landing on the W. side of Lake Champlain, at the foot of Mt. Defiance (800 ft.; *View). The village of Ticonderoga (p. 202) lies 2 M. inland, while the ruins of Fort Ticonderoga (see below) crown a high bluff 1½ M. to the N.

Fort Carillon, the first regular fortification here, was built by the French in 1755. In 1758 General Abercrombie (see p. 201) made an unsuccessful attempt to capture it, and had to retreat up Lake George, with the loss of Lord Howe and 2000 men. The following year, however, the French evacuated it on the approach of Lord Amherst (see p. 201), and the English considerably strengthened and enlarged it, changing its name to Fort Ticonderoga. In 1775 the fort was taken by Green Mountain Boys led by Col. Ethan Allen of Vermont, who surprised the unsuspecting commandant in his bed and called on him to surrender 'in the name of the Great Jehovah and the Continental Congress'. Gen. Burgoyne, however, recaptured it in 1777 with the aid of a battery posted on the top of Mt. Defiance. The fort was dismantled in 1780 and allowed to fall into decay. It long formed a quarry for the buildings of the neighbourhood; but its scanty remains, from which a fine view is obtained, are now preserved as a national memorial.

At Fort Ticonderoga the lake is barely ½ M. wide, and it does not widen materially till beyond Crown Point. The Steamer makes its first stop at Larrabee's Point (right) and then crosses the lake to (10 M.) the landing of Crown Point (left), 1 M. to the E. of the village. A short railway runs to (13 M.) Hammondville, connecting by stage with Schroon Lake (p. 194). About 5½ M. farther on we thread the narrows between Chimney Point, on the right, and *Crown Point, on the left, the latter surmounted by a lighthouse and the ramparts of the old fort.

The French Fort Frederick, erected on this point in 1731, was abandoned at the same time as Fort Ticonderoga (see above). The English constructed a much larger and more formidable fortification, which, like Ft. Ticonderoga, was taken by Ethan Allen in 1775 and by Burgoyne in 1777.

Beyond the narrows the lake widens to 2 M. Behind Crown Point is Bulwagga Bay, the shore of which is, perhaps, the point where Champlain fought with the Iroquois in 1609.

19 M. (l.) Fort Henry (Lee House, $2–2½), a prettily situated village, whence a railroad runs to (7 M.) Mineville, 19 M. from Schroon River Post Office (p. 194). A fine view of Mt. Dix (p. 192) and other Adirondack peaks is now obtained to the left.

30 M. (l.) Westport, in North West Bay, one of the approaches to the Adirondacks (see p. 188). — Farther on *Split Rock Mt.
(1035 ft.; lighthouse) rises to the left, while opposite is the mouth of the Otter Creek, up which a small steamer plies to (8 M.) Vergennes (p. 127).

40 M. (l.) Essex. The steamer now soon enters the widest part of the lake and steers to the N.E., passing the Four Brothers and Juniper Island (lighthouse). To the left lies Willsboro Point.

54 M. (r.) Burlington, see p. 127. This beautiful city is seen to great advantage from the lake. — From Burlington the steamer runs nearly straight across the lake to —

64 M. (l.) Fort Kent (Trembleau Hall, $21/2; Lake Side Ho., $2; *Douglass, on Douglass Bay, 2 M. to the S., $21/2), the station for the *Ausable Chasm (see p. 187). The Ausable River enters the lake 21/2 M. farther on.

70 M. (l.) Port Jackson, on the narrow channel between the mainland and Valcour Island, where a hotly contested naval battle took place between Arnold and Pringle in 1776, resulting in the destruction of the American fleet.

Beyond this point the lake is divided into two branches by the large islands of Grand Isle or South Hero (30 sq. M.) and North Hero and the promontory of Alburgh. Our steamer follows the left (W.) arm. On Bluff Point (l.), 31/2 M. beyond Port Jackson, stands the magnificently situated *Hotel Champlain (200 ft.; $5), one of the most luxurious hotels in the United States, commanding fine views of the Adirondacks, Lake Champlain, and the Green Mts. Its grounds, 450 acres in extent, include a good golf-course (9 holes).

77 M. (l.) Plattsburg (see p. 159), in Cumberland Bay, one of the main gateways to the Adirondacks.

In 1814 Cumberland Bay was the scene of the Battle of Plattsburg, in which Commodore Macdonough defeated the British fleet under Commodore Downie. At the same time Gen. Macomb, in command of the land-forces, repelled Sir George Prevost’s attempt to capture Plattsburg.

Plattsburg is the terminus of the Lake Champlain Transportation Co.’s steamer from Fort Ticonderoga, but the Westport steamer (comp. p. 203) ascends to North Hero, touching at various landings on the islands. The fishing at this end of the lake is excellent, and accommodation may be had at various small hotels, farm-houses, and camps.

28. From New York to Buffalo and Niagara Falls.

a. Via New York Central and Hudson River Railway.

462 M. RAILWAY to (440 M.) Buffalo in 8½-13 hrs. (fare $9.25; sleeper $2; parlor-car $2); to (462 M.; 446 M. by direct route, see p. 210) Niagara Falls in 9-16½ hrs. (fares the same). Seats to the left. The *Empire State Express’, leaving New York at 8.30 a.m., runs at the rate of over 50 M. an hour, including stops.

From New York to (143 M.) Albany, see p. 165. The train now turns to the left (W.) and leaves the Hudson. 146 M. West Albany.

160 M. Schenectady (245 ft.; Edison, $21/2-4; Vendome, $2-21/2), a quaint old town of Dutch foundation, situated on the right bank
LITTLE FALLS. 28. Route. 205

of the Mohawk, with various manufactories and a trade in broom-
corn, hops, and butter. Pop. (1890) 19,902. It was the scene of
two horrible massacres in the Colonial wars. Union College (1795)
stands to the E. of the city. At Schenectady we intersect the Del.

The train now crosses the river and the Erie Canal (Union Col-
lege to the right) and ascends the smiling pastoral *Valley of the
Mohawk, formerly the stamping-ground of the Indian tribe of that
name (see below). Evidences of rustic comfort and fertility abound
on every side. The Catskills are visible in the distance to the S.,
and the outliers of the Adirondacks appear to the N. Broom-corn
is one of the characteristic crops, the brooms being made mainly by
the Shakers, who have several settlements in the lower valley.

176 M. Amsterdam (280 ft.), a city of 17,336 inhab., with various
industries; 182 M. Tribe's Hill, a former meeting-place of the In-
dians. — From (187 M.) Fonda a branch runs to (26 M.) Northville.

Johnstown (Sir William Johnson Hotel, §2), on this railway, 3 M. to
the N., was the residence of Sir William Johnson (d. 1774; comp. p. 198),
one of the pioneers of the valley, who acquired great influence with the
Mohawks and was made one of their sachems. He was created a baronet
for his victory at Lake George (see p. 159), and received a large grant of
land here for his subsequent services. He was the father of 100 children
by his Indian and white mistresses, one of whom was a sister of the famous
Mohawk chief, Joseph Brant. His strong stone mansion still stands.

The Mohawks were, perhaps, the best known of the Indian tribes which
formed the confederation known as the Five Nations, occupying the great
Lake District of New York. The other members of the league, named
from E. to W., were the Oneidas, Onondagas, Cayugas, and Senecas. The
Tuscaroras from Carolina were afterwards admitted to the league, which
then took the name of the Six Nations. The confederacy had about 15,000
members, and perhaps 10-12,000 still exist, the majority in Canada, the others
in reservations in New York, where they live as peaceful farmers.

From (198 M.) Palatine Bridge (305 ft.) coaches run to (14 M.)
Sharon Springs (see p. 175).

217 M. Little Falls (375 ft.; Girvan Ho., §2-2½), a small
manufacturing town with 8783 inhab., romantically situated in a
narrow *Gorge cut by the Mohawk through a spur of the Adiron-
dacks. The river, the N. Y. C. and West Shore railways, and the
Erie Canal can barely make their way through the pass side by
side. The Mohawk here descends 45 ft. in ½ M., forming a series
of pretty little falls, and the houses cling picturesquely to the steep
rocky sides of the defile. This gorge affords an excellent opportunity
of studying the crystalline rocks of the Laurentian formation, part
of the oldest dry land on the face of the globe. Richfield Springs
(p. 206) is 12 M. to the S. — Farther on we cross the Canada
Creek and reach (224 M.) Herkimer (Palmer Ho., Waverley, §2-2½;
4000 inhab.), where connection is made with the Adiron-
dack Division (see p. 190), though the principal through-trains
run via Utica (comp. p. 196).

Beyond (226 M.) Ilion (400 ft.), a pretty village to the left,
with an important small-arms factory, the train crosses the river and canal.

238 M. Utica (410 ft.; Butterfield, $4-6; Baggs, $3-4; St. James, $2-3; Rail. Restaurant), a prosperous town and headquarters of the American cheese trade, with 44,007 inhab., lies on the S. bank of the Mohawk, on the site of Fort Schuyler (1756). To the W. is the State Lunatic Asylum. Genesee Street is a handsome thoroughfare. A tablet commemorates the visit of Lafayette in 1825.

From Utica to Malone (Adirondacks), see R. 25e.

From Utica to Ogdensburg, 134 M., railway in 5½-6 hrs. (fare $4.21). This line runs to the N., connecting Utica with Lake Ontario and the St. Lawrence, and forming part of a favourite through-route from New York to the Thousand Islands (p. 225). — The train crosses the Mohawk. 17 M. Trenton Falls Station (840 ft.; Moore's Hotel, $2-3; Kauyahoora, $2), is about ½ M. from the *Trenton Falls, a scene of mingled grandeur and beauty, which is by no means so well or widely known as it deserves. The West Canada or Kahnata ('amber-water') Creek, the Kauyahoora ('leaping water') of the Indians, here forms a highly picturesque ravine, with abrupt rocky sides, through which, within 2 M., the water descends 310 ft. in a charming series of five main falls and innumerable rapids. The stratification of the limestone rocks is very clearly defined, exposing the geological and the fossil organic remains to full view; and an abundance of interesting fossils, including innumerable trilobites, have been found. The name of the Trenton formation is taken from this place. We descend (see 25c.) to the floor of the ravine by a staircase near Moore's Hotel and walk up past the singular *Sherman Falls (35 ft.), the *High Falls (80 ft.), the *Mill Dam Falls (15 ft.), the rocky amphitheatre called the Alhambra, the curious formation named the Rocky Heart, and the Prospect Falls (20 ft.). We may then return to the hotel (2½ M.) by a path along the top of the cliffs, affording fine *Views of the chasm. — At (24 M.) Remsen we part company with the line to Malone (see p. 196). Beyond (35 M.) Boonville we ascend the valley of the Black River. 45 M. Lyons Falls (645 ft.; falls to the right, 70 ft. high); 55 M. Lowville (Rail. Restaurant). — 74 M. Carthage (740 ft.) is the junction of lines E. to Benson Mines in the Adirondacks (near Cranberry Lake) and W. to Watertown and (30 M.) Sacket's Harbor (455 ft.), on Lake Ontario. — At (87 M.) Philadelphia we cross the line from Rome (p. 207) to Massena Springs (p. 227). 92 M. Theresa Junction, for the line to (16 M.) Clayton (p. 226), on the St. Lawrence. — 123 M. Morristown. — 134 M. Ogdensburg (250 ft.), see p. 226.

From Utica to Binghamton, 95 M., Delaware, Lackawanna & Western R. R. in 3-3½ hrs. (fares $2.85). — From (13 M.) Richfield Junction a branch-line runs to (12 M.) Richfield Springs (see below; through-cars from New York). — 95 M. Binghamton, see p. 216.

*Richfield Springs (1700 ft.; Earlton, $4; Tuller Ho., $2-3; Tinni-cliff Cottage; Kendalwood, etc.), a group of hotels and cottages, 1 M. from the head of the pretty little Candarago Lake (boating and fishing), is much frequented both for its picturesque scenery and for its sulphur springs. The latter, 17 in number, are especially efficacious in cutaneous disorders, and are used both for drinking and bathing. The "Bath House, completed in 1890, is excellently fitted up and includes a swimming-basin. Among the favourite drives are those round Candarago Lake (12 M.), to (5 M.) Mt. Otego, to (3 M.) Allen's Lake, to (13 M.) Cooperstown (p. 175), and to (14 M.) Cherry Valley (p. 175). Coaches run regularly to (7 M.) the head of Otego Lake (p. 175), connecting with the steamer to Cooperstown. Horseback exercise is, perhaps, the favourite amusement here, and the surrounding country is admirably adapted for it.)

Beyond (244½ M.) Oriskany (420 ft.) a notice-board to the left calls attention to the battle-ground of Aug., 1777, when Gen. Her-
kimer was defeated and slain by the Indians. An obelisk on the hill marks the ground. — We cross the river and the canal.

282 M. Rome (Stanwix Hall, Arlington, $2-3), a town of 14,991 inhab., with cheese-factories and rolling-mills, occupies the site of the Revolutionary Fort Stanwix. It is an important railway-junction, and the Erie Canal is joined here by the Black River Canal from Lyons Falls (p. 206).

From Rome the Rome, Waterstown, & Ogdensburg R. R. runs to the N. to (75 M.) Waterstown, (141 M.) Ogdensburg (p. 226), and (160 M.) Massena Springs (p. 227), connecting at (147 M.) Norwood with the Central Vermont line to Moira (p. 197), Malone (p. 197), and Rouse's Point (p. 160)

285 M. Oneida (Madison Ho., Allen Ho., $2).

About 6 M. to the N.W. is Oneida Lake, 28 M. long and 5-6 M. wide, in a rich dairy region. The Oneida Community, a communitarian society founded by J. H. Noyes in 1847, lies 3 M. from the village, but is now simply a business-corporation. To the S. is the Oneida Indian Reservation.

Beyond (270 M.) Canastota (425 ft.) we cross the Erie Canal. 276 M. Chittenango (Yates Ho., $2), at the entrance of the narrow valley through which Casenovia Lake drains into Lake Oneida. — 283 M. Manlius. The train now enters Syracuse, passing along the main street, without fence or barrier.

291 M. Syracuse (400 ft.; The Yates, $4-5, R. from $1; Vanderbilt Hotel, Globe, $2½-4; Rail. Restaurant), a thriving industrial city of (1890) 88,143 inhab., situated at the S. end of Onondaga Lake (365 ft.; 6 M. long, 1½ M. wide), owes a great part of its wealth to the salt-springs in the marshes bordering the lake, which have been exploited since 1650 and now yield about 3 million bushels annually. A visit to the evaporating houses, brine-conduits (‘salt logs’), and pumping-houses is interesting. The Erie Canal runs through the middle of the town, a little to the N. of the railway, and affords scenes of almost Venetian effect by moonlight.

Among the most noteworthy buildings are the Town Hall, Washington St., in the Richardsonian style; the Post Office, in Fayette St., a pleasing relief to the stereotyped Mansard-roofed Government buildings; the *Syracuse Savings Bank, on the Canal; St. Paul's Cathedral; St. John's Cathedral (R. C.); the First Presbyterian Church; the State Hospital for Feebleminded Children; and the Court House. The Museum of Fine Arts was opened in 1897. In the S.E. part of the town are the handsome buildings of Syracuse University (1100 students), including the Crouse Memorial Hall for Women, the Hall of Languages, the Library (56,000 vols., incl. Leopold von Ranke's historical collection), and the Holden Observatory (open to the public on the 2nd and 4th Tues. of each month). The hill on which the [University stands commands a splendid *View of the city, lake, and hills. Adjacent lies Oakwood Cemetery. — The handsomest residence street is James Street, leading to the N.E. from the centre of the town. — A Boulevard, 100 ft. wide, has been constructed round Onondaga Lake.
Railways radiate from Syracuse to Oswego (p. 306), Richland, Ithaca (see below), etc. The Oswego Canal here joins the Erie Canal.

Between Syracuse and Rochester (p. 210) the N.Y.C. & H.R.R. has two routes: — the Direct Route (80 M.), used by through trains, and the Old Route (104 M.) via Auburn, Geneva, and Canandaigua. Both are described below.

a. Direct Route from Syracuse to Rochester. As we leave Syracuse, we have a good view to the right of Lake Onondaga and the Salt Works (p. 207). The line runs through a pleasant pastoral district, repeatedly crossing the Erie Canal and passing numerous small towns. Beyond (312 M.) Weedsport we cross the Seneca River. At (349 M.) Palmyra (440 ft.) Joseph Smith, the Mormon prophet, claimed to have found the golden plates of the Mormon Bible (p. 478). Large crops of peppermint are raised here.

b. From Syracuse to Rochester via Canandaigua ("Auburn Road"). We cross the Erie Canal and run to the S. of W. From (308 M.) Skaneateles Junction (610 ft.) a branch-line runs to (5 M.) Skaneateles (five syllables), situated on Lake Skaneateles (860 ft.), a pretty sheet of water, 15 M. long and 1 1/2 M. wide, traversed by a small steamboat. At the head of the lake is the Glen Haven Sanitarium. — 317 M. Auburn (715 ft.; Osborn Ho., $2-3; Avery, $2), a manufacturing city of 25,858 inhab., situated on the outlet of Owasco Lake (11 M. x 1 M.), which lies 3 M. to the S. The Auburn State Prison, with accommodation for 1200 convicts, is well known for its 'silent system' of discipline. W. H. Seward (1801-72), Secretary of State during the Civil War, long lived here and is buried in Fort Hill Cemetery, which is supposed to occupy an eminence raised by the Mound Builders (p. lxiv). — At (327 M.) Cayuga (Rail. Restaurant) the train crosses the lower end of Cayuga Lake (see below) by a bridge more than 1 M. long.

*Cayuga Lake (390 ft.), 35 M. long and 1 1/4 M. wide, is enclosed by hills rising 600-700 ft. above the water-level, and affords good fishing, boating, and bathing. Steamers ply upon the lake, and a railway runs along its E. bank to (35 M.) Ithaca, passing (6 M.) Union Springs and (12 M.) Aurora, the seat of the Wells College for Women (100 students).

Ithaca (400 ft.; Ithaca Ho., from S 2 1/2; Clinton Ho., S 1 1/2-3), a flourishing city with 11,079 inhab., lies amid picturesque scenery at the head of Cayuga Lake and is best known as the seat of Cornell University, one of the leading colleges of America (co-educational; 175 teachers, 1,800 students). The university is munificently endowed, and its buildings, splendidly situated 400 ft. above the lake ("View"). are handsome and capacious. It owes its foundation to the bounty of the State of New York and of Mr. Ezra Cornell (1807-74), whose large house stands in the town, below the Campus. Besides the usual academic and professional branches, the educational course includes agriculture, the mechanic arts, veterinary surgery, and military tactics. The College of Forestry, established in 1888, is the only one in America. For the medical department, see p. 42. The library contains 210,000 vols., and the grounds embrace 250 acres. The interesting Museum of Mechanical Engineering contains portraits of eminent engineers. — The romantic gorges near Ithaca contain, perhaps, a greater number of pretty waterfalls and cascades than can be found in any equal area
elsewhere. Fall Creek, in Ithaca Gorge, forms eight waterfalls within 1 M., one of which, the Ithaca Fall, is 160 ft. high. The Cascadilla Creek, a little to the S., also forms several cascades. The finest waterfall, however, near the head of Cayuga Lake, is the "Taughanica Fall, which is about 9 M. to the N. of Ithaca and 1 1/2 M. to the W. of the lake. The stream here forms a ravine, with rocky sides 200-400 ft. high, and plunges perpendicularly over a table-rock to a depth of 215 ft., presenting the highest waterfall E. of the Rockies (50 ft. higher than Niagara). There is a good hotel near the fall, and it may be reached by road, railway, or water.

332 M. Seneca Falls, situated at the falls of Seneca River, the outlet of Seneca Lake (see below); 336 M. Waterloo. — 342 M. Geneva (450 ft.; Franklin Ho., Kirkwood Ho., Carrollton, $2-2 1/2), a pleasant little city with 7567 inhab., extensive nurseries for seeds and flowers, and the interesting Experimental Farm of the State of New York, lies at the N. end of Seneca Lake (see below). Hobart College here is a well-known Episcopal Institution (100 students). Geneva is the junction of lines to Watkins, Ithaca, Lyons, etc.

*Seneca Lake (440 ft.), one of the most beautiful of the New York lakes, is 33 M. long and 2-6 M. wide. It is surrounded by hills, is very deep (over 500 ft.), and never freezes. At a depth of 300 ft. the temperature is constant at 39° Fahr. Only a narrow ridge divides it from Cayuga Lake (p. 203). Steamers ply in summer thrice daily from Geneva to Watkins (see below), calling at intermediate points (fare 25 c.).

*Watkins (Glen Park Hotel, near the entrance to the Glen, $2-3; Glen Mt. Ho., in the Glen, open in summer only, $3; Jefferson, unpretending, $2), a pleasant village of 2604 inhab. with tree-shaded streets, is frequented by thousands of visitors to Watkins and Havana Glens. It is also reached via RR. 28c, 28d. Above the village, 300 ft. above the lake, is the Glen Springs Sanatorium (from $25 per week, incl. medical treatment), with mineral springs and baths, beneficial in gout, kidney diseases, rheumatism, etc.

The entrance to *Watkins Glen (adm. 25 c.; free to guests of the Glen Mt. Ho.) is 1/2 M. from the lake, to the right, just on this side of the bridge. The glen, which may be described as a somewhat less imposing edition of the Ausable Chasm (p. 187), is 2 1/2-3 M. long, and is traversed by paths, steps, and bridges (stout shoes and waterproofs desirable). The points of interest are indicated by sign-boards. Among the finest are the *Cathedral (with its wonderfully smooth floor, and rocky sides 300 ft. high), Glens Alpha and Omega, Elfin Glen, and Pluto Falls. At the Mt. House (see above) we do not need to cross the bridge, but remain on the same side of the ravine and almost immediately descend a flight of steps to the left. Farther on the path passes behind the small Rainbow Falls, where a rainbow is generally visible about 4 p.m. The head of the glen is spanned by a spider-web-like railway-bridge, 165 ft. high. Here a steep path ascends to the right to Watkins Glen Station (rmt.), on the Fall Brook R. R. Opposite, on the other side of the track, is a gap in the fence, where begins the short path back to the village along the top of the cliffs on the left side of the glen. It leads through wood for 10-12 min. and then emerges on a plateau commanding a splendid View of the lake and village. We descend through the cemetery in 15-20 min. more.

Visitors to Watkins should not fail to visit also the *Havana Glen, about 3 M. to the S.E. (entr. through the Fair Grounds at Havana, near the large Cook's Academy; adm. 25 c.). This glen is about 1 1/4 M. long, and its most striking feature is the wonderful rectangularity of the rocks in its lower part. This is specially evident in the square *Council Chamber, not far from the entrance. The prettiest falls are, perhaps, those descending from the Council Chamber; farther up are the Bridal Veil, Jacob's Ladder, and the Curtain Falls. The stream, which contains more water than that in Watkins Glen, may be followed up (no path) beyond the glen proper. — There are other pretty glens in the neighbourhood.
Beyond Geneva the line makes a wide sweep to the N. 355 M. *Clifton Springs* (620 ft.; Sanitarium, $3-3\frac{1}{2}$; Hotel, $1\frac{1}{2}$), with sulphurous springs. — 366 M. *Canandaigua* (740 ft.; Canandaigua Ho., $2-3$), a village with 5866 inhab., at the N. end of *Canandaigua Lake* (670 ft.), which is 15 M. long and 1 M. wide.

Steamers ply on the lake to various points of summer-resort.

From Canandaigua to Watkins, 47 M., Northern Central Railway in 1\frac{1}{2} hr. — This line runs towards the S.E. 24 M. Penn Yan (Benham Ho., Knapp Ho., §2), at the head of *Lake Keuka*, a charming little sheet of water, 710 ft. above the sea and 270 ft. above Seneca Lake (p. 209), from which it is separated by a narrow ridge. It is 18 M. long and 1\frac{1}{2} M. wide. Steamers (fare 25c.) ply from Penn Yan to Hammondsport, at the head of the lake, calling at many pleasant intermediate points. Much wine is raised on the banks of the lake. — 47 M. Watkins (p. 209). Beyond this point the railway goes on to Elmira (p. 216), Philadelphia, Washington, and Baltimore.

Canandaigua is also the junction of a line to Buffalo via Batavia.

The stations hence to (394 M.) Rochester are unimportant.

Rochester (540 ft.; *Powers Hotel*, from $2\frac{1}{2}$; Livingston, $2-3$, R. from $1$; New Osburn, $2-2\frac{1}{2}$; Whitcomb, from $2$; Rail. Restaurant), a city of 133,896 inhab., situated on both sides of the Genesee, 7 M. from Lake Ontario, makes flour, beer, clothing, boots, and other articles to the annual value of $75,000,000$. Near the middle of the city the river forms a perpendicular Fall, 90-100 ft. high (best seen from the new Platt St. Bridge, reached from the Powers Hotel by following Main St. to the left, State St. to the left, and Platt St. to the right). The river forms two other falls to the N. within the city-limits, the Middle Fall, 25 ft. high, and the Lower Fall, 85 ft. high. — Main St. crosses the river by a concealed bridge, lined on both sides with houses in the style of old London Bridge. Near this the Erie Canal is conducted over the river by an *Aqueduct*, 850 ft. long and 45 ft. wide, a fine piece of engineering. — A fine *View* of the city is obtained from the tower (204 ft.) of the Powers Building. — The University of Rochester (209 students), in the E. part of the city, has good geological collections. — The City Hall, near West Main St., has a tower 175 ft. high. — Mt. Hope Cemetery is pretty, and the Public Parks are well laid out. The statue of Frederick Douglass (1817-95), the coloured statesman, is by Stanley W. Edwards and was erected in 1898. — Interesting visits may be paid to the large Flour Mills and Breweries (lager-beer), lining the river, and to the extensive Nurseries in the outskirts of the city. Rochester is a great centre of Spiritualists and supporters of Woman’s Rights.

Railways radiate from Rochester to Elmira and New York, Niagara Falls, Ontario Beach (Hot. Ontario, R. from §1; Hot. Bartholomay, §2\frac{1}{2}; R. from $1$), on Lake Ontario; Pittsburg, etc. — A fine drive may be taken along the Boulevard to (7 M.) Lake Ontario.

The direct Railway to Niagara Falls (72 M.) runs via Lockport to Suspension Bridge (p. 219) and the Falls (p. 220).

The train crosses the Genesee above the falls (not seen from the line). — 404 M. Batavia (Richmond Hotel), with 7221 inhab. and
the State Blind Asylum, is the junction of various railways. The old Holland Purchase Land Office contains a collection of relics of the pioneer days of Western New York. To the right is seen the monument to William Morgan, believed to have been murdered by the Free Masons in 1826 to prevent the publication of his book on the secrets of the craft. — 436 M. East Buffalo.

440 M. Buffalo. — Hotels. *Hotel Iroquois (Pl. a; C, 7), a well-built and finely equipped fire-proof structure, at the corner of Main and Eagle Sts., $4-5; R. from $11/2; *Niagara Hotel (Pl. b; B, 5), pleasantly situated in Prospect Park (with View), about 2 M. from the rail. stations (electric cars), and sumptuously fitted up, with a winter-garden, $31/2; these are two of the finest hotels in the country. — Geneseo Ho. (Pl. c; C, D, 6), Main St., from §3, R. from §1; TiFFt Ho. (Pl. d; D, 7), Main St., from §21/2, R. from §1; Broezel Ho. (Pl. f; D, 7), close to Union Depot, §3; Mansion House (Pl. g; C, 7), with good cuisine, $2-3; Stafford (Pl. c; C, 7), $2.

Restaurants. At most of the hotels; Delmonico, 216 Main St.; Atmendrauer Café, in the Morgan Building (p. 214); White Elephant, 306 Main St.; Maggs, 12 Mohawk St., frequented by ladies; Blesch, Palace Arcade, Main St.

Steamboats ply regularly to the chief points on Lake Erie and the other Great Lakes (comp. p. 303).

Cabs. For 1 pers. for 1 M. 50c, each pers. addit. 25c., 2 M. 50c. each, above 2 M. $1 each; per hour 1-4 pers., $11/2; one article of luggage free, each addit. article 5-10c. — Street Cars (Tramways), mainly propelled by electric power generated by Niagara Falls (comp. p. 221), traverse all the principal streets (5c.) and also run to Tonawanda (p. 214), Niagara (comp. p. 214), etc. — A Belt Railway Line, starting at the Union Depot, makes the circuit of the city (15 M.) in 3/4 hr. (fares 5-30c.).

Post Office (Pl. D, 7), Swan St.

Theatres. Star Theatre (Pl. C, 7), cor. Pearl St. and Mohawk St. (25 c. to §1); Lyceum, Washington St., near Broadway (15-75 c.); Court St. Theatre (Pl. C, 7), for vaudeville, etc. (smoking allowed; 15-75 c.); Germania, 231 Elliot St., performances in German. — Roof Garden, Main St., cor. of High St., with concerts, restaurant, etc. (adm. 15 c.). — Good Concerts are given at Buffalo, mostly in the Music Hall (p. 212), by the Buffalo Symphony Orchestra, the Buffalo Vocal Society, and other associations. Bands play in the parks in summer.

Buffalo, the second in size of the cities of New York State, with (1890) 255,664 inhab. (now estimated at 335,000), lies at the E. end of Lake Erie, at the mouth of the Buffalo River and head of the Niagara River, 20 M. above the Niagara Falls. It is well built, and many of its wide streets are shaded with trees and smoothly paved with asphalt.

The name of the city is supposed to be derived from the herds of buffalo which frequented the creek here entering the lake. The first dwelling for a white man was erected here in 1791, but it was not till after the construction of the Erie Canal in 1825 that the place increased with any great rapidity. Between 1880 and 1890 it added 100,000 souls to its population. The commerce of Buffalo is very great, as its situation makes it an emporium for much of the traffic with the great North-West.
Its lake-harbour is safe and capacious, and it has several miles of waterfront. Lumber (600 million feet annually), grain, coal (7-8 million tons), and live-stock (ca. 40 million head yearly) are among the chief articles of trade. The grain elevators have an aggregate capacity of 16-17 million bushels. The industries of Buffalo include brewing, distilling, oil-refining, car building, and the manufacture of metal goods, soap, and starch. They employ 65,000 hands, while their produce in 1890 was valued at $101,000,000. The population includes a large proportion of Germans and many Poles and Italians. Comp. Paul's "Dictionary of Buffalo" (25 c.).

Lake Erie (570 ft.), the second (counting from the E.) of the chain of Great Lakes between the United States and Canada, is 250 M. long and 60 M. wide. It is by far the shallowest of all, having an average depth of only 84 ft. It communicates with Lake Huron by the Detroit River (see p. 304) and pours its waters into Lake Ontario by the Niagara River (see p. 220). It is the scene of a very busy navigation, no fewer than 11,231 vessels, of an aggregate burden of over 11,000,000 tons, entering and clearing its harbour in 1896. The first vessel to navigate the lake was built on the Niagara River by La Salle in 1679, and the first steamboat was launched in 1818.

To reach Main St. (Pl. C-F, 1-8) from the Union Depot (Pl. D, 7), we proceed to the left (W.). Following Main St. to the right (N.), we soon reach the Weed Block, at the corner of Swan St., in which President Cleveland lived when in Buffalo. At the opposite corner of Swan St. is the huge Ellicott Square Building, said to be the largest office-building in the world, with 16 elevators and housing a business-community of between 4000 and 5000 souls.

On the left is St. Paul's Church (Pl. C, 7), one of the most successful Gothic (E. E.) churches in America. A little back from the church, fronting on Franklin St., is the substantial City Hall, with a tower 200 ft. high (view). [Close by, at the S.W. corner of Pearl and Church Sts., is the Guaranty Building, by Louis Sullivan, a fine example of simple yet dignified commercial architecture, with terracotta ornamentation.] To the right, at the corner of Eagle St., is the imposing Iroquois Hotel (p. 211; view from roof). A little farther on, the street crosses Lafayette Square (Pl. C, D, 7), with a War Monument. Here, to the right, at the corner of Broadway, stands the handsome Public Library (Pl. D, 7), which contains 85,000 vols. and various collections.

The spacious Reading Room on the groundfloor contains E. A. Poe's watch and a very interesting Collection of autograph MSS. (Howells, C. E. Craddock, etc.). In one case is a Manual of Arithmetic published at Raleigh, N. C., during the Civil War (1863), open at a curious example.

On the first floor is the Fine Arts Academy, with a picture-gallery, a fine collection of etchings by Seymour Haden, and some sculptures and casts. — The Buffalo Historical Society (second floor) has interesting collections of relics. — In the basement is the museum of the Society of Natural Sciences.

At the corner of Niagara St. stands the Erie Co. Savings Bank. Main St. then intersects the wide Genesee Street (Pl. C-F, 5-7). To the left, 1/2 M. farther on, at the corners of Edward St., are the large Music Hall and the R. C. *Church of St. Louis (Pl. D, 6).

Just to the W. of this point, at the S.E. corner of Edward St. and Franklin St., is the Grosvenor Library (Pl. C, 7), a free reference library with about 50,000 vols. (open 9-6).
One of the finest residence-streets in Buffalo is *Delaware Avenue* (Pl. C, D, 3-7), which begins at Niagara Square (Pl. C, 7) and runs to the W. of and parallel with Main St. At the corner of Niagara Sq. and Delaware Ave. is the house of President Millard Fillmore (1800-1874), now a boarding-house. Among the other buildings in this street are St. Joseph’s College, cor. of Church St.; the Methodist Episcopal Church, cor. of Tupper St.; *Trinity Church*, between Tupper and Edward Sts.; and the Synagogue, between Allen and North Sts.

Delaware Ave. leads to (2½ M.) *Forest Lawn Cemetery* (see below), but in the meantime we may turn to the left at (1½ M.) *North Street* (Pl. C-E, 5), another handsome residence-street, and follow it to (½ M.) the *Circle* (Pl. C, 5), containing the *First Presbyterian Church*. Beyond the Circle we follow Porter Avenue, which leads to (¼ M.) the small *Prospect Park* (Pl. B, 5; with the Niagara Hotel, p. 211) and (¼ M.) the *Front* (Pl. A, B, 5), a bold bluff on the Niagara River, affording a fine view of Lake Erie, the river, and the Canadian shore (1 M. distant). A little to the N. is *Fort Porter*, a small military station, with a band and dress parade at sunset. Continuing to follow *Niagara Street* along the river, we pass the Waterworks (with a ‘crib’ in the river) and *Fort Erie Ferry* (Pl. A, 4) and reach (2 M.) the *International Bridge* (Pl. A, 2), ¾ M. long, which crosses the river with the aid of *Squaw Island* and was completed in 1873 at a cost of $1,500,000 (300,000£).

Retracing our steps to *Forest Avenue* (Pl. B-D, 2), we follow it towards the E., passing (left) the large grounds and buildings of the *State Insane Asylum* (Pl. C, 2; open on Mon., Wed., & Frid., 2-5 p.m.). In 1½ M. we reach one of the entrances to the *Park* (Pl. D, E, 1, 2), which is prettily laid out and contains a boating lake. Adjoining the park on the S. and E. is *Forest Lawn Cemetery* (Pl. D, E, 2, 3), with the grave of President Fillmore (see above). Near the S.W. entrance are a statue of the Indian chief *Red Jacket* and the *Nelson Blocher Monument*, the latter a piece of crude realism which has strong local admirers. Near the same entrance is a handsome *Crematorium* (Pl. D, 3).

On the S.E. Forest Lawn Cemetery is bounded by Main St., whence we may return to our hotel by tramway. Or we may follow it out for about ½ M. to the *Humboldt Parkway* (Pl. E, F, 2-4). This leads to (1½ M.) *Humboldt Park* (Pl. F, 5), another portion of the park system. Thence we may now return to Main St. by Genesee St. (tramway). — Those who have time may take a car on Broad- way (Pl. D, F, 6, 7) and proceed through a German and Polish district, passing the *State Arsenal* (Pl. D, 7), to (3 M.) the terminus of the line. A little way farther out, to the left, are the *Wagner Palace Car Works*, in which the wood-carving machines and other processes are interesting (visitors generally admitted on application).

— Farther on in the same direction, beyond a labyrinth of railway
tracks, are a series of gigantic Coal Elevators, 1 M. long and 200 ft. high. — Among other buildings may be mentioned the new Post Office (Pl. D, 7), bounded by Ellicott, Oak, Swan, and South Division Sts.; the Board of Trade (Pl. C, 7; view from roof), cor. of Seneca and Pearl Sts.; the Buffalo General Hospital (Pl. D, 5), High St.; the Morgan Building (good view from tower; adm. 10 c.), at the S.W. corner of Niagara and Pearl Sts. (Pl. C, 7); the Real Estate Exchange, in Pearl St. (Pl. C, 7); St. Joseph's Cathedral (R. C.; Pl. C, 7), Franklin St.; Canisius College (Pl. D, 6), Washington St., and several other R. C. institutions; the University of Buffalo (Pl. D, 5), High St.; and the Erie County Almshouse, N. Main St.

Excursion steamers run from the foot of Main St. to Fort Erie (Canada), Crystal Beach, Woodlawn Beach, and other points of interest on the lake. Excursions may be also made to Chautauqua (p. 307), Lakewood (p. 307), etc.; but the favorite is, of course, that to Niagara Falls (p. 219), which may be made by railroad (see below), by steamer (return fare 50 c.), by four-horse coach (in summer), or by electric car (35 c., return-fare 50 c.). — Buffalo is an important railway-centre, lines radiating hence in all directions (see RR. 34, 46 etc.).

The N. Y. C. line from Buffalo to Niagara Falls runs along the right bank of Niagara River. 444 M. Black Rock; 451 M. Tonawanda, with a large trade in lumber; 462 M. Niagara Falls, see p. 219.

Beyond the Falls station the line goes on to (2 M.) Suspension Bridge and (7 M.) Lewiston (p. 223), where it connects with the steamer to Toronto.

b. Via West Shore Railway.

453 M. Railway to (429 M.) Buffalo in 11½-18 hrs. ($8; parlor-car or sleeper $2); to (453 M.) Suspension Bridge in 12½-17 hrs. (same fares). The through-cars do not run through Albany, but holders of unlimited tickets may go via Albany, on notice to the conductor. From Schenectady onwards this line follows almost the same route as the N. Y. C. R. R., having been constructed as a rival line and afterwards bought up by the N. Y. C. R. R. Co.

429 M. Buffalo, see p. 211.

From Buffalo to (453 M.) Suspension Bridge, Niagara, see above.
to Niagara Falls. DELAWARE WATER GAP. 28. Route. 215

c. Via Delaware, Lackawanna, & Western Railway.

410 M. RAILWAY to Buffalo in 10-14 hrs. (fare $8; sleeper $2; parlor car $1.50). The trains start from Hoboken (ferries from Barclay St. and Christopher St.; comp. p. 6).

Hoboken, see p. 56. The train threads the Bergen Tunnel (7/8 M.). 11 M. Passaic, with (1895) 17,894 inhab., at the head of navigation on the Passaic River. — 15 M. Paterson (U. S. Hotel, $3), an industrial city with (1895) 97,344 inhab. and large silk and cotton mills. The Passaic Falls here are 50 ft. high. — 35 M. Denville (520 ft.).

Another route of the same railway to this point leads via (3 M.) Newark (p. 228); 12 M. Orange, a pretty little suburban city of (1895) 22,792 inhab., adjoining West Orange, with the laboratory and home (in Llewellyn Park) of Thomas A. Edison, the inventor, and also the home of H. A. Harvey (1824-93), the inventor of "Harveyized steel"; 20 M. Summit (380 ft.); and (30 M.) Morristown (Mansion Ho., $3), with a historical museum in a house occupied by Washington as headquarters in 1777 and later. — 37 M. Denville, see above.

From (46 M.) Hopatcong coaches run to (4 M.) Lake Hopatcong (725 ft.), 81/2 M. long and 31/2 M. wide, with several summer-hotels. — 48 M. Stanhope (870 ft.) is the station (stage) for (21/2 M.) the pretty little Budd’s Lake. — From (57 M.) Hackettstown (570 ft.) stages run to Schooley’s Mountain (1200 ft.), another summer-resort (Dorincourt Ho., $31/2-4; Heath Ho., $3-31/2). — 67 M. Washington (500 ft.) is the junction of a line to (14 M.) Easton (p. 250) and Philadelphia. Farther on our line penetrates the Manunka Chunk Mt. by the Voss Gap Tunnel, 330 yds. long. 77 M. Manunka Chunk, the junction of the Belvedere Division of the Penna. R.

88 M. Delaware Water Gap (320 ft.; *Kittatinny House, *Water Gap Ho., $3-4; Glenwood, $2-3), a group of hotels and cottages, at the *Water Gap, or gorge, where the Delaware forces its way through the Kittatinny or Blue Mts., the Minsi rising to the W. (in Pennsylvania) and Tammany (comp. p. 32) to the E. (in New Jersey). The gorge is about 2 M. long, with rocky sides 1500 ft. high, and is so narrow as barely to leave room for the railway and the river.

'Whether this immense chasm has been caused by one mighty eruption, or by a gradual yielding of stratum after stratum, by the immense pressure of the waters of a lake thousands of acres in area... is of course a subject of mere conjecture... The evidences of the action of water and rocks hundreds of feet above the present level of the river-bed, and the masses of drift forming isolated hills and alluvial banks, indicate lake-like repose in the country now drained by the tributaries of the stream above the great gate in the mountain barrier' (L. W. Brodhead’s ‘Delaware Water Gap’). The Indian name of Minsiink (‘the water is gone’), applied to the country above the Gap, points to the traditional existence of this lake. Several other gaps in the Blue Mts. are of similar late formation (comp. pp. 250, 254). — The Gap should be seen from the river, the road, Table Rock, and Lovers’ Leap.

Walks (comp. Map supplied at the hotels). To Eureka Falls, the Moss Grotto, and Rebecca’s Bath, by the carriage-road through the Gap to (2 1/2 M.) the first creek. — Hunters’ Spring, 1/3 M. farther up the *Eureka Glen, is also reached by a white-marked path diverging to the right from the Mt. Minsi path (see p. 216). — The Steam Way, beginning at the small lake near the Water Gap House and indicated by white marks, leads via Cooper’s Cliff and Table Rock (500 ft. above the river) to (1/2 M) Caldeno Falls, the Moss Cataract, and Diana’s Bath. — By turning to the left 200 yds. farther
on we can descend to the (1/4 M.) Ledge Path (red marks) and follow it to the left, past the Lovers' Retreat, back to (1/2 M.) the hotel. — To ascend Mt. Minai (1500 ft.; 1½-2 hrs.) we follow the Ledge Path (see above; red marks), passing the Lovers' Retreat and Winona Cliff, and making a slight digression (path with yellow marks) to "Prospect Point (1 M. from hotel; 700 ft. above the river; view). The top, 2 M. farther on, commands an extensive "View. The summit is also known as the Sappers' View, from the Honourable Corps of Sappers and Miners, an association of New Yorkers and Philadelphians, which had about 100 officers of various grades to command a single individual known as the 'High Private'. This body made many of the paths and roads in the vicinity. — On the top of Winona Cliff is the Lovers' Leap, reached by a blue-marked path diverging from the Ledge Path. — To ascend Mt. Tammany (1480 ft.; 1½-2 hrs.) we cross the river and start below the slate-factory.

Among the favourite Drives are those to Stroudsburg (4 M.), Deer Park and Cherry Valley (a round of 10 M.), Buttermilk Falls (3 M.), Falls of Winona (12 M.), Marshall's Falls (7 M.), and Castle Rock (4 M.).

A small Steamer plies on the Delaware, and Boats may be hired for rowing or fishing. Among the places visited along the river are the Indian Ladder Bluff, Mather's Spring, and the Point of Rocks.

From Philadelphia (p. 230) the Delaware Water Gap is reached by the Pennsylvania R. R. in 3½ hrs., via Trenton (p. 228).

In leaving the Water Gap the train crosses Brohead Creek and penetrates Rock Difficult by a narrow cutting. — Beyond (92 M.) Stroudsburg (400 ft.) we soon begin to ascend the steep slope of Pocono Mt., passing through a tunnel near the top (view). At (118 M.) Tobyhanna (1930 ft.) we begin to descend the W. slope of the Allegheny Mts., at places very rapidly.

145 M. Scranton (1060 ft.; Jermyn, $2½-5; Westminster, $3; Terrace, $2-3), with (1890) 75,215 inhab. (now probably 100,000), at the confluence of the Roaring Brook and the Lackawanna, owes its importance to the vast fields of anthracite coal in the neighbourhood. Its iron industries are extensive. — Beyond Scranton we pass several small stations and enter New York State ('Empire State').

207 M. Binghamton (845 ft.; Arlington, $2-3; Hotel Bennett, $2½-4), a manufacturing town of 35,005 inhab., is the junction of railways to Albany (D. & H. R. R.; p. 176), Richfield Springs (p. 206), Syracuse (p. 207), Utica (p. 206), etc., and of the Erie Railroad (R. 28 d). — Our line here turns to the W. and follows the same course as the Erie Railroad (p. 218), the one on the right and the other on the left bank of the Susquehanna. 228 M. Owego (815 ft.; Ahwaga, $2), at the confluence of the Owego and the Susquehanna, is the junction of a line to Ithaca (p. 208).

264 M. Elmira (855 ft.; Rathburn, $2½-3; Frasier, Delevan, $2; Elmira Water Cure), an industrial town with 30,893 inhab., contains large rolling mills, the car-shops of the Erie Railroad, a Female College, and an Academy of Science. The Elmira Reformatory has played an important part in the reformatory treatment of criminals.

Railways radiate hence to Watkins Glen (p. 209) and Rochester (p. 210), to Ithaca (p. 208) and Corning (p. 207), to Harrisburg (p. 255) and Philadelphia (p. 230), and through the Lehigh Valley (p. 250).

280 M. Corning (930 ft.; Dickinson Ho., $2), with 8850 inhab., is the junction of lines to Rochester (p. 210) and Williamsport
(p. 252). At (326 M.) Wayland (1360 ft.) we part company with the Erie line, which here turns to the N. 333 M. Dansville (1040 ft.; Dansville Sanitarium, $31/2-5); 365 M. Rochester & Pittsburg Junction, for lines to the N. to Rochester and to the S. to Pittsburg.

410 M. Buffalo, see p. 211.

From Buffalo to Niagara Falls, see p. 214 or p. 219.

d. Viâ Erie Railway.

444 M. Erie R. R. to (424 M.) Buffalo in 121/2 hrs. (fare $8; parlor-car or sleeper $2); to (444 M.) Suspension Bridge in 131/4-17 hrs. (fares as above).

The train starts from Jersey City (comp. p. 6; ferries from 23rd St. and Chambers St.). — This line, constructed in 1836-52, passes some fine scenery in penetrating the Allegheny Mts.

Jersey City, see p. 56. The train threads the Bergen Tunnel (p. 215) and traverses the Salt Marshes of the Hackensack.

These extensive marshes are covered with reeds and sedge grass, growing in soft mud, which is sometimes 40 ft. deep. They are overflowed at high tide.

Beyond (91/2 M.) Rutherford we cross the Passaic. 121/2 M. Passaic (p. 215); 17 M. Paterson (see p. 215). At (32 M.) Suffern (300 ft.) we enter New York State (p. 216). — 34 M. Ramapo, in the picturesque valley of that name. — 38 M. Tuxedo.

About 11/2 M. to the W. is Tuxedo Lake, the property of the Tuxedo Park Association, a club of wealthy New Yorkers, who have made this one of the most fashionable pleasure-resorts and game-preserves in the country. On the shores of the lake are the club-house and the cottages of members. A good golf-course has been laid out.

47 M. Turner's (558 ft.; Rail. Restaurant) is the junction of a line to Newburgh (p. 169). — 50 M. Monroe (Monroe Hotel, $2).

About 9 M. to the S. lies Greenwood Lake (1000 ft.), a favourite resort, 10 M. long and 1 M. wide, also reached by a direct railway from Jersey City. The chief hotels are the Brandon House ($21/2-3), in Greenwood Lake Village, at the N. end of the lake, and the Riverside House (W. bank).

60 M. Goshen, junction of a line to Kingston and Rondout (p. 169); 67 M. Middletown (560 ft.; Madison Ho., $2), with 11,977 inhab., junction of the New York, Ontario, & Western R. R. to Oswego (comp. R. 47 e). Beyond (71 M.) Howells the line ascends the Shawangunk Range, and the scenery improves. Beyond (76 M.) Otisville the train reaches the summit (870 ft.) by a long rocky cutting and begins to descend rapidly into the valley of the Delaware.

88 M. Port Jervis (440 ft.; Fowler Ho., from $2; Delaware Ho., from $41/2), situated at the junction of the Delaware and the Neversink, is a village of 9327 inhab., frequented as a summer-resort.

At Port Jervis the Delaware abruptly changes its course from S.E. to S.W. and runs hence, parallel to the Allegheny Mts., to (42 M.) the Delaware Water Gap, where it again turns to the S.E. in breaking through the Blue Ridge. A fine road, much frequented by bicyclists, runs along the river at the foot of the shaly cliffs on the right bank; and the scenery of this section of the Upper Delaware, in *Pike County (Penna.), is deservedly famous and much visited by artists. Numerous picturesque falls are formed by the streams descending from the mountains to the Delaware. The region is as yet uninvaded by the railway. Among the chief points
on the road are the following: — 7 M. Milford (Fauchere, $3; Bluff Ho.), near the mouth of the Sawkill, the beautiful falls of which are 3½ M. distant. Otter’s Cliff (600 ft.), to the S. of Milford, affords a fine view of the valley. — 10½ M. Mouth of the Raymondskill, with a fine cataract, 11/2 M. back from the river. — 15 M. Dingman’s Ferry (High Falls Ho., $2-3), at the mouth of Dingman’s Creek, which forms several falls, the finest in Childs Park. — 30 M. Bushkill (Peters Ho., Riverside Ho.), at the confluence of the Big and Little Bushkill Creeks. The falls of the latter (3 M.) are the most beautiful in the district. The Delaware here makes the famous ‘Wallpack Bend’, shaped like the letter S. — At (36 M.) Marshall’s Creek, also with a fall, the road to Stroudsburg (p. 216) diverges to the right (inland). — 42 M. Delaware Water Gap, see p. 215.

The Tri-States Rock, to the S. of Port Jervis, marks the meeting of New York, New Jersey, and Pennsylvania. — Among other picturesque resorts within easy reach of Port Jervis are High Point (1600 ft.; The Inn, $4) and Lake Marcia, 4 M. to the E., on the ridge of the Kittatinny or Shawangunk Mts. (coach).

Beyond Port Jervis the train crosses the Delaware into Pennsylvania (‘Keystone State’) and runs along its right bank, high above the river. Great engineering difficulties were overcome in making this part of the line, where the river-gorge is deep and tortuous. At (111 M.) Lackawaxen (650 ft.) the Delaware and Hudson Canal crosses the Delaware by an aqueduct. Like most of the other small stations in the ‘Delaware Highlands’ this is a summer-resort with several unpretending hotels and boarding-houses.

At (116 M.) Masthope we recross the river and re-enter New York. About 4 M. to the W. is the domain of the Forest Lake Association (1500 ft.). — At (122 M.) Narrowsburg the valley is very narrow. Beyond (177 M.) Deposit (1010 ft.) we quit the Delaware, turn to the left (S.W.), and begin to ascend the ridge separating it from the Susquehanna. Fine scenery. From (184 M.) Gulf Summit (1375 ft.) we descend rapidly, soon obtaining a fine *View of the Susquehanna (right). We cross the Cascade Bridge (180 ft. high) and the Starrucca Viaduct, 1200 ft. long and 110 ft. high. 192 M. Susquehanna (915 ft.), with railway repair-shops, lies on the left bank of the river. — The line now descends through the Susquehanna Valley. Beyond (215 M.) Binghamton (870 ft.; see p. 216) it runs parallel with the Lackawanna Railway (R. 28c), on the opposite (right) bank. 237 M. Owego (p. 216); 274 M. Elmira (p. 216). At (291 M.) Corning (940 ft.; p. 216) a branch-line to Rochester (p. 210) runs to the right (N.).

At (332 M.) Hornellsville (1160 ft.; Sherwood, $2-2½; Page Ho., $2; Raitl. Restaurant), a town of 10,996 inhab., with railroad works, the Buffalo branch diverges to the right from the main line, which goes on to (414 M.) Salamanca and (460 M.) Dunkirk (see p. 307). — 362 M. Portage (1315 ft.; Ingham Ho., $2) is the station for the beautiful *Portage Falls, formed here by the Genesee River.

The Upper or Horseshoe Falls, 70 ft. high, are 3½ M. below the village. About 1¼ M. farther down are the Middle Falls, 110 ft. high, with a cave called the ‘Devil’s Oven’ in the rocks near the foot of the precipice. For 2 M. farther the river descends through a narrow rocky defile and then reaches the Lower Falls (150 ft.).
The train crosses the Genesee by a bridge 235 ft. high, affording a view of the Upper and Middle Portage Falls. 366 M. Castile (1400 ft.); 368 M. Silver Springs, 6 M. from Silver Lake; 392 M. Attica (1000 ft.); 421 M. Clinton Street (East Buffalo; 610 ft.).

424 M. Buffalo, see p. 211.

The trains for Niagara Falls follow practically the same route as the N. Y. C. R. R. (p. 214). 432 M. Tonawanda; 438 M. La Salle; 442 M. Niagara Falls (see below); 444 M. Suspension Bridge. The trains cross the bridge in full view of the Falls (comp. p. 298) and connect at Clifton (p. 298) with the Grand Trunk Railway of Canada.

e. Via Lehigh Valley Railroad.

464 M. Lehigh Valley R. R. to (451 M.) Buffalo in 10-14 hrs. (fare $3; sleeper $2); thence to (464 M.) Suspension Bridge in 1 hr. more (same fares).

— The line starts in Jersey City (p. 6; ferries from Cortlandt, Desbrosses, and W. 23rd Sts.). The 'Black Diamond Express' leaves at noon.

From Jersey City to (33 M.) Bound Brook the route is substantially the same as R. 31b. It then runs towards the W. At (76 M.) Philadelphia we cross the Delaware and enter Pennsylvania. 77 M. Easton, see p. 250. — 83½ M. Bethlehem, and thence to (451 M.) Buffalo, see R. 34. — Hence to Niagara Falls, see p. 214. The direct route, however, diverges at Batavia (comp. p. 210). — 464 M. Suspension Bridge, see above.

29. Niagara Falls.

Hotels. International Hotel, $3-5; Cataract Hotel, close to the river, with good cuisine, from $4½; Prospect House, well spoken of, $3-5½; Kaltenbach, German, well spoken of, $3; Imperial Porter, $2½-4; Tower, $2-3. The first two are open in summer only. These are all on the American side, in the city of Niagara Falls. — Clifton House, on the Canadian side (burned down in 1893; to be rebuilt); Lafayetite, opposite the Canadian end of the new bridge, $2½-3½, open all the year round.

Railway Stations. New York Central, cor. of Falls St. and Second St., also used by the Michigan Central, West Shore, Lehigh Valley, and the R. W. & O. railways; Erie Station, cor. of Niagara St. and Second Sts. — The Canadian lines make connection for Niagara Falls at Suspension Bridge, 2 M. to the N.; and there are also stations on the Canadian side at Clifton (see p. 298), Niagara Falls (Ontario), and Falls View (comp. p. 298). — Niagara Falls, N. Y., is also connected with Suspension Bridge by tramway (5c.).

Carriages. The former extortionate charges and impertinent demeanour of the Niagara hackmen have been greatly abated. The rates are $1½ for the first and $1 for each addit. hr., with two horses $2 and $1½; but it is always advisable to make a distinct bargain with the driver, and lower terms than the legal rates may often be obtained, especially by a party. It should be expressly stipulated who is to pay the tolls in crossing the bridges, etc.; and the driver should be strictly enjoined not to stop at any of the bazaars or other pay-places unless ordered to do so. A single-horse conveyance should not cost more than $3 for half-a-day or $5 for a whole day. — Park Vans make the round of the American Reservation at frequent intervals (fare 25c., for Goat Island 15c.), and passengers are entitled to alight at any number of points and finish the round by any subsequent vehicle on the same day. — Omnibus from the station to the hotels 25c.
Electric Tramways. The Niagara Falls Park and River Railway runs along the Canadian bank from Queenston (p. 225) to (11 1/2 M.) Chippewa (fare 45 c.), taking 1 1/2 hr. to the trip and stopping at Brock's Monument (10 c.), the Whirlpool (20 c.), Niagara Falls Town (25 c.), Niagara Falls Park (30 c.), and Dufferin Islands (30 c.). It affords admirable views of the rapids, gorge, and falls. — The Gorge Electric Line, on the American side, runs through the gorge and along the brink of the river to (7 M.) Lewiston (p. 225; fare 35 c., there and back 60 c.).

Fees. Since the establishment of the American and Canadian National Parks and Reservations, most of the former extortionate fees have been abolished; and any visitor who is able to walk a few miles can see all the chief points at very little cost. Goat Island and all the best views of the Falls are free; and the only extra expenses which the visitor is advised to incur are the trip in the 'Maid of the Mist', including the visit to the Canadian side (50 c.), the Cave of the Winds ($1; or the similar trip on the Canadian side, 50 c.), and the view of the Whirlpool Rapids from the Canadian side (50 c.).

Photographs. Among the best photographs of Niagara are those of Zybach & Co., Niagara Falls, Ontario (p. 238).

Reservations. The New York State Reservation at Niagara comprises 107 acres and was opened in 1885. It includes Prospect Park. — The Queen Victoria Niagara Falls Park, on the Canadian side, covers 154 acres and was opened in 1888. — The New York Commissioners issue a folder of useful 'Suggestions to Visitors', which may be obtained (free) at any of the hotels or from the officers of the Reservation.

Plan and Season of Visit. The description in the text follows the best order in which to visit the Falls. The American side is seen to greatest advantage in the morning, the Canadian side in the afternoon, the sun being then at our backs as we face the Falls. The Whirlpool Rapids are best seen from the Canadian side. It is possible to see all the chief points in one day, but it is better to allow 2-3 days for the visit. May, the first half of June, the second half of Sept., and Oct. are good seasons to visit Niagara, which is hot and crowded in midsummer. No one who has an opportunity to see them should miss the Falls in the glory of their winter dress.

The **Falls of Niagara** ('Thunder of Waters'), perhaps the greatest and most impressive of the natural wonders of America, are situated on the Niagara River, 22 M. from its head in Lake Erie and 14 M. above its mouth in Lake Ontario. This river forms the outlet of the four great Western lakes (Erie, Huron, Michigan, and Superior), descending about 330 ft. in its course of 36 M. and affording a channel to a large part of the fresh water in the globe. Its current is swift for about 2 M. after leaving Lake Erie, but becomes more gentle as the channel widens and is divided into two parts by Grand Island (Bedell Ho., a popular summer-hotel, $2-3). Below the island the stream is 2 1/2 M. wide. About 15 M. from Lake Erie the river narrows again and the rapids begin, flowing with ever increasing speed until in the last 3/4 M. above the Falls they descend 55 ft. and flow with immense velocity. On the brink of the Falls, where the river bends at right angles from W. to N., the channel is again divided by Goat Island, which occupies about one-fourth of the entire width of the river (4770 ft.). To the right of it is the **American Fall**, 1060 ft. wide and 167 ft. high, and to the left of it is the **Canadian** or **Horseshoe Fall**, 158 ft. high, with a contour of 3010 ft. The volume of water which pours over the Falls is
15 million cubic ft. per minute (about 1 cubic mile per week), of which probably nine-tenths go over the Canadian Fall.† Below the Falls the river contracts to 1000-1250 ft., and rushes down foaming and boiling between lofty rocky walls. Two miles farther down it is barely 800 ft. wide, and at the Whirlpool (p. 225) the huge volume of water is compressed into a space of 250 ft. Within 7 M. these lower rapids descend over 100 ft., but at Lewiston the river once more becomes wider and smoother.

The gorge through which the river runs has been formed by the action of the vast body of water rushing through it, and the Falls themselves are receding up the river at a rate which in 1842-90 averaged 21½ ft. per annum on the Canadian side and 7½ ft. on the American side. The rocks passed through by the receding falls are sandstone, shale, and limestone. At present the formation over which the water pours is limestone, with shale lying 80-90 ft. below it; and the frequent fall of great masses of limestone rock is probably occasioned by the erosion of the underlying shales. At the Whirlpool the continuity of the rock-formation is interrupted, and the whole wall of the ravine is formed of drift. Geologists tell us that a farther retrocession of about 2 M. will cut away the layers of both limestone and shale and leave the falls stationary on the sandstone, with their height reduced about 50 per cent.

Niagara Falls appear under the name of Ongiara in Sanson’s Map of Canada (Paris, 1657), but the first white man known to have seen Niagara Falls was Father Hennepin, a member of La Salle’s party in 1678. He described them as ‘a vast and prodigious Cadence of Water, which falls down after a surprising and astonishing manner, insomuch that the Universe does not afford its Parallel’ . . . The Waters which fall from this horrible Precipice do foam and boil after the most hideous manner imaginable, making an outrageous Noise, more terrible than that of Thunder; for when the Wind blows out of the South, their dismal roaring may be heard more than 15 leagues off’. The sketch he made of the Falls shows several points of difference from their present state.

The Indians have a tradition that the Falls demand two human victims every year; and the number of accidents and suicides is perhaps large enough to maintain this average. Many lives have been lost in foolhardy attempts to cross the river above Goat Island.

The American city of Niagara Falls closely adjoins the river and contains (1890) 5502 inhabitants. The chief source of its prosperity has long been the influx of sightseers; but it is now, thanks to the tapping of the Falls by tunnels and power canals (see below), rapidly becoming an industrial centre of great importance. It is estimated that about 400,000 tourists visit the Falls yearly. The Museum and Cyclorama need not detain the visitor.

A Tunnel, 20 ft. deep and 18 ft. wide, has been excavated through the solid rock from a point just below the Suspension Road Bridge to a point about 1½ M. above the Falls, where it is 163 ft. below the level of the river. It passes below the city at a depth of about 200 ft. A short canal diverts a portion of the river to the head of the tunnel, where a maximum of 120-150,000 horse-power is attained by the descent of a stream of water which does not perceptibly diminish the volume of the Falls. The district upon which the mills are erected is quite out of sight of the Falls, the picturesque grandeur of which is not in any way marred by signs of intrusive utilitarianism. A similar tunnel is to be constructed on the Canadian side. Including the surface canals, it is estimated that Niagara Falls now contribute 400,000 horse-power for industrial purposes.

† The international boundary passes through the middle of the so-called Canadian Fall.
We may begin our visit to the Falls by entering Prospect Park, 12 acres in extent, which adjoins the gorge close to the American Fall. At *Prospect Point, protected by a stone wall, we stand on the very brink of the Fall and see it dash on the rocks below. *Hennepin’s View, a little to the right (N.), commands a good general *View. The Library Building in the Park contains maps and charts. Near the point is the Superintendent’s Office, whence an Inclined Railway (5 c.) and a Flight of Steps descend to the bottom of the gorge and the dock of the ‘Maid of the Mist’ (see p. 224).

At the end of Falls St. and Canal St., at the N.E. entrance to Prospect Park, stands the Niagara Falls Tower, a steel structure 300 ft. high, erected in 1893. The top (elevator 25 c.) commands a splendid *View of the falls and their surroundings. The building at the foot contains a hotel (p. 219) and a bazaar.

Following the parkway to the left (W.) from Prospect Point, we reach (3 min.) the Goat Island Bridge (360 ft. long), crossing the right arm of the river, a little above the American Fall. It commands a fine view of the *Upper Rapids. To the right are several little rocky islets, including Avery’s Rock, where an unfortunate man found foothold for 18 hrs. before being swept over the fall by the impact of a boat let out with ropes in an attempt to save him. The bridge ends at Bath Island, whence another short bridge crosses to *Goat Island (80 acres in extent). Here we follow the path to the right to (4 min.) *Luna Island, a rocky islet between the main American Fall and the *Centre Fall, named from the lunar rainbows seen here at full moon. The continuation of the path along the W. side of Goat Island leads in a minute or two more to the Biddle Stairs (free) and the office where a guide and dress are obtained for a descent to the *Cave of the Winds (see $1; small gratuities expected).

Everyone should descend the stairs and follow the path along the foot of the cliffs towards the base of the Horseshoe Falls; but only those of strong nerves should attempt the trip through the Cave of the Winds, which, however, is said to be safe and is often made by ladies. For those who can stand it the experience is of the most exciting and pleasurable description. After passing over the gangways and bridges amid the rocks and spray in front of the Centre Fall, we are conducted through the ‘Cave of the Winds’ behind it, where the choking, blinding, and deafening tumult of wind and water defies description. The visitors grasp each other by the hand and side through on a narrow ledge, with a perpendicular wall of rock within an inch of their noses and the mighty volume of the fall at their backs.

Beyond the Biddle Stairs the path on Goat Island leads to (4 min.) Porter’s Bluff, overlooking the Horseshoe Fall, the Canadian Rapids, and the ravine below the Falls. A staircase and bridge descend hence to **Terrapin Rock, on the edge of the Horseshoe Falls, affording the best view of these from this side. The tower which used to be here has been removed as unsafe.

The river here is evidently much deeper than the American branch, and instead of bursting into foam where it quits the ledge, it bends solidly over and falls in a continuous layer of the most vivid green. The tint is not uniform, but varied, long strips of deeper hue alternating with bands of brighter colour ... From all this it is evident that beauty
is not absent from the Horseshoe Fall, but majesty is its chief attribute. The plunge of the water is not wild, but deliberate, vast, and fascinating (Tyndall). — A condemned warship sent over the Fall in 1829 drew 18 ft. of water, but passed without touching the ledge.

Our path next leads along the S. side of Goat Island to (7-8 min.) the series of bridges leading to the *Three Sister Islands, which afford the best view of the imposing *Canadian Rapids, running at the rate of 30 M. an hour. The Third Sister is adjoined by a smaller rock known as the Little Brother.

We may now return through the centre of Goat Island to (5 min.) the bridge leading to the mainland, but those who have time should follow the path to (4 min.) the ‘Parting of the Waters’ at the head of Goat Island, where we obtain a good view of the broad and quiet river above the cascades, with Grand Island (p. 220) in the background. Thence the path leads back along the N. side of Goat Island, affording a view of the American Rapids, to (5-6 min.) the bridge.

We may now cross to the Canadian side of the river by the *New Steel Arch Bridge, about 250 yds. below the Falls (see p. 220), erected in 1897-98 to take the place of the suspension-bridge formerly at this spot. The main span, the largest of the kind in the world, is 840 ft. long, while the flanking spans increase the total length of the bridge to 1240 ft. It is 49 ft. wide. An electric tramway crosses in the centre, and on each side are carriage ways and footpaths. The bridge is 195 ft. above the level of the water. Bridge-toll 10 c., return 15 c., incl. tramway fare. — Just below it, on the American shore, is the mouth of the tunnel described at p. 221. On the bank above is a group of mills and manufactories, run by the power of a surface canal.

On reaching the Canadian end of the bridge, we turn to the left, pass the remains of the Clifton House (p. 219), and reach (3 min.) the entrance to the *Queen Victoria Niagara Falls Park, which extends along the river for 2 1/2 M. (electric railway, see p. 220). The park contains a bronze statue of Colonel Gzowski, its chief promoter. Splendid general views are obtained as we proceed of the Falls and the gorge, especially from the (3 min.) *Rambler’s Rest and (4 min.) *Inspiration Point. To the right, 3-4 min. farther on, are Picnic Grounds and a Restaurant; and in 3 min. more we reach the Table Rock House and **Table Rock, which affords an indescribably grand view of the Horseshoe Falls. Beautiful rainbows are seen on the spray in the afternoon. The roar of the water is deafening.

The name of Table Rock still adheres to this point, though the last portion of the overhanging ledge that gave rise to it fell into the abyss in 1850. — An elevator here affords an opportunity to those who wish to go under the Falls (25 c., with dress 50 c.). This trip does not necessitate the removal of clothing, but only the protection of oil-skin suits. It has been improved by the construction of a tunnel (20 ft. long) and now affords imposing *Views of the falls from behind and below.

Visitors with time to spare may extend their walk through the Park above the Falls to (5-4 min.) Cedar Island and (1 M.) *Dufferin Islands, enjoying good views of the Canadian Rapids (see above). On the mainland, just beyond the Dufferin Islands, is the interesting Burning Spring (adm. 50 c.),
highly charged with sulphuretted hydrogen gas, which burns with a pale blue flame. — Falls View Station of the Michigan Central R.R. (see p. 298), lies just outside the Park, opposite the lower end of Cedar Island. — A road diverging near Table Rock leads to the battlefield of Lundy's Lane, where the Anglo-Canadian forces defeated the Americans after a bloody struggle on July 25th, 1811. A tower here (110 ft. high; adm. 50 c.) affords an extensive view.

No one should omit to take the **Trip in the little steamer the Maid of the Mist, which starts near the foot of the Inclined Railway descending from the Library (see p. 222), steams up the river nearly to the foot of the Horseshoe Fall, and touches at a wharf on the Canadian side (fee 50c., incl. water-proof dress). The **View it affords of the Falls is one of the best to be had; and the trip is perfectly safe. Passengers may disembark on the Canadian side (where a steep path ascends to the National Park) and return by any later trip of the steamer the same day.

The river and its banks below the bridge offer many points of great interest. The Lower Rapids and the Whirlpool (see p. 225) are both seen to greatest advantage from the Canadian side.

From the N. end of the bridge we follow the road descending along the edge of the cliff to (2 M.) the *Cantilever Bridge of the Michigan Central Railroad, one of the first examples of this method of construction, completed in 1883. It is entirely of steel and has a total length of 900 ft. The two cantilever arms, 395 ft. and 375 ft. long, are connected in the centre by a fixed span of 125 ft. It is 245 ft. above the water. About 100 yds. below this bridge is the new *Single Arch Steel Bridge of the Grand Trunk Railway, erected in 1897, with a roadway below the railroad track (toll 10 c., incl. return). The length of the bridge, including approaches, is 1100 ft., half of which is absorbed by the arch itself. The highest point is 226 ft. above the water. It commands a fine view of the Whirlpool Rapids, but the Falls are partly hidden by the Cantilever Bridge.

A little below the Suspension Bridge is the entrance to the so-called Rapids Park, where we descend an Inclined Railway (50 c.) to view the *Whirlpool Rapids, which in their own way are as wonderful as the Falls. The immense volume of water is here forced to flow through so narrow a channel (300 ft.) that it actually assumes a convex form, the centre of the river being 20 ft. higher than the edges. Three other elevators (each 50 c.) descend to the Rapids on the American side.

The impression of force is overwhelming. 'The surges did not look like the gigantic ripples on a river's course, as they were, but like a procession of ocean billows; they rose far aloft in vast bulbs of clear green, and broke heavily into foam at the crest' (Howells).

It was in an effort to swim down these Rapids that Capt. Webb lost his life in 1833, but since then several persons have passed through them safely in barrels. The old 'Maid of the Mist' was successfully piloted through the Rapids to Lewiston in 1861. Blondin and others have crossed the gorge above the Rapids on ropes of hemp or wire.

We may now cross the railway-bridge and return along the American side (tramway, see p. 220).
Whirlpool.

About 1 M. below the Railway Suspension Bridge is the *Whirlpool, of which we get a good distant view from the top of the cliff. The river here bends suddenly at right angles to its former course, and the Whirlpool is occasioned by the full force of the current impinging against the cliffs of the left bank.

Here, within the compass of a mile, those inland seas of the North, Superior, Huron, Michigan, Erie, and the multitudes of smaller lakes, all pour their floods, where they swirl in dreadful vortices, with resistless undercurrents boiling beneath the surface of that mighty eddy. Abruptly from this scene of secret power, so different from the thunderous splendors of the cataract itself, rise lofty cliffs on every side, to a height of two hundred feet, clothed from the water's edge almost to their crests with dark cedars. Noiselessly, so far as your senses perceive, the lakes steal out of the whirlpool, then, drunk and wild, with brawling rapids roar away to Ontario through the narrow channel of the river. Awful as the scene is, you stand so far above it that you do not know the half of its terribleness; for those waters that look so smooth are great ridges and rings, forced, by the impulse of the currents, twelve feet higher in the centre than at the margin. Nothing can live there, and with what is caught in its hold, the maelstrom plays for days, and whirls and tosses round and round in its coils, with a sad maniacal patience. (Howells.)

The River Road ascends along the American side of the river from Goat Island Bridge to (1 M.) the Old French Landing, where La Salle and Father Hennepin are said to have embarked in 1678 after their portage from Lewiston. Nearly opposite, on the Canadian shore, is the village of Chippewa, where the Americans defeated the English in 1814. About 1 M. farther up is the Schlosser Landing, fortified by the French in 1750 and by the English in 1761. Navy Island, near the Canadian shore, gave shelter to the insurgents of the 'Mackenzie War' (1837-38). Just above is Grand Island (26 sq. M. in area; comp. p. 220), which obtained some notoriety in 1820, when Major Noah proposed to found here the city of Ararat, as a universal refuge for the Jews. Opposite Grand Island, on the American shore, 5 M. above the Falls, is the mouth of the Cayuga, where La Salle launched the 'Griffon', the first vessel to navigate the Great Lakes (1679).

The Observation Trains of the N.Y.C.R.R. between Niagara Falls and (7 M.) Lewiston (return-fare 25c.) afford admirable Views (to the left) of the gorge of the Niagara. — Lewiston, a pleasant little village, is the starting-point of the steamers across Lake Ontario to Toronto (comp. Baedeker's Canada). — On the opposite shore, on the Michigan Central R. R., is Queenston, where Gen. Brock fell on Oct. 11th, 1812 (spot marked by a monument 150 ft. high). — About 8 M. to the N.E. of Niagara Falls is the Reservation of the Tuscarora Indians (p 205; baskets, etc., for sale). — Fort Niagara, at the (14 M.) mouth of the river, first established in 1678, is now garrisoned by U. S. troops. Opposite is the watering-place of Niagara-on-the-Lake. — Comp. Baedeker's Handbook to Canada.

30. The St. Lawrence River and the Thousand Islands.

Passengers who make the St. Lawrence trip from American soil usually join the steamer at Clayton (p. 226), which is reached from New York (348 M.) via the N. Y. C. R. R. to (238 M.) Utica and the Rome, Watertown, & Ogdensburg R. R. thence (10 hrs.; through-carriges; fare $8.27; comp. R. 25 a). — The Montreal steamer of the Richelieu & Ontario Navigation Co. leaves Toronto daily in summer at 2 p.m., and Kingston (where it receives most of its passengers) about 5 a.m., calling at Clayton 1 hr. later (fare from Clayton to Montreal $5.25). Montreal is reached about 6.30 p.m. — Those who wish merely to visit the Thousand Islands may do so by the steamer 'St. Lawrence', which makes daily round trips from Clayton (fare 50 c.). Comp. Baedeker's Handbook to Canada.

BAEDeker'S United States. 2nd Edit.

15
The St. Lawrence, the outflow of the Great Lakes, has a length (from Lake Ontario to its mouth) of 500 M. and pours more fresh water into the Ocean than any other river except the Amazon. It is navigable for large vessels to Montreal and for small steamers all the way, though some of the rapids have to be avoided by means of canals by boats ascending the river (comp. p. 227). During 4-5 months, however, the navigation of the lower St. Lawrence is stopped by ice. Comp. Baedeker's Canada.

Distances in the following route are calculated from Kingston.

**Kingston (Hôt. Frontenac, $3-3 1/2; British American Hotel, $2 1/2-3 1/2), a city of 19,264 inhab., with picturesque fortifications, situated at the point where the St. Lawrence issues from Lake Ontario, is described in Baedeker's Canada. A small steamer plies regularly to Cape Vincent.**

On leaving Kingston our steamer almost at once begins to traverse the expansion of the St. Lawrence known as the *Lake of the Thousand Islands*, which is 40 M. long and 4-7 M. wide and contains about 1700 islands, big and little. Many of these islands are favourite summer-resorts, with hotels and boarding-houses, while others are private property, with the country-houses of rich Americans and Canadians. The voyage through them is picturesque, and many of the islands are illuminated at night. Our course at first lies between Wolfe or Long Island (r.) and Howe Island (l.).

24 M. (r.) **Clayton (Hubbard, $2-4; Walton, $2; West End, $2-3), a village and summer-resort with 1748 inhab., is the terminus of the R., W., & O. R. R. from (108 M.) Utica (comp. p. 206). Opposite is the large Grindstone Island, behind which, on the Canadian shore, lies Gananoque.**

27 M. (r.) **Round Island, with the large Hôtel Frontenac ($3-4).**

30 M. (l.) **Thousand Island Park (Columbian, $3; Thousand Island Park Ho., $2 1/2), a great Methodist resort, at the W. end of Wellesley Island.**

38 M. (r.) **Alexandria Bay (Crossmon, $4; Thousand Isle Ho., $3-5; Edgeward Park, from $4; Central Park Ho., $2-3), the chief resort among the Thousand Islands, lies on the American shore, opposite Wellesley Island, and counts pretty scenery and good boating and fishing among its attractions. Among the most prominent villas on the neighbouring islets are those of the late George M. Pullman (d. 1897) and H. H. Warner (of the 'Safe Cure'). — Westminster Park (Hotel Westminster, $2-3) lies at the E. end of Wellesley Island, opposite Alexandria Bay.**

Farther on we pass the *Summerland Islets* (1.) and the long Grenadier Island (l.), leave the Lake of the Thousand Isles, and reach the open river, here about 2 M. wide. For some distance now the voyage is monotonous and uninteresting.

61 M. (l.) **Brockville (Revere, St. Lawrence Hall, $2-2 1/2) is a Canadian city with 8793 inhab. and good fishing.**

73 M. (l.) **Prescott (Daniels Ho., $2-3). — Opposite lies —**

73 M. (r.) **Ogdensburg (Seymour Ho., $2-2 1/2; Lovejoy, $2),**
a city with 11,662 inhab. and a trade in grain. From Ogdensburg to
Rouse’s Point, see p. 128; to Rome and Utica, see p. 206.

About 10 M. below Ogdensburg we pass through the Galoup
Rapids (7 1/2 M. long), which is followed, 4 1/2 M. lower, by the Ra-
pide Plat. Neither of these is very noticeable, though each is avoided
by a canal (Canadian side) in going upstream. Between the two
rapids we pass the narrowest point in the river (500 ft.). Numerous
islands.

95 M. (1.) Morrisburg, just below the Rapide Plat
109 M. (r.) Louisville Landing, whence stages run to (7 M.)
Massena Springs (Hatfield Ho., $2 1/2; Harrowgate Ho., $1 1/2-2;
comp. p. 207).

109 M. (1.) Dickinson’s Landing, at the head of the *Long Sault
Rapids, between the Canadian shore and Long Sault Island. The
rapids are 9 M. long and are tumultuous enough to give a slight
suggestion of danger to the process of ‘shooting’ them. They are
avoided in ascending by the Cornwall Canal, 11 1/2 M. long. Part
of the water of these rapids is to be deflected into a great power-canal
for industrial purposes.

121 M. (1.) Cornwall (Rossmore Ho., $2-2 1/2), a town of 6805 in-
hab., at the foot of the Long Sault Rapids. — The boundary between
the United States and Canada bends away from the river here, and the
Indian village of St. Regis, opposite Cornwall, is in the Province of
Quebec. The Adirondack Mts. (p. 183) are now visible to the right.

130 M. Lancaster lies on the expansion of the river named Lake
St. Francis, 28 M. long and 5-7 M. wide. — Beyond (142 M.) Port
Louis (r.) both banks are in Quebec.

At (151 M.) Coteau Landing the river is crossed by a railway
swing-bridge (comp. Baedeker’s Canada). We now enter a series of
rapids which follow each other at short intervals, with a combined
length of about 11 M.: Coteau Rapid, Cedar Rapid, Split Rock Rapid,
and the *Cascades. These are avoided, in going upstream, by the
Beauharnois Canal, 11 1/4 M. long. The large Roman Catholic
churches of the villages that line the banks are now very conspicuous.

164 M. (r.) Beauharnois, at the foot of this series of rapids, lies
opposite the mouth of the Ottawa River, which enters the St. Lawrence
by two channels, enclosing the island of Perrot. The village of
St. Anne, on the E. bank of the E. branch, is the scene of Tom Moore’s
well-known ‘Canadian Boat Song’. — The Lake of St. Louis, which
we now traverse, is 12-15 M. long.

180 M. (1.) Lachine (Lake View, Harvey, Dominion, $2) lies at
the head of the famed *Lachine Rapids, the shortest (3 M.) but
most violent of all, forming an exciting and dramatic close to our
voyage. The rapids begin just below the fine bridge of the Canadian
Pacific Railway. Soon after leaving the rapids we pass under the
*Victoria Bridge. To the left lies —

194 M. Montreal (see Baedeker’s Handbook to Canada).
   a. Via Pennsylvania Railroad.

90 M. RAILWAY in 2¼-2½ hrs. (fare $2½; parlor-car 50 c.). The huge railway-station is in Jersey City (p. 6; ferries from 23rd St., Desbrosses St., Cortlandt St., and Brooklyn).

Jersey City, see p. 66. The train runs to the W. to (9 M.) Newark (Continental, Park, $2-3), a prosperous city on the Passaic, with (1895) 215,806 inhab., handsome churches, pleasant parks, large breweries, and extensive manufactures of jewelry, iron goods, celluloid, paper, and leather (value in 1890, $82,000,000). The line passes through the town 'at grade'. — At (14½ M.) Elisabeth (The Clark, $2-3), a well laid-out city with (1895) 43,834 inhab., we cross the Central R.R. of New Jersey. A tablet to mark the original site of the College of New Jersey (see below) was unveiled here in 1897. — 19½ M. Rahway, with (1895) 7915 inhab. and considerable trade and manufactures. 24 M. Menlo Park, the former home of Thomas A. Edison, the 'Wizard of Menlo Park'. — 31½ M. New Brunswick (Mansion Ho., Palmer Ho., $2-3), on the Raritan, a manufacturing city of (1895) 19,910 inhab., is the site of Rutgers College (seen to the right), a well-known institution of the Dutch Reformed Church, chartered in 1770 (150 students). In entering the city we cross a bridge over the river, the Delaware & Raritan Canal, and the road. — At (41 M.) Monmouth Junction diverges the line to Long Branch, etc. (R. 33 c.). — 47 M. Princeton Junction, for the branch to (3 M.) Princeton (*Princeton Inn, $4; The Nassau, $2½), with (1895) 3488 inhabitants. Princeton is the home of ex-President Cleveland.

Princeton University or College of New Jersey, founded at Elizabeth (see above) in 1746 and transferred to Princeton in 1757, ranks high among the American universities and is attended by about 1100 students. The college buildings, among the chief of which are Nassau Hall, Alexander Hall, Blair Hall, Marquand Chapel, the Art Museum, and the new Library (180,000 vols.), stand in a beautiful tree-shaded 'campus', 225 acres in extent. The Continental Congress sat at Nassau Hall from June 16th to Nov. 4th, 1783, and here Washington received the nation's thanks for his successful conduct of the Revolution. The Princeton Theological Seminary (Presbyterian) has about 250 students. — The Battle of Princeton (Jan. 3rd, 1777), in which Washington defeated the British, was one of the most important in the early part of the Revolutionary struggle. — At Rocky Hill, 4 M. to the N. of Princeton, is the house where Washington wrote his Farewell Address to the Army in 1783, now preserved as a historical museum (adm. 25 c.). — The Lawrenceville School, 5 M. to the S.W. of Princeton, ranks among the best in the country.

The line now descends towards the Delaware. — 57 M. Trenton (Trenton, Windsor, $2-3, R. from $1; American, $2-3), the capital of New Jersey, is a well-built town, situated on the Delaware, at the head of navigation. Pop. (1895) 62,518. Its chief industry is the making of pottery (value in 1890, $4,500,000), the material for which is found on the spot. The State House is a handsome
edifice overlooking the river; the State Lunatic Asylum and Penitentiary are large buildings. The Delaware & Raritan Canal intersects the city.

On Dec. 26th, 1776, Washington crossed the Delaware here and surprised and routed the Hessians under Rall, following up this success by the battle of Jan. 2nd, 1777, in which he maintained his ground against Lord Cornwallis. — Trenton is the junction of a branch to Manunka Chunk and the Delaware Water Gap (see E. 29 c).

Bordentown (Bordentown Ho., § 2), about 5 M. to the S. of Trenton, was from 1815 till 1832 the home of Joseph Bonaparte, ex-king of Spain, whose fine park is still shown.

Crossing the Delaware, we now enter the 'Keystone State' of Pennsylvania and traverse a rich farming country. To the right is the canal. At (58 M.) Morrisville the French general Moreau lived from 1806 to 1813, in a house built by Robert Morris, the 'banker of the Revolution'. 67 M. Bristol. As we approach Philadelphia we leave the Delaware and traverse a district full of mills, manufactories, and artisans' dwellings. 81 M. Frankford is the junction of the 'bridge' trains to Atlantic City (see p. 248). 85 M. Germantown Junction, an important suburban railway-centre (comp. p. 243).

As we enter Philadelphia we cross and recross the Schuylkill ('Skoolkill'). *Views of the city and Fairmount Park (p. 242).

90 M. Philadelphia (Broad Street Station), see p. 230.

b. Via Royal Blue Line.
(Bound Brook Route.)

90 M. Central R. R. of New Jersey and Philadelphia & Reading R. R. in 2 3/4 hrs. (fares as above). The route is much the same as the Penna. R. R. — Station in Jersey City (see p. 6; ferry from Liberty St.).

Jersey City, see p. 56. The train crosses Newark Bay by a bridge 2 M. long, with views of Newark (p. 228) to the right and Staten Island (p. 55) to the left. 11 M. Elizabethport, the junction of branches to Newark and to the New Jersey seaside-resorts (R. 33), is the seat of the Singer Sewing Machine Co. (5000 hands). 13 M. Elizabeth (see p. 228). — 24 M. Plainfield (Revere Ho., from $2; Mountain View Inn, on the hills near the town), an industrial town with (1895) 13,629 inhabitants. On the Orange Hills, to the right, is Washington's Rock, whence that general is said to have observed the movements of the British troops. — At (30 M.) Bound Brook, on the Raritan, we pass on to the tracks of the Philadelphia & Reading R. R. In 1777 the Americans were defeated here by Lord Cornwallis. The line now traverses corn-fields and orchards. — From (58 M.) Trenton Junction a short branch-line runs to (4 M.) Trenton (p. 228). Our line crosses the Delaware by a fine bridge (views) at (60 M.) Yardley. 68 M. Langhorne, a summer-resort of the Philadelphians; 79 M. Jenkintown, the junction of a line to Bethlehem (p. 249). From (85 M.) Wayne Junction lines radiate in all directions.

90 M. Philadelphia (Reading Terminal Station; see p. 230).
32. Philadelphia.

Railway Stations. Broad Street Station (Pl. F, 6; restaurant), facing the City Hall, for the trains of the Pennsylvania R.R. to New York, Baltimore, Washington, Pittsburgh, Chicago, Gettysburg, Atlantic City, and numerous local lines; Reading Terminal Station (Pl. F, 6; restaurant), of the Philadelphia and Reading R.R., for New York (R. 31b), Washington, Baltimore, Gettysburg, Lehigh Valley, etc.; Baltimore & Ohio Station (Pl. E, 6; restaurant), cor. of Chestnut St. and 24th St., for Washington, the West, etc.; West Jersey Railroad Station (Pl. I, 6), Camden, reached by ferry from Market St. (see Pl. H, I, 6), for Cape May, Atlantic City, and the Amboy Division of the Penna. R. R.; Philadelphia & Atlantic City Railroad Station (Pl. I, 8), Camden (ferry from Chestnut St. or St., for Atlantic City, etc. Also numerous Suburban Stations. — Tramways run from all these stations or ferries to the chief centres of the city, and Hotel Omnibuses (25 c.) meet the principal trains. Cabs, see below.

Hotels. Walton (Pl. k; F, 6, 7), a large house at the cor. of Broad and Locust Sts., R. from $1/2; Stratford (Pl. a; F, 6), Broad and Walnut Sts., R. from $2; Bellevue (Pl. b; F, 6), at the opposite cor. of Broad and Walnut Sts., R. from $2; Rittenhouse, Chestnut St., cor. of 22nd St. (Pl. E, 6), $3 1/2-4; R. $1 1/2-2; Lafayette (Pl. c; F, 6), Broad and Sansom Sts., $4, R. from $1; Colonnade (Pl. d; F, 6), Chestnut and 15th Sts., from $3 1/2, R. from $1; Aldine (Pl. e; E, 6), 1910 Chestnut St., a good family hotel, $3 1/2-6, R. $1-5; Lorraine (Pl. n; F, 4), cor. N. Broad St. and Fairmount Ave., at some distance from the centre of the city, $3 1/2; Stanton (Pl. 11; F, 7), Broad St., cor. Spruce St., R. from $2; Continental (Pl. 1; G, 6), 9th and Chestnut Sts., $2 1/2-4, R. from $1; Green's (Pl. h; G, 6), 8th and Chestnut Sts., R. $1 1/2-2; Bingham (Pl. 11; F, 6), 11th and Market Sts., $2 1/2, well spoken of; Windsor, 1225 Filbert St., from $2, R. from $1; "Dooner's, 27 S. 10th St., R. $1-1/2 (men only); Hanover (Pl. g; F, 6), 12th and Arch Sts., from $2, R. from $1; Vendig (Pl. m; F, 6), 12th and Market Sts., R. $1-2 1/2.

Restaurants. *Bellevue Hotel, see above, somewhat expensive; *Boldt, Bullitt Building, 4th St., below Chestnut St.; Lafayette Hotel (see above), table-d'hôte luncheon 50 c., D. $1; Colonnade Hotel, see above; Dooner, 10th St., above Chestnut St.; Green, see above; *Soulas' Rathskeller & Restaurant, in the basement of the Betz Building (p. 233), City Hall Square, D. (from 12 to 3) 50 c.; *Soulas, 5th St., above Chestnut St., a similar establishment, for men; Boothby, 1235 Chestnut St., near 13th St. (oysters); Partridge, 15 N. 8th St.; Wannemaker's, see p. 233; Bennett's Lunch Rooms, 529 Chestnut St., 13 S. 9th St., and 113 and 4311 Market St. (low prices); Bourse Restaurant, see p. 233; Women's Exchange, 12th St., to the S. of Chestnut St.

Tramways (Street Cars). Electric Cars traverse all the principal streets (fare 5 c., transfer-tickets 8 c.). Cars run to the E. on Columbia Ave., Jefferson, Girard Ave., Wallace, Green, Spring Garden, Callowhill, Race, Arch, Filbert, Market, Chestnut, Spruce, and Lombard Streets; to the W. on Columbia Ave., Master, Girard Ave., Poplar, Fairmount Ave., Spring Garden, Callowhill, Vine, Arch, Market, Sansom, Walnut, Pine, and South Streets; to the N. on 3rd, 5th, 8th, 9th, 11th, 13th, 16th, 18th, 19th, and 23rd Streets; to the S. on 2d, 4th, 6th, 7th, 10th, 12th, 15th, 17th, 19th, 20th, and 23rd Streets.

Cabs. — (1). Pennsylvania R.R. Service. Hansoms (1-2 pers.) 1 1/2 M., 25 c., each 1 M. addit. 15 c., per hr. 65 c.; each addit. 1/4 hr. 20 c.; no trunks carried. Four-wheelers: 1-2 pers., 40 c., 20 c., 75 c., 20 c.; each addit. pers. 10 c.; each trunk 25 c., small article carried outside 10 c. — (2). Reading R.R. Service. Four-wheelers, 1-2 pers. 50 c., 25 c., 75 c., 25 c.; each addit. pers. 25 c. — (3). City Service. Carriages (two horses): 1 pers., 1 M. 75 c., 2 pers. $1.25, each addit. pers. 25 c.; 2 M., $1.35, $1.75, 25 c.; each 1 M. addit., each pers. 50 c.; per. hr., 1-2 pers., $1.50, each pers. addit. 25 c. One trunk or valise free, each extra article of luggage 6 c.
Ferries cross the Delaware to Camden (p. 243) from Market, Vine, South, Chestnut, and Shackamaxon Sts. (3c.), and to Gloucester (p. 243) from South St. (10c.).

Steamers. Steamers ascend the Delaware to Burlington and other points. Steamers also ply to Liverpool (Wed.; 'American Line'), London, Antwerp, New York, Boston, Baltimore, Savannah, Charleston, Florida, etc.

Theatres. Academy of Music (Pl. F, 7), Broad St., cor. of Locust St. (2900 seats), used for operas, concerts, balls, etc.; Chestnut Street Opera House (Pl. G, 6), 1023 Chestnut St.; Chestnut Street Theatre (Pl. F, 6), 1211 Chestnut St.; Broad St. Theatre (Pl. F, 7), near Locust St.; Walnut St. Theatre, cor. Walnut and 9th Sts. (Pl. G, 6); Arch Street Theatre (Pl. G, 6), 613 Arch St. (1800 seats); Park Theatre (Pl. F, 4), Broad St., cor. of Fairmount Ave. (2203 seats); Grand Opera House (Pl. F, 3), N. Broad St., cor. of Montgomery Ave.; Girard Ave. Theatre, Girard Ave., near 7th St. (Pl. G, 4); Eleventh Street Opera House (Pl. F, 6), near Chestnut St (minstrel entertainments); Kensington Theatre, cor. E. Norris St. and Frankford Ave. (Pl. H, 2); National Theatre (Pl. G, 5), 10th St. and Callowhill St. (varieties); Washington Park Theatre, see p. 243. — Zoological Garden, see p. 243.

Clubs. Philadelphia, N.W. cor. 13th and Walnut Sts.; Rittenhouse, 1811 Walnut St.; University, 1510 Walnut St.; Union League, Broad St., cor. of Sansom St.; Reform, 1520 Chestnut St.; Mercantile Club, N. Broad St., cor. of Master St.; Art Club, see p. 240. — The well-known dinners of the Clover Club are usually held in the Bellevue Hotel (p. 230). — Philadelphia is the American headquarters of Cricket. The chief clubs are the Belmont, near 49th St. Station; Merion, at Ardmore; Philadelphia, Wissahickon Heights; Mannheim, Germantown, near Queen Lane Station.

Tourist Agents. Raymond & Whitcomb, 1005 Chestnut St.; Thos. Cook & Son, 826 Chestnut St.; Henry Gaze & Sons, 155 S. 5th St.

Post Office (Pl. G, 6), cor. of Chestnut and 9th Sts.; also several substations and numerous letter-boxes.

Exhibitions of Art. Academy of Fine Arts, Broad St., cor. of Cherry St. (adm. free); Memorial Hall, Fairmount Park, see p. 212; Art Club, see p. 240.

British Consulate, 708 Locust St.

Philadelphia (the 'Quaker City'), the third city of the United States in extent and population (1,046,964 inhab. in 1880; now estimated at 1,250,000), lies mainly upon a broad plain between the Delaware and the Schuylkill, 96 M. from the Atlantic Ocean. It is 22 M. long from N. to S. and 5-10 M. wide, covering 130 sq. M., or a little more than the parliamentary district of London, though, of course, not so completely built over. It probably contains a larger proportion of small houses than any other large city in the world (5.79 inhab. per house; New York 16.37) and is sometimes called the 'City of Homes'. It is laid out with chessboard regularity (see p. 232) and contains 1150 M. of streets, of which 900 M. are paved. The characteristic Philadelphia house is a two-storied or three-storied structure of red pressed brick, with white marble steps and white or green window-shutters. The two rivers give it about 30 M. of water-front for docks and wharfare, and it is the headquarters of two of the greatest American railways (the Pennsylvania and the Reading). Its commerce by sea and land is very large, and as a manufacturing centre it ranks next to New York. The great wholesale business-thoroughfare is Market Street, running E. and W. between the two rivers, while Chestnut Street, parallel with it
on the S., contains the finest shops, the newspaper-offices, etc. Broad Street is the chief street running N. and S. Among the most fashionable residence-quarters are the W. parts of Walnut, Spruce, Pine, Arch, Race, and Vine Streets. Eighth Street is the great district for cheap shops.

**History.** Philadelphia, the 'City of Brotherly Love' or 'Quaker City', was founded in 1682 by a Quaker colony under William Penn (1644-1718), who purchased the site from its Indian owners. [A Swedish colony, however, settled on the Delaware, a little lower down, in 1638 (comp. p. 240), and many of Penn's original patentees were descendants of these settlers.] The city attracted large numbers of immigrants and received its charter from Penn in 1701, when it had about 4,000 inhabitants. From about that time to the present century it rivalled Boston as the leading city of the country, and it was the scene of the most important official steps in the Revolution. The first Continental Congress assembled here in 1774; the **Declaration of Independence** was signed here on July 4th, 1776; the **Constitution of the United States** was drawn up and promulgated here in 1787; the first President of the United States resided here; and here Congress assembled till 1797. From Sept., 1777, to June, 1778, the city was in the possession of the British. During the present century its history has been one of quiet and rapid growth in size and prosperity. In 1876 Philadelphia was the scene of the **Centennial Exhibition**, held in honour of the 100th anniversary of the Declaration of Independence, which was visited by ten million people. — After William Penn, the man whose name is most intimately associated with Philadelphia is **Benjamin Franklin** (pp. 296, 240), who came here in 1723 at the age of eighteen. The **Friends or Quakers** still form a very important element in Philadelphia, many of the oldest, wealthiest, and most esteemed families belonging to this sect.

**Industry and Commerce.** The value of the manufactures of Philadelphia in 1890 was $570,000,000 (114,000,000l.), the number of hands employed being 269,000. The chief products are machinery, locomotives, iron wares, ships, carpets, woollen and cotton goods, sugar, drugs, and chemicals. The value of its foreign trade in 1897 was $95,406,642. In 1897 5,906 vessels entered and 5,904 cleared the port.

**Streets.** In planning his city Penn laid out two wide thoroughfares crossing it at right angles (High, now Market St., and Broad St.), with an open space at their intersection and four other squares (Washington, Franklin, Logan, and Rittenhouse Squares) near the outer corners of his plan. The other streets were all laid out parallel to the two above-named, and this rule has also been observed in the subsequent extensions of the city. Those parallel to Market St. have names (often taken from trees), while those parallel with Broad St. are numbered (Front, Second, etc.). The prefixes North and South distinguish respectively the numbered streets to the N. and S. of Market St. The houses on the N. or E. side of the street have odd numbers, and those on the S. or W. side even numbers. The numbers of the E. and W. streets begin at the Delaware, those of the N. and S. streets at Market St. With each new block a new century of numbers begins, although there are seldom more than 40 numbers in a block. With this system a very slight familiarity with the city enables one to find his way to any house. Thus, e.g., 1521 Arch St. must be between N. 15th St. and N. 16th St.

In **City Hall Square** (Pl. F, 6), at the intersection of Broad St. and Market St., in the centre of the city, stands the new **City Hall** (Pl. F, 6), generally known as the **Public Buildings**, a huge pile with a granite basement-story and white marble superstructure, begun in 1874. It is 486 ft. long from N. to S. and 470 ft. in breadth, covering a greater area (4½ acres) than any other building in the United States (Capitol at Washington, 3½ acres; St. Peter's at
Rome, 4½ acres; Palais de Justice at Brussels, 61/4 acres). The Tower, 510 ft. high, is surmounted by a statue of William Penn, 37 ft. in height. The style of the building is modified French Renaissance; the architect was John McArthur Jr. (d. 1890). Its cost, including the furnishing, was $27,000,000. Visitors may ascend to the roof (elevators), which commands an extensive view; a special permit is necessary for the tower.

The building contains 750 rooms. The N. side is devoted to the Mayor's Office, the Council Chamber, and other offices of the municipal government. The S. side contains the Supreme Court of Pennsylvania and other courts.

The broad pavement round the City Hall is to be adorned with statues. Those of Gen. Reynolds (1820-63), Gen. McClellan (1826-85), and Stephen Girard (p. 239) have already been erected.

On the W. side of City Hall Sq., opposite the City Hall, is the *Broad Street Station (Pl. F, 6) of the Penna. Railroad, an enormous structure, lately rebuilt. The train shed has a span of 304 ft. The handsome waiting-room contains a large allegorical relief, while one wall is covered with a mammoth railway map of the United States. — On the N. side of the square, at the corner of Broad St. and Filbert St., is the *Masonic Temple (Pl. F, 6), a huge granite structure in the Norman style, erected in 1868-73 at a cost of $1,500,000 (300,000£). Among its most prominent features are the tower, 250 ft. high, and the elaborately carved Norman porch. The lodge-rooms are finished in accordance with seven different styles of architecture (Egyptian, Ionic, Corinthian, Norman, Gothic, Renaissance, and Oriental). — On the E. side of the square, occupying the block bounded by the square, Market St., 13th St., and Chestnut St., is Wanamaker's Store (Pl. F, 6), the Bon Marché or Whiteley's of Philadelphia, with 4500 employees (restaurant, see p. 230). — On the S. side of the square is the tall Betz Building, completed in 1893. — At the S.E. angle of the square (entr. from Chestnut St.), adjoining the last, is the *United States Mint (Pl. F, 6; adm. 9-12, free), a white marble building with an Ionic portico. The Mint was established in 1792; the present building dates from 1829-33.

This is the parent mint of the United States. The various processes of coining are interesting. The total value of the pieces coined here from 1793 to 1891 was: gold $676,389,759, silver $566,001,000, minor coins $23,946,941. In 1891 the silver dollars issued here numbered 8,694,206. In a room upstairs is a Collection of American and other Coins. The most interesting are the Selections in the case at one end of the room, including the "Widow's Mite" (No. 3116), found among the ruins of the Temple at Jerusalem. A new Mint is being erected in Spring Garden St. (Pl. F, 5).

*CHESTNUT STREET (Pl. A-H, 6), on which the Mint fronts, is the chief street of Philadelphia, containing many of the handsomest and most interesting buildings; and we now follow it towards the Delaware (E. or left), passing the Mint (left, see above). The S. side pavement is the fashionable promenade of the Quaker City. To the W. of the Mint is the Girard Life Insurance Building. At the corner of 12th St. (r.) is the Beneficial Saving Fund Society, and at the corner of 10th St., to the left, is the New York Mutual Life Insurance Co.
In 12th St., to the N., is the William Penn Charter School, founded in 1689. In 10th St., also to the N., is the Mercantile Library (Pl. G, 6), with 180,000 vols. and a free reading-room (9-10). — In the same street, to the S., is the Jefferson Medical College (Pl. G, 6), with an anatomical museum.

Between 10th and 9th Sts., to the left, are the City Trust Co., the Penn Mutual Life Building (with an elaborate façade), and the Record Office. At the corner of 9th St., extending on the N. to Market St., is the *Post Office (Pl. G, 6), a large granite building in the Renaissance style, erected at a cost of $5,000,000 (£1,000,000). It also contains the United States Courts and the offices of various Federal officials. Between 8th and 7th Sts. (left) is the highly ornamented front of the Union Trust Co. This neighbourhood contains a large number of newspaper-offices. At the corner of 6th St., on the Public Ledger Building, is a Statue of Franklin (1706-90).

In 7th St., a little to the N. of Chestnut St., is the Franklin Institute (Pl. G, 6), with a library, museum, and lecture-hall. Opposite is the free exhibition of the Builders’ Exchange.

We now reach, on the right, between 5th and 6th Sts., *Independence Hall (Pl. G, 6), or the old State House (open on week-days, 9-1), a modest brick edifice (1732-35), which is in some respects the most interesting building in the United States. The steeple was added afterwards. Here the Continental Congress met during the American Revolution (1775-81), and here, on July 4th, 1776, the Declaration of Independence was adopted. In 1897-98 the whole building was restored as far as possible to its original condition.

Passing through the door in the centre, we first enter (left) the East Room or Independence Hall proper, the actual scene of the deliberations of those statesmen of whom William Pitt wrote: ‘I must declare that in all my reading and observation, for solidity of reasoning, force of sagacity, and wisdom of conclusion, under such a complication of difficult circumstances, no body of men could stand before the National Congress of Philadelphia’. With the exception of a new flooring, the room is substantially in the same state as when the Congress sat, and the old furniture has been replaced in it, including the table on which the Declaration of Independence was signed. On the back of the chair of the President of the Congress (John Hancock) is the emblem of which Franklin said that he had often wondered, before the success of the Revolution was assured, whether it was the rising or the setting sun. On the E. wall hangs a facsimile of the Declaration of Independence, of which the original is preserved at Washington (see p. 285). On the other walls are portraits of Washington (by Peale), of all but twelve of the signers of the Declaration, etc.

In the State Supreme Court or West Room (to the right of the entrance hall) are the original court chairs and portraits of Chief Justices McKean, Chew, and Allen.

On the upper floor are the Banqueting Hall, the Governor’s Room (W.), and the Room of the Provincial Council. The collection of portraits in these rooms includes Washington and his generals, officers of the navy, and other prominent men of the Revolutionary period. Here, too, are the painting of Penn’s Treaty with the Indians, by Benj. West, and the original Charter of the City of Philadelphia (1701).

At the head of the Stairway, on a truck suspended from its original yoke under the dome of the steeple, stands the famous Liberty Bell, the first bell rung in the United States after the Declaration of Independence. It was afterwards used on various occasions of national importance, but was cracked in 1835, and since 1843 has never been sounded. It was originally cast in England, but was recast in Philadelphia.
The central part of the State House is connected by open arcades (restored to their original appearance) with two smaller wing buildings. These contain relics of the Revolution. Adjoining that to the W., at the corner of 6th St., is the old Congress Hall, in which Washington was inaugurated in 1793 and Adams in 1797. To the E., at the corner of 5th St., is the Old City Hall, dating from 1791 and occupied by the U. S. Supreme Court in 1791-1800. — In front of the State House is a Statue of Washington, by Bailey, erected in 1869. — Behind the State House lies Independence Square, an open space 4 acres in extent.

Opposite Independence Hall is the picturesque gabled building of the Pennsylvania Life Insurance Co.

In 5th St., just below Chestnut St., is the American Philosophical Society, an outgrowth of the Junto Club, founded by Franklin in 1743. It contains a library of 60,000 vols. and many interesting relics.

Beyond 5th St., Chestnut St. is flanked on both sides with handsome banks and insurance-offices. At the corner of 5th St., to the right, is the white marble *Drexel Building (Pl. G, 6), in which is the Stock Exchange (visitors admitted to the gallery, 10-3). The roof, to which visitors are admitted, commands an excellent view. Adjacent is the Custom House (Pl. G, 6), with a Doric portico, originally erected in 1819-24 for the United States Bank.

In 5th St., to the N. of Chestnut St., stands the *Bourse (Pl. G, 6), erected in 1895 at a cost of $1,500,000, and containing the offices of the Board of Trade, the Commercial Exchange, and other business organisations. The two lower stories are a good example of the style of Francis I. Visitors are admitted to the galleries flanking the huge glass-covered hall. There is a restaurant upstairs.

A lane diverging to the right between 4th and 3rd Sts., opposite the Fidelity Safe Deposit Co., leads to *Carpenters' Hall (Pl. G, H, 6; open to visitors), where the First Colonial Congress assembled in 1774. It contains the chairs used at the Congress, various historical relics, and the inscription: 'Within these walls Henry, Hancock, and Adams inspired the delegates of the colonies with nerve and sinew for the toils of war'. — Chestnut St. ends at the Delaware River.

No. 133 South Second Street occupies the site of the 'Slate-roof House', the home of William Penn.

Walnut Street (Pl. A-H, 6) runs parallel to Chestnut St., a little to the S. In this street, at the intersection of Dock St. and 3rd St., is the Merchants' Exchange (Pl. H, 6), with a semicircular portico facing towards the river, near which (in 3rd St.) is the Girard Bank, originally built for the first U.S. Bank and long owned by Stephen Girard (p. 239). At 4th St. is the fine building of the Manhattan Insurance Co.

Three blocks to the S., at the corner of Pine St. and 3rd St., is St. Peter's Church (Pl. H, 7), dating from 1758-61 and little changed in appearance. The brave Commodore Decatur (1779-1820) is buried in the old churchyard.

In 4th St., to the S. of Walnut St., is the Philadelphia Commercial Museum (Pl. G, 6; open daily, except Sun. and public holidays; adm. free), established in 1895, to disseminate knowledge of the products and requirements of different parts of the world, and so to encourage the foreign trade of the United States. It includes interesting collections, samples of goods and of raw materials, arranged according to countries and kinds, testing laboratories, a bureau of information, and a commercial library.
Between 6th and 7th Sts. Walnut St. passes Washington Square (Pl. G, 6, 7; p. 232), with a great variety of trees. At the N.W. corner of Washington Square is the Philadelphia Saving Fund Society, erected in 1868 and 1897. At the S.W. corner of Walnut and 10th Sts. (Pl. G, 6) is the Western Saving Fund Society. At the N.W. corner of Walnut St. and Juniper St., to the right, is the Witserspoon Building, with its 13 or 14 stories.

Two blocks to the S. of Walnut St., bounded by Spruce, Pine, 8th, and 9th Sts., stands the Pennsylvania Hospital (Pl. G, 7), the oldest in the city. — No. 413 S. 10th St., the house in which Henry George (d. 1897) was born, has been fitted up as a memorial 'single tax' library and reading-room. — At the corner of Locust St. and 13th St., one block to the S. of Walnut St., stands the building of the "Historical Society of Pennsylvania (Pl. F, 7; adm. 10-6), founded in 1834, which contains highly interesting historical relics, paintings, and autographs. In the Fireproof Room on the groundfloor are a letter of President Lincoln (1864) and the play-bill of the theatre on the night he was assassinated; the Bradford Almanack of 1686 (printed 1685), the first book printed in the Middle States; many other examples of Bradford, Franklin, and other printers of the Middle States before 1800; relics of Washington, Jefferson, and Franklin; handbill printed at Charleston (1860), announcing the dissolution of the Union; William Penn's Bible and razor; the original Instructions of Penn regarding Pennsylvania; first copy of Poor Richard's Almanack; one of the Stamp Act stamps; German Bible and other works printed by Christopher Saur, including the First Bible printed in America. — On the Upper floor are the Tower Collection of Colonial Laws down to 1789; portraits of Penn, Washington, Franklin, Morris, etc.; relics of Robert Morris; the News of the Battle of Lexington, passed on to Philadelphia in the manner of the 'Fiery Cross' (Ap. 19-24th, 1775), with attestations of the persons through whose hands it passed; letter of Washington; original MSS. of 'Home, Sweet Home' and 'The Star-Spangled Banner'; telescope of Paul Jones; letters and will of John Brown; chairs that belonged to Penn; and part of Franklin's Printing Press (front room).

At the N.E. corner of Locust and 13th Sts. is the College of Physicians (Pl. F, 6), incorporated in 1753, with a fine medical library, second only to that of the Royal College of Physicians in London. The large hall, in which the Anatomical Museum is displayed, contains a good chimney-piece.

At the corner of Locust St. and Juniper St. is the Academy of the Protestant Episcopal Church, a well-equipped and well-managed day-school for boys, founded in 1785 and of considerable interest from its bearing on local history. — The Philadelphia Library (Pl. F, 6), also at the corner of Locust St. and Juniper St., was founded by Dr. Franklin and others in 1731 and contains 190,000 vols., a clock said to have belonged to Cromwell, part of Franklin's electrical machine, and other relics.

Walnut St. now crosses Broad St., to the W. of which it consists mainly of private residences. No. 1524 is the home of Dr. S. Weir Mitchell, the novelist. Between 18th and 19th Sts. we pass Rittenhouse Square (Pl. E, 6; p. 232), a fashionable residence-quarter.

The Church of St. Mark, Locust St., between 16th and 17th Sts., is a singularly pure example of the early Decorated Gothic style.

On reaching the bridge at the Schuylkill River (Pl. D, 6) we may descend the flight of steps to the right and follow 24th St. to the spacious Baltimore and Ohio Railway Station (Pl. E, 6), which lies on the river, in Chestnut St. Following the latter street towards the E., we pass the Second Reformed Episcopal Church, on the right, and the First Unitarian Church and the Swedenborgian Church (cor. 22nd St.) on the left. At 15th St. are the Colonnade Hotel (p. 230;
right) and the Young Men's Christian Association (Pl. F, 6; r.), containing a fine hall. To the right, at the corner of Broad St., is the tall Land Title Building, erected in 1897-98 (14 stories).

We now again reach our starting-point at Broad St. (comp. p. 232), where we may either turn to the left and proceed past the City Hall and up North Broad St., or follow South Broad St. to the right.

North Broad Street (Pl. F, 6-1), beginning on the N. side of City Hall Square, a handsome street, 113 ft. wide, contains in its upper portion many of the finest private residences in Philadelphia. To the right, at the corner of Filbert St., is the Masonic Temple (see p. 233), which is adjoined by the handsome Arch Street Methodist Episcopal Church. Opposite is the Lutheran Church of the Holy Communion, of green serpentine. Adjacent (left) is the tall Fidelity Mutual Life Association. To the right, opposite, is the Odd Fellows' Temple, a handsome building, erected in 1895 at a cost of $1,000,000. — To the left, at the corner of Cherry St., is the Pennsylvania Academy of the Fine Arts (Pl. F, 6), a building in the Venetian style of architecture (admission, see p. 231; catalogue 25 c.). The Academy was founded in 1805, and besides its collections supports an excellent art-school. Its collections include 500 paintings, numerous sculptures, several hundred casts, and 50,000 engravings. Annual exhibitions of the works of living artists are held here in winter. Some of the most notable possessions are given below.

Room E. Modern European Works. B 293. Richard Wilson, Falls of Tivoli; D 412. Fed. Parriuini, Cesar Borgia and Macchiavelli; D 418. C. HERN, Masked Ball at the Opera House.

Snow-storm.

Room H. D 417. Godfreyd Guffens, Rouget de Lisle singing the Marsellaise for the first time (1792).

Print Room (groundfloor). Field Collection; C 301. Bonifazio Verone, Last Supper; C 310. Benozzo Gozzoli, Virgin and Child; A 105. J. S. Sargent, Mr. and Mrs. John W. Field.

In winter (Oct. to March) the concerts of the Philharmonic Orchestra are given at the Academy of the Fine Arts every Thurs. at 3 p.m.

Farther on (No. 145), to the right, is the Armoury of the State Fencibles (Pl. F, 5, 6).

Race Street (Pl. E-H, 5) leads to the left to Logan Square (Pl. E, 5; p. 232), on the E. side of which stands the Roman Catholic Cathedral of St. Peter & Paul (Pl. E, F, 5), a large edifice, with a Corinthian portico and a dome 210 ft. high. The interior is adorned with mural paintings, and over the high-altar is a Crucifixion by Brumidi. — On the S. side of the square, at the corner of 19th St., is the Academy of Natural Sciences (Pl. E, 5, 6), erected in 1875 and recently much enlarged. The society was founded in 1812. Its museum (open 9-5; free; entr. in 19th St.) contains valuable and extensive Collections of Natural History, among which may be specified the Morton Collection of Crania (1200), the huge Collection of Shells (200,000 specimens), the Herbarium, the Peruvian mummies, and the Ornithological Cabinet, which furnished Audubon with many of his types. The library contains 45,000 volumes.

On the W. side of Broad St., between Race and Vine Sts., are the Hahnemann College and Hospital (Pl. F, 5), probably the chief homeopathic institution of the kind in the world. Beyond the First Regiment Armoury (Pl. F, 5) we cross above the subway of the Reading Railway. To the right, at the corner of Spring Garden St., is the Spring Garden Institute (Pl. F, 5), for instruction in drawing, painting, and the mechanic arts (750 students). Adjacent is the Apprentices' Library (40,000 vols.). Opposite are the *Baldwin Locomotive Works, one of the most interesting industrial establishments in Philadelphia, employing 5000 men and turning out two locomotives daily (adm. after previous application, supported by an introduction).

Spring Garden Street, a pleasant residence-street, leads to the W. to (1 M.) the S. end of Fairmount Park (see p. 242). — To the E., at the N.W. corner of this street and 13th St., is the Philadelphia Normal School for Girls. — The Assembly Hall of the German Society of Pennsylvania, farther to the E., at the corner of Marshall St., is said to contain the best German library in America (35,000 vols.).

A little farther on are the Boys' Central High School (Pl. F, 5; left), an unusually large and handsome structure, and the Synagogue Rodef Shalom (r.), in a Moorish style.

Fairmount Avenue (Pl. D-H, 4), 1 M. from the City Hall, leads to the left to (1 1/2 M.) the Eastern Penitentiary (Pl. E, 4; warden, Mr. M. J. Cassidy), a large and well-managed prison (1100-1200 inmates), rendered widely known by a somewhat sensational passage in Dickens's 'American Notes' (adm. by ticket from one of the Board of Inspectors). The penitentiary, which covers 11 acres of ground, is built on the radiating plan, and is conducted on the so-called 'individual' system, in which an attempt is made by discriminating treatment to bring about a reform of the
criminals. There is about a warder to 30 prisoners (1 to 10 in similar English prisons); and most European visitors will be struck with what may seem the unreasonable comforts of the cells (many containing pictures, flowers, birds, etc.), the abundant rations, and the large amount of liberty granted to the prisoners. Knitting, carpentry, and the making of cigars, brushes, etc., are actively carried on. Dickens's criminal served 12 sentences in the penitentiary and was finally, at his own request, brought here to die. — Girard College (see below) lies about 1/2 M. to the N.

Farther up Broad St. are numerous handsome private houses, churches, and other edifices. At the N.W. corner of Broad St. and Girard Ave. (see below) is the handsome Widener Mansion (Pl. F, 3, 4), recently presented to the city for use as a free library. Beyond Master St., to the left (No. 1424), is the elaborate home of the Mercantile Club (Pl. F, 3; p. 231), erected in 1894; and beyond Oxford St., on the same side, is the Century Wheelmen Club (Pl. F, 3). The Grace Baptist Temple (Pl. F, 2) has accommodation for 6000 worshippers. Opposite is the entrance to Monument Cemetery (Pl. F, 2), and 3/4 M. farther out are the Base Ball Grounds (Pl. F, 1). Beyond this Broad St. runs out to Germantown (p. 243), 6 M. from the City Hall.

Near Monument Cemetery (see above), at the corner of 18th St. and Diamond St., is the South Memorial Church of the Advocate (Pl. E, 2), a reduced reproduction of Amiens Cathedral, built in 1897. It is 165 ft. long, 105 ft. wide (at the transept), and 106 ft. high. The spire over the crossing is 165 ft. high. The interior is profusely adorned with carving, and has 65 stained-glass windows by Clayton & Bell. The vaulting is, unfortunately, of wood only, painted to resemble stone.

Girard Avenue (Pl. D-H, 4) runs to the W. from N. Broad St. to (1/2 M.) *Girard College (Pl. E, 3, 4), one of the richest and most notable philanthropic institutions in the United States, founded in 1831 by Stephen Girard (1750-1831), a native of France, for the education of poor white male orphans (adm. on previous application to the Director or Secretary or at the office of the Girard Estate, 12th St., to the N. of Chestnut St.; no clergymen admitted). It now accommodates about 1600 boys, and the value of Mr. Girard's bequest of $2,000,000 has increased to about $16,000,000 (3,200,000l.).

The *Main Building is a dignified structure in the Corinthian style by T. U. Walter, resembling the Madeleine at Paris. In the vestibule are a statue of Stephen Girard, by Gevelot, and his sarcophagus; and a room on the ground floor contains several relics of him. The other buildings, about a dozen in all, include school-rooms, dormitories, dining-halls (one for 1000 boys), a swimming-bath, a technical institute, and a chapel. The services in the last are conducted by laymen, as Mr. Girard's will forbids the presence of a clergymen within the college enclosure. The Grounds, which are 41 acres in extent, are lighted by seven electric masts, 125 ft. high, and contain a monument to former pupils who fell in the Civil War.

Opposite Girard College are the Mary J. Drexel Home and the German Hospital (Pl. E, 4). To the N. of Girard College are the Women's Medical College and Hospital. — In Stiles St., to the E., between 17th and 18th Sts., are the large Church of the Gesù and various Roman Catholic colleges and hospitals.

South Broad Street (Pl. F, 6-8) leads to the S. from City Hall Square. Its intersection with Chestnut St., just to the S. of the City Hall, is environed with tall office-buildings (comp. pp. 233, 237). To the right, at the corner of Sansom St., stands the substantial building
of the *Union League Club (Pl. F, 6), the chief Republican club of Pennsylvania (1950 members). On the same side are the Lafayette, Bellevue, and Stratford Hotels (p. 230). Beyond these is the *Art Club (Pl. F, 6), in the Renaissance style, in which exhibitions of paintings, concerts, and public lectures are held. At Locust St., to the right, is the *Academy of Music (p. 231), while to the left is the imposing Hotel Walton (p. 230). Lower down, to the right, are the Horticultural Hall (flower-shows) and the Beth-Eden Baptist Church. At the corner of Pine St. (r.) is the *Pennsylvania School of Industrial Art (Pl. F, 7), incorporated in 1876, with a special view to the development of the art-industries of Pennsylvania, and now attended by 300 students. One of its most characteristic features is the Department of Weaving and Textile Design. The Industrial Museum Hall (p. 242) is connected with this excellent institution.

Below Pine St., Broad St. contains few buildings of importance. The visitor, however, should go as far as the *Ridgway Library (Pl. F, 8; open 9-5), which stands to the left, between Christian and Carpenter Sts., nearly 1 M. from the City Hall. This handsome building was erected, with a legacy of $1 1/2 million dollars left by Dr. Rush in 1869, as a branch of the Philadelphia Library (p. 236), and contains, besides its 120,000 vols., some interesting relics and rare books. — Broad St. ends, 1 M. from the City Hall, at League Island, in the Delaware, on which is a United States Navy Yard.

Market Street (Pl. A-H, 6), the chief wholesale business-thoroughfare of the city, is somewhat mean-looking and contains little of interest to the visitor. A little to the E. of City Hall Sq. it passes the Philadelphia & Reading Railway Station (Pl. F, 6), a tall Renaissance building, with a train shed little smaller than that of the Penna. R. R. (p. 233). The Penn National Bank (Pl. G, 6), at the corner of S. 7th St., occupies the site of the house in which Jefferson wrote the Declaration of Independence. The street ends at the Delaware, in a busy quarter of wharves, railway-stations, etc.

In N. Second St., a block above Market St., is Christ Church (Pl. H, 6; Epis.), erected in 1727-37, in the style of St. Martin's in the Fields, London, on the site of an older church of 1695, and attended by the Royal officers and early officials of the American Republic.

No. 239, Arch Street (Pl. G-H, 6), a little to the N., between 2nd and 3rd Sts., is the House in which the first American flag (13 stars and 13 stripes) was made by Betsy Ross (Mrs. John Ross) in 1777. It was purchased by a patriotic society in 1898 for preservation as a national monument. — At 5th St. is the Christ Church Burial Ground (Pl. G, 6), with many interesting tombs. A railed opening in the wall (in Arch St.) shows the flat tombstone of Benjamin Franklin (1746-90) and his wife.

One of the most interesting historical buildings in Philadelphia is the old Swedes' Church (Pl. H, 8; reached by 2nd St. tramway), in Swanson St., near the Delaware end of Christian St., erected in
1700, on the site of an old wooden church of 1646 (comp. p. 232), now used for divine service in the English language (interesting tombstones). Adjacent is the Cooper's Shop where the ladies of Philadelphia provided meals for the troops passing S. during the war. In the neighbourhood is the huge Spreckels Sugar Refinery.

At Shackamaxon, in Beach St., is the small Penn Treaty Park (Pl. H, 4), supposed to occupy the spot where Penn made his treaty with the Indians in 1682, under an elm that has long since vanished (a compact, in the words of Voltaire, 'never sworn to and never broken'). The island in the river here is known as Treaty Island. — A little farther to the N., at the foot of Ball St., are *Cramp's Ship Building Yards (Pl. I, 3), one of the chief American yards for the building of iron and steel ships (U.S. war-vessels, etc.). — The U. S. Naval Asylum (Pl. D, 7) accommodates 150 old sailors. A little to the S. is the Schuylkill Arsenal (Pl. D, 8), now devoted to the manufacture of army clothing.

West Philadelphia, the extension of the city beyond the Schuylkill, contains many of the chief residence-streets and several public buildings and charitable institutions.

The *University of Pennsylvania (Pl. C, 7) occupies a group of spacious buildings bounded by Pine St., Woodlands Ave., and 34th St. (reached by Market St., Walnut St., or South St. cars). It is now attended by about 2800 students and has acquired a special reputation for the excellence of its schools of medicine, biology, and political economy.

The College Hall is built of serpentine, with grey stone facings. The *Library, designed by Mr. Frank Furness and opened in 1880, is one of the most beautiful and most convenient library-buildings in the world. It contains 140,000 vols. and numerous interesting relics, and is open to the public. The University Museum of Archaeology and Palaeontology is of considerable value.

To the S. of the University are the large Blockley Almshouses (Pl. C, 7) and the Philadelphia Hospital. — A little to the N.E., at the corner of Chestnut St. and 32nd St., is the *Drexel Institute (Pl. D, 6), founded by A. J. Drexel at a cost of $2,000,000 and opened in 1891. Visitors are admitted (9-6).

The chief object of the institution is 'the extension and improvement of industrial education as a means of opening better and wider avenues of employment to young men and women.' It also provides free lectures and evening classes and contains a free library and a museum. The latter includes collections of wood and metal work, ceramics, embroideries, and textiles. The library contains a fine *Collection of Rare Prints, MSS., and Autographs, presented by Mr. G. W. Childs (incl. MSS. of Thackeray's lecture on George III., and Dickens's 'Our Mutual Friend', a vol. containing autograph-letters of every President of the United States, MSS. of Hood and Leigh Hunt, etc.). The institute is attended by 2000 students.

To the N. of Market St., between 42nd St. and 49th St., is the enormous Pennsylvania Insane Asylum (Kirkbride's Hospital; Pl. A, B, 6), situated in large grounds and containing West's picture of 'Christ healing the sick' (no adm. on Sat. or Sun.).

*Baedeker's United States. 2nd Edit.*
Philadelphia prides herself on few things more than on *Fairmount Park* (Pl. A-D, 1-5), the largest city park in the world, which covers an area of about 2900 acres (Prater 2500, Richmond 2250). The park proper extends along both banks of the Schuylkill for about 4 M., and the narrow strip along the Wissahickon (p. 243), 11 M. long, is also included in the park limits. Its natural beauties are considerable, but comparatively little has been done to it by arts. Several statues have been erected. The principal entrances (2-3 M. from City Hall) are at the end of Green St. (Pl. D, 5) and Girard Ave. (Pl. C, D, 4).

Entering by the Green St. Gate, we have to our left the original *Fair Mount* from which the park takes its name. Close by (right) is the *Washington Memorial* (40 ft. high), by Rudolf Siemering of Berlin, erected in 1897. It consists of a platform bearing an equestrian statue of George Washington, with allegorical fountain groups at the corners, representing the rivers Delaware, Hudson, Potomac, and Mississippi. The pedestal is also adorned with allegorical groups and medallions. On the top of the hill ("View") is a huge Reservoir, to which the river-water is pumped up by the adjoining *Water Works* (Pl. D, 5). A little farther on we cross a plaza, with a statue of Abraham Lincoln, beyond which is *Lemon Hill* (Pl. D. 4), crowned by the old house of Robert Morris, now a restaurant. Adjacent is the *Lemon Hill Observatory*, a high iron-work tower, the top of which (elevator 10 c.) commands a good view. At the foot of the hill, on the bank of the Schuylkill, are several picturesque boathouses belonging to different clubs. To the right is a reproduction of *Thom*s statues of Tam O'Shanter and Souter Johnny at Ayr (see Baedeker's *Great Britain*). On reaching the handsome *Girard Avenue Bridge* (Pl. C, 4), one of the widest in the world (120 ft.), at the end of which is a *Statue of Humboldt*, we cross it to the larger portion of the park on the W. bank of the river. To the left we see the Zoological Garden (see p. 213). Following the Lansdowne Drive, we pass (to the left) the *Penn House*, the old home of William Penn, transferred hither from Letitia St., near Market and Second Sts. A little farther on we reach *Memorial Hall* (Pl. B, 3), built as part of the Centennial Exhibition of 1876, at a cost of $1,500,000 (300,000 l.) and now containing a permanent collection of art and industry (*Pennsylvania Museum of Industrial Art*; open from 9.30, on Mon. from 12, on Sun. from 1, to 1/2 hr. before sunset; 300,000 visitors in 1897). In front of the building are two colossal winged steeds in bronze. The collections include paintings, sculptures, casts, stoneware, majolica, pottery, metal work, ivory carvings, electropate reproductions, tapestry, furniture, models, Japanese work, objects from British India, embroideries, etc. The *Wistach Collection of Paintings*, of which a special building is to be erected, is at present accommodated in Memorial Hall. It includes examples of Achenbach, Breton, Cabanel, Clays, Corot, Diaz, Gerôme, Lessing, Leys, Gabriel Max, Munkacsy, Troyon, Verboeckhoven, Bastien-Lepage, Constable, Delacroix, Gainsborough, Raeburn, Whistler, Ziern, and many other modern masters, mainly French or American; also a few old paintings and some pieces of sculpture (catalogue 20 c.). The absence of seats makes a visit to Memorial Hall somewhat fatiguing. — A little to the N. is the large *Horticultural Hall* (Pl. A, 3), another survival of the Centennial, finely situated above the Schuylkill and containing an admirable collection of tropical flora. In the vicinity are the picturesque *St. George's House* (the English building) and a few other Centennial buildings. [Those who wish may now return to the city by tramway from Elm Avenue, a little to the S. of Memorial Hall; Pl. A, B, 4.] A little to the W. of the Memorial Hall is an allegorical *Fountain*, which lies at the base of *George's Hill* (*View*). About 1 M. to the N. of this hill is the old *Belmont Mansion* (now a restaurant), and about 1 1/4 M. farther on we reach *Chamounix* and the N. boundary of the W. Park. The bridge here crosses the river to the village of *Schuylkill Falls*.
By turning to the right on the E. bank, we may follow the river-drive through the E. Park back to (3 1/2 M.) the Green St. entrance (see p. 242). In this case we skirt "Laurel Hill Cemetery (Pl. C, 1; entrances in Ridge Ave.), which here occupies the high bank of the river, containing many handsome monuments and affording fine views. Near the main entrance is a group, by Thom. of Old Mortality and Sir Walter Scott. Among the statues is one of Harry Wright (d. 1859), the 'Father of Base Ball'.

By turning to the left on crossing to Schuylkill Falls, we may follow the *Wissahickon Drive*, which ascends the romantic valley of the Wissahickon Creek, an Alpine gorge in miniature, with sides 200-300 ft. high, to (6 M.) Chestnut Hill, affording a scene of singular loveliness to be included within the limits of a city. The gorge is crossed by several bridges, including the lofty viaduct of the Reading Railway (70 ft. high), near the entrance. Near the summit of the gorge (to the right) is a Statue of William Penn, inscribed 'Toleration'. Along the stream (on both banks) are several inns, frequented in summer for "catfish and waffles". Four-horse coaches usually ply along the Wissahickon Drive in summer.

The *Zoological Garden* (Pl. C, 4), to the S. of West Fairmount Park, is perhaps the best collection of the kind in America (adm. 25 c., children 10 c.). It occupies a tract of ground formerly owned by John Penn, grandson of William Penn, and contains his house, the Solitude (1785). The garden may be reached by train from Broad St. or by tramway (25th St. or Girard Ave.).

Among other popular resorts of the Philadelphians are Gloucester (ferry, see p. 231), visited for its "planked shad"; Washington Park, near Gloucester, with a long pier, a theatre, and other attractions; Lincoln Park, on the Delaware, some miles below the city; and Mineral Springs Park, with various attractions, 15 M. to the N.E. of the city by the Reading R.R.

Camden City (West Jersey Ho., §2), an industrial and commercial city with (1835) 63,467 inhab., lies on the left bank of the Delaware, opposite Philadelphia (see Pl. 1, 5-8; ferries, see p. 230). It was long the residence of the poet, Walt Whitman (1819-92). — It is the terminus of the West Jersey and the Phil's & Atlantic Railways (comp. pp. 230, 247).

From Philadelphia to Germantown and Chestnut Hill, 12 M., railway from Broad St. Station in 35 minutes. — Beyond (5 1/2 M.) Germantown Junction (p. 229) the line turns to the N.W. and traverses "Germantown, the principal residential suburb of Philadelphia, stopping at several stations, of which (8 M.) Chelton Avenue is, perhaps, the nearest to the best parts of the district. Germantown is very prettily laid out, with fine trees and gardens, and contains some interesting old houses. The battle of Germantown, in which Washington was defeated by Lord Howe, was fought on Oct. 4th, 1777. The old Chew House (with marks of cannon-balls and Johnson House, the quaint old Mermaid Inn, and the picturesque Wakefield Mills are interesting relics. Germantown is also reached by the Reading R.R. and by tramway. — 11 M. Wissahickeon Heights, with the Wissahickeon Inn (§ 4) and the Philadelphia Cricket Club (p. 231). 12 M. Chestnut Hill, another pleasant residence suburb.

From Philadelphia to West Chester, 27 M., railway from Broad St. Station in 1-1/2 hr. This line crosses the Schuylkill, runs to the S. along its W. bank, turns to the right beyond Woodlands Cemetery, and runs towards the S.W. through a pleasant district. — 11 M. Swarthmore, the seat of Swarthmore College (right), an important Hicksite Quaker establishment, attended by 200 male and female students. West House, now occupied by one of the professors, was the birthplace of Benjamin West (1738-1820). — 14 M. Media (370 ft.), a pleasant little town (2736 inhab.) in a pretty hilly district, much affected by Philadelphians as a residence. — 16 M. Williamson, the site of the Williamson Free School of Mechanical Trades, founded in 1888 by Mr. I. V. Williamson at an expense of $2,125,000 (425,000 ft). It stands in pretty grounds of 200 acres (permission to visit obtained at 119 S. 4th S., Philadelphia). — 27 M. West Chester, a town with 8038 inhabitants.
Other attractive points within easy access of Philadelphia are Bryn Mawr (p. 256), Mouth Crunk (p. 250), Long Branch (p. 245), Cape May (p. 249), and Atlantic City (p. 248).

From Philadelphia to Reading, see R. 35; to Baltimore, see R. 40; to New York, see R. 31; to Buffalo, see R. 34; to Pittsburgh, see R. 37; to Erie, see R. 36.

33. Summer and Winter Resorts of New Jersey.

a. From New York to Long Branch and Point Pleasant by Rail.

60 M. New York and Long Branch Railroad in 1¼-2½ hrs. (fare to Long Branch $1, to Point Pleasant $1.45; return-fares $1.50 and $2.35). Tickets by this route are also available by the Sandy Hook route (p. 245).—Passengers start in Jersey City, either from the Pennsylvania R. R. Station (p. 6; ferries from 23rd, Desbrosses, and Cortlandt Sts.) or from the Central R. R. of New Jersey Station (p. 6; ferries from Liberty and Rector Sts.).

The Central R.R. of New Jersey branch crosses Newark Bay to (11 M.) Elisabethport (p. 229) and then runs to the S. to (23 M.) Perth Amboy (13,030 inhab.), where it is joined by the Penna. R. R. train, coming via Rahway. We then cross the Raritan River to (24 M.) South Amboy. 29 M. Matawan, for lines to Freehold (p. 245) and to Keyport and Atlantic Highlands. — 39 M. Red Bank (Globe, $2), on the estuary of the Navesink (view to the right), is the junction of the New Jersey Southern R. R. (for Atlantic Highlands, etc.). Farther on we cross the Shrewsbury River. — 44 M. Branchport.

46 M. Long Branch, see p. 245. The two following stations, Hollywood & West End (46 M.) and Elberon (47 M.) are practically parts of Long Branch and are described with it at p. 246.

The line now skirts the shore, affording good views of the ocean to the left. — 49 M. Deal Beach (Hathaway Inn, $2-3, well spoken of). — 51 M. Asbury Park & Ocean Grove.

Asbury Park (Coleman Ho., Brunswick, from $4; West End, Atalanta, Columbia, Ocean Ho., $3-4; Plaza, $2½-4, and many others; boarding-houses), a prosperous town with at least 20,000 annual visitors, is largely frequented by those who object to the religious management of Ocean Grove (see below), but appreciate the 'no licence' policy of its sister-town. It has a good beach, skirted by a plank-walk 1 M. in length, and is divided from N. Asbury on the N. by Sunset Lake and from Ocean Grove by the narrow Wesley Lake.

Ocean Grove (Sheldon, $3-4; Arlington, $2½-3; La Pierre, $3; Atlantic, $2-3; many other hotels and boarding-houses), a seaside-resort established in 1870 by an Association of the Methodist Episcopal Church and now frequented yearly by 20-25,000 people.

This extraordinary settlement, possible only in America, in which many thousands of persons, young and old, voluntarily elect to spend their summer vacations under a religious autocracy, which is severe both in its positive and negative regulations, is curious enough to repay a short visit. It is bounded by the sea on the E., by lakes on the N. and S., and by a high fence on the W.; and its gates are closed at 10 p.m. daily and all day on Sunday. The drinking of alcoholic beverages and the sale of tobacco are strictly prohibited, and no theatrical performances of
any kind are allowed. No bathing, riding, or driving is permitted on Sunday. Innumerable religious meetings of all kinds are held daily, the chief place of assemblage being a huge Auditorium, which can hold 10,000 people. The annual Camp Meeting is the great event of the season. Near the Auditorium is a large Model of Jerusalem. The excellent bathing beach is skirted by a plank-walk, $1/4$ M. long.

We now pass several small seaside-resorts. 57 M. Sea Girt (see below).

60 M. Point Pleasant (Resort Ho., $2 1/2-3$; Land’s End Ho., $2 1/2$; Arnold Ho., $2-2 1/2$), a frequented watering-place, forming the terminus of the New York & Long Branch Railroad.

Beyond this point we may go by the Pennsylvania Railroad to Bay Head, Seaside Park, and other points on Barnegat Bay (comp. R. 33d).

b. From New York to Long Branch via Atlantic Highlands and Sandy Hook.

30 M. Steamer from Rector St. (Pl. A, 2, 3) to (21 M.) Atlantic Highlands in 1 1/2 hr.; Railway thence to (9 M.) Long Branch in 1/2 hr. (through-fare $1$). — This is the pleasantest route to Long Branch in fine weather.

The steamer affords an excellent view of New York Harbour (comp. R. 1) and lands at (21 M.) Atlantic Highlands (Grand View; $3 1/2$; Windsor, $2 1/2$), a modern watering-place at the base of the Navesink Highlands (200-300 ft.), often the first land seen on approaching New York by ocean steamer. — 24 M. Highland Beach (Swift Ho., $3-4$), a small bathing-place, on the narrow strip of sand connecting Sandy Hook (p. 2) with the mainland. Adjacent is the Navesink Lighthouse (250 ft.), with two castellated towers, the light of which is visible for 40 M. Farther on life-saving stations occur at frequent intervals, as vessels mistaking the entrance to New York harbour in foggy weather are often wrecked on this coast.

26 1/2 M. Sea Bright (*Normandie-by-the-Sea, $4-5$; Octagon, Rutherford Arms, $4$; Sea Bright Ho., $3 1/2-4$; Shrewsbury, Peninsula Ho., $3 1/2$), one of the liveliest resorts on the coast. The numerous ice-houses show that fishing is extensively carried on here. — 28 M. Gallow, a quaint fishing-village. — 29 M. Monmouth Beach, a group of private cottages, with a club-house and a casino.

30 M. Long Branch, see below.

c. From Philadelphia to Long Branch.

95 M. Pennsylvania Railway in 2 1/2-3 1/2 hrs. (fare $2 25$).

From Philadelphia to (49 M.) Monmouth Junction, see R. 31. The Long Branch line here diverges to the right. 67 M. Freehold, with a monument commemorating the battle of Monmouth (1778); 75 M. Farmingdale (p. 247); 83 M. Sea Girt (see above); 89 M. Asbury Park (p. 244); 95 M. Long Branch (see below).

Local trains also run from the West Jersey R. R. Station in Camden (p. 243) to (82 M.) Long Branch, via Whittings (p. 247) and Tom’s River (p. 247).

Long Branch. — There are railway-stations at Long Branch proper, for the old village, the pier, and the E. end (omn. to the best hotels 50 c.). at West End & Hollywood, near the best hotels; and at Elberon, the fashionable cottage part of Long Branch. The trains stop at all these stations.
Hotels. "Hollywood, finely situated among trees, near the Hollywood station and 1/2 M. from the sea, one of the most luxurious and expensive hotels in America, with French management and waiters, and excellent cuisine, R. from $5 a day, food a la carte, open all the year. Connected with the hotel is a large tidal Salt Water Swimming Bath (50c.). — West End, a huge caravanserai on the sea, Howland, Scarboro, $4; these nearest West End Station. — Elberon, at Elberon. — Ocean Hotel; United States, $3-3'/2; Brighton, from $3'/2; Lauch; these near the pier and E. end. — Numerous Boarding Houses, $10-15 per week. — Cottages (i.e. villas) $100-4000 for the season.

Bathing. Hours for bathing announced by the hoisting of a white flag at the hotels (not hoisted in dangerous weather).

Long Branch, one of the most popular watering-places in the United States (50,000 summer-guests) and also one of the most fashionable, in the sense in which the word is used by those who 'fondly imagine that lavish display of wealth is evidence of high social position' (Kobbe), takes its name from the 'long branch' of the Shrewsbury River. Permanent population (1895) 7333. The original village lies about 1 M. inland, but the modern watering place occupies a bluff, which here faces the sea, at a height of 20-35 ft. above the beautiful sandy beach. Along the edge of the bluff, which is being gradually worn away by the action of the sea in spite of the protection of strong bulkheads, runs the Ocean Avenue, a wide road 5 M. long, which presents a scene of wonderful animation on summer afternoons and evenings, being crowded with vehicles of every description. The Iron Pier at the E. end of the Avenue was recently washed away, but has been replaced by a much finer one. Most of the hotels (see above) face the Avenue, which turns slightly inland beyond the West End Hotel and is thenceforward bordered with houses on both sides. The finest villas are at Elberon, but being mostly of timber hardly vie with the Newport cottages (see p. 76). Among the most interesting are that which was General Grant's summer-home for 16 years and the reddish brown house (Franklyn Cottage), a little to the W. of the Elberon Hotel, in which President Garfield died in 1881. The leading show-place of Long Branch is Hollywood, the estate of the late Mr. John Hoey (d. 1892), a little inland from the West End Hotel, the somewhat meretricious attractions of which, however, scarcely satisfy a fastidious taste. The flower-gardens and conservatories (open to visitors) are fine. A Grand Carnival and Lawn Tennis Tournament are held at Long Branch in August.

Numerous pleasant drives may be made, the favourite being the Beach Drive between Highlands (p. 249) and Bay Head (p. 245; 20 M.), of which Ocean Avenue is a part. — Eatontown (p. 247), 4 M. inland, is visited for its picturesque old mill. Farther on are Shrewsbury and the Tinton Falls (p. 247).

d. Barnegat Bay.

Barnegat Bay, 27 M. long and 1-4 M. wide, extends from Point Pleasant (p. 245) to a point a little to the N. of Atlantic City (p. 248). It is more like a lake than a bay, being separated from the ocean
by two long strips of sandy beach, and entered by a narrow inlet between them. The bay is a great resort of sportsmen, affording excellent fishing and wild-fowl shooting. Among the places chiefly resorted to are Mantoloking (Albertson, $2-3), Seaside Park (Seaside Park Ho., $21/2), Barnegat City (Oceanic Ho., $21/2), and Beach Haven (Engleside, Baldwin, $3-4), on the island-strips; and Forked River (Lafayette Ho., $2), Tom's River (Riverside, Ocean, $2), Westtown (Bayview, $2), and Barnegat (Clarence, $2), on or near the mainland coast. The last are the special haunts of sportsmen. All these places are reached by the Penna. or Cen. New Jersey R. R.

e. From New York to Lakewood and Atlantic City.

137 M. Central Railroad of New Jersey to (59 1/2 M.) Lakewood in 2 hrs. (fare $1.45); to (137 M.) Atlantic City in 4 3/4-5 3/4 hrs. (fare $3.25). — The train starts from Jersey City (see p. 6; ferry from Liberty St.).

From Jersey City to (39 M.) Red Bank, see R. 33a. Our line here diverges to the right from the line to Long Branch (p. 245). — 41 M. Shrewsbury, a small town dating from 1665, with some old buildings. About 2 1/2 M. to the S. are Tinton Falls. — At (43 M.) Eatontown we enter the Jersey Pine Plains, a stretch of forests, broken only by the settlements along the railway. The district has lately been coming into reputation on account of the health-giving odour of the pines. — At (52 M.) Farmingdale we cross the line from Freehold to Sea Girt (p. 245).

59 1/2 M. Lakewood (*Laurel House, *Laurel in the Pines, belonging to the same proprietors, with 700 beds, from $4; *Lakewood, with 600 beds, $5; Palm House, $2 1/2), a pleasant little settlement in the heart of the pine woods, has recently become a frequented winter-resort on account of its sheltered situation and comparatively high temperature (10-12° warmer than in New York). It is the property of an association, which has laid out pleasant drives and walks through the woods, the most popular being that through Pine Park. The village is adjoined by two pretty little lakes, Carasaljo and Manetta. The Lakewood Golf Links witness many important matches.

67 M. Manchester (Pine Tree Inn, $3), the junction of a line to Tom's River (see above) and Barnegat (see above). At (73 M.) Whiting we cross the line from Philadelphia to Long Branch (see p. 245). — 105 1/2 M. Winslow Junction, where we reach the Pennsylvania R. R. (Atlantic City Division). Hence to (137 M.) Atlantic City, see next page.

The line we have been following goes on to (122 M.) Vineland (Baker Ho., $2), a glass-making and fruit-growing town, with (1895) 4126 inhab.; 134 M. Bridgeton, also a glass-making town (13,292 inhab. in 1895); and (144 M.) Bay Side, on the N. bank of the estuary of the Delaware.

f. From Philadelphia to Atlantic City.

1. Reading Railroad (*Atlantic City Line*) from Kaighn's Point, Camden (ferry from Philadelphia, see p. 231), to (56 M.) Atlantic City in 1 hr. (fare $1). — 2. Pennsylvania R. R. (three routes): a. From Broad St. Station, via the Delaware River Bridge at Frankford (p. 229; 65 M.) in 1 1/4-1 1/2 hr.
248 Route 33. ATLANTIC CITY. New Jersey

(fare $1.25). b. From Federal St Station, Camden (ferry from Market St., Philadelphia, see p. 230) via Haddonfield (59 M.) in 1-1/4 hr. (fare $1). c. From Federal St Station (ferry as above) via Newfield (64 M.) in 1-1/2 hrs. (fare $1). The last two belong to the West Jersey & Seashore Division of the Penna. R. R.

Routes 1 and 2b (see above) follow practically the same route and touch many of the same stations. Both pass through Winslow Junction (p. 247), 241/2 M. from Camden by the first route and 27 M. by the second. 39 M. (41 M.) Egg Harbor, with manufactures of native wine. — 56 M. (59 M.) Atlantic City, see below.

Route 2c runs farther to the S. 8 M. Woodbury; 30 M. Newfield; 59 M. Pleasantville. 64 M. Atlantic City, see below.

On the 'Bridge' route the trains follow the main New York line to the Penna. R. R. to (9 M.) Frankford, cross the Delaware to Fisher's Point, and join R. 2b at Haddonfield (7 M. from Camden).

Atlantic City. — Hotels. St. Charles, Garden, Chalfonte, Rudolf, Traymore, Brighton, Dennis, Haddon Hall, Isleworth, Windsor, Seaside, Shelburne, all from $3 or $4 up; Grand Atlantic, 3; Luray, Pennhurst, Waverly, $2 1/2-3; and about 100 others, from $1 1/2 up. — Boarding Houses, $10-25 a week. — Cottages from $200 for the season.

Carriages from the railway-stations to the hotels, 1-2 pers. 50 c., each addit. pers. 25 c.; per hr. 50 c. — One-horse Coaches ply to any point in the town for 10 c. each. — Tramway along Atlantic Ave.

Atlantic City, one of the foremost seaside-resorts of America, lies on Absecon Island, a small sand-strip, separated from the New Jersey Coast by 5 M. of sea and salt-meadows. It contains a permanent population of (1895) 18,329, which is increased fivefold to tenfold in summer, when it is more or less over-run by excursionists from Philadelphia. It is also frequented in spring and winter, when its clientele is more select. The beach is one of the finest in America, and from 50,000 to 100,000 people have bathed here in one day (bath, with dress, 25 c.). It is bordered by a *Board Walk, 40 ft. wide and 4 M. long, flanked on the landward side by shops and places of amusement of all kinds. This, the Piers (600-1000 ft. long; adm. 10 c.), and the Brighton Casino are the favourite haunts of visitors.

Among the favourite Excursions are the Beach Drive, 10 M.; to South Atlantic City, 5 M.; to (7 M.) Longport (Aberdeen, 2 1/2-3; Devonshire, 2-3), near the S. end of the island, by road or electric railway; from Longport across Great Egg Harbor by steamer to Somers Point or Ocean City (p. 249); to Brigantine Beach (hotel) and Peter's Beach (hotel), by boat; and to Barnegat Bay (p. 246). — Absecon Lighthouse (100 ft. high) is open to visitors, 9-12. — Boating and Sailing are carried on mainly in the Inlet, at the upper end of the island (sail-boat 5-10 per day; sailing excursions, 25 c. each). — Fishing and Wild Fowl Shooting are also popular. — The Country Club, near Pleasantville (see above), includes excellent golf-links (9 holes), tennis courts, and a polo field among its attractions. It may be reached by electric car or by the famous bicycle track that runs all the way from Atlantic City to Philadelphia.

g. From Philadelphia to Cape May.

1. WEST JERSEY & SEASHORE RAILROAD (Penna. System) from Camden (ferry from Philadelphia, see p. 231) to (61 M.) Cape May City in 2-3 hrs. (fare $1.75). — 2. READING RAILROAD from Kaighn's Point (ferry, p. 231)
Seaside Resorts. CAPE MAY. 33. Route. 249

to (78'/2 M.) Cape May in 1'/2-2 hrs. (fare as above). — Steamers also ply in summer down Delaware Bay to Cape May (6 hrs.; return-fare $1).

The West Jersey R. R. route diverges to the right from the Atlantic City line at (30 M.) Newfield (p. 248). 34 M. Vineland, see p. 247. — From (61 M.) Sea Isle Junction a branch-line runs to (5 M.) Sea Isle City and (16 M.) Ocean City (see below). 81 M. Cape May (see below).

The Reading route runs via (24'/2 M.) Winslow Junction (p. 248) and then follows the South Jersey R. R. 52 M. Tuckahoe is the junction of lines to (12 M.) Sea Isle City (Tivoli, Continental, $2) and (13 M.) Ocean City (Brighton, Strand, Traymore, $2-2'/2), two popular sea-bathing resorts. — 67 M. Cape May Court House. — 78'/2 M. Cape May (see below).

Cape May. — Hotels. Lafayete, Stockton House (1100 beds); Chalfonte, Windsor, Congress Hall (800 beds), Baltimore Inn, Eleebon, all these $3-5; Aldine, Columbia, Arlington, from $2; and many others. — Boarding Houses, $5-20 a week.

Cape May City, at the extreme S. point of Cape May, the E. arm of Delaware Bay, a village with (1895) 2452 inhab., a popular sea-bathing resort of the Philadelphians and also frequented to some extent by Southerners and Westerners, is a somewhat more fashionable edition of Atlantic City (p. 248). Its beach, 5 M. long, is hard and smooth. The Esplanade, skirting the sea-front, is most thronged between 11 and 1 and between 5 and 8. Excursions may be made to Cape May Point (electric cars), Cold Spring, Sewell's Point (electric cars), along the beach, etc. The cape is named after a Dutch navigator, Carolis Jacobson Mey, who visited Delaware Bay in 1623.

For farther details, see Kobbe's 'New Jersey Coast and Pines'.

34. From Philadelphia to Buffalo.

a. Via Bethlehem and Mauch Chunk.

418 M. Philadelphia and Reading R. R. to (56 M.) Bethlehem, and Lehigh Valley R. R. thence to (362 M.) Buffalo. Through-trains in 9'/2-12 hrs. (fare $10; sleeper or parlor-car $2).

Philadelphia, see p. 230. The train traverses the N. part of the city and passes several suburban stations. 4'/3 M. Wayne Junction (p. 229); 9'/3 M. Ogontz, with a large girls' school; 11 M. Jenkins-town (Beechwood Inn, $2-5). Beyond (33 M.) Sellersville we penetrate the Landis Hills by a tunnel, 1'/2 M. long.

56 M. Bethlehem (Hotel Wyandotte, at S. Bethlehem, $2'/2-3; Eagle, $2-3; Sun, a relic of last century, $2), a thriving town of 17,064 inhab. (incl. South Bethlehem), lies on the Lehigh, a small stream which joins the Delaware, 12 M. lower down. It is noted as the chief American centre of the Moravian Brothers, who settled here under Count Zinzendorf in 1740-41. Many of the old Moravian schools and other buildings are still extant. Lehigh University, above the town, is attended by 400 students and ranks very high for its work in engineering, physics, chemistry, and metallurgy.
Its library contains 100,000 volumes. The chief industries are the making of brass, zinc, and iron.

Easton ("Paxinos Inn, $4; United States Ho., $2 1/2-3), at the Forks of the Delaware, 12 M. to the N.E. of Bethlehem, an industrial town of 14,481 inhab., is the site of Lafayette College, a well-known Presbyterian institution (3-400 students), founded in 1826. It is an important railway centre (p. 215). The Paxinos Inn (see above) is a favourite summer-resort, 2 M. above the town (reached by electric car).

The train now ascends the *Lehigh Valley, with the tortuous stream to the right. Numerous iron-works are passed. 62 M. Allen-town (Allen, $2 1/2-3; American Ho., $2-21/2), an iron and silk making town with 25,228 inhabitants. — 64 M. Catasauqua; 65 M. Hokendauqua; 66 M. Coplay, all with iron-works, blast-furnaces, and heaps of slag. The iron-works now disappear for a time and the scenery improves. 77 M. Slatton is the outlet for the most extensive slate-quarries in America. About 2 M. farther on we penetrate the Blue Mts. by the *Lehigh Water Gap (Hotel Craig), in which two railways, the river, and a canal are compressed between perpendicular cliffs. Beyond this point the valley expands, and the iron-works re-appear at (85 M.) Parryville. — At (89 M.) Packerton are the workshops of the Lehigh Valley R.R. and huge scales in which cars of coal are weighed while in motion. A little farther on the valley contracts and our line crosses to the N. bank of the river.

90 M. Mauch Chunk (530 ft.; American, $2-3), a small town with 4000 inhab., picturesquely situated on a rocky shelf on the brink of the river, in one of the narrowest parts of the valley, with mountains towering overhead, is visited annually by thousands of travellers. It has but two streets, one running along the river and the other extending at right angles to it up a cleft in the mountains; while the slope is so abrupt that the man who enters his front-door on the street-level may step into his back-yard from the second story window. The Bear Mt. (Indian, Mauch Chunk) from which it takes its name rises to a height of 700 ft. immediately above the town. Mauch Chunk lies in the midst of a rich coal-district, and an immense traffic in coals is carried on by the railways and canals.

The chief lion of Mauch Chunk is the *Switchback or Gravity Railroad, originally built in 1827 to bring the coals out from the mines to the river, but now used by pleasure-seekers only (round trip in 1 1/2 hr., fare 75c.; omn. to foot of railway 25c.). The train is first drawn by a powerful stationary engine to (1/2 M.) the top of Mt. Pisgah (1370 ft.; view), whence it descends by gravity to (6 1/2 M.) the foot of Mt. Jefferson (1530 ft.; *View). It is drawn up another inclined plane (gradient 1:4 1/2) on this hill, and then runs on a level to (1 M.) Summit Hill (1485 ft.), a mining village with 2816 inhab., frequented by summer-visitors. One of the points of interest here is a Burning Mine, which has been smouldering for nearly 70 years. The descent to Upper Mauch Chunk, near our starting-place, a distance of 0 M., is made by gravity in 25 minutes. — Good views are also obtained from Prospect Rock and Flag-staff Peak (1700 ft.).

Beyond Mauch Chunk the railway continues to follow the narrow winding gorge of the river. — 92 M. *Glen Onoko (Hotel Wah-netah, $2 1/2), a beautiful little glen, traversed by a stream form-
ing a series of falls. — At (115 M.) White Haven (1140 ft.) we leave the river and ascend the mountains to the left. — 126 M. Glen Summit (1730 ft.; Hotel, $3, meal-station), on the watershed between the Delaware and the Susquehanna, commands a distant view of the main ridge of the Alleghenies (W.). We now descend rapidly into the *Wyoming Valley (see below), a beautiful *View of which, with the Susquehanna River, is suddenly disclosed to the right.

144 M. Wilkesbarré (560 ft.; Wyoming Ho., $2 1/2; Exchange, $2), the chief town in the Wyoming Valley, on the E. bank of the Susquehanna, contains 37,718 inhab., who owe their prosperity to the rich coal-mines of the district. It is connected by a bridge with Kingston (2381 inhab.) on the opposite bank.

The *Valley of Wyoming (a corruption of the Indian Maughwauwama or 'large plains'), the name given to this expansion of the Susquehanna Valley, is about 20 M. long and 3-4 M. wide and is inclosed by two parallel ranges of hills, 800-1000 ft. high. The Susquehanna ('broad and shallow river'), which has a total length of 400 M. from Otsego Lake (see p. 175) to Chesapeake Bay, enters the valley through the Lackawannock Gap and leaves it through the narrow Nanticoke Gap. Within the valley its course is generally placid, but it forms two sets of rapids (the Wyoming and Nanticoke Falls) and receives several tributaries from the mountains. Numerous coal-pits, culm-heaps, and smoking chimneys testify to the prevailing industry of the valley. A good *View of the valley is obtained from Prospect Rock (760 ft.), 2 M. from Wilkesbarré. Campbell's Ledge, on the E. side of the Lackawannock Gap, is also a good point of view. — Mountain Park (stat. on the Central R. R. of New Jersey), 8 M. to the E., is a favourite resort of excursionists. — A steamer descends the Susquehanna from Wilkesbarré to (8 M.) Nanticoke.

The name of the valley is widely known from the harrowing incidents narrated by Campbell in his 'Gertrude of Wyoming.' In June, 1778, a force of British troops and Indians entered the valley and defeated the settlers in a battle fought on July 3rd. The battle was followed by an atrocious massacre, in which the British officers were unable to set any bounds to the butchery of their savage allies, who, it is estimated, slew 300 men, women, and children. Fort Forty, the scene of the battle, 4 M. above Kingston (see above), is marked by an Obelisk, 62 1/2 ft. high; and about 3 M. farther up is Queen Esther's Rock, where the half-breed queen of the Senecas tomahawked 11 defenceless prisoners.

About 12 M. to the W. of Wilkesbarré is the picturesque Shawane Lake, now a favourite resort.

From Wilkesbarré to Nineveh, 92 M., Delaware & Hudson R. R. in 3 1/2 hrs. (fare $2.84). This line traverses a coal-mining district. — 8 M. Pittston (see below); 11 M. Aeoca; 15 M. Minooka; 13 M. Carbon Street Junction; 19 M. Scranton (p. 216); 35 M. Carbondale (Hot. Anthracite, $2 2-1/2), a busy coal-mining city with 15,000 inhabitants. — The train now ascends to (55 M.) Ararat Summit (2500 ft.), beyond which it descends into the valley of the Susquehanna. 70 M. Jefferson Junction; 72 M. Lansboro; 81 M. Windsor; 84 M. East Windsor; 89 M. Centre Village. — 92 M. Nineveh, see p. 176.

The train now ascends along the E. bank of the Susquehanna. The Wyoming Monument (see above) is seen across the river to the left. — 153 M. Pittston (570 ft.; see above), with 10,302 inhab., lies near the point where the Lackawannock pours into the Susquehanna. Above rises Campbell's Ledge (see above).

Beyond Pittston the scenery is less interesting. At (236 M.) Athens we cross the Chemung River. — Beyond (238 M.) Sayre
WILLIAMSPORT.

Junction (for lines to Auburn, Owego, Elmira, etc.) we cross the Erie R. R. (R. 25d). At (253 M.) Van Etten the line forks, the left branch running to Geneva (see below) via Watkins (p. 209) and Seneca Lake (p. 209), while that traversed by most through-trains runs to the N. to (274 M.) Ithaca (p. 208) and skirts the W. side of Cayuga Lake (p. 208). 297 M. Hayti’s Corners. — 315 M. Geneva, see p. 209. — 349 M. Rochester Junction, for (13 M.) Rochester (p. 210). — 380 M. Batavia (p. 210); 413 M. East Buffalo (p. 211). 418 M. Buffalo, see p. 211.

b. Via Williamsport and Emporium.

418 M. Pennsylvania Railroad to (297 M.) Emporium in 6 hrs.; Western New York & Pennsylvania Railway thence to (121 M.) Buffalo in 4½-5 hrs. (fares as above).

From Philadelphia to (105 M.) Harrisburg, see R. 37. Our line here diverges to the right from the line to Pittsburg and runs to the N. along the Susquehanna. — 159 M. Sunbury (450 ft.; 5930 inhab.), on the left bank of the wide Susquehanna, is an important outlet for the Shamokin Coal District. — At (161 M.) Northumberland, at the confluence of the N. and S. branches of the Susquehanna, Dr. Joseph Priestley, discoverer of oxygen gas, lived from 1794 till his death in 1804. He is buried in the cemetery here. — Farther on our line runs parallel with the Reading line.

199 M. Williamsport (Updegraff, $2-4; Park, 2½-3), a city on the right bank of the S. (or W.) branch of the Susquehanna, with 27,132 inhab., chiefly engaged in the timber trade. The huge ‘Boom’ on the river here can contain 300 million feet of timber.

From Williamsport to Satterfield, 56 M., Williamsport & North Branch R. R. in 3¼ hr. This line traverses a picturesque district which has been ambitiously dubbed the ‘Adirondacks of Pennsylvania’. — The chief resorts are Highland Lake (2000 ft.; Grand View Hotel, Essick, Highland Ho.), reached by coach (1½ hr.) from (19 M.) Picture Rocks (670 ft.); Eagles’ Mere (2300 ft.; Hotel Eagles’ Mere, Lakeside, Raymond, $3-4; Allegheny, $2), reached by coach (1½ hr.) from (30 M.) Munsey Valley; and Lake Mokoma (La Porte Hotel), 4 M. from (38 M.) Ncordaunt.

From Williamsport to Elmira, see p. 216.

We turn to the left (W.), cross the Lycoming Creek and the Susquehanna, and ascend on the right bank of the latter. 224 M. Lock Haven, another lumbering town (7358 inhab.), situated on the right bank of the Susquehanna. The scenery here and as we advance farther up the river is picturesque. We cross and recross the stream. — 251 M. Renovo (670 ft.; *Renovo Hotel, $2), a summer-resort, finely situated in the Susquehanna valley, among hills 800-1000 ft. high.

At (264 M.) Keating (730 ft.) the train leaves the Susquehanna, after following it for 160 M., and begins to ascend the Sinnemahoning. The dreary district we now traverse is known as the Great Horseshoe of the Alleghenies. — 279 M. Driftwood, junction of a line to Pittsburg (p. 263). — 297 M. Emporium (1030 ft.; St. Charles, $2), a hill-surrounded village with 2147 inhab., is the junction of the Pennsylvania R.R. route to Erie (R. 36). Our line runs to the N. to
(222 M.) Port Allegheny, and then follows the Allegheny River to (248 M.) Olean (Olean Ho., from $2), on the Erie R. R. (p. 307), one of the largest petroleum storing places in the world. Pop. 7358.

— To the left, near (369 M.) Franklinville, is Lime Lake.

418 M. Buffalo, see p. 211.

35. From Philadelphia to Reading and Williamsport.

198 M. Philadelphia & Reading Railroad in 6-8 hrs. (fare $5.78).
— The Pennsylvania Railroad (Broad St. Station) is also available, the trains following nearly the same route (fare as above; comp. R. 37). — Both lines traverse the Schuylkill Valley and connect the great anthracite coal-fields of Pennsylvania with the ocean.

Philadelphia, see p. 230. The train crosses the Schuylkill (p. 231), touches the N. end of Fairmount Park (p. 242), and ascends the right bank of the river, parallel with the Schuylkill Valley Division of the Pennsylvania Railroad on the opposite bank. The valley is thickly populated and presents a scene of busy industry, with its numerous factories and mills. — 17 1/2 M. Bridgeport lies opposite Norristown (Montgomery, Windsor Ho., $2), a thriving manufacturing city (19,791 inhab.). — 24 M. Valley Forge (Washington Inn, $2), the headquarters of Washington and the American army during the trying winter of 1777-78. The farm-house in which Washington had his quarters is still preserved (to the left of the railway). — Beyond (28 M.) Phoenixville, at the foot of Black Rock, with 8514 inhab. and the huge Phoenix Iron and Steel Works, we thread a tunnel nearly 1/2 M. long. Our train then crosses the river, changing sides with the Pennsylvania line. We are now in the district of the so-called ‘Pennsylvania Dutch’, a hard-working race of Teutonic origin, speaking a curious dialect of German, Dutch, and English. Near (40 M.) Pottstown, another iron-making place (13,285 inhab.), are the Ringing Rocks, emitting a musical sound when struck (electric tramway). We cross the Manatawny by a long bridge.

58 1/2 M. Reading (270 ft.; Mansion Ho., from $3; Central, $2-2 1/2), a busy manufacturing city with 58,661 inhab., lies on a comparatively level plateau hemmed in by Penn’s Mt. on the E. and Neversink Mt. on the S. The Court House is a handsome building, with a portico borne by six columns of the old red sandstone found in the adjacent mountains. The chief industry is iron-making, and the shops of the Reading Railway give employment to about 3000 men.

Penn’s Mt. (1040 ft.), at the top of which is the Summit Hotel ($2 1/2-3), is ascended by a ‘switchback’ railway. The White Spot, 4000 ft. above the river, a remnant of Potsdam sandstone lying unconformably on Laurentian rock, is a favourite point of view. — Another mountain-railway (views) climbs to the top of Neversink Mt. (850 ft.), with its large hotel ($3 1/2). — Reading is an important railway-centre, lines radiating hence in all directions.

Beyond Reading our line continues to follow the Schuylkill Valley, and the long ridge of the Blue Mts. looms up ahead of us, changing from grey to blue as we approach it. — At (79 M.) Port Clinton
(410 ft.), at the mouth of the Little Schuylkill, we pass through a gap in the ridge, similar to, but less picturesque than, those mentioned at pp. 250, 215. Port Clinton stands on the S. edge of the great anthracite coal-region, and has a busy traffic in coal. Our railway forks here, the left branch going on to Pottsville (see below), the right to Williamsport via the Catawissa Valley (see below).

From Port Clinton to Pottsville, 15 M., railway in \( \frac{1}{2} \) hr. — The line follows the Schuylkill. — 5 M. Auburn; 11 M. Schuylkill Haven. — 15 M. Pottsville (615 ft.; Merchants', $2), a city with 14,117 inhab., in the gap where the river breaks through Sharp Mt. (1395 ft.), lies in the great S. or Schuylkill Coal Basin, which produces 10,000,000 tons of anthracite coal annually, or one-fourth of the total production of Pennsylvania (42,637,860 tons in 1897). The surrounding district is a network of railways.

The Williamsport train ascends the valley of the Little Schuylkill and traverses a busy coal-mining district. — 1031/2 M. East Mahanoy Junction. Farther on we traverse the picturesque Catawissa Valley. At (145 M.) Catawissa (475 ft.) we cross the Susquehanna. 198 M. Williamsport, see p. 252.

36. From Philadelphia to Erie.

417 M. Pennsylvania Railroad in 13-16 hrs. (fare $10.25).

From Philadelphia to (297 M.) Emporium, see R. 34b. — 318 M. St. Mary's (1670 ft.), in a lumbering and bituminous coal district, has a large German Benedictine college and convent. — 343 M. Wilcox (1525 ft.), with a large tannery. — 352 M. Kane (2020 ft.; Thomson Ho., $2), with 2944 inhab., frequented for deer-shooting and fishing. We now begin to descend on the Lake Erie side of the ridge. — 381 M. Warren (1195 ft.), at the confluence of the Allegheny and the Conewango, is the junction of a line to Dunkirk (p. 294). — 410 M. Corry (1445 ft.), an industrial town (3667 inhab.).

From Corry to Pittsburg and to Buffalo, see p. 287. Corry is also the junction of lines to Jamestown (p. 307), etc.

428 M. Waterford (1190 ft.), on the Le Boeuf Lake. Beyond (434 M.) Jackson (1225 ft.) we cross the watershed between the Ohio and Lake Erie, here only 8 M. from the latter.

447 M. Erie, see p. 294.

37. From Philadelphia to Harrisburg and Pittsburg.

354 M. Pennsylvania Railroad to (105 M.) Harrisburg in 2\( \frac{1}{2} \) hrs. (fare $3.15, parlor-car $1.50); to (354 M.) Pittsburg in 8\( \frac{1}{4} \) hrs. (fare $9, parlor-car $2, sleeper $2). This line, forming part of the fine through-route from New York to Chicago (see R. 47a), traverses the beautiful valleys of the Susquehanna and Juniata.

Leaving the handsome Broad St. Station (p. 230) the train crosses the Schuylkill and runs to the N.W. through W. Philadelphia (p. 241), passing various suburban stations, most of which are tasteful little buildings surrounded with flower-gardens. 9 M. Haverford College, with the most important college of the Orthodox Quakers, situated in a finely wooded park to the left. — 10 M. Bryn
**HARRISBURG.**

37. Route. 255

*Bryn Mawr College,* one of the youngest and best colleges for women in the United States (300 students). The tower of the main building is conspicuous to the right. — Near (12 M.) *Villa Nova,* with a R. C. college, monastery, and farm, is the *Red Rose Inn,* a favourite resort of cyclists and other visitors from Philadelphia. — To the left, at (16 1/2 M.) *Devon,* is the large *Devon Inn* (§ 4-5), a favourite summer-resort. — At (20 M.) *Paoli* (535 ft.) the British defeated the Americans on Sept. 20th, 1777 (monument). It was the birthplace of *Mad* Anthony Wayne (1745-96; p. 163).

The train now leaves the region of suburban homes and enters the ‘Garden of Pennsylvania’, one of the richest and most carefully cultivated farming districts in America. A splendid *View of the peaceful Chester Valley* is disclosed to the right as we cross the ridge (550 ft.) of a S. outlier of the Alleghenies and emerge on the hillside. We follow the ridge for some time and then descend to the valley. — 32 1/2 M. *Downingtown.* Iron-works and lime-kilns now appear. — At (38 1/2 M.) *Coatesville* (380 ft.; 3680 inhab.) we cross the *West Brandywine* by a bridge 73 ft. high. — 51 M. *Gap* (560 ft.) lies in an opening in *Mine Hill,* on the watershed between the Delaware and the Susquehanna, and the train now descends into the *Pequea Valley,* with its fields of wheat, maize, and tobacco. — Crossing the *Conestoga Creek,* which preserves the name of the Conestoga Indians, we reach (69 M.) *Lancaster* (360 ft.; *Stevens Ho.,* § 21 1/2; *American Ho.,* § 2), a prosperous manufacturing town of 32,011 inhab. and an important market in tobacco and farm produce.

The *Franklin & Marshall College* and the *Theological Seminary* here both belong to the German Reformed Church. *Woodward Hill Cemetery* contains the grave of President Buchanan (1791-1868). The district is largely peopled by the descendants of German colonists. A railway runs hence to *Hanover* and *Gettysburg* (p. 259).

Beyond (87 M.) *Elizabethtown* the train enters the picturesque defiles of the *South Mountain.* At (90 M.) *Conewago* we cross the stream of that name (view). Farther on we reach the W. bank of the *Susquehanna,* a wide, shallow stream, thickly strewn with rocks. 96 M. *Middletown,* at the mouth of the *Swatara,* with 5080 inhab., is an iron-making place. — At (102 M.) *Steelton* (pop. 9250) are the huge works of the Pennsylvania Steel Co., employing 4500 men.

105 M. *Harrisburg* (320 ft.; *Commonwealth,* § 21 1/2-6; *Lochiel Ho.,* § 3; *Bolton,* § 2-3), the capital of Pennsylvania, is finely situated on the E. bank of the Susquehanna, here about 1 M. wide. Pop. 39,385. Except when the legislature is in session, it is a somewhat dull place. The *Capitol,* conspicuously situated on a hill, was burned down in 1897, but is being rebuilt on a scale of greater size and magnificence. Opposite its W. façade is a *Statue of Gen. Hartranft* (1830-89), by Ruckstahl, erected in 1898. In State St. is a *War Monument,* 110 ft. high. A small enclosure in *Harris Park* contains the grave of John Harris, father of the founder of the town,
and the stump of the tree to which he was tied by drunken Indians (1718), who intended to burn him alive. The Susquehanna is crossed here by four bridges, one of which is the quaint old covered bridge described by Dickens in his 'American Notes'.

From Harrisburg to Gettysburg, 47 1/2 M., railway in 1 1/2 hrs. — The train crosses the Susquehanna, just below the old bridge (see above), and runs to the S.W. — 22 M. Carlisle Junction, for a branch-line to (6 M.) Carlisle (see below). Near (23 M.) Mt. Holly Springs we pass through a gap (1000 ft.) in the South Mountain. As we approach Gettysburg we traverse the field of the first day's battle (see p. 290). — 47 1/2 M. Gettysburg, see p. 289.

From Harrisburg to Winchester, 116 M., Cumberland Valley R. R. in 4-1/2 hrs. This line traverses the fertile 'Cumberland Valley', between the Blue Mts., on the right, and the South Mountain, on the left. — The train crosses the Susquehanna as above, — 18 M. Gettysburg Junction, for the line to Gettysburg (see above). — 19 M. Carlisle (180 ft.; Mansion Ho., § 2), a pleasant little town of 7620 inhabitants, with a Government Indian Training School, in which about 800 Indian children are taught the arts and methods of civilisation. Carlisle was Washington's headquarters during the 'Whiskey War' of 1794, and it was captured by Gen. Lee in 1863. — About 5 M. beyond (63 M.) Greensc castle the train crosses the famous Mason and Dixon's Line (see p. 259) and enters Maryland ('Old Line State'), the northernmost of the old slave-holding states. — 74 M. Hagerstown (570 ft.; Baldchin, § 2-3), a town of 10,118 inhabitants, on the Antietam, is the junction of lines to Washington (see p. 273), Harper's Ferry (via Wevorton; see p. 292), and the Shenandoah Valley (R. 69b). It was a centre of military operations in the Civil War. — 81 M. Williamsport is the point where Gen. Lee crossed the Potomac on his retreat after the battle of Gettysburg (p. 261). We here enter West Virginia ('Pan Handle State'). — At (94 M.) Martinsburg (635 ft.), on the Tuscarora, we intersect the Baltimore & Ohio R.R. (p. 292). — 116 M. Winchester.

From Harrisburg to Reading, 54 M., railway in 1 1/2 hrs. — The chief intermediate station is (26 M.) Lebanon. — 54 M. Reading, see p. 253.

From Harrisburg to Williamsport, 93 M., Northern Central Railroad in 2 1/2-3 hrs. This railway ascends on the E. bank of the Susquehanna to (53 M.) Sunbury (p. 253). Thence to (93 M.) Williamsport, see p. 252.

From Harrisburg to Baltimore, see p. 274.

Beyond Harrisburg the Pennsylvania R. R. runs to the N. on the left bank of the Susquehanna to (110 M.) Rockville, where it bends to the W. and crosses the river by a bridge 2/3 M. long (*View). It then turns to the N. again and passes the Dauphin Gap (350 ft.). The river, now to the right, is wide, shallow, and nearly choked with grassy islets.

Beyond (120 M.) Duncannon the line leaves the Susquehanna and begins to ascend to the left through the valley of the 'beautiful blue' * Juniata, 'which has been the theme of more song and romance than almost any other American river' (Cook).

The scenery along this river, as we cross bridge after bridge of the Alleghenies, is of the most picturesque character; and the entire geological formation of Pennsylvania is exhibited to the student, as the river cuts its way through a stratification 6-7 M. in thickness. The line follows the windings of the river (views chiefly to the right). The district traversed is full of historical reminiscences of the struggles of the early Scotch-Irish colonists with the Indians and of the enterprise of David Brainerd and other missionaries. An immense traffic in coal and iron is carried on by this line, and the coal-trains are sometimes of extraordinary length.

At (138 M.) Millerstown (410 ft.) we thread the *Tuscarora Gap, where the railway, river, road, and canal squeeze their way side by
side through a narrow defile. This lay in the land of the Tuscarora Indians (see p. 205). Beyond (154 M.) Mifflin we pass through the picturesque *Lewiston or Long Narrows, where the railway runs for several miles along one side of the stream, with the road and canal on the other. The slopes of the hills (1000 ft.) are covered with slate debris. — 166 M. Lewiston (500 ft.), a prosperous little place with 3273 inhab., lies at the mouth of the Kishicoquillas Valley.

In this valley, a little above Lewiston, was the home of the famous Mingo chief Logan, whose friendship for the white man was changed to hatred by the cruel massacre of his family.

191 M. Mt. Union lies at the entrance of *Jack's Narrows (600 ft.), made by the river forcing its way through Jack's Mt. — 209 M. Huntingdon (Brunswick, $2), the largest town on the Juniata (5729 inhab.), occupies the site of the 'Standing Stone', where the Indians assembled for centuries to hold their grand councils.

The Broad Top Mt. Railroad runs hence to (58 M.) Bedford, near which are Bedford Springs (Bedford Springs Ho., §3; Arandale, §2-3).

At (209 M.) Petersburg (680 ft.) we leave the canal, which follows the Franktown branch of the river, and ascend the Little Juniata. — At (222 M.) Tyrone (905 ft.), where we reach the E. base of the main range of the Alleghenies, the line turns sharply to the left (S.W.), leaves the Juniata, and enters the Tuckahoe Valley. Bald Eagle Valley opens to the N.E.

Tyrone is the outlet for the important Clearfield Coal Measures, which produce large quantities of bituminous coal. — About 3 M. to the E. is the Sinking Valley, which takes its name from the Sinking Spring, a singular underground watercourse.

From Tyrone the train runs along the base of the Alleghenies (right) to (237 M.) Altoona (1180 ft.; Logan Ho., $3; Wopsononock Inn; Railway Restaurant), a busy town of 30,337 inhab., founded in 1850 by the Pennsylvania R. R. and consisting almost wholly of its workshops and workmen's houses.

Altoona is, perhaps, the most representative railway-town in America. The works cover 120 acres, employ 6500 men, and produce 300 locomotives, 200 passenger-cars, and 5000 freight-cars annually. Some of the locomotives made here weigh 125 tons. — Those who wish to see the fine passage of the Alleghenies by daylight may pass the night here. Good views are obtained from Prospect Hill to the S. and Gospel Hill to the N.

Beyond Altoona the train gradually ascends to the summit of the mountains, climbing a gradient of 90 ft. to the mile. At (242 M.) Kittaning Point (1595 ft.) the line is carried round the famous *Horseshoe Curve (views to the left), where the line crosses two ravines on a lofty embankment and cuts away the promontory dividing them. The sides of the curve are parallel, so that trains travelling the same way may be moving in opposite directions. A little farther on we pass through a Tunnel, 2/3 M. long and 2160 ft. above the sea, crossing the Alleghenies and the watershed between the Atlantic and the Mississippi. The top of the ridge is 210 ft. above the tunnel.

The descent on the W. slope of the mountains is less abrupt. 248 M. Gallitzin, at the W. end of the tunnel, is named in honour
of Prince Demetrius Gallitzin (d. 1840), who laboured as a missionary in this district for 40 years. — 252 M. Cresson Springs (2015 ft.; Mountain House, $4), a favourite summer-resort. Coaches ply hence to Loretto, founded by Prince Gallitzin (see above). — We descend along the upper waters of the Conemaugh, and the scenery increases in attractiveness. Numerous vestiges are seen of the old Portage Railroad, which formerly served the traffic across the Alleghenies by a series of inclined planes, communicating at each end with canals. — Near (269 M.) Mineral Point (1441 ft.) we cross the Conemaugh. Conemaugh Lake (1460 ft.), the bursting of the dam at which caused the terrible disaster of 1889 (see below), lies a little to the left. 273 M. Conemaugh (1275 ft.).

275 M. Johnstown (1185 ft.; Merchant’s Hotel, $3), an iron-making city at the confluence of the Conemaugh and Stony Creek, was founded in 1791 by a German pioneer, named Joseph Jahns. It contains 21,805 inhab. and has to a great extent recovered from the effects of the inundation. The huge *Cambria Steel Works, on the N. side of the river, were partly destroyed by the inundation in 1889, but have been restored and again give employment to 8000 men.

A glance at the deep narrow valleys with their high enclosing walls, at the junction of which the city lies, goes far to explain the possibility of so tremendous a catastrophe as that which overwhelmed Johnstown on May 31st, 1889. Conemaugh Lake (see above), 21½ M. long and 1½ M. wide, was reserved as a fishing-ground by a club of Pittsburg anglers, and its waters were restrained by a dam 1000 ft. long, 110 ft. high, 90 ft. thick at the base, and 25 ft. thick at the top. A continuance of violent rains filled the lake to overflowing, and all efforts to save the dam were fruitless. The break occurred about 3 p.m., a gap of 300 ft. being at once formed. The water that burst through swept down the valley in a mass 1½ M. wide and 40 ft. high, carrying away everything in its way and completely destroying Johnstown and the other towns and villages in its track. The distance of 18 M. between Johnstown and the lake was traversed in about 7 min. The mass of houses, trees, machinery, railway iron, and human bodies was checked by the massive railway-bridge below Johnstown, and soon caught fire, probably burning to death some hundreds of persons imprisoned in the wreckage. The estimates of the total loss of life vary from 2280 to 5000. The value of property destroyed was at least $10,000,000 (2,000,000$).

The train descends along the left bank of the Conemaugh. 295 M. Bolivar (1030 ft.) lies at the entrance to the beautiful *Pack-saddle Narrows, where the river breaks through the Chestnut Range, the W. ridge of the Alleghenies, which tower 1200 ft. above the water. At (300 M.) Blairsville Intersection (1115 ft.) the line forks, the main line leaving the Conemaugh and running direct to Pittsburg, while the right branch runs via Blairsville to Allegheny City (p. 266).

The district we traverse as we approach Pittsburg is a veritable ‘Black Country’, full of coal-pits, coke-ovens, and smelting-furnaces. 313 M. Latrobe; 322 M. Greensburg (1090 ft.). We approach the Monongahela at (344 M.) Braddock’s (8561 inhab.), which marks the scene of the memorable defeat of General Braddock on July 9th, 1755, on his expedition against Fort Du Quesne (see p. 264). It was in rallying the defeated British forces that Washington won
his first military laurels. The huge Edgar Thomson Steel Works are
now situated here (see p. 256). — 347 M. Wilkinsburg (926 ft.).

354 M. Pittsburg, see R. 39.

38. Gettysburg.†

*Gettysburg* is reached from New York via the Pennsylvania or the Read-
ing R. R. in 7½ hrs. (fare $6.50), from Philadelphia via the same railways
in 5 hrs. (comp. p. 256; § 4), and from Washington via Baltimore in 6½ hrs.
by the Western Maryland or the Northern Central R. R. (comp. p. 213).

*Gettysburg* (Eagle, §2-3; Gettysburg Springs Hotel, § 3-3½; Hotel,
*Gettysburg*, § 2-2½), a small town with (1890) 3221 inhab.,
lies about 40 M. to the S.E. of *Harrisburg* (p. 255) and 7 M. to the
N. of the boundary between Pennsylvania and Maryland, the famous
*Mason and Dixon’s Line* (p. 256), which, before the war, marked the
N. limit of slavery. On July 1st-3rd, 1863, the vicinity of this
town was the scene of what is regarded as the chief contest of the
American Civil War and as the ‘turning-point of the Rebellion’.
Many of the chief points are now accessible by electric railway.

The battlefield covers about 25 sq. M. and lies mainly to the S.W.
of the town. The *Gettysburg Battlefield Memorial Association*, an or-
ganisation representing the soldiers engaged, has marked all the important
points by monuments placed on ground acquired for the purpose.
The tracts along the lines, aggregating 450 acres, are the land upon which the
most important movements were executed. There are nearly 400 monu-
ments on the field, erected with the utmost care in the exact localities,
and standing in woods or open fields, by the road-side, on the stony
ridges, in gardens, and being of all designs, executed in bronze, marble,
or granite. Over $1,000,000 has been expended on the grounds and monu-
ments. The battlefield is probably better marked, both topographically
and by art, than any other battlefield in the world.

There were engaged in the battle about 80,000 men on each side, the
Union army having 3½ cannon and the Confederates 293. Generals George
Gordon Meade and Robert Edward Lee were the respective commanders,
and it was among the most hotly contested battles of the war and the
largest in actual numbers engaged. The Union loss was 2972 killed, 14,497
wounded, and 5434 prisoners, a total of 23,003; and the Confederate loss,
2592 killed, 12,709 wounded, and 7467 prisoners, total 23,708.

The long curving ridges and deep intervening valleys of the Allegheny
mountain ranges cross Central Pennsylvania, the South Mountain ridge
passing to the W. of Gettysburg, with the Cumberland Valley beyond it,
having two prominent towns, Chambersburg in Pennsylvania and Hagers-
town on the Potomac river, in Maryland. Two parallel ridges border the
plain on which Gettysburg stands. The long ‘Seminary Ridge’, stretching
from N. to S. about a mile to the W. of the town, gets its name from the
Lutheran Theological Seminary standing upon it; and the Cemetery
Ridge, to the S. of the town, which runs up its slopes, has, on its N. flat-
topped hill, the village cemetery, wherein the chief grave was that of
James Gettys, after whom the town was named. An outlying eminence
known as Culp’s Hill is farther to the E., making, with Cemetery Ridge,
a formation bent round not unlike a fish-hook, with the cemetery at the
bend and Culp’s Hill at the barb, while down at the S. end of the long
straight shank with the intervening rocky gorge of the ‘Devil’s Den’,
early 3 M. away, are two peaks formed of tree-covered crags, known as

† This account of Gettysburg was prepared for *Baedeker’s Handbook
to the United States* by Mr. Joel Cook, of the ‘Philadelphia Public Ledger’,
who was present at the battle as a special correspondent.
Little Round Top and Big Round Top. These long ridges with the interval and the country around them are the battlefield, a topographical configuration displaying the ground to great advantage, the many monuments marking the respective lines of battle. Comp. Plan.

After their victory at Chancellorsville (p. 366) in May, 1863, the Confederates determined to carry the war to the N. into the enemy's country. Lee gathered nearly 90,000 men at Culpeper (Va.), including J. E. B. Stuart's cavalry force of 10,000 men. The Union army, commanded by General Hooker, was then encamped along the Rappahannock river, opposite Fredericksburg (p. 365), 150 M. to the S. of Gettysburg. Lee started to the N. across the Potomac, but Hooker did not discover it for some days, and then followed him. The Confederates crossed between June 22nd and June 25th and concentrated at Hagerstown (p. 256), in the Cumberland Valley, up which they made a rapid march, overrunning the entire country to the Susquehanna River (p. 251). Hooker was late in movement and crossed the Potomac to the E. of Lee on June 25th, thus making a northern race, with Lee in advance but on the longer route of the outer circle. There were 10,000 Union troops in the garrison at Harper's Ferry (p. 292) on the Potomac, and Hooker asked that they be added to his army; but the government declined, and Hooker immediately resigned his command. He was succeeded by Gen. Meade, who thus on the eve of the battle became the Union commander. This was on June 28th, when Meade was near the Potomac, and Ewell with Lee's advance guard had gone up the Cumberland Valley as far as Carlisle (p. 256) and was threatening Harrisburg (p. 255). The main body of Confederates lay at Chambersburg, with nobody opposing them. Lee, then hearing of the Union pursuit and being far from his base, determined to face about and cripple his pursuers, fixing upon Gettysburg as the point of concentration. He ordered Ewell to march to the S. from Carlisle and the others to the E. from Chambersburg through the mountain-passes. Meade's cavalry advance under Buford reached Gettysburg on June 30th, ahead of the Confederates, and Meade's army was then stretched for 60 M. back towards the Potomac. When he heard of Lee's changed tactics, Meade concluded that his extended formation was too risky and decided to concentrate in a strong position upon the Pipe Creek Hills in Maryland, about 15 M. to the S. of Gettysburg. Thus the battle began with each army executing a movement for concentration.

The battle opened on July 1st, the Union Cavalry to the W. and N. of Gettysburg becoming engaged with the Confederate advance approaching from the passes through the South Mountain. The cavalry was at first victorious but was afterwards overwhelmed by superior numbers, and with their infantry supports under Gen. Reynolds, who was killed, were driven back through Gettysburg to the cemetery and Culp's Hill. These were manned by fresh troops that had come up. Meade was at Pipe Creek, laying out a defensive line, when he heard of Reynolds' death and the defeat, and he sent Hancock forward to take command, who determined that the Cemetery Ridge was the place to give battle. Ewell in the meantime had extended his wing round to the E. of Culp's Hill and held Gettysburg; but active operations were suspended, and both sides spent the night getting their forces up.

The next day opened with the armies confronting each other in line of battle, the Union forces along the Cemetery Ridge, and the Confederates upon the Seminary Ridge to the W. and also stretching round through Gettysburg, to the N. of the Cemetery, 2 M. to the E. along the base of Culp's Hill. In the long intervening valley and upon the ravines and slopes of the Cemetery Ridge and Culp's Hill the main battle was fought. Lee opened the attack by Longstreet advancing against the two Round Tops, but after a bloody struggle the Unionists held them. Sickles, who held the line to the S. of Little Round Top, thought he could improve his position by advancing 1/2 M. towards Seminary Ridge, thus making a broken Union line with a portion thrust out dangerously. The enemy fell upon Sickles, front and flank, almost overwhelming his line in the 'Peach Orchard' and driving it back to the adjacent 'Wheat Field.' Rein-
THE COUNTRY
from the Potomac to Harrisburg.
GETTYSBURG
Final Attack of the First Day, and Battle of the Second Day.

Last Confederate Attack, July 1st.

The first day's battle is represented north of the Fairfield and Hanover roads.
The second day's battle south of the same roads.

Union troops
Confederate troops.
forcements were poured in and there was a hot conflict, Sickles being
seriously wounded and his force almost cut to pieces.

Ewell then made a terrific charge from out of Gettysburg upon the
Cemetery and Culp's Hill with the 'Louisiana Tigers' and other troops,
effecting a lodgement, although the defenders wrought great havoc with
their heavy cannonade. The Union guns on Little Round Top having ul-
timately cleared the 'Wheat Field', the combatants rested; Lee, inspired by
his partial successes, determining to renew the attack next morning.

On the third and last day Gen. Meade opened the combat by driving
Ewell's forces from Culp's Hill early in the morning. Lee did not hear
of this, but had an idea that both the Union centre and right wing had
been weakened the previous day, and during the night, he planned an attack
in front to be aided by a cavalry movement round that wing to assail
the rear, thus following up Ewell's supposed advantage. To give Stuart
with his cavalry time to get around to the rear, the front attack was not
made till afternoon. Each side got cannon in position during the morn-
ing, Lee having 120 guns along Seminary Ridge, and Meade 80 in the
Cemetery and along a low irregular stone pile, forming a sort of rude
wall along the Taneytown road leading to the S. from Gettysburg. About
1 p.m. the Confederates opened fire, and the most terrific artillery duel
of the war followed across the intervening valley, six guns being dis-
charged every second. The troops, lying low, suffered little, but several
Union guns were dismounted. After two hours' deafening cannonade Lee
ordered his grand attack, the celebrated charge by Gen. Pickett, a force
of 14,000 men with brigade front advancing across the valley. They had
a mile to go, marching swiftly, but before they got halfway across, all
the Union guns were trained upon them. The attack was directed at an
umbrella-shaped clump of trees, at a low point of the Cemetery Ridge,
where the rude stone wall made an angle with its point outside. Hancock
commanded this portion of the Union line, and while the grape and canister
of the cannonade ploughed furrows through Pickett's ranks, when the
column got within 300 yds., Hancock opened musketry fire with terrible
effect. Thousands fell, and the brigades broke in disorder, but the ad-
ance, headed by Gen. Armistead on foot continued, and about 150 men
leaped over the stone piles at the angle to capture the Union guns. Lieut.
Cushing, mortally wounded in both thighs, ran his last serviceable gun
towards the wall, and shouted to his commander 'Webb, I will give them
one more shot'. He fired the gun and died. Armistead put his hand on
the cannon, waved his sword and called out, 'give them the cold steel,
boys'; then pierced by bullets, he fell dead alongside Cushing. Both lay
near the clumps of trees about 30 yds. inside the wall, their corpses
marking the fairest point to which Pickett's advance penetrated, where the
'High Water Mark Monument' now marks the top of the flood tide of the
rebellion, for afterwards there was a steady ebb. There was a hand to
hand conflict, Webb was wounded and also Hancock, and the slaughter was
dreadful. The Confederates were overwhelmed, and not one-fourth of the
gallant charging column composed of the flower of the Virginia troops
escaped, the remnant retreating in disorder. Stuart's cavalry failed to
cooperate, having unexpectedly met the Union cavalry about 4 M. to the
E. of Gettysburg, and the conflict that ensued prevented their attacking
the Union rear. After Pickett's retreat there was a general Union ad-
ance which closed the combat. During the night Lee began a retreat,
and aided by the heavy rains usually following great battles, the Confeder-
ates next day withdrew through the mountain-passes towards Hagerstown,
and afterwards escaped across the Potomac. The day of Lee's retreat
Vicksburg surrendered to Gen. Grant (see p. 359) and these two great
events were the beginning of the Confederacy's downfall.

This battlefield is now covered with monuments and marking posts
designating the positions of the opposing armies. Its survey is best begun
by a tour to the N. and W. of the town, the scene of the first day's fight.
The more interesting tour, however, is to the S. from Gettysburg. Ascend-
ing Cemetery Hill we pass by the roadside the house of Jenny Wade, the
only woman killed in the battle, accidentally shot while baking bread.
The rounded Cemetery Hill is a strong and elevated position bearing many monuments, and here, alongside the little village-graveyard, the Government has a National Cemetery of 17 acres, where 3572 soldiers are buried, over 1000 being the unknown dead. A magnificent battle monument rises above them, surmounted by a statue of Liberty, and having figures of War, History, Peace, and Plenty at the base of the shaft. This charming spot was the centre of the Union line, then a rough, rocky hill. This cemetery was dedicated on Nov. 19th, 1863, Edward Everett delivering the oration; the monument was dedicated on July 1st, 1869. The cemetery cost $150,000. At the ceremony of its dedication President Lincoln was present, and made the famous 'twenty line address', which is regarded as the most immortal utterance of the martyr. The *Westminster Review* described it as an oration having but one equal, in that pronounced upon those who fell during the first year of the Peloponnesian War, and as being its superior, because 'natural, fuller of feeling, more touching and pathetic, and we know with an absolute certainty that it was really delivered'. The President, when requested to say a few words by way of dedication, drew from his pocket a crumpled piece of paper, on which he had written some notes, and spoke as follows:—

Fourscore and seven years ago our fathers brought forth upon this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal. Now we are engaged in a great civil war, testing whether that nation, or any nation, so conceived and so dedicated can long endure. We are met on a great battlefield of that war. We are met to dedicate a portion of it as the final resting-place of those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this. But, in a larger sense, we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather to be dedicated here to the unfinished work that they have thus far so nobly carried on. It is rather for us to be here dedicated to the great task remaining before us—that from these honoured dead we take increased devotion to the cause for which they here gave the last full measure of devotion—that we here highly resolve that the dead shall not have died in vain—that the nation shall, under God, have a new birth of freedom, and that government of the people, by the people, for the people, shall not perish from the earth.

From the cemetery the Lutheran seminary is seen a mile across the valley, the most conspicuous landmark of the Confederate line. Culp's Hill is to the S.E., strewn with boulders and timber-covered, the trees still showing marks of the fighting. The Emmetsburg road goes down the valley, gradually diverging from the Union line and crossing the fields that were the battle-ground on the 2nd and 3rd days. Many monuments line the road, some of great merit, and it leads to the 'Peach Orchard', where the line bends sharply back. Peach-trees are constantly replanted here as the old ones fall. The 'wheat-field' along side is now a meadow; and beyond we go down among the crags and boulders of the 'Devil's Den', a ravine through which flows a stream coming from the orchard and wheat-field and separating them from the rocky 'Round Tops', the beetling sandstone crags of 'Little Round Top' rising high above the ravine. The sloping fields along the stream above the Den are known as the 'Valley of Death'. Many monuments among these rocks have been made with the boulders that are so numerous. 'Big Round Top' beyond is mounted by a toilsome path, and an Observatory on the summit gives a good view over the surrounding country and almost the entire battlefield. The summit, more than 3 M. to the S. of Gettysburg, has tall timber, preserved as in the battle. Cannon surmount the 'Round Tops' representing the batteries there during the battle. To the W., across the valley, is the long fringe of timber that masked the Confederate position on Seminary Ridge. A picnic ground has been located alongside the 'Round Tops', with access by railway; and large parties frequently visit this
spot during the tourist-season. The lines of breastworks are retained, and
not far away, upon the lower ground, are preserved the stone walls and
the little umbrella-shaped grove of trees mentioned on p. 261. The 20th
Massachusetts Regiment have brought hither a huge conglomerate boulder
from their New England home and set it up as their monument. Their
colonel, Paul Revere, was killed in the battle. Crossing the valley, the
tourist returns to the N. along the Confederate line, where, however,
there was no fighting until the scene of the first day’s conflict is reached,
to the W. of Gettysburg. Here a plain granite stone marks where Reynolds
fell, just within a grove of trees. Reynolds, from his untimely death, is
regarded as the Northern hero of the battle, as Armistead was the
Southern. Near by the ‘Massachusetts Colour-bearer’ holds aloft the flag
of the 13th Mass. Regiment, standing upon a slope alongside the railway,
this striking monument marking the spot where he fell at the opening of
the battle.

39. Pittsburg.†

Hotels. Lincoln (Pl. h; C, 3), 423 Penn Ave., from $3, R. from
$1 1/2; Henry (Pl. i; C, 3), 415 Fifth Ave., R. from $1 1/2; Schenley, a
large new house near Schenley Park (beyond Pl. F, D), about 2 M. from
the centre of the city, from $3 1/2; from $1 1/2; Monongahela (Pl. a;
C, 3), pleasantly situated at the river-end of Smithfield St., well spoken
of; 3-6; Anderson (Pl. b; C, 3), centrally situated but somewhat noisy,
$3 3/4; Duquesne (Pl. c; C, 3), Smithfield St., R. from $1 1/2; Newell’s,
99 Fifth Ave.; Victoria (Pl. d; C, 3), R. from $1, well spoken of; Central
(Pl. e; C, 3), $2 2/3; St. Charles (Pl. f; C, 3), Seventh Avenue (Pl. g;

Restaurants. *Hotel Duquesne, Hotel Victoria (see above); Hagan, 607
Smithfield St.; Newell, 99 Fifth Ave.; Reineman, 505 Wood St., for men.

Railway Stations. The chief are the Union Depot (Pl. D, 3), of the
P. R. E., for trains to Cincinnati, St. Louis, Chicago, New York, etc., and
the Monongahela Station (Pl. C, 4), for the B. & O. lines.

Tramways (electric) run through the chief streets and to the suburbs.
— Inclined Railways (10 in all), a characteristic feature of Pittsburg, lead
to various points on the enclosing hills.

Post Office (Pl. C, 3), Smithfield St., cor. 4th Ave.

Pittsburg (745 ft.), the second city of Pennsylvania and one of
the chief industrial centres of the United States, occupies the tongue
of land between the Monongahela and the Allegheny, which here
unite to form the Ohio, and also a strip of land on the S. side of the
Monongahela. The sister city of Allegheny lies on the N. bank of the
Allegheny and extends down to the Ohio. Pop. (1890) of Pittsburg
238,617, of Allegheny City 105,387. For all practical purposes the
two cities may be regarded as one (like Manchester and Salford),
though they have separate municipal governments. The point of the
tongue is quite flat, and also the immediate river-banks; but the
tongue rises rapidly towards its root, and there are only narrow
strips of level ground between the rivers and the abrupt heights on
the S. side of the Monongahela and the N. side of the Allegheny.
The residential quarters are mainly on the highlands of Pittsburg
to the E. and those of Allegheny to the N. The rest of the delta and

† Pittsburg itself keeps Eastern Time, but trains starting here for
the W. do so on Central Time (see p. xviii). Thus a train timed to start for
Chicago at 11 p.m. starts at midnight by the clocks in the hotels.
the river-banks are given over to manufacturing and are generally covered with a pall of dense black smoke. The two cities are substantially built, and the rivers are crossed by numerous bridges.

Pittsburg occupies the site of the French Fort Duquesne, erected in 1754 and abandoned on the advance of Gen. Forbes in 1758. Its place was taken by the English Fort Pitt (see p. 263), and the laying out of the town of Pittsburg may be dated from about 1765. Its early importance was due to its trade with the Indians, and its commercial advantages are still conspicuous; but the great basis of the prosperity of the 'Iron City' has been the fact that it stands in the centre of one of the richest coal districts in the globe, the four counties immediately adjoining Pittsburg yielding 29,500,000 tons of coal in 1896. Pittsburg also stands in the centre of the chief natural gas district (see below), and the use of this as fuel gave a great impetus to its manufacturing industry, though it is now mainly used for domestic purposes. The iron ore, of which Pittsburg furnaces and mills use about 5,000,000 tons annually, comes chiefly from Lake Superior (pp. 331, 332). The Pennsylvania, New York, W. Virginia, and E. Ohio oil-fields lie mainly in the basin of the Allegheny and Ohio Rivers to the N.E., S., and S.W. of Pittsburg and in 1891 yielded 37,423,947 barrels of petroleum. The staple manufactures of Pittsburg are iron, steel, and glass (comp. p. 266).

Natural Gas is one of the gaseous members of the paraffin series (of which petroleum is a liquid member) and consists mainly of marsh gas, the 'fire damp' of the miner. Its origin is the decomposition of forms of animal or vegetable life, and it is stored under pressure below strata of rock, being set free when those are pierced. Usually it has but little odour. Natural gas has been known to exist in America for over a century, but the first economical use of it was made in 1821, when the town of Fredonia, New York, was lighted with the product of a small well. Its use in iron-making in Western Pennsylvania began in 1875 at the mills of Etna Borough, 6 M. above Pittsburg. It was first used in Pittsburg itself in 1886, when the gas from the Haymaker Well in Murrysville, the chief field of supply for Pittsburg, was conveyed in pipes to the city, a distance of 19 M. The annual consumption of natural gas at Pittsburg at present may be estimated at about 45,000,000,000 cubic ft., of which about two-thirds is used for domestic purposes and one-third for manufactures. Its price is 25 c. per 1000 cubic feet to private individuals, and 10-15c. to manufacturers. There is no question but that the supply is gradually giving out; and it is already too high-priced for the rolling mills, which are reverting to coal and other forms of fuel gas. The illuminating power of natural gas is low. About 1600 M. of piping are used in leading the gas to Pittsburg, in about 15 different lines. The pressure at the wells averages 100 lbs. per sq. inch and has been measured up to 700 lbs. In fuel value 12 cubic ft. of gas are equal to 1 lb. of coal. The process of drilling for gas is similar to that of drilling for petroleum. Those who wish to visit a gas-well (of no great interest) should apply at the office of the Philadelphia Co., cor. of Penn Ave. and 9th St.

Smithfield Street (Pl. C, 3), diverging from Liberty Avenue (Pl.C-F,1-3), near the Union Station, leads to the river Monongahela; and the visitor is recommended to begin by following this street to the (1/2 M.) bridge (tramway) and crossing it to obtain the view of the city from Washington Heights. On the way we pass, to the right, the City Hall (Pl. C, 3); on the staircase is an inscribed tablet from Fort Pitt (p. 265), bearing the date 1764. A little farther on, to the left, is the Post Office (Pl. C, 3). At the bridge are the Monongahela Hotel (r.) and the Baltimore & Ohio Station (l.).

Crossing the Monongahela Bridge (Pl. C, 4), we should ascend to the top of Mt. Washington (370 ft.) by one of the three Inclined
Railways (5c.) on this side. These interesting, but at first somewhat startling, pieces of apparatus are worked by ropes (not cog-wheels) and transport horses and carriages as well as persons.

The *View from the top of the busy cities of Pittsburg and Allegheny, the three rivers, and the encircling hills, all more or less enveloped in smoke, is highly imposing and picturesque. At night, when the cold gleam of the electric lights vies with the lurid glare of the furnaces and smelting works, the effect is still more weird and fascinating. The deep basin in which Pittsburg lies has suggested the name of 'Hell with the lid off'. The Court House and Post Office are conspicuous. The view is most extensive on Sun, owing to the absence of smoke.

The finest building in Pittsburg and one of the best in the United States is the *Allegheny County Court House (Pl. C, D, 3), in Grant St., a splendid example of Mr. H. H. Richardson's treatment of Romanesque, erected in 1888 at a cost of $2,500,000 (500,000£). The massive Gaol is connected with the Court House by a finely handled stone bridge. The main tower (*View) is 320 ft. high. The three entrances in the chief façade seem somewhat low and depressed for the size of the building. — Near the Court House is the R. C. Cathedral of St. Paul (Pl. C, 3).

The only remnant of Fort Pitt (p. 264) is an old Block House (Pl. B, 3), in Fort St., near Point Bridge, which has recently been restored by the Daughters of the American Revolution. Hard by, on the Allegheny River, are the Exposition Buildings (Pl. B, 3), in which annual exhibitions are held.

The Pennsylvania Incline (Pl. E, 2), 17th St., is interesting from the manner in which it is led down over the top chord of the bridge spanning the Pennsylvania Railroad at its foot. — Other buildings of importance are the German National Bank; the National Bank of Commerce; the Duquesne Club; the Duquesne Theatre; Trinity Church; the Carnegie Building, the Park Building; and the School of the Ursuline Nuns, Fifth Avenue.

To the E. of the city (beyond Pl. F, 2, 3) lies Schenley Park, containing the fine Phipps Conservatory, presented to the city by Mr. Henry Phipps at a cost of $200,000. — Near the Forbes St. entrance to the Park is the handsome *Carnegie Library, built in the Italian Renaissance style in 1892-95 and presented to the city by Mr. Andrew Carnegie. The total cost was $800,000, besides $300,000 given for branch-libraries.

The library proper occupies two stories in the main building and has a present capacity of 200,000 volumes. The building also includes a Music Hall (with 2000 seats), an Art Gallery for exhibitions, a Museum (natural history, historical relics, etc.), and an Academy of Art and Science.

To see the pleasant residence-quarters on the hills, we take a Highland Avenue Electric Car, alight at its terminus, and walk up to (1/4 M.) Highland Park, which commands a fine *View, especially of the Allegheny. The park contains the town-reservoirs and a good zoological collection. We may return to Pittsburg by the Negley Ave. cars.

No one should leave Pittsburg without visiting one at least of
the great iron and steel works which have made its prosperity and reputation. Among these are the Edgar Thomson Steel Works, the Homestead Steel Works, the Duquesne Steel Works, the Keystone Bridge Co., the Jones & Laughtins Works, the Oliver Iron & Steel Co., and the Crescent Steel Works.

Those who wish to visit the four first-named works apply for a pass at the office of the Carnegie Steel Co., Carnegie Building, Fifth Ave. (Pl. C, 3). Half-a-day at least should be allowed for the visit. Perhaps the best way is to go to Bessemer, on the Pennsylvania R. R. (from Union Station); visit the Edgar Thomson Works; proceed thence by B. & O. R. R. to Salt Works (10 c.); cross the river by small-boat ferry (5 c.) to Munhall; walk to (3/4 M.) the Homestead Works; take the train thence to Cochran, near the Duquesne Works; and return to Pittsburg by the P. R. R. to Fourth Ave. or Union Station. — The Edgar Thomson Works have an annual capacity for the production of 1,000,000 tons of metal, their chief product being steel rails. The Homestead Steel Works have an annual capacity of 750,000 tons of Bessemer steel and 850,000 tons of open hearth steel. Large quantities of nickel-steel armour-plates are made here. Natural gas is largely used for fuel at both works. The two works employ about 6000 men. The Duquesne Steel Works, on the Monongahela, 3 M. above Homestead, have the four greatest blast furnaces in the world, producing 2200 tons of pig iron per day. — The Keystone Bridge Works, which have produced some of the finest steel bridges in the world, cover 7 acres of ground at the corner of 51st St. and Railroad St.

The American Iron & Steel Works (Jones & Laughtins) are on the S. bank of the Monongahela, opposite Pittsburg. The Westinghouse Electrical Works at East Pittsburg also repay a visit.

The Pittsburg Plate Glass Works and the Macbeth Glass Works (producing 50,000 dozen lamp-chimneys per week) are at Charleroi, 40 M. up the Monongahela, and may be reached either by train or boat (see below).

Allegheny City (Hotel Federat), on the N. bank of the Allegheny, offers few attractions to the visitor. The value of its manufactures in 1890 was $20,500,000. Taking a tramway-car in 6th St. (Pl. C, 3), we cross the river and follow Federal St. to the Town Hall and the Carnegie Free Library (Pl. C, 2). Thence we may follow Ohio St. to the S.W., passing St. Peter’s Church, to the Park (Pl. B, 2). To the left rises a hill crowned by the Soldiers’ Monument (Pl. B, 2), to which we should ascend for its View of the two cities. Walkers may descend on the other side and return to Pittsburg via the old covered Union Bridge (Pl. B, 2, 3).

River Navigation. Through the Monongahela, Allegheny, and Ohio more than 20,000 M. of inland navigation are open to the steamers of the cities of Pittsburg and Allegheny, and regular communication is thus kept up with New Orleans (p. 415), 2000 M. distant. The tonnage of the river-craft of Pittsburg (1,400,000 tons) is said to be greater than that of New York or all the Mississippi ports put together. This is owing to the enormous coal traffic, and stern-wheel tug-boats may frequently be seen conveying a train of barges with a total cargo of 20,000 tons of coal. — The Davis Island Dam (movable), on the Ohio, 4 M. below the city, was constructed at a cost of nearly $4,000,000 (200,000 ft.) and has one lock 500 ft. long and 110 ft. wide.

A trip up the Monongahela by steamer, as far as Monongahela City or Brownsville, is very interesting. The river is lined with coal ‘tipples’.

From Pittsburg to Connelsville, either by the S.W. Pennsylvania R. R. (56 M.) or by the B. & O. R. R. (58 M.), in 11/4-21/4 hrs. — Connelsville (Gough Ho., § 2), a town of 5329 inhab., on the Youghiogheny, lies in the midst of one of the two chief coke regions in the world, the other
being that of Durham, England. About 6,000,000 tons of coke are produced here annually.

From Pittsburg to Buffalo, 263 M., in 9-10 hrs. (Allegheny Valley R. R. to Oil City, 132 M.; Western New York & Pennsylvania R. R. thence to Buffalo, 137 M.). This line runs through one of the chief petroleum districts, and numerous oil-wells, in operation or deserted, are passed. Petroleum is obtained from oil-bearing sands by pipes of varying diameter, sunk to a depth of 300-3000 ft. The oil is transmitted to the large storage tanks of the Pipe Line Companies by pipe lines, which are sometimes hundreds of miles long. — The railway at first follows the Allegheny River.

213 M. Oil City (Arlington, §3), a city of 10,993 inhab., is the great centre of the Oil District, and all the processes of procuring, preparing, and shipping the oil may be conveniently observed here. In 1892 Oil City was the scene of a terrible disaster, caused by the catching fire of a large petroleum tank. The burning oil, overspreading the water in the creek, set fire to many buildings and caused the loss of many lives. — The train now follows the valley of Oil Creek, with many abandoned wells. It is calculated that somewhere about 1865 this valley, between Oil City and Titusville, contained 75,000 people. At least 60 million barrels of oil, valued at $200,000,000, were taken from the valley in ten years. The present yield is insignificant. — 148 M. Titusville (Brunswick, Mansion Ho., §2), with 8073 inhab., is another busy oil-centre. — 175 M. Corry (5677 inhab.). — 205 M. Mayville, at the head of Chautauqua Lake (1300 ft.), is the junction for (4 M.) Chautauqua (see p. 301). — 219 M. Brockton, and thence to (269 M.) Buffalo, see R. 46a.

From Pittsburg to Erie, 148 M., Pennsylvania Railway in 43/4-51/2 hrs. — 25 M. Rochester (see below); 47 M. Lawrence Junction; 92 M. Jamestown (p. 307); 133 M. Girard, and thence to (148 M.) Erie, see R. 46a.

From Pittsburg to Cleveland, 150 M., Penna. R. R. in 31/2-6 hrs. — This line diverges from that to Erie at (25 M.) Rochester. 48 M. Wellsville; 93 M. Alliance; 124 M. Hudson. — 150 M. Cleveland, see p. 294.

From Pittsburg to Columbus and Cincinnati, see R. 44b; to Chicago, see R. 44b.

40. From Philadelphia to Baltimore.

96 M. Pennsylvania Railway in 2-4 hrs. (fare $2.80; parlor-car 50c.). From New York (186 M.) in 4-7 hrs. (fare $5.30). — The Baltimore & Ohio R. R. follows almost the same route (same times and fares).

Philadelphia (Broad St. Station), see p. 220. The train crosses the Schuylkill and runs to the S.W., not far from the W. bank of the Delaware. The University of Pennsylvania (p. 241) and the Blockley Almshouses (p. 241) are seen to the right. 131/2 M. Chester (20,226 inhab.) was settled by the Swedes in 1643. Between (17 M.) Linwood and (19 M.) Claymont we cross a small stream and enter the State of Delaware ('Diamond State'). Farther on we cross the Brandywine (p. 268) and reach —

27 M. Wilmington (Clayton Ho., $2 1/2; Jennings), the chief city of Delaware, situated at the confluence of the Delaware, Brandywine, and Christiana, with 61,643 inhab. and extensive manufactures, including the making of iron (Diamond State Iron Works, etc.), carriages, railway-carriages, iron and wooden ships, gunpowder, morocco and other leather, and cotton goods (total value in 1890, $20,500,000). The most interesting point is the old Swedish
Church (seen to the right as we enter the station), which dates from 1698 and marks the site of the first Swedish colony in America and the first permanent European settlement in the valley of the Delaware (1638).

Picturesque walks may be taken in the *Glen of the Brandywine*, which is kept as a public park. — The Battle of the Brandywine, in which Washington was defeated by the English in Sept., 1777, was fought about 13 M. to the N.W.

From WILMINGTON TO CAPE CHARLES, 192 M., railway in 6 hrs. This line, which descends the narrow peninsula to the E. of Chesapeake Bay (p. 273), is of some importance as forming part of a through-route from New York to Old Point Comfort (p. 372; 11-12 hrs.) and as a means of bringing fruit and vegetable supplies to the Northern cities. It runs through the famous peach district of Delaware. One perfectly straight section of this line, 90 M. long, is said to be the longest tangent in the United States. From (192 M.) Cape Charles steamers ply to (24 M.) Old Point Comfort (p. 372) and (36 M.) Norfolk (p. 371).

Beyond (39 M.) Newark the train crosses the famous Mason & Dixon's Line (p. 259) and enters Maryland ("Old Line State"). Near (51 M.) North-East we see Chesapeake Bay (p. 273) to the left. At (61 M.) Havre-de-Grace we cross the wide Susquehanna, which here enters the head of Chesapeake Bay. Farther on we cross several wide shallow rivers or arms of the Bay.

96 M. BALTIMORE (Union Station), see below.

41. BALTIMORE.

Railway Stations. Union or Charles Street Station (Pl. C, D, 2, 3), for all points reached by the Pennsylvania Railroad and its branches, incl. the N. Central and Bal. & Pot. R. R.; Camden Station (Pl. C, 5, 6), Camden St., for the B. & O. lines; Mt. Royal Station (Pl. C, 3), cor. Mt. Royal Ave. and Cathedral St., also for B. & O. trains (comp. p. 271); Calvert St. Station (Pl. D, 4), for trains of the Northern Central and Baltimore and Potomac lines; Hilden St. Station (Pl. D, 4), for the West Maryland R. R.; North Avenue Station (Pl. C, 2), for local trains (Baltimore & Lehigh R. R.). — Cab to hotel 25c. for each person.

Hotels. *The Stafford* (Pl. e; C, 4), cor. of Charles and Madison Sts., R. from $1 1/2; *Hotel Rennert* (Pl. a; C, 4), cor. Saratoga & Liberty Sts., R. from $1 1/2; *Altamont* (Pl. b; B, 3), well situated in Eutaw Place, with view, $2 1/2-4 1/2, R. from $1; *Mt. Vernon* (Pl. c; C, 4), a quiet and comfortable house in a central situation, R. from $1 (E. P.); *Eutaw House* (Pl. d; C, 5), Eutaw St., $2 1/2-8; *Carrollton* (Pl. f; D, 5), a large down-town house, frequented by business-men, $2 1/2-4; *Albion* (Pl. g; C 3; $3 1/2-5), a quiet family hotel; *The Studio* (Pl. k; C, 3), cor. Mt. Royal Ave. and Charles St., R. from $1 1/2; *LEXINGTON* (Pl. 1; D, 5), opposite the City Hall, a good second-class house.

Restaurants. At Hotel Rennert, see above; restaurants at Union, Camden, and Mt. Royal Stations; Ganzhorn (City Hotel), 226 E. Baltimore St.; Women's Exchange, cor. Charles and Pleasant Sts. (for ladies); *Neahr*, 108 E. German St. (German beer and wines); *Green Ho.*., 12 E. Pratt St., moderate (these two for men); *New York Confectionery Store*, Lexington St., with luncheon-room frequented by ladies.

Tramways (3c.) traverse the chief streets and run to various suburbs.

Cabs. Within district bounded by Jones's Falls, Pratt, Carey, and Mosher Streets, each pers. 25c.; beyond the above district and within city limits 30c. By time 75c. per hr. To Druid Hill Park, 1-2 pers. $1 1/2,
3-4 pers. $2. Hacks (with two horses) 75c. for 1 pers., each pers. addit. 25c. per hr. $1 1/2.

Theatres. Academy of Music (Pl. C, 4); Ford’s Opera House (Pl. C, 5); Lyceum (Pl. C, 3); Holliday Street Theatre (Pl. D, 5). — Music Hall (Pl. C, 3), opposite Mt. Royal Station.

Post Office (Pl. D, 5), Monument Sq.

British Consul, Gilbert Fraser, 412 Exchange Place.

Baltimore (the ‘Monumental City’), the chief city of Maryland and one of the great seaports of America, is finely situated on the broad estuary of Patapsco River, 14 M. from Chesapeake Bay (p. 273) and 204 M. from the Atlantic Ocean. The city, which is well laid out and built mainly of a cheerful red brick, is divided into two nearly equal sections by a stream named Jones’s Falls, toward which the ground slopes rapidly on either side. In 1890 Baltimore contained 434,489 inhabitants. The Roman Catholic Archbishop of Baltimore (Card. Gibbons) is Primate in the United States.

Baltimore was first laid out as a town in 1729, and received its name from the title of the Barons of Baltimore (Co. Longford, Ireland), founders and proprietaries of the Maryland Colony. In 1780 it had grown sufficiently in importance to be made a port of entry, and it was incorporated as a city in 1796. After the conclusion of the war of 1812-15 its population rapidly increased, and of late years several populous suburbs have been included in its limits, so that now (1893) its population is fully 600,000. Baltimore has been in one respect more fortunate than other cities of the Southern States. During the War of Independence it was threatened, but not attacked; in the war with Great Britain in 1814 it successfully resisted a combined attack by water and land; and in the war between the States it lay outside the area of actual combat. Its history is, therefore, an almost unbroken chronicle of peace and prosperity. — Dr. Holmes has remarked that three short American poems, each the best of its kind, were all written at Baltimore: viz. Poe’s ‘Raven’, Randall’s ‘Maryland, my Maryland’, and Key’s ‘Star-Spangled Banner’. The last was written in 1814, while its author was a prisoner on one of the British ships bombarding Fort McHenry (p. 273). Jerome Bonaparte, brother of Napoleon I., married a Miss Patterson of Baltimore, and their descendants still live in the city.

The total value of the manufactures of Baltimore in 1890 was $148,000,000 (29,600,000£), in the production of which 87,000 hands were engaged. It is the chief seat of the canning industry of the United States, the materials being the famous oysters of Chesapeake Bay and fruits from its shores. The annual product is 50,000,000 cans, and about 15,000 hands are employed in this industry. Iron, steel, and copper are produced; and the Bessemer Steel Works at Sparrow’s Point (9 M. from Baltimore) have a daily capacity of 2000 tons, equal to about one-third of the total produce of the United Kingdom. The cotton-dock mills in and near Baltimore turn 150,000 spindles, employ about 6000 hands, and produce three-fourths of the sail-dock made in the United States. In brick-making Baltimore ranks fourth among American cities, producing annually 150,000,000. Next to New York it is the largest grain-market on the Atlantic coast, its annual receipts being 40-60 million bushels. The value of the imports of Baltimore in the fiscal year 1891-92 was $8,905,200, of exports $118,732,000. In 1890 its harbour was entered and cleared by 1651 vessels of 2,127,247 tons’ burden.

The water-supply of Baltimore is furnished by the Gunpowder River and Jones’s Falls, and is stored in 8 reservoirs with an aggregate capacity of 2275 million gallons, capable of a daily supply of 500 million gallons, the daily consumption being 45 millions. The water from Gunpowder River is brought through a tunnel almost 7 M. long.

Before the days of railway-transportation Baltimore was the principal centre for the trade with the West, the produce from which was
carried in huge 'Conestoga' wagons across the mountains and over the national turnpike to this city. As curious relics of that period there still remain in the older portion of the city, near Jones's Falls, in a neighbourhood locally known as 'Old Town', a few old inns or taverns with spacious yards attached, where stabling was found for these wagons and their long teams of mules. Though now falling into decay, they preserve the type of the old-fashioned post-houses. For visiting them, and a few quaint streets containing houses characteristic of the last century, the guidance of a resident is required.

The natural centre for the visitor to Baltimore is *Mt. Vernon Place* (Pl. C, 4), a small square, prettily laid out and suggesting Paris in its tasteful monuments and surrounding buildings. In the centre of the square rises the *Washington Monument* (Pl. C, 4), a column 130 ft. high, resting on a base 35 ft. in height and surmounted by a colossal statue of George Washington. The *View from the top (open from 9 a.m. till dusk; adm. 15 c.) forms the best introduction to the city.*

The monument stands at the intersection of Charles St. (p. 271), running N. and S., and Monument St., running E. and W. To the S. lies the harbour. The dark-grey building to the E., just beyond the railway, is the *Guot* (Pl. D, 4). Johns Hopkins Hospital (p. 272) is conspicuous to the E.

The other monuments in the square include *Bronzes of Peace, War, Force, Order, and a Lion, by Barye (p. 271)*; a statue of Chief Justice Taney (p. 274), by Rinehart; a statue of Peabody (p. 103), by Story (a replica of the one in London); and a figure of Military Courage, by Dubois.

At the N.E. corner of the square is the handsome *Mt. Vernon Methodist Episcopal Church* (Pl. C, 4). At the S.E. corner of the square stands the *Peabody Institute* (Pl. C, 4), founded and endowed by Mr. George Peabody (p. 103), for the encouragement of science, art, and general knowledge.

The *Library* (9-10.30), on the groundfloor, contains 130,000 well-selected vols.; the *Reading Room* is large and handsome.

The *Art Gallery* (9-4), on the first floor, contains collections of casts, American paintings, etc. The *Rinehart Collection* consists of casts (Nos. 116-139, 163-167, 168-182) of the works of William H. Rinehart (1823-74), a native of Maryland. *No. 103 (Clytia) is an original.*

The institution also includes a *Conservatorium of Music.*

Also on the S. side of the square (No. 5) is the house of Mr. Henry Walters, containing the celebrated *Walters Collection*, one of the finest private collections of art in America, if not in the world (open to the public on Wed. in Feb., March, and April, on Sat. also in April; tickets 50 c., sold for the benefit of the poor, at the Mt. Vernon Hotel, etc.; also at 1113 Pennsylvania Ave., Washington).

The *Collection of Paintings* (250), in a beautiful gallery lighted from the roof, consists mainly of masterpieces of modern French masters and is remarkable for its uniformly high rank of excellence, almost every canvas being good of its kind. Among the most noted pictures are the following: 8. Charles Gleyre (1807-74), Lost illusions; 12. Alma Tadema, Triumph of Titus; 13. J. B. Corot (1796-1875), Martyrdom of St. Sebastian (a large canvas, 8 ft. x 4 ft.); 19. Briton Rivière, Syria (the Night Watch); 24. Gilbert Stuart (1755-1828), George Washington; 32. Alma Tadema, Sappho; 46. Mariano Fortuny (1838-74), Hindoo snake-charmers; 48. H. Leis (1815-69), Edict of Charles V.; 58. C. Troyon (1810-65), Cattle drinking; 60. Millet (1814-75), Potato harvest; 63. Gérôme, Last prayer of Christian
Cathedral. BALTIMORE. 41. Route. 271

The ORIENTAL ROOM contains a magnificent Collection of Chinese and Japanese bronzes, enamels, porcelain, ivory-carvings, paintings, etc.

A room upstairs (not usually shown) contains an extensive series of Bronzes and Drawings, by A. L. Bory (1796-1875).

The other treasures of the collections, many of them stowed away in closed cabinets or in rooms not shown to visitors, include art-furniture, European porcelain and metal-work, mosaics, Limoges enamels, and objects of bric-à-brac of all kinds in endless profusion.

CHARLES STREET (Pl. C, 1-8), one of the chief thoroughfares of the city, leads to the N. from the Washington Monument past the Union Station (Pl. C, D, 2, 3; p. 268), near which, at the N. end of the B. & O. tunnel (p. 273), is the handsome Mt. Royal Station (p. 268). Following Charles St. to the S., we pass (right) the First Unitarian Church (Pl. C, 4) and the back of the Roman Catholic Cathedral (Pl. C, 4), which faces Cathedral St. It is surmounted by a dome, 125 ft. high, and contains some interesting paintings. Three plenary councils have been held here. Adjacent is the residence of the Archbishop (p. 269).

In E. Mulberry St., a little to the W. of the Cathedral, is the Pratt Free Library (Pl. C, 4), a white marble building, containing 185,000 books.

At the corner of Cathedral and Mulberry Sts. is the Calvert Hall College (Pl. C, 4).

At the corner of Charles St. and Saratoga St., to the right, is the Y. M. C. Association (Pl. C, 4; right). Opposite is the New Mercantile Library (40,000 vols.). In W. Saratoga St. stands the Athenaeum (Pl. D, 4), with the Maryland Historical Society (10-4), containing a library and some interesting portraits and relics.

In W. Fayette St., in the graveyard of the Westminster Presbyterian Church (Pl. C, 5), is the tomb of E. A. Poe (1809-49), with a small monument. Near this point, at the corner of Lombard and Greene Sts., is the University of Maryland (Pl. C, 5).

The 'Lexington Market (Pl. C, 5), a little to the N. of this point,
should be visited for its picturesque illustrations of Southern produce
and manners (best on Sat. night).

Farther on Charles St. passes the Masonic Temple (Pl. C, 4, 5;
left), intersects Baltimore Street (Pl. A-G, 5), the chief business
street of the city, and is continued to S. Baltimore.

In the meantime, however, we may follow E. Fayette St. to the
left to the U. S. Court House (Pl. D, 5), a handsome white marble
building, and the Post Office (Pl. D, 5), in front of which rises the
Battle Monument, erected in 1815 in memory of the struggles of
the previous year. Adjacent is a bronze slab, placed here in 1896
to commemorate the old Court House, from the steps of which the
Declaration of Independence was read on July 29th, 1776. To the
E. of the Post Office is the City Hall (Pl. D, 5), a large and hand-
some building, with a dome 260 ft. high (view; open, 9-3).

A little farther along E. Fayette St., just beyond the stream, is the
Merchants' Shot Tower (Pl. D, 5), a curious relic of 1828, 246 ft. high.

A little to the W. of Mt. Vernon Place, between Howard St. and
Eutaw St., are the unpretentious buildings of the Johns Hopkins
University (Pl. C, 4; President Gilman).

This institution, which forms the highest expression of the phenomenal
development of education in Baltimore since the Civil War (comp. below),
was founded in 1876 with a legacy of $31/2 million dollars (700,000£), be-
queathed by Johns Hopkins (d. 1873), a Baltimore merchant, and offers
special advantages for post-graduate work. It is now attended by 5-600
students, three-fifths of whom are graduates of other colleges and uni-
versities. Its success and influence, however, cannot be measured by
the number of its students; and its system of instruction, publications, etc.,
have been of the greatest importance in stimulating the higher learning
and original research. Its laboratories and other institutions are well
equipped, and its library contains 80,000 volumes.

The Johns Hopkins Hospital (Pl. F, 4; tramway via Centre St.),
opened in 1889, is also due to the liberality of Mr. Hopkins, who
bequeathed over $3,000,000 (600,000£) for its foundation.

Both as a scientific and charitable institution, this hospital is a worthy
pendant to the University; and in the completeness of its equipments and
excellence of its system, it ranks with the foremost hospitals in the world.

Among the numerous other Charitable Institutions of Baltimore, many
of which are of great interest, are the Bay View Asylum or City Alms
House, for paupers; the State Blind Asylum (Pl. D, 2); the Children's Aid
Society; the City Hospital (Pl. D, 4); the Church Home; St. Joseph's Hospital
and other noble charities of the R. C. church; and the Wilson Sanitarium,
5 M. from Baltimore, for affording change of air to sick children and
their mothers in summer.

The Wells & McComas Monument (Pl. E, 4), passed on the way to the
Johns Hopkins Hospital, is to the memory of two youths who killed the
British commander, Gen. Ross, at the battle of North Point (Sept. 12th,
1814), and were themselves killed immediately afterwards.

Persons interested in the higher education of women should not
omit to visit the Woman's College (Pl. D, 2), St. Paul St., and the
Bryn Mawr School (Pl. C, 3), Cathedral St., two admirable insti-
tutions, with the most complete and most modern educational
equipments. The tasteful Bryn Mawr building is by H. R. Marshall
(New York). — The First Presbyterian Church (Pl. C, 4), Park St.,
is a good specimen of Dec. Gothic, with a spire 250 ft. high.
Excursions. BALTIMORE. 41. Route. 273

Baltimore prides itself with justice on *Druid Hill Park (Pl. A, B, 1), a pleasure-ground of about 700 acres, which owes its beauty in great part to the fact that it had been preserved as a private park for 100 years before passing into the hands of the city. Its hills afford beautiful views. *Druid Lake, 1/2 M. long, is one of the reservoirs of the city waterworks (p. 269). The old *Mansion House contains a restaurant; and there is a small zoological collection near by. The *Main Entrance may be reached by tramway via Madison Ave. or Druid Hill Ave. Those who drive should choose the route through *Eutaw Place (Pl. A, B, 2, 3). — Greenmount Cemetery (Pl. D, E, 2, 3) contains the graves of Mme. Patterson Bonaparte (d. 1879; see p. 269), Junius Brutus Booth (d. 1852), the actor (father of Edwin Booth), Johns Hopkins (p. 272), etc. — The best view of the water-front is obtained from Federal Hill Park (Pl. D, 6), in S. Baltimore.

The Harbour, 3 M. long and 1/2-3/4 M. wide, consists of an outer bay accessible to the largest vessels and an inner basin for vessels of lighter draught. Its entrance is commanded by *Fort McHenry (Pl. G, 8), which offers little to repay the long and tedious journey to it (tramway) beyond its historical interest (see p. 269).

The elaborate system of tunnels by which the railways traverse Baltimore deserves the attention of the engineer. The Pennsylvania R. R. crosses the city from E. to W. by the Union Tunnel (2 3/4 M.) and the Baltimore & Potomac Tunnel (1 3/8 M.), with an open stretch of 3/4 M. (containing the Union Station) between them. The Baltimore & Ohio Tunnel runs from N. to S. (1 2/3 M.), and the trains passing through it are worked by electricity.

Excursions from Baltimore.

Chesapeake Bay is the largest inlet on the Atlantic coast, with a length of 200 M. and a breadth of 10-20 M. It receives the waters of the Susquehanna, Potomac, James, and other rivers, and is navigable for the largest vessels. The bay is a favourite resort of sportsmen, and its game (canvas-back ducks, etc.), fish, terrapins, and oysters have a wide reputation. The E. shore is not much frequented, but there are several summer-resorts on the W. shore, among which may be mentioned Bay Ridge (32 M.), with fair hotels and other accommodation. Tolchester Beach (25 M.) is on the E. shore. In summer steamers run regularly to different points in the bay (see daily papers), and the visitor is recommended to make a day-trip on one of these, the numerous inlets into which they penetrate with the masts imparting constant variety to the scenery. Annapolis (p. 274), Old Point Comfort (p. 372), Norfolk (p. 374), etc., may be reached by steamer on Chesapeake Bay.

Lake Roland (225 ft.), 8 M. to the N. (N. Cen. R. R.), one of the chief reservoirs of the Baltimore Waterworks, is frequently visited; and Gunpowder River, another source of the water-supply, is also attractive.

Among other favourite resorts of the Baltimoreans are those in the Blue Ridge Mts. (see below); and excursions may also easily be made to Gettysburg (p. 259), Harper's Ferry (p. 292), Washington (p. 275), the Shenandoah Valley (p. 379), etc.

From Baltimore to Cherry Run, 103 M., Western Maryland Railroad (Hillen St. or Union Station) in 4 1/2-6 hrs. This line leads to several favourite resorts in the Blue Ridge Mts. and to Gettysburg. — The train runs to the N.W. 8 M. Mt. Hope, with a large Retreat for the Insane; 12 M. Mt. Wilson, with the Sanitarium mentioned at p. 272; 20 M. Emory Grove, the junction of a branch-line to (51 M.) Gettysburg (see p. 259).
274 Route 41. ANNAPOLIS.

34 M. Westminster (700 ft.); 49 M. Brookeville (415 ft.), for (17 M.) Frederick (p. 291). 69 M. Blue Ridge (1375 ft.), where the line crosses the summit of the Blue Ridge Mts., is the station for Monterey Springs (hotel). 70 M. Buena Vista, connected by tramway with (2 M.) Buena Vista Spring Hotel. — 71 M. Pen-Mar (1200 ft.; Cascade Ho.; Imperial), named from its situation on the boundary between Pennsylvania and Maryland, is one of the most popular resorts in the Blue Ridge Mts. A fine view of the Cumberland and Shenandoah Valleys (pp. 256, 379) is obtained from (2 M.) *High Rock (2000 ft.), and *Mt. Quirauk (2500 ft.) is another good view-point. — 72 M. *Blue Mountain House ($3 1/2), a large and excellent hotel, is, perhaps, the best point for those who wish to stay a few days in the neighbourhood, being less invaded by the excursionist than Pen-Mar. — 75 M. Edgemont is the junction of the Cumberland Valley branch to Chambersburg (p. 260). 87 M. Hagerstown (p. 256); 93 M. Williamsport (p. 252). — 103 M. Cherry Run.

FROM BALTIMORE TO HARRISBURG, 86 M., Northern Central R. R. in 2 1/2-3 1/2 hrs. — 7 M. Hollins; 46 M. Hanover Junction; 57 M. York; 83 M. Bridgeport. — 85 M. Harrisburg, see p. 255.

FROM BALTIMORE TO ANNAPOLIS, Annapolis & Baltimore Short Line (26 M.) in 1 hr., or B. & O. R. R. (39 M.) in 1 1/2 hr. — The former skirts Chesapeake Bay (left), crossing several of its arms. The intermediate stations are unimportant.

26 M. Annapolis (The Maryland, S 2 1/2; board, even for one night, at Mrs. Kennedy's, 78 Prince George St., Mrs. Buchanan's, Maryland Ave., and Mrs. Handy's and Mrs. Iglehart's, Church Circle), the quaint and quiet little capital of Maryland, with 7604 inhab., is pleasantly situated at the influx of the Severn into Chesapeake Bay. It carries on a considerable trade in oysters. The traveller is advised to begin his visit with the View from the dome (200 ft. high) of the State House (apply to janitor), near the centre of the town. The Senate Room (to the right on entering) was the scene of Washington's surrender of his commission in 1783 and of the First Constitutional Convention in 1786. In front of the State House is a colossal Statue of Chief Justice Taney (1777-1864), by Rinehart. To the left is a Statue of Gen. De Kalb (1721-80). The Old City Hotel was once frequented by George Washington (adm. on application to janitor). Some of the old colonial houses and churches are interesting (comp. p. lxxxix), but the chief lion of Annapolis is the United States Naval Academy, founded in 1845 for the education of officers for the navy, as West Point (p. 169) was for army officers. The cadets, of whom there are about 250, are nominated in the same way as the West Point cadets and are under similar discipline. The course of instruction comprises four years at the Academy and two at sea. Among the chief points of interest for visitors are the Old Ships; old Fort Severn, now a gymnasium; the Boat House, with its rigging-loft ballroom; the Seamanship House, with its models; the Steam House, for instruction in everything connected with steamships; the Armoury; and the Cadet Quarters, with mess-rooms, etc. The drills, parades, and fencing take place after 4 p.m., when the 'recitations' (classes) end.

42. From Baltimore to Washington.

43 M. RAILWAY in 1 1/2 hr. ($3.20; parlor-car 25c.). This forms part of the Pennsylvania line from New York to Washington (228 M.; express in 5-6 1/2 hrs., $6.50; sleeper $2, parlor-car $1.25).

The trains start from the Calvert and Union Stations (see p. 268) and pass below the N.W. quarters of the city by a tunnel 1 1/3 M. long. The country traversed is flat and uninteresting. 19 M. Odenton is the junction of a line to (14 M.) Annapolis (see above) and (18 M.) Bay Ridge (p. 273). 40 1/2 M. Navy Yard (p. 287). In approaching
43. Washington.

Washington we thread a tunnel 300 yds. long. Fine view of the Capitol to the right.

43 M. Washington, see below.

b. Via Baltimore & Ohio Railroad ('Royal Blue Line').

40 M. Railway in 3/4-1 hr. (fares as above). Express from New York in 5 hrs. (fares as above).

_Baltimore_, see p. 268. At (9 M.) Relay Station the train crosses the fine Washington Viaduct, the oldest railway-bridge of stone in America, over the Patapsco River. From (18 M.) Annapolis Junction a line runs to (20 M.) Annapolis (see p. 274). 34 M. Hyattsville.

40 M. Washington, see below.

43. Washington.

Railway Stations. _Baltimore & Potomac (Pennsylvania) Railroad_ (Pl. E, 4; restaurant), cor. of Sixth and B Sts.; _Baltimore & Ohio_ (Pl. F, 3), cor. of New Jersey Ave. and C St. — _Hotel Omnibuses_ meet the chief trains (25 c.). Cab into the town, each pers. 25-35 c. (see below).

_Hotels._ _Arlington_ (Pl. a; D, 3), Vermont Ave., $5; _Shoreham_ (Pl. b; D, 3), 15th St., $4-5. _Normandie_ (Pl. d; D, 3), 9th St. $4-5, R. from $1; _McPherson Sq._, from $5, R. $1-3; _The Cochran_ (Pl. s; D, 3), 14th and K Sts., $5; _The Raleigh_ (Pl. r; D, 3), cor. Pennsylvania Ave. and 12th St., R. from $11/2 commercial; _The Cairo_ (Pl. p; C, 2), cor. of Sixteenth and Q Sts., $31/2-4; _Willard's_ (Pl. c; D, 3), cor. of Pennsylvania Ave. and 14th St., from $3, R. from $1; _Ebbitt Ho._ (Pl. j; D, 3), F St., near 14th St.; _Riggs Ho._ (Pl. g; D, 3), cor. G and 15th Sts., $3-5; _Metropolitan_ (Pl. i; E, 4), Pennsylvania Ave., 6th and 7th Sts., $21/2-4, these four old-established houses on the American plan, much frequented by politicians; _Colonial_ (formerly _Wormley's_ ; Pl. b, D 3), cor. H and 15th Sts.; _Wellington_ (formerly _Welcher's_; Pl. k, D 3), from $3, R. from $1; _Chamberlin_ (Pl. i; D, 3), R. from $1; _The Grafton_ (Pl. q; C, 2), Connecticut Ave., from $21/2; _Gordon_ 16th St., between H and I Sts.; _The Regent_ (Pl. m; D, 3), cor. Pennsylvania Ave. and 15th St.; _St. James_ (Pl. o; E, 4), R. from $1; _La Fétir's_ Temperance Hotel, cor. of G and 11th Sts., unpretending, $2. Also numerous small _Family Hotels_ and _Boarding Houses_ ($10-20 a week).

_Restaurants._ At the *Shoreham*, *Wellington*, *Chamberlin*, *Raleigh*, and other hotels on the European plan (see above); _Harvey_, 1016 Pennsylvania Ave. (steamed oysters, etc.); _Losekam_, 1325 F St.; _Hancock_, 1234 Pennsylvania Ave., a quaint little place (men only), with a collection of relics; _Capitol Restaurants_, see p. 279; _Fussell_, 1425 New York Ave. (ice-cream, etc.); _La Fétir's Luncheon Rooms_, see above (frequented by ladies); restaurant of the Pennsylvania Station (see above).

_Tramways_ (mostly on the 'underground trolley' system) and _Omnibuses_ ('Herdies') traverse many of the principal streets.

_Cabs_ (Hacks and Hansoms). For 15 squares each pers. 25 c., each addit. 5 squares 10 c., at night (12.30-5 a.m.) 40 and 15 c.; per hr., 1-2 pers., 75 c., each addit. 1/4 hr. 20 c., 3-4 pers. $1 and 25 c., at night $1, 26 c., $41/2, 35 c. Two-horse Hacks, 1-4 pers., per hr. $11/2, each addit. 1/4 hr. 25 c. To _Arlington_ $5, _Soldiers' Home_ $5, _Great Falls of the Potomac_ $20.

_Seamer_ ply daily from 7th St. Wharf (Pl. E, 5) to _Norfolk_ (p. 371), _Old Point Comfort_ (p. 372), _Mount Vernon_ (see p. 289), and other river-landings; also, at irregular intervals (see daily papers), to _Baltimore_ (p. 268), _Philadelphia_ (p. 250), _New York_ (p. 6), _Boston_ (p. 81), etc. _Steam Ferry_ hourly from 7th St. Wharf to _Alexandria_ (p. 289; fare 15 c.).

Art Collections. Corcoran Gallery, see p. 285; Waggonman's Private Gallery, see p. 288 (on Thurs., Jan. to April, 11-4; see 50c., devoted to charity; tickets at 1113 Pennsylvania Ave.).

Clubs. Metropolitan (Pl. C, 3); Army & Navy; Cosmos (scientific; Pl. D, 3); University; Columbia Athletic, with fine gymnasium, etc.; Gridiron Club; National Press Club.

General Post Office (Pl. D, 3), Pennsylvania Ave., between 11th and 12th Sts.

Note. Visitors will find all the official addresses and much miscellaneous information of a useful nature in the Congressional Directory (35 c.).

The City of Washington, the capital of the United States, lies on the left bank of the Potomac, at the confluence of the main stream with the E. branch, 156 M. from Chesapeake Bay and 185 M. from the Atlantic Ocean. It covers an area of about 10 sq. M., and in 1890 had 188,932 inhab. (with Georgetown, 202,978; now estimated at 280,000). The city is in many respects one of the most beautiful in the United States, being finely laid out, with wide asphalted streets, opening up vistas of handsome public buildings, monuments, or leafy squares, with the Capitol and the Washington Monument dominating the entire view. Its plan may be described as that of a wheel laid on a gridiron, the rectangular arrangement of the streets having superimposed upon it a system of radiating avenues, lined with trees and named for the different states of the Union. The streets running N. and S. are numbered, those running E. and W. are named by the letters of the alphabet. The Circles formed by the intersection of the streets and avenues are one of the most charming features of the city. Pennsylvania Avenue, between the Capitol and the White House (a distance of 1 1/3 M.), is the chief thoroughfare, and other important business-streets are 7th St., 14th St., 9th St., and F St. Among the finest residence-streets are Massachusetts Ave., Vermont Ave., Connecticut Ave., and 16th St.

The present site of the national capital of the United States was selected in 1790, mainly through the agency of George Washington; and the Federal District of Columbia, 100 sq. M. in area, was set apart for this purpose, on territory ceded by Maryland and Virginia. The Virginia portion of the district was, however, retroceded in 1846, and the present area of the District of Columbia is 65 sq. M. Its population in 1890 was 230,392 (78,927 coloured). The district is ruled directly by the President and Congress, through a board of Commissioners appointed under an act of 1874; and its inhabitants belong to no state and have no voice either in national or local government. The plan of the city of Washington was due to Major T'Enfant, a French officer of engineers; and the intention was to make the Capitol (see p. 277) its centre, with streets and avenues radiating from it in all directions. It was at first proposed to call it Federal City, but this name was changed to Washington in 1791.

The foundation-stone of the Capitol was laid in 1793; the seat of government was removed to Washington in 1800; and in 1802 the city received its charter. In 1844 the city was taken by the British, who burned the Capitol. In 1810 the population was 8208; in 1840 it was 23,364; and in 1880 it was 147,307. In 1871 the city was still in a very
backward condition; but the substitution in that year of a territorial for a municipal government inaugurated a series of reforms, which completely revolutionized the appearance of the city and left it one of the most comfortable and beautiful in the world. The commerce and manufactures of Washington are unimportant, and its prosperity depends on its position as the seat of Congress and the Government Offices. There are probably 40,000 army and navy officers and civil servants in Washington, and these with their families make a large proportion of the population. The sobriquet of 'City of Magnificent Distances', applied to Washington when its framework seemed unnecessarily large for its growth, is still deserved, perhaps, for the width of its streets and the spaciousness of its parks and squares.

The best time to visit Washington is during the sitting of Congress, which lasts from the first Mon. in Dec. to March 4th in the odd-numbered years, and till June, July, or later in the even-numbered years. The city itself is seen to greatest advantage in May or October. In summer (July-Sept.) it is very hot and is deserted by many of its inhabitants. The Public Offices are all open to the public, free, between 9 or 10 and 2; and the attendants will show on application any rooms not actually occupied.

The **Capitol (Pl. F, 4), finely situated on a hill 90 ft. above the level of the Potomac, dominates the entire city with its soaring dome and ranks among the most beautiful buildings in the world. It is 751 ft. in length and 121-324 ft. wide, and consists of a main edifice of sandstone, painted white, and of two wings of white marble. It covers an area of 3 1/2 acres. The main building, with its original low-crowned dome, was completed in 1827; the wings and the new iron Dome, 288 ft. high, were added in 1851-65. Numerous architects have been employed on the building, of whom it may be enough to mention Mr. T. U. Walter, designer of the extensions and the dome. The general style is classic, with Corinthian details. The principal façade looks towards the E., as the city was expected to spread in that direction, and the Capitol thus turns its back upon the main part of the city and on the other government buildings. A fine marble *Terrace (view), 884 ft. long, approached by two broad flights of steps, has, however, been constructed on the W. side of the Capitol and adds great dignity to this view of the building. The dome, which is 270 ft. high, is surmounted by a figure of Freedom, by Crawford, 19 1/2 ft. high (comp. p. 282). The total cost of the building up to the present time has been $16,000,000 (3,200,000£).

The Capitol stands in a park of about 50 acres in extent, laid out by Olmsted. In the plaza on the E. side, opposite the central portico, is a colossal Statue of George Washington, by Greenough.

The Front or East Façade is preceded by three porticos, the main entrance being in the centre. To the right of the central portico is the Settlement of America, a marble group by Greenough; to the left is the Discovery of America, a figure of Columbus by Persico. In the pediment above the portico is a relief of the Genius of America, by Persico; and in the pediment above the N. portico is a group representing the Civilization of the United States, by Crawford. The inauguration of the Presidents of the United States takes place on the broad steps in front of the main doorway.

*Interior (open, 9-4; guide, unnecessary, 50c. per hr.). The beautiful *Bronze Doors are adorned with reliefs by Randolph Rogers, representing
events in the life of Columbus (cast at Munich, 1851). To the right and left are statues of Peace and War, by Persico. — We first enter the —

Rotunda, below the Dome, 96 ft. in diameter and 180 ft. high. The walls are adorned with eight historical paintings (named from right to left): 1 (to the right) Landing of Columbus in 1492, by Vanderlyn; 2. Embarkation of the Pilgrims at Delfshaven in 1620, by Weir; 3. Washington resigning his commission at Annapolis in 1783, by Trumbull; 4. Surrender of Cornwallis in 1781, by Trumbull; 5. Surrender of Burgoyne at Saratoga in 1777, by Trumbull; 6. Signing the Declaration of Independence (1776), by Trumbull; 7. Baptism of Pocahontas (1613), by Chapman; 8. Discovery of the Mississippi by De Soto in 1541, by Powell. Above these paintings is a band of frescoes, in imitation of relief, by Brumidi and Costagini, representing scenes from American history from the Landing of Columbus to the Celebration of the Centennial of Independence at Philadelphia. The ceiling painting, also by Brumidi, depicts the Apotheosis of Washington, with figures of Liberty, Victory, the 13 Original States, and other allegorical groups. The reliefs above the doors represent the Landing of the Pilgrims, Penn's Treaty with the Indians, Pocahontas and Capt. Smith, and Daniel Boone and the Indians. — A staircase at the N.W. corner of the Rotunda ascends to the Whispering Gallery, in the interior of the dome, and to the lantern on the top of the dome (288 ft.), which commands a splendid view of Washington. Pennsylvania Avenue (r.) and Maryland Avenue (l.) diverge like the spokes of a fan, and between them is the Mall, a broad enclosure containing the Smithsonian and other public institutions, with the tall Washington Monument towering above all. The Pension Office is conspicuous to the N.W. The White House is almost concealed by the Treasury (at the end of Pennsylvania Ave.). — The door on the W. side of the Rotunda leads to the rooms formerly occupied by the Congressional Library (p. 279).

The door on the S. side of the Rotunda leads to the Old Hall of Representatives, now the National Hall of Statuary, a semicircular apartment, containing statues of eminent Americans, each State being allowed to send ‘effigies of two of her chosen sons’. Among the other sculptures are statues of Washington (cast of Houdon’s statue, p. 367), Lincoln (by Miss Ream, now Mrs. Hoxie), Jefferson (by David d’Angers), and Hamilton (by Stone). There are also a few portraits. The allegorical Clock is by Fransoni. A brass plate in the S.W. corner of the floor marks the spot where John Quincy Adams fell on Feb. 21st, 1833, two days before his death. This room has some curious ‘whispering gallery’ properties, which, however, require the aid of an habitué to discover.

Leaving the Statuary Hall by the corridor on its S. side, we next enter the wing devoted to the House of Representatives.

The Hall of Representatives (open to visitors before noon, when the House meets; galleries open at all times), occupying the centre of this wing, is a plain and business-like apartment, 139 ft. long, 93 ft. wide, and 36 ft. high. It contains desks for 352 members and 4 delegates. To the right of the Speaker is the pedestal on which the mace is placed when the House is called to order. To the right and left are portraits of Washington (by Vanderlyn) and Lafayette (by Ary Scheffer). The walls are adorned by two pictures by Bierstadt (Landing of Hudson and Discovery of California) and a fresco by Brumidi (Washington demanding the surrender of Cornwallis at Yorktown). Like the House of Commons, the hall is lighted through glass-panels in the ceiling. The Galleries round the Hall can seat 2500 people; different sections are reserved for ladies (with their escorts), gentlemen, the press, the diplomatic corps, and the families of members and officials. The general proceedings of the House are roughly similar to those of the House of Commons, but the noise and confusion are greater and it is a rare thing for a speaker to receive the attention of the whole House. The Republicans affect one side of the hall, and the Democrats the other. The Speaker has no distinguishing dress, and members do not wear their hats in the House. A novel feature to the European visitor is the presence in the House of a number of page-boys, who are summoned by the clapping of hands.
The Hall is surrounded with corridors, affording access to Committee Rooms (many of them with frescoes) and the Rooms of Officials. On the E. and W. are Staircases ascending to the Galleries. On the wall of the E. staircase is a large painting, by Carpenter, of the Signing of the Proclamation of Emancipation, with portraits of Lincoln and his Cabinet (Sept. 22nd, 1863); and at its foot is a Statue of Jefferson, by Powers. On the W. staircase is Leutz's large painting of Westward Ho., with a view of the Golden Gate, by Bierstadt, below. The upper floor also contains various Committee Rooms. — The basement-floor, below the House of Representatives, contains a good Restaurant.

The door on the N. side of the Rotunda (p. 278) leads into the N. wing of the original Capitol (see p. 277), on the right (E.) side of which is the Supreme Court Room, formerly the Senate Chamber (open to visitors; injured by fire in 1898). The U. S. Supreme Court consists of a Chief Justice (Hon. M. W. Fuller) and eight Associate Justices. Sessions from Oct. to May (12-4). The judges wear robes but no wigs, the counsel neither gowns nor wigs. — In the Robing Room are portraits of former Chief Justices.

We now pass through a corridor leading to the Senate Wing. The Senate Chamber is smaller (115 ft. long; 30 ft. wide, and 36 ft. high) and more ornate than the House of Representatives. The general arrangements of the seats, galleries, etc., are like those of the House, and the Senate also meets at noon. The Vice-President of the United States is the official President of the Senate; and niches in the walls contain busts of all the Vice-Presidents. The Senators are 90 in number. — To the N. of the Senate are the President's Room, richly adorned with frescoes and gilding; the Marble Reception Hall; and the Vice-President's Room, with a fine portrait of Washington, by Rembrandt Peale. When the Senate is in session, visitors to these rooms require the permission of a Senator; at other times they may enter them, if open, and apply to the messengers if closed. Several of the Senate Committee Rooms are also handsomely decorated. — At the foot of the E. Staircase, ascending to the Galleries, is a statue of Franklin by Powers; on the wall is Perry's Victory on Lake Erie (1813), a large painting by Powell. At the foot of the W. Staircase is a statue of John Hancock, by Stone; on the wall is the Storming of Chapultepec, Mexico (1847), by Walker. At the head of this staircase is a portrait of Washington by C. W. Peale. The rooms and corridors of the Upper Floor contain various portraits and paintings. In the basement is a Restaurant.

The Bronze Doors of the Senate Wing, opening on the N.E. portico, represent various scenes of American history, in relief, by Crawford.

The Basement of the Capitol contains Committee Rooms, Storage Rooms, Restaurants (see above), etc. The walls and ceilings of the corridors are frescoed, and some of the Committee Rooms are also handsomely decorated (admission on application to the messengers). The Ventilating and Heating Apparatus is also interesting. In the centre, below the Dome, is the Crypt, with 40 Doric columns. In a small vestibule, reached from the outside by the door under the colonnade to the right of the main steps, are Six Columns, in the form of stalks of Indian corn, said to have been suggested by Jefferson (comp. p. xc).

We may leave the building by the W. terrace and steps (see p. 277).

To the S.E. of the Capitol stands the New Congressional Library (Pl. F, 4), an enormous structure in the Italian Renaissance style, 470 ft. long and 340 ft. wide, erected in 1888-97 at a cost of $6,180,000. The building was accomplished by Gen. T. L. Casey, Chief of Engineers U. S. A., with the aid of Bernard R. Green, E. P. Casey, J. L. Smithmeyer, and P. J. Peltz. It is in the form of a quadrangle, enclosing four courts and a central rotunda surmounted by a flat gilded dome and lantern. The main entrance, on the W. side, is preceded by a broad flight of steps and a granite terrace, against the retaining wall of which is an effective
fountain by R. Hinton Perry. At each corner and in the middle of
the W. and E. façades are projecting pavilions. The sculptural
adornment of the ornate W. façade includes a series of ethnological
heads (over the windows), busts of Demosthenes, Emerson, Irving,
Goethe, Franklin, Macaulay, Hawthorne, Scott, and Dante (portico),
and groups representing Literature, Art, and Science (spandrels of
the entrance-porch). The three bronze doors represent Printing
(cenre), Tradition (left), and Writing (right), the first by Fred.
Macmonnies, the others by Olin T. Warner. — The library can
accommodate 4 or 5 million vols., and at present contains 800,000,
besides 250,000 pamphlets. Its use is free to all adults, but none
but members of Congress and a few privileged officials have the
right to take books out of the building. The building is open to
visitors from 9 a.m. to 4, 5, or 6 p.m. Descriptive handbooks at the
entrance (10 and 25 c.). Restaurant in the attic of the pavilion.

The Interior of the Congressional Library is sumptuously adorned
with painting, sculpture, coloured marbles, and gilding. These decorations,
while very unequal in merit and at times somewhat confused and
over-garish, produce on the whole a very imposing effect. No fewer than
fifty American artists are represented in the work. Only a few of the
numerous paintings can be mentioned below; for details the reader is
referred to the works themselves and to the special handbooks mentioned
above. The W. portico opens on the Main Entrance Hall, constructed
of white Italian marble. To the right and left are massive marble stair-
cases, richly adorned with sculpture. The ceiling of the Hall, 72 ft. above
the marble flooring, is resplendent in blue and yellow. The arcade or
vestibule on the W. side of the hall has stucco figures of Minerva and a
coffered ceiling in white and gold. The arcade to the S. is adorned with
Paintings by Henry O. Walser, representing Lyric Poetry. In the N. arcade
are paintings by C. S. Pearce. The E. arcade, opening from the Hall by
a Commemorative Arch, contains the Evolution of the Book, painted by
J. W. Alexander. The lobby beyond, leading to the Reading Room (see
below; this entrance for readers only), has five paintings by Elihu Vedder,
symbolizing different forms of Government. — The S.W. Curtain Corri-
dor (on the side next the court), leading to the S. from the Entrance
Hall, has Greek Heroes by Walter McEwon. It opens on the gorgeous
House of Representatives Reading Room. In the S.W. Pavilion is the
more dignified Senate Reading Room. The N.W. Curtain Corridor has
paintings of the Muses by Edw. Simmons. The N.W. Pavilion is decorated
by Dodge and Thompson.

We now ascend to the first floor. The Corridors above the arcades of
the Entrance Hall are adorned with symbolical frescoes of the Virtues (in a
Pompeian style) by Maynard (N. and S.), the Senses and figures of Wisdom,
Understanding, Knowledge, and Philosophy by Robert Reid (N.), Literature
by Barre (E.), the Graces and the Seasons by F. W. Benson (S.), and the
Sciences by Shirlaw (W.). The other decorations are also elaborate. — The
frescoes in the S.W. Gallery, by Kenyon Cox, illustrate the Sciences and
Arts, those in the S.W. Pavilion, by Maynard, illustrate the Discovery
and Settlement of America; the panels of Peace and War in the N.W.
Pavilion are by Melchers; the paintings of Art, Literature, Music, Science,
and Ambition (ceiling) in the N.W. Gallery are by W. L. Dodge; the Ele-
ments in the S.E. Pavilion are by R. L. Dodge and E. E. Gurnsey; the Seals
of the U. S. in the N.E. Pavilion are by Gurnsey and Van Ingen. —
Several of these rooms will be used for special collections of books, or
for the exhibition of objects of historical, artistic, or literary interest.

From the E. corridor (see above) a short staircase, the landing of which
is adorned with a fine mosaic of Minerva by Elihu Vedder, ascends to
the visitors' gallery of the Reading Room Rotunda, perhaps the finest
PRINCIPAL STORY OF THE CAPITOL
and most thoroughly satisfactory part of the whole building. The chamber, which is 100 ft. in diameter and 125 ft. in height, accommodates about 800 readers (British Museum Reading Room 360; Bates Hall at Boston 250-300). It is richly adorned with dark marble from Tennessee, red marble from Numidia, and yellow marble from Siena. The eight massive piers are surmounted by symbolical female figures of Religion (Baur), History (French), Art (A. St. Gaudens), etc.; and along the parapet of the gallery are sixteen bronze statues of persons eminent in the fields denoted by the symbolic figures. Among these are Homer, by L. St. Gaudens, Shakspeare, by Macmonnies, Herodotus, by French, etc. The dome is covered with elaborate coffered ornamentation in stucco, and round its "collar" are frescoes by E. H. Blashfield, representing the Progress of Civilization (best seen from the floor of the reading-room). Among the allegorical figures in this frieze may be detected portraits of Ellen Terry (England), Mary Anderson (Middle Ages), and Abraham Lincoln (America). The inside of the lantern is embellished with an allegorical group of 'Human Understanding'; also by E. H. Blashfield (not visible from the gallery). The stained-glass windows exhibit combinations of the arms of the Union and the various States. The clock was designed by John Flanagan. Winding iron staircases in the piers ascend to the lantern and to an outside gallery encircling the rotunda and commanding a beautiful view. — The reading-room is admirably lighted, and the arrangements for bringing the books from the 'stacks' to the readers and the other practical equipments are of the latest and best description. It is connected with the Capitol by a tunnel ¼ M. long, 6 ft. high, and 4 ft. wide, by means of which a Member of Congress can procure a book in 3 minutes.

At the foot of the flights of steps descending from the terrace on the W. side of the Capitol is a colossal Statue of Chief Justice Marshall (1755-1835), by Story. The broad walk to the N. (r.) leads to the Naval or Peace Monument, by Simmons. The walk to the S. (l.) leads to the Statue of President Garfield (1831-81), by J. Q. A. Ward.

The first part of the Reservation is occupied by the Botanic Gardens (Pl. E, F, 4; 9-6), with palm-houses, conservatories, and the handsome Bartholdi Fountain.

We may now walk through the two small parks to the W. of this point, cross the railway, and visit the building of the United States Fish Commission (Pl. E, 4; entr. in 6th St.; 9-4), where the processes of fish-breeding may be inspected (aquarium). — A little farther to the W., beyond 7th St., stands the *Army Medical Museum (Pl. E, 4; 9-4), containing a pathological collection, a collection of army medical supplies, and a library of 200,000 volumes. — Adjacent are monuments to Daguerre and to Samuel D. Gross (1805-84); the latter, by Calder, was erected by American physicians in 1897.

Immediately to the W. of the Medical Museum is the *National Museum (Pl. E, 4), a large brick building 327 ft. square, containing valuable and excellently arranged collections of natural history, anthropology, biology, and geology, derived mainly from the scientific operations of the U. S. Government. It is under the direction of the Smithsonian Institute (p. 283). Over the entrance is a group representing Columbia as protectress of Science and Industry. Admission free, 9-4.30 (closed on Sun.).

Department of Anthropology. The North Hall of Hall of American History (Pl. 1), which we first enter, is mainly devoted to a chronologically arranged series of collections illustrating American history from the period
of discovery to the present day. The wall-cases are at present occupied by musical instruments. Over the entrance is a large panel of Limoges târence, representing man's triumphs over the material universe. — The Rotunda (Pl. II) is encircled with seats for the benefit of the public and is embellished with a fountain, above which rises the original model of the statue of Freedom on the Dome of the Capitol (p. 277). — In the West North Range (Pl. XI) is the "Collection of Paintings by George Catlin," illustrating the manners and customs of the North American Indians. Mr. Catlin spent 8 years (1832-40) among the Indians, visiting 48 different tribes and painting all of the 600 paintings from nature. The floor-cases illustrate the arts and customs of the Indian tribes between the Atlantic coast and the Rocky Mts. — To the S lies the North West Range (Pl. XII), with interesting exhibits pertaining to the tribes of the N.W. coast of N. America (totem-poles, etc.) and of the Esquimaux on the Arctic shores. — To the left is the North West Court (Pl. XVII), the exhibits of which illustrate the life of the Pueblo Indians of the S.W. (comp. p. 289). The gallery above, entered from the Rotunda, contains collections of tribes in the S.W. part of N. America and Mexico. — The West Hall (Pl. XIII), entered from the N.W. Range, contains European, African, and Asiatic collections, the Japanese and Corean exhibits being especially attractive. Here also is part of the Glover Collection of Chinese coins.

The N. Gallery has Polynesian collections, and the S. Gallery has a collection of religious ceremonial objects. — We now cross the Rotunda to the East Hall (Pl. VII), which contains collections illustrating human progress in transportation, electricity, domestic arts, etc. In the S.E. corner is a small Restaurant. — The North East Range (Pl. VIII) is occupied by a very extensive series. Illustrating naval architecture. — The North East Court (Pl. X), entered from the East Hall, is occupied by the graphic art exhibit. The gallery contains collections of ceramics, etc. — The East North Range (Pl. IX) is to be used as a lecture-hall. The walls are occupied by four large Flemish tapestries.

[The extensive collection of American antiquities is exhibited in the Smithsonian building, first floor (see p. 283).]

Department of Biology. This Department covers the field of zoology and botany. The collections exhibited are chiefly American, but the museum is very rich in material from all parts of the world. — To the S. of the East Hall is the South East Range (Pl. IV), with casts of American fishes, reptiles, and batrachians. — The East South Range (Pl. V) contains an extensive osteological collection arranged systematically. Skeletons of various kinds of whales are suspended from the ceiling. Special series illustrating such subjects as the homologies of the skull and limbs, the structure and modifications of teeth, skin, etc., are also exhibited, and an extensive series of embryological models. The collections include specimens of great rarity, such as skeletons of the extinct Arctic Sea Cow from the Commander Islands, Bering Sea, the Great Auk from Coast of Labrador, and the Gigantic Land Tortoise of Abingdon Island, in the Galapagos Archipelago. — The South Hall (Pl. III) is devoted to mammals. The groundfloor is occupied by an extensive series of American mammals, including well-mounted specimens of the bison, moose, caribou, and prong-horn antelope, with accessories representing their natural surroundings. A series of papier-maché casts of porpoises, is one of the special features of the collection. Suspended from the ceiling is a cast of one side of a Humpback whale, 32 feet long, with the skeleton inserted in it. — The South Gallery (entrance from the Rotunda) contains a representation of the mammal-fauna of the Old World. The African antelopes are especially interesting.

[The remainder of the exhibits of the Department of Biology, including birds, and all the invertebrates, are in the Smithsonian building (p. 283).]

Department of Geology. The South West Range (Pl. XIV), entered from the W. Hall, is occupied by the exhibits of the Division of Mineralogy. The principal series are collections of minerals (some 8000 specimens), cut stones (3500 specimens), and meteorites (300 specimens). — In the Division of Systematic and Applied Geology in the West South Range (Pl. XV),
are exhibited (a) collections of rock-forming minerals and rocks, (b) an especially fine series of cave and volcanic products and an American stratigraphic series of rocks and fossils. — The South West Court (Pl. XVI) contains only economic materials, comprising (a) on the groundfloor an extensive series (3000 specimens) of building and ornamental stones and (b) a series illustrating the mineral resources of the United States. In the gallery is a systematic series of economic products, comprising ores of gold, silver, copper, coals, petroleums, etc. — The South East Court (Pl. VI) contains the exhibits of the Division of Vertebrate Paleontology, including a considerable series of vertebrate remains, mainly American, and especially rich in the striking Triceratops forms from the Cretaceous formations of Wyoming; rare specimens of Brontotherium, Elothierium, Miohippus, and other genera from the Miocene, and Rhinoceras and other mammals from the Pliocene formations. In the gallery (entrance from the Rotunda) is a systematic series of invertebrate fossils, probably the richest in the world in Cambrian forms. The collection of fossil insects is also large, the palaeozoic portion being equalled only by that from the coal fields of Commentry, France. In the galleries of the East South and West South Ranges are the fossil plants, including the extensive 'Lacoe Collection' (100,000 specimens from the coal-measures of Pennsylvania).

Just to the W. of the National Museum stands the *Smithsonian Institution (Pl. D, 4), a handsome red-stone building in the late-Norman style, erected in 1847-56 at a cost of $450,000 (90,000 l.). The loftiest of the nine towers is 150 ft. high. In front of it is a Statue of Prof. Joseph Henry (1799-1878), the first secretary of the Institution, by Story. The Institution is open free, 9-4. Secretary, Dr. S. P. Langley.

The Smithsonian Institution was founded with the proceeds of a legacy of $330,000 bequeathed by an Englishman, Mr. James Smithson (1754-1829), a natural son of the Duke of Nottingham, 'for the increase and diffusion of knowledge among men'. So far as is known Mr. Smithson, who was distinguished as a chemist, never visited America, and had no personal relations with that country; and his choice of Washington for the establishment of his institution is supposed to be due to his sympathy with the democratic principles represented by the Western Republic. The policy of the Institution is to encourage research, and it has been the chief promoter of the scientific investigation of the climate, products, and antiquities of the United States. It possesses a library of 150,000 vols. (deposited in the Library of Congress) and issues three series of publications ('Contributions to Knowledge', 'Miscellaneous Collections', and 'Annual Reports') of great scientific value. The Museum issues Reports, Proceedings, and Bulletins.

The Ground Floor is devoted to part of the exhibits of the Biological Department of the National Museum (p. 282). The Main Hall contains a systematic Collection of Birds (9000 specimens) and also the Collection of Mollusks. A small room to the S., opposite the entrance, contains birds arranged for the study of children. — In the adjoining Corridor Hall is the Collection of North American Insects, with exhibits illustrating protective mimicry and kindred phenomena. — The West Hall contains the Marine Invertebrates, including the Corals collected by the U. S. Exploring Expedition in 1838-42 and the crinoids dredged by the U. S. Fish Commission steamer Albatross.

The First Floor is devoted to the *Archaeological Collections of the Department of Anthropology (p. 282), which, as regards American antiquities, are the finest and most extensive in the world. Three distinct American civilizations are represented: — 1. *Mexican and Central American Collections, including numerous casts of stone monuments. — 2. *Cliff Dwellers and Pueblo Indians, with models of cliff-dwellings and pueblos. — 3. North American Indians, such as are found throughout the whole of the United States. The objects here are prehistoric. — The E. end of the
room is occupied by the Wilson Collection of Antiquities (chiefly European).

— To the W. are a fine collection of Copper Implements of the United States and the Moorhead Collection of Objects found in Mounds (Ohio).

The South Hall on this floor (no adm.) contains relics of Smithson.

The next part of the Mall, beyond 12th St., contains the building of the Department of Agriculture (Pl. D, 4; 9-4), which may be visited by those interested in scientific agriculture and horticulture. It includes a library, museum, herbarium, and conservatories of economic plants (all open to visitors); and the grounds in front of it are devoted to an arboretum arranged by families. The museum is in the wooden building behind the main brick building. To the E. of the main building is the Sequoia Tree Tower, formed of a section of a huge Sequoia (p. 450), which was 26 ft. in diameter at the base and 300 ft. high.

In B St., near the S.W. corner of the Agricultural Grounds, is the Bureau of Engraving and Printing (Pl. D, 4), where the highly interesting processes of the manufacture of paper money and bonds are shown to visitors (9-2.30).

We have now reached the open grounds in which the Washington Obelisk (Pl. D, 4), a unique monument of dignity and simplicity, rears its lofty form to the skies.

The Washington Obelisk, a worthy memorial of a great man, was begun in 1848, abandoned in 1855, resumed in 1877, and finished in 1884, at a total cost of $1,300,000 (260,000 ft.). It is constructed of white Maryland marble and is 555 ft. high, a height greater than any other structure of masonry in the world (Philadelphia City Hall, 537 ft.; spires of Cologne Cathedral 511 ft.). The walls are 15 ft. thick at the base and 11/2 ft. at the top. The pyramidal roof is 55 ft. high and is capped with a piece of aluminium. The monument is open from 9 to 5.30, and may be ascended either by the 90 steps (fatiguing; 20-25 min.) or by the elevator (9 min.; free), which runs every 1/2 hr. (last ascent at 4.30). Stone tablets presented by different States and corporations are inserted in the walls. The top commands a magnificent View of the city of Washington and its surroundings. Arlington (p. 239) is seen to the E. across the Potomac. Among the points at a little distance are the new Observatory (p. 287; N.W.), the Soldiers' Home and Howard University (p. 288; N.), the R. C. University (p. 289; N.E.), and Alexandria (p. 299; S.). On a clear day the Blue Ridge Mts. are seen to the N.W., the prominent Sugar-loaf being about 50 M. distant.

To the S. of the Washington Monument are the Propagating Gardens and (farther off) the Long Bridge (Pl. C, 5), over which the N. troops marched into Virginia during the Civil War. To the W. are the U. S. Fish Ponds (Pl. C, D, 4).

We may now ascend 15th St., skirting the President's Grounds (band in summer) on the left and passing the Panorama, the Light Infantry Armory, and the Grand Opera House on the right. — To the left, opposite F St., stands the Treasury Building (Pl. D, 3; 9-2), an immense edifice, 510 ft. long and 280 ft. wide, with an Ionic colonnade on the E. front and porticos on the other three sides.

Among the chief objects of interest shown to visitors are the U. S. Cash Room, in the N. corridor; the Redemption Division, in the basement; the Silver Vaults, containing bullion and coin to the value of hundreds of millions of dollars; the Portraits of Secretaries of the Treasury in the Secre-
tary's Department (first floor); and the Secret Service Division, W. side of 2nd floor, with its collection of forged money and portraits of forgers.

In Pennsylvania Ave., to the N. of the Treasury, stands the Department of Justice; and a little farther to the N., at the corner of 15th and H Sts., is the Columbian University (Pl. D, 3; 1000 students). — Following Pennsylvania Ave. towards the W., we reach (to the right) Lafayette Square (Pl. C, D, 3), with a bronze Statue of Gen. Andrew Jackson (1767-1845), by Clark Mills, and the Lafayette Monument, by Falguière and Mercié. On the E. side of the square is the Lafayette Square Theatre (Pl. D, 3), occupying the site of the house in which an attempt was made to assassinate Secretary Seward in 1865.

Opposite Lafayette Sq. is the entrance to the Executive Mansion of the President of the United States (Pl. D, 3), popularly known as the White House.

The Executive Mansion is a two-storied stone building, painted white, 170 ft. long and 86 ft. deep, with an Ionic portico. To the W. is a range of conservatories. It was founded in 1792, occupied by President Adams in 1800, burned by the British in 1814, and rebuilt in 1818. The large East Room (80 ft. × 40 ft. × 22 ft.) is open to the public from 10 to 2. Two or three times a week the President receives all-comers here at 3 p.m., shaking hands with each as they pass him in single file. The Reception Rooms, which contain portraits of Presidents and their wives, are shown by special order only. The Executive Office and Cabinet Room are in the E. part of the upper floor. The W. part of the groundfloor and the upper floor are private. — The Grounds surrounding the house are 75 acres in extent. The Marine Band (p. 287) gives public concerts in the grounds to the S. of the house, on Sat. afternoons in summer, and children have the privilege of rolling their coloured eggs here at Easter.

To the W. of the White House is the building that accommodates the State, War, and Navy Departments (Pl. C, 3; 9-2), a huge parallelogram, enclosing two courts and measuring 567 ft. in length by 342 ft. in breadth.

The N. and W. wings are occupied by the War Department, where the Secretary's Apartments and the adjoining corridors contain a collection of Portraits of Secretaries of War and Generals, including one of Washington by D. Huntington. The Library, on the 4th floor, contains a fine collection of books on military science and the late Civil War.

The Navy Department is in the E. part of the building and contains models of war-ships, portraits, etc. The Library, on the 3rd floor, is a fine room with 25,000 volumes.

The Department of State (corresponding to the Foreign Office in London) occupies the S. part of the building. Among the rooms usually shown to visitors are the Diplomatic Reception Rooms, containing portraits of the Secretaries of State from 1789 to the present day, and the Library (2nd floor), with Jefferson's original draft of the Declaration of Independence and other relics.

To the S. of the State Building is the old Van Ness House, a large yellow building among trees. — To the S.W. is a grey painted house which was General Grant's headquarters during the Civil War.

In 17th St., to the S.W. of the State Building, between New York Ave. and E St., is the Corcoran Gallery of Art (Pl. C, 3), built and endowed by the late Mr. W. W. Corcoran and open daily, from 9.30 (Mon. from 12) till 4 and on Sun. from 1.30 to 4.30 (holidays 10-2; adm. on Mon., Wed., & Frid. 25 c.; other days free;
closed on Christmas and July 4th). The present building, erected in 1894-97, is a handsome white marble structure in a Neo-Grecian style, by Ernest Flagg. The semicircular part at the N. end is occupied by a School of Art. The steps to the main entrance are flanked by colossal bronze lions, modelled on those by Canova at the tomb of Pope Clement XIII. The collections, of somewhat unequal merit, include paintings, sculptures, and ceramics. Catalogue 25 c.

Ground Floor. The Atrium contains casts. — The rooms are neither numbered nor lettered, but the following description begins on the E. side, to the left of the staircase, and takes them in consecutive order. Room I. Bronzes by Barye. — Room II. Original sculptures, including busts by Hiram Powers and Rauch (Alex. von Humboldt). — Room III. Sculptures. "240. Powers, Greek slave; 206. Canova, colossal head of Napoleon; 205, Rinehart, Endymion. — Room IV. Large English and Japanese vases. Electrotype reproductions. — Rooms V-VII. Casts. — The other rooms on this floor are occupied by the library, offices, etc.

We may now return to the Treasury (p. 284) and follow F St. towards the E. To the right, between 8th and 7th Sts., is the Old Post Office (Pl. E, 3), a handsome building in the Corinthian style, now used by the Interior Department. Opposite stands the *Department of the Interior (Pl. E, 3; 9-2), known as the Patent Office, a huge building 453 ft. long and 330 ft. deep, with a Doric portico. The centre is of stone, and the wings of marble.

This building contains the rooms of the Secretary of the Interior, the Indian Office, the General Land Office, etc., which may be viewed on application to the attendants. The upper floor is occupied by four halls containing a huge Collection of Patents and Models. Some of the most interesting have been removed to the National Museum (p. 281).
At 5th St. F St. reaches *Judiciary Square* (Pl. E, 3), on the N. side of which stands the **Pension Building** (open 9-4), an enormous barn-like structure of brick, 400 ft. long and 200 ft. wide (said to be the largest brick building in the world). It is surrounded by a terracotta frieze, illustrating military and naval operations. The interior, with its mammoth columns, is rather imposing, and can accommodate about 20,000 people at an inauguration ball. — On the S. side is the *District Court House* (or *City Hall*), occupied by the District of Columbia Courts and the District Commission rs. In front is a column bearing a *Statue of Lincoln*, by Flannery.

A little to the N.E. of this point, at the corner of North Capitol St. and H St., is the *Government Printing Office* (Pl. F, 3; parties conducted round the building at 10 and 2). — *Ford’s Theatre* (Pl. D, 3; now used by Government), in which President Lincoln was assasinated by Wilkes Booth on April 14th, 1865, is in 10th St., between F St. and E St. A house opposite (No. 576) bears a tablet stating that Lincoln died there and contains a collection of Lincoln relics (adm. 25 c.). — On the S. side of Pennsylvania Ave., between 11th and 12th Sts., is the new *Post Office* (Pl. D, 3), with façades 200 and 300 ft. long, and a tower 300 ft. high. It will probably be completed in 1899 and is to accommodate the U.S. Post Office Department, the Auditor for the P. O. Department, and the City Post Office. — The *Baltimore & Potomac Railway Station* (Pl. E, 4) was the scene of Garfield’s assassination by Guiteau (July 2nd, 1881).

At 1812 New York Ave. are the *Halls of the Ancients*, a fine reproduction of the House of Vettius at Pompeii, erected by Mr. Franklin W. Smith (comp. pp. 181, 357) ‘to demonstrate the facility of reconstructions illustrative of the art, architecture, and domestic environment of ancient nations’.

A visit may be paid (tramway along 7th St.) to the *Washington Barracks* (Pl. E, 6), now used as an artillery station (drill 9-11 a.m.). Mrs. Surratt and others implicated in the murder of Lincoln were hanged in front of the Guard House here. — About 1 M. to the E. (tramway on M St.), on the *Anacostia* or E. branch of the Potomac, is the *Washington Navy Yard* (Pl. G, 5; open from 9 a.m. to sunset), which contains a museum and other points of interest. Ships are not built here, but the gun-foundry is very important and large quantities of naval stores are made. — A little to the N. are the *Marine Barracks* (Pl. G, 5), where the famous band plays in summer every Mon. at 11 a.m. — Farther to the E. are the *Congressional Cemetery* (Pl. H, 5), containing the graves of many Members of Congress; the *U. S. Jail* (10-4); and the *Alms House*. — On the S. side of the Anacostia is the large *Government Insane Asylum* (Pl. G, 6; 1500 inmates). — From the Jail we may return through Massachussetts Ave. to (3/4 M.) *Lincoln Square* (Pl. G, H, 4), with Ball’s Emancipation Group (Lincoln and a freed slave), whence tramways and omnibuses run to the Capitol and the city.

The new *Naval Observatory* (Pl. A, 1; 9-3), in the N.W. part
of the city, should be visited by all interested in astronomical work. Its equipments and instruments are excellent.

The *Signal Office and Weather Bureau (Pl. B, 2; 9-2), at the corner of M and 24th Sts., is also well worth a visit. The arrangements for forecasting the weather are most interesting.

Many of the circles formed by the intersection of the streets and avenues (see p. 276) are adorned with statues, among which are the following: Washington (equestrian), by Clark Mills, in Washington Circle (Pl. B, 3); Admiral Duport, by Launt Thompson, in Duport Circle (Pl. C, 2); Gen. Winfield Scott (equestrian), by H. K. Browne, in Scott Circle (Pl. C, D, 2); Adm. Farragut, by Mrs. Hoxie (Vinnie Ream). In Farragut Sq. (Pl. C, 3); Gen. McPherson (equest.), by Rebisco, in McPherson Sq. (Pl. D, 3); Gen. Thomas (equest.), by J. Q. A. Ward, in Thomas Circle (Pl. D, 2); Martin Luther (just to the N. of the last), a replica of the figure by Krietschel, in the Reformation Monument at Worms; Gen. Franklin, by Fassman and Juvalal, at the intersection of Pennsylvania Ave. and 10th St. (Pl. D, 3); Gen. Logan (equest.), by F. A. Simmons, in Iowa Circle (Pl. D, 2); Gen. W. S. Hancock (equest.), by Ellicott, and Gen. Ramsays, by Bailey, at the crossing of Louisiana Ave. and Pennsylvania Ave. (Pl. E, 4); Gen. Greene (equest.), by Browne, in Stanton Sq. (Pl. G, 3, 4).

The Columbia Institute for the Deaf and Dumb (Pl. G, 2), in Kendall Green, incorporates what is said to be the only college for deaf-mutes in the world. In the grounds is a bronze group by Dan. C. French, Gallaudet teaching a deaf child.

One of the favourite drives in Washington is that to the Soldiers' Home, a large asylum for old soldiers (600 inmates), situated in a beautiful park to the N. of the city, 3 M. from the Capitol (also reached by tramway). On the way to it we pass the Howard University (Pl. E, 1), founded in 1867 for the education of youth irrespective of colour or sex (600 students). The grounds of the Soldiers' Home afford fine views (Capitol Vista, etc.) and contain a Statue of Gen. Scott, founder of the Home, by Launt Thompson. President Lincoln spent part of the summers of his last term in one of the cottages at the Soldiers' Home. — To the N. lies the National Military Cemetery, with the graves of Gen. Logan and 3000 soldiers. On the W. this is adjoined by Rock Creek Cemetery, containing St. Gaudens's beautiful Monument of Mrs. Henry Adams. — To the E. of the Soldiers' Home Park is the large Catholic University of America (160 students). We may now return via Glenwood Cemetery (Pl. F, 1).

Georgetown, or West Washington (tramway), beyond Rock Creek, lies at the head of the Potomac navigation and is the port of entry for the District of Columbia. It contains large flour-mills, the handsome buildings of Georgetown University, an old Jesuit institution founded in 1789 (300 students; fine library), and the Convict of the Visitation. In Oak Hill Cemetery (Pl. B, 2) is the grave of J. Howard Payne (1792-1852), author of 'Home, Sweet Home'. The Waggaman Gallery, 3000 O St. (adm., see p. 276), contains chiefly Dutch water-colours and Japanese porcelain, bronzes, weapons, articles of jade, and ivory carvings.

To the N. of Georgetown, on Rock Creek, lies the National Zoological Park (comp. Pl. B, 1), reached from Washington in 1/2 hr. by two lines of tramway. — This large park (170 acres; open free) is still in a somewhat wild state, and a visit to it entails a good deal of walking. It does not contain a very large number of animals, but it is interesting to see such native animals as the bison and moose in the comparative freedom of their extensive enclosures. The beavers and prairie dogs should not be overlooked. — One line of cars goes on past the Zoological Park to Chevy Chase, with its country club and golf-links. — Rock Creek Park, to the N. of the Zoological Park, extends to the District line.

*To Arlington and National Cemetery. This interesting trip should not be omitted. Those who do not drive all the way (curr. $5) may go by tramway to the Union Station (Pl. A, 2) at the Georgetown Aqueduct (Pl. A, 3),
cross the bridge (omn. across and back 5 c.), and take the electric car to 
(1/4 hr.) the gate near (1 M.) Fort Myer (return-fare 15 c.). Or they may 
take the electric car from the cor. of Pennsylvania Ave. and 13 1/2 St. to 
the Sherman Gate of the cemetery (hourly), crossing the Long Bridge (p. 284). 
The National Cemetery (Pl. A, 4, 5) contains the graves of about 16,000 
soldiers. 4 Arlington House, in the middle of the grounds, 200 ft. above 
the river, was once the residence of George Washington Parke Custis (step-
grandson of Washington) and afterwards of Gen. Robert Lee, the famous 
Confederate commander, who married Miss Custis. It affords a fine View 
of Washington, but now contains little of interest. Near the house are 
the graves of Gen. Sheridan, Gen. Sherman, and other distinguished officers. 
To the S. is a tomb containing the remains of 211 unknown soldiers. 

5From Washington to Mount Vernon, 15 M., steamer daily from 7th 
St. S.W. Wharf (Pl. E, 5) at 10 a.m., allowing 2 hrs. at Mt. Vernon, and 
regaining Washington about 2.30 p.m. (return-fare $1, including admission 
to Mt. Vernon); in summer (June-Oct.) there is another trip at 2.30 p.m. 
[ Mt. Vernon may also be reached by electric tramway via Alexandria; 
fare 70 c., incl. adm.] This interesting trip to the old home of George 
Washington should on no account be omitted. — The steamer descends 
the Potomac 6 1/2 M. Alexandria (Braddock Ho., $2; Brit. Vice-consul, 
Mr. J. J. Jameson), a quaint old Virginian city of 14,330 inhab., with the 
church (Christchurch) which Washington used to attend (pew still pointed 
out). The old Carey House was the headquarters of Gen. Braddock in 1755. 
Adjoining the city is another National Cemetery, with 4000 graves. — 8 1/2 M. 
Fort Foote, Maryland, an abandoned earthwork of the Civil War; 12 M. Fort 
Washington, an old stone fort.

15 M. Mt. Vernon, an old-fashioned wooden mansion, 96 ft. long, 
stands on a bluff, 200 ft. above the river, and commands a splendid view. 
The estate, originally named Hunting Creek and comprising 8000 acres, was 
hired by George Washington in 1752 from his brother Lawrence, who 
had changed the name in honour of his former commander, Adm. Vernon 
of the British navy. The central part of the house was built by Lawrence, 
and the wings were added by George Washington. The house and 200 acres 
of land around it were bought by the Mt. Vernon Ladies Association in 
1859 for $200,000 (raised in great part through the exertions of Mr. Edward 
Everett) and have been restored as nearly as possible to their condition in 
George Washington's lifetime. — In ascending from the wharf to the house 
we pass the plain brick Tomb of George Washington, containing, behind 
an iron grating, two sarcophagi with the remains of the General (1732-99) 
and his wife Martha (1730-1802). The house contains an abundance of 
interesting relics, of which, perhaps, the key of the Bastille is the most 
notable. The room in which Washington died is at the S. end of the 
first floor, and Mrs. Washington died in the one immediately above it. 
The room marked Mrs. Washington's Sitting Room was more probably 
George Washington's Business Room. The tiles in the piazza were brought 
from the Isle of Wight. The brick Barn, dating from 1733, is probably 
the oldest part of the buildings. The Coach House contains Washington's 
carriage. The Negro Quarters are to the W. of the house. The Garden 
contains trees planted by Washington.

From the Union Station at Georgetown (p. 288) the Washington and 
Great Falls Electric Railway runs along the Palesides of the Potomac to 
(7 M.) Cabin John Bridge, the largest stone arch in the world (220 ft.), built 
by Gen. Meigs for the Washington Aqueduct (fare 10 c.). About 1 M. short 
of the bridge is Glen Echo Park, the headquarters of the Red Cross Society. 
The Conduit Road, skirting the railway, is a resort of cyclists. About 5 M. 
beyond the bridge are the Great Falls of the Potomac. — On Wesley Heights, 
to the N. of this line, is the new American University (Methodist).

From Washington to Norfolk, 196 M., steamer daily (from 7th St. 
Wharf) at 7 p.m., arriving at 8 a.m. (fare $3, stateroom $1-3; second 
class $2, berths free). — From Washington to Mt. Vernon, see above. Farther 
on are Indian Head (with Government proving ground for heavy ordnance); 
Mathias Point (55 M.; right), heavily fortified by the Confederates in the
Civil War; and Wakefield (14 M.; right), the birthplace of George Washington (1732-99), with a monument erected in 1897. At (105 M.) Point Lookout (left) we enter Chesapeake Bay. 184 M. Fort Monroe, see p. 372; 192 M. Newport News, see p. 371. — 196 M. Norfolk, see p. 371.

**Railway Excursions may be easily made from Washington to Annapolis (p. 214), Harper's Ferry (p. 292), the Shenandoah Valley (p. 379), etc. — From Washington to Chicago, see R. 45; to Baltimore, see R. 42; to New York, see R. 47; to New Orleans, see R. 70.**

### 44. From Pittsburg to Chicago.

#### a. Via Crestline and Fort Wayne.

468 M. Pennsylvania Co.'s Lines in 12½-14 hrs. (fare $12, sleeper $2½).
— From New York to Chicago by this route, see R. 47a.

**Pittsburg,** see R. 39. The train crosses the Allegheny River (p. 266), runs through Allegheny City (p. 266), and follows the right bank of the Ohio for some distance. 25 M. Rochester (710 ft.), at the confluence of the Ohio and the Beaver River, which we now follow towards the N. (right). 30 M. Beaver Falls. Farther on we turn again to the W. (left) and beyond (45 M.) Enon (995 ft.) we enter Ohio (comp. p. 294). — 83 M. Alliance (1100 ft.) is the junction of a branch-line to Cleveland (p. 294). — 101 M. Canton (The Hurford, Barnett Ho., $2-2½), a city of 26,189 inhab., in a fine wheat-growing district, is the home of President McKinley. — 175 M. Mansfield (13,473 inhab.). — 189 M. Crestline (1170 ft.) is the junction of lines to Toledo, Cleveland, Cincinnati, Indianapolis, etc. — 201 M. Bucyrus (5974 inhab.), on the Sandusky River. Beyond (288 M.) Van Wert we enter Indiana (p. 297).

320 M. **Fort Wayne,** an important railway-centre (comp. p. 298). From this point the route is substantially the same as that described at p. 298. — 360 M. Warsaw, on the Tippecanoe River; 384 M. Plymouth; 415 M. Wanatah; 424 M. Valparaiso (p. 298). We now approach Lake Michigan (right). Various suburban stations.

468 M. **Chicago** (Canal St. Station), see R. 48.

#### b. Via Columbus and Logansport.

507 M. **Pittsburg, Cincinnati, Chicago, & St. Louis Railway** (Pennsylvania Co.'s 'Pan Handle Line') in 17-19 hrs. (fares as above).

**Pittsburg,** see R. 39. This line runs at first almost due W., crossing the narrow arm of West Virginia (p. 292), interposed between Pennsylvania and Ohio. Beyond (42 M.) Wheeling Junction we cross the Ohio River and enter Ohio (see above). 43 M. Steubenville (730 ft.; U. S. Hotel, Imperial, $2-2½), an industrial city of 13,394 inhab. on the W. bank of the Ohio. 93 M. Dennison; 124 M. Coshocton; 138 M. Trinway, the junction of a line to Cincinnati.

193 M. **Columbus.** — Hotels. Chittenden, $3-5; Grand Southern, $2½-5; Neil Ho., $2-3; Park Hotel, $2-3½; Smith's European Hotel; American, $1½-2. — Tramways traverse the principal streets. — Post Office, Capitol Sq., cor. of State St. and Third St.
Columbus (745 ft.), the capital of Ohio, is a thriving city of (1890) 88,150 inhab. (now about 120,000), situated on the E. bank of the Scioto River. Its commerce is important, and it has manufactures of iron and steel goods, carriages, and agricultural implements (value in 1890, $20,000,000). Its streets are broad and much better paved than is usual in American cities. Broad Street, in particular, affords a delightful drive of 7 M. over an asphalted roadway shaded with trees. — The State Capitol is a large and somewhat odd-looking building, surrounded with a small park full of tame grey squirrels. Other important buildings are the Ohio State University (1000 students), the Central Ohio Lunatic Asylum, the Deaf and Dumb Asylum, the State Penitentiary, the U. S. Barracks (in a pretty park), the Court House, the Starling Medical College, the Idiot Asylum, the Blind Asylum, and the Board of Trade. *Goodale Park, at the N. end of the city, is prettily laid out.

From Columbus to Cincinnati, see p. 341. Railways also run hence to Toledo, Cleveland, Indianapolis, etc.

Beyond Columbus we pass numerous unimportant stations. 240 M. Urbana (3511 inhab.), a railway-centre; 266 M. Piqua (9090 inhab.). At (276 M.) Bradford Junction the railway forks, the left branch leading to Indianapolis (p. 339) and St. Louis (p. 349), while the Chicago line keeps to the right. At (297 M.) Union City we enter Indiana. 350 M. Marion (8769 inhab.). 386 M. Anoka Junction (p. 340). — 390 M. Logansport (605 ft.; Barnett, $2 1/2-3; Johnston, $2), a city of 13,328 inhab., at the confluence of the Wabash River, Eel River, and Wabash & Erie Canal, is an intersecting point of several railways (comp. p. 340). — 415 M. Winamac; 466 M. Crown Point. — In entering Chicago this railway crosses the Drainage Canal (p. 318) by the largest swing-bridge in the world, 400 ft. long and 112 ft. wide; it is laid with eight tracks.

507 M. Chicago (Canal St. Station), see R. 48.

45. From Baltimore to Chicago.

860 M. Baltimore & Ohio Railroad in 27 hrs. (fare $17, sleeper $5). This line passes some fine scenery. — From New York to Chicago by this route, see p. 308.

From Baltimore to (40 M.) Washington, see R. 42. A good view of Washington is enjoyed as we leave it. The line runs towards the N.W. through Maryland (p. 256). Beyond (76 M.) Dickerson's the Potomac comes into sight on the left. At (83 M.) Washington Junction, or Point of Rocks (230 ft.), the train threads a tunnel below a promontory of the Catoctin Mts, a prolongation of the Blue Ridge.

This is the junction of a line to (15 M.) Frederick (8193 inhab.), the scene of Barbara Frietchie's exploit with the flag and Stonewall Jackson (see Whittier's poem and Mrs. Caroline Dall's book). Francis Scott Key (1779-1843), author of 'The Star-Spangled Banner' (p. 283), is buried in Mt. Olivet Cemetery, opposite the entrance of which is a handsome monument, by Alex. Doyle, erected to him in 1898.
Farther on the valley contracts and the hills grow higher. Near (92 M.) Waverly (250 ft.), the junction of a line to Hagerstown (p. 256), took place the battle of South Mountain (Sept. 14th, 1862). The scenery here is very picturesque. The train soon crosses the Potomac and enters West Virginia at —

95 M. Harper's Ferry (270 ft.; Conner's, $2; Morrell Ho., Hill Top Ho., Lockwood Ho., on the hill), magnificently situated on the point of land formed by the confluence of the Potomac and Shenandoah, with the Maryland Heights on the one side and the Virginian or Loudon Heights on the other. Pop. 1762, including Bolivar, whose name is widely celebrated through the famous raid of John Brown (see below), practically the first scene of the Civil War. The armory and arsenal, destroyed during the Civil War, have not been rebuilt.

John Brown of Osawatomie, at the head of a party of about 20 armed Abolitionists, entered Harper's Ferry by the bridge on the night of Oct. 16th, 1859, and took possession of the Arsenal, intending to liberate the negro-slaves and occupy the Blue Ridge as a base of hostilities against the slave-owners. The negroes, however, did not rise, and Brown and most of his companions were killed or captured, after two days' fighting, by a squad of U. S. Marines that had come to the aid of the Virginia militia. The small engine house in which John Brown made his last stand (known as 'John Brown's Fort') was removed to Chicago in 1883, but was brought back after the World's Fair and placed in a small park on the Shenandoah, about 4 M. from Harper's Ferry. John Brown and six of his associates were hanged at Charlestown, 7 M. to the S.W.

The visitor should ascend from the station to (5-10 min.) the top of the promontory (about 300 ft. above the river), which commands a fine "View of the confluence of the rivers and of the gap made in the Blue Ridge by their combined waters bursting through it. Just below, on the Shenandoah side, is a curious pile of rocks known as Jefferson's Rock. We may follow the path along the Shenandoah (high above it) and then go on by road, passing the large Storer College, to (1 M.) the top of the ridge called Bolivar Heights, which commands a splendid "View of the rich and fertile Valley of Virginia (Shenandoah Valley), backed by the Allegheny Mts., 30 M. away. To the N. lies the battlefield of Antietam (p. 379).

A fine drive may be taken on the road round the promontory at the foot of the cliffs. — The ascent of *Maryland Heights (1455 ft.; view) takes 1½ hr. (bridle-path). We cross the bridge over the Potomac and turn to the left. About 2/3 of the way up we take the less promising path to the left.

Beyond Harper's Ferry the line leaves the Potomac for a time. 103 M. Shenandoah Junction is the junction for the railway through the Shenandoah Valley (see R. 69 b). 114 M. Martinsburg, the junction for Harrisburg, see p. 256. Farther on we cross North Mt. (550 ft.) and rejoin the Potomac (right), on the other side of which are the ruins of Fort Frederick (1755). The line hugs the winding stream, with the hills rising abruptly on each side. Beyond (154 M.) Patterson's Creek we cross the Potomac and re-enter Maryland. — 192 M. Cumberland (640 ft.; Queen City Hotel, with rail. restaurant, $2-3), a city of 12,729 inhab., with large rolling-mills and glass-works.

Cumberland is the junction of a line to (150 M.) Pittsburg (p. 263), running via the picturesque Youghiogheny Valley, Connellsville, and McKeesport.

Our line turns to the S.W. and continues to follow the Potomac. The scenery is rugged and picturesque. Near (215 M.) Keyser (800 ft.)
we cross the river into West Virginia, but soon recross it. At (220 M.) Piedmont (930 ft.) we leave the river and begin the steep ascent of the Allegheny Mts. 223 M. Frankville (1700 ft.); 223 M. Swanton Water Station (2280 ft.); 237 M. Altamont (2620 ft.), the highest point of the line. The descent is more gradual, and we pass at first through a comparatively level district known as the Glades, on the crest of the Alleghenies and containing the headwaters of the Youngs-
to-geny. 240 M. Deer Park Hotel (2440 ft.; $3), a large summer-resort ($3); 244 M. Mountain Lake Park; 246 M. Oakland (2370 ft.; Oak-
land, $21/2-4; Glades, $2-3), another summer-resort amid beauti-
ful scenery; 256 M. Terra Alta (2560 ft.). We now descend, passing
through numerous cuttings and tunnels, to the Cheat River Valley,
crossing the river at (267 M.) Rowlesburg (*View to the right). We
now begin another steep ascent to the crest of Laurel Hill. 274 M.
Cassidy’s Summit (1855 ft.). Beyond (275 M.) Tunnelton (1820 ft.)
we pass through the Kingwood Tunnel, 3/4 M. long. 281 M. New-
burg (1245 ft.). At (294 M.) Grafton (990 ft.; 3169 inhab.), on
the Tygart’s Valley River, we leave the mountains.

Our line (to Wheeling and Chicago) here diverges to the right
from the line to Parkersburg, Cincinnati, and St. Louis (see R. 58 d)
and runs towards the N.W., down the Tygart’s River. Beyond (316 M.)
Fairmount (875 ft.), at the head of navigation on the Monongahela,
we ascend the picturesque ravine of Buffalo Creek, passing through
the head of the pass (1150 ft.) by a tunnel. We then descend along
a branch of Fish Creek, threading several tunnels. At (382 M.)
Moundsville (640 ft.) we approach the Ohio (to the left).

The place takes its name from an Indian Mound, 70 ft. high and 820 ft.
in circumference at the base, in which two sepulchral chambers were found,
containing three skeletons (comp. p. 347).

At (389 M.) Benwood we cross the river and enter Ohio. Beyond
this point we run by Central Time (p. xviii).

Wheeling (635 ft.; Windsor, $2-3; McClure Ho., $21/2-3), on the Ohio,
4 M. above Benwood, is the largest city in West Virginia (34,522 inhab.)
and has manufactures of nails, iron, pottery, and glassware (value in 1890,
$11,540,000). It is an important railway-centre (to Pittsburg, see p. 267).

390 M. Bellaire (655 ft.) lies on the Ohio side of the river, oppo-
site Benwood (see above) — 468 M. Zanesville (710 ft.; Clarendon,
$21/2-31/2; Kirk Ho., $2), a manufacturing city with 21,009 inhab.,
at the confluence of the Muskingum River and the Licking River. We
cross the former river by a bridge 170 yds. long. — At (494 M.)
Newark (820 ft.; Warden, $2), with 14,270 inhab., we cross the
Pittsburg, Cincinnati, and St. Louis R. R. (see p. 290). Our line
runs N.W. to (556 M.) Mansfield (p. 290) and (582 M.) Chicago
Junction, where it forks, the left branch leading to Chicago, the right
to Sandusky (p. 296). The stations beyond this point are unimport-
ant. 670 M. Defiance; 707 M. Auburn Junction; 748 M. Milford Jun-
tion; 840 M. Rock Island Junction; 841 M. South Chicago.

860 M. Chicago (Grand Central Station), see R. 48.
46. From Buffalo to Chicago.

540 M. RAILWAY in 13-18 hrs. (fare $14; sleeper or parlor-car $3). This line skirts the S. shore of Lake Erie. From New York to Chicago by this route, see R. 47d.

Buffalo, see R. 28a. Several small stations are passed. 32 M. Silver Creek was the home of Kitty, in ‘A Chance Acquaintance’, by W. D. Howells. At (40 M.) Dunkirk (Gratiot, $2-3; Erie, $2-21/2) connection is made with the Erie R. R. (comp. p. 307). Pleasant views of Lake Erie to the right. 50 M. Brocton Junction (for Chautauqua, etc.), see p. 267. — 58 M. Westfield is the point of intersection with the ‘Old Portage Road’, a military route constructed by the French explorers in 1753. At (68 M.) State Line we pass into Pennsylvania. — 88 M. Erie (Reed Ho., $2-41/2; Liebel Ho., $2-41/2; Union Depot Hotel; Massasauga Point, on the lake), a lake shipping-port with a good harbour (enclosed by Presque Isle) and 40,464 inhab., occupies the site of a French fort built in 1749 and was the headquarters of Commodore Perry when he defeated the Anglo-Canadian fleet in 1813. It contains some handsome buildling, including the Pennsylvania Soldiers’ and Sailors’ Home, and has important manufactories of boilers and engines. It is the junction of lines to Philadelphia (p. 230), Pittsburg (p. 263), etc. — 103 M. Girard (p. 267). Beyond (108 M.) Springfield we enter Ohio (the ‘Buck-eye State’, so called from the buckeye-tree, *Aesculus flava or glabra*). 129 M. Ashtabula is the junction of a line to Oil City, Pittsburg, etc. 154 M. Painesville is also the junction of a line to Pittsburg. 161 M. Mentor was the home of President Garfield (d. 1881), whose large white house, now occupied by his widow, may be seen beyond the station, to the left. — In approaching Cleveland we pass through Gordon Park (p. 296).

183 M. Cleveland. — Railway Stations. Union Depot (Pl. C, 1, 2), at the foot of Bank St.; Erie Depot (Pl. C, 2), near the Viaduct; New York, Chicago, & St. Louis Railroad (Pl. E, 3), Broadway; Cleveland & Canton Railroad (Pl. D, 2), Ontario St.; Valley Railway (Pl. C, 2), S. Water St.

Hotels. Hollenden (Pl. a; D, 2), Superior St., cor. of Bond St., a large house, Amer. plan $3-5, R. on Europ. plan from $1; *Stillman* (Pl. b; D, 2), pleasantly situated in Euclid Ave., good cuisine, from $31/2; Weddell (Pl. e; C, 2), Superior St., commercial, $3-5; Colonial, in the Colonial Arcade (p. 295); Forest City (Pl. d; C, 2), Monument Park, $2-3; Kennard (Pl. e; C, 2), $2-3; American (Pl. f; C, 2), $2-21/2; Garlock (Pl. g; E, 2), 430 Euclid Ave., from $21/2; Livingston (Pl. h; D, 2), Euclid Ave., $2-3; Hawley Ho., $2.

Restaurants. *Hollenden*, see above; Lennox, Euclid Ave. and Erie St.; Boehmke, 250 Erie St.; Savarin, Ontario St.; Stratahan, in the Arcade.

Electric Tramways traverse the chief streets in all directions and run to various suburban points. — Cab from station to hotel, each pers. 50c., incl. baggage; per hour, $11/2; other fares in proportion; 50 per cent. more after 11 p.m.

Places of Amusement. Opera House (Pl. D, 2), Euclid Ave.; Lyceum Theatre (Pl. C, 2); Star Theatre (Pl. D, 2); Cleveland Theatre (Pl. C, 2).

Post Office (Pl. D, 2), East Public Sq.
CLEVELAND. 46. Route. 295

Cleveland (580 ft. above the sea), the second city of Ohio, with (1890) 261,353 inhab. (now estimated at 385,000), lies on the S. shore of Lake Erie, at the mouth of the small Cuyahoga River, and, with its broad and well-paved streets, its green lawns and squares, and its numerous trees ("Forest City"), makes a favourable impression on the visitor. Its important iron and steel works produce goods to the annual value of $36,000,000; it is the seat of the Standard Oil Co.; and it carries on a very extensive trade through its excellent harbour. Most of its factories, among which may also be mentioned those for the making of sewing-machines, electrodynamic machinery, and electric lamp carbons, are tucked away in the river-valley below the level of the plateau on which the city lies, or are in West Cleveland and along the river-front.

Cleveland was founded in 1796, but did not begin to grow with any rapidity until the completion of the Ohio Canal, connecting Lake Erie with the Ohio (1834). Its pop. in 1830 was 1000, in 1860 it was 43,417, and in 1880 it was 160,142. In the decade 1880-90 it increased by 60 per cent. Cleveland is one of the chief ship-building cities in the United States, building vessels of 71,922 tons in 1889 and 1890. The value of its manufactures in 1890 was $105,500,000 (21,100,000); 50,000 hands were employed.

The chief business-street is Superior Street (Pl. C-F, 2, 1), a really fine and wide thoroughfare, the W. end of which is lined with substantial business blocks, such as the Perry-Payne Building (Nos. 103-109). A little farther on the street expands into *Monumental Park or the Public Square (Pl. C, D, 2), containing a Soldiers' Monument and a Statue of Gen. Moses Cleaveland (1754-1806), founder and godfather of the city. At the N.E. corner of the square stands the Post Office and Custom House (Pl. D, 2), and at the N.W. corner is the Old Court House (Pl. C, 2), adjoined by the American Trust Building (14 stories). On the N. side of the square, at the corner of Ontario St., is the handsome building of the *Society for Savings (Pl. 1; C, 2), established in 1849 and now containing upwards of 20 million dollars (four millions sterling). There are no stock-holders, the entire profits going to the 45,000 depositors (*View from the top of the building). Adjacent is the new Chamber of Commerce (Pl. 2; C, D, 2). In Superior St., just beyond the Post Office, is Case Hall (Pl. 3; D, 2), with a library of 30,000 vols., and next to it is the massive City Hall (Pl. D, 2). — A little to the N. of this point is the huge New Central Armoury (Pl. D, 1), used for conventions, horse-shows, etc.

*Euclid Avenue (Pl. D-G, 2, 1), which begins at the S.E. angle of the Public Square, is at its E. end also an important artery of business and farther out becomes one of the most beautiful residence streets in America, with each of its handsome houses surrounded by pleasant grounds and shady trees. To the left is the *Arcade (Pl. D, 2), 400 ft. long, 180 ft. wide, and 144 ft. high, with a fine five-balconied interior, running through to Superior St.; and to the right is the Colonial Arcade (Pl. D, 2), constructed in 1898 and running through to Prospect St. At the corner of Bond St. are the
tall Garfield (10 stories) and New England (16 stories) Buildings (Pl. 4, 5; D, 2), the top floor of the latter occupied by the New Century Club. Near Erie St. is the Public Library (110,000 vols.), and at the corner is the Lennox Building (Pl. D, 2). Farther on are several fine churches. About 4½ M. from the square (street-car) Euclid Ave. reaches the beautiful *Wade Park, which contains statues of Commodore Perry (p. 294) and Harvey Rice. Opposite the Park are the buildings of the Western Reserve University (Adelbert College and Cleveland Medical College; 800 students) and the Case School of Applied Sciences (250 students). About 11½ M. farther on, the avenue ends at *Lake View Cemetery, containing the handsome *Garfield Memorial (adm. 10 c.; erected in 1890 at a cost of $130,000), the top of which (165 ft. high) affords a splendid *View of the city and its environs.

Prospect Street (Pl. D-G, 2), which runs parallel to Euclid Ave. on the S., is little inferior to it in beauty. At the corner of Erie St. is the handsome building of the Young Men’s Christian Association (Pl. D, 2). — Another favourite resort is *Gordon Park, to the N.E. of the city, on the lake, connected with Wade Park by a fine boulevard, which also extends to the new Rockefeller Park. — The huge Market (Pl. D, 2), in Ontario St., is one of the largest and finest in the country.

Cleveland is connected with West Cleveland, on the other side of the Cuyahoga Valley, by an enormous *Viaduct (Pl. C, 2), 1070 ft. long, completed in 1878 at a cost of $2,200,000 (440,000$) and deservedly regarded as a wonderful feat of engineering. The main portion of the viaduct is of stone, but the central part is of iron lattice-work and swings open to allow the passage of vessels. The *View of the manufacturing quarters in the valley from this viaduct is very imposing, especially at night. There are three other similar viaducts at different parts of the city (see Pl. D, 2; F, 3).

Driving parties may cross the Viaduct and follow Lakeside Ave. and Detroit St. to (S.M.) Rocky River, a favourite supper resort in summer.

A visit may also be paid to the great Oil District at the S. end of Wilson Ave. (comp. Pl. G, 5), where the enormous tanks and refining works of the Standard Oil Co. are situated.

The huge Ore Docks of the N. Y. P. & O. R. R., on the W. side of the city, sometimes contain 2,000,000 tons. — The Harbour (Pl. A, B, 1, 2) and Breakwater (2 M. long) also repay inspection.

Cleveland is, naturally, an important Railway Centre, from which lines radiate, more or less directly, to Pittsburgh (p. 263), Marietta, Columbus (p. 290), Cincinnati (p. 344), Toledo (p. 297), Chicago (p. 308), etc. — Steamers ply to all important points on the Great Lakes.

At (208 M.) Elyria the line forks, the branches reuniting at Millbury (p. 297). The chief station on the right branch is (243 M.) Sandusky (West Ho., Sloane Ho., $2-3), with a good harbour, a Soldiers’ Home (visible to the left), the State Fish Hatchery, and a large trade in fish and fruit (see p. 304). Pop. 18,471. Beyond Sandusky we cross the Bay Bridge (4 M. long, including approaches), affording a fine view of the lake. — The left or inland line runs
to Chicago. TOLEDO. 46. Route. 297

via (217 M.) Oberlin (with a college open to both sexes, white or coloured; 1300 students) and (238 M.) Norwalk. — 288 M. Millbury.

296 M. Toledo (Boody Ho., $2 1/2-4; Madison, Jefferson, Burnett, $2-3; St. Charles; Rail. Restaurant), a city and important railway-centre on the Maumee River, 6 M. from Lake Erie, with 81,434 inhab., has a large trade in grain, clover-seed, coal, iron ore, and timber, and numerous manufactures (value in 1890, $15,000,000). Among the handsomest of its buildings are the *Public Library (35,000 vols.), the Soldiers' Memorial, and the Toledo Club House. One of its newspapers is named the Toledo Blade. Many pleasant excursions may be made on the Maumee River.

From Toledo to Detroit, 65 M., railway in 2 1/2 hrs. The chief stations are (25 M.) Monroe and (44 M.) Trenton. 65 M. Detroit, see p. 298.

Beyond Toledo the line forks, the branches rejoining each other at Elkhart (see below). The 'Air Line' (followed by through-trains) enters Indiana (the 'Hoosier State') at (337 M.) Archibald and runs through that state to (429 M.) Elkhart. The 'Old Line' enters Michigan (the 'Wolverine State') beyond (307 M.) Sylvania and passes (329 M.) Adrian (810 ft.; 9511 inhab. in 1894), the centre of a rich farming country, (362 M.) Hillsdale, a fine summer-resort, (408 M.) Sturgis (with the Lewis Art Gallery), and (420 M.) White Pigeon, the junction of a line to Kalamazoo, Grand Rapids (p. 301), and Mackinaw (p. 301).

439 M. Elkhart (735 ft.; Rail. Restaurant) is a busy little city, with 11,360 inhabitants. 454 M. South Bend (725 ft.; Johnson, Oliver, Sheridan, Grand View, $2-21/2), a city with 21,819 inhab., on the St. Joseph's River, is known for its carriages and wagons (Studebaker's works). — 481 M. La Porte (Teegarden Ho., $2; Rail. Restaurant), a little town, with 7126 inhab., handsome buildings, and brisk industries, lies near a chain of small lakes (Clear, Stone, Pine Lakes), which afford pleasant excursions (hotels $4 1/2-2; small steamers). La Porte is the junction of a line to Indianapolis (p. 339). 491 M. Otis. Lake Michigan (p. 304) soon comes into sight on the right, and we enter Illinois ('Prairie State') at (499 M.) Chesterton. Various suburban stations are passed before we reach the Van Buren St. Station at —

540 M. Chicago (see p. 308).

B. Viā New York, Chicago, and St. Louis Railroad.

523 M. Railway ('Nickel Plate Line') in 16-19 hrs. (fares as above).

Buffalo, see p. 211. As far as (184 M.) Cleveland (p. 294) this line runs parallel with the one above described and passes the same stations. Beyond Cleveland it follows the shore of Lake Erie pretty closely. 210 M. Lorain, the junction of a line to Elyria (p. 296). Beyond (221 M.) Vermillion the line bends to the left and runs inland. 240 M. Kimball; 248 M. Bellevue (Rail. Restaurant); 260 M. Green Springs (Oak Ridge, $2), with copious sulphur springs; 280 M.
Fostoria, the junction of several railways; 286 M. Arcadia (carriages changed for points on Lake Erie & Western R. R.); 300 M. McComb; 310 M. Leipsic Junction, for a line to Dayton and Cincinnati. Beyond (349 M.) Payne we enter Indiana.

371 M. Fort Wayne (775 ft.; Aveline Ho., Wayne Ho., $2 1/2-3 1/2; Rail. Restaurant), an industrial city of 35,393 inhab., on the Maumee River, here formed by the confluence of the St. Joseph and the St. Mary, occupies the site of an old fort (first built in 1764), which plays a considerable part in Colonial history. It is a railway-centre of great importance (comp. p. 290). — Near (424 M.) Tippecanoe Gen. Harrison ('Old Tippecanoe') defeated Tecumseh, at the head of the Miami and Shawnees, in 1812. — 477 M. Valparaiso; 514 M. Grand Crossing.

523 M. Chicago (12th and Clark St. Station), see R. 48.

c. Via Michigan Central Railroad.

536 M. Railway ('North Shore Line or 'Niagara Falls Route') in 13-16 hrs. (fares as above). This line runs on the N. side of Lake Erie, through the Canadian province of Ontario. It affords a good view of Niagara Falls (see below). Luggage checked to United States points is not examined; small packages examined in crossing the Cantilever Bridge (p. 224).

Buffalo, see p. 211. The train descends along the right bank of the Niagara River (comp. p. 214) to (22 M.) Niagara Falls, N.Y. (p. 221), and (24 M.) Suspension Bridge (p. 219). It then crosses the river by the *Cantilever Bridge described at p. 224 (*View of rapids) to (24 1/2 M.) Clifton (p. 249). From Clifton it runs to the S., along the Victoria Park (p. 223), to (25 1/2 M.) Niagara Falls (Ont.) and (27 M.) Falls View, where all trains stop five minutes to allow passengers to enjoy the splendid *View of Niagara Falls (p. 220). We then turn to the right (W.). 38 M. Welland, a small town with 2035 inhab., lies on the Welland Ship Canal (27 M. long) uniting Lake Ontario with Lake Erie. It is the junction of a direct line to Buffalo and of a line to Port Dalhousie. From (79 1/2 M.) Hagersville a branch-line runs to Hamilton (p. 302). 139 M. St. Thomas (Grand Central, $2-21/2), a thriving town with 10,370 inhab., is the junction of lines to Toronto, London (p. 302), St. Clair (p. 300), and Port Stanley, the last, the chief harbour on the N. side of Lake Erie, lying 8 M. to the S. — 194 M. Fargo; 220 M. Comber; 234 M. Essex. At (260 M.) Windsor (International Hotel, $1-2) the train is run on to a large steam-ferry and carried across the Detroit River to (251 M.) Detroit.

Hotels. *Cadillac, Michigan Ave., $3-4; Russell House, Campus Martius, $3-3 1/2; The Wayne, opposite the M. C. R. R. Depot, well spoken of, $2-3; Ste. Claire, cor. of Randolph St. and Monroe Ave., $2 1/2-3; Gris
to Chicago.

DETROIT. 46. Route. 299

Electric Tramways traverse the principal streets (5 c.) and run to various neighboring points. — Cabs: drive within the city limits, each pers. 50c.; first hour 1-4 pers. §11/2, each addit. hr. § 1; trunk 15c.

Ferries ply from the foot of Woodward Ave. to Belle Isle and to Windsor every 1/4 hr., and from the foot of Joseph Campau Ave. to Belle Isle and to Walker ville every 1/2 hr. — Steamboats ply to Put-in-Bay Islands (p. 304), St. Clair, Cleveland, Buffalo, Fort Huron, Sault Ste. Marie, Mackinaw, and other points on the Great Lakes.

Post Office, Fort St.

Detroit (580 ft.), the chief city of Michigan, with (1894) 237,798 inhab. (now estimated at 300,000), is situated 18 M. from Lake Erie, on the N.W. bank of the Detroit River, which connects that lake with the small Lake St. Clair (530 ft.), just above the city, and so with Lake Huron (p. 304). It is a well-built town, with numerous trees, carries on a large traffic in grain, wool, pork, and copper, and has many important manufactures. Most of its streets are laid out on the rectangular plan, but several avenues radiate from a centre like the spokes of a wheel. The city is lighted by electricity by a system of lofty steel towers (150-175 ft. high).

The site of Detroit was visited by Frenchmen in 1670 and 1679 (La Salle), and in 1701 the Sieur de la Motte Cadaillac (p. 113) founded Fort Pontchartrain here. In 1676 it passed into the hands of the English, and in 1763-66 it was successfully defended for 15 months against the Indian chief Pontiac. It was nominally ceded to the United States in 1783, but the Americans did not become masters of it till 1796. The fort was taken by the British in 1812 and retaken by the Americans in 1813. Detroit was incorporated as a city in 1824, with about 1500 inhabitants. In 1850 the population was 21,019, in 1880 it was 134,834, in 1890 it was 203,876.

Some idea of the volume of traffic on the Great Lakes may be gathered from the fact that about 52,000 vessels pass Detroit yearly in the seven months during which navigation is open, carrying nearly 40 million tons of freight.

The staples of its manufactures, the value of which in 1890 was $80,000,000 (16,000,000c.), are iron and steel goods, cars and car-wheels, stoves, drugs, salt, and tobacco.

Woodward Avenue, running N.W. from the river and dividing the city into two nearly equal parts, is the main business thoroughfare and the chief centre of life. Most of the principal buildings are on or near it. Near its foot (S.E. end) are the chief Steamboat Wharves and the Ferry to Windsor (p. 298). About 1/2 M. from the river the street expands into the Campus Martius, adorned with a handsome fountain (1898), from which Michigan and Gratiot Avenues diverge to the left and right. To the left stands the City Hall, the tower (view) of which contains a clock with a dial 81/2 ft. in diameter. In front of the City Hall is the Soldiers’ Monument, by Randolph Rogers.

In Gratiot Ave., near the Campus Martius, is the Public Library, containing 150,000 vols. and some historical relics. At the corner of Griswold St. (running parallel with Woodward Ave. on the W.) and Grand River Ave. is the Young Men’s Christian Association. The Chamber of Commerce, at the corner of Griswold and State Sts., is 13 stories high. — The new Post Office, in Fort St., adjoining the site of the old Fort Lernoult, is a handsome building.
A little farther on Woodward Ave. reaches GRAND CIRCUS PARK, a square with trees and fountains. At the corner of Edmund Place, 1/2 M. farther on, are the *First Unitarian and First Presbyterian Churches, two fine Romanesque buildings of red stone. To the right, at the head of Martin Place, is the handsome Harper Hospital; and Grace Hospital is also seen to the right (cor. of Willis Ave. and John R. St.) a little farther on. To the left, a little higher up, is the Detroit Athletic Club. The N. end of Woodward Avenue and the adjoining streets form the principal residence-quarter of the town.

JEFFERSON AVENUE, which runs at right angles to Woodward Ave., crossing it 1/5 M. from the river, contains many of the chief wholesale houses, and towards its N.E. end has also many pleasant residences. The site of Fort Pontchartrain (p. 299) was at the corner of Jefferson Ave. and Shelby St., two squares to the W. of Woodward Ave. To the E., on the left side of the street, are the Academy of the Sacred Heart, the R.C. Cathedral of SS. Peter and Paul, and the Jesuit College. Nearly opposite, at the corner of Jefferson Ave. and Hastings St., about 1/2 M. to the E. of Woodward Ave., stands the *Museum of Art (9-4, 25c.; Sun., 2-4, free).

The chief contents of the Museum are the Scripps Collection of Old Masters and the Stearns Collection of Japanese, Chinese, and East Indian Curiosities. The former contains a painting by Rubens (David and Abigail), pen-and-ink drawings by Raphael and Michael Angelo, and works ascribed to Lippi, Pinturicchio, Masaccio, Bellini, Da Vinci, Matsys, Titian, Del Sarto, Correggio, Carracci, Guido Reni, Cuyp, Rembrandt, Teniers, Murillo, Corn. de Vos, De Hoogh, etc.

At Nos. 1022-1056 Jefferson Ave., near Elmwood St., are the large Michigan Stove Works.

In Atwater St., near this point, is the huge Drug Manufactory of Messrs. Park, Davis, & Co.

About 3 M. from Woodward Ave. we reach the bridge crossing an arm of the river to *Belle Isle, which is about 700 acres in extent and forms a beautiful public park, with fine trees and still retaining many of its natural features unimpaired. In summer park carriages take visitors round for a small fee. Fine view of Lake St. Clair from its E. end. Ferries, see p. 299.

Among other points of interest in Detroit are *Elmwood Cemetery, in the E. part of the city, about 1/3 M. to the N.W. of Jefferson Ave.; and Fort Wayne, on the river, 31/2 M. to the S.W. of Woodward Ave. (tramway through Fort St.), garrisoned by a few companies of U.S. troops. — A new County Building is in course of erection on the block bounded by Congress, Fort, Brush, and Randolph Sts. — A wide Boulevard has been constructed round the entire city, beginning and ending at the river-front.

Among favourite resorts in the vicinity are Grosse Pointe, on Lake St. Clair, 9 M. to the E., with the country-houses of many of the citizens; St. Clair Flats, a frequented shooting and fishing resort, with its hotels and cottages built on piles; Windsor (p. 298); Mt. Clemens (p. 301); St. Clair Springs (Hotel Somerville, $21/2-5; Oakland Hotel, from $3); and Put-in-Bay Islands (p. 304).

From Detroit to Toledo, see p. 297.
FROM DETROIT TO LANSING AND GRAND RAPIDS. 153 M., railway (Detroit, Grand Rapids, & Western,) in 4-5 hrs. — 23 M. Plymouth. — 35 M. Lansing (Downey, § 2-3½; Hudson, § 2-2½), the capital of the State, is a manufacturing city of (1894) 15,847 inhab., on the Grand River. Adjoining the Capitol is a seminary of Gov. Austin Blair, erected in 1898. — 150 M. Grand Rapids (Morton Hr., § 2½-4; Livingston, § 2½-4½), a busy city of (1894) 79,435 inhab., with line water-power afforded by a fall of 15 feet on the Grand River (value of manufactures in 1890, $20,000,000).

FROM DETROIT TO PORT HURON, 59 M., railway in 1½/hr. — 22 M. Mt. Clemens (Avery, § 3-5; Egnew, Park, etc., § 2-4). — 59 M. Port Huron, see p. 304.

FROM DETROIT TO MACINNAC CITY (MacInnac Island), 290 M., railway in 4½hrs. — This railway traverses nearly the entire length of Michigan from S. to N., passing through one of the greatest 'lumbering' regions in America. 61 M. Lapeer; 87 M. Vassar, the junction of a line to (22 M.) Saginaw City (44,643 inhab. in 1894). — 108 M. Bay City (Fraser Hr., § 2½-3), situated near the point where the Saginaw empties into Saginaw Bay, with (1891) 30,042 inhab. and a large trade in timber, fish, and salt. — 142 M. Alger; 227 M. Gaylord. — 280 M. Mackinaw City (Wentworth, § 3), with (1894) 448 inhab., lies at the N. extremity of Michigan, on the Straits of Mackinac (4 M. wide), which connect Lake Michigan (p. 304) and Lake Huron (p. 304). Steamers run hence, in connection with the trains, to St. Ignace (p. 352), on the opposite side of the Straits, and to (8 M.) Mackinaw Island (see below), while others run to Sault Ste. Marie (p. 333), Manistique, etc.

MacInnac Island, a rocky and wooded little islet, 9 M. in circumference, contains a good deal of picturesque scenery in its narrow limits and has become a favourite place of summer-resort. Its fresh breezes, clear water, excellent fishing, and romantic legends are additional attractions. It is a military post of the United States and is reserved as a National Park. On the S. side of the island lies the picturesque village of MacInnac, with 750 inhabitants. On the cliff above it stands Fort MacInnac, and a little farther inland are the ruins of Fort Holmes (300 feet; Views), built by the British. The largest hotel on the island is the Grand Hotel (1800 beds; § 3-5), on a bluff near the village; and good accommodation may also be obtained at the Astor House ($2½-3), the Mission House (§ 3), the Murray (§ 2-3), the Island House (§ 3), the MacInnac (§ 2½-3), and other smaller inns and boarding-houses. Among the chief points of interest on the island are the Arch Rock, on the E. side, 150 ft. high; the Lover's Leap, 145 ft. high; Robertson's Folly, the Giant's Causeway, Sugar Loaf Rock, Scott's Cave, the British Landing (1812), etc. Excursions may be made to St. Ignace (p. 392), the Chenaux Islands, Bois Blanc Island, etc. A steamboat tour round the island should also be made. The island was frequently visited by the early French travellers and remained in possession of France from 1610 to 1761, when it was ceded to Great Britain. It came into the hands of the United States in 1796, was taken by the English in 1812, and was restored to the United States in 1815. The Astor House (see above) was the headquarters of the Astor Fur Co., founded by John Jacob Astor, in 1809-50. Comp. the 'Annals of Fort MacInnac', by D. H. Kelton, and 'Anne', by Constance Fenimore Woolson. — Mackinaw Island is also reached from Detroit by steamer.

Beyond Detroit the line runs almost due W., across the State of Michigan. 268½ M. Wayne Junction; 280½ M. Ypsilanti, a paper-making town of (1894) 6126 inhab., on the Huron River, which we now follow. — 288 M. Ann Arbor (770 ft.; American, § 2-3; New Arlington, § 2), a flourishing, tree-shaded city of (1894) 11,069 inhab., situated on both sides of the Huron River, is the seat of the University of Michigan.

This university, one of the most important educational institutes in the United States, is attended by about 3200 students, of whom 1/5 or 1/6 are women. It differs from the large Eastern universities in being a State
HAMILTON.  From Buffalo

302  Route 46.

It is richly endowed and has several fine buildings, good museums and laboratories, and a library of about 120,000 volumes.

327 M. Jackson (925 ft.; Hibbard, Ruhl, $2-3), an industrial town on the Grand River, with (1894) 22,615 inhab., is the junction of lines to Lansing (p. 301), Grand Rapids (p. 301), etc. Beyond (337 M.) Parma we follow the wheat-growing valley of the Kalamaoo River. 372 M. Battle Creek. 395 M. Kalamazoo (Burdick Ho., $2 1/2-3), an agricultural centre with (1894) 21,054 inhab. and a Baptist College (175 students), is the junction of lines to Grand Rapids (p. 301) and South Haven. — Our line now runs to the left (S.) to (443 M.) Niles, on the St. Joseph River (4508 inhab. in 1894).

— 469 M. New Buffalo. Lake Michigan now lies to the right. 479 M. Michigan City, with the state-prison for N. Indiana; 500 M. Lake; 515 M. Hammond; 522 M. Kensington; 530 M. Hyde Park.

536 M. Chicago (Illinois Central Station), see R. 48.

d. Via Grand Trunk Railway.

541 M. Railway in 15-18 hrs. (fares as above). This line passes through the peninsula part of the province of Ontario, one of the most fertile districts in Canada. — Hand-baggage examined in crossing the Niagara and St. Clair Rivers. — For fuller details, see Baedeker's Canada.

From Buffalo (p. 211) we proceed to (24 M.) Suspension Bridge either by the N. Y. C. & H. R. R. or the Erie R. R. Thence we cross the river by the new Single Arch Bridge (p. 223). From the Canadian village of (24 1/4 M.) Niagara Falls (Rail. Restaurant) the line runs almost due W. At (34 M.) Merriton we pass through a tunnel below the Welland Ship Canal (p. 298), the vessels in which may be seen sailing above our heads as we emerge. — 36 M. St. Catharine's (Welland, $2), a prettily situated town (9170 inhab.) on the Welland Canal, with mineral springs. Lake Ontario is now frequently in view to the right. 50 M. Grimsby Park, with a Methodist camp-meeting ground, lies in a district producing immense quantities of peaches and other fruit.

68 M. Hamilton (255 ft.; Royal, $2 1/2-4; Revere, St. Nicholas, $2; Rail. Restaurant), finely situated at the W. end of Lake Ontario, a busy industrial and commercial city of 50,348 inhab., is the junction of the railway to Toronto, which may also be reached by steamer. — 87 M. Harrisburg (736 ft.), the junction of various lines; 115 M. Woodstock (960 ft.). — 144 M. London (805 ft.; Tecumseh Ho., $2-3; Grigg Ho., $1 1/2-2; Rail. Restaurant), an important agricultural and railway centre, with 31,977 inhab. and a considerable trade. — 203 M. Sarnia (Bell Chamber, Vendome, $2), on Lake Huron, with 6693 inhabitants. We now pass from Canada to the United States (Michigan) by a *Tunnel, 1 1/6 M. long, under the St. Clair River.

This was constructed in 1889-90 at a cost, including approaches, of $2,700,000 (540,000 ft.). It consists of a cast-iron tube, with an inside diameter of 20 ft., and was designed by Mr. Joseph Hobson.

Central time is now the standard. 206 M. Port Huron (Harrington, $2-5; Huron Ho., $2-2 1/2; Rail. Restaurant), with (1894)
18,140 inhab., lies on Lake Huron, at the mouth of the Black River, and carries on a trade of considerable importance (lumber, fish, etc.). The train now runs to the S.W. through Michigan. 251 M. Lapeer (p. 301). From (288 M.) Durand (Rail. Restaurant) a line diverges to Grand Haven, on Lake Michigan, whence a steamer plies in connection with the trains to Milwaukee (p. 319). 320 M. Lansing (p. 301); 365 M. Battle Creek (p. 302; Rail. Restaurant); 396 M. Schoolcraft; 442 M. South Bend (p. 297); 485 M. Valparaiso (Rail. Restaurant); 521 M. Blue Island Junction.

541 M. Chicago (Dearborn Station), see R. 48.

d. By Steamer.

It is possible to go the whole way from Buffalo to Chicago by water, through Lakes Erie, Huron, and Michigan, with one change of steamer. — The ‘North West’ and ‘North Land’, the two magnificent steamers of the Northern Steamship Co. (each 386 ft. long, of 5000 tons burden, and accommodating 500 passengers), leave Buffalo (wharf at foot of Main St.) every Tues. and Frid. in summer at 9.15 p.m. (central time), reaching Mackinac Island in 1¼ days. Here passengers for Chicago change steamers, while the Buffalo boats go on to (1½ day) Duluth (comp. p. 339). Through-fares to Chicago: 1st class $1 15.50; 2nd class $10. The latter includes berths, but first-class passengers have to pay extra for berths (to Mackinac from $3 up). Meals are extra in each case; first-class passengers pay à la carte, second class, 35 c. per meal. Luggage up to 150 lbs. is free. Fares to Cleveland, $2.50; to Detroit, $4.25; to Mackinac Island, $8; $6.50; to Sault Ste. Marie, $9; $7; to Duluth, $16.50; $12.50. These steamers are admirably appointed in every way and afford most comfortable quarters. Gentlemen of modest requirements will find the second cabin very fair. The Northern S.S. Co. works in connection with the Great Northern Railway and offers a large choice of circular and other tours by land and water. — At Mackinac Island (see above) passengers for Chicago change to the steamer ‘Manitou’ (3000 tons) of the Lake Michigan and Lake Superior Transportation Co., which reaches the ‘Windy City’ in one day more (from Buffalo 2½ days; meals on Manitou $3 1/4-1, berth from $1). As the ‘Manitou’ does not call at Milwaukee, passengers for that city are sent on from Chicago by the Goodrich Line without extra charge.

The steamers of the Anchor Line leave Buffalo (Atlantic Dock, foot of Evans St.) at 2.30 p.m. every Thurs. and every alternate Mon. between May 1st and Nov. 1st for Duluth, which they reach in about 5 days (through-fare, including berth and meals, $25). They call at Erie, Cleveland, Detroit, Port Huron, Mackinac Island, Sault Ste. Marie, Marquette, Houghton, and Hancock. At Sault Ste. Marie they connect with steamers for Milwaukee and (1 day) Chicago (through-fare from Buffalo $19, incl. meals and berth). If the steamer ‘Manitou’ is taken at Mackinac Island the through-fare is $17, not including meals or berths between Mackinac and Chicago.

The whole journey is apt to be rather tedious, but the traveller who is wearied of railway-travelling may be glad to make part of the distance by water. Stop-over checks are given by the Purser to first-class passengers on application. Warm wraps should be taken even in midsummer.

Some idea of the commerce carried on by the Great Lakes may be gathered from the fact that they are regularly traversed by a fleet of 5000 vessels of 1½ million tons' burden and manned by 40,000 men (all this exclusive of fishing-smacks, etc.). New vessels are built annually with a burden of about 120,000 tons. Comp. pp. 295, 299.

Buffalo, see p. 211. The steamer plies to the W. through Lake Erie, a description of which has been given at p. 212. The following are the points usually called at by the steamers of the Anchor Line,
and ample time to go ashore is generally allowed (consult the captain). [The vessels of the Northern S.S. Co. touch at Cleveland and Detroit only before reaching Mackinac.]

80 M. Erie, see p. 294. The picturesque harbour is protected by Presque Isle. Hither Commodore Perry brought his prizes after defeating the English fleet in 1813. — Beyond Erie the steamer runs near the well-wooded shore. Ashtabula (p. 294) is seen about noon.

175 M. Cleveland (p. 294), one of the most beautiful cities on the great lakes, is seen to advantage from the steamer The Garfield Memorial (p. 296) is conspicuous as we approach. Several hours are usually spent here. — Then the coast becomes more picturesque. Sandusky (p. 296) is the chief place passed before we leave Lake Erie. The *Put-in-Bay Islands, near the mouth of the Detroit, are a favourite summer-resort (several hotels).

Detroit River, which we ascend on leaving Lake Erie, is 25 M. long and varies in width from 4 M. at its mouth to 1/2 M. opposite Detroit. It generally presents a very animated scene (comp. p. 299).

285 M. Detroit, see p. 298.

We now pass Belle Isle (p. 300) by the Canadian channel and soon enter Lake St. Clair (530 ft.), a shallow lake, 25 M. in diameter and about 20 ft. deep. The intricate navigation of the shallow upper end is avoided by a canal 11/2 M. long. The lake is connected with Lake Huron by the St. Clair River, a strait 40 M. long.

355 M. Port Huron, see p. 302. Opposite, on the Canadian shore, lies Sarnia (p. 302). We pass above the tunnel mentioned at p. 302. Between Fort Gratiot and Fort Edward, just above Port Huron, the strait narrows to 330 yds.

Lake Huron, which we now enter, is 250 M. long, 50-200 M. wide, 23,800 sq. M. in area, 580 ft. above the sea, and 300-1700 ft. deep. It contains about 3000 islands, and is often visited by violent storms. The steamer makes no stop before reaching —

620 M. Mackinac Island (p. 301), where passengers for Chicago change steamers (hotels, see p. 301). Those who wish to go on at once take the steamer 'Manitou', which makes close connection with the Buffalo boats; but there are several other steamers plying regularly between Mackinac Island and Chicago.

The steamer on which we have been travelling hitherto goes on through the beautiful St. Mary's River (61 M. long), connecting Lakes Huron and Superior, to (695 M.) Sault Ste. Marie (p. 333). Thence it traverses Lake Superior to (1065 M.; 3-5 days from Buffalo according to steamer) Duluth (p. 330) as described in the reverse direction in R. 53b.

The Chicago steamer passes through the Straits of Mackinac (p. 301), and enters Lake Michigan (590 ft. above the sea), the largest lake within the United States (360 M. long, 108 M. wide; greatest depth 900 ft.). Some of the steamers call en route at —

360 M. Milwaukee (see p. 319), about 16 hrs. from Mackinac, but the 'Manitou' (comp. p. 303) goes direct to Chicago. — 450 M. Chicago (see p. 308).
47. From New York to Chicago.

912 M. Pennsylvania Railroad in 24-33 hrs. (fare $24.25; continuous passage $20; sleeper $5). To the W. of Pittsburg we may go either via Crestline and Fort Wayne or via Columbus and Logansport (see R. 44). The Pennsylvania Limited Train on this route (fare $29, incl. sleeper), starting from New York at 10 a.m. and reaching Chicago at 9.45 a.m. (central time) next day, consists entirely of Pullman vestibuled cars and offers every imaginable comfort to the traveller. It is provided with a dining-car, a library, a smoking and outlook car, a barber's shop, a bath, a ladies' maid, and a stenographer. Through-cars on the other trains also.

The various sections composing this route have been already described. From New York to (90 M.) Philadelphia, see R. 31; from Philadelphia to (444 M.) Pittsburg, see R. 37; from Pittsburg to (912 M.) Chicago, see R. 44. The most beautiful part of the route is that between Philadelphia and Pittsburg, most of which is traversed by the Limited Train by daylight.

b. Via Buffalo and Detroit.

There are various combinations by which this route can be effected. Through-cars are run on the following: —

(b.) 956 M. West Shore Railroad to (429 M.) Buffalo and Wabash R. R. thence to (956 M.) Chicago in 27 1/2-35 hrs. (fare $18; sleeper $5). Between Suspension Bridge and Windsor (see below) the line is operated jointly by the Grand Trunk and Wabash Railroads.

(a.) From New York to (440 M.) Buffalo, see R. 28 a; from Buffalo to (976 M.) Chicago, see R. 46 c. This line affords a good view of Niagara Falls (see p. 298).

c. Via Buffalo and Port Huron.

982 M. Lehigh Valley Railroad to (463 M.) Suspension Bridge and Grand Trunk Railway thence to (982 M.) Chicago in 26-33 1/2 hrs. (fare $18, sleeper $5).

From New York to (463 M.) Suspension Bridge, see R. 28 e; from Suspension Bridge to (982 M.) Chicago, see R. 46 d.

Baedeker's United States. 2nd Edit.
d. Via Buffalo and Cleveland.

(a.) 980 M. New York Central Railroad to (440 M.) Buffalo and Lake Shore & Michigan Southern R. R. thence to (950 M.) Chicago in 24-34 hrs. (fare $20; sleeper $5). The Vestibule Limited Train (comp. p. 305) on this route leaves New York at 5 p.m.

(b.) 952 M. West Shore Railroad to (429 M.) Buffalo and New York, Chicago, & St. Louis Railroad thence to (952 M.) Chicago in 27-36 hrs. (fare $18; sleeper $5).

(c.) 933 M. Delaware, Lackawanna, & Western Railroad to (410 M.) Buffalo and New York, Chicago, & St. Louis Railroad thence to (933 M.) Chicago in 27-35 hrs. (fare $18; sleeper $5).

(a.) From New York to (440 M.) Buffalo, see R. 28a; thence to (980 M.) Chicago, see R. 46a. This line runs along the S. shore of Lake Erie.

(b.) From New York to (429 M.) Buffalo, see R. 28c; from Buffalo to (952 M.) Chicago, see R. 46b.

(c.) From New York to (410 M.) Buffalo, see R. 28b; from Buffalo to (933 M.) Chicago, see R. 46b.

e. Via Oswego and Suspension Bridge.

978 M. New York, Ontario, & Western Railway to (325 M.) Oswego in 10 hrs.; Rome, Watertown, & Ogdensburg R. R. thence to (476 M.) Suspension Bridge in 41/4 hrs.; Wabash R. R. thence to (979 M.) Chicago in 13 hrs. (in all, 28 hrs.; fare $18, sleeper $5, reclining chair car free). — The trains start from the West Shore Station at Weehawken (p. 6; ferries from Franklin St. and W. 42nd St.).

Weehawken, see p. 56. As far as (52 M.) Cornwall the route coincides with that of the West Shore R. R. (R. 21c). Our line then diverges to the left (N.W.). 68 M. Campbell Hall, the junction of the Phil’a, Reading, & New England R. R. (p. 167) and of a line to Kingston (p. 169). Beyond (78 M.) Middletown (p. 217) the country is hilly and picturesque. 93 M. Summitville. We now skirt the S.W. side of the Catskills (p. 176). 118 1/2 M. Liberty, with the well-known Loomis Sanitarium, for cases of incipient consumption. From (160 M.) Cadosia a branch-line runs to (54 M.) Scranton (p. 216). 179 1/2 M. Walton, for Delhi; 203 M. New Berlin Junction, for Edmeston; 244 M. Randallville, junction of a branch to (32 M.) Utica (p. 206). At (267 M.) Oneida (p. 214) we intersect the West Shore R. R., and at (298 M.) Central Square we cross the R. W. & O. R. R. (see below).

325 M. Oswego (Doolittle Ho., $2-3) is a busy flour-making city and port, with 21,826 inhab., on the shore of Lake Ontario (p. 302).

f. Via Salamanca and Marion.

998 M. Erie Railroad in 27-36 hrs. (fare $18, sleeper $5). The solid through-train leaves New York at 2 p.m.

From New York to (332 M.) Hornellsville (1160 ft.), see R. 28 d. Our line here diverges to the left from the line to Buffalo (see p. 218). Beyond Hornellsville we traverse a farming district. 359 M. Wells-ville (1525 ft.). At (384 M.) Cuba (1700 ft.) we pass the culminating point of the route and begin to descend. From (396 M.) Olean (1440 ft.) to Buffalo, see p. 253. 408 M. Carrolton (1400 ft.).

414 M. Salamanca (185 ft.; Keating, Dudley, $2), with 3692 inhab., is the junction of a line to (43 M.) Dunkirk (p. 294). Central time here becomes the standard. — 443 M. Jamestown (1320 ft.; Sherman Ho., Humphrey Ho., $2–3), a city of 16,038 inhab., near the S. outlet of Lake Chautauqua (see below), and (453 M.) Lakewood (Kent, Waldmere, $4), at the S. end of the lake, are frequented as summer-resorts.

"Lake Chautauqua (1290 ft. above the sea; 725 ft. above Lake Erie), 18 M. long and 2 M. wide, is only 8 M. from Lake Erie but empties its waters into the Atlantic through the Conewango, Allegheny, Ohio, and Mississippi. It is surrounded by low hills. Steamers ply regularly from Jamestown and Lakewood to Mayville (p. 267), Chautauqua (see below), and Point Chautauqua (Grand Hotel, § 3-3½).

Chautauqua (Hotel Athenaeum, 500 beds, $2½–$4; numerous small hotels and boarding-houses), a pretty little place on the W. bank of the lake, is famous as the summer meeting-place (July & Aug.) of the Chautauqua Assembly, a huge system of home-reading circles and correspondence classes, which has spread all over the United States since its foundation by Bishop Vincent in 1878. It has had about 200,000 members. The National Home Reading Union of England has been founded on the same model. The public buildings of Chautauqua include assembly-halls, lecture-rooms, club-houses, a museum, a gymnasium, and a model of Palestine, 300 ft. long. The Summer School has classes in language, literature, science, art, and music, taught by upwards of 50 instructors from various American colleges and universities. A so-called 'Citizen Tax' is levied on all frequenters of the Chautauqua Summer Assembly (above twelve years of age): 40c. per day, $1½ per week, $5 per season. The tuition fees are $5 for one department, $10 for two or more. The official address of the Assembly is P. O. Drawer 194, Buffalo. — The Jamestown & Lake Erie R. R. runs from Jamestown to Chautauqua and Mayville (comp. p. 267).

About 15 M. beyond Jamestown we enter Pennsylvania. Beyond (474 M.) Corry (1430 ft.; p. 254) we descend the valley of French Creek, passing several important petroleum-wells. 516 M. Meadville (1080 ft.; 9520 inhab.) is the junction of a line to (36 M.) Oil City (p. 267). Near (555 M.) Orangeville we enter Ohio. 572 M. Youngstown, the junction of a line to Pittsburg (p. 263); 589 M. Lewittsburg (890 ft.), the junction of a line to (49 M.) Cleveland (p. 294); 610 M. Ravenna, an agricultural and industrial town, with 3417 inhab.; 627 M. Akron (1005 ft.), a flour and woollen making city of 27,601 inhabitants. At (693 M.) Mansfield (1155 ft.; see p. 290) we intersect the Pennsylvania and B. & O. railroads. 729 M. Marion (960 ft.) is the junction for (84 M.) Dayton (p. 343) and (143 M.) Cincinnati (p. 344). 781 M. Lima; 825 M. Decatur; 856 M. Hun-
tington; 913 M. Monterey; 978 M. Hammond; 992 M. Englewood.
998 M. Chicago (Dearborn Station), see below.

g. Via Baltimore and Washington.

1048 M. Baltimore & Ohio Railroad in 31-33 hrs. (fare $18; sleeper $5). The Vestibule Limited Train (extra fare) leaves New York at 2 p.m. and arrives in Chicago at 9 p.m. on the following day.

From New York to (90 M.) Philadelphia, see R. 31b; from Philadelphia to (186 M.) Baltimore, see R. 40; from Baltimore to (226 M.) Washington, see R. 42; from Washington to (1048 M.) Chicago (Grand Central Station), see R. 45.

48. Chicago.

Plans. In the subjoined General Plan of Chicago (scale 1:100,000), referred to as Gen. Pl., clearness is aimed at by the omission of some of the streets. The important central section of the city is also given in a Special Plan (1:28,500), referred to in the text as Pl.

Hotels. “Auditorium (Pl. a; C, 3), a large building in Michigan Ave., facing the lake, with a very elaborate interior, $3 1/2-5, R. $2-4; opposite

D, 1, 2), with a fine view of Lincoln Park and the Lake; Victoria (Pl. j; C, 3), Michigan Ave., $3-5; Leland (Pl. k; C, 3), Michigan Ave., $3-5; Sherman (Pl. 1; B, 2), cor. Randolph & Clark Sts., $3-6, R. $1-4; Tremont (Pl. m; C, 2), Lake St., $3 1/2; McCoy's (Pl. n; B, 3), Gore's, Clark St. (Nos. 278, 280), R. from $1; Briggs House, cor. of Fifth Ave. and Randolph St., R. from $1; Clifton (Pl. 0; C, 3), cor. of Monroe St. and Wabash Ave., $2-3; Gaulet (Pl. p; A, 2), W. Madison St., $2-2 1/2; Windsor (Pl. q; C, 3), 145 Dearborn St., R. from 75c. — Board may easily be obtained in any part of the town from $5 to $15 per week.

Restaurants. *Richelieu Hotel, see above, high charges; *Kinsley, 105 Adams St.; Auditorium, see p. 308; Rector, cor. of Monroe St. and Clark St. and 31 Adams St.; McCoy, see above; Mangler, 119 La Salle St.; Boston Oyster House, 112 Madison St.; Lakeside, Adams St., cor. of Clark St.; McKiernan's Coffee House, 99 West Madison St. (cheap); Gunther's Luncheon Room, 212 State St., for ladies; Kohlsaat's Luncheon Rooms, 196 Clark St., 69 Washington St., etc.; John R. Thompson's Restaurants, 355 and 397 State St., 169 Adams St., etc.; Burke, 140 Madison St.; Henrici, 105 Randolph St.; Café Berlin, 76 State St.; Seaver, 56 State St.; also at most of the other hotels and at Marshall Field's, The Fair, and other large dry-goods stores. — For men: *Schloeg, Fifth Ave., between Madison St. and Washington St.; *Schimperman, 172 Madison St. — Beer Saloons: Lentz, Stein, Kreischmar, N. Clark St. (Nos. 21, 649, 625); Meyer, cor. Madison and Dearborn Sts. — Wine Rooms: Jansen, 163 Washington St.; Wilken, 49 La Salle St. (California wines); Faulhaber, 75 Fifth Ave. and 526 N. Clark St.

Elevated Railroads (similar to those of New York, p. 10; uniform fare 5c.). 1. Chicago & South Side Rapid Transit (steam) to Jackson Park. — 2. Metropolitan West Side (electric) along W. Van Buren St. and Harrison St. to 48th St., with branches to the N. and S. — 3. Lake Street (electric) along Lake St. to 52nd St. — In the 'Down Town District' the three companies use a common track, known as the Union Loop, running along Wabash Ave. from Van Buren St. to Lake St., along Lake St. to Fifth Ave., along Fifth Ave. to Van Buren St., and so back to its starting-point.

Tramways (cable and electric) traverse the chief streets and run to suburban points (fare 5c.). Cars stop at the farther street-crossings or at other places indicated by signs. There are now between 250 and 300 M. of electric railway in Chicago. Lines of 'Carettes' (5c.) also traverse various streets. — Parmelee's Omnibuses run between the hotels and railway-stations (50 c.).

Cabs. With one horse: 1-2 pers. per mile 50c.; per hr., 1-2 pers. 75c., each addit. 1/4 hr. 20c., in the parks and beyond the city limits $1 and 25c.; each trunk carried outside 10c. With two horses (Hack:): 1-2 pers. 1 M. $1, 2 M. $1 1/4, each addit. pers. 50c., per hr. $2, each addit. hr. $1, per day $3; ordinary baggage free. Each vehicle is bound to exhibit a tariff inside, but it is well to come to a clear understanding beforehand.

Steamers ply from Chicago to all points on the Great Lakes and (in summer) to points on the St. Lawrence River. Among the chief lines are the Goodrich, the Scymour, the Lake Michigan & Lake Superior Transporta-
tion Co., and the Graham & Morton Transportation Co. Steamers to Milwaukee (p. 319) run 2-3 times daily (steamer 'Virginia' of the Goodrich Line and the whaleback 'Christopher Columbus' the best). Small steamers ply at frequent intervals (esp. on Sun. and holidays) to Jackson and Lincoln Parks (pp. 318, 319), to St. Joe (Mich.), and other near points. The steamboat wharves are mainly along the river, within ½ M. of its mouth.

Theatres and Places of Amusement. Auditorium Theatre (Pl. a; C 3), Congress St. (comp. p. 312), splendidly fitted up and accommodating 4,000 people; Schiller Theatre (Pl. 14; C 2), Randolph St., built by Sullivan, the architect of the Auditorium; Chicago Opera House (Pl. 6; B 2), 118 Washington St.; Columbia (Pl. 5; B C 5), Monroe St.; McVicker's Theatre (Pl. 15; C 2), Madison St.; Hooley's Theatre (Pl. 17; B 2), Randolph St.; Haymarket, West Madison St.; Grand Opera House (Pl. 15; B C 2), Clark St.; Alhambra, State St.; Great Northern Theatre (Pl. e; C 3), Jackson St., near Dearborn St.; Havlin's, Wabash Ave.; Jacobs' Academy of Music, South Halsted St.; Timmerman Opera House, in Englewood (S. Side); Criterion, Sedgwick St., N. Side. — Central Music Hall (Pl. 3; C 2), cor. State and Randolph Sts. — Tattersall's, cor. of Dearborn and 16th Sts., for popular amusements of various kinds. — Winter Circus, Wabash Ave., cor. of Hubbard Court. — The °Concerts of Thomas's Orchestra are held in the Auditorium (p. 312).

Post Office, temporarily at the N. end of Lake Park (Pl. C 2; new post-office, see p. 314), general delivery open day and night, on Sun. 11.30-12.30. There are also 15 branch-offices, 58 sub-stations, and innumerable letter-boxes.

British Consul, Capt. Wm. Wyndham, 630 Pullman Buildings.

Tourist Agents. Raymond & Whitcomb, 95 Adams St.; Thos. Cook & Son, 234 South Clark St.; Henry Gaze & Sons, 220 South Clark St.

Chicago (pron. Shikáhgo; 590 ft. above the sea, 15-75 ft. above the lake), the second city and largest railway-centre of the United States, is situated on the W. shore of Lake Michigan (p. 304), at the mouths of the rivers Chicago and Calumet. It is 350 M. from Baltimore, the nearest point on the Atlantic, and 2445 M. from San Francisco. It covers an area of 187 sq. M., and in 1896 was estimated to contain 1,750,000 inhabitants. The city has a water-front on the lake of 26 M. and is divided by the Chicago River and its branches into three portions, known as the North, South, and West Sides. The site of the city is remarkably level, rising very slightly from the lake; and its streets are usually wide and straight. Among the chief business-thoroughfares are State, Clark, Madison, Dearborn, and La Salle Streets, and Wabash Avenue. Perhaps the finest residence streets are Michigan Avenue and Drexel and Grand Boulevards, on the S. side, and Lake Shore Drive, on the N. side. It is estimated that not more than 335,000 of the inhabitants are native Americans; more than 460,000 are Germans, 245,000 are Irish, 180,000 Scandinavians, 90,000 Poles, 90,000 Bohemians, 145,000 Italians, 35,000 Canadians, and 190,000 English and Scottish.

History. The growth of Chicago has been phenomenal even among American cities. The river Chicago (the Indian Checagou, meaning 'wild onion' and 'pole-cat') was, indeed, visited by the Frenchmen Joliet and Marquette in 1673, but it was not until 1804 that the United States Government erected Fort Dearborn, the first permanent settlement in the swamp that was afterwards Chicago. The garrison of the fort was massacred by Indians in 1812, but the fort was rebuilt and re-occupied two years later. In 1831 the little village contained about 103 inhab. and in 1837 it had
attained to the dignity of an incorporated city and a population of 4,170. In 1850 its population had increased to 29,963, and its commercial enterprise had begun to attract attention. A signal instance of the energy of the citizens was given in 1855, when the level of the entire city was raised 7 ft., huge buildings being elevated bodily without interruption to business. By 1860 its population was almost quadrupled (100,206), while its trade in bread-stuffs had increased tenfold. By 1870 Chicago contained 306,600 inhab., and had become one of the leading commercial centres of the New World. In 1871 (Oct. 8-10th) the flourishing city was the scene of a terrible conflagration, which originated in the W. side (at No. 137 De Koven St.; Pl. A, 5), crossed to the N. of the river, swept over an area of 3½ sq. M., destroyed 17,500 buildings and property to the value of nearly $200,000,000 (40,000,000£), and left 100,000 people homeless. About 200 people perished in the flames. The recovery from this disaster was rapid and complete; and in a few years the only trace of it was the improved character of the streets and buildings. The fire found Chicago of wood and left it of brick and stone. In 1880 the population was 509,185, in 1890 it was 1,093,850. — Great injustice is done to Chicago by those who represent it as wholly given over to the worship of Mammon, as it compares favourably with many American cities in the efforts it has made to beautify itself by the creation of parks and boulevards and in its encouragement of education and the liberal arts (comp. pp. 312, 313, 315, etc.). No other one event has stimulated its higher activities so much as the holding within its borders in 1893 of the World's Columbian Exhibition, celebrating the one-hundredth anniversary of the discovery of America by Columbus. — Chicago has long been the favourite meeting-place of the conventions held by the great political parties to nominate candidates for the office of President. Lincoln (1860), Grant (1868), Garfield (1880), Cleveland (1884 and 1888), and Harrison (1889) were all nominated here.

Commerce and Industry. The trade of Chicago is second to that of New York alone among American cities, and in 1896 amounted in value to 1,220 million dollars (26½ millions sterling). The staples are grain (250 million bushels yearly), lumber, live-stock, and packed meat, in which branches it is the largest market in the world. The value of its manufactures in 1896 was $483,000,000 (£69,600,000), including iron and steel wares, agricultural implements, railway-cars, textiles, leather, beer, spirits, chemicals, etc. In 1897 the number of vessels entering and clearing Chicago Harbour was 13,357. — Among the leading industrial establishments may be mentioned the Illinois Steel Co., which has three plants in different parts of the city (including the largest rolling mills in the world at South Chicago, covering 3¾ acres), has a capital of $35,000,000 (£7,000,000), and employs 10,000 men; the McCormick Harvesting Machine Co., in the S.W. part of the city, employing 3000 hands and producing 150,000 machines annually; the William Doering & Co.'s works in the N.W. part of the city (Gen. Pl. C, 1), occupying 60 acres of ground and employing 3500 men in the production of binder twine and harvesting machinery; the Grant Locomotive Works, just to the W. of the city; and the Chicago Cold Storage Exchange. Comp. also p. 318.

Architecture. Chicago has become identified with the erection of enormously tall office-buildings, the upper stories of which are made accessible by rapid-running elevators. The architectural beauty of these is often questionable, but no one can fail to admire the wonderful skill of their architectural engineering. These 'sky-scrappers' are now erected on the 'steel-frame system', the walls affording no support to the edifice but merely forming a kind of veneer to the actual structural frame. The interiors are often admirably fitted up and adorned (comp. p. xci). A municipal ordinance now limits the height of buildings to 150 ft. — Engineers will also be interested in the Waddell Lift Bridge, over the S. branch of the Chicago River, at S. Halstead St., near 22nd St. (Gen. Pl. D, 4), which can be lifted, by means of pulleys and counter-weights, to a height of 15 ft. above the channel. It is not considered by any means so successful as the rolling lift or bascule bridges in other parts of the city.
The visitor to Chicago cannot, perhaps, better begin his examination of the city than by ascending to the top of the Tower (270 ft. high; adm. 25 c.) of the *Auditorium (Pl. a; C, 3), which affords a splendid view. This huge building, erected by Sullivan in 1887-89 at a cost of $3,500,000, includes a large hotel (p. 308) and one of the handsomest theatres in the world (p. 310; 5000 seats). The tower is occupied by a U. S. Signal Service Station. The longest front of the building, towards Congress St., is 360 ft. — The Studebaker Building (Pl. 33; C, 3), adjoining the Auditorium, is one of the show buildings of Chicago, but, though in several respects not unworthy of its situation, it is too palatial in character to fairly represent the severity of this city’s commercial architecture (Schuyler). — The beautiful Romanesque building to the N. of the last is the Chicago Club (Pl. 5; C, 3).

All these buildings face upon Michigan Avenue and the Lake Park (Pl. C, 2, 5), the latter consisting of a public pleasure-ground abutting on Lake Michigan. It has been greatly improved of late by the depression of the tracks of the Illinois Central Railway and by the construction of massive stone viaducts connecting the park proper with the lake shore. In the Lake Park, a little to the S. of the Auditorium and opposite Eldredge Place, is an *Equestrian Statue of Gen. John A. Logan (1824-86; Pl. C, 4), in bronze, by St. Gaudens, erected in 1897 at a cost of $80,000 (16,000 f.). The general, whose remains lie in a crypt below the monument, is represented as rallying his troops before Atlanta. — A little farther to the S. is the *Illinois Central Station (Pl. C, 5), an admirable and commodious railway terminal building.

Following Michigan Ave. towards the N. from the Auditorium, we soon reach (right) the *Chicago Art Institute (Pl. 1 a; C, 3), an imposing building in the Greek style, erected from the plans of Chas. A. Coolidge in 1892-93. Its contents are of considerable value, and were much increased in importance in 1898 by the bequest of the Munger collection of pictures. All the objects are provided with explanatory labels. The collections are open daily, 9-5 (Sun., 1-5); adm. 25 c., free on Wed., Sat., and Sunday. Director, W. M. R. French. Catalogue 25 c.

The Ground Floor is devoted to school-rooms, clubs, and work-rooms. — On the First Floor are the lecture-room, library, and sculptures. — Rooms 1-6, 8, and 10 contain the Eldridge Hall Collection of Casts of Ancient and Modern Sculpture. There are also a few original modern works in RR. 8-10. — Rooms 11-14. Casts of French Architectural Sculptures.

On the Second Floor are paintings, antiquities, textiles, and metals. — Room 38. Field Memorial Collection of Paintings, with specimens of Millet, Troyon, Corot, Cézanne, Breton, Degas, Constable, and other modern masters. — Room 39. Hanford Collection, with paintings by Van Marcke, Breton, Munkacsy, Brozk, and De Neuvil. — Rooms 40 & 41. Munger Collection, with paintings by Meissonier, Gérôme, Courbet, Rosa Bonheur, Michetti, Isabey, Makart, Koekkoek, and Fiac. — Room 42 contains the most valuable works in the Institute, including examples of Rembrandt, Frans Hals,
Rubens, Van Dyck, Van Ostade, Jan Steen, Terburg, Murillo, Van de Velde, and Hobbema. Thirteen of the most important works in this room were bought in 1891 from the famous Demidoff Collection at Florence. — Room 43. American paintings by Donnat, Chase, Nourse, Hitchcock, Grayson, Inness, and others. — Room 32 contains a small but good collection of scarabæi, beads, and other Egyptian antiquities, and also Greek vases, glass, and marbles. — Room 31. Reproductions of bronzes at Naples. — Room 30. Tapestry, embroidery, and textiles. — Rooms 25-29 are occupied by temporary exhibitions, varied from time to time.

Farther to the N., on the opposite side of Michigan Ave., is the *Chicago Public Library (Pl. C, 2), an imposing building in a classical style, designed by Shepley, Rutan, & Coolidge, and erected in 1893-97 at a cost of $2,000,000. This fine edifice is worthy to rank with the Congressional Library (p. 279) and the Boston Public Library (p. 89). The main entrances are to the N. and S., in Randolph St. and Washington St. The interior is sumptuously adorned with marble, mosaics, frescoes, and mottoes. It contains 225,000 vols., but has room for 600,000, capable of extension so as to accommodate 2,000,000. On the first floor (N. end) is a large Memorial Hall, used by the Grand Army of the Republic and covered by a dome.

On the N., Michigan Ave. ends at the Chicago River. Fort Dearborn (p. 310) stood to the left, on the river, at the end of the avenue (tablet at the corner of River St.).

The Chicago River, a narrow and uninviting looking stream, has a frontage within the city of nearly 60 M., of which one-third are navigable. The river is crossed by numerous bridges and undermined by three tunnels, traversed by tramway-lines. As Chicago derives its drinking-water from Lake Michigan (see p. 315), the disposal of the river-drainage was long a serious problem, until solved by the construction of the *Drainage Canal, the greatest feat of sanitary engineering in the world. This canal, completed in 1898 at a cost of $27,000,000, begins at the S. branch of the Chicago River in Robey St. and extends to (28 M.) Lockport (p. 338), where it discharges the sewage of Chicago into the Desplaines River and so ultimately into the Illinois River, a tributary of the Mississippi. This enormous sewer reverses the natural course of the river, and is flushed by about 300,000 cubic feet of water per minute drawn from Lake Michigan. The canal is also to be used by shipping. — The Harbour is 16 ft. deep and has an area of about 650 acres; and there is also an external breakwater, 1 M. long, to shelter the mouth of the river.

To see something of the business-quarters of Chicago and the lofty office-buildings for which it is famous, we may now follow Randolph St. (see Pl. A-C, 2) to the W. to the City Hall and County Court House (Pl. B, 2), a huge twin-building occupying an entire square and erected at a cost of nearly $5,000,000. On the ground-floor of the City Hall (N.) are the headquarters of the *Fire Department (1100 men) and of the Police Force (3200 men). — Adjacent to the City Hall is the Drake Fountain, with a statue of Columbus.

About ½ M. to the N. of the City Hall, in Dearborn Ave., between Michigan St. and Illinois St., stands the Criminal Court and County Jail (Pl. C 1), a huge and gloomy structure erected in 1896.

La Salle Street (Pl. B, 1-3), leading to the S. from the Court House, contains some of the finest office-buildings in the city.
Among these are the *Chamber of Commerce (Pl. 4, B2; 14 stories), at the corner of Washington St. (left); the Chicago Stock Exchange, opposite (13 stories; right); the Tacoma Building (Pl. 34, B2; 13 stories), at the corner of Madison St. (left); the Y. M. C. A. Building (13 stories), a little farther to the S. (left); the oddly shaped Women's Temperance Temple (Pl. 37, B 3; 13 stories), at the corner of Monroe St. (right); the New York Life Insurance Building (12 stories), diagonally opposite the last (left); the Home Insurance Co. Building (Pl. 16, B 3; 11 stories); and the *Rookery (Pl. 31, B 3; 10 stories), the last two at the corner of Adams St. (left). The *Interior (600 rooms) of the last, lined with white marble, is worth inspecting, and visitors should ascend by one of the 'express' elevators to the rotunda at the top. To the right, between Quincy St. and Jackson St., is the Illinois Trust & Savings Bank (Pl. 10; B, 3), a massive two-storied edifice, with huge pillars on the La Salle front and a fine central court (worth visiting). Below are the safety deposit vaults. At the end of La Salle St. stands the Board of Trade (Pl. 2, B, 3; *View from the tower. 322 ft. high. Visitors are admitted to the gallery (business-hours, 9.30-1.15), and the scene on the floor is, perhaps, even wilder than that in the New York Stock Exchange (p. 27).

Jackson Street (Pl. B, C, 3) leads hence to the E. to the new Federal Building, now being constructed for the Custom House & Post Office (Pl. B, C, 3), which will occupy an entire block and is to be finished in 1900 (temporary post-office at the N. end of Lake Park; Pl. C, 2). Its foundations consist of huge columns of iron and cement, resting on the bed rock. Close by are five very large buildings (16 stories): the Great Northern Hotel (Pl. e, C 3; Dearborn St.), the Fair Building (Pl. 12, C 3; cor. of Dearborn St. and Adams St.), the Manhattan (Pl. 19, C 3 4; Dearborn St.), the Monon (Pl. 24, C 3; Dearborn St.), and the Monadnock (Pl. 23, C 3; Jackson St.). Adjoining the last is the Union League Club (Pl. 35; B, C, 3).

Dearborn Street (Pl. C, 3, 4), leading hence to the S., is also lined with 'sky-scrappers'. To the right, at the corner of Van Buren St., is the Fisher Building (18 stories), and opposite is the Old Colony Building (16 stories).

We may now follow Van Buren Street (Pl. B, C, 3) to the E. (left) to State Street (Pl. C, 1-6), at its intersection with which are the large 'department stores' of Siegel & Cooper (Pl. 11; C, 3) and A. M. Rothschild (Pl. 27; C, 3). Following State St. to the left (N.), we pass the Columbus Memorial Building (Pl. 9, C 2; 14 stories), at the corner of Washington St. (right), occupied almost entirely by physicians; Marshall Field's Store (Pl. 20; C, 2), the Whiteley's of Chicago, at the opposite corner of Washington St. (r.); and the enormously tall Masonic Temple (Pl. 22, C 2; 21 stories), at the corner of Randolph St. (r.; view from top, 25 c.).

Among other buildings of interest in this Business Quarter are the Unity Building (Pl. 36, C 2; 18 stories), Dearborn St., near Randolph St;
the Rand-McNally Building, in Adams St., near La Salle St., one of the largest and finest publishing and printing houses in the world (700 hands; built almost entirely of steel); the General Offices of the Chicago, Burlington, & Quincy Railroad (Pl. 7; B, 3), Adams St., cor. Franklin St.; the Wholesale Establishment of Marshall Field & Co. (Pl. 21; B, 3), Adams St., designed by H. H. Richardson (one of the most individual examples of American commercial building; in it 'the vulgarity of the commercial palace is gratefully conspicuous by its absence, and it is as monumental in its massiveness and durability as it is grimly utilitarian in expression'); the Royal Insurance Co. (Pl. 32; B, 3), Jackson St., nearly opposite the Board of Trade; the First National Bank (Pl. 13; C, 3), at the cor. of Dearborn & Monroe Sts.; the Pullman Building (Pl. 30; C, 3), cor. of Michigan Ave. and Adams St.; the Ashland Block (Pl. 1, B 2; 16 stories); the Schiller Building (German Theatre; Pl. 14, C 2); the Chicago Opera House (Pl. 8; B, 2); the Grand Opera House (Pl. 15; B, 2); the Phoenix Building (Pl. 28; B, 3), 128-150 Jackson St., by Burnham & Root, with a fine 'Entrance; the American Express Building, by Richardson, in Dearborn St. (E side), between Adams St. and Monroe St. (Pl. C, 3); the Marquette Building, cor. of Dearborn and Adams Sts.; the Cook County Abstract, 100 Washington Street; the Trade Building, S.W. cor. of Randolph St. and Wabash Ave.; the Champlain, N.W. cor. State and Madison Sts.; the Reliance, S.W. cor. State and Washington Sts. (the last two mainly occupied by physicians); and the Owings Building, 213 Dearborn St.

The *Public Parks of Chicago, with a total extent of 2230 acres, form, with their connecting boulevards, a nearly complete chain round the city, and afford 66 M. of driveways within the city limits. — On the N. side is Lincoln Park (see below), reached by tramways on N. Wells, N. Clark, and N. State Streets. On the way to it walkers or drivers should pass the Water Works (Gen. Pl. E, 2), near the foot of Chicago Ave., the tower of which, 175 ft. high, commands an extensive view.

The water-supply of Chicago, amounting to 250 million gallons daily, is derived from Lake Michigan by means of four systems of tunnels communicating with 'Crisps', situated 2-4 M. from the shore. Throughout the city are eight principal pumping stations and an intricate system of land tunnels, connecting with those in the lake. In all there are now 22 M. of tunnel and 1700 M. of mains in use.

A little fartheron begins the *Lake Shore Drive (Gen. Pl. E, 2), one of the finest residence-streets in Chicago, containing some very handsome houses, including specimens of H. H. Richardson (not in his happiest manner) and R. M. Hunt (next door). On the N. it ends at *Lincoln Park (Gen. Pl. D, 1; 300 acres).

Among the attractions of this park are the conservatories, palm-house, lily-ponds, and flower-beds; a small zoological collection; a fountain illuminated at night by electric light; the statues of Lincoln (by St. Gaudens), Grant (by Heibisso), Schiller, La Salle, and Linnecus; and the boating lake. Near the main entrance is the Academy of Sciences, containing curiosities of natural history and the offices of the Park Commissioners. Park-phaetons 20 c. per drive.

A new *Breakwater Carriage Drive has been constructed in the lake alongside of Lincoln Park, whence it is prolonged by the Sheridan Boulevard to Fort Sheridan (27 M.). The strip of water between this drive and the park is used as a regatta-course for small boats. The E. lagoon is crossed by a huge bridge. — Graceland and Rosehill Cemeteries, also in the N. Side, deserve a visit.

The S. Side parks are also fine. They may be reached by the
Illinois Central R. R., by the South Side Elevated R. R., or by the Cottage Grove Ave. cable-line; but the best plan is to drive through *Michigan Boulevard (Gen. Pl. E, 4, 5) and *Drexel Boulevard (Gen. Pl. E, 6), two fine residence-streets, with tasteful houses and ornamental gardens. Michigan Boulevard also contains several churches, the Calumet Club (cor. 20th St.), numerous large hotels and apartment houses, and the First Regiment Armoury (cor. 16th St.; entrance wide enough for a whole company to march abreast). In Drexel Boulevard is the handsome Drexel Memorial Fountain. We may return by *Grand Boulevard (Gen. Pl. E, 6).

*Prairie Avenue (Gen. Pl. E, 4-7) contains the residences of P. D. Armour, Marshall Field, the late George M. Pullman (d. 1897), and others of Chicago's magnates; but few of them are of architectural importance.

*Washington Park (Gen. Pl. E, 7; 371 acres) and *Jackson Park (Gen. Pl. F, 7, 8; 523 acres) are connected by a wide boulevard known as the Midway Plaisance (Gen. Pl. E, F, 7; park-phaetons, 25 c. each pers., children 15 c.).

Washington Park is notable for its fine trees, its flower gardening, its large circular stable, and its conservatory. — Jackson Park was the main site of the World's Columbian Exposition of 1893 (comp. p. 311), but nearly all the buildings have been removed, and the grounds have been laid out in public playing fields, drives, beaches, and groves. Pier have been constructed for the use of pleasure-boats in the lake, and bathing houses, gymnasium, and a casino have been erected. Bridges have been thrown across several arms of the picturesque lagoons (electric launches, etc.), and the Japanese Temple on Oak Island remains as a memorial of the World's Fair. The reproduction of the Convent of La Rabida has also been left standing as a sanitarium for mothers and children. At the N. end of the park is the *Field Columbian Museum, formed at the expense of Mr. Marshall Field out of the Art Building of the Exhibition and containing natural history, anthropological, and other collections.

The W. Side parks: Douglas Park (Gen. Pl. B, 4; 180 acres), Garfield Park (Gen. Pl. A, 3; 186 acres), and Humboldt Park (Gen. Pl. B, 2; 200 acres) are little inferior to those of the N. and S. Sides. The first has a good natatorium, while Garfield Park has an elaborate band-stand, a bicycle-track, a conservatory, and a boat-house.

Some of the most prominent educational, scientific, and charitable institutions, of which Chicago is justly proud, are noted below. The University of Chicago (Gen. Pl. E, 7), between 57th and 59th Sts., opened its doors in 1892 with 600 students and is now attended by nearly four times that number. The total endowments amount to $12,500,000, of which Mr. John D. Rockefeller has given 10 no less than $7,500,000 (1,500,000). The general plan provides for over 40 buildings, the academical structures occupying the centre of the university grounds (24 acres in extent), while the dormitories are arranged in quadrangles at the four corners. The university includes the four faculties of Arts, Science, Commerce and Politics, and Philosophy.

About fifteen of the buildings have already been erected, mainly of limestone and in a Gothic style, from the designs of Mr. H. I. Cobb. The most important are the Cobb Lecture Hall, the Kent Chemical Laboratory,
the Ryerson Physical Laboratory, the Walker Museum, the Haskell Oriental Museum, three halls for women, two halls for men, and the Hull Biological Buildings. The libraries contain 330,000 volumes. The Yerkes Observatory at Lake Geneva (Wis.; 70 M. distant), containing the largest refracting telescope in the world (40-inch lens, made by Alvan Clark; tube 70 ft. long), belongs to the University of Chicago.

The *Newberry Library (Gen. Pl. D, 2), endowed by the late Mr. Newberry with $3,000,000 (600,000L.), occupies a handsome granite structure in Walton Place, on the N. side of the city. It contains 200,000 vols., used for reference. The musical and medical collections are especially noteworthy. There is a complete bindery under the same roof.

Mr. John Crevar (d. 1890) has bequeathed $2,000,000 (400,000L.) for the establishment of a similar library on the S. Side, which is to be devoted mainly to science and the useful arts. The nucleus of this library (35,000 vols.) occupies temporary quarters on the 6th floor of the Marshall Field Building (p. 314).

The Chicago Historical Society, one of the oldest educational institutions in the city, possesses a large collection of paintings, MSS., and historical relics relating to Chicago and the North-West; also a library of 20,000 books and 40,000 pamphlets. It suffered irreparable losses in the great fire (p. 311), but now occupies a fire-proof edifice at the corner of Dearborn Ave. and Ontario St. (Pl. C, 1), in which even the furniture is of metal.

The Churches of Chicago are comparatively uninteresting. Among the most important are the R. C. Cathedral of the Holy Name, at the cor. of Superior and N. State Sts. (N. Side); the Third Presbyterian Church, cor. of Ashland and Ogden Aves. (Gen. Pl. C, 3), with good stained glass; the Church of the Epiphany, at the cor. of Ashland Ave. and Adams St., not far from the last; the Second Presbyterian Church, Michigan Ave., cor. 20th St. (Gen. Pl. E, 4); and Plymouth Church, Michigan Ave., near 25th St. (Gen. Pl. E, 4).

The interesting 'Medical District', in the W. Side, has for its nucleus the large County Hospital, near which are the Rush Medical College (affiliated with the University of Chicago; 700 students), the College of Physicians and Surgeons, the Presbyterian Hospital, the Illinois Training School for Nurses, the Chicago Homeopathic Medical College, and the Women's Medical College.

Hull House, at the S.W. cor. of Polk and S. Halsted Sts. (Gen. Pl. D, 3), is a social settlement of women (Miss Jane Addams, Head Resident), resembling Toynbee Hall (see Baedeker's London) in its purpose of furnishing a social, intellectual, and charitable centre for the surrounding district. It includes an art building, a free kindergarten, a creche, a diet kitchen, and a free gymnasium, while classes, lectures, and concerts of various kinds are held. — The Lewis Institute, founded and endowed by the late Mr. A. A. Lewis and opened in 1896, is designed to furnish a practical education to poor young men at a nominal cost. — The Armour Mission, at the corner of Butterfield and 33rd Sts., is one of the most interesting of the Chicago charities, including a mission hall, a creche, a library, a kindergarten, a free dispensary, etc. The Armour Institute, the principal feature of which is manual training, has been endowed by its founder with $1,700,000.

In Haymarket Square on the W. side (beyond Gen. Pl. A, 4; reached by Randolph St. cars), is the Police Monument, erected to commemorate the policemen killed by the Anarchists with bombs on May 4th, 1886. The Anarchists executed for complicity in the bomb-throwing arc also commemorated in a monument at Waldheim Cemetery, 10 M. to the W. of the City Hall (C. & N. P. R. R.).
Few travellers will leave Chicago without a visit to the famous Union Stockyards (Gen. PL C, D, 6). The yards are in South Halsted St., 5 1/2 M. to the S.W. of the City Hall, and may be reached by the South Halsted St. tramway or by the State St. line, with transfer at 35th St. or 43rd St. Visitors are freely admitted to the yards and will be shown round by a guide (25 c. each); but it is advisable to be provided with an introduction to one of the great packing-houses.

The yards proper cover an area of about 300 acres, have 25 M. of feeding-troughs, and 20 M. of water-troughs, and can accommodate 75,000 cattle, 300,000 hogs, 50,000 sheep, and 5000 horses. The annual receipts of cattle are between 3 and 4 million head, besides 7-8 million hogs, 3-4 million sheep, and 100,000 horses, with a total value of 200-250 million dollars. From two-thirds to three-fourths of the cattle and hogs are killed in the yards, and sent out in the form of meat. About 25,000 workers are employed by the packing-houses, and the annual value of their products is nearly 150 million dollars. The largest and best known packing-houses are those of Armour & Co. and Swift & Co. The former employs about 8000 men and produces goods to the annual value of $80,000,000, including canned meats, fertilizers, glue, etc. The processes of killing the cattle and hogs are extremely ingenious and expeditious, and will interest those whose nerves are strong enough to contemplate with equanimity wholesale slaughter and oceans of blood. — The Horse Market is held in a large pavilion (530 ft. x 185 ft.), seating 4000 people. — The Stockyards contain a first-class hotel (Transit House) and have a bank and newspaper of their own. The Transit Co. uses 30 locomotives in handling the livestock between the yards and the different railway-lines and has 245 M. of track.

An interesting visit may be made to one of the large Grain Elevators, of which there are about 30, with an aggregate capacity of nearly 30 million bushels. They are all situated on the river.

A visit to Pullman (Florence Hotel, D. § 1), 14 M. to the S. of the Court House, on the Illinois Central Railroad (1 hr.), should also be included by all who can spare half-a-day. An order for admission to the Pullman Car Works may be obtained at the Pullman Building, Michigan Ave., cor. of Adams St. (Pl. C, 3). Pullman was built and is owned by the Pullman Palace Car Co., and is a model little town, artistically planned, scientifically constructed, and consisting mainly of neat workmen's houses. To the left of the tasteful station are the *Pullman Car Works, the various processes of which are of full interest. About 150 Pullman cars, 500 ordinary passenger-cars, and 12,000 freight-cars are manufactured annually, with a total value of 10-12 million dollars. The Pullman Car Co. now owns and operates 2400 cars. Among the chief features of the town is the Arcade, a building which includes shops, a tasteful theatre, and a free library (8000 vols.). The population of the town is about 12,000, most of whom are connected with the Pullman Car Works, though the 1700 operatives employed there are not compelled to live in Pullman. Pullman now forms part of the 34th ward of Chicago. In 1894 a great strike took place at Pullman, which ultimately involved a great part of the railways of the country, gave rise to much rioting and bloodshed, and necessitated the intervention of the U. S. troops. In the end the strikers were unsuccessful.

Other favourite points for short excursions from Chicago are Evanston, Michigan City, St. Joseph, Kenosha, Grand Haven, Kewaunee, Sturgeon Bay (all reached by steamer), Glen Ellyn Springs, Lake Forest, Highland Park, Winnetka, etc.
49. From Chicago to Milwaukee.

a. Via Chicago & North-Western Railway.

85 M. Railway in 2-3hrs. (fare $2.55; chair-car 35 c.).

Chicago, see p. 308. The line runs to the N. along Lake Michigan, passing many small stations forming suburban homes for Chicago merchants. — 12 M. Evanston (Avenue House, $2 1/2-3 1/2), with most of the buildings of the North-Western University, a Methodist institution with 2800 students. Its schools of medicine, law, and pharmacy are in Chicago. — A little beyond (36 M.) Waukegan, with its 2 M. of 'Sheridan Drive' (comp. pp. 315, 321), we enter Wisconsin (the 'Badger State'), a fertile agricultural and lumbering state, with numerous interesting Indian mounds and large deposits of iron. More prehistoric copper implements have been found here than in any other state. A very large number of the inhabitants are of German or Scandinavian stock. — 51 M. Kenosha, with 6532 inhab. and a flourishing trade and industry. It is also connected with Milwaukee by an electric railway. — 62 M. Racine (Hot. Racine, $2-3; Merchants', $2), the fourth city of Wisconsin, with (1895) 24,889 inhab., has a good lake-harbour and carries on considerable trade and manufactures (waggons, farm implements, etc.).

85 M. Milwaukee, see below.

b. Via Chicago, Milwaukee, & St. Paul Railroad.

85 M. Railway in 2-2 1/2 hrs. (fares as above).

Chicago, see p. 308. This line runs nearly parallel with that above described, but a little more inland. 9 M. Mayfair; 32 M. Rondout; 43 M. Wadsworth. — 85 M. Milwaukee, see below.

Hotels. *Plankinton House (Pl. a; B, 3), Grand Ave., cor. of West Water St., $2 1/2-5; Pfister (Pl. b; B, 3), Wisconsin St., cor. of Jefferson St., $3 1/2-5, R. $2-4; Schlitz Hotel (Pl. c; B, 3), Grand Ave., cor. 3rd St., R. from $1; Republican Ho. (Pl. d; A, B, 2), cor. Cedar & 3rd Sts., $2-3; St. Charles (Pl. e; B, 3), E. Water St., $2-3; Aberdeen (Pl. f; A, 3), Grand Ave., near the intersection of 9th St., $2-2 1/2.

Electric Tramways (fare 5 c.) traverse the principal streets and run to the suburbs.

Cabs and Hacks. For 1-2 pers. for 1 M. or between the railroad depots $1, for 2 M. $1 1/2, above 2 M. $2, each addit. pers. 50 c. For the first hour $1, each addit. hr. 50 c.; with two horses $2 and $1. Baggage up to 100lbs. free; excess 15 c. per package.

Steamers ply regularly to all the chief places on the Great Lakes, and to various summer-resorts near Milwaukee.

Post Office (Pl. C, 3), Wisconsin St. (comp. below).

Milwaukee (580 ft. above the sea), the largest city in Wisconsin and one of the chief manufacturing and commercial centres of the N.W., occupies a pleasant undulating site on the W. shore of Lake Michigan, at the mouth of the river Milwaukee. An excellent harbour has been formed by the erection of huge breakwaters, and the river admits the largest lake-vessels to the doors of the warehouses. The Milwaukee receives two tributaries, the Menomonee and Kinnickinnic, within the city. The city is well built, largely of a light-coloured brick, and many of its streets are lined with beautiful shade-trees, recalling some of the older E. cities. Among the finest residence-streets are Grand Avenue (W. S.), Prospect Avenue, Waverley Place, Juneau Avenue, Marshall Street, and Astor Street (E. S.). Fully one-half of the (1896) 277,480 inh. are Germans, which may account for its successful cultivation of music and art. There are no fewer than 70 musical societies in the city.

Milwaukee became a village in 1835 and received a city-charter in 1846. Its growth has been rapid, particularly in the last 10 years.

The chief articles of its extensive commerce are grain, flour, and lumber. Its flour-mills are very large (daily output often 10,000 barrels), and its grain-elevators have a capacity of 51/2 million bushels. Milwaukee lager beer (Pabst, Schlitz, Blatz, etc.) is known all over the United States, and in 1896 was produced to the amount of over 2 million barrels. Pork-packing is extensively carried on, and the other staple manufactures include leather, machinery, iron and steel goods, and tobacco (total value in 1896, $113,000,000).

Grand Avenue (Pl. A, B, 3), which runs E. and W., contains many of the chief buildings and best shops, while Wisconsin Street (Pl. B, C, 3) and East Water Street (Pl. B, 2-4) are also busy thoroughfares. Among the most prominent buildings are the new Federal Building (Pl. C, 3), a handsome Romanesque structure in grey granite, erected in 1896-98 at a cost of about 13/4 million dollars, occupying the block bounded by Jefferson, Jackson, Michigan, and Wisconsin Sts., and accommodating the Post Office, Custom House, and U. S. Court House (interior finely finished in marble, mosaics, mahogany, and oak); the County Court House (Pl. C, 2; view from dome), a brown sandstone edifice, in the square bounded by Jefferson, Jackson, Oneida, and Biddle Sts.; the Chamber of Commerce (Pl. B, 3), Michigan St.; and St. Paul's Church (Epis.; Pl. C, 1, 2), Marshall St. The Exposition Building (Pl. A, 2), in Cedar St., contains a museum of natural history and a State Fish Hatchery (open every afternoon, all day on Sat.). The Layton Art Gallery (Pl. B, C, 3), at the corner of Jefferson and Mason Sts., has some interesting pictures and statues (open daily; adm. on Mon., Wed., and Frid. 25 c.). The Public Library, 408 Grand Ave., possesses 100,000 vols. (reading-room open 8.30-9, on Sun. 2-9). A magnificent new Public Library and Museum (Pl. A, 3) has been erected.
Breweries. MILWAUKEE. 49. Route. 321

in Grand Ave., between 8th and 9th Sts. — The spacious City Hall (Pl. B, 2), with one of the largest bells in the world, occupies a triangular site bounded by E. Water, Market, and Biddle Streets.

Among the public monuments not already mentioned are statues of Washington (Grand Ave.) and Berg, the philanthropist (in front of the new City Hall), and the Soldiers Monument, at the cor. of 10th St. and Grand Ave.

*Juneau Park (Pl. C, 2, 3), laid out on a bluff overlooking Lake Michigan, contains statues of Solomon Juneau (1793-1856), the earliest white settler, and Leif Ericson (p. 92); it commands fine views. Lake Park, farther to the N., also overlooks the lake. Near it is the North Point Pumping Station, in a tall and graceful water tower. A pleasant drive may be taken to the N. along the river to (5 M.) Whitefish Bay and (8 M.) Fox Point. The *Forest Home Cemetery, at the S.W. corner of the city, is one of the most beautiful burial-grounds in the United States.

Visitors to Milwaukee should not fail to inspect one of the great Breweries, such as Pabst's (Chestnut St.; Pl. A, 2), which covers 34 acres and produces 800,000 barrels of beer annually; and the Grain Elevators and Flour Mills will also repay a visit. — To the S. (Bay View) are the *Rolling Mills of the Illinois Steel Co., covering 154 acres of ground. — To the S.W., chiefly in the valley of the Menomonie, are the large Brick Yards that produce the light-coloured bricks which give Milwaukee the name of 'Cream City'. — To the N., along the Milwaukee river, are extensive Cement Works.

Sheridan Drive, skirting the lake for 2 M., is intended to be prolonged so as ultimately to meet the boulevard of that name running from Chicago to Fort Sheridan (see p. 315). — About 3 M. to the W. of the city is the National Soldiers' Home, with accommodation for 2400 disabled soldiers and a fine park of 400 acres. At Wauwatosa, 2 1/2 M. to the W., are the large County Hospital and the State Fair Grounds (electric car lines, connecting with city lines; fare 5 c.). — One of the favourite resorts of Milwaukeans is Waukesha (Fountain Spring Ho., § 3-5), a village 20 M. to the W., with the well-known Bethesda Spring, the water of which (efficacious in diabetes and Bright's disease) is exported all over the United States and to Europe.

Milwaukee is an important railway-centre, lines radiating hence to all points in Wisconsin. Those running to the N. and N.W. reach Marquette, Ashland, Duluth, and other points on Lake Superior (comp. pp. 330-352). From Milwaukee to St Paul, see p. 322.
50. From Chicago to St. Paul and Minneapolis.

420 M. Railway to (410 M.) St. Paul in 13-14 hrs. and thence to (10 M.) Minneapolis in $1/2-3/4$ hr. more (fare $11.50; parlor-car $1, sleeper $2). The fast mail line of this service is the route via La Crosse, described below; but some trains run via Madison and Prairie du Chien or via Dubuque.

From Chicago to (85 M.) Milwaukee, see R. 49. The line now turns to the W. 99 M. Brookfield is the junction of the line via Madison (p. 323) and Prairie du Chien (see p. 324 and above), which diverges to the left.

Near Palmyra, on this route, is a curious rock in the shape of an elephant, supposed to have been hewn out by some prehistoric race.

118 M. Oconomowoc. — 130 M. Watertown (Commercial, Daub's, $2), an industrial city on Rock River (good water-power) and the seat of the N.W. University (Lutheran; 150 students) and the Sacred Heart University.

Beyond Watertown our line runs to the N.W. 150 M. Columbus; 178 M. Portage City (Rail. Restaurant), a trading city with (1895) 5419 inhab., at the head of the navigation of the Wisconsin. 195 M. Kilbourn City (Finch Ho., $2-21/2) is the starting-point for a visit to the fantastic Dalles of the Wisconsin (comp. p. 445). 240 M. Tomah; 257 M. Sparta. — 283 M. La Crosse (650 ft.; Cameron Ho., $21/2; Rail. Restaurant), a flourishing city of (1895) 28,769 inhab. on the E. bank of the Mississippi, with 13 large saw-mills, annually turning 300,000,000 ft. of lumber into manufactured products, and an extensive supply business.

We now cross the Mississippi, here $1/3$ M. wide, enter Minnesota (the 'North Star State'), and ascend on the W. bank of the river, through picturesque scenery (views to the right). 308 M. Winona (The Winona, $2-4), with (1895) 20,649 inhab., is one of the most important grain-shipping points in the country. 341 M. Wabasha (Hurd Ho., $2) lies near the foot of the beautiful expansion of the Mississippi known as Lake Pepin (30 M. long and 3-5 M. wide). 353$1/2$ M. Lake City (Lyon, $2$) and (360 M.) Frontenac (Lake Side, $2$) are two favourite resorts in this beautiful district (comp. p. 362). 370 M. Red Wing; 391 M. Hastings.

410 M. St. Paul, see p. 325. — 420 M. Minneapolis, see p. 327.

b. Via Chicago & North-Western Railway.

418 M. Railway to (408 M.) St. Paul in 13-14 hrs.; to (418 M.) Minneapolis in $3/4$ hr. more (fares as above).

Chicago, see p. 308. The train runs to the N.W., passing various suburban stations. 63 M. Harvard Junction. We enter Wisconsin a little farther on. Beyond this point some trains run via (91 M.) Beloit (important college, with 450 students) and others via (91 M.) Janesville (cotton and woollen mills; trade in locally grown tobacco), re-uniting at (116 M.) Evansville.
1381/2 M. Madison (845 ft.; Park Hotel, $21/2-31/2; Capitol, Ogden, $2-21/2; Tonyawatha Springs Hotel, 3 M. from the city, $2-3), the capital of Wisconsin, a pleasant city of (1895) 15,950 inhab., situated between the beautiful Lakes Mendota and Monona. The State Capitol is a handsome building and contains a good library. The S. wing is occupied by the *Wisconsin Historical Society, the most important institution of the kind beyond the Alleghenies, which possesses a library of 190,000 vols., an art-gallery, and a valuable museum. The University of Wisconsin, finely situated on University Hill, overlooking Lake Mendota, is attended by 1700 students. Its observatory (the Washburn Observatory) is one of the best in America.

Beyond Madison we pass to the N. of the pretty Lake Mendota (see above). At (213 M.) Elroy we diverge to the left from the line to La Crosse (p. 322) and traverse a district of pine-forests. 3211/2 M. Eau Claire, with (1895) 18,637 inhab., the junction of the branch to Duluth (p. 330), is an important lumbering point at the head of navigation on the Chippewa River, which we cross here. 345 M. Menomonie. — 389 M. Hudson, with the O. W. Holmes Sanitarium ($41/2-21/2), pleasantly situated on the E. bank of Lake St. Croix. An excursion may be made to the *Dalles of the St. Croix. We now cross the St. Croix and enter Minnesota (p. 322).

408 M. St. Paul, see p. 325. — 418 M. Minneapolis, see p. 327.

c. Viâ Albert Lea Route.

Chicago (Van Buren St. Station), see p. 308. The train runs at first to the W.S.W. through a great prairie region, which offers comparatively little of interest to the stranger, except the sight of the growing wheat. — 40 M. Joliet (540 ft.; Munroe, Palmer, St. Nicholas, $2), an agricultural and industrial centre with 23,364 inhab., on the Des Plaines River, is the terminus of the Illinois & Michigan Canal and the seat of the Illinois State Penitentiary. The immense plant of the Illinois Steel Co. covers 186 acres and is the centre of probably the most extensive manufacture of barbed wire in the world. In the vicinity are large limestone quarries, employing 3000 men. — 84 M. Ottawa (9985 inhab.); 99 M. La Salle (9855 inhab.); 159 M. Geneseo.

181 M. Rock Island (470 ft.; Harper Ho., $2-3; Rock Island Ho., $2; Rail. Restaurant), an important railway-centre and industrial town of 18,634 inhab., on the E. bank of the Mississippi. It lies at the foot of the Moline Rapids, which afford good water-power. The island in the river from which it takes its name, 970 acres in area, is occupied by a large *United States Arsenal.
The train now crosses the river by a fine bridge, enters Iowa (the ‘Hawkeye State’), and reaches (182 M.) Davenport (Kimball Ho., $2-3; St. James, $2-2½; Black Hurst Inn, for summer-visit-
sors), an important commercial and grain-shipping city opposite
Rock Island, with (1895) 30,010 inhab. and considerable manufac-
tures. It is the junction of a line to Kansas City (p. 452). — Our
train diverges to the right (N.) from the main line to Omaha at
(222 M.) West Liberty (Rail. Restaurant) and traverses the great
wheat-fields of N. Iowa. 259 M. Cedar Rapids (710 ft.; Grand, $3-4;
Clifton, $2-2½) is a thriving town and railway-centre on the Cedar
River, with (1895) 22,784 inhab., a large trade in dairy produce,
Beyond (306 M.) Northwood we enter Minnesota. 413 M. Albert Lea
(1230 ft.; Winslow Ho., $2) is a thriving little city (4158 inhab.
in 1895). 512 M. Hopkins.

521 M. Minneapolis, see p. 327. — 529 M. St. Paul, see p. 325.

d. Via Chicago Great Western Railway.

430 M. Railway in 14-17 hrs. (fares as above).

Chicago (Harrison St. Station), see p. 308. The train runs at
first a little to the N. of W. 52 M. Sycamore; 126 M. Stockton. We
reach the Mississippi at (167 M.) Dubuque (600 ft.; Julien Ho.,
$2½-4; Allison, $2), the third city of Iowa and the chief indus-
trial city of the state, with (1895) 40,574 inhab., large railway
workshops, and the Iowa Institute of Science and Arts. It is the
centre of the lead and zinc industries of the N.W. — 197 M. Dyers-
ville. At (240 M.) Oelwein (1040 ft.) we diverge to the right (N.)
from the main line to Kansas City (p. 452). 348 M. Dodge Centre.
420 M. St. Paul, see p. 325. — 430 M. Minneapolis, see p. 327.

e. Via Chicago, Burlington, & Quincy Railroad.

442 M. Railway in 13½-20 hrs. (fares as above).

Chicago (Canal St. Station), see p. 308. 37 M. Aurora (650 ft.;
Bishop Ho., $2-2½), an industrial city with 19,688 inhab., claims
to have been the first to light its streets by electricity (1881) and
has the large workshops of the C. B. & Q. R. R. We diverge to the
right (comp. p. 440) from the line to Kansas City (p. 452), Omaha
(p. 438), and Denver (p. 458). 99 M. Oregon. We now follow the
tracks of the Chicago, Burlington, and Northern Railroad. From
(146 M.) Savanna (Rail. Restaurant) the line runs to the N. along the
E. bank of the Mississippi, affording numerous fine views to the left.
172 M. Galena Junction, for (6 M.) Galena, a thriving little city
(5635 inhab.) in an important lead-mining district. At (185 M.)
East Dubuque, on the E. bank of the river, opposite Dubuque (also
reached by trains of this line), we enter Wisconsin (p. 320). — 239 M.
Prairie du Chien (620 ft.; Commercial, Depot, $2), with (1895)
3286 inhab., was a French military post in the latter part of the 17th cent. and lies just above the mouth of the Wisconsin River. 299 M. La Crosse (Rail. Restaurant), see p. 322; 326 M. East Winona, opposite Winona (p. 322). Numerous small stations.

432 M. St. Paul, see below. — 442 M. Minneapolis, see p. 327.

f. Via Wisconsin Central Railroad.

472 M. Railway in 14 hrs. (fares as above) This route leads through the most productive white pine (Pinus Strobus) district in the world.

Chicago (Harrison St. Station), see p. 308. This line runs towards the N.E. and enters Wisconsin beyond (55 M.) Antioch. 98 M. Waukesha (p. 321). At (118 M.) Rugby Junction we join the Wisconsin Central line from Milwaukee (p. 319). — 156 M. Fond du Lac (Palmer, Windsor, $2), a manufacturing city of (1895) 13,051 inhab., with a trade in lumber, lies at the S. end of Lake Winnebago (30 M. long and 10 M. wide), the W. shore of which we now follow.

174 M. Oshkosh (Athenh, Tremont Ho., $2–3½), a city of (1895) 26,947 inhab., with saw-mills and factories, is the seat of the State Normal School and the State Insane Asylum. At (187 M.) Neenah we turn to the left (W.) and leave the lake. 249 M. Stevens Point, 303 M. Abbotsford; 358 M. Chippewa Falls, on the Wisconsin, with (1895) 9436 inhab. and a trade in lumber; 423 M. New Richmond.

462 M. St. Paul, see below. — 472 M. Minneapolis, see p. 327.

51. St. Paul and Minneapolis.

St. Paul and Minneapolis, the ‘Twin Cities’ of the West, are so intimately associated with each other in all ways, that it is convenient to treat of them together. Though their centres are 10 M. apart, they have extended towards each other so as almost to form one large city with over 330,000 inhabitants.

St. Paul. — Union Depot (Pl. E, 2, 3), on the river, at the foot of Sibley St., used by most of the railways; Broadway Depot (Pl. E, 2), Broadway, between E. 4th St. and Prince St., the station of the N. P. R. R., also used by the Minneapolis & St. Louis R. R. and trains to St. Croix Falls.

Hotels. *Ryan (Pl. a; D, 2), cor. Robert & 6th Sts., $3-5, with good cafe-restaurant; Aberdeen, cor. of Dayton and Virginia Sts., from $3; Merchants (Pl. c; E, 3), cor. E. 3rd & Jackson Sts., commercial, $2-3; Windsor (Pl. d; C, 3), cor. 5th & St. Peter Sts., $2½-5, a family house; Metropolitan, S.W. cor. of Washington and 4th Sts., $2-3, R. from $1.

Astoria.

Restaurants. Magee, 347 Robert St.; Neumann, cor. 6th and Cedar Sts.; Schebens, 15 E. 5th St.; Delicatessen, Robert St., near 4th St.; at the Ryan, Windsor, and Metropolitan hotels (see above); *Railway Restaurant, at the Union Depot.

Tramways. St. Paul is traversed in all directions by an excellent system of electric and cable cars (fare 5c., incl. transfer to any intersecting line). — Interurban Electric Tramway to (60 M.) Minneapolis, starting at Wabasha & 5th Sts. (fare 10c.; 3½–4 hr.). — An electric line also runs from St. Paul to White Bear Lake (p. 327).
Cabs. For 1 pers., 1 M. 50c., 1½ M. 75c., 2 M. $1; each addit. pers. 50c. for the whole hiring; per hr. $1, each addit. hr. 50c., with two horses $1½ and $1.

Steamers ply to all points on the Mississippi (comp. p. 361).

**British Vice-Consul,** Mr. Edward H. Morphy.

**St. Paul** (700-800 ft. above the sea), the capital of Minnesota, is finely situated at the head of navigation on the Mississippi, mainly on a series of terraces rising from the E. (or rather N.) bank. The business part of the town is well-built and regularly laid out, and the suburban quarters contain many fine streets and handsome residences. St. Paul is a great railway-centre, and by rail and river carries on a large wholesale and retail trade. The annual value of its industrial products in 1890 was $32,600,000 (6,520,000l.). The population in 1895 was 140,292, including many Scandinavians.

The first white settler, a Canadian voyageur, built a house here in 1838, and in 1841 the place received its name from a French priest. In 1854, when it received a city charter, it contained 3000 inhab., and since then its growth has been very rapid. — A fine *Ice Carnival* is generally held here in winter.

The traveller in St. Paul may begin his visit by ascending to the top of the *Pioneer Press Office* (Pl. D, 2, 3), a 18-story building at the corner of 4th and Roberts Sts. (elevator). Another good view is obtained from the dome of the Capitol (Pl. C, 2; hard to climb; key on groundfloor). The library of the *State Historical Society*, in the Capitol, contains 30,000 books, 32,000 pamphlets, and many patriotic curios and historical relics. The *State Law Library* has 25,000 volumes.

A new State Capitol is now being constructed a little to the N. of the present building (beyond Pl. B, 1), but it will not be completed for some years. This is to be a large and handsome edifice of granite and Georgia marble, surmounted by a lofty central dome. Its cost, including site, is estimated at two million dollars. The architect is Mr. Cass Gilbert.

A little to the S. of the Capitol are the *Post Office* (Pl. C, 3) and the **City Hall** (Pl. C, 3), the latter a large and handsome building, erected at a cost of $1,000,000 and containing the *Public Library* (45,000 vols.). — Among other important buildings in the business-quarter are the *New York Life Insurance Building* (Pl. C, 2), cor. 6th & Minnesota Sts.; the R. C. Cathedral of St. Paul (Pl. C, 3), 6th St., cor. of St. Peter St.; the *High School* (Pl. C, 1), cor. 10th & Minnesota Sts.; the *National Guard Armoury* (Pl. C, 1), opposite the last; the *Globe Building* (Pl. D, 3), 4th St., cor. Cedar St.; the *Germania Life Insurance Office* (Pl. D, 3), opposite the last; the *Bank of Minnesota* (Pl. D, 2); the odd-looking *People's Church* (Pl. A, 3); and the *Great Northern Railway Offices* (Pl. E, 2).

The finest residence-street is *Summit Avenue* (Pl. A, B, 1, 2), of which Mr. Schuyler writes that very few streets in the United States ‘give in as high a degree the sense of an expenditure liberal without ostentation, directed by skill, and restrained by taste’. It begins at Wabasha St. and runs from *Summit Park* (Pl. A, 2) along a high ridge.
The most prominent dwelling is the large brown-stone mansion of Mr. Hill, President of the G. N. Railroad, containing a good collection of paintings by Corot, Delacroix, Courbet, Troyon, Decamp, and other artists. — Near Summit Ave. is the extensive new Roman Catholic Seminary of St. Thomas Aquinas.

From Summit Ave. the visitor may descend to the High Bridge, a sloping bridge rising rapidly from the low N. (E.) bank of the Mississippi to the high bluffs on the S. (W.) side. It commands an excellent View.

The Indian Mounds, at Dayton's Bluff, on the Mississippi, just to the E. of St. Paul, command a fine view of the city and river. Carver's Cave, in the bluff, was named from Capt. Jonathan Carver, who made a treaty with the Indians here in 1767. — Lake Como and Como Park lie about 3½ M. to the N.W. of the centre of the city (tramway). To the W. are the State Fair Grounds. — Fort Snelling, a U. S. military post, lies on the W. bank of the Mississippi, 6 M. above the city (C. M. & St. P. R. R.). — The Minnehaha Falls (see p. 329) may be reached from St. Paul by river (steamers in summer) or by the C. M. & St. P. R. R. — The State of Minnesota is thickly sown with lakes (7-10,000 in number, covering an area of 400 sq. M.), and a number of these are within easy reach of St. Paul. Among the largest and most beautiful of these are White Bear Lake (10 M.; see p. 330), Bald Eagle Lake (11 M.; see p. 350), and Lake Minnetonka (20 M.; see p. 329).

From St. Paul down the Mississippi to St. Louis, etc., see R. 65.

Minneapolis (10 M.) may be reached from St. Paul by railway (1/2 hr.) or by the Intercity Electric Tramway (p. 325; 3/4 hr.).

Minneapolis. — Union Depot (Pl. C. 1), Bridge Sq., used by several railways; Chicago, Milwauke, & St. Paul (Pl. C. D. 2, 3), Washington Ave.; Minneapolis & St. Louis Railway (Pl. A. 1), N. 3rd St. and Fourth Ave.

Hotels. *West Hotel (Pl. a. A, B, 2), Hennepin Ave., cor. 5th St., $3-5; Nicollet Ho. (Pl. b. B, 2), Washington Ave., $2½-4, R. from $1; The Holmes (Pl. c. A, 3), Hennepin Ave., $2½-4, R. from $1; Brunswick (Pl. d. B, 3), from $2; National, $2; Bellevue; Victoria.

Restaurants. Schietz, 3rd St. S., near 1st Ave.; at the Nicollet Ho. (see above); *Railway Restaurant, at the Union Depot; Russell Coffee House, 14 Fourth St. S.

Tramways and Cabs as in St. Paul (see p. 325).

Post Office (Pl. B, 2), 3rd St. (7-7; Sun. 9-10 a.m.).

Minneapolis (700-800 ft. above the sea), the largest city in Minnesota and the chief flour-making place in the world, lies on both banks of the Mississippi, a little above St. Paul, at the point where the river descends over the Falls of St. Anthony. The population in 1895 was 192,833, including many Scandinavians. Minneapolis covers a larger area (54 sq. M.) than St. Paul and is not so much built up; but it contains many individual edifices that are unexcelled in the sister-city, while numerous trees and lawns add to its attractions.

Minneapolis owes its prosperity and rapid growth to the extensive and fertile agricultural district tributary to it, and to the splendid water power of the St. Anthony Falls, with an available perpendicular fall of 50 ft., yielding from 50,000 to 100,000 horse-power. The falls were named by Father Hennepin (p. 221) in 1680, but it was not till 1838 that the village of St. Anthony, now included in Minneapolis, was founded on the E. bank of the river. The settlement on the W. bank, which received the name
MINNEAPOLIS. Flour Mills.

of Minneapolis (from minne, the Sioux for water, and the Greek polis), was founded in 1852 and became a city in 1867. In 1870 the population was 13,000, and in 1880 it was 46,000; while the next decade showed an increase of 252 per cent.

Its Flour Mills, about 25 in number, have a daily capacity of about 60,000 barrels and produce about 13 million barrels annually. Its Lumber Mills yearly cut 420,470 million ft. of timber. The total annual value of its manufactures, which also include iron goods, machinery, street-cars, etc., was estimated in 1896 at about $120,000,000 (24,000,000l). Its trade is also very large, the chief import being grain and the chief exports flour and timber.

At the corner of Second Ave. South and 3rd St. stands the building of the *Guaranty Loan Building Co. (Pl. C, 2), one of the best-equipped office-buildings in the United States, erected in 1888-90 at a cost of $1,600,000. The roof (172 ft. high, tower 48 ft. more) is laid out as a garden (concerts in summer) and commands an excellent *View of the city (*Restaurant on the 12th floor). Adjacent is the Post Office (Pl. B, C, 2), in a Romanesque style.

We may now follow 3rd St. to the W. to HENNEPIN AVENUE (Pl. A-C, 1-3) and turn to the left. To the left, at the corner of N. 5th St., is the imposing Lumber Exchange (Pl. B, 2). To the right are the West Hotel (Pl. a; A, B, 2) and the Masonic Temple (Pl. A, 3). Farther on, at the corner of 10th St., is the *Public Library and Art Gallery (Pl. A, 3), a handsome Romanesque structure, with an ornate façade.

The Library (100,000 vols.) and Reading Rooms (open 8.30 a.m. to 10 p.m.) are on the first floor. Upstairs is the Art Gallery (10-12 & 1-30; Sun., 2-10), containing pictures, casts, bric-à-brac, etc. Among the pictures belonging to the Gallery are De Neuville's 'Storming of Tell el-Kebir' and examples of David, Lefebvre, Bierstadt, Kaulbach, and Washington Allston. Among the Baker 'Incunabula' are two that belonged to Melanchthon. — On the second floor are the collection of the Minnesota Academy of Natural Sciences. — The building also includes a School of Art.

Adjoining the Public Library is the *First Baptist Church (Pl. A, 4). The *First Unitarian Church (Pl. A, 3), at the corner of Mary Place and 8th St., is also a fine building.

At the other end of Hennepin Ave. are the old City Hall (Pl. B, 2), and the Union Depot (Pl. C, 1). The bridge at its foot leads to the pleasant Nicollet Island (Pl. C, 1). — Among other prominent buildings in the business-quarter are the new *Court House and City Hall (Pl. C, 3), a handsome building in 4th St., between Third Ave. and Fourth Ave., completed in 1896 at a cost of $4,000,000, with a tower 345 ft. high (*View of city); the *New York Life Insurance Building (Pl. B, 3), 5th St. and Second Ave., with an elaborate interior (containing a double spiral staircase inspired by the rood-screen of St. Etienne du Mont in Paris); the Bank of Commerce (Pl. B, 3), First Ave. South, cor. of 4th St.; the Globe Building (Pl. B, 2); and the Chamber of Commerce (Pl. C, 3), 3rd St. and Fourth Ave.

The Flour Mills of Minneapolis, perhaps its most characteristic sight, are congregated on the banks of the Mississippi, near St. An-
Anthony's Falls (Pl. D, 2; p. 327); and no one should leave the city without a visit to them. Previous application will generally secure admission to any of the larger mills. The 'roller' or Hungarian system is used here to the exclusion of the mill-stone.

Little is now to be seen of the Falls, which are 'cribbed, cabined, and confined' by dams, retaining walls, and a huge wooden 'apron'. Among the largest mills are those of the Washburn-Crosby Co., on the right bank, with a production of 16,000 barrels a day. The Pillsbury A Mill (office in the Guaranty Loan Building), on the left bank, with a capacity of 10,700 barrels, is the largest single mill in the world. Comp. p. 323. — The Grain Elevators, with a capacity of 16½ million bushels, are also interesting. The Union Elevator alone has a capacity of 2½ million bushels.

A visit should also be paid to the Lumber Mills, the operations of which are of an extremely interesting nature. Most of them are on the river, above the town.

The mill of the Boxey De Laitre Lumber Co., 3 M. above the city (Camden Place electric tramway), is a good specimen of a modern mill, cutting 25-30 million feet of timber yearly. The logs, each provided with its owner's mark, are floated down the river and guided as far as possible into their proper 'booms'. A certain mixture of logs is, however, inevitable; and this is adjusted by a sort of clearing-house arrangement by a class of State officials named 'scalers', who charge the stray logs against the yards they are found in. The logs are drawn up an inclined plane into the mill by an endless chain with large hooks, passed under the 'gangue' saw, and sawn into planks before they are well out of the water. Among the various improvements in machinery, with the object of minimizing the waste of sawdust, are the wonderfully delicate band-saws.

The University of Minnesota lies on the left bank of the river, between Eleventh and Eighteenth Avenues, S.E. It possesses various well-equipped buildings (*View from tower of main building) and is attended by about 2800 students (both sexes).

Among the finest residence-streets are Summit Avenue (to the S.W.), Linden Avenue, and Harmon Place.

Minneapolis is adjoined on the S.W. by several little lakes (Lake Calhoun, Lake Harriet, etc.), in connection with which a fine system of Parks and Boulevards has been constructed, affording opportunity for numerous pleasant drives. — About 5 M. to the S. (reached by C. M. & St. P. R. R. or by electric cars), in a pretty glen preserved as a town-park, are the graceful 'Falls of the Minnehaha, 50 ft. high, immortalized by Longfellow and only wanting a little more water to be one of the most picturesque cascades in the country. The smaller fall below has been nicknamed the Minnepiggle. On the opposite side of the creek is the Minnesota Soldiers' Home (fine grounds). About 2 M. below the falls is Ft. Snelling (p. 327).

The most delightful resort near Minneapolis or St. Paul is Lake Minnetonka ($20 ft. above the sea), which lies about 10 M. to the S.W. of the former city and is easily reached from either by railway. The lake is singularly irregular in outline, and with a total length of 12-15 M. has a shore-line of perhaps 150 M. It is surrounded with low wooded hills, and affords good boating and fishing. Steamers ply regularly between all the chief points. The most frequented resorts are the Hotel Lafayette ($3-5), on the N. shore, reached by the G. N. R. R.; the Lake Park Hotel ($3½); the Hotel St. Louis ($3-4), on the S. shore, reached direct by the C. M. & St. P. R. R.; the Chapman House; and the Hotel Harries ($2½). There are also small hotels and boarding-houses at Excelsior, Wayzata (p. 334; the nearest point to Minneapolis and the starting-place of the lake steamers), and other points. The Upper Lake is wilder and less accessible than the Lower Lake, but has simple hotel and boarding-house accommodation. The Minnehaha (see above) flows out of Lake Minnetonka.
FROM MINNEAPOLIS AND ST. PAUL TO SAULT-STE-MARIE, 494 M., M., ST. P.; & S. STE. M. RAILWAY in 15-16 hrs. (fare $1.2; sleeper $2.50). — This line runs to the N.W. through Wisconsin and Michigan. Stations unimportant. — 494 M. Sault-Ste-Marie, see p. 333.

52. From St. Paul to Duluth.

152 M. St. Paul & Duluth R. R. in 5-7 hrs. (fare $4.30; sleeper $1.50). — Other routes are the Eastern Railway of Minneapolis (Great Northern R. R. System) and the Chicago, St. Paul, Minneapolis, & Omaha Railways.

St. Paul, see p. 325. The district traversed is comparatively uninteresting and most of the stations are unimportant. At first we traverse fields of Indian corn and afterwards tracts of unclaimed forest. Soon after leaving St. Paul we pass between (12 M.) White Bear Lake (to the right) and (13 M.) Bald Eagle Lake (to the left), two favourite summer-resorts of the citizens of St. Paul (good hotels).

152 M. Duluth (610 ft.; Spalding Hotel, $2-1/2-5; St. Louis, $2-3; Tremont, St. James, $2), ambitiously termed the 'Zenith City of the Unsalted Seas', is finely situated on a bay at the W. end of Lake Superior, at the mouth of the St. Louis River, and contained 59,396 inhab. in 1895. In 1860 Duluth contained only 70 white inhabitants, and even in 1885 it had only 3470; it owes its rapid increase and its promise of future greatness to its situation at the head of the navigation of the Great Lakes and its extensive railway-connections with the rich agricultural states of the West and the iron regions to the N. (see below). It possesses a large harbour, entered by a short canal and lined with docks and warehouses, and carries on a very large trade in grain.

It is estimated that the annual receipts of wheat at Duluth amount to 60 million bushels, and of all kinds of grain (incl. flour reduced to bushels) 90 million bushels. About 2000 vessels enter and clear its harbour annually, bringing coal and taking away flour, copper, and iron ore. The lumber trade is also important.

A great part of Duluth is well and substantially built. Among the most prominent buildings are the Schools, the Palladio, the First National Bank, the Lyceum Theatre, the Board of Trade, the Exchange, and St. Luke's Hospital.

The *Boulevard Drive, on the terrace at the back of the town (an old beach-line of Lake Superior), 4-500 ft. above the lake, affords splendid views of the town and lake.

FROM DULUTH TO TOWER AND ELY, 114 M., Duluth & Iron Range R. R. in 4½ hrs. — This line runs to the N.E., along the shore of Lake Superior, to the iron-shipping port of (27 M.) Two Harbors (1934 inhab. in 1895), and then strikes inland (N.W.), running through a district studded with small lakes (shooting and fishing). — From (70 M.) Allen Junction a branch line runs to (27 M.) Eveleth, in the Mesabi Range (p. 331). — 95 M. Tower (1265 inhab. in 1895), on Lake Vermilion, is the starting-point of the route (stage and road) to the Rainy Lake Gold Fields (through-fare from Duluth $10). — The railway turns to the E. and runs through the Vermilion...
Range (see below) to (114 M.) Ely, a small mining-town with (1895) 2260 inhabitants.

From Duluth to Mountain Iron and Hibbing. 82 M., Duluth, Mesabi, & Northern Railway in 39/4 hrs. — This line runs towards the N. — 31 M. Columbia Junction, for Stony Brook; 66 M. Iron Junction, for lines to Eveleth (p. 330), Biwabik, etc. — At (68 M.) Wolf the railway trifurcates, the arm to the right going to (72 M.) Virginia, that in the middle to (75 M.) Mountain Iron, and that to the left to (82 M.) Hibbing (1885 inhab. in 1895), three mining camps in the Mesabi Range (see below).

The two railways just described give access to the important mining district of the Mesabi and Vermilion Ranges, which in 1896 produced 4 1/4 million tons of high-grade iron ore (red hematite), or about one-fourth of the entire product of the United States. In the same year the Lake Superior Iron Region, which includes the Marquette, Gogebic, and Menominee districts (comp. below and p. 332), produced 10,566,339 tons of iron, or nearly 70 per cent of the total American output. Most of the mines in the Vermilion and Mesabi ranges are controlled by the Minnesota Iron Co. and the Lake Superior Consolidated Iron Co. Lake Superior ore is said to excel even the best Swedish ores in purity, ease of working, and high content of metallic iron.

53. From Duluth to Sault-Ste-Marie.

a. By Railway.

Duluth, see p. 330. We cross a drawbridge, with St. Louis Bay, into which the St. Louis flows, to the right, and Duluth Harbour to the left, and enter Wisconsin (p. 320). 4 M. West Superior, with grain elevators and ship-building yards, including those of the 'whaleback' steel ships, one of which carried its cargo from Duluth to Liverpool in 1891; 8 M. Superior (26,168 inhab. in 1895, incl. W. Superior). Our line runs to the E., a little to the S. of Lake Superior (p. 332).

49 M. Iron River. 65 M. Mason (965 ft.) is the junction of a line to (22 M.) Ashland (Chequamegon, $ 2-3; 12,310 inhab. in 1896), the shipping-port for the rich hematite Bessemer ore of the Gogebic Range (2,100,000 tons yearly). Beyond (104 M.) Saxon we pass from Wisconsin to Michigan (p. 297). 128 M. Thomaston (Rail. Restaurant). Lake Gogebic (1330 ft.) lies to the right, 15 M. farther on. 192 M. Sidnaw. — 215 M. Nestoria (1650 ft.) is the junction of a line to (48 M.) Houghton (p. 333), giving access to the valuable copper mines in the peninsula of Keewenaw.

The largest of these is the famous Calumet and Hecla, one of the most remunerative mining properties in the world. It has already paid about $ 60,000,000 (12,000,000 t.) in dividends, and its annual profit is now about $ 4,000,000. The number of miners is 4000. One of its shafts, the Red Jacket, 4900 ft. deep, is the deepest shaft in the world.

222 M. Michigamme (1585 ft.), with the lake of that name to the right. The numerous mineral trains we meet bear witness to the richness of the iron-yielding land we are traversing. Our line now descends rapidly to the level of the lake. — 246 M. Ishpemin
(11,687 inhab. in 1894) and (249 M.) Negaunee (1440 ft.; 5940 inhab. in 1894) are the two chief places of the important mining district of the Marquette Range, which in 1896 produced 2,418,000 tons of iron, besides gold, silver, and marble.

About 30 M. to the S. is the Menominee Range, another important iron district (output in 1896, 1,760,000 tons).

261 M. Marquette (650 ft.; Hotel Superior, $3-5; Marquette, $21/2-3; Clifton, $2-3; Rail. Restaurant), named from Père Marquette, the French missionary and explorer, is a flourishing city of (1894) 9726 inhab., situated on Iron Bay, on the S. shore of Lake Superior, and forming the chief outlet for the great iron district of Michigan. The huge iron docks and wharves are seen to the left.

*Presque Isle Park* has beautiful walks and drives. — The train now commands glimpses of Lake Superior from time to time, but beyond (291 M.) Au Train runs more inland, through a heavily timbered region affording no views. — 299 M. Munising Junction, for the short branch-line to Munising, a small lake-port with an iron-furnace (comp. also p. 333). — 369 M. Soo Junction, for a line to (43 M.) St. Ignace (p. 301). As we approach Sault-Sté-Marie we skirt the St. Mary's River (left), connecting Lake Superior with Lake Huron.

416 M. Sault-Sté-Marie, see p. 333.

b. By Steamer.

436 M. Steamers of the Northern S. S. Co. twice weekly in one day (fare $8; berth, $11/2-21/2, and meals extra); of the Lake Michigan & Lake Superior Transportation Co. in two days (fare $13, including berth and meals); of the Anchor Line in 21/2 days (inclusive fare $13). Regulations similar to those mentioned at p. 303.

Lake Superior (600 ft. above the sea) is the largest body of fresh water on the globe, being 350 M. long, and 160 M. wide at its widest part, with an area of about 31,500 sq. M. The mean depth is about 900 ft. The lake receives the waters of 200 streams and contains numerous islands, chiefly near its E. and W. ends. Its coast-line (ca. 1500 M.) is irregular and generally rock-bound, some of its cliffs and mountains being very picturesque. The water is clear and very cold even at midsummer. Lake Superior whitefish (*Coregonus clupeiformis*) are excellent, and other varieties of fish are also abundant.

Duluth, see p. 330. The steamer steers towards the E. and early in the morning threads its way among the picturesque Apostle Islands (ca. 25 in all), which lie near the coast.

80 M. Bayfield (Island View Ho., $21/2), a seaside-resort, connected by railway and small steamer with Ashland (p. 331). About 50 M. farther on Porcupine Mt. (2025 ft.) rises conspicuously, and 20 M. beyond it lies the village of Ontonagon. The steamers are saved the long detour round Keewenaw Point by passing through Portage Lake (20 M. long, 1/2-2 M. wide) and the ship-canal in connection with it.
to Sault-Ste-Marie. SAULT-STE-MARIE. 53. Route. 333

200 M. Houghton (Douglas House, $2), a village of (1895) 2178 inhab. on the S. bank of Portage Lake, in a rich copper district (comp. p. 331). On emerging from the Portage Entry, as this passage is named, the steamer crosses Keewenaw Bay and steers S.E. by E., passing Point Abbaye, the Huron Islands, Big Bay Point, and Granite Island.

280 M. Marquette, see p. 332.

About 45 M. beyond Marquette the steamer passes Grand Island and then, if the weather permits, approaches as near shore as possible to afford a view of what is considered the finest piece of scenery on the trip, the so-called *Pictured Rocks.

These rocks are a series of sandstone bluffs, 300 ft. high, extending along the shore of Lake Superior for a distance of 5 M. and worn by frost and storm into the most fantastic and romantic forms. They owe their name to the vivid hues — red, blue, yellow, green, brown, and gray — with which they are stained. Cascades fall over the rocks at intervals. Among the chief points (named from W. to E.) are Miner's Castle, Sail Rock (like a sloop in full sail), the Grand Portal, and the Chapel. Those who wish to examine the Pictured Rocks satisfactorily should disembark at Marquette, proceed thence by railway to Munising (p. 332), and there hire a small boat. This is the heart of the Hiawatha country, and Munising occupies the site of the 'Wigwam of Nokomis'.

About 20 M. farther on the steamer passes Point au Sable (lighthouse), 60 M. beyond which it rounds Whitefish Point (lighthouse) and steers to the S.W. across Whitefish Bay towards the mouth of the St. Mary's River. This river or strait, which connects Lake Superior with Lake Huron (comp. p. 304), is about 65 M. long and has several islands and lake-like expansions. In entering it we pass through Waiska Bay, with Point Iroquois to the right (U. S.) and Gros Gap to the left (Canada). The St. Mary Rapids are avoided by a ship-canal, adjoining which lies the town of Sault-Ste-Marie, generally pronounced 'Soo St. Mary' (see below).

The old *St. Mary's or Soo Ship Canal was constructed by the State of Michigan in 1853-55 and was 1800 yds. long, 100 ft. wide, and 12 ft. deep, with two locks, each 350 ft. long. The present canal, constructed by the U.S. Government in 1881, is 2350 yds. long, 108 ft. wide at its narrowest part (the movable dam), and 16 ft. deep. Its original lock is 515 ft. long, 80 ft. wide, and 39 ft. deep. It has a lift of 18 ft. and can hold two large lake-steamers. The total cost of the canal enlargement was $2,150,000 (430,000 $). Even this, however, proved inadequate for the increasing traffic, and an enormous new lock, on the site of the two old locks of 1855, was opened in 1896, having a length of 800 ft., a breadth of 100 ft., and a depth of 43 ft. It can accommodate vessels drawing 21 ft. The cost of this new lock and the accompanying enlargement of the canal was about $5,000,000 (1,000,000 $). The lock can be filled and emptied in 7 minutes. — A Ship Canal has also been constructed on the Canadian side of the river (see Baedeker's Canada).

The annual tonnage of the vessels passing through the Soo Canal is greater than that passing through the Suez Canal. In 1896 the canal was passed by 13,441 vessels with an aggregate tonnage of 12,896,888 (Suez Canal in the same year 8,560,283 tons).

Sault-Ste-Marie (615 ft.; Iroquois, $2-5; Park, from $2 1/2; Arlington, $2; Rail. Restaurant), a thriving little city with (1894) 7244 inhab., originated in a French mission established here in 1641.
Its position on the Soo Canal and at the convergence of several railways gives it a considerable commercial importance. To the E. lies Fort Brady, a U. S. military post. The St. Mary's River is crossed here by the fine bridge of the Canadian Pacific Railway. Frequent steam-ferries cross to the Canadian Sault-Ste-Marie (Algonquin Ho., $2-3), which lags behind its American namesake in size and life.

One of the things to 'do' at the Soo is to shoot the Rapids in a canoe guided by an Indian, an exciting but reasonably safe experience (enquire at hotels). There is good trout-fishing above the Rapids and in the neighbouring streams, and the Indians catch whitefish with scoop nets below the Rapids. The island of Mackinac (p. 301) is easily reached from the Soo. From Sault-Ste-Marie to Buffalo by steamer, see R. 46e.

54. From St. Paul to Winnipeg.

a. Via Breckinridge.

506 M. Great Northern Railway in 13 hrs. (fare $14.29, 2nd cl. $11.35; Pullman car $3; family tourist-car $4). Through-tickets are issued to points on the Pacific Coast over this route ('Manitoba-Pacific Route') in connection with the Canadian Pacific Railway (comp. Baedeker's Canada).

Harvest Excursion Trains from St. Paul to points in the Red River Valley are run at reduced rates in summer and autumn for visitors to the wonderful harvesting operations in this great wheat district (comp. p. 335).

St. Paul and (11 M.) Minneapolis, see R. 51. Our train now runs to the N.W. through the beautiful Lake Park District of Minnesota, thickly sprinkled with lakes (comp. p. 327). From (24 M.) Wayzata, at the E. end of *Lake Minnetonka (see p. 329), a branch-line runs to Hotel Lafayette (p. 329) and (7 M.) Spring Park. Numerous small stations are passed, in a thriving farming district. 76 M. Litchfield (Brightwood, $2), a summer-resort on Lake Ripley. — 102 M. Willmar is the junction of a line to Sioux ('Soo') Falls (Cataract Ho., $2-21/2), in South Dakota ('Coyote State'), and Sioux City (Hét. Garretson, Mondamin, $2-31/2), in Iowa.

The first of these has a large water-power from the Big Sioux River and contains 10,177 inhab. and extensive flour-mills. It is the seat of the Dakota Penitentiary and the State Deaf and Dumb Institute. — Sioux City is an important manufacturing centre with (1895) 27,371 inhab., a large foundry, and several pork and beef packing houses.

From (132 M.) Benson a line runs to Watertown and Huron. Other lines diverge to the W. and E. at (197 M.) Tintah Junction. At (214 M.) Breckinridge we reach the Red River (p. 335), which we cross to (216 M.) Wahpeton (960 ft.; 1510 inhab.), in North Dakota (p. 420), with the Red River Valley University.

Two lines of the G. N. R. ascend the Red River Valley, one on each side of the river. Through-trains generally follow that on the W. bank, which they reach on crossing from (259 M.) Moorhead (p. 335) to (260 M.) Fargo (900 ft.; p. 335), where the G. N. R. intersects the Northern Pacific R. R. (R. 84). We are here joined by the line running via Fergus Falls (p. 335). Fine fields of wheat are passed. — 339 M. Grand Forks (830 ft.; Northern, $2-21/2;
to Winnipeg. RED RIVER VALLEY. 54. Route. 335

Ingalls Ho., $2), with 4979 inhab., large lumber mills, and the State University of North Dakota (250-300 students), is the junction of the G. N. R. line to Montana described in R. 55. — 436 M. Neche, on the 49th parallel of N. lat., is the last station in the United States, and (437 M.) Gretna is the first station in Canada (custom-house examination). We now run over the tracks of the Canadian Pacific Railway, through a district peopled with Scots, French half-breeds, and Mennonites.

506 M. Winnipeg (The Manitoba, Leland Ho., etc.), see Baedeker's Handbook to Canada.

b. Via Fergus Falls.

489 M. Great Northern Railway in 17½ hrs. (fares as above).

St. Paul and (11 M.) Minneapolis, see p. 325. The train ascends on the E. bank of the Mississippi, parallel to a track on the other side used by trains running towards St. Paul. 29 M. Anoka (3812 inhab. in 1895); 40 M. Elk River. — At (75 M.) St. Cloud (1030 ft.; Grand Central, $2), a city of (1895) 9178 inhab., with large granite quarries, the two lines from St. Paul unite with that from Duluth (p. 330). It is also the junction of a line to Willmar (p. 334). — Farther on we pass through a country so thickly sprinkled with lakes that the line has often had to be led across them on trestles. From (119 M.) Sauk Centre a branch-line runs to the N. to (91 M.) Park Rapids. 132 M. Osakis (Fair View, Lake Ho., $2), on the pretty lake of that name, is a favourite resort of summer-visitors and anglers. 144 M. Alexandria (Alexandria, Geneva Beach Ho., $2), another summer-resort, has good fishing and shooting. 170 M. Ashby (Hotel Kitson, $2½). At (189 M.) Fergus Falls, with (1895) 4497 inhab., the descent of the infant Red River is used by mills and factories. We now run through the interminable wheat-fields of the fertile Red River Valley, one of the principal wheat-growing regions of the world, its crop amounting in favourable years to 50 million bushels. Numerous grain-elevators are seen in all directions. 220 M. Barnesville is the point where the double line up the Red River Valley, mentioned at p. 334, begins. — 243 M. Moorhead, see p. 420. — 244 M. Fargo, see p. 420. Hence to (489 M.) Winnipeg, see p. 334.

c. Via Crookston and Pembina.

482 M. Northern Pacific Railway in 18 hrs. (fares as above).

From St. Paul to (225 M.) Winnipeg Junction, see p. 419. Our line here diverges to the right from the main line (R. 84) and runs to the N.W. through Red River Valley (see above). — 293 M. Crookston (p. 336); 320 M. Grand Forks (p. 334); 369 M. Grafton. Beyond (414 M.) Pembina we enter Canada. Hence to (482 M.) Winnipeg, see Baedeker's Handbook to Canada.
55. From St. Paul to Everett and Seattle.

1827 M. Great Northern Railway to (1794 M.) Everett and (1827 M.) Seattle in about 23/4 days (fare, 1st class $50, 2nd cl. $40; sleeper $13.50, family tourist-car, $5). This line, forming a new through-route to the Pacific Ocean, was opened in the beginning of 1893. Through-carriages also run by this route to (1181 M.) Helena in 41 hrs. (fare $40; sleeper $8) and to (1254 M.) Butte in 45 hrs. (same fares). Free Colonist Sleeping Cars are also attached to all through-trains. — Harvest Trains, see p. 334.

The G. N. R. through-trains for Portland (1928 M.) follow this route to Spokane (p. 424) and run thence over the Oregon R. R. to Umatilla (see p. 424), where they join the route described at p. 445 (fares as given at p. 419).

From St. Paul to (220 M.) Barnesville, see R. 54 b. At (300 M.) Crookston we cross the Red Lake River and turn to the left (W.).

Some trains run from Barnesville to Grand Forks via Fargo (comp. p. 334).

At (326 M.) Grand Forks (p. 334) we cross the Red River and the Manitoba-Pacific route (R. 54) and enter North Dakota (p. 420), continuing to traverse a great wheat-country and passing numerous small stations. — 415 M. Devil's Lake (1460 ft.; Sevilla Ho., The Oakwood, $2) lies on the N. shore of the large lake of that name, 50 M. long and 2-8 M. wide, with good bathing and fishing (pickerel, etc.). On the S. shore lie Fort Totten, a U. S. military post (reached by steamer), and the Cuthead Sioux Indian Reservation. — From (433 M.) Church's Ferry and (472 M.) Rugby lines run N. to points in the Turtle Mts. At (491 M.) Towner and again at (532 M.) Minot, where we change to 'Mountain' time (p. xviii), we cross the Mouse River. At (654 M.) Williston we reach the Upper Missouri River, which flows to the left. 674 M. Fort Buford, an important military station, lies on the Missouri, opposite the mouth of the Yellowstone (p. 421). A little farther on we enter Montana (p. 421). 739 M. Poplar, a military post, with a large Indian school. Beyond (795 M.) Nashua we leave the Missouri and follow the Milk River, through a grazing district. 806 M. Glasgow; 866 M. Bowdoin; 906 M. Savoy. Near (941 M.) Chinook the Bear Paw Mts. and the Little Rockies, spurs of the Rocky Mts., are seen to the left.

From (963 M.) Havre (2480 ft.) a line runs to the left (S.) to Great Falls, Helena, and Butte (see below).

From Havre to (218 M.) Helena and (291 M.) Butte, G. N. Railway in 10-1/4 hrs. — This line actually quits the trunk line at (4 M.) Pacific Junction (p. 337). 8 M. Fort Assinaboine, amid the foot-hills of the Bear Paw Mts., is one of the largest and best-equipped military posts in the United States, and has a garrison of nine companies. — 71 M. Fort Benton, on the Missouri, which the line now follows. — 120 M. Great Falls (3200 ft.; Park Hotel, $2 1/2-3 1/2) is a brisk and growing little industrial city of (1896) 12,000 inhab., with large copper-smelting works. It derives its name and importance from the falls formed here by the Missouri, with a total descent of 500 ft. The river contracts here from a width of upwards of 1/2 M. to one of 300 yds. and descends over the Black Eagle Falls (50 ft.), Colters Falls (12 ft.), Crooked Falls (20 ft.), Rainbow Falls (45 ft.), and Great Falls (92 ft.). Near Rainbow Falls is the Giant Spring Fall, formed by a spring or river bursting from the bank of the Missouri, 20 ft. above the channel. Branch-lines run S. from Great Falls to (64 M.) Barker and (67 M.)
Neihart (Belt Mts.) and N. to (199 M.) Lethbridge (Canada). — About 40 M. beyond Great Falls the train enters the Prickly Pear Cañon, threading the "Gate of the Mountains, where the Missouri breaks through the rocky mountain-wall. Farther on we leave the river. — 218 M. Helena, see p. 422. — From Helena to (291 M.) Butte, see p. 422. At Butte we make connection with the Union Pacific Railway for points to the W. (comp. p. 441).

Beyond Havre our line runs nearly due W. through a grazing country, with the Sweet Grass Hills to the N. 967 M. Pacific Junction (p. 336). At (1038 M.) Galata we have our first view of the Rocky Mts. (see below). 1068 M. Shelby Junction, for lines to Great Falls (p. 336) and Lethbridge (Canada). At (1153 M.) Summit (5200 ft.) we cross the Rocky Mts., at an elevation 300-2500 ft. lower than that of any other American railway (comp. pp. 423, 443). The scenery on the W. slope of the Great Divide is imposing. We cross the Flathead River near (1213 M.) Columbia Falls. 1228 M. Kalispell (2945 ft.), the chief town of the Flathead Valley. At (1258 M.) Haskell Pass (4145 ft.) we cross the Cabinet Mts., on the other side of which we follow the Kootenai River, through a district of gold and silver mines. Near (1308 M.) Jennings (2110 ft.) we enter Idaho (p. 424). 1332 M. Kootenai Falls. At (1338 M.) Troy (1880 ft.) we pass from 'Mountain' to 'Pacific' time (p. xviii). From (1371 M.) Bonner's Ferry (1760 ft.) steamers ply to the Kootenai Lake District of British Columbia (comp. Baedeker's Canada). The line now bends to the S. 1405 M. Sand Point, on Lake Pend d'Oreille (p. 424). Farther on we cross the Priest River and Clark's Fork of the Columbia. We enter the State of Washington (p. 424) at (1434 M.) Newport (2120 ft.).

1479 M. Spokane (1870 ft.), see p. 424. Beyond Spokane the line runs almost due W., crossing the Big Bend Wheat Region. 1514 M. Edwall; 1531 M. Harrington (2165 ft.). We now descend, and at (1642 M.) Rock Island Rapids we cross the Columbia River (p. 445), which we follow to (1653 M.) Wenatchee (630 ft.), whence steamers ply to Lake Chelan, situated amid splendid mountain and glacier scenery. The line then follows the Wenatchee for many miles, and beyond (1676 M.) Leavenworth (1165 ft.) passes through the picturesque *Tumwater Cañon. Two engines are needed to haul the train up the ascent of the Cascade Mts. (p. 425). 1709 M. Cascade Tunnel Station (3375 ft.) lies at the E. end of the enormous tunnel (3 M. long) now being bored through the range. In the meantime the train climbs the 'East Side Switchback', a series of zigzags with a maximum gradient of 31/2: 100. Beyond (1713 M.) Cascade Summit (4025 ft.) we descend on the W. side of the Cascade Range. 1721 M. Wellington lies at the W. portal of the tunnel, which will save 10 M. of curves and zigzags. The train runs through vast forests to (1785 M.) Snohomish and —

1794 M. Everett (Monte Cristo, $21/2), on Puget Sound (p. 525). where we reach tide-water. From this point lines run N. to Fairhaven (p. 526) and South Westminster (British Columbia), and S. to —

1827 M. Seattle (see p. 526).

Baedeker's United States. 2nd Edit. 22
56. From Chicago to St. Louis.

a. Via Illinois Central R. R.

299 M. Railway in 8-10 hrs. (fare $7.50; sleeper $2, parlor-car $1).

From Chicago to (56 M.) Kankakee, see p. 339. Our line crosses the Kankakee River and runs towards the S. At (81 M.) Gilman the St. Louis train diverges to the right (S.W.) from the through-line to Centralia, Fulton, and New Orleans (see R. 64). 123 M. Laurette, the junction of a cross-line to Rantoul (p. 360). At (148 M.) Clinton (Magill Ho., $1 1/2-2), a railway-centre of some importance, we bend to the left (S.). 170 M. Decatur (p. 453) is also the junction of various lines. At (202 M.) Pana we diverge to the right (S.W.) from the line running S. to Fulton and New Orleans and henceforth follow the tracks of the C. C. & St. L. Railway. 241 M. Litchfield; 276 M. East Alton; 296 M. East St. Louis.

299 M. St. Louis, see p. 349.

b. Via Chicago and Alton R. R.

283 M. Railway in 8-10 1/2 hrs. (fares as above).

Chicago (Canal St. Depot), see p. 308. The line runs to the S.W. through the prairies of Illinois, passing at first several suburban stations. 33 M. Lockport (2449 inhab.), the terminus of the Chicago Drainage Canal (p. 313); 37 M. Joliet (see p. 323). — 74 M. Dwight, the original home of Keeley’s ‘Gold Cure’.

At Dwight diverges (to the right) the line for (80 M.) Peoria, to which solid through-trains run from Chicago in 4 3/4 hrs. — Peoria (National, $2-4; Fey, $2 1/2-3 1/2; Prochazka, $2-3), a busy industrial city with (1890) 41,024 inhab., is celebrated for its whiskey and has many substantial buildings. The value of its industrial products in 1890 was $55,504,523. It is also connected by through-trains with Kansas City and St. Louis.

124 M. Normal, with large nurseries, the State Normal College, and a Soldiers’ Orphan Home. — 126 1/2 M. Bloomington (825 ft.; Windsor, $2-3; Phoenix, $2-2 1/2; Folsom, $2-2 1/2), a busy manufacturing town of 20,484 inhab. and an important railway-centre.

185 M. Springfield (630 ft.; Leland Ho., $2 1/2-4; St. Nicholas, $2), the capital of Illinois, is a well-built and tree-shaded city of 24,963 inhab. (‘Flower City’), the trade and industry of which are promoted by rich coal-mines in the vicinity. The State Capitol is a large building, with a dome. The State Arsenal and the extensive manufactory of the Illinois Watch Co. repay a visit. Oak Ridge Cemetery, 2 M. to the N., contains the grave of Abraham Lincoln (1809-65), marked by a handsome monument, erected in 1874 at a cost of $200,000 (40,000 t.). The house he occupied when elected President in 1861 is in Eighth St., four blocks from the Court House. It now belongs to the State and is open to the public, but its contents do not date from Lincoln’s occupancy. — 210 M. Girard; 251 M. Godfrey. — 257 M. Alton (470 ft.; Madison, $2 1/2), an industrial city of 10,294 inhab., lies on high ground on the E. bank of the
Mississippi, 3 M. above the mouth of the Missouri. In 1897 a monument was erected here to Elijah P. Lovejoy (1802–37), the anti-slavery martyr. — The train descends along the Mississippi and at (280 M.) East St. Louis crosses it by a fine bridge (p. 302).

283 M. St. Louis, see R. 61.

57. From Chicago to Cincinnati.

a. Via Indianapolis.

306 M. Cleveland, Cincinnati, Chicago, & St. Louis Railway (‘Big Four Line’) in 8-10 hrs. (fare $8; sleeper $2; reclining-chair $1).

Chicago (Illinois Central Station), see p. 308. The train runs along the lake-front (p. 312) to (9½ M.) Grand Crossing and then turns to the S. (inland). 34 M. Monee (800 ft.), on the watershed between Lake Michigan and the Mississippi; 56 M. Kankakee (625 ft.), a railway and industrial centre with 9025 inhabit., on the Kankakee River. Our line now crosses the Iroquois River and runs to the S.E. Beyond (86 M.) Sheldon we enter Indiana. — 131 M. Lafayette (590 ft.; Lahr Ho., $2-3), an industrial city of 16,243 inhabit., at the head of navigation on the Wabash River. Purdue College has 700 students of agriculture, engineering, and other practical branches. The battlefield of Tippecanoe (see p. 298) lies about 7 M. to the N.

Indianapolis (700 ft.), the capital and largest city of Indiana, with (1896) 194,000 inhabit., lies on the W. branch of the White River, in the midst of a wide plain. It is a great railway-centre, carries on an extensive trade in live-stock, and produces manufactures to the value of 33 million dollars ($6,600,000) annually. The chief attraction of the city lies in its beautiful residence-quarter, the tasteful houses, shady streets, and grassy lawns of which make one of the most beautiful scenes of the kind in the United States.

The State Capitol is a large building with a central tower and dome, erected at a cost of $2,000,000. The Court House is also an imposing edifice. In Monument Place, to the E. of the Capitol, is the “Soldiers and Sailors Monument, 255 ft. high, by Bruno Schmidt of Berlin. Other large and important buildings are the Blind Asylum, 1½ M. to the N. of the Monument; the United States Arsenal, on a hill to the E. of the city; the Deaf & Dumb Asylum, also to the E.; the Propylaeum, a unique building, owned and controlled by a stock-company of women for literary purposes; the City Library; and several Churches. The Central Hospital for the Insane lies 1½ M. to the W. of the city. A visit may be paid to Crown Hill Cemetery, 2 M. to the N., and to some of the large Manufactories (iron, terracotta, pork-packers) and the Stockyards (to the S.W., beyond the river).

Beyond Indianapolis the train continues to run towards the S.E. 242 M. Greensburg. At (283 M.) Lawrenceburg Junction we reach the Ohio, which we follow to the E. to —

306 M. Cincinnati (Central Union Station), see p. 344.
b. Via Logansport.

298 M. Pittsburg, Cincinnati, Chicago, & St. Louis Railway in 8-10 hrs. (fares as above).

From Chicago to (117 M.) Logansport, see R. 44 b. At (122 M.) Anoka Junction the Cincinnati line diverges to the right from that to Columbus and Pittsburg (see p. 348). 175 M. Anderson. 224 M. Richmond (Westcott, $2 1/2-4 1/2), with 16,608 inhab., is the entrepot of a rich agricultural district. At (240 M.) Eaton we turn nearly due S. 267 M. Hamilton, an industrial town with 17,565 inhab., on the Miami.

298 M. Cincinnati (Pan Handle Depot), see p. 344.

58. From New York to Cincinnati.

a. Via Pennsylvania Railroad.

757 M. Railway in 23-33 hrs. (fare $18; Pullman car $4). Through carriages.

From New York to (90 M.) Philadelphia, see R. 31 a; from Philadelphia to (444 M.) Pittsburg, see R. 37; from Pittsburg to (637 M.) Columbus, see R. 44 b.

At Columbus our line diverges to the left (S.) from that to Chicago (comp. p. 290). — 692 M. Xenia (920 ft.; Florence, $2-2 1/2), a city of 7301 inhab., with paper-mills and twine manufactures, Wilberforce University (for coloured students), a large Orphan's Home, and other well-known educational and charitable institutions.

757 M. Cincinnati, see R. 59.

b. Via Chesapeake & Ohio Railway.

829 M. Railway in 24 hrs. (fare $18; sleeper $4). The F. F. V. (Fast Flying Virginian) Vestibule Limited Train on this route leaves New York at 5 p.m. (no extra charge). — The scenery on this route is varied and often very fine, especially in crossing the Blue Ridge and Allegheny Mts. and in the valleys of the Greenbricr and the New River.

From New York to (90 M.) Philadelphia (Pennsylvania R. R.), see p. 228; thence to (186 M.) Baltimore (Penna. R. R.), see p. 267; thence to (229 M.) Washington (Baltimore & Potomac R. R.), see p. 274. From Washington the line follows the tracks of the Southern Railway (see R. 70) to (315 M.) Orange.

At (323 M.) Gordonsville (500 ft.) we are joined by the line from Richmond and Old Point Comfort.

344 M. Charlottesville (450 ft.; Jefferson Park, at Fry Springs, $2 1/2-3; Gleason, Wright's, $2-2 1/2; Rail. Restaurant), a town of 5591 inhab., on Moore's Creek, is of interest as the home of Jefferson and the site of the University of Virginia.

The University of Virginia, founded in 1819, mainly through the exertions of Thomas Jefferson, lies 1 1/2 M. to the W. of the town (street car 5c.) and is attended by 500 students. The original buildings erected
from Jefferson's designs and under his supervision consist mainly of parallel ranges of one-story dormitories, the inner rows bordering a tree-shaded campus, at one end of which stands the Rotunda (view from roof), rebuilt by McKim, Mead, & White in 1897 after a fire. The new buildings include the Lewis Brooks Museum of Natural History (8-6; with a facsimile of the mammoth) and a good Observatory.

Monticello, the home of Thomas Jefferson (1743-1828), is finely situated on a view-commanding hill, 21/2 M. to the S.E. of Charlottesville, and is an interesting example of the architecture of the period (visitors not admitted to the interior; adm. to grounds 25c.). The great statesman is buried in a small private graveyard adjoining the road leading to the house.

A visit may be paid to the interesting cellars of the Monticello Wine Co., where various good wines are produced from the grapes of the vicinity.

From Charlottesville to Lynchburg and the South, see R. 70a.

Our line now runs towards the W. and begins to ascend among the Blue Ridge Mts. 367 M. Afton (1405 ft.; Afton Ho., $2; Mountain Top Ho., 11/2 M. from Afton and 2000 ft. above the sea, $2), pleasantly situated near the top of the ridge (tunnel) and affording fine views of the Piedmont Valley. At (371 M.) Basic City (Brandon, $2-3) we cross the Norfolk & Western R.R. (see p. 380). 384 M. Staunton (1385 ft.; Eakleton, $21/2-3; Virginia Ho., $21/2), an industrial town with 6975 inhab. and several large educational institutions, lies on the plateau between the Blue Ridge and the Allegheny Mts.

Staunton is the junction of a line (B. & O. R.R.) to (36 M.) Lexington (Irvine, Lexington, $2-21/2), the seat of the Washington and Lee University (175 students; good portraits by C. W. Peale of Washington and Lafayette) and the Virginia Military Institute. Generals Robert E. Lee and 'Stonewall' Jackson are both buried here, and statues of them have been erected.

North Mts. (2075 ft.) rises to the right near (392 M.) Swoope's (1645 ft.). 416 M. Goshen (1410 ft.; Allegheny Hotel, $3-5) is the junction of a narrow-gauge line to the (9 M.) Rockbridge Alum Springs (2000 ft.; Grand, Brook, Central, $3). — 423 M. Millboro (1680 ft.) is the station for Millboro Springs, Bath Alum Springs, etc. — 440 M. Clifton Forge (1050 ft.; Rail. Restaurant), on the Jackson River, is the junction of the James River Branch of the C. & O. R.R. We now change from Eastern to Central time. — From (453 M.) Covington (1425 ft.; Intermont, well spoken of, $2-3), a branch line runs to Hot Springs (see below).

From Covington to Hot Springs, 24 M., railway in 11/4 hr. (through-sleeper from New York via Washington). Hot Springs are connected by good roads, traversed by coaches, with (21/2 M.) Healing Springs and (5 M.) Warm Springs. All these thermal springs, situated in a mountain-girt valley 2000-2500 ft. above sea-level, are used both for drinking and bathing and are efficacious in gout, rheumatism, liver and cutaneous complaints, dyspepsia, scrofula, etc. All are provided with ample hotel and cottage accommodation, the transient rates varying from $21/2 per day at the Healing Springs Hotel, to $4 and upwards per day at the Homestead and Virginia Hotels at Hot Springs (cheaper by the week or longer). The Hot Springs have a temperature of 78-110° Fahr., the Warm Springs of 90°, and the Healing Springs of 84°. The scenery in the neighbourhood is picturesque, and numerous pleasant excursions can be made. There is a golf-course at Hot Springs.

At (469 M.) Allegheny (2070 ft.), on the crest of the Allegheny Mts., we thread a tunnel 1600 yds. long. Coaches run hence to (9 M.) Sweet Chalybeate Springs and (10 M.) Sweet Springs (2000 ft.;
Hotel, $2 1/2), one of the oldest and most popular of Virginian resorts (water good for dyspepsia, dysentery, etc.).

475 M. White Sulphur Springs (1920 ft.; *Grand Central Hotel, $3-4 per day, $21 per week, $75 per month; numerous boarding houses and cottages), the largest and most fashionable of the Virginian spas, is finely situated in the heart of the Alleghenies and is visited annually by thousands of guests.

For nearly a century the Greenbrier White Sulphur Springs have been the typical resort of the wealth and aristocracy of the South; and the pictures of Southern life, beauty, and fashion still seen here will be found of great interest by the European or Northern visitor. The valley is well wooded and affords delightful drives. The gaiety of the place is promoted by numerous balls and other diversions.

The temperature of the water is 62° Fahr. and its chief ingredients are nitrogen, oxygen, carbonic acid, hydro-sulphuric acid, sulphates of lime and magnesia, and carbonate of lime. It is used both internally and externally, and is efficacious in dyspepsia, liver complaints, nervous affections, gout, rheumatism, skin diseases, asthma, etc. Mud baths are also used. The spring yields 30 gallons per minute. Large swimming-baths.

Among the most prominent of the mountains enclosing the valley are Kate's Mt. (3600 ft.), 1 M. to the S.; Greenbrier (3600 ft.), 1 M. to the W., and the White Rock (3200 ft.), 3 M. to the S.W.

The train now descends the valley of the Greenbrier. Coaches run from (492 M.) Fort Spring (1625 ft.; inn) to (14 M.) Salt Sulphur Springs (Hotel, $2 1/2), and from (508 M.) Lowell (1610 ft.) to (12 M.) Red Sulphur Springs (Hotel, $2 1/2), resembling the Faux Bonnes of the Pyrenees (54° Fahr.). Beyond (520 M.) Hinton (1375 ft.) we follow the New River, with its romantic falls. 542 M. Quinnimont (1195 ft.); 572 M. Hawk's Nest (630 ft.; hotel), opposite a huge cliff 1200 ft. high; 581 M. Kanawha Falls (670 ft.), with a pretty waterfall on the Kanawha River, formed by the confluence (2 M. above) of the New River and the Gauley.

The train now leaves the picturesque scenery and reaches a more open district. Numerous coal-mines. To the right flows the Kanawha. 617 M. Charleston (600 ft.; Hot. Ruffner, $2-3), the capital of West Virginia, a city of 6743 inhab., with a new State House. At (564 M.) Guyandotte (560 ft.) we reach the Ohio River. 667 M. Huntington (Rail. Restaurant). At (677 M.) Catlettsburg (545 ft.) we cross the Big Sandy and enter Kentucky (the 'Blue Grass State'). The train now follows the left bank of the Ohio all the way to Cincinnati. 687 M. Russell or Ironton (10,930 inhab.), on the Ohio (right) bank of the river; 765 M. Maysville; 772 M. South Ripley; 825 M. Newport (p. 347). The train now crosses the Ohio to —

829 M. Cincinnati (Central Union Station), see p. 344.

c. Via Cleveland.

886 M. Railway in 22-26 hrs. (fare $18; sleeper $4). N. Y. C. R. R. to (440 M.) Buffalo; Lake Shore Railway thence to (628 M.) Cleveland; and Cleveland, Cincinnati, Chicago, & St. Louis Ry. thence to (866 M.) Cincinnati. Buffalo may also be reached by the routes mentioned at pp. 214-219. Through sleeping-cars on the express trains.
From New York to (440 M.) Buffalo, see R. 28a; from Buffalo to (623 M.) Cleveland, see R. 46a.

From Cleveland the railway runs towards the S.W. Neither the country traversed nor the stations passed are of special interest. 698 M. Crestline (p. 290); 703 M. Galion (p. 347); 737 M. Delaware (925 ft.). — 761 M. Columbus, see p. 290. — 806 M. Springfield (990 ft.; Arcade, $2-2½), a manufacturing city (agricultural machinery, etc.) of 31,895 inhab., with fine water-power furnished by the Lagonda Creek and Mad River. It has a large trade in farm products.

830 M. Dayton (745 ft.; Becket Ho., Atlas, $2½-5), a city of 61,220 inhab., lies at the confluence of the Mad River with the Great Miami and manufactures machinery, flour, paper, etc., to the value (1890) of $22,500,000. On a hill 2 M. to the W. is the Central National Soldiers' Home, with 5000 inmates.

886 M. Cincinnati, see p. 344.

d. Via Baltimore & Ohio Railroad.

780 M. B. & O. Railroad in 22½ hrs. (fare $16; sleeper $4).

From New York to (226 M.) Washington, see R. 42b; thence to (480 M.) Grafton, see R. 45.

From Grafton the line runs to the W. through a somewhat uninteresting district, with petroleum-wells and coal-mines. 502 M. Clarksburg, on the Monongahela. 584 M. Parkersburg (615 ft.; Jackson, $2½-3; Blennerhassett, $2-2½), a petroleum-trading city, with 8406 inhab., at the confluence of the Kanawha and Ohio. The train crosses the latter river by a fine bridge and enters Ohio. We now pass from Eastern to Central time (p. xviii). 586 M. Belpre. — 621 M. Athens (655 ft.), on the Hocking, with 2620 inhab. and Ohio University. In the neighbourhood are several Indian mounds. — 681 M. Chillicothe (635 ft.), a city of 11,288 inhab., with considerable manufactures, is the centre of a rich agricultural district. 738 M. Blanchester; 755 M. Loveland; 769 M. Norwood.

780 M. Cincinnati (Central Union Station), see p. 344.

e. Via Erie Railroad.

From New York to (729 M.) Marion Junction, see R. 47e. From this point the line follows much the same route as the C. C. C. & St. L. Railway (R. 58e). 778 M. Urbana (1030 ft.), an industrial city with 6510 inhab. and a Swedishborgian College. 792 M. Springfield (see above); 813 M. Dayton (see above); 837 M. Hamilton (p. 340).

872 M. Cincinnati, see p. 344.
59. Cincinnati.

Railway Stations. Central Union Station (Pl. D, 5), Central Ave. & 3rd St., used by the C. C. C. & St. L., the B. & O., Kentucky Central, and other lines; Pan Handle Depot (Pl. F, 4), Pearl & Butler Sts., for the Pennsylvania lines, etc.; Cincinnati, Hamilton, & Dayton Depot (Pl. C, 4, 5), 6th St.; Chesapeake & Ohio Station (Pl. D, 5), 4th St., near Smith St.; Court Street Station (Pl. E, 3), for the Cin., Lebanon, & Northern R. R. and other lines.
— Omnibuses and Cabs meet the principal trains (to the hotels, 50 c. each).

Hotels. Grand Hotel (Pl. a; D, 4, 5), Central Ave., cor. 4th St., $3-5. R. from $1; St. Nicholas (Pl. b; D, 4), Race St., cor. 4th St., R. from $1/2; St. Clair (Pl. c; C, 4), Mound St., cor. 6th St., $2/3; Burnet Ho. (Pl. d; D, 4), Vine St., cor. 3rd St., $3-5. R. from $1/2; Gibson Ho. (Pl. e; D, E, 4), Walnut St., near 4th St., $3-4; Emery (Pl. f; D, 4), R. from $1; Palace (Pl. g; D, 4), $2-3; The Stag (Pl. h; D, 4), 420 Vine St. (for men), R. from 50 c.; Dennison, cor. of Fifth and Main Sts., from $2, R. from 50 c.; Munro (men only), Seventh Street, with Turkish Baths, R. from $1.

Restaurants. St. Nicholas Hotel, see above; Gibson Café, Walnut St.; Sulamoni, 9 Shillito Ave.; Stage Café, Vine St. There are numerous fair restaurants with moderate charges throughout the business-quarter. — Beer Gardens, in the German style (concerts in summer), abound on the hills round the city.

Tramways (electric and cable) traverse all the chief streets and cross to Covington and Newport (p. 347). Some of them afford charming rides of 5-15 M. Uniform fare 5 c. — Cabs: per drive, each pers. 25-50 c.; with two horses, 1-2 pers. $1, each addit. pers. 50 c.; per hr. $2, each addit. hr. $1/2; heavy luggage extra. — Ferries to Covington from the foot of Central Ave.; to Ludlow, from foot of 5th St. — Five Inclined Planes (similar to those at Pittsburg, p. 263) ascend to the tops of the surrounding hills: (1) Mount Adams & Eden Park (Pl. E, 4); (2) Mt. Auburn (Pl. D, 2, 3); (3) Cincinnati & Clifton (Pl. D, 2); (4) Price's Hill (Pl. A, 4); (5) Fairview Heights Incline (Pl. C, 4). Comp. p. 346. — Steamers ply to the chief ports on the Ohio and Mississippi.

Theatres. Grand Opera Ho. (Pl. D, 4), Vine St.; Walnut St. Theatre, Walnut St., between 6th and 7th Sts.; Robinson's Opera Ho. (Pl. D, 4), cor. Plum & 9th Sts.; Heuck's (Pl. D, 3), 437 Vine St.; People's Theatre, cor. of 13th and Vine Sts. (Pl. D, 3); Pike Opera House (Pl. D, E, 4), 4th St., between Vine and Walnut Sts.; Odeon, Elm St. (Pl. D, 3); Havlin's Theatre (Pl. D, 4); Fountain Square Theatre (Pl. D, 4), Lodge St., adjoining Fountain Sq. Some of these are open on Sunday. — Zoological Gardens, see p. 346.

Pleasure Resorts (open in summer, with theatrical performances, concerts, etc.; much frequented by all classes). The Lagoon, on the Kentucky side of the river, opposite Price Hill (Pl. A, 5), with park and lake (tramway in 1/2 hr., 5 c.). — Chester Park, 5 M. to the N. (tramway 5 c.), with a fine bicycle-track. — Coney Island, 10 M. up the river, reached by hourly steamers from the foot of Vine St. (Pl. E, 5).

Post Office (Pl. E, 4), 5th St. (6 a.m. to 10 p.m.).

Cincinnati (430-550 ft. above the sea), the chief city of Ohio, the eighth in the United States, and one of the most important manufacturing and commercial centres of the Middle West, is finely situated on two terraces rising from the right (N.) bank of the Ohio and is surrounded by an amphitheatre of hills 400-500 ft. high. It has a frontage of 14 M. on the river. The main portion of the city is regularly laid out and its streets are well paved. The chief shopping district is 4th St., between Walnut St. and Elm St. The best residential quarters are on the surrounding highlands. In 1890 Cincinnati contained 296,908 inhab., of whom about a third were of
German origin, but the annexation of suburbs in 1895-96 has added considerably to the total. The Germans formerly resided mainly to the N. of the Miami Canal, and that district is known as 'Over the Rhine'. On the opposite bank of the Ohio, in Kentucky, lie the cities of Covington and Newport (p. 347), connected with Cincinnati by five fine bridges.

Cincinnati was settled in 1788 and named in honour of the Society of the Cincinnati (officers of the Army of the Revolution). Mounds containing relics seem to indicate that part of the site was occupied in pre-historic times. By the beginning of this cent. it contained about 7,900 inhab., and in 1814 it received its city charter. Its growth dates mainly from the construction of the Miami Canal (1830) and the advent of the railway system (1840). In 1850 it contained 115,436 inhab., in 1870 it had 216,239, and in 1880 it had 255,708.

Industry and Trade. The value of Cincinnati's manufactures in 1890 was $181,500,000 (36,300,000$), produced by 92,000 hands. The staple articles include iron, machinery, carriages, boots and shoes, school-books, clothing, harness, furniture, pottery, beer, and whiskey. Pork-packing is also extensively carried on. Its trade, transacted by river and rail, is also very important.

*Fountain Square* (Pl. D, E, 4), an expansion of 5th Street, may, perhaps, be called the business-centre of the city and from it start many of the tramway-lines. In the middle of the square stands the *Tyler-Davidson Fountain*, one of the most successful works of art in the United States, erected in 1871. It was designed by August von Kreiling and cast at the Royal Bronze Foundry at Munich. To the N., at the corner of 5th St. and Walnut St., is the U. S. Government Building (Pl. E, 4), accommodating the Post Office, Custom House, and U. S. Law Courts.

By following 5th St. to the W. and turning to the left down Vine St., we pass the entrance to the Emery Arcade (Pl. D, 4) and reach, at the corner of the busy 4th Street, the *Chamber of Commerce* (Pl. D, 4), designed by H. H. Richardson (p. xci) and perhaps the finest building in the city.

Following 4th St. towards the W., we soon reach Plum Street (Pl. D, 4, 5), which we may follow to the right (N.) to *St. Paul's Church* (Pl. D, 4; Epis.), at the corner of 7th St.; the R. C. Cathedral of St. Peter (Pl. D, 4), at the corner of 8th St. (with a Murillo and other pictures); and the Synagogue (Pl. D, 4), opposite the last. A little to the S., in the block bounded by Central Ave. and 8th, 9th, and Plum Sts., is the new *City Hall* (Pl. D, 4), a large and handsome red building in a Romanesque style, with a lofty tower (*View*), erected at a cost of $1,600,000. A little to the E., in Vine St., between 6th & 7th Sts., is the Public Library (Pl. D, 4; 200,000 vols.).

To the N. of this point, 'over the Rhine' (see above), is Washington Square (Pl. D, 3), with the Springer Music Hall and the Exposition Building.

Among other buildings may be mentioned the County Court House (Pl. E, 4), St. Xavier's College (Pl. E, 4), the Oddfellows'
Temple, the Cincinnati Hospital (Pl. D, 3, 4), the huge Workhouse (Colerain Ave.), and the House of Refuge.

The chief park of Cincinnati is Eden Park (Pl. E, F, 2, 3), 216 acres in extent, which lies on the hills to the E. and affords fine views of the city and river (band on Sun.). It contains the Art Museum (see below), the main reservoir of the City Water Works, the High Service Pumping Station, and the Water Tower. The last, a prominent landmark, may be ascended by an elevator; the top affords the best View of the city and its environs, the river, and the Kentucky Highlands.

We may reach the park by the electric cars from Fountain Sq., which are elevated bodily by the inclined plane railway (Pl. E, 4) and run through the park, past the door of the Art Museum (through-fare 5 c.). [Near the head of the inclined plane is the Rookwood Pottery (see below; visitors admitted.) Or we may take the Gilbert Ave. electric cars to the Eden Park Entrance, 5 min. from the Art Museum. [Elsinore, a towered gateway, a little farther down Gilbert Ave., on this route, was erected by the City Water Works.]

The Art Museum (Pl. F, 3), a handsome building of rusticated masonry with a red-tiled roof, is open daily, 9-5 (Sun. 1-5; adm. 25 c., Sun. & Thurs. 10 c.; catalogues 10 c.). Adjacent is the Art Academy (400 students). Both are maintained by a private corporation.

The collections include Paintings, Sculptures, Engravings, Etchings, Metal Work, Textile Fabrics, Pottery, American Ethnology and Archaeology, etc. Among the pictures, on the upper floor, are specimens of Bol, Calame, Haydon, Lessing, Maratta, Rubens (No. 33), Tiepolo (106), Tintoretto (106), and modern French, German, and American masters. The art of Wood Carving has been successfully revived at Cincinnati, and the specimens of this are worth attention. Rookwood Pottery (see above), another art-product of Cincinnati, is also well represented in the museum. The *Bookwalter Loan Collection affords good illustrations of Oriental art.

From the top of the Clifton Heights Inclined Railway (Pl. D, 2) we may go by electric car to the Burnet Woods Park (Pl. D, 1), a fine piece of natural forest. To the S. of it, facing Clifton Ave. (Pl. D, 1), are the handsome new buildings of the University of Cincinnati. — A good view is obtained from the top of the Price's Hill Inclined Plane (Pl. A, 4). — The *Spring Grove Cemetery, 5 M. to the N.W., is picturesque and contains some interesting monuments. — The *Zoological Garden (Pl. D, 1; adm. 25 c.; open daily, Sun. included), reached by electric tramway along Main St., contains a fine collection of animals and is a favourite resort (restaurant; concerts).

The *Suspension Bridge (Pl. E, 5), connecting Cincinnati with Covington, was constructed by Roebling (p. 31) in 1865 at a cost of $1,800,000 and rebuilt and enlarged in 1897 at an additional cost of $500,000. It is 2720 ft. long (including the approaches; between the towers 1005 ft.), 52 ft. wide, and 103 ft. above low-water mark (toll 2 c.). The new *Central Bridge (Pl. E, 5) is a handsome cantilever structure; and there are besides three Railway Bridges, two of which are very massive and impressive. The Levee or Public Land
ing (Pl. E, 5, 4), below the Newport Bridge, 1000 ft. long, usually presents a busy and animated sight.

Covington (37,371 inhab.) and Newport (24,918 inhab.) are two uninteresting cities in Kentucky, which need not detain the stranger. They are separated from each other by the Licking River (crossed by a suspension bridge) and contain the residences of many Cincinnati merchants. The U. S. Government Building in Covington is a good specimen of modern Gothic.

Pleasant drives may be taken to Walnut Hills, Avondale, Mt. Auburn, Clifton, Spring Grove, Price’s Hill, and Fort Thomas. The last, one of the most important stations of the U.S. army, is finely situated in the hills behind Newport, partly on a promontory high above the river (view). The daily guard-mounting is accompanied by a concert by the regimental band, and there is a dress-parade daily in summer (Sat. and Sun. excepted). It may be reached by electric car in 40 min. (5 c.). — The church of St. Francis de Sales (Pl. G, 1), in Walnut Hills, contains the largest bell in N. America, weighing 15 tons.

Cincinnati will probably be the most convenient point from which the scientific traveller can visit the famous Serpent Mound. This is situated on the bank of Brush Creek, in Adams County, Ohio, and the nearest railway-station is Peebles, 71 M. to the E. of Cincinnati, by the Cincinnati, Portsmouth, & Virginia R. R. (station at cor. of Court St. and Broadway). The mound, which is 7 M. from Peebles (omn. or carr.), is in the form of a serpent, 1000 ft. long and 5 ft. high, and is 30 ft. wide at the base. The tail ends in a triple coil, and the mouth is open, as if to swallow an oval mound which rests partly between the distended jaws. This oval is 4 ft. high, with diameters of 109 and 39 ft. The combined figure has been supposed to represent the Oriental cosmological idea of the serpent and the egg.

From Cincinnati to Chicago, see R. 57; to St. Louis, see R. 60d; to Louisville, Chattanooga, and New Orleans, see R. 63.

60. From New York to St. Louis.
   a. Via Cleveland and Indianapolis.

From New York to (440 M.) Buffalo, see R. 28a; thence to (623 M.) Cleveland, see R. 46a; thence to (703 M.) Galion, see p. 343.

At Galion our line diverges to the right from that to Cincinnati (see p. 343). 724 M. Marion; 764 M. Bellefontaine (1215 ft.); 804 1/2 M. Versailles; 821 1/2 M. Union City (1110 ft.), partly in Ohio and partly in Indiana; 870 M. Anderson.

906 M. Indianapolis (Rail. Restaurant), see R. 57a.

Beyond Indianapolis the train runs to the S.W. through Indiana. 945 M. Greencastle (780 ft.), with 4390 inhab. and the Depauw University (Methodist; 700 students). — 978 M. Terre Haute (490 ft.; Terre Haute Ho., $2 1/2-4, R. $1-2 1/2; Filbeck, $2-2 1/2), a busy commercial and industrial city of 30,217 inhab., on the Wabash River, with some fine buildings and several educational institutions. It is an important railway-centre, and steamers descend the Wabash hence to Vincennes (p. 348). — The train now crosses the Wabash and enters Illinois. 1035 M. Mattoon (p. 360); 1074 M.
348 Route 60. VINCENNES.

Pana (p. 338); 1115 M. Litchfield (685 ft.). From (1148 M.) East Alton (470 ft.) the line runs S. along the valley of the Mississippi. At (1168 M.) East St. Louis we cross the Eads Bridge (p. 352).
1171 M. St. Louis, see p. 349.

1058 M. Railway (Pennsylvania Lines) in 32-36 hrs. ($24.25; sleeper $6). From New York to (692 M.) Xenia, see R. 58 a. The St. Louis line here holds on towards the W., while the Cincinnati line (see p. 340) diverges to the left. 708 M. Dayton (p. 343); 750 M. Richmond (p. 340). 818 M. Indianapolis (p. 339). The 'Vandalia Line', which we now follow, takes nearly the same course as the line above described. 856 M. Greencastle; 890 M. Terre Haute (p. 347); 958 M. Effingham; 970 M. Altamont; 990 M. Vandalia; 1030 M. Greeneville; 1055 M. East St. Louis.
1058 M. St. Louis, see p. 349.

c. Via Buffalo and Toledo.

From New York to (440 M.) Buffalo, see R. 28 a; thence to (736 M.) Toledo, see R. 46 a. — From Toledo the train runs towards the S.W., touching the Maumee River at (772 M.) Napoleon (680 ft.) and crossing it at (786 M.) Defiance (700 ft.). Beyond (807 M.) Antwerp we enter Indiana. At (830 M.) Fort Wayne (p. 298) we intersect the Pennsylvania R. R. and 'Nickel Plate' routes from New York to Chicago. 873 M. Wabash (740 ft.); 887 M. Peru (685 ft.); 903 M. Logansport (p. 291); 940 M. Lafayette (p. 339). At (961 M.) Attica we cross the Wabash and at (978 M.) State Line we enter Illinois. 1060 M. Decatur (p. 338); 1120 M. Litchfield (see above); 1169 M. East St. Louis.
1172 M. St. Louis, see p. 349.

d. Via Washington and Cincinnati.

From New York to (780 M.) Cincinnati, see R. 58 d. Beyond Cincinnati the train (Baltimore & Ohio & South-Western Railway) follows the N. (right) bank of the Ohio for some distance, crossing the Great Miami and entering Indiana beyond (795 M.) North Bend. At (806 M.) Aurora (490 ft.) it leaves the river. — 853 M. North Vernon (725 ft.) is the junction of a branch-line to (54 M.) Louisville (p. 353). At (931 M.) Shoals we cross the S. fork of the White River, and beyond (953 M.) Washington the N. fork of the same river. 972 M. Vincennes, a city with 8853 inhab., on the E. bank of the Wabash (steamers to Terre Haute, see p. 347). We here cross the Wabash and enter Illinois. 1056 M. Odin; 1119 M. East St. Louis.
1122 M. St. Louis, see next page.
61. St. Louis.

Arrival. The Union Station (Pl. D, 2), a magnificent structure erected in 1895 at a cost of $5,000,000, is in Market St., between 18th and 20th Sts. The train-shed is 700 ft. long and 600 ft. wide, containing 32 tracks. Hacks (see below) and hotel-omnibuses (50 c.) are in waiting. — There are also small stations for suburban traffic at the foot of Vine St. (Pl. F, 2) and at the cor. of 4th St. and Chouteau Ave. (Pl. F, 3). — The Steamboat Landings (Pl. F, 2) are near the Eads Bridge.

Hotels. St. Nicholas (Pl. i; E, 2), cor. of 8th and Locust Sts., R. from 4; Southern (Pl. a; F, 2), a huge caravanserai bounded by Walnut, Elm, 4th Sts., and Broadway, $3-41/2; Planters (Pl. b; F, 2), 4th St., between Chestnut & Pine Sts., recently rebuilt, from 4, R. from 2; Terminal, at the Union Station (Pl. D, 2); Lindell (Pl. c; F, 2), cor. Washington Ave. & 6th St., $21/2-41/2, R. from 1; Laclede (Pl. e; F, 2), Chestnut & 6th Sts.; Imperial (Pl. g; F, 2), Broadway, cor. of Chestnut St.; Moser, 811 Pine St.; Barnum (Pl. f; F, 2), cor. Market and 2nd Sts.; Hotel Beers (Pl. d; C, 2), pleasantly situated in Olive St., cor. Grand Ave., a little distant from the centre of the city, $11/2-31/2; *West End (Pl. h; B, 1), Vandeventer Ave., from $21/2, R. from $11/2; Normandie, Franklin Ave., cor. Theresa Ave.; Westerman's Hotel Rozier, cor. of 13th and Olive Sts., R. from 75 c. — At the time of the Fair (p. 350) accommodation should be secured in advance.

Restaurants. Fouust, cor. Elm St. and Broadway; White, 315 Pine St. and 918 Olive St.; Thatcher, 413 N. 7th St. and 921 Olive St.; Luncheon Rooms of the Delicatessen Co. in Olive St. (S. side, betw. 7th and 8th Sts.), 4th St., Lucas Pl., cor. 19th St. (near Museum), etc.; Grand Café, 408 Washington Ave.; Broadway Café, 203 N. Broadway. — There are numerous Beer Gardens in the German style (concerts in summer).

Trolley lines (electric and cable) traverse the city in all directions and extend to many suburban points (fare within the city-limits 5 c., beyond 5 c. more). — Carriages (4-4 pers.) 1 M. $1, per hr. $2, each additional hr. $11/2. — Ferries to East St. Louis from foot of Market St., Carr Sts., and Spruce St. — Steamers ply to points on the Mississippi, Missouri, Ohio, Illinois, Tennessee, etc.

Post Office (Pl. E, 2), Olive St., open 7-6 (Sun. 9-12).

British Vice-Consul, Mr. Western Bascomb.

St. Louis (4-500 ft. above the sea), the largest city of Missouri and the fourth of the United States, lies on the W. bank of the Mississippi, about 20 M. below the mouth of the Missouri. It has a frontage of nearly 20 M. on the river and rises from it in three terraces, the third of which is about 200 ft. above the river-level. The city is regularly laid out, on the Philadelphia plan, Market St., running E. and W., being the dividing line between N. and S. The streets running N. and S. are numbered. Broadway or Fifth Street is the chief shopping thoroughfare, while other important business streets are Fourth St. (banks), Olive St. (retail trade), Washington Ave. (wholesale trade), Third St. (insurance-offices), and 1st (or Main) and 2nd Streets (along the river; commission houses). The
City is divided into a N. and a S. side by the valley of Mill Creek (now filled in), which is spanned by seven bridges. The population of St. Louis in 1890 was 451,770, including about 150,000 Germans; in 1898 it was estimated at about 650,000.

History. The fur-trading station of St. Louis or Pain Court was established by the French in 1764, and it still bears traces of its French origin in the names of some of its streets and leading families. Louis XV. had just ceded the territory to the E. of the Mississippi to England, while at the same time he had made a secret treaty, transferring the W. bank to Spain. It was not till 1770, however, that Spanish authority was established at St. Louis. In 1804 St. Louis, the population of which was still below 1000, passed to the United States, with the rest of the territory then known as Louisiana. This was the signal for immigration from the States, and the English-speaking inhabitants soon outnumbered the French. St. Louis was incorporated in 1809 and by 1831 had 6000 inhabitants. In 1840 the population had swollen to 16,459, in 1859 to 185,000, and in 1880 to 350,522. On May 27th, 1896, St. Louis was visited by a terrific tornado, which destroyed 300 lives and property to the value of $10,000,000. Traces of its devastation are still visible on the S. side of the city. — In the first week of October St. Louis is the scene of a popular Fair, which attracts many thousands of visitors. During the so-called Fall Festivities an Exposition is held in the Music Hall and Coliseum, while one night is devoted to the Procession of the Veiled Prophet, in the style of the Mardi Gras at New Orleans (p. 416). The ball in honour of the Veiled Prophet is the society event of the year.

Trade and Industry. St. Louis' position in the centre of the great Mississippi Valley gives it an immense trade, among the staples of which are cotton (600,000 bales yearly), bread-stuffs, packed meats, tobacco, livestock, timber, grain, wool, furs, etc. In manufactures St. Louis ranks fourth among American cities, producing goods in 1890 valued at $225,715,000 (45,743,000 $) and employing 93,600 hands. It is the chief tobacco-making city in the world, and also produces immense quantities of beer, flour, boots and shoes, hardware, stoves, railway and tramway cars, wooden wares, bricks, drugs, biscuits ('crackers'), etc. The Anheuser-Busch Brewery (Pl. E, 4), cor. of 9th and Pestalozzi Sts., employs 2000 men and produces 15 million gallons of beer annually; and the Ligget & Myers Tobacco Co. produces 25-30 million pounds of tobacco in the same period. Strangers may also be interested by visits to the Horse & Mule Market (E. St. Louis; the greatest mule market in the world); to the Simmons Hardware Store (Broadway, just to the S. of Olive St.; warehouse at Cupples Station; a great group of buildings, well worth a visit); and to the Cupples Wooden Ware Co. (at Cupples Station). The N. O. Nelson Manufacturing Co. (supplies for sanitary engineering) is noteworthy as carrying on its immense business on a system of 'profit-sharing'.

The Court House (Pl. F, 2), in Broadway, between Market and Chestnut Sts., is a large and substantial building in the form of a Greek cross. It is surmounted by a dome (300 ft. high), the gallery of which commands an excellent view of the city and river (open till 4 p.m.). The building contains some frescoes by Wimar (see p. 351). A little to the W., in 3rd St., cor. of Chestnut St., is the Chamber of Commerce (Pl. F, 2), the main hall of which, with a painted ceiling, is 220 ft. long (business-hours 10-1; gallery open to visitors). The grand ball of the Veiled Prophet (see above) is held here. — The Cotton Exchange (Pl. F, 2) is at the corner of Main and Walnut Sts.

By following Market St. to the W. from the Court House we soon reach the square named Washington Park, with the new City
Hall (Pl. E, 2). A little to the S., in the square enclosed by Clark Ave. and Spruce, 11th, and 12th Sts., are the so-called Four Courts (Pl. E, 2), built on the model of the Louvre, with a large semicircular wall at the back. — A little to the N. of the City Hall runs the busy Olive Street (Pl. C-F, 2), which we may follow to the left to the Coliseum (Pl. E, 2), a building with 15,000 seats, used for exhibitions, concerts, and conventions; or to the right (E.) to Broadway, passing the Post Office (Pl. E, 2) on the left. In Broadway (Pl. E, F, 2-4), at the corner of Locust St., is the Mercantile Library (Pl. F, 2), which contains 80,000 vols., statues by Miss Hosmer, etc.

A street-car on Washington Ave. or Olive St. will bring us to *Washington University (Pl. D, E, 2), one of the most important of Western universities, the buildings of which are situated at or near the corner of Washington Ave. and 17th St. (New buildings are in course of erection near Forest Park.)

This university is notable for the width of its charter, which includes an ordinary undergraduate department, schools of fine arts, law, medicine, dentistry, and botany, a manual training school, and schools for boys and girls. It is attended by about 700 University students and 1000 others.

Close to the University, at the corner of Lucas Place and 19th St., is the handsome *Museum of Fine Arts (Pl. D, 2; adm. 25 c.).

The contents include large collections of Casts (incl. the Egina Marbles) and Electrotype Reproductions and well-chosen selections of Pottery, Glass, Ivory Carvings, Lace, Wood and Metal Work, etc. Among the pictures are several by Carl Wimar (1829-63), a St. Louis artist who painted characteristic Western scenes from nature.

Opposite the Museum stands the *St. Louis Medical College (Pl. D, E, 2).

The Parks of St. Louis are among the finest in the United States, and their area (2100 acres) is exceeded by those of Philadelphia alone. All those named below are easily reached by tramway.

Forest Park (Pl. A, 2), on the W. side of the city, 4½ M. from the Court House, is the largest park in St. Louis (1370 acres). It has fine trees and drives, but is still in a somewhat unimproved condition. The muddy Des Peres River meanders through it, and it also contains several lakes. The streets leading to, and adjoining, Forest Park contain many of the handsomest residences in the city. — *Tower Grove Park (Pl. A, B, 4), a long narrow oblong (270 acres) in the S.W. part of the city, is beautifully laid out and contains three fine bronze statues (Columbus, *Humboldt, and *Shakespeare), by Ferd. von Miller of Munich. Tower Grove Park is adjoined by Shaw's or the Missouri Botanical Garden (Pl. A, 3, 4), the finest garden of the kind in the United States, which was bequeathed to the city by Mr. Henry Shaw (b. at Sheffield, Eng., in 1800; d. 1889), the founder of the botanical school in Washington University and also the donor of Tower Grove Park (see above). The garden (75 acres in extent), which is open to the public on week-days, is excellently equipped for the purposes of the student and is also a delightful resort for the layman. At one end of the garden is *Mr. Shaw's House, near which is a mausoleum containing his remains. — A little to the E. is Reservoir Park (Pl. C, 3), Compton Heights. — The small *Lafayette Park (Pl. D, 3) suffered greatly from the tornado (p. 350). It contains a bronze replica of Houdon's Washington (p. 367) and a statue of Senator Benton. — Other parks are Carondelet Park (183 acres), in the S., and O'Fallon Park (158 acres) in the N. part of the city. Adjoining the latter are the extensive Bellefontaine Cemetery (360 acres) and Calvary Cemetery (415 acres). — The Fair Grounds, 140 acres
in extent, contain an amphitheatre, a racecourse, etc. On the 'Big Thursday' of Fair Week (p. 350) they are sometimes visited by 125,150,000 people.

The great *St. Louis Bridge (Pl. F, 2), across the Mississippi, is deservedly one of the lions of the city. The visitor is recommended to cross it on foot (toll 5 c.) for the sake of the views up and down stream, and to return by ferry (5 c.) for the view of the majestic arches of the bridge itself.

The bridge, which was designed by Capt. James B. Eads (p. 365), was constructed in 1869-74 at a cost of $10,000,000 (2,000,000 l.). It consists of three steel spans (centre 520 ft., others 502 ft. each) resting on massive limestone piers. The total length is 2070 yds. The bridge is built in two stories, the lower for the railway, the upper for the roadway and foot-passengers. Trains enter the lower track by a Tunnel, 1630 yds. long, beginning near the corner of 12th and Cerre Sts. The highest part of the arches is 55 ft. above the water.

The Merchants' Bridge, 3 M. farther up the river, is a steel truss bridge, and was built in 1889-90, at a cost of $3,000,000. It is used by railways only. It has three spans, each 500 ft. long and 70 ft. high. — A third bridge is to be constructed at the foot of Chouteau Ave. (Pl. F, 3).

The St. Louis Water Works are at Chain of Rocks, and there are water-towers (fine views) in Grand Ave. and Reservoir Park (p. 351).

Among other buildings of importance in St. Louis are the St. Louis University (Pl. C, 2), a Roman Catholic institution in Grand Ave., with 200-300 students; the Roman Catholic Cathedral (Pl. F, 2), in Walnut St.; Christ Church Cathedral (Epis.; Pl. E, 2), Locust St., cor. of 13th St.; the Church of the Redemptorists (Pl. C, 1), Grand Ave.; the Grand Avenue Presbyterian Church (Pl. C, 1); the First Presbyterian Church (Pl. B, 1), Washington Ave., cor. of Sarah St.; the Pilgrim Congregational Church (Pl. D, 2), Washington Ave., cor. Ewing Ave.; the Church of the Messiah (Pl. C, 2), at the corner of Locust St. and Garrison Ave., by Peabody and Stearns; the Jewish Temple (Pl. B, 2), Lindell Boulevard, cor. of Vandeventer Ave.; the Temple Israel (Pl. D, 2), Pine St., cor. Ewing Ave.; the University Club, a fine building at the N.W. corner of Grand and Washington Avenues (Pl. C, 1); the handsome new St. Louis Club, Lindell Boulevard, just to the W. of Grand Ave. (Pl. B, 2); the Mercantile Club (Pl. F, 2), S. E. cor. 7th and Locust Sts.; the Public Library (Pl. E, 2), Locust St., cor. 9th St.; the County Insane Asylum; and the U. S. Arsenal.

Among the favourite pleasure-resorts near St. Louis are Montsano (reached by boat and railway); Jefferson Barracks, 12 M. to the S., a military post of the first class, reached by boat, railway, and tramway (grand parade on Sun., at noon); Crystal City (see p. 363); Creve Coeur Lake, 20 M. to the N.W. (railway); Piasa Bluffs (boat and rail); and Meramec Highlands (rail and tram).

From St. Louis to Cairo, 150 M., railway in 5-6 hrs. — Cairo, see p. 360.

From St. Louis to New Orleans by railway, see R. 64; by steamer, see R. 66; to St. Paul, see R. 66; to Chicago, see R. 66; to New York, see R. 66; to Louisville, see R. 62; to Denver, see R. 91; to Texarkana, see R. 92.
62. From St. Louis to Louisville.

274 M. LOUISVILLE, EVANSVILLE, AND ST. LOUIS RAILWAY in 10 hrs. (fare $8, sleeper $2½).

St. Louis, see p. 349. The train crosses the Eads Bridge (p. 352) and runs to the E.S.E. through Illinois. 15 M. Belleville; 64 M. Centralia (500 ft.; 4763 inhab.), the junction of several railways; 86 M. Mt. Vernon (405 ft.; Rail. Restaurant); 150 M. Mt. Carmel. We now enter Indiana. From (161 M.) Princeton and (176 M.) Oakland railways run to Evansville (see below). — 199 M. Huntingburg (495 ft.; Rail. Restaurant; 3167 inhab.) is the junction of branch-lines to (47 M.) Evansville, etc.

Evansville (390 ft.; St. George, $2-3½; Randall, $2-2½), a busy city of Indiana, with 50,756 inhab., lies on the Ohio and carries on an extensive trade in coal, timber, grain, pork, flour, and tobacco.

From (240 M.) Milltown we may visit (8½ M.) the Wyandotte Cave (see below).

The *Wyandotte Cave, second in size to the Mammoth Cave only, is its superior in the number and beauty of its stalactites and stalagmites. There is a small Hotel ($1½p) at the mouth of the cave, and three regular routes are laid out through the latter (as at the Mammoth Cave), one 10-12 M. long (see §1. all three routes §2). The cave may also be reached from (11 M.) Corydon (see below) or from (5 M.) Leavenworth, on the Ohio.

From (250 M.) Corydon Junction a short line runs to Corydon (see above). 267 M. New Albany (21,059 inhab.). — The train now threads a tunnel, crosses a long bridge over the Ohio, and reaches (274 M.) Louisville.

Louisville. — Hotels. Gall House, Main St., cor. 1st St., §3-5; Louisville Hotel, Main St., between 6th and 7th Sts., §3-5, R. from §1; Willard's, §2-2½.

Railway Stations. Union Depot, on the river, between 7th and 8th Sts., for the Louisville & Evansville, the Baltimore, Ohio, & South-Western, the Southern, and other railways; Union Station, 10th St., cor. Broadway (a handsome building), for the Louisville and Nashville, and other lines.

Electric Tramways traverse all the principal streets and run to the suburbs (5 c.). — Cabs from the stations or wharf into the town $2-50 c. each person; per hr. $1½p, each addit. hr. $1. — Ferries ply to Jeffersonville and New Albany. — Steamers run to Cincinnati, Evansville, and other places on the Ohio.

Theatres. Auditorium, 4th St.; Macauley's, Walnut St. (prices 10 and 15 c.); Harris's, Bijou, 4th St.

Post Office, cor. of 4th Ave. and Chestnut St. (7-6; Sun. 9-10 a.m.).

Louisville (450 ft.; the 'Falls City'), the largest city of Kentucky and the entrepot of the lower Ohio, which here descends 26 ft. within 2 M., lies on a level plain and extends for 6 M. along the river. Pop. (1897) 222,220.

Louisville was founded by Col. George Rogers Clark in 1778 and named in honour of Louis XVI. of France. It received its city charter in 1838, when its population was about 10,000. In 1850 it contained 43,194 inhab., in 1870 it had 100,753, and in 1880 it had 123,758. In March, 1890, Louisville was visited by a terrific tornado, which swept through the heart of the city with a width of 600-800 ft., levelling almost everything that stood in its way, destroying property to the value of $8,000,000, and killing 76 persons.

BAEDeker's United States. 2nd Edit. 23
Since the Civil War Louisville has rapidly grown in importance as one of the chief gateways to the S.W. Its trade, both by river and rail, is very large; and the value of its manufactures in 1890 was $46,500,000 (9,300,000l.). It is one of the largest tobacco markets in the world and handles one-third of the tobacco raised in America, or about 200,000 hogsheads. Its sales of Kentucky whiskey are also extensive. Other important industries are pork packing, brewing, and the making of iron, farm wagons, ploughs, cement, leather, flour, and cast-iron gas and water pipes.

— Natural gas (p. 264) is largely used here.

The Falls of the Ohio, adjoining the Kentucky & Indiana Bridge (see below), are rapids rather than falls and are scarcely visible when the river is full. Vessels are enabled to avoid them by a canal 2½ M. long.

Louisville contains comparatively little to interest a stranger. Perhaps the most prominent building is the Custom House, in Chestnut St., between 3rd and 4th Sts. The Court House is in Jefferson St., between 5th and 6th Sts., and is adjoined by the City Hall, with its square clock-tower. — The Polytechnic Society of Kentucky, in 4th St., contains 50,000 vols., an art-gallery, and a small museum, including the *Troost Collection of Minerals. The Farmers' Tobacco Warehouse, in Main St., the centre of the tobacco trade, has a storage capacity of nearly 7000 hogsheads and sells about 30 million pounds of leaf tobacco yearly. Public auctions of tobacco take place here almost daily. — The University of Louisville, cor. of 9th and Chestnut Sts., is a handsome building. — The Columbia Building, cor. of 4th and Main Sts., is 13 stories high.

No stranger in Louisville should omit to visit *Cave Hill Cemetery, which lies on the E. margin of the city (tramway) and is very prettily laid out. The high grounds in it command good views. The large building with a dome seen to the E. is the State Blind Asylum, containing the American Printing House for the Blind. A little nearer is the Workhouse. Among the monuments in the cemetery is one to the family of George Keats, the younger brother of the poet, who emigrated to the United States in 1818 and died at Louisville in 1842. — Fourth Avenue (tramway), with many pleasant residences, leads S., passing the pretty little Central Park, to the Racecourse. Louisville possesses three fine parks, laid out since 1890: Iroquois Park, Cherokee Park, and Shawnee Park, to the S., E., and W. of the city.

The Louisville Bridge, 1 M. long, crossing to the W. end of Jeffersonville, was built in 1868-72 and has 27 iron spans supported by limestone piers. The Kentucky and Indiana Bridge, leading to New Albany (p. 353), is ½ M. long (1886). A third bridge, also leading to Jeffersonville, was constructed in 1892.

Zachary Taylor (1784-1850) is buried near his old home, 5 M. to the E. of Louisville.

From Louisville to the Mammoth Cave, Nashville, and New Orleans, see R. (3a); to Memphis and New Orleans, see R. 64; to Cincinnati, see R. 63b.

— A visit to the Wyandotte Cave (p. 353) is easily made from Louisville by rail or steamer.

63. From Cincinnati to New Orleans.

a. Via Chattanooga ('Queen & Crescent Route').

830 M. RAILWAY in 27-36 hrs. (fare $21; sleeper $5). Cincinnati, New Orleans, & Texas Pacific Railway to (388 M.) Chattanooga; Alabama Great Southern R. R. thence to (63 1/2 M.) Meridian; New Orleans & North Eastern R. R. thence to (880 M.) New Orleans. This line traverses the famous Blue Grass Region of Kentucky.

Cincinnati, see p. 344. The train crosses the Ohio to (3 M.) Ludlow (to the right, the pleasure-grounds known as the Ludlow Lagoon) and runs to the S. through Kentucky. The country traversed is pleasant, but few of the stations are important. 21 M. Walton (925 ft.); 52 M. Hinton (948 ft.); 70 M. Georgetown (880 ft.).

82 M. Lexington (965 ft.; Phoenix, $2 1/2-4; Leland, $2-2 1/2, R. from $1), a thriving little town with 21,567 inhab., is the metropolis of the famous Blue Grass Country (see below) and one of the most important horse and cattle markets in the United States. It received its name from having been founded in the year of the battle of Lexington (1775). The city is well built and contains many pleasant residences. It is the site of the University of Kentucky (750 students, including the commercial college) and the State Agricultural & Mechanical College, and has large distilleries of 'Bourbon' whiskey. Henry Clay (1777-1852) is commemorated by a monument. The trotting-races held here are largely frequented; the famous track of the Kentucky Horse Breeders' Association is opposite the rail. station.

Lexington may also be reached from Cincinnati by the Louisville & Nashville R. R. (99 M.), which also passes through part of the Blue Grass Region (see below).

The Blue Grass Region, which occupies about 10,000 sq. M. in N. Kentucky, is an undulating and fertile plateau surrounded by hills. The soil is very rich, and agriculture, especially the raising of tobacco and hemp, is carried on with great success. Its characteristic feature, however, consists of the celebrated pastures of 'Blue Grass' (Poa pratensis), which support the horses and other livestock for which Kentucky is famous. Stock farms abound throughout the whole district, especially in the neighbourhood of Lexington. The American trotting horse was here brought to its present high state of excellence, the blood horses of Kentucky exhibiting a remarkable combination of speed and endurance. Among the most famous stock farms near Lexington is Ashland (1 1/2 M.), formerly the home of Henry Clay and now the property of Major McDowell. 'Mambrino Chief', one of the most famous sires of the American stud-book, was an Ashland horse, and 'Jay-Eye-See' was sired here. Woodburn, 15 M. from Lexington, was the home of the famous thorough-bred 'Lexington' and the birthplace of 'Maud S.' who trotted a mile in 2 min. 39 sec. 'Nancy Hanks', who trotted a mile in 2.4, was bred by Mr. Hart Bogwell at Poplar Hill, 7 M. to the N. of Lexington. Paris, on the Ken. Central R. R., 19 M. to the N.E. of Lexington, is another centre of racing stock; and there are also important stud-farms near Cynthiana, 13 M. farther to the N.

At (103 M.) High Bridge (765 ft.) the train crosses the Kentucky River by a fine *Cantilever Bridge, 280 ft. high, with three spans of 375 ft. each. At (109 M.) Burgin we are joined by the line from Louisville (p. 353). 116 1/2 M. Danville (955 ft.), with the Presbyterian Centre College; 121 M. Junction City (988 ft.). At (139 M.)
King's Mountain (1170 ft.) we pass through a tunnel 1300 yds. long. 161 M. Somerset (880 ft.). At (168 M.) Burnside we cross the Cumberland River (view). The line here runs high up on the cliffs. 181 M. Beaver Gap is the station for the (1 M.) Natural Bridge of Kentucky, which is 30 ft. high and has a span of 60 ft. From (182 M.) Cumberland Falls Station (1250 ft.) coaches run to (12 M.) Cumberland Falls, 60 ft. high. Beyond (197 M.) Pine Knot (1425 ft.) we enter Tennessee (the 'Volunteer State'), where the line traverses the picturesque district of the foot-hills of the Cumberland Mts., among which are numerous pleasant summer-resorts. Beyond (210 M.) Oneida we reach the highest point on the line (1520 ft.). 224 M. Rugby Road (1390 ft.) is the station for Rugby (7 M. to the W.; 1400 ft.), founded in 1880 by Tom Hughes (author of 'Tom Brown's School-Days') and partly colonized by Englishmen. 232 M. Sunbright (1350 ft.), on the Cumberland Plateau; 254 M. Oakdale (Babahatchie Inn), on the Emory River, along which the train descends. — 258 M. Harriman, an iron-making place, is 15 M. from Alum Springs, a favourite resort amid the Cumberland Mts. It is the junction of the Southern Railway line to Knoxville and Asheville (comp. p. 382). 283 M. Spring City; 300 M. Dayton (715 ft.). At (334 M.) Boyce (695 ft.) we cross the Tennessee River. The battlefield of Missionary Ridge (p. 383) is seen to the left. 338 M. Chattanooga (675 ft.), and thence to — 830 M. New Orleans, see R. 69 b.

b. Via Louisville and Nashville.

932 M. LOUISVILLE & NASHVILLE RAILWAY in 32 hrs. (fare $21; sleeper $5).

Cincinnati, see p. 344. The train crosses the Ohio to (1 M.) Newport (p. 347) and runs to the S.W. through Kentucky. At (21 M.) Walton we cross the route above described. 83 M. Lagrange is the junction of lines to Lexington (p. 355), etc. 98 M. Anchorage.

110 M. Louisville, see p. 353. The train now runs towards the S. From (132 M.) Bardstown Junction a line runs to (37 M.) Springfield (Ky.), and from (140 M.) Lebanon Junction another runs to Lebanon and Knoxville (p. 382). — From (201 M.) Glasgow Junction a short line diverges to Mammoth Cave (see below).

From Glasgow Junction to Mammoth Cave, 9 M., railway in 3/4 hr. At present there are three trains daily, at 7.30 a.m., 11.30 a.m., and 6.15 p.m. (returning at 9.35 a.m., 2.20 p.m., and 7.50 p.m.). — At the end of the railway, on the Green River, at a height of 900 ft. above the sea, stands the Mammoth Cave Hotel ($2-3), 250 yards from the cave. Guides, etc., are procured at the hotel. About 5000 tourists visit the cave yearly.

The Mammoth Cave of Kentucky, accidentally discovered by a hunter in 1809, is the largest cave known, extending below the earth for 9-10 M., while the various avenues already explored have a total length of about 175 M. The carboniferous limestone of Kentucky, in which the cave occurs, occupies an area of 8000 sq. M., and Prof. Shaler estimates that there are at least 100,000 miles of open caverns beneath it. The interior contains a vast series of halls, domes, grottoes, caverns,
cloisters, lakes, rivers, and the like, to which more or less appropriate names have been given. There are comparatively few stalactites or stalagmites, but some of those found here are of great size. Two regular routes have been established, over which guides conduct visitors at stated times, but those who wish to make a more leisurely exploration can make special arrangements. The Long or River Route (ca. 20 M.; see § 3) includes the Rotunda, the Main Cave, the Bottomless Pit, Fat Man's Misery, River Hall, Dead Sea, Echo River, and about 6 M. beyond, with return by the Corkscrew. The Short or Pits and Domes Route (8 M.; § 2) takes in the Rotunda, Main Cave, Olive's Bower, Gothic Avenue, Giant's Coffin, Star Chamber, Harrison Hall, Gorin's Dome, and the Labyrinth. The pure air and even temperature (52-56° Fahr.) make these excursions much less fatiguing than they would be above ground. Visitors often accomplish the Short Route on the evening of their arrival (7-11 p.m.) and the Long Route on the following day (9 a.m.-6 p.m.). Luncheon is carried in from the hotel. Special fees ($1 each) are charged for visits to the Mammoth Dome and Chief City (540 ft. long, 200 ft. wide, and 120 ft. high). The fees include the fireworks necessary to illuminate the domes and chasms. The curiosities of the cave include eyeless fish (Amblyopsis spelaeus) and craw-fish. It contains large deposits of nitrous earth, from which saltpetre was made in 1811-15. A good account of the Mammoth Cave, by R. C. Hovey and R. E. Call is sold at the hotel (50 c.). — A visit may also be paid to the White Cave ($1), with fine stalactites.

224 M. Bowling Green (Rail. Restaurant; 7803 inhab.). At (228 M.) Memphis Junction the line forks, one branch running to the S.W. (right) to Memphis (p. 359), while the other holds on nearly due S. Near (251 M.) Mitchelville we enter Tennessee (p. 356). 285 M. Edgefield Junction, for the line to St. Louis (p. 349).

296 M. Nashville (550 ft.; Maxwell Ho., R. from $1; Duncan, $3-5; Linck, $2, R. from $1; Tulane, R. from $1; Utopia), the 'Rock City,' the capital and largest city of Tennessee, with (1890) 76,168 inhab., occupies a somewhat hilly site on both banks of the Cumberland River. It contains extensive manufactories of hard-wood wares, large flour-mills, and various other industries (value of products in 1890, $14,090,000), and it is, perhaps, the most important educational centre in the South. The most prominent building in the city is the State Capitol (with a tower 205 ft. high), conspicuously situated on a hill. In its grounds are a bronze Equestrian Statue of Andrew Jackson, by Clark Mills, and the Tomb of President Polk (1795-1849), whose home (Polk Place) stands at the corner of Vine and Union Sts. Among the other chief buildings are the Court House, the Blind Asylum, the Custom House, the Vendome Theatre, and the City Hall. At the head of the educational institutions stands the large Vanderbilt University, endowed by Cornelius Vanderbilt with $1,000,000 and attended by 800 students. In the Campus is a colossal statue of the founder, by Moretetti, unveiled in 1897. The academic department of the University of Nashville has been converted into the Peabody Normal College (400 students). The Fisk University (460 students), the Roger Williams University (250 students), and the Central Tennessee College (560 students) are the leading seats of learning for coloured persons. Other large schools are the Nashville College for Young Ladies,
Boscobel College, Belmont College, the Saint Cecilia Academy, and the Ward Seminary. The Watkins Institute contains a good library and the interesting collections of the Tennessee Historical Society. In 1897 the Tennessee Centennial Exposition was held in the W. suburbs of Nashville, near West End Park; and some of its handsome buildings have been left standing.

Among the places of interest near Nashville are the Hermitage, the home of Gen. Andrew Jackson (1767-1845), 11 M. to the E. (on the railway to Lebanon, p. 356); Belle Meade, a famous stock-farm, 6 M. to the S.W., now owned by Gen. W. H. Jackson (Iroquois, the only American winner of the Derby, bred here); and the National Cemetery, 4 1/2 M. to the N., containing 16,500 graves. — In the Battle of Nashville, fought on Dec. 15-16th, 1864, Gen. Hood, at the head of a Confederate army of 40,000 men, was completely defeated by Gen. Thomas. — Lines radiate from Nashville to St. Louis (p. 349), Hickman (p. 364), Memphis (p. 359), Chattanooga (p. 392), etc.

The line continues to run towards the S. 343 M. Columbia, on the Duck River. At (390 M.) State Line we enter Alabama (p. 377). At (418 1/2 M.) Decatur (see p. 383) we cross the Tennessee. 451 M. Cullman; 504 M. Birmingham; see p. 384; 538 M. Calera.

601 M. Montgomery, and thence to (781 M.) Mobile and —
922 M. New Orleans, see R. 69 a.

c. Via Louisville and Memphis.

919 M. Railway in 28-35 hrs. (fare $2.1; sleeper $5). This route follows the Baltimore & Ohio South-Western Railway to (130 M.) Louisville, and the Illinois Central Railroad thence to New Orleans.

Cincinnati (Central Union Station), see p. 344. — The train runs at first towards the W. 5 M. Culloms. Beyond (15 M.) North Bend we enter Indiana. 22 M. Lawrenceburg; 26 M. Aurora; 52 M. Osgood; 59 M. Holton. — 73 M. North Vernon (Commercial Ho., Snodgrass Ho., $2 1/2), with 2000 inhab., is a junction of some importance. Our line now bends to the S. — 86 M. Paris; 98 M. Lexington; 120 M. Watson; 127 M. New Albany (p. 353). — 130 M. Louisville, see p. 353.

Beyond Louisville the line runs at first towards the S.W. 177 M. Cecilia; 202 M. Leitchfield. Beyond (248 M.) Rockport we cross the Green River. 257 M. Central City; 310 M. Princeton; 324 M. Kuttawa. A little farther on we cross the Cumberland and soon after the Tennessee, which here (15-20 M. above their mouths in the Ohio) approach within 3-4 M. of each other.

357 M. Paducah (Palmer Ho., $ 2-3), a city of 12,797 inhab., lies on the left bank of the Ohio, a little below the influx of the Tennessee. It carries on a brisk trade in tobacco, grain, and pork. — Our line now turns abruptly to the S. (left).

At (403 M.) Fulton (Grand Central Hotel) we reach the line from Chicago to New Orleans described in R. 64. Some of the trains from Cincinnati to New Orleans also follow the route via Jackson (comp. p. 360). We now enter Tennessee. — Beyond (427 M.)
Obion we cross the Obion River; beyond (447 M.) Dyersburg the two branches of the Forked Deer River; and beyond (477 M.) Henning’s the Big Hatchie. 456 M. Covington; 513 M. Woodstock.

524 M. Memphis (200 ft.; Peabody, Gayoso, $ 21/4-4; Gaston, R. from $ 1; *Luehrman’s, for men; Clarendon, $ 2-21/2), the second city of Tennessee and the most important on the Mississippi between St. Louis and New Orleans, is strikingly situated on the Chickasaw Bluffs, with a wide levee overlooking the river. It is one of the most progressive cities in the S., in spite of its former trouble with the yellow fever, and its population has increased from 33,593 in 1880 to 64,495 in 1890. It is of great importance as a distributing point for cotton (7-800,000 bales), groceries (annual value $25,000,000), shoes, hardware, lumber, and other commodities. Several railways converge here (comp. pp. 384, 456) and many lines of steamers ply up and down the Mississippi (comp. p. 364). The railway-bridge, completed in 1892, is the only bridge across the Mississippi to the S. of St. Louis.

The Cotton Exchange, the Merchants’ Exchange, the Custom House, the Office of the Appeal-Avalanche, the St. Agnes Academy, the buildings of the Tennessee Club, the Chickasaw Club, and the Athletic Association, and the Cossett Free Library are among the most conspicuous buildings. The Levee presents a busy and animated picture, and interesting visits may be paid to the various Cotton Compresses and Cotton-seed Oil Mills. Court Square contains a bust of Gen. Andrew Jackson and innumerable squirrels.

An electric tramway runs from Memphis to (5 M.) the National Cemetery, with the graves of 14,000 Union soldiers, and (8 M.) Raleigh, a pleasant resort with a large hotel. — Memphis also possesses a fine Race Course. — Steamers ply via the White River, St. Francis River, and Arkansas River to Fort Smith in Arkansas.

From Memphis to New Orleans via Vicksburg, 456 M., Yazo & Mississippi Valley R. R. (III. Central System) in 121/2 hrs. (fare $11.85; sleeper $2.50). This line forms an alternative route from Memphis to New Orleans. The train starts at the Calhoun St. Station and soon after leaving Memphis enters Mississippi. 13 M. Lakeview (lake to the right). Beyond (45 M.) Clayton we pass Beaver Dam Lake and Beaver Dam Bayou. 56 M. Lula, near Moon Lake. — 64 M. Coahoma is the junction of a loop-line to Lamont and Hampton, rejoining the main line at (126 M.) Rolling Fork (see below). To the left lies Swan Lake. — 140 M. Leland. We now follow the Deer River. — 177 M. Rolling Fork (see above); 210 M. Redwood, on the Old River; 218 M. National Cemetery.

220 M. Vicksburg (Carroll, $ 21/4-1; Piazza, $ 2/2), picturesquely situated on the Mississippi, amid the Walnut Hills (500 ft.), is the largest city in the state and a commercial and industrial place of some importance. Pop. (1890) 13,873. The name of Vicksburg is well known from its prominence in the Civil War, when, as the key of the Mississippi, it was strongly fortified and garrisoned by the Confederates. After baffling Farragut and Sherman in 1862, it was finally captured by Grant in 1863 (July 4th), in a campaign which cost him 9000 of his troops (comp. p. xliii). The National Cemetery above the city contains 16,600 graves.

Near (244 M.) Ingleside we cross the Big Black River, and near (250 M.) Port Gibson the Pierre. From (263 M.) Harrison a line runs to Natchez (p. 364). Farther on we cross several small rivers. Near (326 M.) Whitaker we enter Louisiana. — 366 M. Baton Rouge (Mayer Hotel, $ 2/2), the
capital of Louisiana, is a quaint old place with 10,478 inhab., on a bluff above the Mississippi. It contains the Louisiana State University and other State institutions. — Beyond Baton Rouge we skirt the Mississippi, with its low banks and levees, sugar-plantations, and picturesque planters' houses. 446 M Kenner. 456 M. New Orleans, see p. 415.

After calling in Memphis at the Poplar St. and Calhoun St. Stations, the through-train from Cincinnati to New Orleans runs towards the S.E. 531 M. Nonconnah; 542 M. Nesbits; 574 M. Sardis; 608 M. Oakland. — At (625 M.) Grenada (p. 361) we join the main line from Chicago. Hence to — 919 M. New Orleans, see p. 361.

64. From Chicago and St. Louis to New Orleans.

Illinois Central R. R. from Chicago to (922 M.) New Orleans in 20 hrs. (fare $23; through-sleeper $6); from St. Louis to (708 M.) New Orleans in 24 hrs. (fares $18; sleeper $9).

The train from St. Louis runs via Belleville and Pinckneyville and joins the Chicago line (described below) at (73 M.) Du Quoin (see below).

From Chicago to (81 M.) Gilman, see R. 56a. Our line continues to run towards the S. 103 M. Paxton; 114 M. Rantoul (see p. 338); 128 M. Champaign (Rail. Restaurant), seat of the Illinois State University (1600 students) and junction of a line to Decatur (p. 383); 137 M. Tolono; 158 M. Arcola; 172 M. Mattoon; 199 M. Effingham; 214 M. Edgewood; 244 M. Odin. 252 M. Centralia (Rail. Restaurant) is one of the chief outlets of a rich fruit-growing country (4763 inhab.). — At (288 M.) Du Quoin we are joined by the line from St. Louis (see above). 308 M. Carbondale, a busy little industrial town (2382 inhab.). 329 M. Anna adjoins Jonesborough, a busy market for fruit and cotton. From (356 M.) Mounds a branch-line runs to (4 M.) Mounds City.

365 M. Cairo (Halliday, $2 1/2-3 1/2; Planters', $2), a manufacturing city with 10,324 inhab., lies on a low flat tongue of land at the confluence of the Mississippi and Ohio. It has never, however, attained the commercial importance expected at its foundation. — The train crosses the Ohio by a fine bridge and enters Kentucky. 392 M. Clinton. At (406 M.) Fulton (p. 358) we are joined by the line from Cincinnati and Louisville (R. 63 c.) and enter Tennessee. The railway forks here, the right branch running to Memphis, while the left runs via Jackson (Tenn.) to Grenada (p. 361). The through-trains from Chicago, Cincinnati, and St. Louis to New Orleans follow the former route.

Jackson (Arlington, $2-2 1/2; Robinson, $2), with 64,495 inhab., is a considerable cotton-market and carries on various industries. It lies 64 M. to the S. of Fulton, and beyond it the line goes on via (47 M.) Grand Junction and (25 M.) Holly Springs (Rail. Restaurant) to (75 M.) Grenada, where it unites with the main line described in this route.

From Fulton our train runs towards the S.W. 424 M. Moffatt; 481 M. Hennings; 510 M. Millington; 524 M. Frayser.
MISSISSIPPI RIVER. 65. Route. 361

527 M. Memphis (Rail. Restaurant), see p. 359. We stop here first at the Poplar St. and then at the Calhoun St. station. Two routes run hence to New Orleans, one via Vicksburg (p. 359), the other via Grenada. Our train follows the latter and runs towards the S.E. — 551 M. Hernando; 578 M. Sardis; 607 M. Oakland. —

At (628 M.) Grenada, on the Yalobusha River, we rejoin the route we left at Fulton (see p. 360). 681 M. Durant; 717 M. Canton. —

740 M. Jackson (Edwards Hc., $2-3), the small capital of Mississippi (5920 inhab.), has a handsome State House and other public buildings. — 794 M. Brookhaven; 818 M. McComb City. — Beyond (835 M.) Osyka we enter Louisiana. 870 M. Hammond. In approaching New Orleans we cross the outlet of Lake Maurepas (right) and skirt Lake Pontchartrain (left). 915 M. Pacific Junction.

922 M. New Orleans, see p. 415.

65. From St. Paul to New Orleans by the Mississippi River.

The Mississippi, the 'Father of Waters', is one of the great rivers of the world, with a length of 2316 M. (or, reckoned from the source of the Missouri, of 4191 M.) and a drainage-basin nearly 1½ million sq. M. in area. It rises in the N. part of Minnesota, on the watershed between Hudson's Bay and the Gulf of Mexico, and is a stream 12 ft. wide and 2 ft. deep after issuing from Lake Itasca. At first it runs towards the N.E., but soon turns towards the S.E., and its general course afterwards runs nearly due S., though with many bends and curves. The principal tributaries are the Missouri, which joins it from the W. about 1330 M. from its source; the Ohio, which comes in from the E. 220 M. farther on; and the Arkansas (W.). The best scenery is between St. Paul and St. Louis, where the river frequently flows between lofty and picturesque bluffs, 100-600 ft. high and 1-5 M. apart. The finest reaches are between St. Paul and Dubuque. After its junction with the Missouri the waters of the Mississippi become yellow and turbid, and it flows mainly through a flat and monotonous alluvial plain. As we near the Gulf of Mexico the vegetation becomes more and more tropical in character, and the river finally loses itself in a wilderness of creeks, bayous, and swamps, reaching the gulf through several outlets. The width of the Mississippi from St. Paul to New Orleans seldom varies much from 3000 ft., except at the bends, where it sometimes expands to 1 M. or 1½ M. — The United States Government has spent many millions of dollars in improving the navigation of the Mississippi, which is still apt to be interfered with by shallows and mud-banks. The most important work was the construction of the famous Eads Jetties (see p. 365) at the mouth of the river. — The first European explorer of the Mississippi was De Soto (1541), who is supposed to have reached it a little below Helena (p. 364).

Though there is a considerable traffic of smaller vessels above the Falls of St. Anthony (p. 327), the navigation proper of the Mississippi begins at St. Paul, and travellers will find comfortable passenger-steamers plying all the way thence to (1851 M.) New Orleans. The steamers of the Diamond Jo Line leave St. Paul twice weekly in summer for St. Louis, which they reach in 3½ days (fare $8, incl. berth and meals). At St. Louis they connect with the St. Louis and New Orleans Anchor Line, the boats of which ply weekly and reach New Orleans in 8 days (fare $20). Reduced rates are charged for return-tickets. Comparatively few travellers will care to make the whole journey from St. Paul to New Orleans; but
a day or two on the river will be found an agreeable change from the dusty railways. The boat-companies issue combination-tickets, allowing any part of the journey the traveller selects to be traversed by railway; and liberal 'stop-over' privileges are granted on all tickets.

The commerce carried on by the Mississippi is very large. The vessels plying on that river and its tributaries number at least 8000, with an aggregate burden of about 3½ million tons, including over 1100 steamers, of 225,000 tons' burden. The amount of merchandise carried is about 30,000,000 tons.

In the following description of the voyage down the river only the more important places on the banks are mentioned. The distances are reckoned from St. Paul.

*St. Paul*, see p. 325. The steamer passes under five bridges. For the first 25 M. or so both banks of the river are in Minnesota (p. 322), but beyond the mouth of the *St. Croix River* (left) the E. bank is in Wisconsin (p. 320).

27 M. (right bank) *Hastings* (swing-bridge), see p. 322.

30 M. (1.) *Prescott* (swing-bridge), at the foot of *Lake St. Croix*, an enlargement of the river of that name.

52 M. (r.) *Red Wing* (see p. 322), with *Barn Bluff* (200 ft.).

A little farther on the steamer traverses the beautiful expansion of the river known as *Lake Pepin* (see p. 322). To the left rises the *Maiden Rock* (440 ft.), to the right is the bold round headland called *Point No Point*.

67 M. (r.) *Frontenac*, see p. 322. — 73 M. (r.) *Lake City* (p. 322). — 79 M. (1.) *North Pepin*. — 84 M. (r.) *Read's Landing* (pontoon bridge), at the lower end of Lake Pepin and opposite the mouth of the *Chippewa*. — 87 M. (r.) *Wabasha*, see p. 322. — 117 M. (1.) *Fountain City*. The next stretch of the river abounds in islands, and the flanking bluffs are very picturesque in outline. — 125 M. (r.) *Winona* (two bridges), see p. 322. — 137 M. (1.) *Trempealeau*, at the mouth of the *Black River*. *Trempealeau Island*, 500 ft. high, commands a beautiful view. This is, perhaps, the most beautiful section of the Upper Mississippi.

156 M. (1.) *La Crosse* (two swing-bridges), see p. 322. The scenery continues to be attractive, while the towns and villages on the banks now follow each other in closer succession.

290 M. (r.) *Dubuque* (two bridges), see p. 324. The bluffs now become lower and the scenery tamer. — 335 M. (1.) *Savanna* is connected with (337 M.; r.) *Sabula* (p. 438) by a railway-bridge.

355 M. (1.) *Fulton* (p. 358), *Lyons* (r.), and —

357 M. (r.) *Clinton* (p. 439) are connected by three bridges.
Beyond (381 M.; r.) *Le Claire* we shoot the picturesque *Upper Rapids*, which extend hence to Rock Island.

397 M. (1.) **Rock Island** (p. 323) and (398 M.; r.) **Davenport** are united by the fine bridge mentioned at p. 324. A good view is obtained of the Government Island and Arsenal. — 426 M. (r.) **Muscatine** (bridge; Commercial, $2), a thriving city with 11,432 inhab., carries on a brisk trade in timber, sweet potatoes, and melons. — 455 M. (1.) **Keithsburg** (bridge; 1434 inhab.).

480 M. (r.) **Burlington** (bridge), see p. 440. — 494 M. (1.) **Dallas City**. — 504 M. (r.) **Fort Madison** (bridge), see p. 451. — 512 M. (1.) **Nauvoo**, a place of 1450 inhab., was once a flourishing Mormon city with a population of 15,000 (see p. 478). — 515 M. (r.) **Montrose** lies at the head of the Lower Rapids, which extend hence to (527 M.; r.) **Keokuk** (bridge; Keokuk Hotel, $2-3; 18,000 inhab.), at the mouth of the *Des Moines River*, here forming the boundary between Iowa and Missouri ('Bullion State'). — 531 M. (1.) **Warsaw** (2721 inhab.). — 551 M. (r.) **Canton** (2241 inhab.).

568 M. (1.) **Quincy** (bridge), see p. 454. — 588 M. (r.) **Hannibal** (bridge), see p. 453. — 616 M. (r.) **Louisiana** (bridge; 5090 inhab.). — 626 M. (r.). **Clarksville**. — 641 M. (1.) **Hamburg**. — 663 M. (r.) **Cape au Gris**. — 690 M. (1.) **Grafton**, at the mouth of the *Illinois River*. — 706 M. (1.) **Alton**, see p. 338.

About 3 M. farther on we reach the confluence of the Mississippi and the Missouri. The latter river, flowing in from the N.W., has a longer course than the Mississippi up to their junction (2908 M., as compared with 1330 M.) and contributes a greater volume of water to the joint stream, so that it would seem that the name Mississippi in its application below this point has clearly usurped the place of the Missouri. The clear waters of the Mississippi long refuse to mingle with the turbid flood of the Missouri.

729 M. **St. Louis** (410 ft.) and its two magnificent bridges are described in R. 61. This is the terminus of the Diamond Jo Line Steamers, and passengers continuing their journey by water are here transferred to one of the boats of the Anchor line (comp. p. 361).

The scenery of the Lower Mississippi differs materially from that of the Upper Mississippi (comp. p. 361), and the place of landscape beauty is taken to some extent by historic interest. The towns and villages on the banks usually follow each other rapidly, and innumerable islands are passed.

Soon after we leave St. Louis, **Jefferson Barracks** (p. 352) are seen to the right. 761 M. (32 M. from St. Louis; r.) **Crystal City** (see p. 352). — 789 M. (r.) **Ste. Genevieve** (1886 inhab.). — 809 M. (1.) **Chester** (2708 inhab.), with a large penitentiary. — Near (849 M.; 1.) **Grand Tower**, a favourite resort of the citizens of St. Louis, we pass the island known as the Devil's Tea Table. — 879 M. (r.) **Cape Girardeau** (4297 inhab.). — 894 M. (1.) **Commerce**. The large island to the right, a little farther on, is **Power's Island**.
929 M. (l.) Cairo (315 ft.), at the mouth of the Ohio, see p. 360. — 951 M. (l.) Columbus (bridge), the first landing-place in Kentucky (p. 342), was strongly fortified by the Confederates in the Civil War, but was ultimately abandoned without attack. Just beyond is Wolf Island or Island No. 5. — 967 M. (l.) Hickman (1652 inhab.). — Island No. 10, off (986 M.; r.) Donaldson Point, was also strongly fortified in the war and was captured by the Federal gun-boats in April, 1862, after a month's bombardment. — 988 M. (l.) Wades, nearly opposite, is in Tennessee (p. 356). — 999 M. (r.) New Madrid, with 1193 inhab., was captured at the same time as Island No. 10. — 1017 M. (l.) Tiptonville. A little to the E. lies Reelfoot Lake. — Numerous small and unimportant landings are now passed. — 1074 M. (r.) Hickman's is the first station in Arkansas (p. 456). — 1119 M. (l.) Fort Pillow, situated on the First Chickasaw Bluff, evacuated by the Confederates in 1862, was the scene of what is known as the Fort Pillow Massacre (April 12th, 1864). The river now winds considerably and passes several islands, the largest of which are named Centennial and Brandywine.

1179 M. (l.) Memphis (180 ft.; bridge), see p. 359. Farther on numerous windings are threaded. — 1207 M. (l.) De Soto is the first station in Mississippi (p. 378). — 1261 M. (r.) Helena (140 ft.; railway-ferry) is a busy little city with 5189 inhab. and a trade in timber. — Numerous small stations. — 1358 M. (r.) Mouth of the White River, which rises in Missouri and joins the Mississippi after a course of 700 M.

1365 M. (r.) Black Hawk lies at the mouth of the Arkansas River. The Arkansas River rises in the Rocky Mts., to the W. of South Park (p. 461), and has a course of 1600 M., of which 800 M. are navigable.

Beyond the Choctaw Bend we reach (1419 M.; r.) Arkansas City (95 ft.; 800 inhab.). — Passing Rowdy Bend, Miller's Bend, Island 82 (1431 M.), and Bachelor's Bend, we reach (1456 M.; l.) Greenville, a small cotton-trading city with 6658 inhabitants. The banks are now lined with cotton-plantations, which afford a very interesting sight in time of harvest (Sept.-Nov.). The planters' houses, especially as we approach the S., are often roomy and quaint old mansions, surrounded with groves of fine trees. Many of the trees are fantastically draped with Spanish moss (Tillandsia usneoides). — 1484 M. (r.) Grand Lake is the first station in Louisiana (p. 378). No places of any great size or importance are passed till we reach —

1691 M. (l.) Natchez (Natchez, § 3-6; Pearl), a city of 10,000 inhab., founded by D'Iberville in 1700, lies on and at the foot of a bluff rising 200 ft. above the river. It takes its name from a now extinct tribe of Indians, who were among the noblest specimens of Red Men in America. Some traces of the old French fort are still visible. A National Cemetery adjoins the city.
1756 M. (l.) Fort Adams. — 1767 M. (r.) Red River Landing, at the mouth of the Red River. Beyond this point both banks of the river are in Louisiana. — 1813 M. (l.) Bayou Sara. Oranges and figs may now be seen growing in the open air.

The 'Swampers' of Bayou Sara are a peculiar community of woodcutters, living on raft-houses floating in the swamps.

1981 M. New Orleans, see R. 83.

Below New Orleans the trees disappear, the river banks become less defined, and the river finally loses itself in a vast marsh, through which various 'passes' or channels lead to the Gulf of Mexico. Near New Orleans are many vegetable-gardens and small fruit-farms, often irrigated by syphon pipes, straddling the levee. About 70 M. from New Orleans the ocean-steamers pass between Fort St. Philip (left) and Fort Jackson (right) and soon after enter the South Pass, marked by lighthouses. At the lower end of the S. Pass are the wonderful *Eads Jetties, constructed by Capt. Eads in 1875-79 at a cost of $5,000,000 (1,000,000 t.) and forming a channel 30 ft. deep where formerly the draught was not more than 10 ft. The jetties, 2 1/3 and 1 1/2 M. long, are constructed of willow rods, rubble, and concrete. The ends of the jetties, marked by two lights, may be called the mouth of the Mississippi, beyond which we are on the Gulf of Mexico.

66. From Washington to Richmond.

116 M. Baltimore & Potomac and Richmond, Fredericksburg, & Potomac Railroads in 3 1/2-4 hrs. (fare $3.50; parlor-car 50 c.). This is part of the Penn. and Atlantic Coast line route to the S. (comp. R. 76a).

Washington, see p. 275. The train crosses the Long Bridge (p. 284), affording a view of Arlington House (p. 289) to the right, enters Virginia (the 'Old Dominion'), and skirts the right bank of the Potomac to (7 M.) Alexandria (p. 289) and (34 M.) Quantico. The line now edges away from the river and skirts the 'Wilderness', a barren and unattractive district widely known from the terrible struggles of the Civil War that took place here in 1863-64 (p. xlviv).

55 M. Fredericksburg (Exchange Hotel, $2), a quaint old city of 4528 inhab., on the Rappahannock, founded in 1727. It was the scene of a hardly-contested battle in 1862, when the Confederates under Lee defeated the Union troops under Burnside. The huge National Cemetery, on Marye's Heights, contains 15,000 graves, and there is also a large Confederate Cemetery.
Those who are interested in studying the campaigns of the Civil War will find much to occupy their attention in and around Fredericksburg. The Battle of Chancellorsville (May 2nd-4th, 1863), in which Stonewall Jackson was mortally wounded, took place 11 M. to the W., resulting in another repulse to the Union forces, with a loss of 17,000 men. A little to the S. is Spottsylvania Court House, the centre of some of Grant's operations in 1864 (p. 369). The 'Battles of the Wilderness' between Grant and Lee were almost continuous during May, 1864; and the losses of the two armies exceeded 60,000, Comp. p. 369.

George Washington spent his boyhood near Fredericksburg. His mother died here in 1789 and is commemorated by a monument.

The train runs towards the S. At (67 M.) Guinea Stonewall Jackson died (see above). At (92 M.) Doswell we cross the C. & O. R. R. (R. 58 b). — Henry Clay (1777-1852) was born near (99 M.) Ashland, a favourite resort of the citizens of Richmond. It is the seat of Randolph Macon College (125 students).

116 M. Richmond. — Hotels. *The Jefferson (Pl. a; A, 2), Jefferson St., $5, R. from $1.50; Ford's (Pl. b; C, 2), Capitol Sq., $3; Murphy's European Hotel (Pl. c; C, 2), 801 Broad St., R. from $1, well spoken of; Lexington (Pl. e; C, D, 2), cor. of 12th and Main Sts., $2 1/2, R. $1-3; Imperial (Pl. d; D, 2); St. Clair (Pl. g; C, 2), Capitol Sq.; Mason's (Pl. f; D, 2), $1 1/2-3. — Rueger's Restaurant, cor. 9th and Bank Sts. Electric Tramways traverse the chief streets and extend to the suburbs (5 c.). — Hacks and Omnibuses meet the principal trains at the Union Depot (Pl. C, 3); fare into the town 50 c. each. — Steamers ply down the James to Norfolk, Old Point Comfort, Newport News, Baltimore, Philadelphia (Clyde Line), New York (Old Dominion Line), etc. — Post Office (Pl. C, 2), Main St., between 10th & 11th Sts. — Mozart Academy of Music; Auditorium Theatre; Jefferson Roof Garden. — British Vice-Consl, Mr. P. A. S. Brine.

Richmond (150-250 ft.), the capital of Virginia and one of the most interesting cities of the S., is situated on a series of low hills rising from the N. bank of the James River. In 1890 it contained 81,388 inhab., while Manchester, on the opposite bank of the river, with which it is connected by several bridges, had 9246. The total estimated population of the city and suburbs in 1897 was 125,000. The city is regularly laid out, and most of the streets running N. and S. are denoted by numbers. Fine water-power is afforded by the James River, which descends 116 ft. in 9 M.

Richmond was founded in 1737, on the site of the home of the famous Indian Chief Pocahontas, and had still only a few hundred inhabitants when made capital of the State in 1779. At various national crises it was chosen as the meeting-place of important conventions; and in 1861 it became the seat of government for the seceding states. The capture of Richmond became ultimately the chief objective point of the Union troops, and it was defended with great obstinacy by the Confederates, who threw up strong lines of earthworks all round it (comp. p. 369). When finally compelled to evacuate Richmond (April 2nd, 1865; comp. p. 367) the Confederates set fire to the tobacco warehouses and other stores; and a large part of the city was destroyed. All traces of this devastation have been removed, and the city is now in a thriving condition, carrying on a brisk trade (tobacco, etc.) and considerable manufactures (machinery, locomotives, flour, etc.; total annual value about $32,000,000). About 600,000,000 of the famous Richmond Straight Cut cigarettes are made here annually by the Allen & Ginter Branch of the American Tobacco Co.

The European visitor will probably be struck by the number of Negroes, who form nearly half of the population and contribute many of its most picturesque and romantic features.
Near the centre of the city, on Shockoe Hill, is Capitol Square (Pl. C, 2), a tree-shaded area of 12 acres, in which the wonderfully tame grey squirrels are interesting. The Capitol or State House (Pl. C, 2), partly designed after the Maison Carrée at Nîmes, occupies the highest point of the square and dates from 1785.

Interior (freely open to visitors). In the Central Hall, surmounted by a dome, are Houdon’s "Statue of Washington and a bust of Lafayette by the same artist. The Senate Chamber, to the right, was used as the Confederate House of Representatives during the Civil War. The House of Delegates, to the left, contains portraits of Chatham and Jefferson, and was the scene of Aaron Burr’s trial for high-treason (1807) and of the State Secession Convention (1861). — The Rotunda Gallery contains an interesting collection of portraits (early governors, Confederate generals, etc.) and a fine old stove, made in England in 1770. — The platform on the roof affords a fine "View of Richmond, Manchester, the James River, and the battlefields of the vicinity (p. 369).

Capitol Square also contains a fine equestrian "Statue of Washington, by Crawford, with figures of Patrick Henry, George Mason, Thomas Jefferson, Thomas Nelson, Andrew Lewis, and Chief Justice Marshall round the pedestal; a Statue of Stonewall Jackson (1824–63), by Foley, ‘presented by English gentlemen’ (Rt. Hon. A. J. Beresford Hope and others); and a Statue of Henry Clay (1777–1852), by Hart. The curious old Bell House, on the W. side of the square, was formerly used by the Public Guard. At the N. E. corner of the square stands the Governor’s Mansion (Pl. D, 2). — On the N. side, in Broad St., is the City Hall (Pl. C, 2), a handsome Gothic structure with a clock-tower. — To the E. of the Capitol is the new State Library (Pl. C, D, 2), containing 75,000 volumes. — In St. Paul’s Church (Pl. C, 2), at the corner of 9th St. and Grace St., on the W. side of Capitol Sq., Jefferson Davis was seated when he received a despatch from Gen. Lee, announcing that Richmond must be evacuated (April 2nd, 1865).

In 12th St., at the corner of Clay St., a little to the N. of Capitol Sq., is the Jefferson Davis Mansion (Pl. D, 1), or ‘White House of the Confederacy’, occupied by Mr. Jefferson Davis as President of the Southern Confederacy. It is now fitted up as a Museum of Confederate Relics. [A large and handsome ‘Battle Abbey’ is, however, to be erected at Richmond for the preservation of these and other relics of the Confederation.]

Following Broad St. to the E. from Capitol Sq., we pass on the left, near the corner of College St., the Monumental Church (Pl. D, 2), erected on the site of the Richmond Theatre, at the burning of which in 1811 Gov. Smith and fifty-nine others lost their lives. — About 3¼ M. farther on, at the corner of 24th St. (r.), is St. John’s Church (Pl. F, 2), erected in 1740, but since much enlarged.

The Virginia Convention was held in this church in 1775, and the pew is pointed out in which Patrick Henry made his famous ‘give me liberty or give me death’ speech. The verger is in attendance to show the church and sell photographs, canes made of the sycamore which overshadowed the above-mentioned pew, etc.

Twenty-ninth St., 1¼ M. farther on, leads to the right to Marshall Park, on Libby Hill (Pl. F, 2), embellished with a Confederate War Monument and affording a good view.
A little farther out is Chimborazo Park. About 1 M. to the N.E. is Oakwood Cemetery, where 16,000 Confederate soldiers are interred.

From Libby Hill we may descend to Main St. and follow it to the left, between tobacco warehouses and factories, to 20th St. In 20th St., to the left, at the cor. of Cary St., close to the railway and the canal, is an ice-house which occupies the site of the famous Libby Prison (Pl. E, 2, 3), removed to Chicago in 1889. — In Main St. (N. side, near 20th St.) is the Old Stone House (Pl. E, 2), the oldest building in Richmond. The Post Office (Pl. C, 2), between 10th & 11th Sts., to the right, was one of the few buildings in this part of the city that escaped the fire of 1865 (p. 366). — At 7th St. we may diverge to the left to visit the Allen & Ginter Cigarette Works (Pl. C, 3; see p. 366), at the corner of Cary St. At the corner of Main St. and 5th St., to the left, stood (till 1891) the large red brick Allan House, in which Edgar Allan Poe spent his boyhood with his foster-father, Mr. John Allan. Fourth St. leads to the left from Main St. to Gamble's Hill Park (Pl.B, 3), which commands a *View of the river, with its numerous falls and islands. Below lie the great Tredegar Iron Works. To the E. is the State Penitentiary (Pl. B, 3). Passing the Penitentiary we come (10 min. more) to the entrance to *Hollywood Cemetery (Pl. A, 4).

Near the W. gate of the Cemetery is the Confederate Monument, a rude pyramid of stone 90 ft. high, erected as a memorial to the 12,000 Confederate soldiers buried here. On President's Hill, in the S.W. corner of the cemetery, overlooking the river, are the graves of Monroe (1758-1831) and Tyler (1790-1862; no monument), two of the seven Presidents born in Virginia ('Mother of Presidents'). John Randolph (1733-1837) of Roanoke, Jefferson Davis (d. 1889), Major-General Picket (d. 1875; p. 261), Gen. J. E. B. Stuart (1833-64), and Commodore Maury (1830-71) are also interred here. A good view is obtained of Belle Isle, which was a prison-camp during the war. — To the W. of Hollywood are the Riverside and Mt. Calvary Cemeteries and (3/4 M.) the New Reservoir Park.

In the meantime, however, we leave the cemetery by its W. gate and proceed to the right (tramway), through a poor district, to (1/2 M.) Park Avenue, at the beginning of which, in Monroe Square (Pl. A, 2), is a Statue of Gen. Wickham (1820-88), by Valentine. We follow Park Ave. to the left for 1/2 M. more, when we come in sight of the equestrian *Statue of General Lee, by Mercié (1890), one of the most beautiful monuments in the United States. Adjacent, to the E., is Richmond College, and 1/2-3/4 M. to the W. are the Exposition Buildings (in the State Fair Grounds) and the Soldiers' Home.

We may now return to the centre of the city by Franklin St. (tramway), No. 707 in which was the home of General Lee (1807-70) and now contains the collection of the Virginia Historical Society (Pl. C, 2). — At the corner of 11th and Clay Sts., near the Davis Mansion (p. 367), is the Valentine Museum (Pl. C, 1), containing local antiquities, casts, autographs, engravings, specimens of early printing, drawings, and oil-paintings. In this house,
which is a good example of an 'ante bellum' Virginian home, Aaron Burr (p. 367) was entertained during his trial for treason.

Among other points of interest in Richmond may be mentioned the Westmoreland Club (Pl. C, 2), at the cor. of Grace and 6th Sts.; the Commonwealth Club (Pl. A, 2), at the cor. of Franklin and Madison Sts.; Chief Justice Marshall's House, at the cor. of 9th and Marshall Sts. (Pl. C, 2); the Tobacco Exchange, Shockoe Slip; the University College of Medicine (Pl. C, 1); the Medical College of Virginia (Pl. D, 2); and the National Cemetery, 2 M. to the N.E. of the city (6540 graves).

Battlefields round Richmond. During the last three years of the Civil War (1862-65) battles raged all round Richmond, and remains of the fortified lines constructed to protect the city are visible in various parts of the environs. Both the inner and outer fortifications may be seen from the *Brook Road, which leads to the Lakeside Club House, with its golf links, bowling alleys, and boating lake. Probably the best plan for the stranger is to hire a carriage with an intelligent driver and spend a day visiting the scenes of the principal battles. Guides may be obtained at the hotels. — The chief direct attack on Richmond was made on May 15th, 1862, when the Union fleet attempted, without success, to force its way past the batteries at Drewry Bluff, on the James River, 7 M. below the city (easily visited by steamer, see p. 370). Simultaneously Gen. McClellan advanced with the land-forces up the peninsula between the York and James Rivers and invested Richmond on the E. and N. This led to the hardly-contested but indecisive battle of Seven Pines or Fair Oaks (May 31st, 1862), in which the Confederates under Gen. Joseph E. Johnston attacked McClellan's left wing, to the s. of the Chickahominy. Large cemeteries and a park now mark the spot, 7 M. to the E., reached by the West Point R. R. (see below). The district is swampy, and McClellan lost more men by pestilence than in fighting. Gen. Robert E. Lee now assumed command of the Confederate forces and made an attempt, in combination with Gen. Stonewall Jackson, to overwhelm McClellan's right wing, which was posted at Mechanicsville, on the Chickahominy, 5½ M. to the N. of Richmond, and thus began the famous Seven Days' Battle (June 26th-July 2nd, 1862). Mechanicsville was followed by the battles of Gaines Mill, Cold Harbor, Savage's Station, Frazier's Farm, and Malvern Hill. The upshot of this series of contests, in which 40,000 men fell, was the relief of Richmond, as the Union troops were compelled to retreat to Malvern Hill, 15 M. to the S.E., where they repelled the Confederates in their last attack but soon after withdrew to Harrison's Landing, on the James River. During 1863 there were no direct attacks on Richmond. In May, 1864, Gen. Ulysses S. Grant came down through the 'Wilderness' (see p. 365), attacked Lee in his entrenched position at Cold Harbor (June 3rd, 1864), and lost 15,000 men without making much impression on the enemy. He then transferred his army to the S. side of the James; and the later stages of the war were rather a siege of Petersburg than of Richmond (see p. 373). Gen. Butler captured Fort Harrison, opposite Drewry Bluff, in Sept., 1864.

From Richmond to West Point and Yorktown, 65 M.; railway to (39 M.) West Point in 1½-1¾ hr. and steamer thence to (26 M.) Yorktown in 1¾ hr. (through-fare 5½). The train runs to the E., passing some of the battlefields of the Civil War. Beyond (7 M.) Fair Oaks (see above) it crosses the Chickahominy. 39 M. West Point (Terminal Hotel, 6½-9), with 2018 inhab., lies at the head of navigation of the York River, and we are here transferred to the steamer of the Baltimore, Chesapeake & Richmond Steamboat Co. The trip down the river is pretty. The intermediate stops are Allmonds and Clay Bank. — 65 M. Yorktown (Yorktown Ho., 6½; Cooper Ho., 6½), on the right bank of the river, 10 M. above its mouth, is memorable for the surrender of the British army under Lord Cornwallis on Oct. 19th, 1781, forming the final scene of the War of Independence. Remains
of British intrenchments are still visible, and a monument commemorates
the surrender. — From Yorktown the steamer ascends Chesapeake Bay to
Baltimore (p. 268).

From Richmond to Old Point Comfort, see R. 67; to Charleston, see
R. 71; to Savannah, see R. 74.

67. From Richmond to Norfolk and Old Point Comfort.
   a. By Steamer.

Steamer down the James River to Norfolk and Old Point Comfort
(116 M.) in 10 hrs. (fare $1 1/2). This is a pleasant and interesting trip.
The steamers of the Virginia Steamboat Co. start on Mon., Wed., & Frid. at
7 a.m. and run to Newport News, Old Point Comfort, and Norfolk. Those
of the Baltimore Steam Packet Co. ('Bay Line') leave on Tues., Thurs.,
& Sat. at 3 p.m., calling at Old Point Comfort. Those of the Old Dominion
Co. (for New York) leave on Mon. at 5 p.m. and call at Norfolk, but not
at Old Point Comfort.

Richmond, see R. 66. The course of the James River is very cir-
cuitous and the direct distance from Richmond to its mouth is only
about 74 M. The water is of a muddy brown colour, telling of the
rich tobacco-growing soil through which it flows. Its ancient name
was Powhatan (comp. p. 366).

Just below Richmond, on the left bank, is the site of Powhatan's
home, where Pocahontas is said to have saved the life of Capt. John
Smith. Several old iron-clad monitors are anchored here. — Farther
on, on both banks, are earthworks of the Civil War.

7 M. (r.) Drewry Bluff (120 ft.), with remains of the old for-
tifications (see p. 369). — 8 1/2 M. (l.) Chaffin Bluff, behind which
lie Fort Harrison (p. 369). — 14 M. The Dutch Gap Canal, con-
structed by Gen. Butler to avoid the Howlett House Batteries, saves
a detour of 5 1/2 M. — 15 M. (l.) Varina was the home of Poca-
hontas and her husband John Rolfe. — 22 M. To the left, opposite
Turkey Bend, rises Malvern Hill (p. 369). — Farther on (right) are
the lowlands of Bermuda Hundred, where, in Grant's significant
phrase, Gen. Butler was 'bottled up'. — 30 M. (l.) Shirley, a plant-
ation still owned by the Carters (here pron. 'Cyarter'), one of the
'F.F.V.' (first families of Virginia).

32 M. (l.) City Point, at the mouth of the Appomattox River
(p. 373), with the house of Dr. Epps, the headquarters of Grant in
1864-65. City Point is 12 M. from Petersburg (p. 373; railway). —
38 M. Berkeley (l.), with Harrison's Landing (p. 369), was the
birthplace of the first President Harrison (1773-1841). — 39 1/2 M.
(l.) Westover, the former home of the Byrds and Seldens, is, per-
haps, the finest old Colonial mansion on the James (comp. p. lxxxix).
 — 46 1/4 M. (r.) Fort Powhatan, a relic of the war of 1812. — 49 1/2 M.
Brandon (r. and (53 M.) Claremont (r.) are good examples of Colon-
ial houses. — 56 M. The Chickahominy (p. 369) joins the James.

68 M. (l.) Jamestown, the earliest English settlement in America,
founded in 1607 by Capt. John Smith and Christopher Newport. The
only remains of the ancient town are the tower of a ruined church
to Old Point Comfort. NORFOLK. 67. Route. 371

(in which Pocahontas was married) and a few tombstones. The river here expands into a wide estuary. Fleets of oyster-boats are seen.

801/2 M. Deep Water Light; 89 M. Point of Shoots Light.

101 M. Newport News (Hotel Warwick, $4, R. from $1), a flourishing little city, with 4449 inhab., large grain elevators, coal wharves, shipbuilding yards (dry-dock 625 ft. long), and iron-works. An electric tramway runs hence to Hampton and Old Point Comfort (p. 372). Steamers ply to Manchester (England) and many other ports. — We now enter Hampton Roads, one of the best harbours on the Atlantic coast. It was in these roads that the Confederate iron-clad Virginia (the old Merrimac) nearly annihilated the wooden fleet of the Union, until it was itself disabled by the opportune arrival from New York of the famous turret-ship Monitor.

110 M. Old Point Comfort and Fortress Monroe, see p. 372. To the N. (left) opens Chesapeake Bay (p. 273). — To reach Norfolk the steamer ascends the Elizabeth River, an arm of Chesapeake Bay.

116 M. Norfolk (New Atlantic, $21/2-4; Monticello, new; Norfolk, $2-21/2; Gladstone, $2-21/2; Brit. vice-consul, Mr. Barton Meyers), with 34,781 inhab., the second city of Virginia and excelled by Savannah alone among the Atlantic ports to the S. of Chesapeake Bay, was founded in 1682. The staples of its busy export-trade are cotton, coal, oysters, and early fruits and vegetables (strawberries, 'goubers' or pea-nuts, etc.). The city is irregularly laid out but contains some pleasant residence-quarters. A visit may be paid to one of the large Cotton Compresses, in which the bales of cotton are prepared for transport by being reduced by hydraulic pressure to one-fourth their original size. St. Paul's Church, dating from 1730, was struck by a British cannon-ball in 1776, but the one now resting in the indentation is not the original.

On the opposite bank of the Elizabeth (ferry) lies Portsmouth (Madison Ho., $2-4), a city of 13,283 inhab., with an excellent harbour. At Gosport, the S. end of Portsmouth, is the Navy Yard (open 8-5), the most important in the country, with a huge dry-dock. To the N. is a large Naval Hospital. — The Seaboard Air Line runs hence to (79 M.) Weldon (where it connects with the Atlantic Coast Line, p. 384) and on to Raleigh and Atlanta (see R. 60 c.).

From Norfolk a short branch-line runs to (18 M.) Virginia Beach (Princess Anne Hotel, $3-5), a seaside-resort on the Atlantic coast, surrounded by pine-forest. — The Dismal Swamp (see p. 373) may be easily visited from Norfolk. — Currituck Sound, 30 M. to the S. of Norfolk, offers splendid wild-fowl shooting. — Steamers ply from Norfolk to Old Point Comfort (p. 372; 1/2 hr.; fare 25 c.), Yorktown and West Point (p. 369), Richmond, New York, Baltimore, Washington, etc.

b. Via Chesapeake & Ohio Railroad.

Railway to (85 M.) Old Point Comfort in 23/4-3 hrs. (fare $2.50). Steam Ferry from (75 M.) Newport News to (12 M.) Norfolk in 3/4 hr. (through-fare $2.50). — Norfolk is reached from Richmond by railway via Petersburg in 21/2-3/2 hrs. (see pp. 388, 373).

Richmond, see R. 66. The train runs to the S.E., down the peninsula between the York River and the James River, a flat region
of swamps and pine-forest. We skirt the Chickahominy Swamp (p. 369) and cross that river near (18 M.) Roxbury. 24 M. Providence Forge. — 48 M. Williamsburg (Colonial Inn, $2 1/2), the ancient capital of Virginia, a place of 1831 inhab., with a church of 1678, a magazine of 1741, and other venerable relics.

The old College of William and Mary, chartered in 1693 (buildings mainly modern) and now used as a normal school, was the earliest college in the New World after Harvard (p. 94) and was the Alma Mater of 17 governors, 7 cabinet ministers, 1 chief justice, and 3 Presidents of the United States. In the quiet 'campus' is an old statue of Lord Botetourt.

75 M. Newport News, see p. 371.

82 M. Hampton (Barnes Hotel, $2-2 1/2), a pleasant little town with 2513 inhab., is the seat of a National Soldiers' Home (2000 inmates) and the *Normal and Agricultural Institute for Negroes and Indians.

A visit to the latter is of special interest. The institute is attended by 6-700 Negroes and 100-200 Indians, of whom the former pay part of their expenses by working. The chief aim of the institute is to train teachers for the coloured schools, and in this, as well as in the education of the Indians, its success has been highly satisfactory. Visitors are welcome to the classes, parade, dinner, etc. (specimens of pupil's work for sale). Hampton also contains a National Cemetery (5000 graves), and the Church of St. John, built in 1660 with English bricks. It is connected with (3 M.) Old Point Comfort by a fine shell road and an electric tramway. Tramway to Newport News, see p. 371.

The train now crosses an arm of Hampton Roads and reaches —

85 M. Old Point Comfort or Fort Monroe (*Hygeia Hotel, 1000 beds, $3-5; *Hotel Chamberlin, 470 bedrooms, from $4, these two close to the sea; Bright View Cottage, $2-3), consisting mainly of two huge hotels, the most elaborate fortification in the United States, and a group of cottages, and situated on a small peninsula on the N. side of the entrance to Hampton Roads (p. 371), with the Atlantic Ocean in front and Chesapeake Bay (p. 273) opening to the N.

Old Point Comfort received its name from Capt. John Smith in 1608 and has long been a favourite seaside-resort, frequented by the Northerners in winter and by the Southerners in summer. The Hygeia Hotel was originally founded, in a very modest way, in 1821, and has grown to be one of the largest and most popular houses in the country; the Chamberlin is of recent construction. The immediate proximity of Fort Monroe, with its large garrison, adds a characteristic feature to the gaiety of the place. Good bathing, boating, and 'crabbing' are among the attractions. In winter the temperature rarely falls below 40°, and in summer it seldom exceeds 80°.

Steamers ply hence to Norfolk (1/2 hr.; 25 c.), Baltimore, Richmond (p. 366), Washington, and New York (Old Dominion Line, in 24 hrs.). Norfolk is also reached by ferry to Wiloughby Spit and electric car thence (through-fare 35 c.). — Electric line to Hampton and Newport News, see above and p. 371. Another electric tramway runs to (2 1/2 M.) Buckrow Beach, with a new summer-hotel.

*Fort Monroe, 100 yds. from the Hygeia Hotel, was constructed in 1819 et seq. to command the mouth of the James River and the approach to the Norfolk Navy Yard and to furnish a base of operations against a hostile fleet attempting to enter Chesapeake Bay. The ramparts are about 2 M. in circumference, affording a fine walk, and enclose an area of 80 acres, which resembles a beautiful park. Outside the ramparts is a broad moat. Guard-mounting (8-9 a.m.)
and dress-parade (1 hr. before sunset) are great attractions to the visitor. The fort is garrisoned by a battalion of heavy artillery and is the seat of the Artillery School of the U. S. Army. Jefferson Davis was confined here for a year and a half after the Civil War, and then released without a trial. Off-shore is the low island of the Rip-Raps, almost covered by the works of Fort Wool.

Pleasant excursions may be made from Old Point Comfort to Norfolk (p. 371), Hampton (3 M.), Newport News (p. 371), etc. — The Hampton Roads Golf Course affords good sport.

68. From Norfolk to Roanoke.

257 M. Norfolk & Western R. R. in 31/2 hrs. (fare $7.70; sleeper $2).

— This line traverses the district around Petersburg (see below), the seat of the final struggles of the Civil War.

Soon after leaving Norfolk (see p. 371) the train skirts the N. margin of the Great Dismal Swamp, which may be visited from (23 M.) Suffolk (55 ft.), at the head of the Nansemond River.

The Dismal Swamp, 40 M. long and 35 M. wide, is intersected by small canals and yields a large quantity of cypress, juniper, and other timber. At Suffolk we may hire a man and a canoe to paddle us as far as (10 M.) Lake Drummond and back by the Jericho Run Canal, a novel and interesting trip.

We now traverse a district of pine-forest. Beyond (68 M.) Disputanta (115 ft.) we approach the scene of the battles of 1864-65.

81 M. Petersburg (Imperial, Shirley, $2-3; Rail. Restaurant), a manufacturing town of 22,680 inhab., on the Appomattox, is of interest as the centre of the final operations of the Civil War. The ivy-clad ruins of the old Blandford Church are picturesque. A large stone bowl, at the N. end of the railway-bridge over the Appomattox, is known as 'Pocahontas' Wash Basin'.

Battleground. When Grant crossed to the S. side of the James River in June, 1864 (comp. p. 369), he made City Point his base of supplies and spread his lines towards the W., so as to shut up Lee and his Confederate forces in Petersburg. The so-called Siege of Petersburg lasted from June 16th, 1864, to April 2nd, 1865; and during its continuance 13 pitched battles were fought in the neighbourhood. The intrenchments of Lee and Grant still form conspicuous features in the landscape; Grant's lines extended from the Appomattox to Fort Fisher, and thence E. to Fort Bross, a distance of 23 M. One of the best-known engagements was that of the Old Crater, to the E. of the city, on Griffith's Farm, where a small museum of war-relics is shown. Carriages ($1-1/2 per hr.) and saddle-horses to visit the entrenchments and battlefields may be hired at the Petersburg hotels, and guides may also be obtained.

Petersburg was also the scene of important military operations in the War of Independence (1781). From Petersburg to (23 M.) Richmond, see p. 338.

As we leave Petersburg, we see, to the right, the large Virginia Normal & Collegiate Institute, for coloured students. The country traversed is unattractive. At (133 M.) Burkeville we intersect the Southern Railway (R. 69a). Beyond (141 M.) Rice we cross the Appomattox Valley by a lofty iron bridge (view). At (149 M.) Farmville, with lithia springs, we enter a fruit, tobacco, and corn growing
region. — Near (181 M.) Appomattox, at Appomattox Court House, the Civil War ended on April 9th, 1865, in the surrender of Lee and his forces to General Grant.

Farther on (198 M.) we cross the James River and approach (204 M.) Lynchburg (325 ft.; Carroll, $21/2; Arlington, $2; Rail. Restaurant), an industrial and tobacco-exporting city of 19,709 inhab., picturesquely situated on the S. bank of the James. It is the junction of the Southern Ry. (see below). — Beyond Lynchburg we pass through a tunnel and begin to ascend towards the Blue Ridge Mts. The finely-shaped *Peaks of Otter (3875-4000 ft.) are seen to the right. They are best reached by carriage (7 M.) from (229 M.) Bedford (950 ft.; Beechenbrook, $2), a small town with 2897 inhab. and various industries. To the right, beyond it, is the handsome Randolph-Macon Academy. — At (246 M.) Blue Ridge (1240 ft.), with mineral springs and a hotel ($3), we begin to descend on the other side of the crest.

257 M. Roanoke (910 ft.; *Hotel Roanoke, $21/2-3; Ponce de Leon, $2-4; Rockledge, Lee), finely situated on the Roanoke, among the Blue Hills, has grown, since 1880, from the insignificant hamlet of Big Lick (500 inhab.), to a busy city of 16,159 inhab., with large machine, iron, bridge, carriage, and other manufactories. It is the junction of various branches of the Norfolk & Western R. R., including that through the Shenandoah Valley (see R. 69b).

69. From Washington to New Orleans.

a. Via Southern Railway.

1144 M. Railway in 33 1/2 hrs. (fare $27.50; sleeper $7). Through vesti-buled train (resembling that described at p. 305) from New York to New Orleans in 43 hrs. (fare $34; sleeper $9).

From Washington the line runs at first towards the S.W. Numerous earth-works and rifle-pits, grim mementoes of the Civil War, catch the eye on both sides of the line. 7 M. Alexandria (p. 289). — 33 M. Manassas (315 ft.; Goodwin Ho., $2) was the scene of two battles during the Civil War (monument to the right).

In the first Battle of Manassas or Bull Run (July 21st, 1861), which was the first important conflict of the war, the Federals under McDowell were routed by the Confederates under Beauregard and thrown back on Washington. In the second battle (Aug. 29-30th, 1862), fought on almost the same ground, 3 M. to the right, Lee defeated the Federals under Pope.

At (57 M.) Rappahannock we cross the river of that name. 68 M. Culpeper was an important point during the Civil War and is now the site of a National Cemetery. The Rapidan River, which we cross at (79 M.) Rapidan, was another name frequently heard during the struggle in Virginia. 85 M. Orange. — At (113 M.) Charlottesville (p. 340; Rail. Restaurant) we intersect the C. & O. R. R. (R. 58b). We continue to run thence towards the S.W., with the Blue Ridge at some distance to the right. — At (173 M.) Lynchburg (Rail.
Restaurant) we intersect the Norfolk & Western R. R. (see p. 374). Farther on we cross several streams and pass numerous small stations. — 239 M. Danville (420 ft.; Burton, $2 1/2-4; Rail. Restaurant), a busy town of 10,305 inhab., in the centre of a tobacco-growing region, is the junction of the line from Richmond (p. 366).

A little beyond Danville we enter North Carolina (‘Old North State’). — 287 M. Greensboro (840 ft.; Benbow, $3), a growing town of 3317 inhab., with a trade in tobacco, coal, and iron.

From Greensboro to Raleigh and Goldsboro, 130 M., railway in 5-12 hrs. This line passes through a cotton and tobacco growing country. — 17 M. Elon College; 22 M. Burlington, with cotton-mills. — 47 M. University is the junction of a branch-line to (10 M.) Chapel Hill, the site of the University of North Carolina, founded in 1795 (300 students). — 55 M. Durham (Carr Olina, $3), a city of 5485 inhab., is one of the chief tobacco-making places in America. Duke’s Factory produces 250 million cigarettes annually. Trinity College (150-200 students) has been handsomely endowed by the tobacco magnates, Col. Duke and Col. Carr. — At (81 M.) Raleigh (p. 385) we intercept the Seaboard Air Line from Weldon to Atlanta (R. 69 c). — 109 M Selma is the junction of the line to Norfolk (see below). — 130 M. Goldsborough (100 ft.; St. James, $2), a small place with 4017 inhab., is connected by railway with New Bern (Albert, Chattavox, $2 2/3), at the head of Neuse River, and (95 M.) Morehead, on the Atlantic coast.

From Greensboro to Norfolk, 265 M., railway in 8½ hrs. Through-trains of the Southern Railway run by this route between Chattanooga (via Asheville and Salisbury) and Norfolk. — From Greensboro to (10 M.) Selma, see above. Our line here diverges to the left from that to Goldsboro and runs towards the N. 134 M. Wilson. At (150 M.) South Rocky Mount we cross the Atlantic Coast Line (p. 388) and the Pamlico, and beyond (181 M.) Palmyra we cross the Roanoke. 191 M. Welford; 215 M. Tunis, on the Chowan; 259 M. Bruce; 263 M. Pinner’s Point. — 265 M. Norfolk, see p. 371.

A line also runs from Greensboro, via Fayetteville, to (170 M.) Wilmington (p. 389).

Just beyond Greensboro, to the right, is the battlefield of Guilford Court House (Mar. 15th, 1781), where the British under Cornwallis defeated the Americans under Greene. — We traverse many cotton-fields. Near Salisbury we cross the Yadkin. — 336 M. Salisbury (760 ft.; Mt. Vernon, $2), with 4418 Inhab., was the seat of one of the chief Confederate prisons in the Civil War, and the National Cemetery contains the graves of more than 12,000 soldiers who died here in captivity.

From Salisbury to Asheville and Knoxville, see R. 70.

Near (380 M.) Charlotte (725 ft.; Buford, Central, $2-3 1/2), with 11,557 inhab. and important cotton-manufactures, are some gold mines. It is the junction of lines to Wilmington (p. 389), to Columbia and Charleston (see R. 71 b), etc. — Beyond (408 M.) All Healing Springs we enter South Carolina (‘Palmetto State’). Near (414 M.) King’s Mountain (940 ft.) the Americans defeated the British on Oct. 7th, 1780, and near (447 M.) Coupens is the scene of a more important victory of the patriots (Jan. 17th, 1781).

456 M. Spartanburg (790 ft.; Spartanburg Inn, $2 1/2-3), the junction of lines to Columbia (p. 389) and Asheville (R. 70), is a thriving little city of 5544 inhab., in a district of iron and gold mines
and mineral springs. — 487 M. Greenville (975 ft.; Southern, Mansion Ho., $2-3), a city with 8607 inhab., on the Reedy River, is the junction of a line to Columbia (p. 389). — Beyond (527 M.) Seneca (955 ft.) we cross the Savannah and enter Georgia (‘Empire State of the South’). About 2 M. from (554 M.) Toccoa are the beautiful Toccoa Falls (185 ft. high). 568 M. Mt. Airy (1590 ft.; Echols Ho., $2) affords a fine view of Yonah Mt. (3025 ft.) and the Blue Ridge. — The line now descends. — 570 M. Cornelia is the junction of a short line to (8 M.) Clarksville and (20 M.) Tallulah Falls.

Clarksville (1480 ft.; Spencer Ho., $2) is a convenient point from which to explore the line scenery of the Georgia portion of the Blue Ridge Mts. — The *Tallulah Falls (Cliff House, $2-3; Grand View, $2), 400 ft. high, lie in the deep gorge of the Tallulah or Terrora, which here cuts across the Blue Ridge. — Other points of interest in this district are the Valley of Nacoochee, 8-10 M. to the N.W. of Clarksville, and the Falls of the Eastatoe, 15 M. to the N. of Tallulah Falls.

From (582 M.) Lula a branch-line runs to (39 M.) Athens (p. 385). — 594 M. Gainesville (1230 ft.; Arlington, Hunt, $2) is a small town of 3202 inhab.; 20 M. to the N. lie the Dahlonega Gold Mines (deserted). — 617 M. Suwanee (1030 ft.). Farther on Stone Mt. (1685 ft.), a huge mass of granite, is seen to the left (in the distance).

648 M. Atlanta (*The Aragon; Kimball Ho., $2 1/2-5 R. $1-3 1/2; Marion, $2-3; Jackson; Rail. Restaurant), the capital of Georgia (the ‘Gate City’), with 65,533 inhab., is a prosperous commercial and industrial city, and an important railway-centre, whence lines radiate in all directions (comp. pp. 383, 385, 397). It is well situated 1000-1100 ft. above the sea, and enjoys a healthy and bracing climate.

The chief point of interest in the history of Atlanta, which was founded in 1840, is its siege and capture (Sept. 2nd, 1864) by Gen. Sherman, who, after holding the city for two months, here began his famous ‘March to the Sea’ (comp. p. 385). The business-quarter was previously burned down, by design or by accident, but has been rebuilt on a finer and more modern plan. The great staples of Atlanta’s trade are tobacco and cotton. Among its industrial products are cotton, furniture, patent medicines, street-cars, flour, and iron (value in 1890, $12,000,000).

The city is laid out in the form of a circle, of which the radius is 3 1/2 M. and the large Union Depot the centre. A little to the S. of the station is the *New State Capitol, which contains a library of about 50,000 vols. and an interesting Geological Collection. A little to the N.W. is the New Court House; and farther to the N., beyond the railway, is the Custom House. The City Hall, the Chamber of Commerce, the Opera House, and the Equitable Building are handsome edifices. Among the chief educational establishments are the Georgia School of Technology (a branch of the University at Athens (see above), the Atlanta University (300 coloured students), and the Clark University (300 students). — In the suburb of West End is the home of Joel Chandler Harris (‘Uncle Remus’). To the S. of the city are the large McPherson Barracks.

From Atlanta to Birmingham, 167 M., Southern Railway in 5½-6½ hrs.

— The chief intermediate station is (104 M.) Anniston (500 ft.; Anniston Inn, $2½-4), beautifully situated among the foot-hills of the Blue Ridge.
It is surrounded with rich beds of brown iron ore. Pop. (1890) 9998. Among its chief buildings are the fine Church of St. Michael and All Angels, the Noble Institute for Boys and Girls, and the Barber Memorial Seminary, for coloured girls (1898). — 167 M. Birmingham, see p. 384.

Our train now passes on to the tracks of the Atlanta & West Point R. R. — 656 M. College Park, with the large and handsome building of the Southern Female College. 687 M. Newnan (960 ft.), the junction of a line to Macon (p. 397). At (735 M.) West Point (585 ft.) we cross the Chattahoochee, enter Alabama (‘Cotton Plantation State’), and join the lines of the Western Railway of Alabama. — 757 M. Opelika is the junction of branch-lines to (29 M.) Columbus and to Birmingham (p. 384).

Columbus (Rankin Ho., $3; Central, $2½) is a busy industrial town of 30,000 inhab., with large cotton, woollen, and flour mills.

784 M. Chehaw is the junction of a short railway to (5 M.) Tuskegee, with its interesting Normal and Industrial School for coloured pupils (about 1500 in all), conducted by Mr. Booker Washington, the distinguished coloured educationalist. — Farther on the Alabama River runs to the right.

823 M. Montgomery (160 ft.; Exchange, $2½-4; Windsor, $2-2½; Mabson, R. from $1; Rail. Restaurant), the capital and third city of Alabama, lies on the high left bank of the Alabama, at the head of navigation. It contains (1890) 21,883 inhab. and carries on a large trade in cotton (150,000 bales annually) and various manufactures. The dome of the State House, in which the Confederate Government was organized in Feb., 1861, affords an extensive view. In the grounds is a handsome Confederate Monument. The Post Office, Court House, and City Hall are large buildings. Montgomery, which dates from 1817, is surrounded by many old-fashioned plantation-residences. — We now pass on to the Louisville & Nashville R. R. 867 M. Greenville; 904 M. Evergreen; 942 M. Flomaton, the junction of a line to Pensacola (p. 414). Farther on we cross the Mobile River and skirt its estuary to —

1003 M. Mobile. — Hotels. Battle House, $2½-4, R. from $1; Windsor, R. from $1; Southern. — Tramways traverse the chief streets (5 c.). — Steamers ply to points on the Alabama and Tombigbee; also to New York, Liverpool, Tampa, Havana, Vera Cruz, etc. — Post Office, at the cor. of Royal and St. Francis Sts. — British Vice-Consul, Mr. William Barnewall.

Mobile, the largest city and only seaport of Alabama, lies on the W. side of the Mobile River, just above its entrance into Mobile Bay. It is situated on a plain, backed by low hills, and is well laid out. Its broad and quiet streets are shaded with magnolias and live oaks, and its gardens are fragrant with orange blossom and jessamine. The harbour is approached by a deep-water channel through Mobile Bay and now admits vessels of 23 ft. draught. At the entrance to the bay, 30 M. below the city, are two forts. Pop. (1890) 31,076.

Mobile was founded about 1710 by the Sieur de Bienville, who transferred the earliest French colony in this region from Biloxi (p. 375) to Mobile Bay. It was the capital of Louisiana down to 1723. In 1763 it
passed, with part of Louisiana, to Great Britain; in 1780 it was handed over to Spain; and in 1813 it became part of the United States. It was incorporated as a city in 1819, with 2500 inhab., a number that had increased to 20,515 in 1850 and to 32,034 in 1870. In 1864 the harbour was attacked and closed by Adm. Farragut. The city itself did not surrender to the Federal troops till April 12th, 1865. The chief articles of Mobile’s commerce are cotton (250,000 bales annually), timber, coal, and naval stores. Its manufactures include shingles, barrel-staves, saddlery, bricks, cotton-seed oil, cordage, cigars, and beer.

The most prominent building in the city is the Custom House & Post Office, at the corner of Royal and St. Francis Sts., erected at a cost of $250,000 (£50,000). Other important edifices are the Cotton Exchange, the Court House, the Barton Academy (a large building with a dome), the U. S. Marine Hospital, the City Hospital, the Medical College, the Southern Market and Armoury, and the Cathedral of the Immaculate Conception. The Guard House Tower is a quaint old structure in the Spanish style. The most beautiful private residences are in the shady *Government Street. The *Shell Road, extending for 8 M. along the Bay, is the favourite drive.

About 6 M. to the W. is Spring Hill (steam-tramway; hotel), with a large Roman Catholic College (100 students). — Frascati is a popular resort on the Shell Drive (also reached by tramway). At the S. end of the Shell Road is Frederic’s Restaurant (fish, game, and oysters). — More distant resorts of the Mobilians are Point Clear (Grand Hotel, $2-1/2), on the E. shore of the Bay, and Citronelle (Hygeia Hotel, $1-1/2), 30 M. to the N.

Beyond Mobile the train runs near the Gulf of Mexico, of which it affords occasional views to the left. It traverses a characteristic Southern landscape, passing savannahs, cane-brakes, and pine forest, and crossing several ‘bayous’. Palmettoes and moss-draped live-oaks are among the most characteristic vegetation. Beyond (1028 M.) Grand Bay we enter Mississippi (‘Bayou State’). At (1044 M.) Scranton we pass Pascagoula Bay on a low trestle. 1060 M. Ocean Springs (Ocean Springs Hotel, $2-21/2), a seaside resort with two chalybeate springs. At (1064 M.) Biloxi (Montross Ho., $2-3; Brit. vice-consul, Mr. J. J. Lemon), where we cross another trestle, the Sieur de Bienville erected a fort in 1690, before he transferred his colony to Mobile (p. 377). Jefferson Davis had his country-home at (1069 M.) Beauvoir, where he died in 1889. — 1073 M. Mississippi City (Gulf View, $2; Anniston), a seaside-resort known for its excellent mackerel fishing. — 1086 M. Pass Christian (*Mexican Gulf Hotel, $3-6; Crescent, Monroe, Magnolia, $2-3) is the largest and most fashionable of the summer and winter resorts on the ‘Gulf Coast’. On leaving it we cross a long trestle of creosoted timber to (1091 M.) Bay St. Louis (Clifton, Crescent, $2-21/2), a flourishing little town with 1974 inhabitants. Beyond (1103 M.) Claiborne we cross the Pearl River and enter Louisiana (‘Pelican State’). Farther on we cross the outlet of Lake Pontchartrain (p. 419) and traverse the peninsula between it and Lake Borgne. Lake Catherine (r.) is an arm of the former. 1106 M. English Lookout, a noted fishing centre, derives
its name from its occupation by the British army in 1812. — 1123 M. Chef Menteur; 1142 M. Pontchartrain Junction. In entering New Orleans, the train runs down the middle of the wide street named the ‘Champs Elysées’.

1144 M. New Orleans, see R. 83.

b. Via the Shenandoah Valley.

1164 M. Baltimore & Ohio R. R. to (63 M.) Shenandoah Junction; Norfolk & Western R. R. thence to (430 M.) Bristol; Southern Railway thence to (672 M.) Chattanooga; Alabama Great Southern R. R. (Queen & Crescent Route) thence to (968 M.) Meridian; and New Orleans & North Eastern R. R. (Queen & Crescent Route) thence to (1164 M.) New Orleans (through-fare $27.50; sleeper $7). — Passengers from New York are forwarded in through-sleepers (through-fare $31, sleeper $9). The Washington sleeper runs through to Memphis (p. 359).

This line traverses the beautiful Shenandoah Valley and affords access to two of the greatest natural wonders of America, the Natural Bridge of Virginia and the Luray Caverns.

From Washington to (63 M.) Shenandoah Junction, see R. 45. We here turn to the S. (left) and begin to ascend the lovely Shenandoah Valley, which, in addition to its natural beauties, offers the interest of the campaigns of the Civil War.

The so-called Valley of Virginia, stretching between the Blue Ridge and the Allegheny Mts., for about 300 M., covers 7500 sq. M. of ground and includes the whole or part of the valleys of the Shenandoah, James, Roanoke, and New River. It was the scene of many conflicts during the war, including Stonewall Jackson’s skilful operations against Pope, Banks, Fremont, and Shields (1862) and Sheridan’s brilliant cavalry feats (1864).

Between Hagerstown (p. 256) and (23 M.) Shenandoah Junction the Norfolk & Western R. R. traverses the battlefield of Antietam (p. xliii). Lee’s headquarters are seen from the train.

The Shenandoah runs at first to the left, at some distance, beyond it rise the Blue Ridge Mts. 68 M. Charleston, the scene of John Brown’s execution (p. 292). We cross the river at (99 M.) Riverton (500 ft.), which lies at the confluence of the N. and S. forks of the Shenandoah. We follow the S. fork (to our left). The Shenandoah Valley is here divided into two branches by Massanutten Mt., an offshoot of the Alleghenies, which is now conspicuous to the right. — 102 M. Front Royal.

128 M. Luray (820 ft.; *Mansion Inn, Lavrange, $2), a small town of 1386 inhab., beautifully situated on the Hawksbill, 5 M. from the Blue Ridge and 3-4 M. from Massanutten. It is frequented by thousands of visitors to the Luray Cavern, justly ranked among the most wonderful natural phenomena of America.

To reach the cave from the station (seat in vehicle there and back 35c.) we ascend the main street of the village to (15-20 min.) the top of the hill, where we see (to the right) the conical hill containing the caves and the cottage at the entrance (adm. $1, after 6 p.m. $1/2, Electric lights extra after 6 p.m.; description of the cave 25c.). The *Cavern of Luray is probably ‘more completely and profusely decorated with stalactite and stalagmitic ornamentation’ than any other in the world, surpassing even the celebrated Adelsberg Cave in this respect. Appropriate names have
been given to the more important formations, which are often as beautiful in colour as in shape. Some of the chambers are very large and lofty. Small lakes, rivers, and springs occur. The cavern has a pleasant uniform temperature of 51-58°F, is traversed by dry and easy paths, and is brilliantly lighted by electricity, so that a visit to it involves little fatigue. It takes about 2-3 hrs. to see the parts usually shown to visitors.

Visitors to Luray may also ascend Stony Man (4030 ft.), one of the highest of the Blue Ridge summits, which rises 5 M. to the E. and commands a fine view (one day; horses can go nearly all the way to the top). Accommodation may be obtained at Stony Man Camp ($2). — Luray is also a good centre from which to visit many of the battlefields of the Virginia Valley campaign.

Beyond Luray the scenery of the valley continues to increase in picturesqueness. 146 M. Shenandoah, with iron-works and railway workshops. — 169 M. Grottoes or Shendun (1120 ft.; Grottoes Hotel, $2½) is the station for a visit to the Grottoes of the Shenandoah (Weyer and Fountain Caves), which lie ½ M. from the railway.

The grottoes (adm. $1) are lighted by electricity and are easily explored (2-3 hrs.). The stalactites and stalagmites vie with those of Luray.

At (183 M.) Basic City (Brandon Hotel, $2–3), a new industrial settlement, we intersect the C. & O. Ry. (see p. 341). Near (207 M.) Vesuvius (1420 ft.) are the Crabtree Falls. 224 M. Buena Vista (Hotel Buena Vista) is another of the busy little towns that have recently sprung up to develop the mineral resources of the district. We cross the South River.

238 M. Natural Bridge Station (760 ft.), on the James River, 2½ M. from the Natural Bridge, the hotels at which send vehicles to meet the trains (fare 50 c.). The C. & O. Ry. has also a station here.

The Natural Bridge of Virginia (1500 ft. above the sea) is a huge monolithic limestone arch, 215 ft. high, 100 ft. wide, and 90 ft. in span, crossing the ravine of the Cedar Brook. It seems to be a remnant of a great horizontal bed of limestone rock that entirely covered the gorge of the brook, which originally flowed through a subterranean tunnel. The rest of this roof has fallen in and been gradually washed or worn away. The bridge is finely situated in a beautiful amphitheatre, surrounded by mountains. Adjacent is a group of not very first-class hotels (Appledore, Pavilion, § 3-4). A kind of Park has been formed, embracing the five hills named Lebanon, Mars Hill, Mt. Jefferson, Lincoln Heights, and Cave Mt.; and drives and bridle-paths have been constructed in all directions.

The pathway to the foot of the bridge (adm. 50c.) descends along a tumbling brook, overhung by grand old arbor vitae trees. The view of the arch from below is very imposing. Among the names upon the smooth side of the archway is that of George Washington (W. side, about 20 ft. up), which was the highest of all until a student named Piper actually climbed from the bottom to the top of the arch in 1818. We pass under the bridge and follow the path up the glen to (1 M.) the small but pretty Lace Falls, passing Saltpetre Cave, Hemlock Island, and the Lost River. We then return to the gate-house and follow the road crossing the bridge, so as to enjoy the views from the top (from Pulpit Rock, Cedar Cliff, etc.). A pleasant path leads from the bridge along the edge of Rock Rimmon, on the top of the right (W.) bank of the ravine of Cedar Brook (views). — Continuing to follow the road we soon come in sight of the (3½ M.) view-tower on Mt. Jefferson, which commands a splendid view of the Blue Ridge (E.), the Peaks of Otter (S. E.; p. 374), Purgatory Mt. (S.), House Mt. (N.), and North Mt. (W.). — The view from Mt. Lincoln is said to be even better. — The Balcony Falls lie 7 M. to the E.
The line now follows the James (right), with the C. & O. Ry. on the opposite bank as far as (254 M.) Buchanan. Fine scenery.

279 M. Roanoke (p. 374) is an important junction, lines diverging here to Norfolk (p. 371) and Winston-Salem. — From (286 M.) Salem (1005 ft.) stages run to (9 M.) Roanoke Red Sulphur Springs. 299 M. Elliston (1250 ft.); 303 M. Shawsville (1470 ft.), the station for (3 M.) Allegheny Springs (stage); 307 M. Montgomery, for (1 M.) Montgomery White Sulphur Springs (tramway); 312 M. Christiansburg (2005 ft.), for (3 M.) Yellow Sulphur Springs (stage). — 323 M. East Radford (1770 ft.; Radford Inn, $2), on New River, is the junction of the Ohio Extension (New River Branch) of the N. & W. R. R.

From East Radford to Columbus, 406 M., railway in 14½ hrs. — This line descends through the Alleghenies along the left bank of the New River, 19 M. Pembroke (1620 ft.); 23 M. Big Stone Junction. At (39 M.) Glen Lyn it leaves the New River and ascends to (62 M.) Bluefield, beyond which it traverses the great Pocahontas Coal Field. From (73 M.) Bluestone Junction a short branch-line runs to (1 M.) Pocahontas. Beyond (74 M.) Cooper we thread a tunnel the sides of which are of coal. We then descend to the Elkhorn and Tug River, passing below a corner of Kentucky by a long tunnel at (155 M.) Thacker. From (183 M.) Newgatuck we descend the Twelve Pole River to (267 M.) Kenova, at the confluence of the Ohio and the Big Sandy. We cross the former river and enter Ohio. 279 M. Ironton. At (307 M.) Portsmouth we leave the Ohio and ascend the Scioto Valley, which is full of interesting remains of the 'Mound Builders' (comp. p. lxiv). Some of the most extensive of these are near Portsmouth, which is 35 M. by railway from Peebles (Serpent Mound; p. 347). Near (330 M.) Piketon is a remarkable 'Graded Way', 1080 ft. long. 355 M. Chillicothe (p. 343) also lies amid numerous mounds and circles. 375 M. Circleville. — 406 M. Columbus, see p. 260.

338 M. Pulaski (1920 ft.; Maple Shade Inn, $3), a busy little iron and zinc making town with 2118 inhab., is connected by a branch-line with the Cripple Creek District, with its rich deposits of brown hematite iron ore. 351 M. Max Meadows (2030 ft.; inn); 359 M. Wytheville (2240 ft.; Fourth Avenue, Hancock, Boyd, $2), a frequented summer-resort. To the S. (left) are the Lick Mts., here dividing the valley into two branches. 372 M. Rural Retreat (2575 ft.), the highest point on the line; 386 M. Marion (2135 ft.), with the State Insane Asylum; 402 M. Glade Spring; 425 M. Abingdon.

430 M. Bristol (1690 ft.; Hamilton, St. Lawrence, $2; Fairmont; Thomas Ho.), an industrial city and tobacco market with 6226 inhab., lies on the boundary between Virginia and Tennessee. — The scenery continues picturesque. — 455 M. Johnson City (1640 ft.).

A narrow-gauge railway, known as the 'Cranberry Stem Winder', ascends through the Doe River Cation (1500 ft. deep) and up Roan Mt. to (28 M.) Roan Mt. Station and (34 M.) Cranberry. From Roan Mt. Station stages ($2) run to (12 M.) the *Cloudland Hotel ($2½), on the summit (6315 ft.), the highest human habitation to the E. of the Rocky Mts. The View hence is very extensive, some authorities considering it the finest in Western North Carolina (comp. p. 336). The rhododendrons and azaleas are at their best between June 20th and July 10th. Excursions may be made hence over the mountain-roads to Hot Springs and (50 M.) Asheville (p. 380).
Route 69. KNOXVILLE. From Washington

On a hill to the left as we leave (487 M.) Greenville is the grave monument of Andrew Johnson (1808-75), a resident of the district. — 519 M. Morristown (1280 ft.), the junction of the line to Asheville and Salisbury described in R. 70.

A short branch-line runs hence to Bean's Station, 1½ M. from which lie Tate Springs (Hotel, $2½/2; Flanders, $2-2½; Palace, $2), the chief city of E. Tennessee, is finely situated among the foothills of the Clinch Mts., on the Tennessee River, formed 4 M. farther up by the junction of the Holston and the French Broad. It is the centre of the Tennessee marble district, in which 250,000-300,000 tons of this beautiful stone are annually quarried. It has a large trade in country produce and various manufactures. Among the chief buildings are the University of Tennessee (500 students), the Agricultural College, the Custom House, the Court House, and the City Hall.

Knoxville claims to have been besieged thrice, but never captured. Fort Saunders, on the outskirts of the city, was unsuccessfully attacked by the Confederates on Nov. 29th, 1863. Visits may also be paid to the National Cemetery, Gray Cemetery, Island Home Park, and Lutrell Park.

Mountaineers may go by train to (16 M.) Maryville (Jackson Ho., $3), 2½ M. (drive) from Thunderhead Peak (5520 ft.), one of the finest of the Great Smoky Mts. (ascent, with guide, in 7-8 hrs.; View). — Not far off is a reservation containing about 1830 Cherokee Indians.

The Knoxville, Cumberland Gap, and Louisville R. R. (Southern Railway Co.) runs from Knoxville to (85 M.) Cumberland Gap (1685 ft.), the chief pass across the Cumberland Mts., between Virginia and Kentucky, and to (69 M.) Middlesborough (The Middlesborough, from $2; Pulkerson, $2), a young iron-making town with 3371 inhab., of whose future vast hopes are entertained. In approaching the Gap the railway passes through a tunnel, 3700 ft. long, which begins in Tennessee, passes under a corner of Virginia, and comes out in Kentucky.

Railways also run from Knoxville to Louisville (p. 353), etc.

The part of the Alleghenies bounding the S. horizon at this part of our route is known as the Great Smoky Mts. (5-6000 ft.), familiar to the readers of Charles Egbert Craddock's novels. At (590 M.) Loudon (815 ft.) we cross and quit the Tennessee River. 616 M. Athens (930 ft.), with part of Grant University (left; comp. p. 383).

At (643 M.) Cleveland (880 ft.; Ocoee Ho., $2), an industrial city with 2863 inhab., the railway forks, one branch running via Rome to Atlanta, Macon, and Brunswick (see p. 383) and the other via Chattanooga to Birmingham and New Orleans. The latter is our present route.

The line from Cleveland to Brunswick unites with that from Chattanooga to Brunswick at (15 M.) Cohutta (see p. 383).

Farther on we cross the Citico Creek and thread a tunnel. 672 M. Chattanooga (686 ft.; Read Ho., $2½/2-4, R. from $1; Southern Hotel, opposite the Central Station, $2½/2-3; Rossmore, $2-2½), the third city of Tennessee, with 29,100 inhab., lies on the left bank of the Tennessee, in the centre of a district
to New Orleans.  

CHATTANOOGA. 69. Route. 383

rich in iron, coal, and timber. Its progress of late has been very rapid, and its manufactures (value in 1890, $9,500,000) and trade are of considerable importance. The river is navigable to this point during the greater part of the year, and railways diverge in all directions. The large Grant University (Methodist) is attended by 500-600 students (incl. those in the department at Athens, p. 382).

Chattanooga was a point of great strategic importance during the Civil War, and several battles were fought in the neighbourhood (comp. p. xliii). The best general idea of the military operations is obtained from "Lookout Mt. (2125 ft.), which rises to the S. of the city and commands a superb View, extending into seven states. The top may be reached by railway (15 M.), by road, or by two inclined planes with cable-railways. The railway winds through the suburbs of Chattanooga, passes the Cravens Ho. (headquarters of Gen. Walthall) and the old Confederate Fort, skirts the point where the 'Battle above the Clouds' took place on Nov. 24th, 1863, and ends at the large Lookout Inn ($3-5; 1000 beds, incl. the cottages). A narrow-gauge railway ("Views") runs from the head of the inclined plane (Point Hotel) along the crest of the mountain to Sunset Rock and (3 M.) Natural Bridge. To the E. rises Missionary Ridge (also ascended by an electric tramway), which gave name to the battle of Nov. 25th, 1863. Beyond the ridge is the battlefield of Chickamauga (Sept. 19th-21st, 1863), perhaps the bloodiest battle of modern days (50,000 men killed or wounded out of 112,000 engaged), 11 sq. M. of which, together with parts of Lookout Mountain and Missionary Ridge, have recently been laid out as a national park (Park Hotel, near Crawfish Springs, $2). Numerous memorial monuments have been erected, and the positions of the battle-lines and batteries have been marked, in many instances with the guns actually used in the battles. The park contains 100 M. of drives. Other battlefields lie a little farther to the E. The pretty Lookout Falls are easily reached from Lookout Inn. — The National Soldiers' Cemetery, with 13,000 graves, lies to the E. of the city.

FROM CHATTANOOGA TO BRUNSWICK, 432 M., railway (Southern Railway Co.) in 15-17 hrs. At (27 M.) Cohutta this line joins the line from Cleveland (see p. 382) and enters Georgia. 80 M. Rome (Armstrong Hotel, $21/2-4$2), one of the chief cities of N. Georgia, with 6957 inhab. and considerable manufactures, is the junction of lines to Anniston (p. 356), Attalla (p. 384), and other points. The railway now runs towards the S.E. and passes near several battlefields. — 154 M. Atlanta, see p. 376. From (205 M.) Flovilla a steam-tramway runs to Indian Springs (The Wigwam, $21/2). — 242 M. Macon, see p. 397. — 281 M. Cochran; 300 M. Eastman (De Leitch Ho., $2), a winter-resort; 318 M. Helena. At (350 M.) Jesup we intersect the Plant System Line from Savannah to the S (see R. 74a) and at (410 M.) Everett the Florida Central & Peninsula Line (R. 74b). — 432 M. Brunswick (Oglethorpe, $23/4-4; Brit. vice-consul, Mr. Rosendo Torres), a rising cotton-shipping port and winter-resort, with 8499 inhab., is situated on the Brunswick River, near its embouchure in the Atlantic Ocean. The "Wanderer", the last slave-ship to cross the ocean, landed her 500 slaves at Brunswick. The historic St. Simon's Island (Hotel, $11/2-3) and other pleasant resorts are in this vicinity. Steamer to Savannah and Florida, see p. 396.

FROM CHATTANOOGA TO MEMPHIS, 310 M., Memphis & Charleston Railway in 11-12 hrs. — The line crosses the Tennessee, enters Alabama at (30 M.) Bridgeport, and runs towards the W. 38 M. Stevenson is the junction of a line to Nashville (p. 357). 97 M. Huntsville (610 ft.; Huntsville Hotel, $2-4; Monte Sano, a summer-hotel on a spur of the Cumberland Mts., 1700 ft. above the sea, $2-4) was formerly the capital of the state. — We recross the Tennessee to (122 M.) Decatur ($750 ft.; Bismarck, $2-21/2; American Ho., $2), a rising little iron-making city with 6330 inhab. and various manufactures. 165 M. Tuscaloosa, with the adjacent Sheffield and Florence (across the Tennessee), has an industrial population of 11,200. Beyond (196 M.) Tuta (555 ft.) we leave the Tennessee and enter Mississippi.
217 M. Corinth was a place of some strategic importance in the War and was occupied by Gen. Beauregard after the two days' fight at Shiloh (10-12 M. to the N.; April 6-7th, 1862), in which Gen. Johnston lost his life and the Confederates were defeated by Grant and Buell. Afterwards Corinth was occupied by the Unionists under Rosecrans, who repelled a desperate attempt to take it (Oct. 3rd-4th, 1862). — 258 M. Grand Junction. — 340 M. Memphis, see p. 359.

From Chattanooga to Lexington and Cincinnati, see R. 63a.

Beyond Chattanooga the New Orleans train runs to the S.W. across Alabama on the tracks of the Alabama Great Southern R. R. (see p. 379). 722 M. Fort Payne (860 ft.); 756 M. Attala (580 ft.), the junction of lines to Decatur (p. 383) and Rome (p. 383).

814 M. Birmingham (580 ft.; Morris, E. P.; Florence, from $2), a busy manufacturing city in Jones Valley, founded in 1871 and containing 26,178 inhab. in 1890, owes its rapid growth, phenomenal among southern cities, to the vicinity (6 M.) of Red Mountain, which contains inexhaustible stores of hematite iron ore in conjunction with abundant coal and limestone. Its activity is exhibited in large rolling mills, iron-furnaces, foundries, machine shops, a large basic steel mill (established in 1898), etc. (total value of products in 1890, $5,237,000). Alabama stands third in the list of iron-producing states, and three-fourths of Alabama iron is produced in the Birmingham district. Railways radiate hence in all directions. — 825 M. Bessemer (600 ft.; Grand Hotel), founded in 1887, contained 4544 inhab. in 1890 and is already an iron-making place of considerable importance. — 868 M. Tuscaloosa (160 ft.), at the head of steamboat-navigation on the Black Warrior River, has 4315 inhab. and is the site of the University of Alabama (250 students). — At (945 M.) Cuba we enter Mississippi. — 968 M. Meridian (320 ft.; St. Charles, E. P.; Southern, $21/2-4), an industrial city with 10,624 inhab., is the junction of lines to Vicksburg (p. 359), Corinth (see above), and Mobile (p. 377). — We now follow the New Orleans & N. E. R. R. Unimportant stations. We reach Louisiana at (1115 M.) Nicholson. In entering New Orleans we cross Lake Pontchartrain (p. 419) by the longest bridge in the world, consisting of 26 M. of continuous trestle (19 M. over land, 7 M. over water).

1164 M. New Orleans, see p. 415.

c. Via Weldon, Raleigh, and Atlanta (Seaboard Air Line).

1216 M. Railway in 40 hrs. (fares as above). Richmond, Fredericksburg, and Potomac R. R. from Washington to (116 M.) Richmond; Atlantic Coast Line from Richmond to (81 M.) Weldon; Seaboard Air Line from Weldon to (520 M.) Atlanta; Atlanta & West Point R. R. from Atlanta to (175 M.) Montgomery; Louisville & Nashville R. R. from Montgomery to (321 M.) New Orleans.

From Washington to (116 M.) Richmond, see R. 66; from Richmond to (200 M.) Weldon, see R. 71a. We here join the Seaboard Air Line, the N. terminus of which is at Portsmouth (see p. 371).

Our route runs towards the S.W. 221 M. Littleton; 241 M. Ridgeway; 254 M. Henderson (4000 inhab.), the junction of a line
to New Orleans.  

RALEIGH.  69. Route.  385

to Durham (p. 375); 270 M. Franklinton; 280 M. Wake Forest, with a large college; 287 M. Neuse.

298 M. Raleigh (320 ft.; The Park, $2^{1/2} - 4; Yarborough House, $2^{1/2} - 3), the capital of North Carolina, with 12,678 inhab., lies on high ground near the centre of the state. The State House stands in Union Square, in the centre of the city. Among other large buildings are St. Mary's College (pleasant grounds), the Peace Institute, the Baptist University (these three for girls and young women), the Agricultural & Mechanical College (300 students), Shaw University (360 coloured students), the State Insane Asylum, the State Geological Museum, and the Post Office. A drive may be taken to the Old, Confederate, and Federal Cemeteries (views).

From Raleigh to Durham and Greensboro, to Goldsboro, and to Norfolk, see p. 315.

Beyond Raleigh our line continues its general direction towards the S.W. 328 M. Moncure is the junction of a short line to Pittsboro. — At (340 M.) Sanford we cross the Cape Fear and Yadkin Valley R. R.

On the Bennettsville branch of this railway, 57 M. from Sanford, lie Red Springs (Townsend Hotel), a frequented resort with two mineral springs. In summer a four-in-hand coach runs hence to Southern Pines (see below).

From (352 M.) Cameron a short branch diverges to (10 M.) Carthage. — 366 M. Southern Pines (600 ft.; *Pinney Woods Inn, $2 - 5; Prospect Ho., $2; Southern Pines Ho., from $1^{1/2}), a pleasant winter-resort, situated on dry sandy soil, in the heart of the long-leaved pine belt of N. Carolina (average winter-temperature 44° Fahr.).

An electric tramway runs towards the W. from Southern Pines, through peach-orchards, to (6 M.) Pinehurst (Holly Inn, $2), a new winter-resort among the pines, with a casino, a deer-park, and other attractions.

394 M. Hamlet (Rail. Restaurant) is the junction of the Seaboard Air Line branch to (110 M.) Wilmington (p. 389). — 419 M. Wadeboro is the junction of lines to (132 M.) Rutherfordton and to Florence (p. 389). Near (459 M.) Waxhaw we enter South Carolina (p. 375). At (471 M.) Catawba we intersect the Ohio River and Charleston Railway; at (492 M.) Chester we cross the Southern Railway from Charlotte to Columbia; and at (509 M.) Carlisle we cross the same railway's branch between Columbia and Spartanburg (p. 375). 537 M. Clinton is another point of connection with the Southern Railway System; 565 M. Greenwood and (580 M.) Abbeville connect both with the Southern Railway and with the Central of Georgia R.R. At (595 M.) Calhoun Falls we cross the Savannah and enter Georgia (p. 376). 612 M. Elberton. — 646 M. Athens (Victoria, Commercial, $2^{1/2}), a small town with 10,000 inhab., claims to be the educational centre of Georgia. It is the seat of the University of Georgia (300 students), and among its other educational establishments may be mentioned the Lucy Cobb Institute for Girls. It

BADEDEKER'S _United States. 2nd Edit_ 25
is the junction of lines to Macon, Lula (p. 359), and various other points. — 684 M. Lawrenceville; 701 M. Tucker; 716 M. Howells. 228 M. Atlanta, and thence to — 1216 M. New Orleans, see R. 69a.

70. From Salisbury to Asheville and Morristown.

228 M. SOUTHERN RAILWAY to (141 M.) Asheville in 4½-5½ hrs. (fare $1.60; sleeper $2); to (228 M.) Morristown in 7-9 hrs. (fare $7.30; sleeper $2). From New York to Asheville in 22 hrs. (fare $21.45; sleeper $5).

This railway gives access to the beautiful scenery of Western North Carolina ("Land of the Sky"), which may be described as a plateau with an average altitude of 2000 ft., 250 M. long and 25 M. wide, bounded by the Great Smoky Mts. (p. 352) on the W. and by the Blue Ridge (p. 378) on the E. It is crossed by several spurs of the main chain, including the Black, the Balsam, the Pisgah, the Cowee, and the Nantahala ranges. Many of these are higher than the main chains, the Black Mts. alone containing 19 peaks over 6000 ft. in height. The district is watered by numerous rivers that rise in the Blue Ridge and flow with a steep decline and rapid current across this plateau, cutting through the Great Smokies on their way to the Mississippi. The French Broad, the Pigeon, the Tuckasegee, and the Little Tennessee are the chief of these. In this way the country is cross-sectioned into many smaller valleys, affording endless variety of scenery. The fact that even the highest mountains are densely wooded to their tops adds much to the picturesqueness and softens the outlines of the landscape.

Salisbury, see p. 375. Beyond (26 M.) Statesville (955 ft.) we cross the Catawba. The main Blue Ridge (p. 379) soon comes into sight on the right, while various spurs are seen in the distance to the left. 48 M. Newton (1070 ft.) — 58 M. Hickory (1140 ft.; Hickory Inn, $2-3, meal 75 c.).

From Hickory a narrow-gauge railway runs to (20 M.) Lenoir (Merchants' Hotel, $2), whence a drive of 4 hrs. brings us to Blowing Rock (Green Park Ho., Blowing Rock Ho., $2-2½), 2 M. from the famous precipice and mountain of this name (400 ft.). The "View from the latter is superb, including the Grandfather (5895 ft.) on the W., the Pilot Mts. (2430 ft.), 100 M. to the E., King's Mt. (1650 ft.) to the S., and Mitchell's Peak (p. 357) to the N. There are several pretty waterfalls and other points of interest in the vicinity.

To the left, at (73 M.) Morganton (1185 ft.), is the large State Lunatic Asylum. We enter the mountain-district proper at (111 M.) Old Fort (1450 ft.) and ascend abruptly through a romantic gorge, with its rocky mountain-walls overgrown by rhododendrons (in blossom in June). The engineering of the railway here is interesting, with its numerous loops, tunnels, cuttings, and bridges; at one point four sections of the line lie perpendicularly one above the other. At the head of the gorge we thread a long tunnel and reach the plateau of Western North Carolina (see above). 125 M. Black Mt. Station; 139 M. Biltmore (see p. 387).

141 M. Asheville. — Hotels. *Battery Park Hotel, on a hill above the town, from $4; *Kenilworth Inn, 2 M. from Asheville, near Biltmore, see above, $5; The Oaks, $2½-3; Swannanoa, $2-2½; Berkeley, $2-3. Glen Rock, $2-2½. — Electric Tramway to the station (1½ M. from the centre of the town) and to the suburbs (5 c.).

Asheville (2350 ft.), finely situated at the junction of the Swan-
nanoa and the French Broad, is the chief town of the district and is widely known as a health-resort for patients suffering from pulmonary and other ailments. Pop. (1890) 10,235. About 70,000 persons visit Asheville annually, Southerners frequenting it for its comparative coolness in summer (mean temp. 72°) and Northerners for its mildness in winter (39°) and spring (53°; chief seasons, July and Aug., Feb. and March). Its climate is dry and bright, and there are usually few days in the year in which out-door exercise is not enjoyable. It is said to be pre-eminently suitable for early stages of phthisis, while sufferers from asthma, hay fever, nervous prostration, and the after-effects of fever all derive benefit from a sojourn in Asheville. The environs are full of scenic attractions and offer abundant opportunities for pleasant walks, rides, and drives.

Walks. Beaumont, 1/2 M. to the E.; grounds open to visitors. — Fernhurst, 1/2 M. to the S., overlooking the junction of the Swannanoa and the French Broad (open daily, Sun. excepted). — Richmond Hill, 21/2 M. to the N.W. (always open). — Gouche’s Peak (3 M.) and Elk Mt. (5 M.), to the S. of the town, are fine points of view. — About 2 M. to the S.E. of Asheville, near Biltmore station (p. 338), is Biltmore, the home of Mr. George W. Vanderbilt and probably the finest private residence in America. The house, built in the French baronial style by Mr. Richard M. Hunt, at a cost of $4,000,000, stands upon a terrace 700 ft. long by 300 ft. wide and commands magnificent views. It contains much fine tapestry and other works of art. Many miles of beautiful drives have been constructed in the grounds, which have an extent of over 100,000 acres, and they show a wonderfully varied display of trees (views). Visitors are admitted to the grounds on Wed. & Sat., 1-7 p.m., by passes obtained at the hotels or at the Biltmore Office, near the entrance-gate (large excursion-parties not admitted). Special passes sometimes issued for other days.

Drives. Swannanoa Drive, extending for several miles along the river, the banks of which are thickly wooded and covered with rhododendrons, kalmias, and other wild flowers. — Tahkeestee Farm, 3-5 M. to the W. — The Sulphur Springs, 41/2 M. to the S., may be reached by electric car (fare 15 c.). — Hickory Nut Gap, a beautiful pass where the Broad River penetrates the Blue Ridge, lies 14 M. to the S.E. About 9 M. beyond the entrance to the Gap is the curious Chimney Rock. On the opposite side rise Bald Mt. (3860 ft.), celebrated in Mrs. Frances Hodgson Burnett’s Esmeralda’. There are two plain hotels not far from Chimney Rock. Other points of interest are the Pools and the Hickory Nut Falls (1300 ft.). — Arden Park (Hotel, §2), 10 M. to the S.

Longer Excursions and Mountain Ascents. Mt. Mitchell (6710 ft.), the highest peak in the United States to the E. of the Rocky Mts., rises in the Black Mts., 18 M. to the E. of Asheville. Its base may be reached by carriage along the Swannanoa or by railway to Black Mt. Station (p. 386). The ascent (arduous but not dangerous) takes 5 hrs. The View is very extensive. The night is sometimes spent in a shallow cave near the top. The name is derived from Prof. Elisha Mitchell, who lost his life here in 1837, while determining the height of the mountain, and is buried at the summit. — Mt. Pisgah (3795 ft.), one of the loftiest peaks near Asheville, lies 18 M. to the S.W. and commands a splendid view of the French Broad Valley. Accommodation for the night can be obtained in a farmhouse at the base, and the ascent may be made on horseback in 2 hrs. — Craggy Mt. (6030 ft.), an outlier of the Blue Ridge, 14 M. to the E., may be ascended on horseback in 2 hrs. (best in June, when hundreds of acres of rhododendrons, kalmias, azaleas, and heather may be seen in bloom). — Caesar’s Head (325 ft.), an outlier of the Blue Ridge, 45 M. to the S.W. of Asheville, may be reached either by carriage the whole way or by train to Hendersonville (p. 338) and carriage thence. On the S. side of the mountain
is a precipice 1500 ft. high, overlooking the low country of South Carolina and Georgia for 100 M. At the summit stands a good hotel ($2). Various points of interest are passed on the way. — Other distant points which are visited from Asheville are Hot Springs (see below), Highlands (see below), Roan Mt. (p. 381), Tryon, and Blowing Rock (p. 386).

From Asheville to Spartanburg, 70 M., railway in 3-3½ hrs. — This line runs towards the S.E. 22 M. Hendersonville (2165 ft.; Globe, Southern, $2) is the nearest railway-station to (25 M.) Caesar's Head (p. 357). Further on the train reaches the picturesque *Saluda Gap, where it descends rapidly through a narrow gorge. Fine views (best to the left). Rhododendrons numerous. — 70 M. Spartanburg, see p. 375.

From Asheville to Murphy, 124 M., railway in 10-11 hrs. — The line runs towards the S.W. 23 M. Waynesville (2755 ft.; White Sulphur Springs Ho., $2-3) lies amid the Balsam Mts., five of which in the immediate vicinity are over 6000 ft. high. — 36 M. Balsam (Rail. Restaurant). — 49 M. Hillsborough is one of the nearest railway-stations to Highlands (3815 ft.; *Davis Ho., $2; Highland Ho., $1½), which lies 32 M. to the S. and is the highest village to the E. of the Rocky Mts. It is frequented for its bracing air and charming scenery. — 121 M. Murphy.

Beyond Asheville the Morristown Train runs to the N. through the beautiful valley of the French Broad River. Picturesque scenery (views to the left). 153 M. Alexander.

179 M. Hot Springs (1325 ft.; *Mountain Park Hotel, $2½-5), situated in a beautiful little valley, 1 M. in diameter, surrounded by mountains 3-4000 ft. high, has long been frequented for its hot springs and delightful climate (winter milder than at Asheville). The springs (temp. 84-104°) are efficacious in rheumatism, gout, sciatica, skin and blood affections, and nervous prostration. Pleasant walks may be taken among the hills, but the drives are limited to those up and down the river. Round Top (1840 ft.), to the N., across the river, is easily ascended in ½ hr. and commands a good view.

Beyond Hot Springs we cross the French Broad and follow its S. bank. At (184 M.) Paint Rock (1275 ft.) the river forces its way through a gap between the Great Smoky Mts. (left) and the Bald Mts. (right). We enter Tennessee.

At (228 M.) Morristown (Virginia Ho., $2) we join the line from Washington to Chattanooga (see R. 69 b).

71. From Richmond to Charleston.

a. Via Weldon.

396 M. Railway (Atlantic Coast Line) in 10-14 hrs. (fare $13.15; sleeper $3). This line forms part of the 'Atlantic Coast Line Route' from New York to Florida (see R. 76a; from New York to Charleston in 19½-26 hrs.; fare $21.20, sleeper $4.50).

Richmond, see p. 366. The train crosses the James and runs towards the S. 8 M. Drewry Bluff (p. 370); 13 M. Chester. Near (23 M.) Petersburg we see remains of the fortifications of the Civil War (see p. 373). Near (76 M.) Pleasant Hill we enter North Carolina. At (84 M.) Weldon (70 ft.) we intersect the Seaboard Air Line from Norfolk (see p. 371). The train now traverses a flat region, clothed with endless pine-forests. 121 M. Rocky Mount, the
junction of lines to Norfolk (p. 371) and to (75 M.) Plymouth, on Albemarle Sound. At (137 M.) Wilson the line forks, the new ‘Short Cut’ running in a straight direction, while the line to (24 M.) Goldsborough (comp. p. 375) and (108 M.) Wilmington diverges to the left.

Wilmington (Orton, $2\frac{1}{2};$ Oceanic, at Carolina Beach; British vice consul, Mr. James Sprunt), the largest city of North Carolina (20,056 inhab.), lies on the Cape Fear River, 20 M. from the Atlantic Ocean. It has a large foreign commerce and regular steamship-communication with New York, Philadelphia, and Baltimore. It is a prominent market for naval stores. The Atlantic Coast Line (p. 388) has its headquarters here. — From Wilmington a railway runs to the N. to (82 M.) New Bern (p. 375).

163 M. Selma, the junction of a line to Raleigh (p. 385); 211 M. Fayetteville, the junction of lines to Greensborough (p. 375), Bennettsville, and Wilmington (see above); 243 M. Pembroke, the junction of a line to Charlotte (p. 375). At (281 M.) Pee Dee we are rejoined by the Wilmington loop-line. — 294 M. Florence (Central Hotel, $2-3),$ with 3395 inhab., is a cotton-market and railway-centre of some importance. We here turn sharply to the left (S.). — 342 M. Lane’s is the junction of a line to (37 M.) Georgetown, a quaint and old little seaport. 390 M. Ashley Junction (comp. pp. 394, 398).

396 M. Charleston, see p. 390.

b. Via Charlotte and Columbia.

518 M. Southern Railway to (388 M.) Columbia in 11 hrs.; South Carolina and Georgia Railway thence to (130 M.) Charleston in 4-\frac{1}{2} hrs. (fares as above).

Richmond, see p. 366. The train crosses the James, passes (1 M.) Manchester (p. 366), and runs to the S.W. through a tobacco-growing district. At (53 M.) Burkeville (520 ft.) we intersect the Norfolk & Western R. R. (R. 68). 73 M. Keysville (625 ft.). At (90 M.) Randolph we cross the Roanoke. From (109 M.) South Boston we follow the Dan River to (141 M.) Danville (p. 375).

From Danville to (282 M.) Charlotte, see p. 375. We here diverge to the left from the route to New Orleans (R. 69a). Beyond (299 M.) Fort Mill we cross the Catawba River. 326 M. Chester.

388 M. Columbia (300 ft.; Grand Central, $2-3;$ Jerome, Wright, $2-2\frac{1}{2};$ Columbia), the capital of South Carolina, lies on the high banks of the Congaree, in the district of the Pine Barrens. Pop. (1890) 15,353. Its streets are wide and shady, and many of the public buildings are imposing. The most important is the *State House, in the grounds of which is a fine monument to the 'Palmetto Regiment', which served with distinction in the Mexican War (1846-47). Other large edifices are the State Penitentiary, the Lunatic Asylum, the Court House, and the City Hall. The South Carolina College is attended by 200 students. The grounds of the Executive Mansion and Arsenal Hill command fine views of the valley. Pleasant drives
may be taken in the Fair Grounds and Sydney Park. The city possesses large car, machine, and iron works.

Columbia became the state-capital in 1796. In 1832 the ‘Nullification Ordinance’ was passed by a convention sitting here; and on Dec. 20th, 1860, another convention announced the dissolution of the union between S. Carolina and the other states. The city was occupied by Gen. Sherman in 1865 and suffered severely from fire.

From Columbia to (67 M.) Spartanburg, see p. 375; to Augusta, see p. 393.

Beyond Columbia our line passes through a level, pine-clad district. 412 M. Kingville is the junction of a branch-line to (38 M.) Camden (240 ft.; Hobkirk Inn, $4; Upton Court, $3), a quaint little town with 3000 inhab., frequented as a winter-resort among the pines. — At (456 M.) Branchville (Rail. Restaurant) we join the line described in R. 73.

518 M. Charleston, see below.

72. Charleston.

Hotels. Charleston Hotel (Pl. a; B, 2), Meeting St., $31/2-4; St. Charles (Pl. b; B, 2), Meeting St., $31/2.

Electric Tramways traverse the chief streets (5 c.) and run to various suburban points. — Omnibuses meet the principal trains (return-ticket 50 c.).

Steamers ply to New York (50 hrs.; fare $20), Boston, Baltimore, Philadelphia, Savannah, Georgetown, Beaufort, and Jacksonville. A small steamer plies twice daily from Custom House Wharf to Mt. Pleasant, Sullivan’s Island, and Fort Sumter (11/2 hr., there and back; fare $1).

Post Office (Pl. l; B, 2), cor. of Meeting and Broad Sts. — British Consul, Col. H. W. de Coetlogon, 62 South Battery. — Grand Opera House, Meeting St.; Academy of Music, King St.

Charleston, the largest city of South Carolina and one of the chief seaports of the Southern States, occupies the end of the narrow peninsula formed by the confluence of the Ashley and Cooper Rivers, about 6 M. from their embouchure in the Atlantic Ocean. It is a pleasant old-fashioned town, with its main streets well paved and numerous picturesque private residences embowered in semi-tropical flowers and trees. Pop. (1898) 65,000, more than half of whom are coloured. The land-locked harbour, since the completion of the new jetties, admits vessels of 241/2 ft. draught.

The small body of colonists under Col. Sayle, sent out by the lords proprietors to take possession of the Carolinas in 1669, after calling at Port Royal settled on the W. bank of the Ashley River, but soon (ca. 1680) transferred their town, named in honour of Charles II., to its present site. In 1685-86 numerous Huguenot emigrants were added to the population, and 1200 exiles from Acadia settled here in 1755. Charleston took a prominent share in the Revolution, repelled an attack on Sullivan’s Island (Pl. F, 3) in 1776 (Col. Moultrie), and was captured by Sir Henry Clinton in 1780 after an obstinate defence. The Civil War began at Charleston with the bombardment of Fort Sumter (Pl. E, 4; April 12-13th, 1861), and the city was more than once attacked by the Unionists in the ensuing years, being finally evacuated in Feb., 1865. In 1886 Charleston was devastated by a severe earthquake, which rendered seven-eighths of its houses uninhabitable, destroyed property to the value of $8,000,000, and killed scores of persons. A few traces of its action are still visible in the form of ruined buildings and iron stays and clamps.
Before the war Charleston was the chief cotton-shipping port of America, and it still handles a good deal of cotton and rice. Its present prosperity is, however, chiefly due to the discovery of extensive beds of excellent phosphates near the Ashley River; and the annual value of the exports of this article (including fertilizers) amounts to about $6,500,000. A visit to the phosphate-mines is interesting. Charleston also carries on a considerable trade in timber, fruit, and vegetables, and manufactures cotton, flour, carriages, machines, and other articles (value in 1898, $11,780,000).

Following Meeting Street (Pl. A, B, 1, 2), the chief wholesale business street, from the Railway Station (Pl. B, 1) towards White Point (see below), we pass the Charleston and St. Charles Hotels (p.390), the Market (left; interesting sight, 6–9 a.m.), and the Circular Church (Pl. 3; left), recently rebuilt in a handsome style. At the intersection of the street with Broad Street (Pl. B, 2) stands a group of public buildings: the Court House (Pl. D) and new Post Office (Pl. 1; a handsome granite edifice) to the right and the City Hall (Pl. B; with some interesting portraits) and St. Michael's Church (Pl. H; built in 1752–61; comp. p. lxxxviii) to the left.

St. Michael's was struck six times by the Federal cannon during the siege, was damaged by a cyclone in 1886, and nearly destroyed by the earthquake in 1886. Its fine tower commands an extensive view and contains a good set of chimes. In the churchyard, close to the iron gate in Broad St., is the tomb of a brother of Arthur Hugh Clough, with an epitaph by the poet, who spent part of his boyhood in Charleston, where his father was a cotton-merchant.

In front of the City Hall is a Statue of William Pitt, erected in 1770; the right arm was broken off by a British cannon-shot in 1780.

Farther on, Meeting St. passes numerous private houses, embowered in roses, jessamines, and myrtles. It ends at *White Point Garden (Pl. 4; B, 3), shaded with beautiful live-oaks and commanding a fine view across the Ashley River. The Jasper Monument commemorates a gallant act in the defence of Fort Moultrie (June 28th, 1776). Adjacent are a bronze Bust of Wm. Gilmore Simms (d. 1870) and a round tower made of blocks of phosphate (see above). To the E. extends the Battery (Pl. B, 2, 3), a broad esplanade, 500 yds. long, affording a good view of the harbour and its forts.

On the island opposite the battery is Castle Pinckney, and farther out is Fort Ripley, while Forts Moultrie and Johnston stand opposite each other on Sullivan's Island (left) and James Island (right). Modern fortifications have been erected on Sullivan's Island, and in 1897 a company of U. S. troops was stationed there for the first time since the Civil War. Fort Sumter occupies a small island in the middle of the entrance to the harbour. The first shot in the Civil War was fired by the Citadel cadets (p. 392), from a battery thrown up on Morris Island, against a vessel trying to take reinforcements to the Union troops in Fort Sumter (Jan. 9th, 1861). On April 12th Fort Moultrie and the other batteries opened fire on Fort Sumter, which had been occupied by Major Anderson with a small body of Union troops, and its flag was hauled down on the following day. In 1863 the Federal fleet invested the harbour and began a bombardment of the forts and the city, which lasted, with scarcely an intermission, till the final evacuation of Charleston in 1865. Morris Island had to be abandoned, but Forts Sumter and Moultrie defended themselves successfully against all attacks. Steamer to Fort Sumter, etc., see p. 390.

We now return along East Bay (Pl. B, 1, 2), passing the old Post
Office, to the new Custom House (Pl. 6), built of white marble (view of harbour from back). A visit may also be paid to one of the Cotton Compresses (no smoking) in this locality.

We may now return to Meeting St. and take the tramway to Marion or Citadel Square (Pl. 7; B, 1), adorned with a statue of John C. Calhoun (1782-1850), the famous S. Carolina statesman. On the N. side of the square is the large South Carolina Military Academy, usually known as the Citadel, the cadets of which took a prominent share in the Civil War (see p. 391).

Charleston prides itself, with some reason, on its charitable institutions. Perhaps the most prominent of these is the Orphan House (Pl. 8; B, 1), founded in 1792 and said to be the oldest American institution of the kind. The Enston Home, in King St., consists of a group of 40 cottages, with a church.

Other important buildings are the College of Charleston (Pl. 9; B, 2), founded in 1788; St. Philip's Church (Pl. 10; B, 2), Church St., with Calhoun's grave in the churchyard (on the other side of the street); St. Finbar's Cathedral (R. C.; Pl. 11, B 2), rebuilt in 1890; the old Huguenot Church (Pl. 12; liturgy translated from the French); the Medical College (Pl. 13); the old Powder Magazine; and the Roper Hospital (Pl. 14). The Avery Normal School has 400 coloured students.

To the N. of the city, 3 M. from the City Hall (tramway 10 c.; cair. there and back $3), lies the Magnolia Cemetery, which should be visited for its fine live-oaks (draped with 'Spanish moss'), azaleas, magnolias, camellias, almond-trees, etc. (best in May or June). The boughs of one of the live-oaks have a spread of 400 ft., and the trunk of another is 17-18 ft. in girth.

No one in the season (March-May) should omit to visit the (12 M.) Gardens of Magnolia (reached by railway or steamer), on the Ashley, the chief glory of which is the gorgeous display of the azalea bushes, which are sometimes 15-20 ft. high and present huge masses of vivid and unbroken colouring. The live-oaks, magnolias, and japonicas are also very fine.

The Church of St. James's Goosecreek, an interesting relic of 1711, lies in the heart of a forest 1 M. from (15 M.) Otranto Station. Otranto was the residence of Dr. Garden, after whom Linnaeus named the gardenia. Near the church is a farm known as The Oaks, from a magnificent Avenue of Oaks (200 years old) which leads to it.

Electric Cars run from Charleston to (7 M.) Chicora Park (return-fare 20 c.) and via Mt. Pleasant (Pl. E, 1) and Sullivan's Island (Pl. F, 3) to (10 M.) Isle of Palms, a resort on the Atlantic coast (return-fare 25 c.). Oseola (p. 403) died as a captive at Fort Moultrie (Pl. F, 3) and is buried on Sullivan's Island.

73. From Charleston to Augusta.

138 M. South Carolina & Georgia R. R. in 5 1/4 hrs. (fare $4.50; parlor-car 75 c.).

Charleston, see p. 390. The line runs slightly to the N. of W. 15 M. Woodstock. — 22 M. Summerville (Pine Forest Inn, from $4; Dorchester Inn, $2 1/2), a favourite winter-resort among the pines and much frequented by the citizens of Charleston. There are many beautiful drives in the neighbourhood, and fair fishing and shooting are within easy reach. Its golf-links are good.
Near Summerville is Pinehurst Tea Plantation (Dr. Shepard's), the only one in the United States. Its produce in 1896 amounted to 2000 lbs.

41 M. Pregnall's is the junction of a line to Sumter.

62 M. Branchville (Rail. Restaurant) is the junction of the line to Columbia (see p. 390). Our line continues to run towards the W. and at (82 M.) Denmark (p. 394) intersects the Florida Central & Peninsular R. R. (see p. 394). From (89 M.) Blackville branch lines diverge to Severn and Allendale.

119 M. Aiken (560 ft.; *Highland Park, burned down in 1898; Park Annex), a popular winter-resort, much resorted to by consumptive and rheumatic patients and others. It lies in the 'sand hill' or 'pine barren' district of S. Carolina, and is surrounded by vast forests of fragrant pines, growing in a soil of white sand. The gardens of the town, thanks to careful cultivation and a liberal use of fertilizers, are full of jessamine, orange-trees, and other S. plants. The air is dry and balmy. The mean temperature of winter is 50° Fahr., of spring 57°, of autumn 64°. The Palmetto Golf Links (18 holes), at Aiken, are the best in the S. and the scene of various important competitions. Fox-hunting, polo, and cricket are also among the amusements.

138 M. Augusta (180 ft.; *Bon Air Hotel, at Summerville, see below, $4-5; Arlington, $2 1/2-4; Planters, $2-2 1/2; Commercial, R. from 75 c.), the third city of Georgia (33,300 inhab.), pleasantly situated on the right bank of the Savannah, at the head of navigation, and connected by a bridge with Hamburg (S. C.) on the left bank. It carries on a large trade in cotton (200,000 bales yearly), and its cotton mills, run by a system of Water Power Canals, produce more bleached cotton goods than any other city in America (value of manufactures in 1890, $9,334,360). The main canal, bringing water from the Savannah, is 7 M. long, 150 ft. wide, and 14 ft. deep; it is owned by the city, and its revenues pay nearly the whole interest on the municipal debt. Broad Street, 120 ft. wide and paved with asphalt, is one of the handsomest business-thoroughfares in America; *Green Street, with a fine double avenue of trees, is the most beautiful residence-street. In Broad St. is a handsome Confederate War Monument. Among the chief buildings are the City Hall, the U. S. Building, and the Exchange. The Sibley Cotton Mill is architecturally, perhaps, the handsomest in the world. Close by it rises the tall Chimney of the Confederate Powder Mills, left standing as a memorial of the Civil War. In 1892 a movement was started to erect a statue of Eli Whitney, who invented and perfected the cotton-gin in Georgia, in 1792.

On the hills 3 M. to the W. of Augusta (electric tramway) lies Summer-ville (2276 inhab.), with a U. S. Arsenal and the Bon Air Hotel (see above).

Schultz's Hill, at Hamburg (see above), and the Fair Grounds are favourite resorts.

From Augusta to Atlanta, 171 M., Georgia R. R. in 4 1/2-5 1/2 hrs. (fare $5.15; sleeper $1.50). The chief intermediate stations are (47 M.) Camak, the junction of a line to Macon (p. 397); 103 M. Madison, the junction of lines to Macon and Athens (p. 385); and (119 M.) Social Circle,
connecting with the Gainesville, Jefferson, and Southern R. R. — 171 M. Atlanta, see p. 376.

From Augusta to Savannah, see R. 75. Other lines connect it with (81 M.) Tennille (S. Carolina & Georgia R. R.; a fruit-growing centre), Port Royal (see below), Seneca, Spartanburg (p. 376), etc.

74. From Richmond to Savannah.

a. Via Charleston.

510 M. RAILWAY (Plant System) in 15 hrs. ($14.50; sleeper $3.50).

From Richmond to (396 M.) Charleston, see R. 71a. The line (Charleston & Savannah R. R.) turns to the left (S.) at (402 M.) Ashley Junction (p. 389) and traverses a marshy district, with forests of moss-draped cypress and oak. At (457 M.) Yemassee we intersect the railway from Augusta (p. 393) to Beaufort and Port Royal.

Beaufort (See Island Ho., § 21/2-3; Brit. vice-consul, Mr. J. E. Kessler), on St. Helena Island, is a fashionable Southern resort, with a fine shell-road and promenade. — Port Royal, with one of the finest harbours on the coast, was the first landing-place of the Charleston settlers (see p. 390).

We cross the wide and slow Savannah before reaching (497 M.) Monteith, and beyond it we cross the line from Augusta (p. 393).

510 M. Savannah, see below.

b. Via Danville and Columbia.

530 M. Southern Railway and Florida Central & Peninsular R. R. in 16-17 hrs. (fares as above).

From Richmond to (388 M.) Columbia, see R. 71b. Beyond Columbia the train (Florida Central & Peninsular Railway) runs to the S. through a flat, wooded region. 415 M. Woodford. At (440 M.) Denmark we intersect the S. Carolina & Georgia R. R. (see R. 73), and at (466 M.) Fairfax we cross the line from Augusta to Port Royal (see above). 485 M. Scotia; 499 M. Clyo. Beyond (512 M.) Richmond we cross the Savannah and enter Georgia, henceforth skirting the right bank of the river. — 530 M. Savannah.

Savannah. — Hotels. *De Soto (Pl. a; B, 3), Madison Sq., a large and handsome house, § 3-5; Pulaski (Pl. b; B, 1), Screven (Pl. c; B, 2), Johnson Sq., § 2-3; Harnett (Pl. c; B, 1), Market Sq., § 2.

Post Office (Pl. B, 2), Whitaker and York Sts. — Savannah Theatre (Pl. B, C, 3), Chippewa Sq. (the oldest theatre in the United States; 1813). — British Vice-Consul, Mr. Alex. Harkness, 89½ Bay St.

Savannah ("Forest City"), the second city and chief commercial centre of Georgia, lies on the S. bank of the river of the same name, on a bluff 40ft. above the level of the river and 18 M. from its mouth. It is well built and regularly laid out, and the beautiful semi-tropical
vegetation of its numerous parks and squares makes a very pleasing impression. Bay Street is the chief thoroughfare for wholesale business, while Congress Street and Broughton Street contain the best shops. Bull Street is the most fashionable promenade. Pop. (1890) 43,189.

Savannah was settled in 1733 by Gen. Oglethorpe, the founder of the youngest of the 13 original states, and owes much of its present beauty to the foresight of the plan he laid out. His object was to provide an asylum for the poor of England and the Protestants of all nations. John and Charles Wesley visited the settlement in 1736, and George Whitefield reached it in 1737. In the early troubles between the British and Spanish colonists Oglethorpe and his settlers played a prominent part, penetrating to the walls of St. Augustine (p. 401). In 1778 Savannah was captured by the British, who repulsed a Franco-American attempt to retake it the following year. The port of Savannah was closed to commerce by the Federal fleet from 1861 to 1865, and Sherman occupied the city in Dec. 1864, at the end of his triumphant 'March through Georgia' (comp. p. 376). Since the war its progress has been rapid. Savannah contained 5195 inhab. in 1810; 15,312 in 1850; and 30,681 in 1880. — The first steamship to cross the Atlantic Ocean started from Savannah in 1819.

Savannah's export-trade is very extensive, the chief articles being cotton (second to New Orleans alone), timber, rice, and naval stores. Its manufactures (value $4,500,000 in 1890) include railway-cars, fertilizers, flour, and iron. A visit should be paid to one of the Rice Mills (River St.), and one of the Cotton Compresses (at the wharves).

The visitor may begin with a glance at the warehouses and wharves at the foot, and at the busy traffic of Bay St. (Pl. A-C, 1) on the top, of the bluffs overhanging the river. Among the buildings in this part of the city are the City Exchange or City Hall (Pl. B, 1; *View from tower) and the Custom House (Pl. B, 1). We then follow *Bull Street (see above) towards the S., crossing Johnson Square (Pl. B, 1, 2), with a Monument to Gen. Greene, erected in 1829, and the recently restored Christ Church (good interior). In the building at the N.E. corner of Bull St. and Broughton St. the Ordinance of Secession was passed on Jan. 21st, 1861. In Wright Square (Pl. B, 2) are the handsome County Court House, built in 1889-91, and the new Federal Building, including the Post Office and the U. S. Court House.

A little to the W. of this point, in Telfair Place, is the Telfair Academy (Pl. A, B, 2; adm. 10-5, Sun. 1-5; 25 c.), which is well worth a visit (Director, Carl L. Brandt). It contains a collection of casts (incl. the 'Farnese Bull'), a selection of paintings, and various objects of art and historical interest. Among the paintings are good works by Kaulbach, Julian Story, Dücker, Szymanowski, J. von Brandt, and C. L. Brandt (Albrecht Dürer in his studio, Head of Christ). The picture-gallery is adorned with mural paintings by Schraudolph and panels by C. L. Brandt.

At opposite corners of Oglethorpe Avenue are the Independent Presbyterian Church (Pl. B, 3) and the Chatham Academy (Pl. B, 3).

In Oglethorpe Ave., a little to the E., is the Colonial Park (Pl. C, 3), on the site of an interesting old burying-ground.

We then cross Chippewa Square (Pl. B, 3) and reach Liberty Street, in which, a little to the E., is the Convent of St. Vincent de Paul (Pl. C, 3). The fine Roman Catholic Cathedral, which stood close by, was totally destroyed by fire in Feb., 1898. In Madison Square (Pl. B, B, 4) is the Jasper Monument (comp. p. 391), erected
396 Route 74. SAVANNAH.

in 1879 in honour of Sergeant Jasper, who was killed at Savannah in 1779. The Green House, at the N.W. corner of the square, was the headquarters of Gen. Sherman (p. 395). Monterey Square (Pl. B, 4) contains the Pulaski Monument, in memory of Count Pulaski, who fell at the siege of Savannah in 1779 (see p. 395).

We now reach the beautiful Forsyth Park (Pl. B, 4, 5), with its pines, roses, coleas, palmettoes, oleanders, jasmines, cacti, magnolias, etc. In the centre is a fountain. The Parade Ground (Pl. B, 5, 6), forming an extension of the park towards the S., contains a fine Confederate War Monument (Pl. B, 5). At the S. end of the Parade Ground is the Telfair Hospital (Pl. B, C, 6). At the corner of Whitaker and Gaston Sts., adjoining Forsyth Park on the W., is Hodgson Hall (Pl. B, 4), with the library and collections of the Georgia Historical Society. The First African Baptist Church (Pl. A, 1, 2), Franklin Square, has 5000 communicants.

Environ. Bonaventure Cemetery, 4 M. to the S., reached by the Coast Line R. R. (station at the cor. of Bolton St. and E. Broad St., Pl. D, 3) or by the Thunderbolt Shell Road, is famous for its avenues of live-oaks, draped with Spanish moss. Thunderbolt, on the Thunderbolt River, 1 M. farther on, is a favourite resort. — Another fine shell-road leads to the W. to (9 M.) White Bluff. — The City and Suburban Railway (cor. Whitaker and 2nd St.), runs to (6 M.) Isle of Hope, on the Skidaway River, and (9 M.) Montgomery (return ticket 50 c.), on the Vernon River, two pretty suburban resorts. Near the latter is Beauclerc. At (8 M.) Bethesda, on this line, is a large orphanage, established by George Whitefield in 1740. — At the mouth of the Savannah River lies (18 M.) Tybee Beach (Hotel Tybee, $3-4), one of the most popular sea-bathing resorts of the S. (reached by Sav. & Atlantic R. R., from cor. of Randolph and President Sts.; return-ticket 50 c.) It has a fine beach. Adjacent, on Cockspur Island, is Fort Pulaski, which has been greatly strengthened since its capture by the Unionists in 1862. — A steamer plies twice weekly from Savannah to Fernandina (p. 400), calling at Brunswick (p. 383) and at several points on the 'Sea Islands, on which large quantities of 'Sea Island' cotton used to be grown. They are covered with palmettoes and live-oaks. The S. end of Cumberland Island, between Brunswick and Fernandina, became the property of Gen. Nathaniel Greene after the Revolution, and Washington's friend, 'Light Horse Harry Lee', died here in 1818. The mansion-house is named Dungeness.

75. From Savannah to Atlanta.

294 M. Central of Georgia Railway in 11 hrs. (fare $3.37; sleeper $2).

Savannah, see p. 394. The railway runs a little to the N. of W. At (17 M.) Meldrim we connect with the Georgia & Alabama R. R. 35 M. Brewer; 57 M. Dover, the junction of a short line to Statesboro; 66 M. Rocky Ford, the junction of a line to Sylvania.

At (79 M.) Millen the railway forks, the right branch running to the N. to (53 M.) Augusta (see p. 393). Our line bends to the left and runs nearly due W. 87 M. Rogers; 96 M. Midville; 107 M. Wadley; 135 M. Tennille (p. 394). Beyond (146 M.) Oconee we cross the river of that name. From (170 M.) Gordon a branch-line diverges to the left for Machen (Covington, Athens).
191 M. Macon (Lanier Ho., $2 ½-5; Brown Ho., $ 2 ½-5), a busy cotton-mart and railway-centre, with 22,746 inhab., lies on the Ocmulgee River. The Wesleyan Female College here (400 students) dates from 1836 and claims to be the oldest female college in the world. Mercer College (250 students) is a Baptist institution.

The Central of Georgia branch running to the S. from Macon7 to (71 M.) Americus passes (60 M.) Anderson or Andersonville, the site of the great Stockade Prison in which so many of the Union troops were confined during the Civil War. The prison-grounds have been converted into a park, and a memorial monument has been erected.

At Macon our line crosses the Southern Railway route from Chattanooga and Atlanta to Brunswick (see p. 383) and turns towards the N.W. — 234 M. Barnesville. — 251 M. Griffin (Nelms Ho., $ 2), a thriving little town with 5000 inhab. and large cotton mills. Near Griffin is the Georgia Experimental Farm. A line diverges here to the left for Carrollton. — 267 M. Lovejoy; 281 M. Forest; 288 M. East Point.

294 M. Atlanta, see p. 376.

76. From New York to Florida.

a. Via Atlantic Coast Line.

Railway to (1014 M.) Jacksonville in 25-35 ½ hrs. (fare $29.15; sleeper $6.50); to (1050 M.) St. Augustine in 26-37 ½ hrs. (fare $30.00; sleeper $7); to (1254 M.) Tampa in 34-45 hrs. (fare $37.50; sleeper $8.50). The 'Florida Special', a vestibuled through-train similar to that described at p. 305, leaves New York at 12.30 p.m., and is the fastest train from New York to Florida.

Florida, occupying the peninsula in the extreme S.E. corner of the United States, was the first portion of North America colonized by Europeans (comp. pp. 401, 404) and was named by its Spanish discoverers (1512) because first seen on Easter Sunday ('Pascua Florida'). Its mild and equable winter climate has made it a favourite resort of invalids and others who wish to escape the rigours of the North, while the beauties of its luxuriant semi-tropical vegetation and its excellent opportunities for shooting and fishing are additional attractions. The game on land includes deer, bears, pumas (Felis concolor), wild-cats, wild turkeys, and numerous other birds, while the fishing for tarpon (Megalops thrisstodes), the largest and gameiest of game-fish (sometimes 200lbs. in weight), has its headquarters in this state (comp. pp. 411, 412). The orange is believed to have been introduced by the Spaniards, and about 5 million boxes (ca. 175 to a box) were annually produced before the severe frost of Feb., 1895, killed most of the trees. The yield in 1897-98 was only 200,000 boxes; but the groves are generally being replanted. In the S. part of the State, especially on the E. coast, large quantities of pine-apples are now profitably raised. Strawberries and vegetables are also extensively produced for early shipment to northern markets. Tobacco, cotton (including the valuable 'sea-island cotton'), rice, maize, oats, and sugar-cane are also grown, and extensive and valuable beds of phosphates are worked. About three-fourths of the State, exclusive of swamps, prairies, and hardwood timber, is covered by pine-forests; and the lumber industry is extensive. Sponge and turtle fishing are other sources of wealth. The S. portion of the State is occupied by the Everglades, which may be described as a huge swamp, 8000 sq. M. in extent, filled with low-lying islands surrounded by clear water that abounds in fish. A remnant of the Seminole Indians still linger here, but the district is without the pale of the ordinary tourist.
The peninsula of Florida affords the most distinct field, in a physiographic sense, of any part of N. America. Including the N. portion of the State, it has a length of about 600 M., an average width of near 100 M., and a total area greater than that of New York, and nearly as great as that of New England. In all this great realm the maximum height above the level of the sea does not exceed about 400 ft. The whole of the soil is composed of materials recently brought together on the sea floor. About one fourth of the soil area is limy, due to the coral rock which underlies it. The remainder is nearly pure sand of a rather infertile nature. All the soil owes its value in the main to the admirable climate which the region enjoys ('Nature and Man in America', by N. E. Shaler).

The Season to visit Florida is from Dec. to April, when all the hotels are open and everything is seen to advantage. The communication with the North is excellent (comp. pp. 397, 398), and the hotels at the chief resorts are unsurpassed in the United States. Invalids should not visit Florida without medical advice, and all should remember that the climate varies considerably in different parts of the State. Clothing of medium thickness will be found most suitable, though it is advisable to be prepared for occasional great heat as well as for some really cold weather. Dust-coats will be found useful. Walking Excursions are not recommended, and most of the roads are too sandy for pleasurable Driving.

From New York to (228 M.) Washington (by the Pennsylvania R. R.), see RR. 31 a, 40, & 42 a; from Washington to (344 M.) Richmond, see R. 66; from Richmond to (734 M.) Ashley Junction, see R. 71 a (the 'Florida Special' does not run into Charleston); from Ashley Junction to (842 M.) Savannah, see R. 74 a.

From Savannah we run towards the S.W. on the tracks of the Savannah, Florida, and Western Railway (Plant System). The district traversed is rather featureless, but the traveller from the N. will be interested in the 'Spanish Bayonets' (Yucca filamentosa) and other vegetable evidence of a Southern clime. Near (858 M.) Way's we cross the Ogeechee, and beyond (901 M.) Johnston the Altamaha. At (899 M.) Jesup we intersect the line from Atlanta to Brunswick (see p. 383).

939 M. Waycross is a junction of some importance, lines running hence to Dupont (see below), Jacksonville (see p. 399), Brunswick (p. 383), and Albany. Numerous pear-orchards.

From Waycross to Dupont, 34 M., Savannah, Florida, & Western Railway (Plant System) in 8/4-1/2 hr. From Dupont the Plant System extends to the W. and N.W. to (70 M.) Thomasville (see below) and (281 M.) Montgomery (p. 377), while to the S. it runs to Live Oak (p. 414), High Springs, Lakeland, and (296 M.) Tampa (p. 422). — Thomasville (250 ft.; Mitchell Ho., Piney Woods Hotel, from $4) is a favourite winter-resort on a plateau covered with pine-forests. Pop. (1890) 5514. Its attractions include numerous walks and drives (Glen Arvern, Paradise Park, etc.), shooting, an opera-house, and comfortable hotels. It is supplied with water by an artesian well 1900 ft. in depth. Round the town are numerous orchards of the 'Le Conte' pear.

From Waycross our line runs to the S.E. Beyond (973 M.) Folkston we cross the St. Mary's River and enter Florida (the 'Everglade State'). At (994 M.) Callahan we cross the Florida Central & Pen. R. R. from Fernandina (p. 400) to Baldwin, Tampa, and Cedar Key (R. 81 b).

1014 M. Jacksonville, see p. 399. Hence to (1050 M.) St. Au-
to Florida.

JACKSONVILLE.

76. Route. 399

gustine and (1380 M.) Miami, see p. 400; to (1254 M.) Tampa and (1263 M.) Port Tampa, see R. 81.

b. Via Southern Railway.

Railway to (998 M.) Jacksonville in 26½ hrs., to (1036 M.) St. Augustine in 27 hrs., to (1200 M.) Tampa in 29 hrs. (fares as above). The 'New York and Florida Limited' leaves New York at 12.10 p.m.

From New York to (228 M.) Washington, see R. 42; from Washington to (605 M.) Charlotte, see R. 69a; from Charlotte to (716 M.) Columbia, see p. 389; from Columbia to (855 M.) Savannah, see p. 394.

Beyond Savannah we continue to follow the Flor. Gen. & Penin. R. R., crossing the Ogeechee at (870 M.) Burroughs and the Altamaha near (911 M.) Barrington. At (917 M.) Everett we intersect the line from Atlanta to Brunswick (see p. 383). Beyond (959 M.) Kingsland we cross the St. Mary's River and enter Florida. — 972 M. Yulee is the junction of the line from Fernandina (p. 400) to Baldwin, Tampa, and Cedar Key (R. 81 b).

998 M. Jacksonville, see below. Hence to (1036 M.) St. Augustine, see p. 401; to (1210 M.) Tampa, see R. 81 b.

c. By Steamer.

There are various combinations for a sea-voyage on the way from New York to Florida.

Steamers of the Clyde Steamship Co. run thrice weekly from New York (Pier 29, E. River) to Charleston and Jacksonville (21/2-3 days; fare $25).

A steamer of the Mollory Line plies every Friday at 3 p.m. from New York (Pier 21, E. River) to Brunswick (p. 383; 60 hrs.; fare $24). From Brunswick a steamer of the Cumberland ('inside') Route runs in connection with the New York boats to Fernandina (p. 400; 31/2 days; through-fare $21). Jacksonville is 11/2 hr. from Fernandina by railway (see p. 400) and 31/2-4 hrs. from Brunswick via Everett (p. 383; through-fare $22.50).

Steamers of the Ocean Steamship Co. leave New York (Pier 34, N. River) daily (except Sun.) for Savannah (2-2½ days; fare $20, to Jacksonville $25), and Boston (Lewis Wharf) twice weekly for the same port (3 days; $22). From Savannah to Jacksonville by railway, see R.R. 76a, 76b.

Steamers of the Merchants and Miners Transportation Co. run twice weekly from Baltimore (foot of West Falls Ave.) to Savannah (2½ days; fare $15, from New York $18.50). From Savannah to Jacksonville by railway as above (through-fare from Baltimore $2.65, from New York $24.45).

A steamer of the Old Dominion Line leaves New York (Pier 26, N. River) every week-day for Norfolk (p. 371; 18-22 hrs.; $8), whence we may proceed to the S. by the Seaboard Air Line via Weldon, by the Atlantic Coast Line, or by the Southern Railway via Rocky Mount (comp. p. 388).

Jacksonville. — Hotels. St. James (winter only), $4; Windsor, from $21/2; Everett, Placida, $21/2-4; Carleton. Grand View (winter only) Geneva, Elliot, St. John's, from $2; Durval, R. 50 c.-$1 (no meals). — Boarding Houses, $6-12 per week. Furnished Rooms, $21/2-6 per week.

Electric Tramways run through the chief streets and to the suburbs. Cab from the stations or wharves to the hotel, 25 c. each pers., each trunk 25 c. — Steamers ply up the St. John's River (p. 403) and to Mayport, Charleston, New York, Boston, etc. — Small Boats, at the foot of Market
400 Route 76. JACKSONVILLE.

St., 25 c. per hr. — British Vice-Consul, Mr. Edward Sudlow. — Post Office, Hogan St., corner of Forsyth St.

Jacksonville, the commercial metropolis of Florida (25,130 inhab. in 1895), situated on the left bank of the St. John’s River, 22 M. from its mouth, was founded in 1822 and named after Gen. Andrew Jackson. It is much frequented by visitors from the N. on account of its dry and equable winter-climate (mean winter temp. 55° Fahr.) but offers comparatively little of interest to the passing tourist, who will probably regard it merely as a stage on the way to St. Augustine and the more picturesque parts of Florida. It carries on a large trade in fruit, timber, and grain, and has some manufactures. The chief business-streets are Bay Street and Forsyth Street, parallel with the river, and Laura Street and Main Street, at right angles to it. The residence-streets are generally shaded with bitter-orange and other trees. The chief streets are paved with vitrified brick.

Pleasant drives may be enjoyed on the shell-roads to the N. and in the Riverside suburb (S.W.). Most of the other roads are too sandy for heavy wheeled traffic. Good views of the city and river are enjoyed from the Viaduct, which leads from Bay St. to Riverside Ave., and from the ferry plying from the foot of Newnan St. to S. Jacksonville. A Confederate Monument was unveiled in 1898 in St. James Park.

From Jacksonville to Fernandina, 36 M., railway in 1½ hr. — Fernandina (Egmont, § 2-2½; Strathmore, § 2; Brit. vice-consul, Mr. E. V. Nicholl), a seaport with (1895) 2511 inhab., situated on the W. side of Amelia Island, at the mouth of the Amelia River, was settled by the Spaniards in 1623. It has a fine harbour and carries on a trade in phosphates, naval stores, and timber, while steamers ply to Brunswick (see p. 399), European ports, etc. Its population is much increased in winter by visitors from the N. A good shell-road leads to (2 M.) Amelia Beach, a fine expanse for bathing and driving. Excursions are often made to Cumberland Island (p. 396). — From Fernandina to Baldwin, Tampa, and Cedar Key, see R. 81b.

From Jacksonville to Pablo Beach, 17 M., Jacksonville & Atlantic Railroad (reached by ferry from foot of Newnan St.) in 1 hr. — Pablo Beach (Hotel Pablo), one of the most popular summer and sea-bathing resorts in Florida, has a splendid beach and the usual seaside attractions. It is possible to drive along the beach to (6 M.) Burnside or Mayport (see below) and return thence by steamer.

Mayport and Burnside Beach, at the mouth of the St. John’s, may be reached by steamer. From Mayport we may visit Fort George Island by small boat.

From Jacksonville to St. Augustine and Miami, see below; to Enterprise and Palm Beach, see p. 406; up the St. John’s River, see p. 408; to Pensacola and New Orleans, see R. 82; to Tampa, see R. 81.

77. From Jacksonville to St. Augustine and Miami.

366 M. Florida East Coast Railway in 12-14 hrs. (fare $14.10); to (36 M.) St. Augustine in 1-1/4 hr. (fare $1.50).

Jacksonville, see above. On leaving the station the train crosses the St. John’s River by a steel bridge, 1320 ft. long, and traverses the suburb of South Jacksonville. Farther on we see a few orange groves, but most of the journey for 150 M. passes through pine
ST. AUGUSTINE. 77. Route. 401

woods. Between (14 M.) Sweetwater and (16 M.) Bayard we cross the Arlington.

36 M. St. Augustine. — Hotels (open in winter only). *Ponce de Leon (Pl. a; B, 4), from $5; *Alcazar (Pl. b; B, 4), from $4; Cordova (Pl. c; B, 4), from $4, these under the same management; Granada, Valencia, Magnolica. St. George, from $2½; Florida Ho. (Pl. e; B, 5); Barcelona, $2-3; Ocean View, $2-2½. — Boarding Houses, $8-15 per week. — Hotel Omnibuses and Carriages at the station, ¾ M. from the town (25 c.; trunk 25 c.).

Carriages $1½-3 per hr., $4-5 per day; Saddle Horses $1 and $3. — Boat, with attendant, from 25 c. per hr., $2-5 per day (Central Wharf). British Vice-Consul, Mr. J. P. Dismukes.

Post Office, Plaza de la Constitucion.

St. Augustine (accent on first syllable), one of the most picturesque and interesting little cities in America, lies on the Atlantic coast near the S. end of a narrow peninsula formed by the Matanças and St. Sebastian Rivers, and opposite Anastasia Island. The surrounding country is flat, sandy, and overgrown with palmetto scrub. The older streets are all very narrow; the old Spanish houses are built of ‘coquina’ (a kind of shell limestone), and some of them have overhanging balconies. The gardens and squares are full of palmetoes, Spanish daggers, orange and citron trees, date palms, magnolias, and bananas. The permanent population of St. Augustine is (1895) 4151, but this is increased to at least 10,000 during winter. The climate is temperate and equable, the mean temperature for the year being about 70°, for winter 58°.

In 1512 the Spaniard Ponce de Leon landed near the Indian town of Seloy (on or near the site of St. Augustine), in search of the ‘Fountain of Youth’, but, not finding it, re-embarked. Half-a-century later (1564) a colony of French Huguenots, under René de Laudonnière, landed near the same spot, but soon migrated to the St. John’s River. The settlement of a Protestant colony within his trans-Oceanic dominions aroused the indignation of Philip II. of Spain, who forthwith sent out an expedition under Don Pedro Menendez de Avilo to exterminate the invaders. Menendez landed at Seloy on Sept. 8th, 1665, found the Indians friendly, and erected the fort of San Augustine. St. Augustine is thus one of the oldest permanent settlements of Europeans within the territories of the United States (comp. p. 464). The Spaniards lost no time in carrying out the object of their coming by destroying the French Fort Caroline and massacring its inhabitants. During the next century St. Augustine led a very chequered existence. It was plundered by Sir Francis Drake in 1586 and by Capt. John Davis in 1665, and it was attacked on other occasions by the Indians, French, Carolinians, and Georgians (p. 395). In 1763 St. Augustine, with the rest of Florida, was yielded to Great Britain, but it was restored to Spain twenty years later. Under the British it contained about 260 householders and 900 negroes. In 1821 Florida was ceded to the United States, and from this time may be dated St. Augustine’s fame as a winter-resort, though it was not till after the termination of the troubles with the Seminole Indians (1842) that any large number of Northern visitors found their way hither.

There are now few persons of Spanish descent in St. Augustine, all having left the city on the British or American occupation; but some descendants of a colony of Minorcans, who arrived here in 1769, are still to be seen. Many of the older and more picturesque features of the place are disappearing, though a laudable effort has been made to erect new buildings in a style in harmony with the local atmosphere and traditions.

In the centre of the city is the *PLAZA DE LA CONSTITUCION

BARDERER’S United States. 2nd Edit. 26
(Pl. B, 4), extending on the E. to the sea-wall and the Matanzas, beyond which is seen the island of Anastasia (p. 403).

The Monument in the centre of the square was erected in honour of the Spanish Liberal constitution of 1812, from which it takes its name. On the E. side is the Old Market, erroneously known as the Slave Market. On the N. side is a Confederate War Monument. The Roman Catholic Cathedral, also on the N. side, was rebuilt on an enlarged scale after the fire of 1887. To the W. is the Post Office, to the S. the Episcopal Church.

Along the S. side of the Plaza runs the ALAMEDA (King St.), which brings us at once to a group of handsome modern buildings in a Spanish or Moorish style (Pl. B, 4). To the right is the huge Ponce de Leon Hotel (properly pron. 'Ponthe de León', but usually called 'Pons dee Leen'), to the left the Córdova Hotel, the Alcazár, and the Villa Zorayda, all adorned by beautiful exotic gardens.

The Ponce de Leon (Pl. a), designed by Carrère & Hastings in the style of the Spanish Renaissance, is 350 ft. wide (facade) and 520 ft. long and encloses a large open court. The towers are 165 ft. high ('View). It is built of concrete, with red-tiled roofs and brick and terracotta details. The scheme of colour is very effective. The interior of the Central Dome or Rotunda, with its four galleries, is elaborately adorned with marble, carved oak, and allegorical paintings. The Dining Room, 150 ft. long and 90 ft. wide, is also embellished with scenes from the history of Florida, Spanish proverbs, etc. The whole building has been carried out with a rare attention to detail and every part of it will repay attention. — The Alcazar (Pl. b), opposite the Ponce de Leon, is by the same architects and also in the Spanish style. It includes a very large and magnificent Swimming Bath, supplied from a sulphurous artesian well. — The Hotel Cordova (Pl. c; formerly the Casa Monica), in a Hispano-Moorish style, was designed and built by Mr. Franklin W. Smith (see below and p. 498), who in this building and the Villa Zorayda (see below) first demonstrated the adaptability of the monolithic concrete architecture to modern buildings. It includes a fine sun-parlour, 108 ft. long. — The Villa Zorayda, the earliest of this group of buildings, was erected by Mr. Smith (see above) in 1883. It is in a Moorish style, with many suggestions from the Alhambra.

ST. GEORGE STREET (Pl. B, 3, 4), leading to the N. from the N.W. corner of the Plaza, is one of the quaintest and most picturesque streets in the city. It passes the new Municipal Buildings and ends at the remains of the old City Gate (Pl. B, 3), consisting of two pillars, 20 ft. high, adjoined by fragments of coquina wall. On the inner side of the buttresses are two stone sentry boxes. The gate dates from the Spanish period, but its exact age is unknown. Outside the gate (to the left) is the old Huguenot Graveyard. We, however, turn to the right, to visit Fort Marion (Pl. B, 3), the most interesting relic of the ancient city, which lies on the Matanzas, at the N. end of the sea-wall (open free, 10–4; fee to the sergeant who acts as cicerone).

Menéndez (p. 401) erected a wooden fort (San Juan de Peños) on or near this spot. The present fort, which is made of coquina, was building for nearly 100 years and finished in 1756. The Spaniards named it San Marco, and it received its present name in 1821. The fort is laid out on the Vauban system, with bastions at the four chief angles, each protected by a watch-tower, and is surrounded by a moat and glacis. We enter by a drawbridge, over each end of which are the Spanish coat-of-arms and a Spanish inscription. Among the special features pointed out in the interior are the Chapel, the Dungeon, and the casemate from which the
Seminole chief Coacoochee, who was confined here with Osceola, made his escape during the Seminole War (1835-42).

The Sea Wall (Pl. B, 3, 4), beginning at the water-battery of the fort and extending 3/4 M. to the S., affords a fine promenade (views). It is made of coquina, capped with granite, and dates from 1835-42.—At the S. end of the sea-wall are the St. Francis Barracks (Pl. B, 4), named from occupying the site of the old Convent of St. Francis, some of the coquina walls of which are incorporated in the present structure. Guard-mount and dress-parade, with military music, attract many visitors. — A little farther S. is the Military Cemetery (Pl. B, 5), containing memorials of ‘Dade’s Command’ (p. 413) and other soldiers who fell in the Seminole War (order of adm. necessary from the adjutant of the post). — A little to the S. is the Alicia Hospital (Pl. B, 5). — In St. Francis St., opposite the barracks, is what is said to be the Oldest House in the United States, built by the Huguenots (p. 401) in 1564, occupied by Franciscan monks in 1565-80, and afterwards in possession of the same family from 1590 to 1882. It has been ‘restored’ and contains a collection of relics connected with the history of Florida.

Among the other buildings of interest in St. Augustine are Grace Church (Meth. Epis.; Pl. B, 3), by Carière & Hastings, at the corner of Cordova St. and Carrère St., and the elaborate *Memorial Presbyterian Church (Pl. A, 3), not far from the railway-station, designed by the same architects and erected by Mr. H. M. Flagler in memory of his daughter. — The museum of the St. Augustine Institute of Natural Science, 27 Alcazar Court, is open to visitors.

The harbour of St. Augustine is admirably adapted for Rowing and Sailing, and excursions may be made to Matanzas (to the S.), up the North River, etc. In the ocean, 31/2 M. from Matanzas, is a hot Sulphur Spring. Among the points of interest on the island of Anastasia (bridge from the foot of King St.; railway across the island) are the South Beach, the Lighthouse, and the old Coquina Quarries. North Beach is a favourite driving and riding resort. Fair sea-fishing (sea-bass, etc.) may be obtained here and at Matanzas.

Leaving St. Augustine, the train crosses the sluggish and marshy St. Sebastian River and runs to the S.W., past (49 M.) Armstrong and (54 M.) Hastings (truck gardens), to (62 M.) East Palatka, on the bank of the St. John’s.

From East Palatka a branch runs to (64 M.) Palatka (see p. 408). Passengers also change cars here for (66 M.) San Mateo, on the St. John’s.

Beyond East Palatka the train turns at right angles to its former course and heads to the S.E., toward the coast, traversing a monotonous region covered with pine-trees and palmetto-scrub. Near (82 M.) Espanola the first lake of the route appears. At (102 M.) Tomoka we cross the Tomoka River, in the upper waters of which alligators abound.

105 M. Ormond (Ormond, open in winter only, $4-5; Coquina, $3), a popular winter-resort on the Halifax River and the ocean beach. The broad beach, as smooth and as hard as a floor, affording
an unsurpassed course for driving and bicycling, stretches N. and S. for 30 M. without a break. Inland are numerous drives, chiefly through dense 'hammock' (thick forest or jungle growth). In the midst of the hammock to the W. of the town are the ruins of an old sugar-mill reputed to have been built by Spaniards in the 16th century. Beyond Buckhead Bluff, on the Tomoka, is a row of cabbage palmettoes, marking the line of the 'King's Road', which was built last century by the English from St. Mary's (Georgia) for 400 M. to the S., through Florida. Excellent fishing and shooting; boating on the Halifax, 24 M. long and 1/2 M. wide, and up the Tomoka.

110 M. Daytona (Colonnades, East Daytona, $ 3 1/2; Ridgewood, Holly Inn, $ 3; Palmetto, $ 2 1/2; Schmidt's Villa, City, Daytona Ho., $ 2, these three open all the year round) is another favourite resort on the Halifax River, with (1895) 1425 inhab., fine trees, a good beach, and the winter-homes of many wealthy Northerners. A beautiful drive-way, available for bicycles, leads to Ormond, and the return may be made on the hard ocean-beach (see p. 403). — 115 M. Port Orange. The pine-forests through which we have been travelling grow sparser and the palmetto-scrub thicker. At mile-post 119 the train crosses a broad inlet from the Halifax.

125 M. New Smyrna (Ocean Ho., $ 2–3; Live Oak Inn, Seaside, $ 2), on the Indian River North, frequented by sportsmen, was founded in 1769 by a colony of 1500 Minorcans and Greeks established for the culture of indigo and sugar by an Englishman named Turnbull (see p. 401). An ancient ruin, part of the stone walls of which are standing, is believed by many antiquarians to be the remains of a chapel built by men with Columbus on his second voyage, in 1496 or 1497. Shell mounds and other prehistoric remains have been found. Good fishing, shooting, and boating. On the peninsula opposite New Smyrna is Coronado Beach, a popular all-the-year-round resort.

From New Smyrna to Orange City Junction, 27 M., railway in 1 hr. — 20 M. Lake Helen is the seat of the 'Southern Cassadaga' Spiritualists assembly. — 25 M. Orange City. — 27 M. Orange City Junction, connecting with the Jacksonville, Tampa, & Key West Ry. (see p. 410).

Beyond (137 M.) Oak Hill we catch on the left the first glimpse of the Indian River (see p. 407), parallel with which, and frequently within sight, the line runs for the next 143 M. A vast marsh and a forest of cabbage palmettoes are traversed, and then for several miles the track skirts the river, here a broad bay, the farther shore dimly discernible.

154 M. Titusville (Indian River, $ 2–2 1/2), with (1895) 831 inhab., is the head of navigation on the Indian River, and the terminus of the Indian River Division of the Jacksonville, Tamps, & Key West Railway (R. 78). Before the construction of the Florida East Coast Railway Titusville was the principal centre of outfitting for tourists and sportsmen bound for Lake Worth. It has a considerable fish and oyster trade. — 169 M. City Point; 173 M. Cocoa
175 M. Rockledge (Indian River, Plasa, New Rockledge, from $21/2; White's Cottage, $11/2), the principal tourist resort on the Indian River, is delightfully situated on high ground rising from the W. bank of the river, here 11/4 M. wide. Beyond lies Merritt's Island (p. 407), which is separated from Cocoa Beach or Oceanica, on the Atlantic, by the Banana River. Coquina rock formation on the river-bank suggests the name of the place. A shell-road connects Rockledge with Cocoa, and cottages of winter-residents border the stream for several miles. Yachts of all kinds dot the river during the season; the fishing is excellent, and alligator hunts are frequently organized. Rockledge is the chief home of the famous Indian River oranges (p. 407).

For the next 60 M. the line traverses an uninteresting stretch of white sand, producing scattered pine-trees and abundant scrub palmetto. The infrequent villages lie between the railway and the river. — We cross small creeks at (190 M.) Eau Gallie, (194 M.) Melbourne, and (200 M.) Malabar. In approaching (215 M.) Sebastian, junction of a line to (10 M.) Cincinnatus Farms, we cross the Sebastian by a long draw-bridge. — 242 M. Fort Pierce is a trading point for the Seminole Indians and railway-division headquarters. We enter the pine-apple region (p. 397). For 15 M. the railway is bordered by pine-apple plantations, most of them unprotected, some under sheds. The largest plantations in this neighbourhood are at (254 M.) Eden and (257 M.) Jensen. — Between Jensen and (261 M.) Stuart the line curves away from the Indian River and crosses the broad estuary of the St. Lucie River. — At (283 M.) West Jupiter we cross the Jupiter River, with a view (left) of Jupiter lighthouse, the Nassau (N.P.) cable-station, Jupiter Inlet, the mouth of Indian River, and breakers on the beach. — Thence the country is tame to (299 M.) West Palm Beach (Palms, Seminole, Park Cottage, $2-3). We cross Lake Worth on a bridge 1/2 M. long.

300 M. Palm Beach (*Royal Poinciana, an immense structure in the Colonial style, with a frontage of 455 ft. and 425 bedrooms, from $5; *Palm Beach Inn, with 225 bedrooms, $4; Dellmore Cottage, $21/2; Lakeside, $2-3), situated on the narrow strip between Lake Worth and the Atlantic Ocean, ranks as one of the most fashionable winter-resorts of the United States, though consisting of little more than two magnificent hotels and their accessories. In some respects it rivals the resorts of the Mediterranean. The season, extending from Christmas until April 10th, is at its height in March, when the Royal Poinciana and the Palm Beach Inn are crowded. Unlimited wealth has made of the surroundings of these hotels a vast semitropical paradise. The Royal Poinciana (named for a tree with gorgeous flowers, blooming in summer) faces Lake Worth, while the Palm Beach Inn, with which it is connected by a wide avenue of palms, 1/2 M. long, faces the ocean. The grounds are filled with bearing cocoanut-trees, palms of many varieties, and countless foliage
and flowering plants and shrubs, and are adjoined by gardens in which bananas, guavas, grape-fruit, avocado pears, custard apples, maumee apples, mangoes, and pawpaws come to maturity. The cupola of the Poinciana yields an entrancing view (esp. at sunset), including the entire length of Lake Worth, the narrow peninsula, clad in tropical verdure, between the lake and the ocean, the Atlantic stretching away to the E. horizon, and the mysterious Everglades on the W. Adjoining the Palm Beach Inn is the Pavilion, with a large swimming pool. A long pier extending into the ocean affords opportunities for fishing. Lake Worth is also a favourite yachting rendezvous.

Leaving Palm Beach the train recrosses Lake Worth and turns to the S. Pine-apple plantations are occasionally passed. The soil is light sand, almost pure white. 317 M. Linton; 341 M. Fort Lauderdale, on the N. bank of New River; 351 M. Little River, with great fields of garden truck, particularly tomatoes, which are sent N. in Feb. and March. Bananas thrive. — 357 M. Arch Creek, with a natural bridge of solid coquina rock.

366 M. Miami (*Royal Palm, from $ 5; Biscayne, Miami, $2 1/2; Conolly, $ 2; omn. 25 c.), the S. terminus of the Florida East Coast Ry., and the southernmost railway-station in the United States (lat. 25° 50'), is one of the oldest towns in the State. It was organized as a modern city in 1896, and in two years had grown from a few families to a permanent population of 2500, which number is greatly enlarged during the winter tourist season. Miami is situated on the N. bank of the Miami River, where it enters Biscayne Bay, a large sheet of clear salt water, separated from the ocean by the first of the long chain of Florida Keys. Miami has a balmy climate and dense tropical vegetation, and the soil produces a great variety of tropical and semi-tropical fruits and vegetables. The Hotel Royal Palm, opened in 1897, occupies the point of land between the Miami River and the Bay and is surrounded by an immense grove of coconuttrees.

The Florida East Coast Steamship Co. runs a large steamer tri-weekly throughout the year from Miami to (185 M.) Key West (see p. 412), the route following the line of the keys, sometimes within, sometimes without (13 hrs.; fare $ 8 75, incl. berth and meals). Another fine steamer of the same company runs 2-3 times a week in Jan.-April to (185 M.) Nassau, in the Bahamas (12 hrs.; fare $ 18 50, incl. berth and meals). Yet another boat of the same company runs twice weekly throughout the year to (240 M.) Havana, Cuba (16 hrs.; fare $ 21, incl. berth and meals).

78. From Jacksonville to Palm Beach via Enterprise. The Indian River.

302 M. Jacksonville, Tampa, & Key West Railway to (159 M.) Titusville in 6 1/4 hrs.; Steamer of the Indian River & Bay Biscayne Inland Navigation Co. thence to (133 M.) Palm Beach in 26 hrs. (through-fare $ 9 90; fare from Titusville to Rockledge, 60 c.; to Palm Beach, $ 4 50; meals 75 c.; berth $ 1). — The Indian River steamers, though small and slow, are comfortable, and afford better views than the train (R. 77) of the river.
scenery. The through service between Titusville and Palm Beach is semi-weekly during the tourist season; between Titusville and Rockledge daily, leaving Titusville at 3.30 p.m. and arriving at Rockledge at 6.30 p.m. Smaller steamers ply to local points on the Indian River.

From Jacksonville to (118 M.) Enterprise Junction, the starting point of the Indian River Division of the Jacksonville, Tampa, & Key West Ry., see R. 81 a. We here turn to the E. — 122 M. Enterprise (Brock Ho., $ 21½-4), on the N. bank of Lake Monroe, opposite Sanford (p. 411), has considerable fame as a winter-resort. — 159 M. Titusville (see p. 404) is the junction with the Florida East Coast Ry. (R. 77), and the terminus of our railway-route, connection being made here with the Indian River steamers.

The Indian River, 160 M. in length from its head to the S. end at Jupiter Inlet, is the most important of the so-called 'rivers', but really long narrow sounds or lagoons, that run parallel with the Atlantic Ocean nearly all the way from the mouth of the St. John's to Biscayne Bay. They are separated from the ocean by a narrow strip of land, broken by a few inlets, and vary in width from 50 yds. (see p. 403) to about 6 M. The Matanzas (p. 401), the Halifax (p. 403) Indian River North (p. 404), and Lake Worth (p. 408) all belong to this series of lagoons. If the sounds were continuous, there would be only one river some 310 M. in length. Their continuity is broken at various places, the intervals in which no water-way exists ranging in length from about 600 yards to 2½ M. Across some of the shorter isthmuses, as well as from Lake Worth to Biscayne Bay, canals have been constructed. Others are projected, and uninterrupted communication through these inland channels from the St. John's to Biscayne Bay will be established ultimately. The usefulness of the sounds for shipping, however, is limited by their shallowness. The greatest depth does not much exceed 12 ft., and the bars at most of the inlets have only 2 to 3 ft. of water. The water of these lagoons is salt, greatly freshened by the rivers that flow into them.

The banks of the Indian River are lined with luxuriant exotic vegetation, which affords cover to large and small game, including bears, pumas (p. 397), wild-cats, deer, and turkeys, while the water teems with fish. The water is often highly phosphorescent at night. The Indian River oranges (groves on the W. shore) are celebrated.

Opposite Titusville lies Merritt's Island, bisected by Banana Creek. This island divides the Indian River here into two branches, of which the E. is known as Banana River. To the E. of the island is Cape Canaveral, with a lighthouse.

84 M. (r.) St. Lucie. Nearly opposite is Indian River Inlet, and below is (87 M.) Fort Pierce (r.). The wide part of the river we now traverse is named St. Lucie Sound. — 94 M. (r.) Ankona. — 100 M. (r.) Eden. Pine-apples are extensively grown here; see p. 405.
107 M. (r.) Waveland. — 110 M. (r.) Sewell’s Point, at the mouth of the St. Lucie River. — A little farther on we enter the Narrows, where the river is sometimes not more than 100-150 ft. wide.

We reach the S. end of the Indian River at (127 M.) Jupiter Inlet (good fishing). The View from the Lighthouse is very extensive. About 1 M. to the S. is a U. S. Life-Saving Station. The mangrove thickets and curious arboreal forms are interesting.

A short canal connects Jupiter Inlet with Lake Worth, which is 22 M. long and 1/2-1 M. wide. It is frequented by visitors from the N. and many villas have been built on its shores. Fish, including the tarpon, abound in its waters. The vegetation is very luxuriant and includes the coconut palm.

To the S. of Jupiter Inlet the steamer traverses Lake Worth Creek, the canal just mentioned, and Lake Worth itself.

143 M. Palm Beach, see p. 405.

79. The St. John’s River.

Steamers of the Clyde’s St. John’s River Line leave Jacksonville at 3.30 p.m. daily in winter (2-3 times a week at other seasons) for Palatka, Astor, Sanford (17 hrs.; fare $3.75, incl. meals and berth) and Enterprise (1st hrs.; same fare). Other steamers run to Green Cove Springs (daily), Palatka and Crescent City (trip-weekly), and Mayport (see p. 400; daily). — Travellers who start from St. Augustine may join the steamer at Palatka (railway from St. Augustine, 28 M., in 1/4-1/2 hr.).

There is no great variety in the scenery of this trip, but visitors to Florida should make part of it at least for the sake of the picture it affords of luxuriant semi-tropical vegetation, with occasional glimpses of alligators. The St. John’s River is about 400 M. long, and its lower course resembles a series of lakes 1/2-6 M. wide. Parts of the upper river are well-nigh choked with water-hyacinths (Eichornia azuera).

The terms right (r.) and left (l.) in the following route are used with reference to travellers ascending the river.

Jacksonville, see p. 399. The following are some of the chief points passed. — 10 M. (r.) Black Point. 14 M. (r.) Orange Park (rail. station). — 15 M. (l.) Mandarin, formerly the winter-home of Mrs. Harriet Beecher Stowe. — 24 M. (r.) Magnolia Point, one of the highest bluffs on the river. — 24 1/2 M. (r.) Mouth of Black Creek, navigable for 8 M. — 25 M. (l.) Remington Park.

28 M. (r.) Magnolia Springs (Hotel, $3-5; rail. stat.), a favourite resort of consumptives, amid pines and orange-groves.

30 M. (r.) Green Cove Springs (Clarendon, St. Clair, St. Elmo, $3-4), a favourite resort, with a copious sulphur-spring (78°), used both for bathing and drinking. A beautiful path leads along the river to (2 M.) Magnolia. — 35 M. (l.) Hogarth’s Landing. — 44 M. (l.) Picolta, an old Spanish settlement. — 49 M. (l.) Tocoi, the junction of a (disused) railway to (18 M.) St. Augustine (p. 401). — 63 M. (l.) Orange Mills, with fine orange-groves.

75 M. Palatka (Putnam Ho., from $3; Graham, $2 1/2-3; tramway between railway-station and steamer-landing 5 c.), the largest town on the St. John’s above Jacksonville (3140 inhab. in 1895), is pleasantly situated and attracts many winter-visitors. It is a rail-
way—centre of some importance, and is the starting-point of the small steamers which ascend the Ocklawaha (see below) and of others for Drayton Island.

From Palatka to Rockledge, Palm Beach, and Miami, see R. 77; to Sanford, see R. 81a; to St. Augustine, see p. 403; to Jacksonville (by railway), see p. 410. Lines also run hence to Lake City and Macon (p. 414) and to Gainesville (p. 413) and Ocala (p. 413).

Above Palatka the vegetation becomes more luxuriant and exotic in character, including cypress, orange-trees, magnolias, palmettoes, water-oaks (Quercus aquatica), azaleas, vines of all kinds, etc. The river becomes narrow and winding.

76 M. (l.) Hart's Orange Grove, one of the most productive in Florida. — 84 M. (l.) Westonia. Just above is the mouth of Dunn's Creek, up which the Crescent Lake steamer plies to Crescent City. — At (87 M.) Buffalo Bluff the railway crosses the river (p. 410). — 93 M. (l.) Satsuma, with fine orange-groves. — 100 M. (l.) Welaka (McClure Ho., $2), on the site of Indian and Spanish settlements, is nearly opposite the mouth of the Ocklawaha (see below). — 106 M. (r.) Fort Gates. The river now expands into *Lake George, 12 M. long and 9 M. wide. Drayton Island has fine orange-groves. To the right is the outlet of Lake Kerr. On leaving Lake George we enter another narrow stretch of river. — 134 M. (l.) Volusia, on the site of an early Spanish mission. (r.) Astor. A little farther on we cross Dexter Lake. — From (162 M.) De Land Landing (l.) a short branch-line runs to De Land (College Arms, $3-5; Putnam, $2-3), with a small college. — 168 M. (l.) Blue Spring, with a singular spring. We now reach the most picturesque part of the river. — 174 M. (r.) Mouth of the Kissimmee River (not to be confounded with that mentioned at p. 411).

Farther on the steamer passes another railway-bridge and enters Lake Monroe, 5 M. in diameter, on the S. side of which lies (193 M.) Sanford (p. 412) and on the N. (198 M.) Enterprise (p. 407).

Above Lake Monroe the St. John's River is navigable for a considerable distance by steam-launches, and sportsmen and tourists occasionally go on as far as Lake Harney (guides, etc., obtainable in Sanford).

80. The Ocklawaha River.

Steamers leave Palatka daily in the season (at noon) for (135 M.) Silver Spring (20 hrs., down stream 15 hrs.; fare $7, incl. meals and berth). The steamers, though necessarily small, are fairly comfortable.

This trip should not be omitted by any visitor to Florida. The **Ocklawaha ("dark, crooked water"), issuing from Lake Griffin, near the centre of Florida, joins the St. John's River (see p. 408), after a course of 280 M., of which about 200 M. are navigable by small steamers. It is exceedingly tortuous, flows nearly all the way through a vast cypress-swamp, and has no banks except the tree-trunks rising from the water. The moss-drapped cypress produce a most weird and picturesque effect, especially when lighted up by the level rays of the rising or setting sun or by the flaming pine-knots used to help navigation at night. Alligators, snakes, turtles, water-turkeys, herons, egrets, and other birds of brilliant Southern plumage abound on its banks. No shooting is allowed from the steamers. The
steering-apparatus is interesting. — The trip may also be made in the reverse direction.

From Palatka to (25 M.) Welaka, see p. 409. Our steamer now leaves the St. John's River and turns to the right (W.) into the narrow Ocklawaha. The following are some of the chief landings, though none are of any size or importance.

32 M. Davenport; 48 M. Blue Spring; 56 M. Fort Brooke. — At (59 M.) Orange Springs the Ocklawaha is joined on the right by the Orange Creek and bends abruptly to the left (S.). — About 5 M. farther on we pass a double-headed palmetto. — 75 M. Iola; 78 M. Forty Foot Bluff; 87 M. Eureka. — At (88 1/2 M.) the *Cypress Gate we pass between two huge cypress, barely leaving room for the steamer. About 7 M. farther on we pass a Twin Cypress (left), where two trees have grown into one. 101 M. Hell's Half Acre (island); 103 M. Gore's; 106 M. Durisee's; 118 M. Grahamville.

Farther on (126 M. from Palatka) we leave the muddy Ocklawaha, emerge from the woods, and ascend the crystal-clear Silver Springs Run to the right.

135 M. Silver Springs, the largest and one of the most beautiful of the springs of Florida, claims to be the 'Fountain of Youth' of which Ponce de Leon was in search (p. 401). The water is wonderfully transparent, small objects being distinctly seen at the bottom (60-80 ft. deep). The spring discharges thousands of gallons of water hourly. The visitor should row round the pool in a small boat.

Silver Springs is a station on the Florida Central & Peninsular Railroad and the terminus of a branch-line of the Plant System from Ocala, by both of which connection can be made with all parts of the State. — Ocala (p. 413) lies 6 M. to the W.

The upper part of the Ocklawaha, above Silver Springs Run (see above), is seldom visited by the tourist.

### 81. From Jacksonville to Tampa.

#### a. Via Sanford.

240 M. RAILWAY in 9-11 hrs. (fare $6.85; sleeper $2). Jacksonville, Tampa, & Key West Railway to (125 M.) Sanford, and Plant System thence to (115 M.) Tampa. Port Tampa (p. 412), the starting-point of steamers to Key West and Havana, is 9 M. (3/4 hr.) farther on. Through sleepers from New York to Port Tampa run on this route (comp. p. 397).

From Jacksonville (p. 399) to Palatka the line follows the left (W.) bank of the St. John's River (p. 408), which, however, is seldom in sight. 28 M. Magnolia Springs (p. 408); 30 M. Green Cove Springs (p. 408); 41 M. West Tocoi (comp. p. 408). — 55 M. Palatka (p. 408)

At (63 M.) Buffalo Bluff the train crosses to the E. bank of the St. John's. Numerous orange-groves are passed. 83 M. Seville (Grand View, $2), with a picturesque little station. Lake George (p. 409) lies 4 M. to the W. — 99 M. De Leon Springs. At (108 M.) Beresford we cross the short line from De Land Landing (p. 409) to De Land (p. 409), and at (112 M.) Orange City Junction we connect
with that from New Smyrna (p. 404). — 118 M. Enterprise Junction, the starting-point of the Indian River Division (see R. 78).

Our line now crosses the St. John’s River as it issues from Lake Monroe (p. 409). 121 M. Monroe.

125 M. Sanford (Sanford Ho., from $ 3; Wilton, $ 2-3; Rail. Restaurant), a thriving little city with (1895) 1517 inhab., is of some importance as the practical limit of navigation on the St. John’s River and the junction of several railways. It lies on the S. side of Lake Monroe, in which fair fishing is obtained.

From Sanford to Tarpon Springs and St. Petersburg, 153 M., Plant System (no through-trains). — 16 M. Palm Springs; 26 M. Clarcona; 31 M. Crown Point, with lemon-groves; 35 M. Oakland, on Lake Apopka, with large orange-groves; 46 M. Clermont, on Lake Minneola, a tomato-growing centre; 75 M. Lacoochee, the junction of the F. C. & P. R. R. (R. 81b). — At (77 M.) Tribby, where we cross the W. coast route from the N. to Tampa (see p. 308), the line changes from narrow gauge to standard gauge. The town lies on Lake Du Maurier, and its streets are named after the characters in the well-known novel. — 121 M. Tarpon Springs (Tarpon Springs Hotel, $3-4), a pleasant resort on the Gulf Coast, near the mouth of the Anclote River. The late Duke of Sutherland’s manor lies 2 M. to the N.E. On the Anclote River, 3 M. to the W., is Sponge Harbor, whence large quantities of sponges are exported. The total value of the sponges produced in Florida in 1896 was over $600,000. — 126 M. Sutherland (San Marino, $2-4), a favourite winter-resort. — Beyond (131 M.) Dunedin the train traverses the Pinellas Peninsula, between Old Tampa Bay and the Gulf of Mexico. — 136 M. Belleair (Belleview, from § 3½; St. Margaret’s Inn, § 2) is a new winter-resort overlooking Clearwater Bay, with good shooting, fishing, and yachting, and a well-made bicycle-track. — 153 M. St. Petersburg (Detroit, § 2-4), a good fishing-station on Tampa Bay. Steamers ply to Port Tampa (p. 412) and the Manatee River.

From Sanford to Jacksonville by steamer, see R. 79. Sanford is also connected by railway with Lake Charm and with Tavares (on Lake Eustis) and Leesburg (p. 413).

From Sanford we follow the track of the South Florida Division of the Plant System, which traverses a country thickly sprinkled with lakes. — 143 M. Winter Park (Seminole Hotel, § 4-5), a charming winter-resort, surrounded by numerous lakes (boating and fishing). — 147 M. Orlando (San Juan, § 2 1/2-3 1/2; Tremont, $ 3; Arcade, Magnolia, $ 2-3), a busy little city with (1895) 2993 inhab., affords good headquarters for guides and sporting supplies. — 165 M. Kissimmee (Kissimmee Hotel, from § 2 1/2), on Tohopekaliga Lake, is another good hunting centre. It is the headquarters of the Disston or Okeechobee Co., which has done much to reclaim the swampy land to the S. Sugar is raised at St. Cloud, a little to the E. (branch-railway).

The Kissimmee River, issuing from Tohopekaliga Lake, flows through Lake Kissimmee to the large Lake Okeechobee, which connects with the Gulf of Mexico by a canal and the Caloosahatchee River.

From (193 M.) Bartow Junction a branch-line runs to the S. to (17 M.) Bartow and (91 M.) Punta Gorda.

Punta Gorda (Punta Gorda Hotel, from § 3½; Dade Ho., § 2 1/2; Brit. vice-consul, Mr. J. H. Farrington), on Charlotte Harbor, is resorted to by sportsmen and fishermen, who obtain good sport on the Peace River and in the harbour. The best fishing-ground for tarpon is within easy reach.

208 M. Lakeland (215 ft.; Tremont Ho., § 2 1/2-3; Commercial,
$2-2\frac{1}{2};$ Alva) is the junction of another line to Bartow (and Punta Gorda) and also of the W. coast line from the N. (comp. p. 398). At (218 M.) Plant City we cross the Flor. Cen. Penin. R. (comp. p. 413).

240 M. Tampa (*Tampa Bay Hotel, with 500 rooms, a theatre, a swimming bath, a bicycle-track, and golf-links, from $5; Almeria, Arno, $3-4; Palmetto, De Soto, from $2), the most important commercial city on the Gulf Coast of Florida, with (1895) 18,449 inhab. (incl. West Tampa), lies at the head of Hillsborough Bay (the E. branch of Tampa Bay) and at the mouth of the Hillsborough River. It is surrounded with lemon and orange groves and has become one of the favourite health-resorts in Florida, especially since the opening (1891) of the huge and handsome Tampa Bay Hotel (façade of 511 ft.). The bay swarms with fish, including the tarpon (p. 397), and with water-fowl, while deer and other game are found inland. Cigar-making is the leading industry. Tampa was one of the great mobilisation camps in the Hispano-American war of 1898.

About 20 M. to the S.E. of Tampa, at Indian Hill, are some curious shell-mounds in which human remains were found.

249 M. Port Tampa (*The Inn, $3-4; Brit. vice-consul, Mr. John Bradley), on the peninsula separating Hillsborough Bay from Old Tampa Bay, is the starting-point of steamers to Key West and Havana, Mobile, and various points on Tampa Bay, the Manatee River, etc. To reach deep water the railway has to run into the bay on trestle-work for nearly 1 M., and at the end of this is the pier, with the inn and other buildings.

The Plant Line steamers for Havana, the capital of Cuba, run thrice weekly in winter and twice weekly in summer (32 hrs.; fare $21.25). On the way they call at Key West (Key West Hotel, $4; Duval, $2\frac{1}{2}-3; El Polaco, Spanish restaurant; British vice-consul, Mr. W. J. H. Taylor; tramways; carr. $1 per hr.), the third city of Florida (16,502 inhab. in 1895), situated upon one of the long chain of 'keys', or small coraline islands, which lie to the S. of the peninsula. The name is said to be a corruption of the Spanish Cayo Hueso ('Bone Island'), which took its rise from the finding of numerous human bones here by the Spanish mariners. Many of the inhabitants are Cubans, who have established cigar-factories that now produce 125-150 million cigars annually. Other important industries are the sponge-fishery, turtle-catching, and deep-sea fishing (mullet, etc.). The fine harbour is protected by Fort Taylor, built on a small island, and also by more modern fortifications. A visit may be paid to the Banyan Tree adjoining the U. S. Barracks. Key West is not so warm as many places to the N. of it (range 50-96°; mean for winter ca. 70°), though artificial heat is unused except for cooking; and its pure air attracts many winter visitors. Steamers ply regularly from Key West to Port Tampa (see above), Miami (p. 406), New Orleans (p. 415), Galveston (p. 522), New York (p. 6), and Havana (3-12 hrs.; comp. above)

Sand Key, 7 M. to the S.S.W. of Key West, is the southernmost point of the United States.

b. Via Waldo and Ocala.

242 M. Florida CENTRAL & PENINSULAR R. R. in 8-11 hrs. (fares as above; to Ocala $3, to Cedar Key $3.81).

At (19 M.) Baldwin this line diverges to the left (S.) from the line to Tallahassee and New Orleans (see R. 82) and joins the line
from Fernandina (p. 400) to Tampa. 33 M. Highland; 38 M. Lawtey, with orange-groves and strawberry-farms. At (51 M.) Hampton we cross the railway from Palatka (p. 408) to Macon (p. 397). — 56 M. Waldo (Waldo Ho., $2) is the junction of a branch-line to Cedar Key (see below).

From Waldo to Cedar Key, 71 M., railway in 4½ hrs. — 14 M. Gainesville (Arlington, Plaza, St. Elmo, $2-3), a city and winter-resort with (1895) 3102 inhab., is the junction of railways to Palatka, Ocala, Live Oak, etc. Excursions may be made to the Alachua Sink (alternately lake and prairie) and other natural curiosities. From Archer a branch line leads through a rich phosphate district to Eagle Mine (phosphates). — 71 M. Cedar Key (Schlemmer, Palmeto, $2), a town of 400 inhab., lies on a small 'key' off the W. coast of Florida and has a harbour which admits vessels of 12 ft. draught. It carries on a trade in fish, turtle, oysters, and sponges, and cuts red cedar for lead pencils. Steamers ply hence to the Suwanee River, etc. — The Suwanee River, well known from the negro-song of 'The old folks at home' (by S. C. Foster), enters the Gulf of Mexico about 45 M. to the N.

At (70 M.) Hawthorne we intersect the line from Palatka to Gainesville (see p. 409). Farther on we skirt Loch Loosa and cross the E. branch of Orange Lake, on the S. shore of which we traverse, for nearly 1 M., the so-called Mammoth Orange Groves, with 70,000 trees. 83 M. Citra. From (98 M.) Silver Springs Junction a branch line runs to (2 M.) Silver Springs (see p. 410). — 101 M. Ocala (Ocala Ho., $2½-4; St. Denis, Montezuma, $2), a thriving little city (4597 inhab. in 1895), in one of the most fertile districts of Florida. Large phosphate beds are worked in the vicinity. Ocala is also a station on the Plant System and the starting-point of a line to Dunnellon (on the Withlacoochee River), Crystal River, and (49 M.) Homosassa, on the Gulf of Mexico. — From (127 M.) Wildwood a line runs to Leesburg, Tavares, Orlando, etc. 135 M. Panama, at the S. end of the lake of that name. About 4 M. to the N. of (146 M.) St. Catherine (junction of the Plant System) is the spot where Major Dade and his detachment of 110 men were surprised and slain by the Seminoles on Dec. 28th, 1835, only three soldiers escaping alive. — 156 M. Lacoochee is the junction of the Plant System line from Sanford to St. Petersburg (see p. 411). Near (164 M.) Dade City is the pretty Pasadena Lake, with a small hotel on its banks. 189 M. Plant City, see p. 412; 210 M. Ybor City, with large tobacco-factories.

212 M. Tampa, see p. 412.

82. From Jacksonville to Tallahassee, Pensacola, and New Orleans.

Jacksonville, see p. 399. The line runs nearly due W. At (19 M.) Baldwin we cross the line from Fernandina to Tampa and Cedar Key.
(see R. 81 b). Beyond (28 M.) Macclenny we cross the S. fork of the St. Mary’s River. The Confederates defeated the Federals at (47 M.) Olustee on Feb. 20th, 1864. — 60 M. Lake City (Central Ho., Hale Ho., $ 2), embosomed in trees, is the seat of the State Agricultural College and a U. S. Experimental Station and the junction of lines to Palatka (p. 408), Gainesville (p. 413), Macon (p. 397), etc. It is surrounded by numerous lakes and lakelets. — At (82 M.) Live Oak, 8 M. to the N. of which lie Suwanee Springs, we intersect the W. coast line of the Plant System (p. 398), and at (95 M.) Ellaville we cross the rushing Suwanee River (p. 413). Beyond (124 M.) Greensville we cross the Aucilla. From (158 M.) Drifton a line runs N. to (4 M.) Monticello and Thomasville (p. 398). 147 M. Lloyd (Rail. Restaurant, meals 75 c.). The country now becomes more hilly.

165 M. Tallahassee (Leon, $2-3; St. James, $2), the capital of Florida, is beautifully situated among trees, on a hill rising 280 ft. above the sea. Pop. (1895) 3931. The chief buildings are the Capitol, Court House, and W. Florida Seminary. The gardens are very beautiful, especially in the time of roses. The Episcopal Cemetery contains the grave of Prince Achille Murat (d. 1847), son of the King of Naples, who married a Virginian girl and settled near Tallahassee.

Pleasant drives may be taken to (6 M.) Lake Jackson (fishing), Lake Jamonta (12 M.), Lake Miccosukee (18 M.), Bellair (6 M.), and the Wakulla Spring (15 M. to the S.). The spring (13 1/2 M. from Wakulla Station, on the branch-line to St. Mark’s) is 106 ft. deep and of wonderful transparency. It may also be reached by boat from St. Mark’s (2 hrs.).

From Tallahassee the Carrabelle, Tallahassee & Georgia Railway runs to the S.W. to (45 M.) Lanark (Lanark Inn, $2), a popular resort on the Gulf of Mexico, and (60 M.) Carrabelle (Fowler Ho., $2), a port with fishing and lumber interests. — From Carrabelle steamers ply to (30 M.) Apalachicola (Fulmer, Central, $2; Brit. vice-consul, Mr. H. L. Grady), another fishing and lumbering port, with (1895) 3061 inhab., at the mouth of the Apalachicola River.

About 2 M. beyond Tallahassee the Murat Homestead (see above) is visible to the right. We cross the Ocklockonee River. Magnolias grow here in great profusion. 189 M. Quincy, with tobacco-plantations.

At (208 M.) River Junction, on the Apalachicola River (see above; curious railway-station, erected on trestle-work above the river), we join the Louisville & Nashville R. R. Connection is also made here with the Apalachicola River steamers. Our train crosses a long trestle over the Apalachicola, formed by the junction of the Flint and Chattahoochee, 2 M. above. — 234 M. Marianna, on the Chipola. 290 M. De Funiak Springs (Chautauqua, $3). Beyond (319 M.) Crestview we cross Shoal River. 349 M. Milton lies at the head of Blackwater Bay. About 10 M. farther we cross Escambia Bay by a trestle 3 M. long. Fine marine views to the left.

369 M. Pensacola (Escambia, $ 2 1/2-3; Merchants', $ 2 1/2; Brit. vice-consul, Mr. O. C. Howe), on the bay of the same name, 10 M. from the Gulf of Mexico, was founded by the Spaniards in 1696 and has (1895) 14,084 inhab., a brisk trade in fish and timber, and a huge grain elevator (capacity 500,000 bushels), erected in 1897-98.
The ruins of Forts St. Michael and St. Bernard date partly from the Spanish period.

Visits may be made (small steamer) to the Navy Yard, Ft. McRae, Ft. Barancas, and Ft. Pickens (Santa Rosa Island). Steamers also ply to European ports.

The train now runs to the N., along the Escambia River, and enters Alabama shortly before reaching (413 M.) Flomaton. From Flomaton to (472 M.) Mobile and —

614 M. New Orleans, see R. 69a.

83. New Orleans.

Hotels. New St. Charles (Pl. b; F, 4), St. Charles St., from $4; Hotel Royal (Pl. a; F, 3), St. Louis St., E. F.; Denechaud (Pl. c; F, 4), at the corner of Perdido and Carondelet Sts.; Grunewald (Pl. d; F, 4), Baronne St., near Canal St., from $3, R. from $1; Cosmopolitan (Pl. e; F, 4), Bourbon and Royal Sts., near Canal St., R. from $1 1/2. — Boarding Houses abound throughout New Orleans, and the numerous Pensions and Chambres Garnies of the French Quarter are carried on in genuine Creole style. During the Carnival (p. 416) a special bureau is established for giving information about lodgings.

Restaurants. Moreau, Canal St.; Fabacher, 137 Royal St.; Leon, St. Charles St.; Denechaud, S Carondelet St. (see above); Victor, 209 Bourbon St.; Cosmopolitan, 121 Royal St.; Louisiana, 717 Customhouse St.; Domegy, 835 Canal St.; Vorderbank, 626 Common St.; Lopez, 730 Canal St.; Nicholl, Camp St.; Antoine, 65 St. Louis St.; Alciatore, near the City Park (Pl. C, 1); Christian Women’s Exchange, 1 South St. — Cafés abound in the French Quarter. — The markets of New Orleans are singularly well stocked with game, fish, fruit, and vegetables, and its restaurants have a good reputation. Among the Creole dishes for which New Orleans is famous is Gumbo, a kind of thick vegetable soup.

Electric Tramways traverse the city in all directions (fare 5 c.). — Carriages about $1 per hour; from the railway-stations to the hotels 50 c. each person. — Omnibuses meet the principal trains (25 c.). — Ferries ply to Algiers, Gouldsborough, and Gretna, on the opposite side of the Mississippi. — Steamers ply to all points on the Mississippi (comp. B. 65), Ohio, and Missouri, and to New York, Boston, Key West, Havana, Vera Cruz, Liverpool, Bremen, and many other American and European ports.

British Consul, A. G. Vansittart, 141 Carondelet St.; vice-consul, J. Donnelly.

Post Office (Pl. F, 4), Canal St., open 6:30 a.m. to 7 p.m., Sun. 9-12.

New Orleans, the chief city of Louisiana, the eleventh city of the United States, and the largest to the S. of St. Louis, is situated on the Mississippi, 106 M. above its mouth in the Gulf of Mexico. The great bulk of the city lies on the left bank of the river, which is here 1/4-1/2 M. wide and makes the bend from which New Orleans
derivates its appellation of 'Crescent City'. A great part of the city is below the level of the river at high water and is protected by a levee or embankment, 15 ft. wide and 14 ft. high. The municipal limits, which extend on the N. to Lake Pontchartrain (p. 419), enclose an area of 187 M., but about three-fourths of this is uninhabitable swamp. The city is laid out with considerable regularity, and many of the chief streets are wide and shaded with trees. The most important business-thoroughfare is Canal Street (Pl. B-F, 1-4), which runs at right angles to the river and divides the French Quarter, or 'Vieux Carre' (see below), on the N.E., from the New City, or American Quarter, on the S.W. The finest residences are on St. Charles Avenue (Pl. A-E, 5, 6). In 1890 New Orleans contained 242,039 inhab., of whom about 18 per cent were of Anglo-American race, 17 per cent French, 15 per cent German, 14 per cent Irish, 8 per cent Italian, 2-3 per cent Spanish, and 25 per cent Coloured. The estimated population in 1898 was 275,000.

New Orleans was founded in 1718 by Jean de Bienville, governor of the settlement made in 1699 at Biloxi (see p. 378), and became capital of Louisiana in 1721, while still but little more than a village of trappers and gold-hunters (comp. Miss Grace King's 'Sieur de Bienville'). In 1762 it was ceded by France to Spain, but the inhabitants rebelled against this transference, established a government of their own, and were not suppressed till 1769. In 1732 the population was about 5000. From 1800 to 1803 New Orleans was again in the hands of the French, but in the latter year it was ceded, with the rest of Louisiana, to the United States. In 1804, when it had about 10,000 inhab., it received its city-charter. In 1815 the British were defeated here in an important battle by Gen. Andrew Jackson (see p. 417). In 1840 New Orleans was the fourth city of the United States, ranking after New York, Philadelphia, and Baltimore. New Orleans surrendered to the Unionists under Gen. Ben. Butler in 1862, after Adm. Farragut had succeeded in passing the forts at the mouth of the Mississippi and had the city under the guns of his fleet. By 1860 the population had increased to 116,575, by 1880 to 163,675, by 1870 to 191,418, and by 1880 to 216,410.

New Orleans is in many ways one of the most picturesque and interesting cities in America, owing to the survival of the buildings, manners, and customs of its original French and Spanish inhabitants. It has been described by Mr. G. W. Cable as 'a city of villas and cottages, of umbrageous gardens, intersected by 470 M. of unpaved streets, shaded by forest trees, haunted by song-birds, fragrant with a wealth of flowers that never fails a day in the year, and abundant, in season, with fruit — the fig, the plum, the pomegranate, the orange'. The French Quarter, to the N.E. of Canal St., is inhabited almost exclusively by Creoles, 'a handsome, graceful, and intelligent race, of a decidedly Gallic type, whose name does not necessarily imply, any more than it excludes, a departure from a pure double line of Latin descent' (Cable). Among the foreign-looking features of this quarter are the walls of adobe, the limewashed stucco façades, the jalousies, the gratings, the small-paneled windows, the porte-cochères, the arcades and balconies, the tiled roofs, and the inner courts — the whole embosomed in bright-flowering semi-tropical plants. Most of the streets bear French or Spanish names; and indeed the whole street nomenclature of New Orleans is picturesque, though the Anglicised pronunciation will sometimes puzzle a stranger. — The famous Carnival of Mardi Gras (Shrove Tuesday), celebrated here with great splendour, is, perhaps, the most picturesque festival in America. The city is taken formal possession of by Rex, the King of the Carnival; and the revels of his retinue, the Knights of Momus, the Mystic Crewe of Comus, and other societies are of the liveliest description. The processions are
very elaborate (comp. 350). Those who mean to visit New Orleans at this season should secure rooms in advance (see p. 415).

Paul Morphy (1837-84), the famous chess-player, was a native of New Orleans and is buried in the old St. Louis Cemetery (Pl. F, 3).

New Orleans, as the outlet of the greatest agricultural valley in the world, is essentially a commercial city, and its foreign export trade is very important. It is the largest cotton-market in the world after Liverpool, and handles about two million bales annually. It also exports large quantities of sugar, molasses, rice, pork, Indian corn, wool, timber, hides, and tobacco, and imports fruits from Central and South America, including enormous quantities of bananas. Its manufactures (valued in 1890 at $85,000,000) include cotton-seed oil, machinery, barrel-staves, flour, rice, tobacco, and sugar. — In spite of the levees and embankments the lower Mississippi often breaks its bounds, and disastrous inundations are of frequent occurrence. Within the last 150 years the E. bank of the river at New Orleans has greatly advanced, the new land or 'batture' being at some points as much as 1500 ft. wide.

The visitor to New Orleans should be familiar with George W. Cable's romances ('Sieur George', 'Mme. Delphine', 'The Grandissimes', etc.). The house of 'Sieur George' is at the corner of Royal and St. Peter Sts. (Pl. F, 3). No. 253 Royal St. was the home of 'Mme. Deliciuse', and 'Mme. Delphine's' is at 294 Barracks St. (Pl. F, 3), near Royal St. — See also 'New Orleans: the Place and the People', by Grace King.

The tourist will do well to begin his exploration of New Orleans by taking his bearings from the roof of the St. Charles Hotel (Pl. b; F, 4) or the Custom House (Pl. F, 4). The latter is a large granite building in Canal Street, near the river, containing the Post Office (on the groundfloor) and the large Marble Hall.

Just below the Custom House, Canal St. ends at the *Levee (Pl. F-H, 3-6), which extends along the E. bank of the Mississippi for about 6 M. and presents a very animated and interesting scene. Following it to the left (N.) we soon reach *Jackson Square (Pl. F, 3), the old Place d'Armes, which contains a Statue of Gen. Andrew Jackson (see p. 416) by Mills, and is adjoined by the Cathedral of St. Louis, a good specimen of the Spanish-Creole style, built in 1792-94, on the site of the first church in Louisiana, but altered in 1850. It contains some paintings and interesting tombs. The buildings to the right and left are Court Houses, that to the S. having been built for the Cabildo, or City Council, of the Spanish regime. — On the Levee, just beyond Jackson Sq., is the *French Market (Pl. G, 3), a morning visit to which (best about 6 or 7 a.m.; on Sun. 8 or 9 a.m.) reveals a scene of the greatest picturesque and animation. — A little farther on, at the foot of Esplanade St., is the U. S. Branch Mint (Pl. G, 3), a large building in the Ionic style.

We may now take an opportunity for a stroll in the fine *Creole Quarter (see p. 416), among the chief promenades of which are Esplanade Street (Pl. D-G, 1-3), Rampart Street (Pl. F, 2), and Royal Street (Pl. F, 3). At the corner of Chartres and Hospital Sts. is the Archbishop's Residence (Pl.F, G, 3), in the old Ursuline Convent (1787; visitors sometimes admitted). Among other buildings adjoining the Levee are several Railway Stations (comp. p. 415) and the Ursuline Convent.

In Canal St., a little above the Custom House (see above), is a Statue of Henry Clay (Pl. F, 4). Following St. Charles St. to the left, we pass the St. Charles Hotel (right) and the St. Charles Theatre.
(right) and reach Lafayette Square (Pl. F, 4), with the City Hall, the Academy of Music, St. Patrick's Church, the First Presbyterian Church, the Odd Fellows Hall, a Statue of Franklin, by Hiram Powers, a Statue of John McDonough (see below; 1898), and the Free City Library, established in 1897 by the consolidation of the Fisk and McDonough libraries (35,000 vols.). Farther on is Lee Circle (Pl. F, 5), with a monument to Gen. Lee. At the corner of Camp St. and Howard Ave., adjoining Lee Circle, stands the *Howard Library (Pl. F, 4), the last work of H. H. Richardson, who was a native of Louisiana. To the S.W., in Carondelet St., is the Jewish Temple Sinai (Pl. E, 5).

Tulane Avenue (Pl. C-F, 2-4), named in honour of the chief benefactor of Tulane University (see below), contains the Law Department of that institution, the Jesuits' Church, and the large Charity Hospital (Pl. E, 3), originally established in 1784 (800 beds). The large Cotton Exchange (Pl. F, 4) is at the corner of Carondelet St. and Gravier St.; the Produce Exchange (Pl. F, 4) is in Magazine St.; and the Sugar Exchange (Pl. F, 4) is at the foot of Bienville St. The Church of the Immaculate Conception (Pl. E, F, 4) is in a singular Moorish style. The Monument to Margaret Haughey (Pl. F, 5), the 'Orphan's Friend', is said to have been the first statue of a woman erected in the United States (comp., however, p. 130).

— The Shot Tower, at the corner of Constance St. and St. Joseph St. (Pl. F, 4, 5), commands a fine view (214 ft. high; elevator). — The U. S. Marine Hospital (Pl. A, 7) lies near the river.

In St. Charles Avenue, opposite Audubon Park (see below), are the new buildings of Tulane University (Pl. A, 5), an important and well-equipped institution with 950 students. Associated with Tulane University is the H. Sophie Newcomb Memorial College for Women (Pl. E, 6), founded in 1886. — A legacy of John McDonough (d. 1850) has built and equipped 30 handsome School Houses in different parts of the city, accommodating 15-20,000 children.

New Orleans is not well provided with parks. The City Park (Pl. B, C, 1), on the Metairie Ridge, is 150 acres in extent. The Audubon Park (Pl. A, B, 5-7), in which the Great Exhibition of 1884-85 was held, is a narrow strip extending back from the river. Both parks contain fine live-oaks. — The *Cemeteries of New Orleans are among its recognized sights, owing to the fact that the swampy nature of the soil prevents the digging of graves and requires the bodies to be interred in mounds above ground. Their magnolias and live-oaks are also picturesque. The Cypress Grove Cemetery (Pl. B, 1), near the City Park, is one of the most interesting. The Metairie Cemetery (Pl. A, 1), in the same district, contains the grave of Gen. Albert Sydney Johnston (1803-62), with an equestrian statue. In Greenwood Cemetery (Pl. B, 1) is a Monument to the Confederate Dead. — The old French Graveyards, near the Jockey Club (Pl. D, 1), in Esplanade St., are interesting.
Excursions. Among the favourite resorts of the New Orleaners is Lake Pontchartrain, which lies about 5 M. to the N. of the city and is 40 M. long and 25 M. wide. A fish or game dinner at one of the garden restaurants here is a regular item of a visit to New Orleans. Spanish Fort Park, at the mouth of the Bayou St. John, marks the site of a fort erected by the Spaniards to guard this approach to the city. It is reached by railway (station at the corner of Canal and Basin Sts.; Pl. E, 3) or by drive along the Shell Road. West End (West End Hotel), also reached by the Shell Road or by railway (cor. of Canal and Bourbon Sts.; Pl. F, 3), is a favourite boating and yachting resort. Milburnburg, to the E. of Spanish Fort, is reached by railway from Old Lake Station (Pl. G, 2, 3), at the corner of the Elysian Fields and Chartres St., or from the Louisville & Nashville Station (p. 415). — The site of the Battlefield of New Orleans (see p. 416) is at Chalmette, on the Mississippi, about 5 M. to the S. of Canal St., and may be reached by tramway or carriage. On the way we pass the U.S. Barracks. The site of the battle is marked by a monument. The National Cemetery contains 12,000 graves. — The Carrollton Gardens lie to the N. of the city (tramway). — A visit to one of the Sugar Plantations on the Mississippi will be found interesting. Among the finest are the Ames, McCall, and Kernochan Plantations. — Good wild-fowl shooting and fishing are obtained all round New Orleans.

Longer excursions may be made to Pass Christian (p. 378), Bay St. Louis (p. 378), Mobile (p. 377), the Eads Jetties (p. 365), etc.

From New Orleans to New York, see RR. 69a, 69b; to Pensacola and Jacksonville, see R. 82; to Mobile, see p. 377; to points in Texas and California, see RR. 104, 105; to Cincinnati, see R. 63; to St. Louis, see R. 64; to Louisville, see R. 63; to Chicago, see R. 64.

84. From St. Paul to Tacoma, Seattle, and Portland.

2056 M. Northern Pacific Railway to (1912 M.) Tacoma in 65 hrs. (1st class fare for continuous passage $50, available for 30 days $60; 2nd class fare $40; sleeper $13.50), to (1932 M.) Seattle in 66 hrs. (same fares), and to (2056 M.) Portland in 72 hrs. (same fares). Passengers bound for Portland direct (1887 M.) change cars at Pasco Junction (p. 424) and proceed thence by the Oregon R. R. and Nav. Co. (R. 38). Duluth (p. 380) is also one of the E. termini of this line, the line thence uniting with the St. Paul line at Staples (see p. 420).

This important railway crosses a district of immense agricultural and mineral wealth and forms one of the main lines of communication between the E. and W. coasts of the United States, besides affording convenient access to British Columbia, Vancouver Island, and Alaska. Much of the scenery on the W. part of the line is very fine, and the branch-line from Livingston (see p. 421) affords the most direct route to the wonderful Yellowstone Park (R. 85).

For the Great Northern Railway route to Seattle, Tacoma, and Portland, see R. 55.

St. Paul, see p. 325. The train follows the E. bank of the Mississippi (views to the left), passing the State Fair Buildings (p. 327) and Hamline University. At (11 M.) Minneapolis (see p. 327) we cross and recross the river. 29 M. Anoka (p. 335); 41 M. Elk River (p. 335); 76 M. St. Cloud (p. 335). Our line now parts company with that of the G. N. R. (R. 55). 77 M. Sauk Rapids. From (108 M.) Little Falls (Buckman, $2-21/2), where we leave the Mississippi Valley, a branch-line runs to (61 M.) Brainerd (1600 ft.), an industrial city with (1895) 7031 inhab. and the N. P. R. workshops, on the line to Duluth (p. 330).

27*
From Bismarck the Brainerd & Northern Minnesota Railway runs to (59 M.) Walker (Pamela Hotel), on Lake Leech (37 M. long and 17 M. wide), in the midst of a fine shooting and fishing district.

The main line crosses the Mississippi and runs direct (N.W.) to (142 M.) Staples, where the trains from Duluth come in (see p. 419). 159 M. Wadena is the junction of the Fergus and Black Hills branch. 172 M. New York Mills, with a large settlement of Finns. Many small lakes are passed. — 204 M. Detroit (Hotel Minnesota, Lake View Springs, Fair Haven, $2), on a pretty lake, is a summer-resort, with mineral springs and excellent shooting and fishing. About 25 M. to the N. is the White Earth Reservation of the Chippewa or Ojibway Indians. — 225 M. Winnipeg Junction, for a line to (257 M.) Winnipeg (R. 54c). At (241 M.) Glyndon we cross the G. N. R. R.

250 M. Moorhead (840 ft.; Columbia, $2-21/2), a thriving flour-making city of (1895) 3290 inhab., lies on the E. bank of the Red River of the North, opposite (251 M.) Fargo (Metropole, $2-3; Martin, Webster, from $2), another busy grain-trading city (5664 inhab.), which lies in North Dakota ('Great Cereal State').

From Moorhead to Winnipeg, see R. 54.

In traversing N. Dakota we pass some of the huge prairie farms for which the 'Great North-West' is famous.

Some of these 'Bonanza' farms are 10-70 sq. M. in extent, and it is no unfrequent sight to see a row of 20 or more ploughs, harrows, seeders, or reapers at work at once. Continuous furrows have been ploughed for many miles in a straight line. Harvesting generally begins about Aug. 1st, and the vast expanses of yellow grain afford an extraordinary and very beautiful sight. A yield of 20-25 bushels per acre is often attained. North Dakota, in a good year, produces 60-65 million bushels of wheat.

Near (271 M.) Casselton is the great Dalrymple Farm, with an area of 45,000 acres (70 sq. M.). 293 M. Tower City, with a mineral artesian well (fountain near the railway-station). 309 M. Valley City, on the Sheyenne River. — 344 M. Jamestown (1395 ft.; Gladstone, $2-21/2), a busy agricultural centre with 2296 inhab., the N. Dakota Insane Hospital, and a Presbyterian College, is prettily situated on the James River.

A branch-line runs hence to the N. to (90 M.) Minnewaukan, on Devil's Lake (p. 336), and (108 M.) Leeds.

The line now traverses the rolling district between the James and the Missouri known as the Coteaux (400 ft. above the rivers, 2000 ft. above the sea). Several small stations. — 445 M. Bismarck (1600 ft.; Sheridan Ho., $2), the capital of N. Dakota, lies on the E. bank of the Missouri, here about 400 yds. wide. It is the headquarters of navigation on the Upper Missouri and contains several U. S. institutions. The State Capitol was completed in 1894. Pop. 2186.

The train crosses the river by a fine steel and iron truss-bridge, with three main spans of 400 ft. each, 50 ft. above high-water. 450 M. Mandan (Inter-Ocean, $3-4), on the W. bank. We change here from 'central' to 'mountain' time (1 hr. slower; see p. xviii).
Fine mounted heads and fur-rugs are sold at the station. About 6 M. to the S. lies Fort Abraham Lincoln. Near Mandan are numerous prehistoric mounds and other remains. We cross the Heart River several times in rapid succession. The district we now traverse is very sparsely populated. Large numbers of prairie-dogs (a kind of marmot) are seen. Sharp conical elevations known as 'buttes' (pron. butes) rise from the plain in all directions. Near (549 M.) Gladstone we again cross the Heart River. 560 M. Dickinson. At (586 M.) Fryburg we enter the district known as *Bad Lands or Pyramid Park, where the buttes have been carved by the action of fire and water into the most fantastic shapes. The colouring is also very variegated. The name 'Bad Lands' refers properly to the difficulty of travel and not to the soil, which affords excellent grazing.
— From (599 M.) Medora (2265 ft.; hotel), on the E. bank of the Little Missouri, we may visit Pyramid Park and the great Burning Mine (7 M.). About 16 M. farther on the curious Sentinel Butte is conspicuous to the left, and in 12 M. more we enter Montana ('Bo-nanza State'), the third-largest state of the Union, in which cattle-raising and mining are the chief industries. The native 'bunch grass', which cures itself and stands as hay throughout the winter, forms excellent fodder. — 666 M. Glendive (2070 ft.) lies among picturesque scenery on the S. bank of the Yellowstone River, which the line now follows for a long distance. Numerous small tributaries of the Yellowstone are crossed. — 744 M. Miles City (2350 ft.; MacQueen, from $3), a busy little place at the confluence of the Yellowstone and the Tongue. 747 M. Fort Keogh, an important U. S. military post (9 companies); 776 M. Rosebud, at the mouth of the Rosebud River; 832 M. Big Horn (2690 ft.), at the mouth of the Big Horn River, the largest affluent of the Yellowstone, which we cross by a long bridge. We then thread a tunnel 1100 ft. long. About 30 M. to the S. of (838 M.) Custer (coach) is Fort Custer, and 15 M. farther to the S. is the spot where Gen. Custer and his command of over 250 men were annihilated by the Sioux (the 'Custer Massacre') in 1876 (comp. p. 441). An extensive territory to the S. of this part of the Yellowstone has been set apart as a reservation for the Crow Indians (ca. 3000 in number). To the left, near Billings, is Skull Butte, so named from an Indian legend. Beyond (891 M.) Billings (3115 ft.; Grand, $2) the scenery increases in grandeur, and snow-capped mountains appear in the distance. From Billings to Lincoln, see p. 441. — The train crosses the Yellowstone and skirts its N. bank to (932 M.) Stillwater, where it returns to the S. side. 972 M. Big Timber, near the mouth of the Big Boulder Creek (good fishing). To the N. rise the snow-clad Crazy Mts. 987 M. Springdale, the station for (21/2 M.) Hunter's Hot Springs (hotel; 148-168° Fahr.), at the foot of the Crazy Mts. Fine views of the Little Belt Mts. to the right and the Yellowstone Range to the left. 1007 M. Livingston (4485 ft.; Albemarle, $3), a city of 2850 in-
hab., finely situated at the foot of the Belt Range, is the junction of the branch-railway to the Yellowstone Park (see p. 429). It is a good centre for shooting (elk, deer, antelope, bear, grouse, geese, ducks) and fishing (trout, grayling).

The train now crosses and leaves the Yellowstone, which we have followed for 340 M. The line mounts rapidly (116 ft. per mile) to the Bozeman Tunnel, 1170 yds. long, which crosses the Belt Mts., an outlying range of the Rocky Mts., at a height of 5570 ft. Beyond the tunnel we descend through the wild *Rocky Cañon into the wide valley of the Gallatin. 1031 M. Bozeman (4750 ft.; Hotel Bozeman, $2 1/2), a busy little city of 2143 inhab., on the East Gallatin. Large coal-fields lie within 8 M., and deposits of gold, silver, iron, and copper are also worked. — At (1056 M.) Logan (4100 ft.) the line forks, the right or main branch running via Helena and the left branch via Butte. The two lines reunite at Garrison (p. 423).

Butte (6085 ft.; McDermott, from § 3; The Butte, § 3), 71 M. from Logan, may be described as a huge and bustling mining camp of 10,723 people, dating only from 1864, but already possessing many of the attributes of a large city. Including the settlements that are practically suburbs of Butte, the population is nearly 40,000. It is the seat of the great Anaconda Copper and Silver Mine (sold in 1898 for $45,000,000) and other gold, silver, and copper mining companies, producing ore to the annual value of at least $25,000,000 (5,000,000£). The annual output of copper is now about 250 million pounds. A visit to one of the chief mines is very interesting (introduction desirable and in some cases necessary). — The smelting works at Anaconda (Montana Hotel, from $3 1/2), 27 M. to the W., are said to be the largest in the world. The public fountain throws a jet 220 ft. high. — The line from Butte to (51 M.) Garrison (see p. 423) runs through the picturesque Deer Lodge Valley, passing (40 M.) Deer Lodge City (4515 ft.; 1463 inhab.).

Beyond Logan the main line soon reaches (1060 M.) Gallatin (4030 ft.), the station for Three Forks, at the confluence of the Madison, Jefferson, and Gallatin, which unite to form the Missouri. Farther on we thread a wild cañon, with the Missouri to the left and precipitous walls of rock to the right. 1125 M. Prickly Pear Junction.

1130 M. Helena (3930 ft.; *Broadwater Hotel, 3 M. from Helena, see below; Helena, from § 3; Grondon, $2 1/2; Grand Central, $2-2 1/2), the capital of Montana, is a mining city of 13,834 inhab., finely situated in the fertile Prickly Pear Valley, near the E. base of the main range of the Rocky Mts. The State House and some of the other official and commercial buildings are large and substantial, and the streets are lighted by electricity and traversed by electric tramways. A visit to the U. S. Assay Office is interesting.

Helena lies in the heart of one of the richest mining districts in the world and claims to be the wealthiest city of its size in the world. It is said that gold to the value of at least $30,000,000 has been taken from the Last Chance Gulch, which runs through the city; and all round the city are valuable gold and silver bearing veins of quartz, besides deposits of copper, iron, and galena.

About 3 M. to the W. of Helena (reached by steam or electric tramway; fare 10 c.) are the *Broadwater Hotel ($ 4-5) and a huge *Natatorium (400 ft.
to Portland. MISSOULA. 84. Route. 423

long and 150 ft. wide; adm. 50 c.), fed by a hot spring, the temperature of which at its source is about 160° (in bath about 100°). The waters are good for rheumatism. — A visit to one of the Gold or Silver Mines in the vicinity is of great interest. The nearest are those at Grizzly Gulch, 4 M. to the S.W. One of the most famous is the Drum-Lammon Mine, 20 M. to the N., which has yielded $2,000,000 worth of gold and silver in a single year. Another important group of mines lies near Jefferson City and Wickes, about 20 M. to the S. (railway).

Helena is also a station on the Great Northern Railway (see R. 55) and a fine excursion may be made by taking the Montana Central Division of this line to (99 M.) Great Falls (p. 336).

About 21 M. beyond Helena we cross the main ridge of the Rocky Mts. by Mullan’s Pass, where the train passes through a tunnel 2/3 M. long and 5545 ft. above sea-level (summit of mountain over tunnel 5870 ft.). This is from 1800 to 2500 ft. lower than the passes of the Santa Fe and Union Pacific Railroads (comp. pp. 465, 443). The contrast between the E. and the W. sides of the ‘Great Divide’ is very striking, as we at once pass from a scene of wild rocky grandeur to one of mild pastoral beauty. The line descends rapidly to the valley of the Little Blackfoot River. At (1180 M.) Garrison (4315 ft.), on the Deer Lodge River, we are joined by the line from Butte (see p. 422). Beyond Garrison we skirt the Deer Lodge River, which soon changes its name to Hell Gate River. The fine snow-clad pyramid of Mt. Powell (13,400 ft.) is seen to the left. Near (1189 M.) Gold Creek the last spike of the Northern Pacific Railroad was driven in 1883, the tracks advancing from the E. and the W. meeting here. Below (1214 M.) Bearmouth (3790 ft.) we pass through the Hell Gate Cañon, a picturesque mountain-flanked valley, 2-3 M. wide. At (1247 M.) Bonner the Hell Gate River is joined by the Big Blackfoot River (right), which we cross beyond the station. — 1254 M. Missoula (3195 ft.; Florence, $21/2-31/2; Kennedy, $2), finely situated on the Hell Gate or Missoula River, near its confluence with the Bitter Root River, is a rising little city of 3426 inhab. and the junction of the Bitter Root Valley branch. Fort Missoula lies 4 M. to the S. — At (1261 M.) De Smet our line diverges to the right from the Bitter Root Valley line and follows the Jocko River, crossing the Marent Gulch by a bridge 226 ft. high. We then traverse the Reservation of the Flathead Indians, a peaceful tribe whose boast is that they never killed a white man; their huts and ‘teepees’ are seen on both sides of the railway. The Agency Buildings are visible at the foot of the Mission Mts., 5 M. to the N. Near (1299 M.) Jocko the Jocko joins the Flathead or Pend d’Oreille, which we now follow. Beyond (1313 M.) Perma (2490 ft.) we cross the river by a truss-bridge. About 8 M. farther on the Pend d’Oreille is joined by the Missoula, and the combined rivers take the name of Clark’s Fork of the Columbia. The valley here is narrow and rocky, but at (1325 M.) Paradise and (1331 M.) Horse Plains (2460 ft.) it widens into two pleasant little plains, used by the Indians as wintering-places for their ponies. The white
Coeur d'Alène Mts. rise to the left and the Cabinet Mts. to the E., 1357 M. Thompson’s Falls (2435 ft.), at the falls of the Clark's Fork River. Picturesque scenery. Numerous bridges and cuttings. Near (1404 M.) Heron (2260 ft.) we enter Idaho (‘Gem of the Mountains’), a mountainous state, the N. tip of which we now traverse. We cross the river and skirt the N. bank of its expansion, *Lake Pend d’Oreille*, a beautiful sheet of water 45-50 M. long and 3-15 M. wide. — At (1427 M.) Hope (2110 ft.; Highland Ho., $3; Lakeside Hotel, $2), a railway division town and tourists’ resort on the N. bank of the lake (boating and fishing), we pass from ‘Mountain’ to ‘Pacific’ time (1 hr. slower). 1438 M. Kootenai. At (1492 M.) Sand Point we cross an arm of the lake and then quit it. The scenery now becomes uninteresting. The line runs towards the S. as far as (1484 M.) Rathdrum (2210 ft.). 1491 M. Hauser Junction, for a line to (13 M.) Coeur d’Alène City, on the pretty lake of the same name. — We now enter Washington (‘Evergreen State’), an important agricultural state, also remarkable for the splendid timber of its W. slopes. Beyond (1497 M.) Otis we cross the Spokane River.

1512 M. Spokane (pron. Spokán; 1910 ft.; Spokane Hotel, $3-4; Grand Central, $2-4; Columbia, $2-2½; Pacific Hotel, E. P.), a thriving little city of 19,922 inhab., settled in 1878 and in great part rebuilt since a fire in 1889, lies on both banks of the Spokane River, in the centre of a district of great agricultural richness.

The two 'Falls, both within the city, are 150 ft. in total height and furnish the water-power for numerous manufactories, for the electric lighting of the town, and for its system of cable and electric tramways. Visitors should descend to the foot of the lower falls and should also go to the bridge above the upper falls. Among the most conspicuous buildings, many of which are of extraordinary size and solidity for so small and young a city, is the 'Opera House, which has seats for 2000 people. The residence-quarter, on the hill above the railway (on the opposite side from the business-quarter), contains many houses of unusually good taste. The High School, in this quarter, is a handsome red building, with a tower. A fine View of the city and valley is obtained from the Cliff Heights (reached by cable-cars and steam-tramway). — Several railways diverge from Spokane.

Beyond Spokane the line runs to the S.W. At (1521 M.) Marshall Junction diverges a branch-line that runs through the fertile Palouse District to (113 M.) Genesee. — From (1528 M.) Cheney (2340 ft.) a line runs to (124 M.) Coulee City, passing (10 M.) Medical Lake, a favourite invalid resort. — Beyond (1553 M.) Sprague (1910 ft.) we pass Colville Lake (left). We now traverse an unattractive district, overgrown with sage-brush.

1657 M. Pasco, near the confluence of the Columbia and Snake Rivers, is the junction of the line followed by the direct trains to Portland (see next page).
This line crosses the Snake River by a long iron bridge and joins the Oregon R.R. and Nav. Co. at (16 M.) Waituna Junction (see p. 424). Following this line for 27 M. more, we reach Umatilla. Thence to (187 M.) Portland, see R. 88.

Our line (Cascade Division) crosses the Columbia and follows the valley of the Yakima (river to the right) towards the N.W. Beyond (1698 M.) Prosser we traverse the Yakima or Simcoe Indian Reservation. The white cap of Mt. Adams (12,400 ft.), one of the loftiest of the Cascade Mts. (see below), is seen to the left. — 1747 M. North Yakima (990 ft.), with 1535 inhab., is the entrepot of the Yakima Basin, a district in which considerable quantities of fruit, vegetables, hops, and tobacco are grown by dint of irrigation. We now cross the river and have it to our left. Farther on we pass through the fine*Yakima Cañon (15 M. long) and enter the Kittitas Basin, another fertile valley, bounded on the W. by the green Cascade Mts., with the white peak of Mt. Rainier or Tacoma (p. 426) rising beyond. 1784 M. Ellensburg (1510 ft.; Horton, $2-2^{1/2}$) is a busy little city of 2768 inhab., with saw-mills and machine-shops. At (1822 M.) Easton the train begins to ascend the E. slope of the Cascade Mts. (see below) at a gradient of 116 ft. per mile. Fine views. The crest is penetrated by the *Stam pede Tunnel (2810 ft.; height of summit above the tunnel 3980 ft.), nearly 2 M. long, a length exceeded in America at present by the Hoosac Tunnel(p. 148) only (comp., however, p. 337).

The Cascade Mts. (a continuation of the Sierra Nevada; see p. 449) are a broad volcanic plateau, with many snow-peaks (9-11,000 ft.; average height 1000 ft.), running through Washington and Oregon from N. to S. and dividing the states into two regions differing widely in climate, surface, and vegetation. The region we now enter on the W. slope has a mild, moist climate (not unlike that of England) and is covered with dense forests, mainly of coniferous trees.

We now descend into the beautiful valley of the *Green River, passing round winding curves, through tunnels, and over trestles, with numerous picturesque glimpses. 1847 M. Hot Springs (hotel), a small health-resort; 1867 M. Palmer. After leaving the Green River we pass into the valley of the White River and then into that of the Puyallup. Frequent *Views of Mt. Rainier are obtained to the left, sometimes to the S., sometimes to the E. of the line. — 1900 M. Meeker is the junction of the line to (31 M.) Seattle (see p. 526). — 1901 M. Puyallup (70 ft.; Puyallup, $2^{1/2}$), a town of 1732 inhab., is the centre of a rich hop-district, the numerous drying-kilns of which (very unlike the 'cowls' of Kent) have been visible for some time. It is also the headquarters of the Puyallup Indian Reservation. Expert hop-pickers, many of whom are Indians, can earn $1^{1/2}-2 (6-8 s.) per day (compared with 3-4 s. in England).

1912 M. Tacoma (30 ft.; Tacoma Hotel, $3-5; Grand Pacific, Chilberg, E. P.; Villard, $2), a bustling industrial city and seaport of (1890) 36,006 inhab. (now about 50,000) and the W. terminus of the N. Pacific Railway, is finely situated on a series of terraces
rising from the head of Commencement Bay, the S.E. arm of Puget Sound (p. 525). It commands fine views of the Sound, the Cascade Mts., and the grand white cone of Mt. Rainier (S.E.; see below). Though scarcely 25 years old (300 inhab. in 1875, and 760 in 1880), Tacoma possesses numerous substantial streets and buildings, but it contains few points of interest for the tourist. Its industrial establishments include large saw-mills, foundries, smelting works, railway-workshops, iron and stove works, breweries, flour mills, etc.; and it carries on a very extensive trade in grain, lumber, coal, tea, silk, and other articles. Among the principal buildings are the Court House, the City Hall, the Opera House, the Chamber of Commerce, the Offices of the N. Pacific Railway, and the Annie Wright Seminary. A line of electric tramways connects the Railway Station, at the end of Pacific Avenue, the main business-street, with the Wharf; and other electric, cable, or 'dummy' (steam) lines run to the suburbs, Point Defiance, Puyallup (p. 425), etc.

Tacoma is the starting-point of steamers to Alaska (see R. 106); to Seattle (p. 526), Port Townsend (p. 526), Olympia (see below), Victoria (p. 527), and other points in Puget Sound; to San Francisco (p. 421) and other Californian ports; to China and Japan, etc. — Trains run to Seattle (p. 526) at frequent intervals (41 M., in 1 1/2 hr.).

A visit to Mt. Rainier or Tacoma (14,520 ft.) takes about 3 days. The train is taken to (32 M.) Wilkeson, whence a bridle-path leads to (25 M.) a point about 9500 ft. above the sea, where a good view is obtained of two of the 14 living glaciers on the mountain. The hazardous ascent thence to the summit should not be attempted except by experts. Mt. Rainier, like the other isolated mountains of the Cascade Range, is an extinct volcano; and the craters at the summit still give off heat and sulphurous fumes. Mountain-sheep, marmots, and ptarmigan are among its fauna. Enquiry as to guides and horses should be made at the hotels. — Another and perhaps finer trip may be made to "Paradise Park, on the S. side of Mt. Rainier. We take the stage (return-fare $8) to (63 M.) Longmire's Springs (2850 ft.), whence a trail leads to the (7 M.) Camp of the Clouds (6000 ft.; Skinner's Hotel-Tent, meals and blankets $2). The Alpine flora of the Park is very fine. Close by is Nisqually Glacier, 7 M. long, the finest to the S. of Alaska; and many other glaciers and cascades may be reached within a day's walk. The ascent of Mt. Rainier from this side is much easier (2 days). Other good opportunities for the climber are afforded by the ten jagged peaks of the Tatoosh Range (ca. 7000 ft.). Information may be obtained from the Tacoma Transfer Co.

From Tacoma to Olympia, 32 M., Northern Pacific Railway in 13/4 hr. Some of the Portland trains run by this route, joining the route described below at (66 M.) Centralia. — Olympia (Olympia, from § 2), the capital of the State of Washington, is finely situated at the head of Puget Sound, in the midst of a thickly wooded district. Pop. (1890) 4698. It carries on a trade in agricultural produce, fruit, wool, and timber.

The Pacific Division of the Northern Pacific Railway runs to the S. from Tacoma to Portland. Fine views of Mt. Rainier or Tacoma (40 M. distant) are obtained to the left, through breaks in the forest. 1920 M. Lake View (325 ft.) is the point of divergence of the above-mentioned line to Olympia. 1948 M. Tenino (315 ft.), the junction of another line to Olympia. 1960 M. Centralia (205 ft.; 2026 inhab.; see above) is the junction of a line to Gray's Harbor, on the Pacific Ocean. 1964 M. Chehalis, the junction of a line to South Bend, on
the Pacific Ocean. Farther on we descend along the Cowlitz, and glimpses of Mt. Adams (p. 425) are obtained to the left. At (2015 M.) Kalama (33 ft.) the train is transferred across the wide Columbia River by a large steamer. Beyond (2030 M.) Warren we skirt the Willamette (p. 515). In clear weather views are had of Mt. St. Helens (9750 ft.; to the N.E.), Mt. Hood (11,225 ft.), and Mt. Jefferson (10,567 ft.; to the S.E., more distant). The first of these was in eruption in 1898, emitting volumes of black smoke.

2056 M. Portland, see p. 516.

85. The Yellowstone National Park.

The Yellowstone National Park, which, by Act of Congress in 1872, was set apart as a public park or pleasure-ground for the benefit and enjoyment of the people, originally covered a tract 65 M. long from N. to S. and 56 M. wide from E. to W., with an area of 3575 sq. M.; but to this has recently been added a forest-reservation of nearly 2000 sq. M. more on the S. and E., making a total area considerably larger than Connecticut or Inverness. The great bulk of the Park lies in Wyoming, but small portions of it are in Montana (N.) and Idaho (W.). The central portion of the Park consists of a broad volcanic plateau, with an average elevation of 8000 ft. above sea-level. Surrounding this on all sides are mountains with peaks and ridges rising 2000-4000 ft. above the general level. To the S. are the grand Tetons and Wind River Ranges; to the E. the Absaroka Mts. To the N.E. a confused mass of mountains unites the Absarokas with the Snowy Range, which shuts in the Park on the N. The beautiful Gallatin Range, on the N. and N.W., lies partly within the national reservation. The whole district has been the scene of remarkable volcanic activity at a comparatively late geological epoch; and the traces of this activity, in the form of geysers, boiling springs, terrace and crater formations, cliffs of obsidian, deeply-cleft canyons, petrified trees, sulphur hills, and the like, are of the strangest and most startling description (see below). Its geysers are the largest in the world, excelling those of New Zealand or Iceland. Its lakes and waterfalls are also fine, and the marvellously coloured Cañon of the Yellowstone (p. 436) perhaps outstrips even the geysers as an attraction. A great part of the Park is covered with dense forests of yellow pine and Douglas spruce. An attempt has been made to make the Park a huge game-preserve, and large quantities of wild animals, including the last herd of buffaloes in America, elk, deer, bears, big-horn sheep, etc., are sheltered in its recesses. The ordinary tourist, however, will see little of these. No shooting is allowed within the Park precincts; but fishing is freely allowed, and excellent sport may be obtained in the Yellowstone, the Yellowstone Lake, and other waters (trout and grayling). The botanist will find much to interest him in the flora of the district, and it need scarcely be said that it is a peculiarly happy hunting-ground for the geologist. — The Park is under the exclusive control of the Secretary of the Interior, and troops of U.S. cavalry are stationed here to protect the natural curiosities. The rules of the Park may be seen at the hotels, and any infringement of them is severely dealt with. — The Lower Geyser Basin was first explored by Capt. W. W. De Lacy in 1863, though trappers and hunters had previously brought home tales of its wonders. Since then the U.S. Government has sent various scientific topographical and geological expeditions into the Yellowstone, which has now been pretty thoroughly explored and mapped (comp. p. 429).

Geology of the Yellowstone Park (by Arnold Hague, U.S. Geological Survey). Geological evidence shows that the processes of mountain building were contemporaneous in all these ranges and took place near the close of Cretaceous time. By the upheaval of the mountains a depressed basin was formed, everywhere shut in by high land. Later, the pouring out
of vast masses of lavas converted this depressed region into the Park plateau. Tertiary time was marked by great volcanic activity; lavas being piled up until the accumulated mass measured more than 2000 ft. in thickness. At least two centres of volcanic eruptions, Mt. Washburn and Mt. Sheridan, are known within this area. The plateau built up of these lavas embraces an area of 50 by 40 M., the volcanic flows resting against the steep spurs of the encircling mountains. Strictly speaking it is not a plateau; at least it is by no means a level region, but presents an undulating country characterized by bold escarpments and abrupt edges of mesa-like ridges. It is accidented by shallow basins of varied outline and scored by deep canions and gorges. Evidences of fresh lava flows within recent times are wholly wanting; nevertheless, over the Park plateau the most unmistakable evidence of underground heat is everywhere to be seen in the waters of innumerable hot springs, geysers, and solfataras. A careful study of all the phenomena leads to the theory that the cause of the high temperatures of these waters is to be found in the heated rocks below and that the origin of the heat is in some way associated with the source of volcanic energy. Surface waters in percolating downward have become heated by relatively small quantities of steam rising through fissures in the rocks from much greater depths. Geysers and hot springs return these meteoric waters to the surface. They are in a sense volcanic phenomena and remain as evidence of the gradual dying out of volcanic energy. If this theory is correct, proof of the long continued action of thermal waters upon the rocks should be apparent, as they must have been active forces ever since the cessation of volcanic eruptions. Ascending currents of steam and acid waters have acted as powerful agents in rock decomposition and have left an ineffaceable impression upon the surface of the country. This is shown by numerous areas of altered lavas and extinct solfataras. No finer example of the action of steam upon lavas can be seen than along the walls of the Yellowstone Cañon. To-day the greatest activity is found in the geyser basins. The number of hot springs in the Park exceeds 4000. If to these be added the fissures and fumaroles from which issue large volumes of steam and acid vapours, the number of active vents would be greatly increased. There are about 100 geysers in the Park. Between a geyser and a hot spring no sharp line can be drawn, although a geyser may be defined as a hot spring throwing with intermittent action a column of hot water and steam into the air. A hot spring may boil incessantly without violent eruptive energy; a geyser may lie dormant for years without explosive action and again break forth with renewed force.

Bunsen's theory of geyser action, which he announced after investigating the geysers of Iceland, is undoubtedly correct in its essential principles, and has stood the test of careful study of the varied hydro-thermal phenomena in the Yellowstone Park, where they occur on so grand a scale. In the latter locality it may be shown that it is not necessary that the geyser conduit should be vertical or even straight. Bunsen's theory rests on the well-known principle that the boiling point of water increases with pressure and consequently the boiling point at the bottom of a long tube is much higher than at the top. When heat is applied to the bottom of a deep reservoir, explosive action is likely to follow, and in the case of a geyser the expansive force of steam which is generated drives out violently the water in the tube which leads to the surface.

The thermal waters of the Park may be classed under three heads: 1st, calcareous waters carrying calcium carbonate in solution; 2nd, silicious waters carrying free acid in solution; 3rd silicious alkaline waters rich in silica. Calcareous waters are confined almost exclusively to the Mammoth Hot Springs, which lie just to the N. of the Park plateau. Although the waters break out in close proximity to the lavas, and undoubtedly receive their heat from volcanic sources, they reach the surface through limestones. With a few exceptions silicious waters are found issuing from the lavas from which they derive their mineral contents. Acid waters may be recognized by efflorescent deposits of alum and soluble salts of iron, and frequently by the presence of delicate sulphur crystals.
Alkaline springs present more of general interest than acid waters, as it is only in connection with the former that geysers occur. They are the principal waters of all the geyser basins and most hot spring areas. They deposit mainly an amorphous siliceous sinter, but in an endless variety of forms, as is shown in the geyser cones and incrustations on the surface and edges of hot pools.

It is these unrivalled hydro-thermal manifestations and their varied phenomena that have made the Yellowstone Park famous throughout the world, and gained for it the distinction of America's Wonderland.

Approaches and Plans of Tour. The season for visiting the Yellowstone Park lasts from June 1st to Oct. 1st, and June and September are less crowded than July and August. The principal approach is via Livingston on the Northern Pacific R. R. (see p. 421 and R. 54). The charge for a circular excursion ticket from Livingston, including railway and stage fares between Livingston and Cinnabar (each way), stage fares for the regular tour in the Park, and board and lodging at the Park hotels, is $49.50 (from Mammoth Hot Springs $44.50). A return-ticket from St. Paul, Minneapolis, or Duluth to Mammoth Hot Springs costs $47.50 (to Livingston the same). Locomotion within the Park is carried on by the stage-coaches of the Yellowstone National Park Transportation Co. The roads are by no means as good as they might be, and some of the drives between the chief points of interest are rather tedious. The lack of a proper hotel at the Upper Geyser Basin, the most interesting spot in the Park, is also a great drawback, as it reduces the stay there to a few hours and compels the 9 M. between the Basin and the Fountain Hotel to be traversed thrice (comp. p. 433).

Tourists of simple tastes may avoid this mal-arrangement by putting themselves in the hands of Mr. Wylie (of Gardiner, Montana), who has erected comfortable permanent camps (tents) in different parts of the Park and charges $55 for a week's transportation, lodging, and meals, spending two nights at the Upper Basin and two at the Grand Cañon. Cyclists or persons in their own conveyances may use these camps for $2.50 a day, and the same charge is made for each day beyond seven. Carriages may be hired at $10-21 per day (3-7 pers.); saddle-horses $21/2 per day. Messrs. Raymond & Whitcomb (p. xxv) conduct parties from Boston to the Yellowstone at rates proportional to those above mentioned, while similar parties are brought by the Pennsylvania R. R. from New York and by the Burlington Route from Chicago. Camping parties may secure a complete outfit, guides, etc., at the Mammoth Hot Springs Hotel (p. 430). — The Yellowstone may also be approached from Monida, on the Oregon Short Line R. R., whence the Park (85 M.) is reached by stage-coach in about 27 hrs. (comp. p. 444). The charge for a return-ticket from Omaha (p. 438) or Kansas City (p. 452), including the trip through the Park, is about $120. — Warm Wraps are very necessary in the Yellowstone, as however strong the sun is by day, the nights are apt to be very chilly.

Hotels. The hotels of the Yellowstone Park Association (headquarters at Mammoth Hot Springs) are comfortable and well managed. The uniform charge is $4 a day for the first week, then $8.

Guides. Men to point out the way to the various points of interest may be obtained at the hotels for a moderate fee; but really intelligent and efficient guides are still a desideratum. Mounted guide, for longer excursions, $5 per day.

Bibliography. The most detailed account of the Yellowstone is that of Prof. F. V. Hayden and his colleagues in the Twelfth Annual U. S. Geological Report (1878). See also Horace M. Chittenden's 'Yellowstone National Park' (1895) and Arnold Hague's 'Geological History of the Yellowstone Park' (1887). Small Guides to the Yellowstone Park, by A. B. Guptill (50 c.) and W. C. Riley (25 c.) may be bought at the hotels. Good Photographs, by F. Jay Haynes, are also on sale.

a. From Livingston to Mammoth Hot Springs.

Northern Pacific Railroad to (51 M.) Cinnabar in 2 hrs. Stage thence to (8 M.) Mammoth Hot Springs in 1 1/4 hr.
Livingston, see p. 421. — The train ascends the valley of the Yellowstone and soon passes through (3 M.) the *First Cañon of the Yellowstone or Gate of the Mts., a gorge about 1 M. long, with rocky walls 2000 ft. high. The wider reach then entered is known as Paradise Valley. 31 M. Dailey's (4915 ft.). To the left is Emigrant Peak (10,960 ft.), at the head of Paradise Valley. Near (41 M.) Sphinx (5070 ft.) we thread the fine *Middle or Yankee Jim Cañon, 'a gigantic and perfect piece of ice-work, with rocky sides smoothly polished and striated from the bottom to the top' (Geikie). As we approach the end of the railway, we see Cinnabar Mt. to the right, with the curious *Devil's Slide, consisting of two dykes of hard sandstone, 30 ft. apart, ascending the mountain for about 2000 ft.

51 M. Cinnabar (5180 ft.) is the terminus of the railway and the beginning of the stage-line.

The coach passes (2 M.) Gardiner (dining-station for the Wylie parties, p. 429), at the confluence of the Yellowstone and the Gardiner River, where it enters the Yellowstone Park. It then ascends on the right bank of the Gardiner and in 1½ M. more passes from Montana to Wyoming (‘Equality State’). Between Cinnabar and Mammoth Hot Springs the road ascends 1200 ft.; the last part is steep.

8 M. *Mammoth Hot Springs Hotel (6385 ft.), the headquarters of the Park Association (300 beds, incl. annex; baths with water from Hot Springs), is finely situated on a plateau about 800 ft. above the Gardiner, with Mt. Evarts (7900 ft.) rising to the E. (beyond the river) and Terrace Mt. (8100 ft.) and Bunsen Peak (8775 ft.) to the S. Adjacent is Fort Yellowstone, the military headquarters of the park.

This is the starting-point and terminus of the circular tour round the Park, which may be made in either direction, though that followed below is preferable, as reserving the fine Yellowstone Cañon to the last. Trunks and other heavy luggage are left here. The drive through the Park is made in light vehicles holding 3-7 people, and the same carriage is retained throughout by those who perform the circuit within the usual time (5½ days; fee to driver usual).

The Yellowstone Park Association's Guide conducts hotel guests over the Terraces free of charge, starting about 2.30 p.m. It is, however, preferable to visit the Terraces, if possible, in the morning or late evening, as the heat reflected from the glaring white formations is very trying. A guide is not indispensable, as the hotel is scarcely lost sight of. Smoked glasses are a desirable protection to the eyes.

Opposite the hotel, on the slope of Terrace Mt., are the wonderful *Formations or Terraces formed by the calcareous deposits of the Mammoth Hot Springs. These deposits cover an area of nearly 200 acres, comprising 10-12 distinct terraces and 70 active springs, with a temperature varying from 65° to 165° Fahr. The main springs now active lie just above the Terraces, the total height of which is about 200 ft. The exquisite colouring of the formations (white, cream, salmon, red, brown, yellow, green, etc.), the singularly blue transparency of the water, and the striking arrangement of the terraces combine to form a scene that has no rival since the destruction of the famous Pink Terraces of New Zealand.
The first objects to attract the visitor's attention on leaving the hotel are the cones of two extinct geysers, named *Liberty Cap* (45 ft. high) and the *Giant's Thumb*. The path usually followed in visiting the Formations diverges from the main road about 200 yds. to the S. of the former; the path near the Giant's Thumb is generally taken in returning. Among the chief points of interest are the *Minerva Terrace*, the *Jupiter Terrace*, the *Pulpit Basins*, the *Pictured Terrace* (with the Blue Pool), the *Narrow Gauge Terrace*, the *Orange Geyser* (a hot spring, not a geyser proper), *Cupid's Cave*, and the *Devil's Kitchen*. — The grounds of a photographer's studio near the hotel are fenced in with elk-horns, found in the Park.

Those who stay more than a day at the Mammoth Hot Springs may walk or ride to the *Middle Gardiner Falls*, 4 m. to the S.E. They are about 150 ft. high and are in a cañon 1200 ft. deep. This excursion may be combined with an ascent of *Bunsen's Peak* (half-a-day; *View*). — An ascent of *Mt. Evans* (p. 430), including a visit to the *East Falls*, takes about a day. — A road leads to the E. from the Mammoth Hot Springs to (20 m.) *Yancey's Hotel* (§ 2) at Junction Valley, whence a trail ascends the Yellowstone to (4 m.) the *Tower Falls*, 110 ft. high. There is a small forest of *Petrified Trees* 1½ m. to the S. of Yancey's. Fishermen and sportsmen will find Yancey's a good centre. Route thence to *Yellowstone Cañon*, see p. 437.

b. From Mammoth Hot Springs to the Lower Geyser Basin.

42 m. Stage in about 10 hrs.

The road ascends to the S. through the cañon of the Gardiner River to (4 m.) the *Golden Gate*, where the W. branch of the river passes between Bunsen's Peak and Terrace Mt. The name is said to be derived from the yellow moss which grows on the rocky walls of the pass. The *Rustic Falls* here are picturesque. Fine retrospect. On issuing from the cañon we pass *Swan Lake* and cross a somewhat bleak plateau. To the right rise the snow-peaks of the *Gallatin Range*, including (from right to left) *Quadrant Mt.* (10,135 ft.), *Bannock Peak* (10,330 ft.), and *Mt. Holmes* (10,528 ft.). Behind us, to the N.W., is *Electric Peak* (11,155 ft.), the highest mountain in the Park. About 2 m. beyond Swan Lake we cross *Indian Creek*, an affluent of the middle fork of the Gardiner. Farther on, 6 m. from the Golden Gate, are *Willow Park* and *Apollinaris Spring*, with the first *Wylie Camp* (p. 429). To the left, 1½ m. farther on, rise the *Obsidian Cliffs*, a ridge of volcanic glass, 300 yds. long and 150-250 ft. high, once a favourite resort of the Indians, who made arrow-heads of the obsidian. In the construction of the road the large blocks of obsidian were shattered by being first heated by fires and then douched with cold water. To the right lies *Beaver Lake* (7415 ft.), so called from its numerous beavers' dams. The road skirts the lake for about 1 m., crosses the *Green Creek*, and then surmounts the watershed (7550 ft.) between the Gardiner, flowing into the Yellowstone, and the *Gibbon*, flowing into the Madison. We pass *Roaring Mt.* (1.), the little *Twin Lakes* (r.), and the *Devil's Frying Pan* (1.).

18 m. (from Mammoth Hot Springs) *Norris Hotel* (7260 ft.), where a halt is made for luncheon, is merely an eating-station. It lies in the *Norris Geyser Basin*, which, though not to be compared with the larger basins described at pp. 432, 433, contains features
of considerable interest. Some of its active geysers are of quite recent origin. Most visitors will see as much as they wish of this basin by walking on about 1 M. ahead of their carriage. In this way they may see a boiling spring to the left of the road; the Black Growler, to the right; the Hurricane, a short way to the right of the road (sign-post); and the Constant Geyser, the last in a large tract of geysertite which is unsafe for walking.

A path diverging to the left leads to the Emerald Pool, the New Crater, and the (1/2 M.) Monarch Geyser. — Numerous other small geysers and boiling springs are visible in various directions.

From Norris Hotel direct to the Cañon of the Yellowstone, see p. 437.

About 3 M. from the Norris Hotel the road enters a valley named Gibbon Meadows, beyond which we descend the *Gibbon Cañon.

About 1/2 M. to the E. (left) of the entrance to the cañon are the Artists' Paint Pots, similar to those described below. — A path to the right, 3/4 M. farther on, leads to the Monument Geyser Basin, 1000 ft. above the road, which may be neglected by the non-scientific tourist.

About 2 M. from the entrance of the cañon, to the right, is the *Beryl Spring, one of the loveliest boiling springs in the Park (15 ft. across). Near the end of the cañon, to the left, are the *Gibbon Falls, 80 ft. high. The next part of the road is comparatively uninteresting. The Teton Mts. (14,000 ft.; ascended for the first time in 1898), 75 M. to the S.W., are visible in clear weather. Farther on we descend gradually to the valley of the Firehole River, the two branches of which unite to form the Madison. At the forks of the Firehole and Nez Percé, 5 M. from the Gibbon Falls, our road is joined by that from Monida (p. 444). We go on 21/2 M. farther to the —

42 M. *Fountain Geyser Hotel (7250 ft.), the usual halting-place for the first night after leaving Mammoth Springs. Hot mineral baths may be obtained at the hotel.

Every evening, at a point about 100 yds. behind the hotel, a group of bears may be seen eating the kitchen garbage of the day. They are so tame and inoffensive that, it is said, they will sometimes eat apples from the hands of the onlookers.

The *Lower Geyser Basin, which we have now reached, has an area of 3-4 sq. M. and a mean elevation of about 7250 ft. It is known to contain about 700 hot springs, besides a score or so of geysers, arranged in groups. Within a few hundred yards of the hotel is the *Fountain Geyser, which spouts every 2-3 hrs. Though not very high (30-50 ft.), the eruption of this geyser is so wide, has so many interlacing jets shooting in all directions, and rises and falls with so many variations, that it ranks among the most beautiful in the Park. The approach of an eruption, which lasts 15-20 min., is heralded by the gradual filling up of the crater. — Near the Fountain Geyser are the very singular and curiously fascinating *Mammoth Paint Pots, or Mud Puffs, a group of mud springs of different colours (pink, yellow, etc.), within a crater about 40 ft. in diameter. The mud is thrown up with a curious ‘plopping’ sound and falls back into shapes resembling flowers, etc.
About 2 M. from the hotel, but somewhat difficult of access owing to the marshy nature of the ground, is the *Great Fountain Geyser*, which rises to a height of 100-150 ft. and is one of the most remarkable Geyser in the Park. Adjacent are some interesting springs.

c. From the Lower Geyser Basin to the Upper Geyser Basin.

9 M. Stage Coach in 3-4 hrs., including halt at the Midway Geyser Basin (see below).

The road runs at first towards the W., then turns to the S. and follows the Firehole River. In about 3 M. we are abreast of what is known as the Midway Geyser Basin, on the W. bank of the river; and a halt is generally made for a visit to it.

This group includes the great *Excelsior Geyser*, the largest geyser in the world, throwing up nearly as much water as all the rest put together. With a short exception in 1890, it has not worked since 1888, when it threw a huge mass of water to a height of 200-300 ft. Its crater is nearly 400 ft. long and 200-250 ft. wide, and its walls rise 15-20 ft. above the level of the boiling water within. Its appearance amply justifies the name of Hell's Half Acre, which is sometimes applied to it. — A little to the N. is the beautiful *Turquoise Spring*, a pool 100 ft. in diameter, remarkable for the intense blueness of its limpid water. — To the W. lies *Prismatic Lake* (400 ft. long and 250 ft. wide), the marvellous colouring of which is indicated by its name. The volumes of steam which rise from it reflect those colours in a very beautiful way.

About 3 M. beyond the Middle Geyser Basin we reach the beginning of the Upper Geyser Basin (see below), which the road to the hotel traverses, following the course of the Firehole River. Among the springs and geysers near the road as we proceed are the *Artemisia Spring* (right), the *Morning Glory* (i.e. convolvulus; left), the *Fan Geyser* (r.), and the *Mortar Geyser* (r.). Beyond the bridge are the *Riverside* (1.), the *Grotto* (1.), the *Giant* (1.), the *Splendid* (r.), the *Comet* (r.), the *White Pyramid* (r.; at some distance), the *Oblong* (1.), the *Turban* (1.), the *Grand* (1.), the *Saw Mill* (1., these three beyond the river), and the *Castle* (1.).

The **Upper Geyser Hotel** is at present used as a luncheon-station only, travellers returning to the Fountain Geyser Hotel for the night.

The **Upper Geyser Basin** (7395 ft.), which is about 4 sq. M. in area, contains about 40 geysers (including the largest, after Excelsior, and finest in the Park) and many beautiful hot springs. Most of the large springs and geysers are near the Firehole River. A good general view of the district is obtained from a mound near the hotel.

The chief points of interest in the Upper Geyser Basin may be seen in two rounds of about 3 M., one on either side of the river, and about half-a-day should be allowed for each. Hurried visitors will do well to engage a guide; in any case they should ascertain what geysers are ‘due’ and arrange their itinerary accordingly. A table at the hotel gives the periodic times of the different geysers, but few of them, with the exception of Old Faithful, can be trusted. Those who wish to see all the large

† This strange arrangement involves a threefold repetition of part of the journey and necessitates an uncomfortably early start for the drive to Yellowstone Lake (p. 435).

Baedeker’s United States. 2nd Edit. 28
geysers playing have to stay several days or even weeks; while some geyers intermit their eruptions for months and years at a time. Most of the chief geyers are marked by little wooden signs. Thick shoes or overshoes are desirable, as parts of the formations are almost constantly wet from the overflow of the geyers.

*Old Faithful*, one of the most beautiful geyers in the Park, throws its stream, at intervals of about 65 minutes, to a height of 125-150 ft. The eruption lasts about 4 minutes. — Crossing the foot-bridge in front of the hotel, we reach the *Beehive*, so called from the appearance of its cone (4 ft. high), which throws a very compact stream of water from its nozzle-like opening to a height of 150-200 ft. To the E. of the Beehive is the *Giantess*, the interesting exhibitions of which are due once a fortnight (150 ft.). A little to the N.W. of the Giantess is the *Sponge*, so called from the appearance of its crater. — A little farther to the N. are the *Lion*, *Lioness*, and *Cub*, to the E. of which is the *Beach*. The path next passes between *Spasmody* (r.) and the *Sawmill* (l., near a bridge over the Firehole) and reaches the *Turban* and the *Grand*, the irregular eruptions of which last (200 ft. high) are very fine. Near this is the *Young Faithful* or *Minute Man*, a small geyser which goes off every 5 min. and lasts for 1 minute. Continuing to follow the path towards the N., we pass *Beauty Spring*, cross the river, pass the *Oblong Geyser* with its fine crater (to the right, close to the river), and reach (1 M. from the hotel) the *Giant Geyser*, perhaps the finest geyser in the Basin, which plays irregularly, throwing its column to a height of 200 ft. The eruption lasts for ½ hr. About 200 yds. to the N. of the Giant is the *Grotto*, remarkable for its curiously-shaped cone. We recross the river by the carriage-bridge, just above which, by the river’s bank, is the attractive *Riverside Geyser* (thrice daily; 80 ft.). To the N., also adjoining the river, are the *Mortar* and the *Fan*, so called from the shape of its display, which usually follows that of Riverside. On the opposite side of the road is the exquisite *Morning Glory Spring*, a most delicately tinted pool, so called from its resemblance to a convolutedal or morning glory. We may now return to the hotel (1½ M.) by the road passing the *Castle*, named from the shape of its crater (every 30 hrs. or so; 75 ft.). Near the Castle is a fine spring known as the *Castle Well*.

For our second circular walk we leave the hotel by a path leading through trees to the N.W., with *Iron Spring Creek* a little to the left. We cross this stream to visit the beautiful *Emerald Pool* and *Sunshine Pool*, and then recross it and follow the path past the little *Mud Geyser*, to the curious *Black Sand Basin and Specimen Lake*, the latter a flat and dry expanse, with numerous semi-petrified trees. A waggon-road leads hence to the N. to the *Devil’s Punch Bowl*, about 1 M. from the hotel, and is continued, sweeping round to the E., to the main carriage-road, which it joins above the Oblong Geyser (see above). A digression to the left (N.) will take in the *White Pyramid* (the cone of an extinct geyser), the *Splendid Geyser* (every 3 hrs. every alternate day; 200 ft.), and the *Comet Geyser*.

The *Biscuit Basin*, part of the Upper Basin about 2 M. from the hotel, is so called from its resemblance to a huge oven with biscuits baking. It includes the *Sapphire Pool*, the *Soda Geyser*, the *Black Pearl*, and the *Silver Globe*.

A *Road*, now comparatively seldom used, leads from the Lower Basin through the *Hayden Valley* to (25 M.) the road leading from Yellowstone Lake to the Grand Cañon. The road ascends *Mary’s Mountain*, the watershed between the Missouri and the Yellowstone, by the rugged and precipitous *Devil’s Stairway*. Fine retrospect of the Teton Mts. (p. 452), about 100 M. distant, as we ascend. At the top of the hill lies *Mary’s Lake* (8335 ft.). Farther on we pass some hot springs and cross the *Alum Creek*. To the left (N.) rises Mt. *Wasburne* (10,345 ft.), while the *Ahsaroka Mts.* come into sight on the right front (E.). The road then descends gradually into *Hayden Valley*. The drive through the valley to the (25 M.) crossroads, where we turn to the right for (9 M.) Yellowstone Lake and to the left for (8 M.) the Cañon (comp. p. 437), is rather uninteresting. The herd of buffalo in the Park is said to winter here.
d. From Lower Geyser Basin to Yellowstone Lake.

44 M. Stage in 9-10 hrs., including a stoppage for luncheon.

From the Lower Basin to the (9 M.) Upper Basin, see p. 433. The road then ascends to the S.E. along the Firehole or Madison River to (1¹/₂ M.) Kepler's Cascades, where the river descends for 130 ft. in a series of leaps. About 1 M. farther on it bends to the left and follows Spring Creek.

Near this turn is the Lone Star Geyser, which plays every ½-3/₄ hr. to a height of 75 ft. — About 5 M. farther to the S., at the W. end of Shoshone Lake, is the Shoshone Geyser Basin, with the Union and other interesting geysers and hot springs. Lake Shoshone (7830 ft.), 6½ M. long and ½-4 M. wide, consists of two expanses united by a narrow strait. It is surrounded by wooded hills.

Our road ascends steadily along Spring Creek, affording fine views of Shoshone Lake (see above), and at a point about 8 M. from the Upper Basin crosses the 'Continental Divide' or Watershed of the Rocky Mts. (ca. 8100 ft.). This 'Divide' here makes a curious sweep to the N. and then bends round again, so that we cross it a second time, at a height of 8500 ft., about 6 M. farther on, near Lost Lake. The road then descends, passing Duck Lake, to (3 M.) Yellowstone Lake (see below), which we reach at the West Bay or Thumb (Luncheon Station). The Hot Spring Basin here contains about 70 hot springs, many of which are remarkable for their brilliant colouring. One lies so close to the lake, that it is literally possible to catch a trout in the lake and cook it in the spring without changing one's position. About 150 yds. from the lake is a group of *Paint Pots, which many visitors consider finer than those described at p. 432. A small Steamer plies from this point to (20 M.) the Yellowstone Lake Hotel (see below).

For the rest of the way the road skirts the W. bank of *Yellowstone Lake (7740 ft.; 1447 ft. above the top of Mt. Washington, p. 144), one of the largest bodies of water in the world at so lofty an altitude, having an area of 140 sq. M., a shore-line of about 100 M., and a longest diameter of 18 M. Its shape is irregular and has been likened to a hand with three fingers and a thumb. The outlet is at the wrist (N.), near the Yellowstone Hotel. The lake is surrounded by lofty mountains. The Yellowstone River enters it on the S. and issues from it on the N. Before reaching the hotel we circle Bridge Bay, so called from a curious Natural Bridge, about 1¹/₂ M. from the lake.

The *Yellowstone Lake Hotel, 35 M. from the Upper Basin, is well situated on a bluff overlooking the lake and backed by a forest. It commands a fine view of the lake and of the Absaroka Mts. beyond. Among the chief of these (named from N. to S.) are Mts. Cathedral (10,700 ft.), Chittenden (10,190 ft.), Silver Tip (10,400 ft.), Grizzly (9700 ft.), Doane (10,715 ft.), Langford (10,780 ft.), Stevenson (10,420 ft.), Atkins (10,700 ft.), Schurz (10,900 ft.), Eagle Peak (10,800 ft.), and Table (10,800 ft.). Nearly S., considerably to the
right of those just mentioned, are the Red Mts., culminating in Mts. Sheridan (10,385 ft.) and Hancock (10,235 ft.). The numerous islands in the lake also enter pleasantly into the view.

Boats (50 c. per hour) may be hired for excursions on the lake, and the fishing is excellent, the trout being large and voracious (use of fishing-tackle 50 c. per hr.). — The bears in the adjoining forest are almost as tame as those mentioned at p. 432. — To the E., among the Absaroka Mts. (p. 435), is the region known as Hoodoo or Goblin Land, where the extraordinarily grotesque forms of the rocks and crags will repay the lover of the marvellous who is prepared for a somewhat rough and trying expedition.

e. From Yellowstone Lake to Yellowstone Cañon.

17 M. Stage in 4 hrs.

The road leads to the N. and N.W., following the left bank of the Yellowstone River. About 7 M. from the hotel, to the left, is the *Mud Caldron or Volcano, one of the weirdest and most extraordinary sights in the Park. It consists of a circular crater about 20 ft. deep, the bottom of which is filled with boiling mud, constantly rising in pasty bubblings, interspersed with more violent eruptions. The horrible appearance of the muddy pulsations and the groaning sounds which accompany them suggest an entrance to Inferno, with the spirits of the damned making abortive efforts to escape. — About 2 M. farther on the road through Hayden Valley (see p. 434) joins ours on the left, and 2 M. beyond the cross-roads, to the right, rises the Sulphur Mt., or the Crater Hills (150 ft.), where large amounts of sulphur have been deposited by the various vents. The large boiling spring, at the foot of the highest hill, is strongly impregnated with sulphur, and its fumes are very disagreeable. To the left are several small mud-springs.—As we approach the Hotel, about 4 M. farther on, we obtain glimpses of the Upper Fall and the Cañon (see below). Finally we cross a bridge over a small stream forming the Crystal or Cascade Falls.

The *Grand Cañon Hotel (7710 ft.) is finely situated on an elevated plateau, about 1/4 M. from the river and the upper end of the cañon. It is a good point to spend a few days, as the attractions of the cañon demand repeated visits, while good fishing may be enjoyed in the river above and below the falls.

The **Grand Cañon of the Yellowstone, in some ways the most marvellous and indubitably the most beautiful of the wonders of the Yellowstone, extends from the Great Falls (p. 437) to a point near the E. Fork, a distance of about 24 M. Its depth is from 600 to 1200 ft., and its width at the top varies from about 300 yds. to 1500 yds. The upper part of the cañon, where it is at its deepest and narrowest, is also the scene of its most gorgeous colouring, the tints of the enclosing cliffs including the most brilliant shades of red, orange, yellow, and purple, 'as if a rainbow had fallen from the sky and been shattered on the rocks'. The formation of the crags and cliffs is exceedingly bold and picturesque. Far below flows the
Great Falls.  YELLOWSTONE PARK.  85. Route. 437

river, a thread of the most exquisite blue. The margins of the cañon are fringed with dark-green pines.

Visitors should follow the trail which leads to the S.E. from the hotel across the grass (comp. map of cañon in hotel), enters the wood, and leads to the brink of the cañon, which we reach near "Look-out Point", affording one of the finest views of it. To the W. appear the Lower Falls (see below), at the head of the cañon. [The Red Rock, below Look-out Point, reached by a steep but safe trail, also affords a good view of the falls.] We now follow the path along the edge of the cañon towards the left (E.), passing various good points of view, among the best of which is Hayden Point. A small geyser may be observed sending up its column of steam far below on the side of the chasm, and a quick eye will easily detect some eagles' nests on the inaccessible peaks of the pinnacles of rock below us. In about 2 M. we reach "Inspiration Point" (1500 ft. above the river), which commands a splendid view of the gorgeous colours of the upper part of the cañon (afternoon-light the best) and of the more sombre hues of the pine-clad Lower Cañon. This is the limit of the walk in this direction and we may now retrace our steps. [Those who do not care to walk both ways can ride or drive to Inspiration Point and Look-out Point.]

The "Great or Lower Falls of the Yellowstone, as fine, though not so high, as the famous falls of the Yosemite (p. 509), plunge from a height of 310 ft. into the abyss of the chasm. The river suddenly contracts here from a width of 250 ft. to 75 ft. The falls are reached from the hotel in 10-20 min. either by a direct trail (steep) or by an easy trail diverging from the road at the bridge over the Cascade Falls (p. 436). The platform at the head of the falls commands a fine view of the cañon, with Look-out Point conspicuous to the left (Inspiration Point concealed).

- To reach the "Upper Falls, which are ½ M. farther up and about 110 ft. high, we cross the above-mentioned bridge, follow the road for a few minutes more, cross a second bridge (to the left), and then follow the road through the wood. The rapids above the Upper Falls are picturesque; the stretch of water between the two falls is to all appearance calm and sluggish, though the current is really very rapid. — Some good views are also obtained from the opposite side of the cañon, which may be reached by crossing the river by boat above the Upper Fall. One of the best is had from Artist's Point, where Thomas Moran painted the picture of the Yellowstone in the Capitol at Washington.

Mt. Washburn (10,340 ft.), which rises to the W. of the Yellowstone Cañon, commands a splendid view of a large part of the Park, including Yellowstone Lake and the Grand Cañon. It is easily ascended from the hotel on foot or on horseback in 4-5 hrs. (10 M.; guide desirable). The usual route is to follow the trail leading over the E. flank of the mountain to Tower Falls, and diverge from this to the left at its highest point (ca. 4000 ft. above the river). [It is intended to construct a carriage-road over Mt. Washburn to Junction Valley (Yancey's; p. 431), which will form part of the regular circuit of the Park and obviate the doubling of the route from the Norris Basin to Mammoth Springs (see below).] — The above-mentioned trail to Tower Falls (p. 431) is 16 M. long. Another trail leads to the Tower Falls via Dunraven Peak (8805 ft.) and the W. flank of Mt. Washburn. From the Falls to (1 M.) Yancey's, see p. 431.

f. From the Yellowstone Cañon to Mammoth Hot Springs.
30 M. Stage in 7-8 hrs.

The road leads to the W. and farther on descends into the valley of the Gibbon, passing the pretty *Virginia Cascades, which have a total fall of about 200 ft. Just beyond the cascades we turn sharply round an angle known as 'Cape Horn' or the 'Bend in the Road'.

12 M. Norris Basin Hotel, and thence to (30 M.) Mammoth Hot Springs Hotel, see p. 431.
86. From Chicago to Council Bluffs and Omaha.
   a. Via Chicago, Milwaukee, & St. Paul Railway.

492 M. Railway in 14-15 hrs. (fare $12.75; sleeper $2.50). — This
forms part of the Western Midland Route to California (through-cars from
Chicago to San Francisco).

Chicago, see p. 308. The line runs towards the W. through a
farming district. 36½ M. Elgin (700 ft.; Kelley Ho., $2), a busy city
of 17,823 inhab. on the Fox River, with large watch and other fac-
tories. From (80 M.) Davis Junction a line runs to the N. to (13 M.)
Rockford. — 138 M. Savanna (570 ft.; Savanna Ho., Radke Ho.,
$2), on the E. bank of the Mississippi, is the junction of lines run-
ing N. to Dubuque (p. 324) and S. to Rock Island City (p. 323).
Our line here crosses the river to (141 M.) Sabula and enters Iowa
(p. 324). 173 M. Delmar Junction (810 ft.); 193 M. Oxford Junction
(720 ft.); 228 M. Marion, the junction of a line to Cedar Rapids
(p. 439) and Kansas City (p. 452); 281 M. Tama City. From
(348 M.) Madrid and from (378 M.) Herndon lines run to Des
Moines (p. 440). 395 M. Coon Rapids. — 427 M. Manilla, junction
of a line to Sioux City (p. 334); 468 M. Neola.

4881/2 M. Council Bluffs (980 ft.; Ogden; Grand Hotel, $21/2-4;
Union Pacific, $2-3), a flourishing city of (1895) 20,189 inhab., at
the foot of the bluffs of the Missouri, 2½ M. to the E. of the river, owes
its prosperity mainly to the fact that it is the principal E. terminus
of the great Union Pacific Railway (see R. 88) and the converging
point of the E. railways connecting with it. Many of the public
buildings are large and substantial. Fairmount Park is prettily
laid out and commands fine views. Council Bluffs is connected with
Omaha by two railway-bridges and one road-bridge.

Our train now runs into the (489½ M.) Union Pacific Transfer
Station and then crosses the Missouri by a fine *Iron Bridge, more
than 1/2 M. long, erected at a cost of $1,000,000.

492 M. Omaha (1030 ft.; Paxton Ho., $21/2-4, R. from $1;
Millard, from $21/2, R. from $1; Murray, from $3; Dellone, $21/2-4;
Mercer, $2-3), the largest city in Nebraska ('Antelope State') and on
the Missouri, with (1890) 140,452 inhab., is situated on a plateau
rising from the W. bank of the river. The business-streets adjoin
the river, while the pleasant residence-quarters occupy the high
ground. Among the most important buildings are the new Federal
Building (1898), the Coliseum (a convention-hall with 12,000 seats),
the High School (fine view from the lofty tower), the County Court
House, the Exposition Building, the City Hall, several Churches, and
the offices of the Omaha Bee and the New York Life Insurance Co.
— The Public Library contains 55,000 vols. and the Byron Reed
collection of arts and curios. — The *Art Collection of Mr. G. W.
Lininger, cor. of 18th and Davenport Sts. (open on Thurs. & Sun.,
to strangers at other times also), includes paintings by Fra Angelico,
Guido Reni (*2), Guercino, Del Sarto, Solimena, Giordano, Rembrandt, Zurbaran, and several modern masters. — On the N. side of the city is the site of the great Trans-Mississippi International Exposition (1898), some of the handsome buildings of which are to be permanently retained.

Omaha (the ‘Gate City’) owes its commercial importance to its position as one of the chief gateways to the West and has grown rapidly since its foundation in 1854. Its industries include smelting, brewing, distilling, meat-packing (excelled only by Chicago and Kansas City), machine-shops, and the making of bricks and steam-engines. The total value of their products in 1890 was $38,901,523. It is a railway-centre of great importance, being practically (comp. p. 442) the E. terminus of the Union Pacific Railway and in more or less direct communication with all the chief cities of the E. and S.

Fort Omaha, 4 M. to the N., is the headquarters of the military department of the Missouri.

From Omaha to Portland, see R. 88; to San Francisco, see R. 89.

b. Via Chicago & North-Western Railway.

492 M. Railway in 14-16 hrs. (fares as above). — Through-cars run to California by this line also.

Chicago, see p. 308. This line follows nearly the same general direction as that above described. Few of the stations are of great importance. Beyond (97 M.) Dixon (720 ft.) we follow the Rock River to (109 M.) Sterling, a small manufacturing city (5824 inhab.), with good water-power.— From (135 M.) Fulton Junction, on the E. bank of the Mississippi, lines run N. to Savanna (p. 438) and Dubuque (p. 324) and S. to Rock Island City (p. 323). We cross the river by a fine Iron Bridge, 3/4 M. long, enter Iowa, and reach (138 M.) Clinton (725 ft.; Windsor, Revere Ho., $2), a prosperous city with (1895) 17,375 inhab. and extensive lumber-mills. — 172 M. Wheatland. — 219 M. Cedar Rapids (745 ft.; Grand, $3-4; Clifton Ho., $2-21/2), a city of (1895) 21,555 inhab., on Red Cedar River, is an important railway-centre (comp. p. 438), carries on a large trade, and contains large pork-packing establishments and several manufactories. — 270 M. Tama; 326 M. Ames, the junction of a line to (37 M.) Des Moines (p. 440). Beyond (340 M.) Boone (1155 ft.) we descend rapidly into the valley of the Des Moines and the scenery becomes more interesting. We cross the river near (345 M.) Moingana. Farther on we again traverse a rich prairie district. 362 M. Grand Junction. At (400 M.) Maple River Junction we bend to the left (S.). 405 M. Arcadia (1440 ft.; 870 above Lake Michigan) is said to be the highest point in the level state of Iowa. Beyond (423 M.) Denison we pass through the pretty Boyer Valley. Beyond (468 M.) Missouri Valley (1020 ft.), the junction of a line from Sioux City (p. 334), we have good views of the Missouri and its bluffs.

489 M. Council Bluffs, and thence to —

492 M. Omaha, see R. 86 a.
c. Via Chicago, Rock Island, and Pacific Railway.

503 M. Railway in 15-20 hrs. (fares as above).

From Chicago to (181 M.) Rock Island, see R. 50c. This line runs somewhat to the S. of those described above but through much the same kind of fertile prairie-lands. From Rock Island the train crosses the Mississippi, by a fine bridge, to (183 M.) Davenport (580 ft.; Kimball Ho., $2-3; St. James, $2-21/2), the third city of Iowa, with (1895) 30,100 inhab., an important trade in grain and coal, and numerous manufactories. It is finely situated on the slopes of a bluff rising from the river and contains many handsome and substantial buildings. — At (222 M.) West Liberty (665 ft.) we intersect the railway from Burlington to Minneapolis (p. 324). — 237 M. Iowa City (670 ft.; Kirkwood, St. James, $2), a city of (1895) 7526 inhab., on the Iowa River, with various manufactories, is the seat of the State University and the State Historical Library (14,000 vols.). — 303 M. Grinnell; 335 M. Colfax (750 ft.), with mineral springs.

358 M. Des Moines (800 ft.; Savery, $21/2-4; Aborn Ho., $2-21/2; Kirkwood, $2-3; Morgan, $11/2-21/2), the capital of Iowa, is a city of (1895) 56,359 inhab., situated at the confluence of the Des Moines and the Raccoon, at the head of navigation of the former river. It is an important railway-centre and carries on a considerable trade and several manufactures (value of products in 1890, $5,680,000). Among the finest buildings are the new State Capitol (erected at a cost of $3,000,000), the Post Office, the City Hall, the Grand Opera House, Drake University (600 students), and the State Library (46,000 vols.). — The train continues to run towards the W. Beyond (479 M.) Neola we descend to the level of the Missouri.

499 M. Council Bluffs, and thence to —

503 M. Omaha, see R. 86 a.

d. Via Chicago, Burlington, and Quincy Railroad.

502 M. Railway in 14-17 hrs. (fares as above).

Chicago, see p. 308. The line runs at first towards the S.W., through a rich farming district similar to those mentioned above.

37 M. Aurora (p. 324); 83 M. Mendota (750 ft.); 163 M. Galesburg (790 ft.; Union, $2-21/2), a city of 15,264 inhab., with two flourishing colleges, various industries, and a trade in agricultural produce. — From (205 M.) Carthage Junction the train crosses the Mississippi to —

206 M. Burlington (525 ft.; Delano, $2-4; Union, $2-21/2), the fifth city of Iowa, with (1895) 25,248 inhab. and a considerable trade by river and railway. The city is regularly laid out, with the business quarters on the river bottom and the residence-quarters on the bluffs above. The Burlington Institute, the Free Public Library (28,000 vols.), and the County Court House are among the chief buildings. — The
line now ascends towards the W. 234 M. Mt. Pleasant (725 ft.), with two Methodist colleges and a large Insane Asylum; 282 M. Ottumwa (630 ft.), on the Des Moines, with (1895) 16,761 inhab. and considerable trade and industry; 306 M. Albia (945 ft.), the junction of a line to (68 M.) Des Moines (p. 440); 362 M. Osceola (1125 ft.). Beyond (396 M.) Creston (1250 ft.) the line descends towards the Missouri Bottom. 447 M. Red Oak (1030 ft.), the junction of a line to (52 M.) Nebraska City; 482 M. Pacific Junction (960 ft.).

499 M. Council Bluffs and thence to —

502 M. Omaha, see R. 86a.

87. From Omaha to Denver.

a. Via Chicago, Burlington & Quincy Railroad.

538 M. Railway in 14 hrs. (fare $17; sleeper $3.50). Through-cars from Chicago.

Omaha, see p. 438. The line runs towards the S.W. and crosses the Platte River. — 31 M. Ashland.

55 M. Lincoln (Lincoln, Lindell, $2-3/2; Windsor, $21/2; Capitol, Grand, E. P.), the capital of Nebraska and second city in the state, with (1890) 55,154 inhab., is an important railway, industrial, and commercial centre. Among the chief buildings are the Capitol, the State Insane Asylum, the Penitentiary, the University of Nebraska (1600 students), and several other educational institutions.

From Lincoln to Billings, 838 M., railway (Burlington Route) in 24 hrs. This line is an important through-route for passengers for the Yellowstone Park and the Pacific Coast. We first traverse a farming region, passing numerous small stations. — From (472 M.) Edgemont a branch line diverges to (105 M.) Deadwood (Wentworth, $2-3), the chief town (5000 inhab.) in the important mining district of the Black Hills, in S. Dakota. This branch also leads to (29 M.) Hot Springs (3400 ft.; The Evans, $21/2-4), the water of which (98° Fahr.) is beneficial for rheumatism and cutaneous and stomachic diseases. There is a large Soldiers' Home here. — Beyond Edgemont the Billings line traverses a grazing country. Not far from (584 M.) Minuturn, on the Belle Fourche River, is the curious Devil's Tower or Bear Lodge, a natural obelisk of columnar basaltic rock, 1200 ft. high and tapering from a diameter of 800 ft. at the bottom to 375 ft. at the top. It is supposed to be the neck or plug of an extinct volcano, of which the crater has been removed by erosion. — 694 M. Sheridan. From (767 M.) Crow Agency we may visit the scene of the Custer Massacre (p. 421), now a national cemetery. — At (838 M.) Billings we join the Northern Pacific Railway (p. 421).

108 M. Fairmont; 151 M. Hastings, with 15,000 inhab.; 206 M. Holdrege, the junction for the line to Cheyenne (p. 442); 229 M. Oxford, on the Republican, the junction of the line from St. Louis (p. 349). At (283 M.) McCook the time changes to the Mountain standard. The country is now less thickly settled. We enter Colorado (p. 458) at (356 M.) Haigler. 426 M. Akron. At (474 M.) Corona we have our first glimpse of Pike's Peak (p. 470) and the Rocky Mts. Farther on Long's Peak (p. 460) is prominent to the N. — In approaching Denver we pass the large smelting-works of Argo (p. 459).

538 M. Denver, see p. 458.
b. Via Chicago, Rock Island, & Pacific Railway.

580 M. Railway in 15–18 hrs. (fares as above). — This is part of the Western Midland Route to California (comp. p. 438).

Omaha, see p. 438. The route is much the same as that above described. — 58 M. Lincoln, see p. 441. 109 M. Fairbury. At (148 M.) Belleville we are joined by the line from Kansas City (p. 452). Mountain time is reached at (243 M.) Phillipsburg, and Colorado (p. 458) is entered at (383 M.) Goodland. 490 M. Limon is the junction of the line to Colorado Springs (p. 468).

580 M. Denver, see p. 458.

c. Via Union Pacific Railroad.

569 M. Railway in 14 hrs. (fares as above).

From Omaha to (375 M.) Julesbury, see R. 88. Our train here diverges to the left from the main line to Ogden and Portland and follows the course of the Platte River. 430 M. Sterling; 522 M. La Salle.

569 M. Denver, see p. 458.

88. From Council Bluffs and Omaha to Portland.

1823 M. Union Pacific Railroad to (878 M.) Granger in 24–28 hrs.; Oregon Short Line thence to (1419 M.) Huntington in 14 hrs.; Oregon Railroad & Navigation Co. thence to (1523 M.) Portland in 18 hrs. (through-fare $50; sleeper $13). Dining-cars are attached to through-trains (meals $1). For general remarks on the Union Pacific System and its connections, see p. 446.

Council Bluffs and Omaha, see p. 438. The train at first traverses the manufacturing suburbs of Omaha. Beyond (31 M.) Elkhorn (1165 ft.) we run along the left bank of the Platte River, through a farming and prairie district. At (49 M.) Fremont (1190 ft.) we are joined by a line from Sioux City (p. 334). 94 M. Columbus (1440 ft.), the junction of lines to Sioux City (p. 334) and other points; 156 M. Grand Island (1860 ft.), a railway-centre of some importance; 199 M. Kearney (2145 ft.); 234 M. Lexington (2385 ft.). At (294 M.) North Platte (2795 ft.; 3055 inhab.) we cross the North Platte River and pass from ‘central’ to ‘mountain’ time (p.xviii). — At (375M.) Julesbury (3455 ft.), the junction of the direct line to Denver (see R. 87 c), the line dips into Colorado but returns almost at once to Nebraska. We now quit the Platte River, which we have followed for about 350 M. — Near (417 M.) Sidney (4090 ft.) the train passes from the farming district of Nebraska into the grazing district, in which immense herds of cattle are reared. Between (466 M.) Bushnell and (476 M.) Pine Bluffs we enter Wyoming, called the ‘Equality State’ because its men and women have equal voting rights. — 519 M. Cheyenne (pron. Sh'yán; 6050 ft.; Inter-Ocean Hotel, $21/2–5; Metropolitan, Dyer, $2), with 11,690 inhab., is the junction of the Denver Pacific branch of the U. P. System (from Kansas City and Denver; comp.
to Portland. GRANGER. 88. Route. 443
p. 462). It is one of the chief centres of the cattle industry of the
N.W. Fort Russell lies 4 M. to the N. of Cheyenne. — The snow-
clad peaks of the Rocky Mts. now come into sight on the left, in-
cluding Long's Peak (p. 460) and the distant Spanish Peaks (p. 471).
To the N. (right) are the Black Hills. The train ascends rapidly,
passing (538 M.) Granite Cañon (7310 ft.), and at (552 M.) Sherman
(8245 ft.) reaches the culminating point of the line, where we cross
the main ridge of the Rocky Mts., the great 'Continental Divide'.
To the left is the Ames Monument, 65 ft. high, erected to Oakes and
Oliver Ames, to whom the completion of the U. P. Railway was
mainly due. Farther on we cross the Dale Creek by a bridge 650 ft.
long (in a single span) and 127 ft. high. To the left may be descried
Pike's Peak (p. 470), 165 M. off. To the right are the Red Buttes.—
576 M. Laramie (7150 ft.; Market's Union Pacific, Kuster, $2-
2 1/2), a city of 6388 inhab., lies on the Big Laramie River, in
the midst of the so-called Laramie Plains, one of the best grazing
districts in the United States. It is a wool-market of considerable
importance.

In summer stages ply from Laramie to North Park, which lies about
60 M. to the S. North Park is one of the great natural parks of Colo-
rado, which consist of large elevated plains or upland valleys surrounded
by lofty mountains. They offer considerable attractions to the adventur-
ous traveller and to the sportsman in search of large game, but are some-
what beyond the range of the ordinary tourist. North Park has an area
of 2000-2500 sq. M., with a mean elevation of 8-9000 ft. It may also be
reached from Denver via Fort Collins (see p. 460). The other natural
parks of Colorado are Middle Park (p. 460), Estes Park (p. 460), South
Park (p. 461), and San Luis Park (p. 471).

Beyond Laramie the train continues to descend through rugged
hilly scenery. To the right of (618 M.) Miser rises Laramie Peak
(9000 ft.), to the left Elk Peak (11,510 ft.), the N. outpost of the Med-
icine Bow Mts. 626 M. Rock Creek (6700 ft.; Rail. Restaurant); 659 M.
Carbon (6820 ft.). Beyond (697 M.) Fort Steele we cross the North
Platte, which re-appears here, 300 M. from the point we last saw it
(p. 442). We now begin to ascend again. 712 M. Rawlins (6745 ft.);
740 M. Creston (7050 ft.), beyond which the train descends to the
plains; 808 M. Point of Rocks (6505 ft.). At (848 M.) Green River
(6080 ft.) we cross the river of that name, and the scenery again
improves.

878 M. Granger (6280 ft.) is the point at which the Portland line
(Oregon Short Line) diverges to the right from the main San Fran-
cisco line described in the following route. — Our train now runs
towards the N.W., at first on a level and then gradually descending.
Stations few and unimportant. At (970 M.) Border (6080 ft.) we enter
Idaho ('Gem of the Mountains'). 993 M. Montpelier (5945 ft.),
near Bear Lake (left); 1024 M. Soda Springs (5780 ft.; Stock Ex-
change, Idaho, Lau, $2), a favourite summer-resort, with numerous
powerful springs.

1093 M. Pocatello (4465 ft.; American Ho., $2), a town of
2330 inhab., in the Fort Hall Indian Reservation, is the junction of lines running S. to (134 M.) Ogden (comp. p. 447) and (171 M.) Salt Lake City (see p. 477), and N. to Butte and (336 M.) Helena (see p. 422). Circular tickets are issued by the Railway for tours from Pocatello to the Shoshone Falls (see below), the Yellowstone Park (p. 427), Butte, Helena (p. 422), etc.

On the line to Helena, 130 M. from Pocatello, is Monida (700 ft.), the starting-point of the daily stage-line to the Yellowstone Park (comp. p. 429). The coach starts at 8.30 a.m. and stops for the night at (60 M.) Dwelle's Grayling Inn, near the W. margin of the Park, which it reaches about 5.30 p.m. Next day it starts at 8 a.m. and runs through the Firehole Basin (p. 432) to (3½ hrs.; 26 M.) the Fountain Hotel (p. 432). The route traverses Centennial Valley, passes Red Rock Lakes, crosses the Divide by the Red Rock Pass, near Lake Henry (6440 ft.; view of the Tetons, p. 432), and again at the Targhe or Tyghee Pass (7060 ft.), and descends along the Madison (p. 432).

Beyond Pocatello the train traverses the Great Snake River Lava Fields, overgrown with sage-brush and greasewood; the snow-clad Rocky Mts. bound the distant horizon on the right. We cross the river at (1118 M.) American Falls Station (4340 ft.) by a bridge, 600 ft. long, affording a good view of the *Falls. To the N. rise the Three Buttes of Lost River and (farther to the W.) the Saw-Tooth Mts. In front, to the left, appear the snow peaks of the Washoe Range. — 1200 M. Shoshone (3970 ft.), the starting-point for the stage to the (25 M.) Shoshone Falls (3½ hrs.).

The road to the falls runs to the S. across a sage-brush plain, passes some lava ridges, and suddenly reaches the deep ravine of the Snake River, 1200 ft. below it. We cross the river by a substantial ferry and soon reach the small Shoshone Falls Hotel. The 'Great Shoshone Falls, with a breadth of 950 ft., fall from a height of 210 ft. and deservedly rank with the waterfalls of the Yosemite or the Yellowstone. Just above the main cataract is the Bridal Veil Fall (80 ft.), and 3 M. higher are the Twin Falls (180 ft.). An area of, perhaps, 250,000 sq. M. in the states of Washington, Oregon, California, and Idaho is covered by the so-called 'Columbia Lava', a deposit ½-1 M. in thickness. Through this the Snake River has carved its mighty cañon, at places 4000 ft. deep and surpassed in grandeur by that of the Colorado River alone (p. 466). Towards the bottom of the cañon may be seen the ancient crystalline formations of the mountains covered by the lava-sheet. The soil of this lava district is peculiarly valuable for wheat-growing, and it is nearly all used for this purpose. About 5 M. below the falls, a little to the N. of the river, are the picturesque Blue Lakes, where boating and fishing may be enjoyed.

A branch-line runs to the N. from Shoshone to (57 M.) Hailey (5340 ft.) and (70 M.) Ketchum (5520 ft.). The Hailey Hot Springs (hotel), 1½ M. from the station (temp. 150°), are efficacious in rheumatism, dyspepsia, and other ailments. Near Ketchum are the Guyer Hot Springs (hotel).

Near (1235 M.) Ticeska the railway again reaches the Snake River, the right bank of which we now skirt more or less closely. 1256 M. Glenn's Ferry (2565 ft.). Level plains give place to small rolling hills and bluffs, but the scenery continues to be uninteresting. 1337 M. Nampa (2490 ft.) is the junction of a branch-line to (20 M.) Boise City (2885 ft.; Capitol Hotel, Overland Hotel, $2-3), the capital of Idaho, a busy little mining city, with 2311 inhabitants. — 1346 M. Caldwell (2870 ft.). Between (1361 M.) Parma and
Huntington we cross the Snake River thrice, the last crossing bringing us into Oregon (p. 324). 1397 M. Weiser (2120 ft.) is the gateway of the district known as the 'Seven Devils', named, apparently, from the hills seen to the right. Farther on the Snake River flows through a picturesque cañon (*View to right from the bridge).

At (1419 M.) Huntington (2110 ft.; Union Pacific Hotel, $21/2) we reach the line of the Oregon Railroad & Navigation Co. and change from 'Mountain' to 'Pacific' time (1 hr. slower; see p. xviii). We now leave the Snake River and ascend the picturesque *Burnt River Valley, crossing the stream repeatedly and threading rock-cuttings and tunnels. Near (1439 M.) Durkee we leave the Burnt River. Beyond (1466 M.) Baker City (3440 ft.) we ascend across the Blue Mts. and then descend rapidly, passing several snow-sheds, into the fertile and beautiful *Grande Ronde Valley, watered by the river of that name. 1505 M. Union (2720 ft.;) 1518 M. La Grande (2780 ft.;) 1537 M. Kameta (2910 ft.;) 1543 M. Meacham (*Rail. Restaurant); 1550 M. Huron (2918 ft.;) 1592 M. Pendleton (1070 ft.), the junction of a branch-line to (47 M.) Walla Walla (p. 424); 1617 M. Echo (640 ft.). — 1636 M. Umatilla (300 ft.) is the junction of a branch-line to (262 M.) Spokan (p. 424). Our line is here joined by the direct Portland trains of the G. N. R. R. and the N. P. R. (comp. pp. 336, 424). Near (1661 M.) Castle Rock (250 ft.) the train reaches the wide Columbia River (700-800 yds. across), the left bank of which we now follow all the way to Portland. The object of the shields and barricades noticed here is to prevent the fine loose sand, here bordering the river, from accumulating on the tracks, a cause by which trains are occasionally derailed. 1681 M. Arlington (230 ft.;) 1712 M. Grant's (180 ft.), with fine basaltic cliffs. Farther on we cross the Des Chutes River (view to left). — 1723 M. Celilo lies at the beginning of the narrow and rapid stretch of the river known as the *Dalles of the Columbia, extending to The Dalles (see below).

The name (derived from the sheets of lava well exhibited on or near the river here) is sometimes confined to the gorge just above The Dalles, where the river is compressed for about 21/2 M. into a channel only 130 ft. wide. The river-valley here seems to have been obstructed during a recent geological period by a lava-flow, through which it has eroded this extraordinary channel. As we approach Dalles City we have a good view of Mt. Hood (p. 416), on the left front.

1735 M. The Dalles (105 ft.; Cosmopolitan, Umatilla, $2-3) is a small place of 3029 inhab., with a considerable trade and some manufactures. It stands at the head of the finest scenery of the Lower Columbia, which pierces the Cascade Mts. a little lower down.

Passenger-steamers ply regularly between this point and Portland, and the traveller is advised to perform the rest of the journey by water (110 M.), as the scenery is seen to the best advantage from the deck of the steamer. The large 'fish-wheels' are interesting. Comp. p. 617.

The scenery for the remainder of the journey to Portland is very grand, including beautiful river-reaches, fine rocks and crags, pleas-
ant green straths, noble trees, romantic waterfalls, and lofty mountains. Beyond (1744 M.) Rowena we see (to the right) the island of Memaloose, the ancient burial-place of the Chinook Indians, with a tall shaft marking the grave of Victor Trevet, a pioneer and friend of the Indians. Beyond (1751 M.) Mosier (100 ft.) the railway and river pass through the gorge proper of the Cascade Mts. (p. 425).

— 1757 M. Hood River.
From this station stages run in summer (return-fare $7.50) to (27 M.) Cloud Cap Inn (6000 ft.), situated at the foot of the glaciers on the N. side of Mt. Hood (11,225 ft.; comp. p. 517) and affording a fine *View. About 10 min. from the inn is the fine *Eliot Glacier, and excursions may be made to many other glaciers and cascades. The ascent to the top of Mt. Hood takes 6-10 hrs. (there and back) and is somewhat trying, though often made by ladies. The *View from the top embraces the whole of the Cascade Range, including the snow-peaks St. Helens, Adams, Rainier, and (sometimes) Baker to the N., and Jefferson, the Three Sisters, Diamond Peak, and Pitt to the S. The Blue Mts., on the E., and the Pacific Ocean, on the W., are sometimes seen. The view also includes the Coast Range and the valleys of the Columbia and Willamette. Mt. Shasta, 250 M. to the S., is said to be visible with a good glass. The ascent may also be made on the S. side (car. from Portland, ca. 60 M.).

From Hood River we may also drive to (27 M.) Trout Lake (good fishing), near which are fine ice and lava caves. From the lake a trail leads to (40 M.) Mt. Adams (12,470 ft.), the ascent of which (from and to the timber-line) takes 8-12 hrs. The glaciers of Mt. Adams are very fine and have been little explored.

At (1778 M.) Cascade Locks the river descends 25 ft. in a series of picturesque rapids.

To avoid this obstruction the U. S. Government has constructed a canal (1 M. long) and two locks on the S. or Oregon shore, at a cost of about $4,000,000. The locks are the largest in the country after those at Sault-Ste-Marie (p. 333).

Among the numerous small waterfalls at this part of the line the most picturesque are the Horse Tail, the *Multnomah (635 ft. high), the Latourelle, the Bridal Veil, and the Oneonta, all near the stations of (1790 M.) Oneonta and (1794 M.) Bridal Veil. The towering crags passed above or below this include the Castle Rock (rising 1000 ft. from the river), Rooster Rock (in the river), Cape Horn (500 ft. high), and the *Pillars of Hercules, forming a noble gateway for the railroad. Beyond (1820 M.) East Portland and (1821 M.) Albina the train crosses the Willamette (p. 515), a broad tributary of the Columbia. A fine view is obtained of Mts. Hood and St. Helens to the S. and Mts. Adams and Rainier to the N.

1823 M. Portland (35 ft.), see p. 516.

89. From Council Bluffs and Omaha to San Francisco.

1867 M. Union Pacific Railway to (1034 M.) Ogden in 30-32 hrs. and Southern Pacific Railroad thence to (1867 M.) San Francisco in 32 hrs. (through-fare $50; sleeper $13). Through-carriages. Dining-cars attached to through-trains (meals $1). Passengers from New York to San Francisco by this route (4 days 22 hrs.; fare $80) change carriages at Chicago.

The opening of the Union Pacific and Central Pacific Railways (the latter now absorbed in the Southern Pacific system) in 1869 completed the
first railway route from the Atlantic to the Pacific. The undertaking was performed with the aid of large subsidies in money and land from the U.S. Government. Though the Rockies and several other mountain-ranges are crossed, the gradients are seldom severer than 1:50, and no tunnels were necessary except in Utah and the Sierra Nevada.

From Council Bluffs to (878 M.) Granger, see R. 88.

The main line continues to run towards the W. through a somewhat monotonous country. Good views of the snow-clad Uintah Mts. to the left. 906 M. Carter (6510 ft.). We now ascend to the ridge of the Wahsatch Mts., which we cross a little beyond (941 M.) Aspen (7395 ft.). At (945 M.) Hilliard (7245 ft.) we pass under a so-called 'V-flume', used for conveying timber from the mountains. 958 M. Evanston (6760 ft.). Beyond (960 M.) Almy Junction we enter the Territory of Utah ('Deseret'; sign to the S. of the track). The Utah Enclosed Basin, which we now traverse, is remarkable for the fact that its waters have no outlet to the sea, but flow into salt lakes which in summer get rid of their surplus by evaporation. At (978 M.) Castle Rock (6240 ft.), where an observation car is attached to the train, we enter the wild *Echo Canon, with its wonderful rock and mountain scenery. We emerge from this near (994 M.) Echo (5470 ft.), and a little farther on reach the *Weber Cañon, wider and less confined than Echo Cañon but in its way equally imposing. Tunnels. One of the minor points of interest is the One Thousand Mile Tree (reckoned from Omaha; to the right). The Devil's Slide resembles that described at p. 430. Beyond (1017 M.) Peterson (4895 ft.) we descend into the Valley of Salt Lake.

1034 M. Ogden (4300 ft.; Reed Ho., $2-3; Depot Hotel, with rail. restaurant, $ 3, meals 75 c.; Broom House, $1 1/2-2), the W. terminus of the Union Pacific R. R. and the E. terminus of this section of the Southern Pacific R. R., is a prosperous industrial city of (1895) 15,828 inhab., situated on a lofty plateau surrounded by mountains. It is also the terminus of the Rio Grande Western Railway (see R. 94a). Salt Lake City lies 37 M. to the S. (see p. 477).

From Ogden to Pocatello, 134 M., Oregon Short Line in 5 hrs. — The line runs to the N., affording views of Salt Lake (p. 480) to the left. Beyond (9 M.) Utah Hot Springs, at the base of the Wahsatch Mts., we see to the right some fine crag scenery with curious conical peaks. From (14 M.) Willard a visit may be paid to the (3 M.) Willard Falls and Cañon. Beyond this point the ancient bench-marks on the mountains are very conspicuous. Between (21 M.) Brigham and (30 M.) Honeyville we cross a small shallow lake. Farther on the scenery is very fine, with the deep *Bear River Cañon to the left, while the rocky hills tower above us to the right. We cross two lateral gorges on trestles. On the other side of the cañon is an irrigating canal, a fine piece of engineering, tunnelled at several points through the rock. 49 M. Cache Junction; 71 M. Dayton; 111 M. McCammon. — 134 M. Pocatello, see p. 443.

Visitors may bathe in Salt Lake (see p. 480) by going by railway from Ogden to (15 M.) Syracuse Beach, a pleasant little lake-resort. — Another favourite point is the *Ogden River Cañon (a drive of 1 1/2 hrs.).

Beyond Ogden our line (the Southern Pacific R. R.) runs at first towards the N. parallel with the Pocatello line (see above), skirts Bear River Bay, the N.E. arm of Salt Lake (p. 480), then bends to
the left, runs to the N. of the lake, and crosses the Bear River. 1059 M. Corinne (4230 ft.), said to be the largest Gentile town in Utah. 1087 M. Promontory (4905 ft.). Beyond (1126 M.) Kelton we leave Salt Lake and bend towards the S.W., traversing the N. part of the 'Great American Desert', with its arid brown hills and stretches of alkali and sage-brush (Artemisia tridentata). Some crops have been raised here by irrigation. 1158 M. Terrace (4550 ft.; Rail. Restaurant). To the S.W. rises Pilot Peak (10,900 ft.). Just before reaching (1191 M.) Tecoma (4810 ft.) we enter Nevada (the 'Sage Brush State'), the boundary being marked by a stone monument. At (1227 M.) Pequop (6185 ft.) we cross the ridge of the Pequop Mts. We then descend into Independence Valley and re-ascent to (1244 M.) Moors (6165 ft.), in Cedar Pass. 1253 M. Wells (5630 ft.), with several springs, to some of which no bottom has been found; 1286 M. Halleck (5230 ft.); 1309 M. Elko (5065 ft.; Rail. Restaurant). Elko Mt. is seen first to the right and then to the left. Piute Indians now begin to show themselves. 1333 M. Carlin (4900 ft.). 1342 M. Palisade (4840 ft.), in a narrow cañon, is the junction of a narrow-gauge line to (90 M.) Eureka, in a rich mining district. Farther on we cross the Humboldt River, which we follow some time. To the N. are the Cortez Mts. 1393 M. Battle Mountain (4510 ft.); 1453 M. Winnemucca (4330 ft.). To the N. are the Santa Rosa Mts. 1493 M. Humboldt (4235 ft.), a little oasis in the desert. A little farther on we again cross the Humboldt River, which flows into the Humboldt or Carson Sink, to the S. of the line. — 1554 M. White Plains (3895 ft.), the lowest point on the line for 1300 M.; 1569 M. Hot Springs. — At (1589 M.) Wadsworth (4085 ft.) we begin the long ascent to the ridge of the Sierra Nevada, following the Truckee River. The scenery becomes picturesque. Numerous snow-sheds are passed. 1603 M. Clark's (4260 ft.). — 1623 M. Reno (4500 ft.; Riverside, Arcade, $ 2-2 1/2), a busy little town of 3563 inhab., with the State University (350 students), flour-mills, and smelting-mills.

From Reno to Virginia City, 52 M., railway in 3 hrs. The chief intermediate station is (31 M.) Carson (Arlington, $2; Briggs Ho., $1 1/2), the capital of Nevada, a prosperous city of 3500 inhab., with substantial buildings and fine residences. Stages run hence daily (fare $2) to (15 M.) Glenbrook (Glenbrook Hotel, $2), on Lake Tahoe (6700 ft.), a beautifully clear and ice-cold sheet of water, 22 M. long, 10 M. wide, and 1500 ft. deep. Though surrounded by snow-clad mountains, it never freezes. Small steamers ply to various points on the lake.

52 M. Virginia City (6205 ft.; International, $ 2 1/2-3), a silver-mining city of 8511 inhab., will well repay a visit to all who are interested in mining. The famous Comstock Lode has produced (since 1859) gold and silver to the amount of $450,000,000 (90,000,000 t.) and still yields $4,000,000 annually. The Siuro Tunnel, which drains the lode, is nearly 4 M. long and cost $4,500,000. Mt. Davidson (7325 ft.) commands an extensive view. Tourists may leave Reno in the morning, spend the greater part of the day at Virginia City, return for the night to Carson, drive to Lake Tahoe next day, cross it by steamer from Glenbrook to Tahoe City (Tallai Ho., $3-4 1/2; Tahere Hotel, $2 1/2-4), and go thence by stage to (14 M.) Truckee (p. 449). Either Virginia City or Lake Tahoe may be visited from Reno in one day.
Beyond Reno the train enters California (‘El Dorado State’). From (1658 M.) Truckee (5820 ft.) stages run to (14 M.) Tahoe City (see p. 445; fare §2). About 3 M. to the W. is the pretty Lake Donner, the name of which is associated with a sad tale of suffering and death in the early annals of the pioneers of California (1846-47). The train continues to ascend, through imposing scenery, and reaches the highest point of the pass across the Sierra Nevada at (1672 M.) Summit Station (7015 ft.), where we thread a tunnel 530 yds. long. About 4 M. to the N. is Mt. Stanford or Fremont's Peak (9175 ft.; *View).

The Sierra Nevada (‘Snowy Range’) is the name given in California to the magnificent range the N. continuation of which, in Oregon and Washington, is known as the Cascade Mts. (see p. 425). It forms the W. edge of the highest portion of the Cordillera system (p. lxviii) and is, perhaps, on the whole the most conspicuous chain of mountains in the country. From Mt. San Jacinto to Mt. Shasta it is about 600 M. long; but some geographers consider that the Sierra proper ends at Lassen’s Peak, 100 M. to the S. of Mt. Shasta. Its average elevation is 8-10,000 ft., and several of its peaks, such as Mt. Whitney (p. 495), Mt. Shasta (p. 514), and Mt. Corcoran (14,055 ft.), attain heights of over 14,000 ft. The Yosemite Valley (p. 506) and its enclosing peaks are, perhaps, the best-known part of the Sierra Nevada; but it abounds throughout in the grandest mountain-scenery and offers many opportunities for the Alpine explorer. There are some large glaciers in the N. part of the range.

As we descend on the Californian side of the range the scenery continues to be very picturesque, while the change in vegetation and the brilliance of the flowers announce the mild climate of the Pacific Slope. The descent is very rapid, and the transition from snow-wreaths to sub-tropical vegetation comes with startling swiftness.

At places the line runs along the face of precipices, on ledges barely wide enough to accommodate the tracks. Snow-sheds, built in 1869 at a cost of $2,000,000 and covering about 37 M. of the track, cut off much of the view at first. 1694 M. Emigrant Gap (5220 ft.); 1699 M. Blue Cañon (4695 ft.); 1709 M. Alta (3805 ft.); 1711 M. Dutch Flat (3395 ft.). Before reaching (1723 M.) Colfax (2420 ft.) we pass the rocky promontory known as *Cape Horn. 1741 M. Auburn (1360 ft.). Orchards and vineyards are now numerous. Oranges grow at (1746 M.) Newcastle (955 ft.). 1759 M. Roseville Junction (165 ft.; p. 514).

1778 M. Sacramento (30 ft.; Golden Eagle, $2½-3; Capitol, $2-2½), the capital of California, with 26,386 inhab., lies on the E. bank of the Sacramento River, just below its confluence with the American River. It is regularly laid out, with wide straight streets, shaded with trees and bordered by gardens. It is an important railway-centre and carries on an active trade. The most conspicuous building is the State Capitol, a large and handsome structure containing a library of 100,000 vols. (fine view from dome). Other important edifices are the Court House, the City Hall, the Free Public Library (28,000 vols.), the Roman Catholic Cathedral, and other churches. The Crocker Art Gallery contains pictures, Californian minerals, and a school of art. The State Agricultural Society has a large exhibition.
building and spacious grounds.—A pleasant drive leads along the Sacramento to (4 M.) Riverside.

From Sacramento to Portland, see B. 163.

From SACRAMENTO to LATHEP, 57 M., railway in 2½ hrs. This line formed part of the old route from Sacramento to San Francisco.—35 M. Lodi (55 ft.).—45 M. Stockton (25 ft.; Yosemite, $21/2-3; Imperial, $21/2; Grand Central, $2), a well-built and flourishing little city of 14,424 inhab., lies at the head of navigation on the San Joaquin (‘Wahkeen’) River. Among the most prominent buildings is the State Insane Asylum, seen to the right as we enter the station. From Stockton to the Calaveras Grove, see below.

—At (57 M.) Lathep we join the Southern Pacific line from San Francisco to the S. (comp. p. 495).

Stockton (see above) is the junction of a branch-line to (30 M.) Milton, whence stage-coaches run in 24 hrs. (incl. overnight halt) to (50 M.) the Calaveras Grove of Big Trees. The night is spent at Murphy’s Camp (Mitchler Ho., $2).—The Calaveras Grove (Mammoth Grove Hotel) is the northernmost of the Californian groves of big trees, and it is the nearest to San Francisco. It is, however, comparatively seldom visited, as the Mariposa Grove (see p. 507) is conveniently included in the usual route to the Yosemite. The Sequoia or Wellingtonia gigantea, the ‘big tree’ of California, is found only on the W. slope of the Sierra, while the Redwood or Sequoia sempervirens, belonging to the same genus, is confined to the Coast Ranges (see p. 494). The Calaveras Grove (4750 ft. above the sea) covers an area about 1100 yds. long and 70 yds. wide and contains about 100 trees of large size, besides many smaller ones. The tallest now standing is the Keysone State (315 ft. high, 45 ft. in girth). The Mother of the Forest (denuded of its bark) is 315 ft. high and has a girth of 61 ft., while the prostrate Father of the Forest measures 112 ft. in circumference. Two other trees are over 300 ft. high and many exceed 250 ft. A house has been built over a stump with a diameter of 24 ft. The bark is sometimes 1-1/2 ft. in thickness. — About 5 M. to the S is the Stanislaus or South Grove, also containing many fine trees, which may be visited on horseback.

—Milton is the starting-point for one of the stage-routes to the Yosemite Valley (p. 506), which may also be reached from the Calaveras Grove via Murphy’s (see above), Sonora (34 M.), and Chinese Camp (45 M.; p. 506).

The train crosses the river at Sacramento and runs toward the W., passing (1791 M.) Davis and reaching at (1818 M.) Suisun (‘Sooisoon’) a swampy district overgrown with tule, a kind of reed. To the S. is Suisun Bay, with Mt. Diablo (3855 ft.) rising beyond it. —1835 M. Benicia, with 2361 inhab., a U.S. Arsenal, and large wharves, lies on the N. side of the narrow Straits of Carquinez (1/2 M.), uniting the bays of Suisun and San Pablo. It is accessible for ships drawing 23 ft. of water. This was the home of Heenan, the ‘Benicia Boy’, and the forge-hammer he used is still kept here. — The train crosses the strait on the ‘Solano’, the largest ferry-boat in the world, 424 ft. long and accommodating a train of 24 passenger-coaches. —1836 M. Port Costa, on the S. side of the strait, also has large wharves from which wheat is shipped direct to Europe. — We now follow the S. shore of San Pablo Bay (views to the right). 1839 M. Vallejo Junction (‘Vallayho’), the starting-point of the ferry to Vallejo (see p. 487), on the opposite shore. Farther on we turn to the S. (left) and see the Bay of San Francisco (p. 486) to the W. (right), with Mt. Tamalpais (p. 487) rising beyond it. —1856 M. Berkeley, named in honour of Bishop Berkeley (p. 78), with the Colleges of Letters and Science of the University of California, situated among trees to the left.
The *University of California, founded in 1868, has played a very important part in the educational development of the Pacific Slope and will repay a visit. Its other departments are at San Francisco (see p. 484) and Mt. Hamilton (p. 492). The university is attended by about 3,200 students, two-thirds of whom are at Berkeley and a large proportion women. Tuition is free except in some of the professional departments. The total endowments of the university amount to upwards of $8,003,000. Some of the buildings at Berkeley are handsome, and the picturesque grounds, 250 acres in extent, command a splendid *View of the Golden Gate (p. 482) and San Francisco. The experimental grounds have been of great service to the farmers of California. The museums, the *Bacon Art Gallery, the library (70,000 vols.), and the laboratories also deserve attention. — The State Deaf and Dumb Asylum is also at Berkeley.

1861 M. Oakland (Juanita, $2-4; Metropole, from $2), the 'Brooklyn' of San Francisco, is a flourishing city of 48,682 inhab., pleasantly situated on the E. shore of the Bay of San Francisco. It derives its name from the number of live-oaks in its streets and gardens. The value of its manufactures in 1890 was $6,335,000. The steam-railways which traverse Oakland convey passengers free of charge within the city-limits.

Visitors to Oakland are recommended to take the cable-car to Blair Park, in order to enjoy the splendid *View of San Francisco, the Bay, and the Golden Gate from Inspiration Point (especially fine at sunset). — Other points of interest near Oakland are Lake Merritt (boating), Brush Peak (1740 ft.), Moraga Pass (1400 ft.), Alameda (p. 457), and San Leandro.

The San Francisco train skirts the W. side of Oakland and runs out into San Francisco Bay on a mole 1 1/2 M. long, at the end of which we leave the train and enter the comfortable and capacious ferry-boat which carries us across (4 M., in 20 min.) the bay. In crossing we see Goat, Alcatraz, and Angel islands to the right, with the Marin Peninsula beyond them and the Golden Gate opening to the left of Alcatraz.

1867 M. San Francisco, see p. 481.

90. From Chicago to Kansas City.

a. Via Atchison, Topeka, and Santa Fé Railway.

458 M. RAILWAY in 13-16 hrs. (fare $12.50; sleeper $2.50; tourist car $1). This line forms part of the through *Santa Fé Route from Chicago to California (comp. p. 462).

From Chicago (Dearborn Station) to (41 M.) Joliet this line follows practically the same route as that described at p. 323. — Beyond (54 M.) Blodgett we cross the Kankakee. 63 M. Coal City. — 94 M. Streator, a city of 11,414 inhab. and a railway-centre of some importance. At (100 M.) Ancona the line forks, the left branch running to St. Louis (p. 349). At (134 M.) Chillicothe (Rail. Restaurant) we cross the Illinois River and the Rock Island Railway (R. 50 c). — 182 M. Galesburg (Rail. Restaurant), an important railway-centre (comp. p. 440). — At (229 M.) Dallas we reach the Mississippi, which we cross at (236 M.) East Fort Madison. — 237 M. Fort Madison (Anthes, Montandon, Merchants, $2; Rail. Restaurant), on the W. 29*
bank of the Mississippi, in Iowa (p. 324), is a thriving little city with (1895) 10,022 inhabitants. The line bends to the S.W. and near (257 M.) Dumas crosses the Des Moines River and enters Missouri (p. 363). — 305 M. Hurrdland; 352 M. Marceline (Rail. Restaurant). From (416 M.) Lexington Junction a branch-line runs to St. Joseph (p. 453) and Atchison (p. 462). Our line now crosses the Missouri. 455 M. Grand Avenue (Kansas City).

458 M. Kansas City (730 ft.; Coates, $3-5; *Midland, from $3, R. from § 1; Brunswick, § 2-3; Victoria, from § 2½; Clifton, R. from § 1; Centropolis, § 2-2½; Brit. vice-consul, Mr. P. E. Burrough), the second city of Missouri, with (1890) 192,716 inhab., lies on the S. bank of the Missouri, just below the influx of the Kansas River. It had only 3500 inhab. in 1865, but is now an important industrial, commercial, and railway centre (value of manufactures in 1890, $32,700,000). Among the most prominent buildings are the Court House, the Board of Trade, the Custom House, the Grand Central Depot, the Winner Building, and several Banks and Insurance Offices. The Missouri is crossed here by three fine bridges; and there are three beautiful parks: Troost, Fairmount, and Washington.

On the opposite bank of the Missouri, at the mouth of the Kansas River, lies Kansas City or Wyandotte, Kansas (Ryus Ho., § 2-3; Garuo Ho., § 2), the largest city in Kansas, with 38,316 inhab. and the second-largest stockyards and packing-houses (Armour, etc.) in the country (value of products in 1890, $44,000,000).

From Kansas City to (485 M.) Dallas, (508 M.) Fort Worth, and (750 M.) Houston, Missouri, Kansas, and Texas Railway in 21-23 hrs., 23-24 hrs., and 32-34 hrs. This railway affords a direct route to points in Texas, but is of no great interest to the tourist. Its extreme N. terminus is Hannibal (p. 453), and passengers from St. Louis may join it at Sedalia (p. 455).

Beyond (161 M.) Chetopa we enter Indian Territory (see p. 462). 254 M. Muskogee is the seat of the U. S. Indian Agency for the Five Tribes (p. 462), of an Indian University, and of some Indian schools. At (412 M.) Denison, a railway-centre with 10,958 inhab., we enter Texas (p. 519). The line forks here, one branch running to (508 M.) Fort Worth (p. 524), the other to (485 M.) Dallas (p. 524). The latter is continued to (750 M.) Houston (see p. 522).

b. Via Chicago and Alton Railroad.

489 M. Railway in 15-19 hrs. (fares as above). Dining-cars.

From Chicago to (126 M.) Bloomington, see R. 56 b. The Kansas City line diverges to the right from that to St. Louis. — 171½ M. Mason City. — 216 M. Jacksonville (620 ft.; Dunlap Ho., Pacific, § 2-3½), a city of 12,935 inhab., with two flourishing colleges and several State asylums. — 237 M. Roodhouse, the junction of a line to Godfrey (p. 338). Beyond (243 M.) Drake we cross the Illinois River, and beyond (266 M.) Pleasant Hill we cross the Mississippi and enter Missouri (p. 363). — 302 M. Vandalia. Near (326 M.) Mexico (800 ft.), the junction of a line to Jefferson City (p. 454), is Florida, the birthplace of Mark Twain (Sam. Clements; b. 1835). Beyond (381 M.) Glasgow (630 ft.) we cross the Missouri. 434 M. Higginsville (645 ft.); 487 M. Grand Avenue (see above).

489 M. Kansas City, see above.
c. Via Wabash Railroad.

512 M. Railway in 22 hrs. (fares as above). Dining-cars.

From Chicago to (173 M.) Decatur, where our line diverges from that to St. Louis (p. 349), see R. 60 c. — The next important station is (213 M.) Springfield (see p. 338). 246 M. Jacksonville, see p. 452. At (267 M.) Naples we cross the Illinois River. Beyond (301 M.) Kinderhook we cross the Mississippi and reach (313 M.) Hannibal (470 ft.; Union Depot Hotel, $2-2\frac{1}{2}; Park, $2), in Missouri, an important river-port and railway-centre (comp. pp. 363, 452), with 12,857 inhab., a brisk trade in tobacco, timber, and farm-produce, and numerous manufactories. About 1 M. to the S. is the Hannibal Cave, immortalized in 'Tom Sawyer', which runs for miles under the bluffs and the Mississippi itself. — 383 M. Moberly (880 ft.; 8215 inhab.); 422 M. Brunswick (630 ft.). We now have a view of the Missouri to the left. 446 M. Carrollton; 470 M. Lexington Junction (p. 455). We skirt the N. bank of the Missouri and cross it at (510 M.) Harlem.

512 M. Kansas City, see p. 452.

d. Via Chicago, Rock Island, and Pacific Railway.

519 M. Railway in 16-21 hrs. (fares as above). Dining-cars (meals 75 c.).

From Chicago to (182 M.) Davenport, see R. 50 c. Our line here diverges to the left from the Omaha line and runs towards the S.W. 212 M. Muscatine (545 ft.), on the W. bank of the Mississippi, is a river-port of some importance (lumber, etc.; comp. p. 363). At (232 M.) Columbus Junction (585 ft.) we cross the Red Cedar River, and at (295 M.) Eldon we cross the Des Moines River. At (376 M.) Lineville we enter Missouri (p. 363). 451 M. Altamont, the junction of a line to St. Joseph (see below). At (465 M.) Cameron Junction we diverge to the left from the line to Leavenworth (p. 457) and Atchison (p. 462). 493 M. Kearney (635 ft.); 517 M. Harlem (see above).

519 M. Kansas City, see p. 452.

e. Via Chicago Great Western Railway.

597 M. Railway in 21-24 hrs. (fares as above). Dining-cars.

From Chicago to (240 M.) Oelwein, where we diverge to the left (S.) from the line to Minneapolis and St. Paul, see p. 324. 266 M. Waterloo (Irving; Logan, $2), a busy little town with 7000 inhab. and varied industries. 314 M. Marshalltown. — 372 M. Des Moines, see p. 440. — At (425 M.) Afton Junction we intersect the Burlington and Quincy Railroad. Beyond (463 M.) Blockton we enter Missouri (p. 363). 491 M. Conception, the junction of a line to Omaha (p. 438).

529 M. St. Joseph (Pacific House, $2-3; Bacon Ho., $2-2\frac{1}{2}), a city of 52,324 inhab., on the E. bank of the Missouri, is an important railway-centre and has immense stock-yards, numerous factories (value
of products in 1890, $11,400,000), and a large trade. The City Hall is a handsome building. — The train now descends on the E. bank of the Missouri. 548 M. Dearborn, the junction for Atchison (p. 452), on the other side of the river; 566 M. Leavenworth (p. 457).

597 M. Kansas City, see p. 452.

f. Via Burlington Route.

491 M. Chicago, Burlington, and Quincy Railroad in 16-24 hrs. (fares, etc., as above).

From Chicago to (163 M.) Galesburg, see R. 86 d. Our line now diverges from that to Omaha (p. 438) and runs towards the S. 193 M. Bushnell; 243 M. Camp Point.

265 M. Quincy (Newcomb, $2 1/2-3; Tremont Ho., $2-3), the third city of Illinois, with 31,494 inhab., lies on a high bluff on the E. bank of the Mississippi. It carries on a brisk trade, and its manufactures in 1890 were valued at $10,760,000. — 267 M. West Quincy, on the opposite bank of the river, is in Missouri (p. 363). We now follow the tracks of the Hannibal and St. Joseph Railroad. 282 M. Palmyra Junction, for the line to (15 M.) Hannibal (p. 453); 335 M. Macon; 395 M. Chillicothe (p. 451). At (436 M.) Cameron the line forks, one branch leading to St. Joseph (p. 453). Our line runs to the S. by the route described above.

491 M. Kansas City, see p. 452.

g. Via Chicago, Milwaukee, and St. Paul Railway.

530 M. Railway in 18-20 hrs. (fares, etc., as above).

From Chicago to (228 M.) Marion, see p. 438. Our line here diverges to the left (S.) from that to Omaha (p. 438). 234 M. Cedar Rapids (see p. 439); 288 M. Webster. At (324 M.) Ottumwa (p. 441) we cross the Des Moines River. Beyond (380 M.) Seward we enter Missouri (p. 363). 444 M. Chillicothe; 491 M. Lawson, the junction for St. Joseph (p. 453); 498 M. Excelsior Springs (The Elms, $3).

530 M. Kansas City, see p. 452.

91. From St. Louis to Kansas City and Denver.

1041 M. Missouri Pacific Railway to (283 M.) Kansas City in 7-10 hrs. (fare $7.50; sleeper $2); thence to (1041 M.) Denver in 27 hrs. (through-fare $25.65; sleeper $5.50).

Kansas City may also be reached from St. Louis by the Wabash R. R. (277 M.), the Chicago and Alton R. R. (323 M.), and the Chicago, Burlington, and Quincy R. R. (337 M.); while from Kansas City to Denver the tourist may also travel by the Atchison, Topeka, & Santa Fe Railway (752 M.), the Union Pacific Railway (639 M.; see R. 93 a), the Chicago, Rock Island, & Pacific Railway (633 M.), and the C. B. & Q. R. R. (634 M.). Over all these routes run through-cars for various large Western cities.

St. Louis, see p. 349. At (44 1/2 M.) Labadie (600 ft.) we reach the Missouri River, which flows to our right for the next 80 M. — 125 M. Jefferson City (625 ft.; Madison Ho., $2-2 1/2; Monroe Ho.,
SEDALIA. 91. Route. 455

$2; Rail. Restaurant), the capital of Missouri, is a prosperous place of 6,742 inhabitants. The State Capitol, built in 1858-60, was enlarged in 1887-88. — A little farther on we leave the river. 188 M. Sedalia (890 ft.; Sicher's Hotel, $2-2½; Kaiser, $2) is a busy industrial city of 14,068 inhabitants.

The line forks at Sedalia, the left branch leading to Kansas City via Pleasant Hill (see below), while the right branch runs via (56 M.) Lexington (735 ft.), a place of 1075 inhab., on the S. bank of the Missouri.

At (249 M.) Pleasant Hill the line forks again.

The left branch, which affords an alternative route to Pueblo and Denver (1064 M. from St. Loui), runs via Fort Scott, El Dorado, and Wichita (p. 462), joining the route described below at Geneseo (572 M. from St. Loui).

We follow the right branch. 273 M. Independence.
283 M. Kansas City, see p. 452.

Our line now runs towards the S., entering Kansas at (310 M.) Newington. At (341 M.) Ossawatomie (2662 inhab.; Rail. Restaurant), the Kansas home of John Brown (monument), we turn to the right (W.). 362 M. Ottawa (900 ft.; Centennial, $2), a summer resort with 6248 inhab.; 379 M. Lomax, the junction of a line to (39 M.) Topeka (p. 457); 397 M. Osage City (1075 ft.; 3469 inhab.); 435 M. Council Grove (1240 ft.; 2211 inhab.). — From (488 M.) Gypsum City (Rail. Restaurant) a loop-line runs to (17 M.) Salina (1225 ft.; 6149 inhab.) and back to (42 M.) Marquette (see below). — 531 M. Marquette (see above). At (550 M.) Genesee we are joined by the line mentioned above. We are now ascending the basin of the Arkansas River, which, however, flows far to the S. of the railway. At (584 M.) Hoisington we change from 'Central' to 'Mountain' time (1 hr. slower; see p. xviii). 641 M. Brownell; 707 M. Scott; 756 M. Horace. At (771 M.) Towner we enter Colorado (p. 458). Beyond (791 M.) Brandon we cross Big Sandy Creek. 846 M. Arlington; 901 M. Boone.

923 M. Pueblo, see p. 470. — Beyond Pueblo we follow the line of the Denver and Rio Grande R. R. (see R. 94a).
1041 M. Denver, see p. 458.

92. From St. Louis to Texarkana.

St. Louis, see p. 349. The line runs to the S. along the W. bank of the Mississippi as far as (26 M.) Riverside. It then leaves the river and runs to the S.W. through the great mineral district of E. Missouri. From (61 M.) Mineral Point (860 ft.) a branch-line runs to (4 M.) Potosi, with its numerous lead-mines. At (75 M.) Bismarck (1025 ft.; Rail. Restaurant) the railway forks, the left branch leading to Columbus (Ky.; p. 364), while the Texas line runs nearly due S.
About 6 M. farther on the famous Iron Mt. (1075 ft.) is seen to the left.

This is an irregular hill, consisting mainly of porphyry, intersected by numerous mineral veins and capped with a deposit of specular iron ore, 6-30 ft. thick and yielding nearly 70 per cent of pure iron. The amount of mineral already taken from this hill exceeds five million tons.

Pilot Knob (1015 ft.), seen on the same side, 6 M. farther on, also contains a wonderful bed of iron ore, 12-30 ft. thick. 88 M. Ironton (910 ft.) uses the fine magnetic ore of Shepherd Mt., which is free from phosphorus and sulphur. The line now passes through the charming Valley of Arcadia and then intersects the Ozark Mts. (fine views). 166 M. Poplar Bluff is the junction of a line to (71 M.) Bird's Point, opposite Cairo (p. 360). Beyond (181 M.) Neelyville (306 ft.) we enter Arkansas ('Bear State'; pron. 'Arkansaw'). At (198 M.) Knobel (270 ft.) the through-carriages to Memphis (p. 359) diverge to the left. 224 M. Walnut Ridge (Rail. Restaurant). At (262 M.) Newport (230 ft.) we cross the White River (p. 364). 288 M. Bald Knob, the junction of a line to (94 M.) Memphis (p. 359).

345 M. Little Rock (260 ft.; Capitol, $2½-4; Pratt, $2½; Gleason; Rail. Restaurant), the capital and largest city of Arkansas, with (1890) 25,874 Inhab., is well situated on the wide Arkansas River and carries on a large trade in cotton and other goods both by railway and steamer. It is regularly laid out, and many of its streets are pleasantly shaded by magnolias. The principal buildings include the State House, the U. S. Court House, the County Court House, the State Insane Asylum, the Deaf-Mute Institute, the School for the Blind, the Post Office, the Board of Trade Building, Little Rock University, and the Medical Department of Arkansas Industrial University. Railways radiate hence in all directions.

388 M. Malvern (280 ft.; Commercial, $2) is the junction of a branch-line to (25 M.) the famous Arkansas Hot Springs.

The town of Hot Springs, Arkansas (425 ft.; Eastman, about $3-5; Park, $3-6; Arlington, from $3; Avenue, Great Northern, $2-2½; Pullman, $2-3; Waukesha, $2½-3½; Grand View, E. P.; and many others), with (1890) 8066 inhab., is situated in a narrow gorge between Hot Springs Mt. and West Mt., in a spur of the Ozark Mts., and has become one of the most frequented health and pleasure resorts in America. The wide main street is flanked on one side with hotels and shops and on the other with a row of handsome bath-houses. The Springs, of which there are upwards of 70, rise on the W. slope of Hot Springs Mt., above the town, vary in temperature from 76° to 158° Fahr., and discharge daily about 500,000 gallons of clear, tasteless, and odourless water. They are used both internally and externally, and are beneficial in rheumatism, gout, neuralgia, and afflictions of the skin and urinary organs. They contain a little silica and carbonate of lime; but the efficacy of the water is ascribed mainly to its heat and purity. The price for a single bath is 15-40 c., for 21 baths $3½-8. The ground on which the springs rise is the property of the U. S. Government, and a large Army and Navy Hospital has been erected here for the use of officers, soldiers, and sailors. Among the numerous pleasant points for walks, rides, and drives in the vicinity of the Hot Springs are the Valley of the Ouachita, Guipha Gorge, Hell's Half Acre, Happy Hollow, Ball Bayou, Crystal Mt., and Whittington's Peak. There are several other mineral springs within easy reach, the chief of which are Gillen's White Sulphur...
Springs, Potash Sulphur Springs, and Mountain Valley Springs, each with a hotel. Good shooting and fishing are also obtainable.

409 M. Daleville; 426 M. Gurdon; 457 M. Hope (360 ft.).

490 M. Texarkana (300 ft.; Benfield, Cosmopolitan, $2), a town with 6380 inhab., on the border of Texas and Arkansas, is an important railway-junction, from which connection can easily be made for all important points in Texas, via the Texas and Pacific and other railways (comp. p. 524).

93. From Kansas City to San Francisco.

a. Via Union Pacific Railway System.

Kansas City, see p. 452. The train at first follows the Kansas River towards the W. (views to the left). — 39 M. Lawrence (760 ft.; Eldridge Ho., $2-2½), a pleasant little commercial city of 9997 inhab., situated on both banks of the Kansas River, is the seat of the State University (1000 students) and also contains the Haskell Institute, a government training-school for Indians (400 boys and 150 girls). We are here joined by the line from (34 M.) Leavenworth (see below).

Leavenworth (760 ft.; National, $2-2½, R. from $1; Imperial, $2), on the W. bank of the Missouri, is a busy industrial and commercial city with 19,768 inhabitants. A colossal bronze statue of Gen. U. S. Grant was erected here in 1889. To the N. is Fort Leavenworth, an important military post.

We now traverse the great prairies of Kansas, an excellent farming and grazing country. — 67 M. Topeka (820 ft.; Throop, well spoken of, $2-3; Copeland, $2-3; National, $2; Depot Hotel; Rail. Restaurant), the capital of Kansas, is a flourishing city of 31,007 inhab., also situated on both sides of the Kansas River. The chief buildings include the State Capitol, the Post Office and Custom House, the State Insane Asylum, the Reform School, the Free Library (15,000 vols.), Grace Church Cathedral, Washburn College, and Bethany College. Topeka has large mills (value of products in 1890, $7,000,000) and a brisk trade. — 104 M. Wamego (930 ft.). We cross the Blue River. — 118 M. Manhattan (960 ft.), with the State Agricultural College. — 135 M. Fort Riley, an army post with an important military school. The Ogden Monument marks the geographical centre of the United States (excl. Alaska). — 139 M. Junction City (1020 ft.), for a line to Clay Centre and Belleville, etc. The Smoky Hill River now flows to the left. — 163 M. Abilene (1095 ft.; Rail. Restaurant). Large crops of wheat and other grains are raised here. — 186 M. Salina (p. 455). We now cross the river. 223 M. Ellisworth (1470 ft.); 289 M. Hays, with Fort Hays. At (303 M.) Ellis (2055 ft.; Rail. Restaurant) we change to 'Mountain' time (p. xviii). 377 M. Oakley (2980 ft.); 420 M. Wallace (3285 ft.; Rail. Restaurant). We now begin to pass from an agricultural to a grazing district, where the
useful ‘bunch-grass’ of the W. affords food, both summer and win-
ter, to millions of cattle. Beyond (452 M.) Arapahoe we enter Col-
orado (the ‘Silver State’). 462 M. Cheyenne Wells (4260 ft.; Rail. Re-

era) — At (473 M.) First View we obtain the first view of the

Rocky Mts., still about 170 M. distant. Pike’s Peak (p. 470) is con-
spicuous, nearly due W. — Beyond (487 M.) Kit Carson (4275 ft.),
named after a well-known trapper, we follow the Big Sandy Creek
(left) towards the N.W. 535 M. Hugo (5025 ft.), on the middle fork
of the Republican River. At (550 M.) Limon we cross the Rock Is-
land Railway. 563 M. Cedar Point (5695 ft.) is the highest point on
this part of the line. 618 M. Watkins (5515 ft.).

639 M. Denver. — Hotels. Brown Palace (Pl. a; C, 3), $3-5, R.
from $1 1/2; Metropole (Pl. b; C, D, 3), rooms only, from $1 1/2; Wind-
sor (Pl. c; C, 2), $2-3 1/2; Albany (Pl. d; C, 3), $2 3/5, R. $3-2; St. James
(Pl. e; C, 3); Broadway; Colfax, $2 3; Albert; Imperial (Pl. f; C, 3, 4),
$2-4; Oxford (Pl. g; B, 2); American Ho. (Pl. h; B, 2), $2.

British Vice-Consul, Mr. Richard Pearce.

Denver (5270 ft.), the capital and largest city of Colorado, lies on
the S. bank of the South Platte River, about 15 M. from the E. base
of the Rocky Mts., of which it commands a superb view. Denver,
the ‘Queen City of the Plains’, was founded in 1858 and is a striking
example of the marvellous growth of western cities, reaching a
total of 35,630 inhab. in 1880 and no fewer than 126,713 in 1890
(in 1898 estimated at 165,000). Many of its buildings are large,
handsome, and substantial, and the private residences and gardens
are often very tasteful. The business-streets are paved with asphalt.
It owes its prosperity to its position in the heart of a rich mining
district and as the centre of numerous important railways (comp.
pp. 467, 455, etc.); while in 1890 its manufactures, including cotton
and woollen goods, flour, machinery, and carriages, were valued at
$30,500,000 ($43,450,000 in 1897).

The Union Depot (Pl. B, 2) lies at the foot of Seventeenth Street,
one of the chief business-thoroughfares, and tramways start here for
all parts of the city. The traveller is recommended to ascend 17th St.
and 17th Ave. by cable car to the City Park (Pl. F, 2, 3; 320 acres)
and then to walk across to Colfax or 15th Ave. and return by it. On
the way out we pass the new Equitable Building (Pl. 4, C 3; cor. of
Stout St.), the top of which affords a superb View.

The Rocky Mts. are seen to the W. in an unbroken line of about
170 M., extending from beyond Long’s Peak (p. 460) on the N. to Pike’s
Peak (p. 470) on the S. Among the loftiest of the intervening summits
are Gray’s Peak (p. 460) and Mts. Torrey (14,335 ft.) and Evans (14,335 ft.).
The bird’s-eye view of the city at our feet includes the State Capitol
(p. 459) and the fine residences of Capitol Hill to the E.

At the corner of 17th St. and Glenarm St. is the Denver Club
(Pl. C, 3), and at the corner of Sherman Ave. are the University
Club (r.) and the Central Presbyterian Church (l.; Pl. D, 3). — In re-
turning through Colfax (or 15th) Ave. we pass the State Capitol
(Pl. D, 4), erected at a cost of $2,500,000. The County Court
House (Pl. C, 3) occupies the block bounded by Court Place and 15th, 16th, and Tremont Sts. — The Custom House and Post Office (Pl. C, 3), 16th St., is another imposing building. — A visit may also be paid to the U. S. Mint (Pl. C, 4), cor. of Colfax Ave. and Evans St.

The other important buildings of the city include the *Denver High School (Pl. C, 2, 3), Stout St., betw. 19th and 20th Sts.; the City Hall (Pl. B, 3), cor. 14th and Larimer Sts.; the Mining Exchange (Pl. C, 3); the Chamber of Commerce (Pl. 3, B 3; with the Mercantile Library); the Baptist College (Montclair); the Tabor Opera House Block (Pl. 5; C, 3); the Broadway Theatre (Pl. 1; C, D, 3); the Bijou (Curtis St.); the Denver Athletic Club (600 members); Trinity Church (Pl. C, D, 3), Broadway and 18th St.; St. Mary's Cathedral (R. C.; Stout St., between 15th and 16th Sts.); St. John's Cathedral (Epis.; Pl. C, D, 3), at the head of Broadway; the Westminster University of Colorado; Jarvis Hall (Episcopal); and the Jesuit College of the Sacred Heart (College Ave., cor. of Homer Ave.). — The Art Museum, in Montclair (see below), contains a collection of paintings and other objects of art.

A visit should also be paid to one of the great Smelting Works of Denver, among which may be mentioned the Colorado & Boston (at Argo, see below), the Omaha & Grant (Larimer St.), and the Globe, all to the N. of the city. The value of the ores reduced here in 1897 amounted to $18,000,000.

A good idea of Denver's suburban growth is obtained by taking the electric tramway at the end of the 17th Ave. cable-line and going to the E. over Capitol Hill (fine residences) and through Montclair to Aurora. — Visits may also be paid by electric or cable cars to Elish's Zoological Garden (adm. 25 c.), Berkeley Lake and Park, and Sloan Lake.

Denver is a good centre for numerous fine excursions, a few of which are enumerated below. Comp. also p. 469 (Colorado Springs), p. 487 (Denver & Rio Grande R. R.), and p. 455.

From Denver to Golden, Central City, and Graymont, 58 M., Union Pacific, Denver & Gulf Railway (narrow-gauge) in 4 hrs. Observation-cars are attached to the trains. — Beyond (2 M.) Argo (5215 ft.) and (3 M.) Argo Junction we have a good retrospect of Denver, with Pike's Peak (p. 470) in the distance. To the E. is the Platte River, to the W. rise the Rocky Mts. Farther on we descend into the Clear Creek Valley. At (8 M.) Arvada we turn to the W. — 16 M. Golden (5655 ft.; Babcock Ho., $2), at the base of the Table Mts., is a busy little industrial and mining city, with 2353 inhabitants. We now ascend the picturesque *Clear Creek Canyon, where the cliffs are sometimes 1000 ft. high. 24 M. Elkh Creek. — 29 M. Forks Creek (6830 ft.; Rail. Rest.), at the confluence of the N. and S. branches of Clear Creek, is the junction of the line to Central City (p. 460). — The Graymont train follows the South Clear. 37 M. Idaho Springs (7840 ft.; Beebe, $2½-3), in the midst of a gold and silver mining district, is frequented for its hot and cold mineral springs (large baths). An excursion may be made to (13 M.) *Chicago Lakes (11,000 ft.). — We continue to ascend rapidly.

50 M. Georgetown (8475 ft.; Hôt. de Paris, $3), a silver-mining town with 1927 inhab., is also frequented as a summer-resort on account of its pure air and beautiful environment. Excursions may be made to (3 M.) Green Lake (10,400 ft.; hotel), Clear Lake (3½ M.), Elkh Lake (6 M.), etc. Four-horse coaches run thrice weekly from Georgetown, through the *Berthoud Pass, to (56 M.) Grand Lake hotel, and (47 M.) Hot Sulphur Springs
(Kinney Ho., $2), in Middle Park, the second of the great Natural Parks of Colorado mentioned at p. 443. Middle Park, the only one on the W. side of the ‘Continental Divide’, has a mean elevation of about 7500 ft. and an area of 3'000 sq. M. It is a fine resort for sportsmen in search of big game. The baths of Hot Sulphur Springs are efficacious in rheumatism, neuralgia, and cutaneous affections.

Above Georgetown the train threads the Devil’s Gate and climbs up the mountains by means of the famous *Loop, where it bends back on itself and crosses the track just traversed by a lofty bridge. A little higher up it makes two other sweeping curves, which nearly bring it back upon itself. 54 M. Silver Plume (9175 ft.). — 58 M. Graymont (9770 ft.; Gray’s Peak Hotel), the terminus of the line, lies at the foot of *Gray’s Peak (14,440 ft.), one of the loftiest of the Rocky Mts., which is easily ascended hence on horseback in 3-4 hrs. (return-tickets issued by the Railway Co. at Denver, incl. horse and guide to the top). The *View is superb, including in clear weather Long’s Peak (see below) and Pike’s Peak (p. 470). Adjacent is Torrey’s Peak (14,335 ft.), which may also be ascended.

The line from Forks Creek to Central City (see p. 459) ascends the North Clear Creek, passing numerous quartz mines. Beyond (36 M. from Denver) Black Hawk (6630 ft.) it overcomes the heavy gradient by long ‘switchback’ curves. From Black Hawk the Gilpin County Tramway (gauge 2 ft.), for the conveyance of ore, ascends rapidly to the California Mine (9480 ft.). — 40 M. Central City (8500 ft.; Teller, § 2/3), a busy little mining city, with 2450 inhabitants. An ascent may be made of James Peak (13,280 ft.; *View), and a pleasant walk or ride may be taken to (6 M.) Idaho Springs (see p. 459) via Bellevue Hill (fine view of the Front Range.)

From Denver to Boulder and Fort Collins. 74 M., Union Pacific, Denver, & Gulf Railway in 2½-3 hrs. Beyond (3 M.) Argo Junction (see p. 458) the train runs to the N. to (30 M.) Boulder (5835 ft.; Brainard, § 2; Bowen, § 3), a small mining city and the site of the University of Colorado (600 students), at the mouth of *Boulder Cañon, which may be visited by carriage (to the Falls, 9 M., and back, § 5). A branch-line runs from Boulder to (13 M.) Sunset (7695 ft.). — Beyond Boulder our line ascends to (44 M.) Longmont (4935 ft.) and (61 M.) Loveland (1970 ft.; Loveland Ho., § 2). From the latter a stage-coach runs to (24 M.) Estes Park (6210 ft.; Estes Park Hotel, § 2½; boarders taken at James’s and other ranches), a smaller edition of the Great Natural Parks. [Estes Park is, perhaps, best reached from Denver by the Burlington & Missouri River R. R. to Longmont (see above) and (48 M.) Lyons, whence stages run to (20 M.) the Hotel.] Long’s Peak (Long’s Peak Ho., § 2; 14,270 ft.) rises on the S. side of the park and may be ascended from the hotel in 4-6 hrs. (guide necessary; fatiguing); the *View includes a large section of the Rocky Mts. For the ascents of other mountains round Estes Park, see F. H. Chapin’s ‘Mountaineering in Colorado.’ Near the hotel is the cottage of the Earl of Dunraven, a member of a company that owns much of the park. — Beyond Loveland the train runs on to (74 M.) Fort Collins (4970 ft.; views), connected by railway with (25 M.) Greeley (p. 462) and with Colorado Junction.

From Denver to Leadville. 151 M., Denver, Leadville, & Gunnison Railway in 9½ hrs. — The line runs to the S., crossing the Platte River. 8 M. Sheridan (5285 ft.), with Fort Logan. About 12 M. farther on we reach the *Platte Cañon (5490 ft.) and begin to ascend rapidly. 29 M. South Platte (6035 ft.); 32 M. Dome Rock (6200 ft.); 42 M. Pine Grove (6740 ft.). The gorge contracts. 52 M. Estabrook (7550 ft.), a summer-resort; 69 M. Weisker (9890 ft.). The line curves nearly back upon itself as we approach the summit at (76 M.) Kenosha (9970 ft.). As we begin to descend we have a fine *View of South Park (p. 461). — At (58 M.) Como (9775 ft.; Rail. Restaurant) the Leadville line diverges to the right from that to Gunnison (see p. 461). We now again ascend rapidly, passing several old placer-workings. 94 M. Halfway (10,590 ft.). At (39 M.) Boreas (11,470 ft.), at the summit of the Breckenridge Pass, we reach the culminating point of the line, on the Continental watershed of the Rocky Mts. The descent is abrupt and tortuous. 110 M. Breckenridge (9525 ft.; Denver Hotel, § 2½-3), on the Blue
River, with Prof. Carter's interesting museum of Colorado animals. To
the W. and S.W. rise Mt. Fletcher, Quandary, Buckskin, and other peaks;
to the N., Mt. Gray, Torrey, and Powell. Gold-mining is actively carried
on all along this part of the route. — Beyond Breckenridge the train
descends to the N., along the Blue River. 116 M. Dickey (8850 ft.) is the
junction of a branch-line to (7 M.) Keystone. Farther on we bend to the
left and pass through the Ten Mile Cañon. 135 M. Robinson (10,820 ft.), in
a rich mining district. To the left towers Mt. Fletcher (14,285 ft.). To the
N.W. rises the famous Mt. of the Holy Cross (14,175 ft.), so called from
the cruciform appearance presented by two snow-filled ravines which
cross each other at right angles (best seen from a point on the road to the
W. of Robinson). — At (137 M.) Climax (11,290 ft.) we reach the top of Fre-
mont's Pass and begin to descend. 144 M. Bird's Eye (10,635 ft.). — 151 M.
Leadville (10,185 ft.), see p. 477. Leadville is also reached from Denver

From Denver to Gunnison, 202 M., Denver, Leadville, & Gunnison
Railway in 20 hrs. — From Denver to (80 M.) Como, see p. 460. Our line
continues to run towards the S.W., through South Park, surrounding or
flanking the rocky spurs sent out by the loftier mountains. 105 M. Garos
(9170 ft.) is the junction of a branch-line to (10 M.) Fairplay (8885 ft.)
and (16 M.) Alma (10,230 ft.), both near the centre of South Park (see
below). — The valley widens. 114 M. Platte River (7935 ft.). From (120 M.)
Bath or Hill Top (6460 ft.) we obtain a view of the Sawatch or Saguache
Range, separating the Gunnison and San Juan country from the valley of
the Arkansas and culminating in Mt. Blanca (14,465 ft.), the highest of the
Rockies. We descend rapidly, 127 M. McGee's (6650 ft.). — 133 M. Schwangers
(7815 ft.) is the junction of a line to (4 M.) Buena Vista (7945 ft.). About
8-10 M. to the W. of Buena Vista are the three 'Collegiate' peaks of the
Saguache Range: Mt. Yale (14,185 ft.), Princeton (14,190 ft.), and Harvard
(14,375 ft.). Their bases are Cottenwood Hot Springs (6 M. from Buena Vista;
142 M. Mt Princeton Hot Springs (8170 ft.; hotel, well spoken of; mountain
to the right); 149 M Alpine (9245 ft.); 153 M. St. Elmo (10,040 ft.). About
6 M. beyond (153 M.) Romley (11,920 ft.) we reach the Alpine Tunnel
(11,660 ft.), 590 yds. long, one of the highest pieces of railway in the world.
We cross the Continental Divide in the middle of the tunnel and begin to
descend towards the Pacific. The View on emerging from the tunnel in-
cludes the San Juan Mts. (150 M. to the S.W.), the Uncompahgre Range
(p. 475), the valley of the Gunnison, the Elk Mts. (right), and (in the fore-
ground) Mt. Gothic and Crested Butte. The line runs along a narrow ledge,
with perpendicular rocky walls on the one side and the deep valley on
the other. The descent is very abrupt. 175 M. Pitkin (9180 ft.); 190 M. Parkin's
(7910 ft.). — 202 M. Gunnison (7650 ft.), see p. 474. For other routes to the
Gunnison district, comp. p. 474.

['South Park' (see above), separated from Middle Park (p. 460) by a
range of lofty mountains, has a mean elevation of about 9000 ft. and an
area of 2000 sq. M. Its climate is milder than that of the Parks to the
N., and the railways make it more accessible. Numerous excursions may
be made from Fairplay (see above), one of the finest of which is the ascent of
Mt. Lincoln (14,295 ft.), easily accomplished (carriages available
nearly to the top). The mountain-view is very grand and extensive. The
beautiful Twin Lakes (9350 ft.), at the E. base of the Saguache Range, are
most easily reached from Granite (p. 474).]

One of the finest excursions that can be made from Denver is that
arranged by the Denver & Rio Grande Railroad under the name of Around
the Circle, or 1000 M. Through the Rocky Mts. (fare $28; tickets
available for 60 days). On this round we cross and recross the Great
Divide, thread four wonderful canyons, surmount four mountain-passes (one
by coach), reach a height of 11,000 ft., and pass through some of the finest
scenery in America. The round may be accomplished in 4 days, with
halts for the night at Durango, Silverton, and Ouray; but it is better to
spend a much longer time on it and make various side-trips. — The
different sections of this circular tour are described elsewhere. From Denver to Colorado Springs, Pueblo, and (170 M.) Cuchara Junction, see R. 94 a; from Cuchara Junction to Durango, Silverton, and (35 M.) Ironon, see p. 471; from Ironon to (8 M.) Ouray (stage), see p. 472; from Ouray to (35 M.) Montrose and back to (353 M.) Denver, see pp. 475-476.

From Denver to La Junta, 131 M., Atchison, Topeka, and Santa Fe R. R. in 6-7 hrs. Through-carriages run by this route to Kansas City, to Chicago, and to Californian and Mexican points. — From Denver to (117 M.) Pueblo this line runs parallel with the Denver & Rio Grande Railway (see R. 94 a), passes the same stations, and enjoys the same scenery. — Beyond Pueblo it strikes off towards the S.E. — 181 M. La Junta, see p. 463.

At Denver the San Francisco line turns sharply to the right and runs to the N., along the S. Platte River and parallel with the Rocky Mts., 30-40 M. to the W. (fine views to the left). — From (658 M.) Brighton (4970 ft.) a branch-line runs to Boulder (see p. 460). — 686 M. La Salle (4665 ft.), the junction of a line to Julesburg (p. 442); 691 M. Greeley (4635 ft.); Oasis Hotel, a thriving town of 2395 inhab., on the Cache la Poudre River (line to Fort Collins, see p. 460). Considerable quantities of 'alfalfa' or 'lucerne' (a kind of clover) and other crops are grown all along this line on land which is perfectly barren without irrigation.

746 M. Cheyenne (6050 ft.), and thence to — 2094 M. San Francisco, see p. 442.

b. Viâ Atchison, Topeka, and Santa Fé Railway.

2118 M. Atchison, Topeka, & Santa Fé Railway to (918 M.) Albuquerque in 331/2 hrs.; Santa Fé Pacific R. R. thence to (818 M.) Mojave in 31 hrs.; Southern Pacific R. R. thence to (382 M.) San Francisco in 15 hrs. (791/2 hrs. in all; fare $5.50, sleeper $8.13). Through-carriages run from Chicago to San Francisco by this route (2377 M.) in 91 hrs. (fare $62.50; sleeper $15.50). A large part of the district traversed is semi-arid, but some points of considerable interest are passed (see below), while the wonderful "Grand Canyon of the Colorado is most easily reached from Flagstaff (p. 465).

Kansas City, see p. 452. The line runs to the W., along the S. side of the Kansas River, and ascends steadily. At (13 M.) Sunday (760 ft.) we are joined by the branch from Leavenworth (p. 457). 40 M. Lawrence (p. 457). At (67 M.) Topeka (885 ft.; see p. 457) we are joined by the branch from Atchison (p. 452). We now pass through a prosperous district with many small towns. 93 M. Burlington (1040 ft.); 184 M. Peabody (1350 ft.). — 201 M. Newton (1440 ft.) is the junction of a line running S. to Galveston.

From Newton to Galveston, 750 M., railway in 30 hrs. — Among the most important intermediate stations are (27 M.) Wichita (23,853 inhab.; Carey Hotel, $2-3); 43 M. Mulvane; 65 M. Winfield (5184 inhab.; St. James, $2); 79 M. Arkansas City (1065 ft.; Rail. Restaurant), a flourishing place with 8347 inhabitants. We now cross the Arkansas River and enter Indian Territory, a tract of about 21,000 sq. M., set apart for the Indian tribes to the E. of the Mississippi. The chief civilised tribes located here are the Choctaws, Chickasaws, Seminoles, Creeks, and Choctaws, and these 'Five Nations' enjoy a considerable measure of Home Rule and meet occasionally in an International Council. Most of the Indians in the Territory are engaged in farming, and, when uninterfered with by whites of a low class, are promising and progressive. The Territory contains 220 schools, supported mainly by the tribes named above, and there are numerous churches, public buildings, etc. In 1890 the population was 186,390, including 177,682 members.
of the five civilised tribes and 8708 Reservation Indians. — The famous 'Cherokee Strip' extends from Arkansas City to Wharton. To the right is the reservation of the Nez Perce.

Beyond (136 M.) Wharton we enter the Oklahoma Territory (the 'Boomers' Paradise'), formerly part of Indian Territory, but purchased from the Creeks in 1889 and opened to white settlers. It has an area of 39,034 sq. M. and a population of 61,701 whites and 36-9 Indians. The rush across the border as soon as the new territory was opened has become historical, tent towns with thousands of inhabitants springing up in a single day (see 'The West from a Car Window', by Richard Harding Davis). The greater part of Oklahoma is still occupied by tribes of uncivilised Indians. — 165 M. Guthrie (530 ft.; Hotel), the capital of Oklahoma, is a busy little place (2768 inhab. in 1890, prob. 6000 now). 199 M. Oklahoma (4151 inhab.). Near (232 M.) Purcell we cross the Canadian River. We now pass through the lands of the Chickasaw Nation, crossing the Washita two or three times. 208 M. Washita. Beyond (325 M.) Thackerville we cross the Red River and enter Texas (p. 519). 339 M. Gainesville; 405 M. Fort Worth (see p. 524); 432 M. Cleburne (Rail. Restaurant), the junction of a line to Dallas (p. 524). From (496 M.) McGregor a line runs to (20 M.) Waco ('Geyser City'; McClellan Ho.), with 14,000 inhab., warm Artesian wells, and a large natatorium. 534 M. Temple Junction (Rail. Restaurant); 576 M. Milano, the junction of a line to Austin (p. 521); 608 M. Somerville; 684 M. Rosenberg Junction; 721 M. Austin. — 780 M. Galveston, see p. 522.

211 M. Halstead (1385 ft.); 236 M. Hutchinson (1525 ft.). We now follow the general course of the Arkansas River (left), passing through a good agricultural and cattle-raising district. 276 M. Elginwood (1780 ft.); 333 M. Kinsley (2160 ft.). At (369 M.) Dodge City (2475 ft.; 1763 inhab.) we change from 'Central' to 'Mountain' time (1 hr. slower; comp. p. xviii). 469 M. Garden City (2825 ft.). — Beyond (485 M.) Coolidge (3360 ft.) we enter Colorado (p. 458). 519 M. Lamar (3600 ft.). Farther on the Rocky Mts. begin to come into sight in front, to the right. — 571 M. La Junta (pron. 'La Hoonta'; 4060 ft.), a place of 1439 inhab., is the junction of the line from Denver described at p. 462. Pike's Peak (p. 470) is seen to the right. Our line runs towards the S.W. 599 M. Iron Springs (4675 ft.). — 652 M. Trinidad (5995 ft.; Southern, $ 3-3½), the industrial and commercial centre of S.E. Colorado, is a thriving city of 5523 inhab., in which the characteristics of old Mexico and young America are inextricably mixed (comp. p. 471).

At (663 M.) Morley (6745 ft.) we begin to ascend the Raton Mts., which form a conspicuous feature in the views from Trinidad. The gradient is steep. Fine views, especially of the Spanish Peaks (p. 471; right). At the top of the pass (7620 ft.) we pass through a long tunnel and enter New Mexico (p. 471). The descent is also rapid. 686 M. Raton (6620 ft.). The line runs through the central valley of New Mexico, about 20 M. wide, which is traversed by the Rio Grande del Norte and several other streams, and flanked by mountains 6000-10,000 ft. high. Agriculture is carried on in the side-valleys and plains by careful irrigation, but the greater part of the Territory is better adapted for grazing. — 742 M. Wagon Mound. — From (786 M.) Las Vegas (6380 ft.; Harvey Ho., $ 3; Plaza), an important wool-market with 2385 inhab., on a fork of the Pecos River, a branch-line runs to (6 M.) Las Vegas Hot Springs.
Las Vegas Hot Springs (6770 ft.; *Montezuma Hotel, $3½-6; Mountain Ho., $2-2½; about 40 in number, lie on the S.E. slope of the Santa Fé range of the Rocky Mts. and vary in temperature from 75° to 140° Fahr. The water resembles that of the Arkansas Hot Springs (p. 456) and has similar results. It is used both for bathing and drinking. Mud-baths, similar to those of Carlsbad, are also used. Many fine excursions can be made in the vicinity. The mean annual temperature is 59° Fahr. (summer 73°).

Near (830 M.) Rowe we see the curious old Pecos Church (right), a relic of a Franciscan mission, dating from early in the 17th cent. and abandoned in 1840. Farther on we cross another ridge by the Glorieta Pass (7535 ft.) and descend to (551 M.) Lamy Junction (6460 ft.; hotel), where the line to (18 M.) Santa Fé diverges to the right.

Santa Fé (7040 ft.; Palace Hotel, $4; Clare, $3-3½), the capital of New Mexico, is, next to St. Augustine (p. 401), the most ancient town in the United States, having been founded by the Spaniards in 1605, while the site was occupied long before this by a village of the Pueblo Indians (p. lxv). It is in many ways a most quaint and interesting place, with its narrow streets, adobe houses, and curious mingling of American, Mexican, and Indian types. It lies in the centre of an important mining district and carries on a considerable trade. Pop. (1890) 6185. The focus of interest is the Plaza, or public square, with a Soldiers' Monument. On one side extends the Governor's Palace, a low long structure of adobe, which has been the abode of the Spanish, Mexican, and American governors for nearly 300 years. It harbours the Museum of the New Mexico Historical Society, containing old Spanish paintings, historical relics, and Indian curiosities. The Cathedral of San Francisco, a large stone building with two towers, incorporates parts of the old cathedral, dating from 1622. The Church of San Miguel, originally built about the middle of the 17th cent., was destroyed by Indians in 1680 and restored in 1740. Other points of interest are the new (now abandoned) and the old Fort Marcy, San Miguel College, and the Ramona Industrial School for Indian Children. Among the chief modern structures are the State Capitol and the Federal Building.

A visit should be paid to the makers of Mexican silver filigree-work, whose shops are mainly in or near the Plaza. Gen. Lew Wallace wrote 'Ben-Hur' in the Palace, while Governor of New Mexico (1879-80). — About 9 M. to the N.W. of Santa Fé is the interesting pueblo of the Tesuque Indians, who visit the city daily, bringing firewood on their 'burros' (donkeys). From Santa Fé to Española and Antonio, see p. 471.

Near (882 M.) Thornton (5245 ft.), on the Rio Grande, are the pueblos of Santo Domingo (grand festival on Aug. 4th) and San Felipe. We now follow the bank of the large and rapid Rio Grande.

918 M. Albuquerque (4930 ft.; San Felipe Hotel, $3; European, $2½-3), with 5518 inhab. and a brisk trade in wool and hides. This is the E. terminus of the Santa Fé Pacific R. R. and the connecting-point with the Santa Fé line to El Paso and Mexico, though the actual point of divergence is 13 M. farther on (see below).

From Albuquerque to El Paso, 254 M., railway in 9-10 hrs. Through-sleepers run via this route from Kansas City to El Paso, connecting with the Mexican Central Railway (comp. p. 519). — We diverge from the line to California at (13 M.) Isleta Junction (see below) and run towards the S. 30 M. Belen (4785 ft.). The mesquite (Prosopis juliflora) now begins to appear. 75 M. Socorro; 86 M. San Antonio; 102 M. San Marcial (Rail. Restaurant); 141 M. Espanola. 177 M. Rincon (4015 ft.; Rail. Restaurant) is the junction of a line to Deming (p. 519). 210 M. Las Cruces. — 254 M. El Paso, see p. 519.

We now follow the Santa Fé Pacific R. R., from which the line to El Paso diverges to the left at (1390 M.) Isleta (see above),
leave the Rio Grande, and run towards the W. through a semi-arid and monotonous country, which, however, makes some response to irrigation. The curious-looking Yucca is now seen; this and the Artemisia are often the only vegetation in the desert, though the foothills are dotted with groves of piñon and cedar. At (985 M.) Laguna (5765 ft.) the railway runs through an Indian pueblo, the houses of which are built in terraces two and three stories high.

Visitors to this pueblo find accommodation in the house of one or other of the four or five white families here. The Indians, some of whom have been educated at Carlisle (p. 256) and speak good English, welcome visitors and offer hand-made pottery for sale. Their houses are of stone, plastered with adobé, and some of them are entered, with the aid of ladders, through the roofs. The Roman Catholic adobé church is nearly two centuries old. — About 16 M. to the S.W. of Laguna lies Acoma, another interesting pueblo, discovered by Coronado in 1540 (carr. there and back $5, for $ or more pers. $2 each; blankets and light camp-outfit desirable).

Between Laguna and Acoma, 3 M. to the E. of the latter, rising precipitously 430 ft. above the valley, is the so-called Mesa Encantada, or ‘Enchanted Table-land’ (inaccessible except by ladders and ropes). This was scaled by F. W. Hodge in 1897 and found to bear evidence of former aboriginal occupancy, thus verifying a tradition of the Acomas that their ancestors lived on the height but were forced to abandon their village after a storm had destroyed the only trail and caused those left on the summit to perish.

Beyond Laguna Mt. Taylor or San Mateo (11,388 ft.), the loftiest mountain in New Mexico, is seen to the N. (left). Between (1002 M.) McCarty’s and (1016 M.) Grant’s the railway follows a stupendous flow of black lava. About 30 M. farther on we pass the Continental Divide (7300 ft.), but there is nothing in the surroundings to suggest that we have reached so high an elevation or are passing from the Atlantic to the Pacific slope. 1055 M. Dewey; 1065 M. Wingate (6715 ft.), 3 M. from Fort Wingate. — 1077 M. Gallup (6450 ft.; Rail. Restaurant), with large coal-mines, is the supply station for Fort Defiance (stage $2 1/2) and the Agency of the great Navajo (‘Náhva’ho) Indian Reservation, which lies at some distance to the N. of the line. Indians may be seen at the railway-stations, selling fine Navajo blankets, silver-work, and other home-made articles.

Gallup is also the usual starting-point for a visit to the famous pueblo of Zuñi, which lies about 40 M. to the S. (carr. there and back $10, 2-4 pers. $15).

Beyond (1093 M.) Manuelito (6230 ft.) we enter the Territory of Arizona (the ‘Sunset Land’). — 1132 M. Navajo Springs. — From (1152 M.) Adamana a visit may be paid to the extraordinary Petrified or Chalcedony Forests of Arizona, which lie about 7 M. to the S. (carr. there and back $3, for two or more pers. $2 1/2 each). These forests are also visited from (1172 M.) Holbrook (5050 ft.), a drive of 28 M. (round trip $5, 2-3 pers. $6, 4-5 pers. $8). The seven Moki or Hopi Villages, the ancient ‘Province of Tusayan’, are also visited from Holbrook; the famous ‘Snake Dances’ occur in the latter half of August. — 1204 M. Winslow (4825 ft.; Rail. Restaurant). Farther on we cross a bridge, 540 ft. long and 222 ft. high, spanning the (1230 M.) Cañon Diablo.

BAEDERER'S United States. 2nd Edit.
1263 M. Flagstaff (6935 ft.; Bank Ho., $ 2½) is of importance as the starting-point of the main stage-route to (73 M.) the **Grand Cañon of the Colorado** (see below). To the N. rises San Francisco Mt. (12,800 ft.), a fine extinct volcano, surrounded by a district of cinder cones and lava beds, like the Phlegraean Fields of Italy. The **Lowell Observatory** is visible from the train, to the N.W. of the town.

The stage-coaches from Flagstaff to the (73 M.) **Grand Cañon** (good road) run tri-weekly (except in winter) in 11 hrs. (return-fare $ 15). Dinner (50 c.) is provided at a halfway house, and the road ends near the cañon, at the **Cañon Camp-Hotel** ($ 3.5). — The **Grand Cañon** of the Colorado, one of the most stupendous natural wonders of the world, is 250 M. long and 3000-5000 ft. deep. Its walls, which are terraced and carved into a myriad of pinnacles and towers, are tinted with various brilliant colours. Visitors from Flagstaff reach it at the deepest part of the whole and obtain a marvellous view into its depths, where the large and foaming river appears as a mere thread. The bottom of the cañon may be reached by a new and fatiguing trail (steady head necessary) beginning 1 M. from the hotel (guide $ 5; horse or mule $ 3½, for a ride along the upper edge of the cañon $ 2½). The cañon was first made specifically known to the world by Major Powell, late Chief of the U. S. Geological Survey, who in 1869 descended it by boat from the Green River (p. 475) to the Virgin River, a distance of 1000 M. He believes that the river was running here before the mountains were formed, and that the cañon was formed by the erosion of the water acting simultaneously with the slow upheaval of the rocks. The geological student has unfolded to him in the sides of the cañon all the strata from the carboniferous formations down to the Archaean granite. Travellers should remain some days at the cañon to visit various points on the rim (cliff-dwellings, etc.). Comp. Major J. W. Powell's 'Caneyons of the Colorado' (1893) and Capt. Dutton's 'Tertiary History of the Grand Cañon District'. — Visits may also be made from Flagstaff to the **Cliff Dwellings** in Walnut Cañon, 8 M. to the S.E., and to the **Cave Dwellings**, artifically excavated in the volcanic agglomerate of the Coconino Butte, 9 M. to the N.E. Longer trips may be made to (65 M.) **Cataract Cañon** and the (75 M.) **Natural Bridge** (275 ft. high).

To the left of (1297 M.) Williams (6725 ft.) rises **Bill Williams Mt.** (9265 ft.), to the right (farther on) **Mt. Floyd.** — Near (1320 M.) **Ash Fork** (Rail. Restaurant) we thread the rocky Johnson's Cañon.

**From Ash Fork to Phoenix, 197 M., Santa Fé, Prescott, & Phoenix Railway** in 9 hrs. — 42 M. **Jerome Junction**, for Jerome, with the huge **United Verde Copper Mines**, said to be the largest in the world (annual profit about $ 40,000,000); 60 M. **Prescott** (5300 ft.), in the midst of a rich mineral region; 126 M. **Congress Junction**, for Congress. — 197 M. Phoenix, see p. 518.

At (1347 M.) **Seligman** the time changes to 'Mountain' standard. 1384 M. **Peach Springs** (4760 ft.; Rail. Restaurant) is only 23 M. from the **Grand Cañon** of the Colorado (stages), but the section reached hence is not so imposing as that reached from Flagstaff (see above). 1407 M. **Hackberry** (3520 ft.), in a mining district. From (1434 M.) **Kingman** (3300 ft.) stages run daily to (60 M.) **White Hills**, the principal town of a rich mining country to the N. 1458 M. **Yucca** (1775 ft.); 1484 M. **Powell** (420 ft.).

We reach and cross the wide **Colorado River**, by a fine cantilever bridge, 1110 ft. long, at (1497 M.) the **Needles** (480 ft.; Rail. Restaurant), so named from the curious pinnacles of purple porphyry and trachytic granite rising to the left. The train here enters Cali-
fornia (p. 449) and runs to the W. across the great Mojave Desert ('Mohahve'), an elevated sandy plateau, interspersed with salt lakes and alkali tracts, with little vegetation except yucca-palms, small piñons (nut-pines, Pinus monophylla), junipers, and sage-brush. Mountains are seen to the N., in the distance. 1520 M. Homer (2120 ft.); 1545 M. Edson (1730 ft.); 1538 M. Bagdad (785 ft.; Rail. Restaurant); 1612 M. Ludlow (1780 ft.); 1657 M. Daggett.

1666 M. Barstow (2110 ft.; Rail. Restaurant) is the junction of the Southern California R. R. to San Bernardino, Colton, Pasadena, Los Angeles, and San Diego (see pp. 500-503). We change here from 'Mountain' to 'Pacific' time (1 hr. slower; comp. p. xviii). — 1676 M. Hinckley (2160 ft.). — 1699 M. Kramer (2480 ft.).

From Kramer to Johannesburg, 28 M., Randsburg Railway in 1½ hr. — This line opens up an important new mining district, of which Randsburg is the principal town.

At (1737 M.) Mojave (2750 ft.) we join the Southern Pacific Railway. Hence to —

2118 M. San Francisco, see pp. 496, 495.

94. From Denver to Salt Lake City and Ogden.

753 M. Railway in 23 hrs. (fare $18; sleeper $5). Through-cars run on this line to San Francisco via Leadville (see p. 476), but lovers of the picturesque may choose the narrow-gauge route over Marshall Pass, uniting with the other line at Grand Junction (comp. pp. 473, 474). The somewhat ambitious title of 'Scenic Line of the World', adopted by this railway, is much more justified by facts than is usually the case with such assumptions, as the railway actually passes through part of the finest scenery in the United States (comp. also p. 461) and presents some features probably unequalled on any other railway.

Denver, see p. 458. The line runs towards the S., parallel with the Atchison, Topeka, and Santa Fé R. R. (p. 462). To the right flows the Platte River, while in the distance are the fine snowy peaks of the Rocky Mts. (comp. p. 458). 25 M. Sedalia (5835 ft.); 33 M. Castle Rock (6220 ft.), so named from a rock that rises from the plain to the left. Pike's Peak (p. 470) may now be seen in front, to the right. — 43 M. Larkspur is the station for Perry Park, with its fantastic rock formations. To the right, about 8 M. farther on, rises the Casa Blanca, a huge white rock 1000 ft. long and 200 ft. high. — 52 M. Palmer Lake (7240 ft.; Rail. Restaurant), on the watershed between the Platte, flowing N. to the Missouri, and the Arkansas, flowing S. to the Mississippi. Glen Park (hotel), 'Colorado's Chautauqua', lies 1/2 M. to the S. A new road leads to the S.W. from Palmer Lake to (35 M.) Manitou Park (Hotel, $3), another favourite resort (comp. p. 476). — The line traverses cattle and sheep ranches. The snowy mountains re-appear from their temporary concealment behind the foot-hills. — 62 M. Husted (6595 ft.). Several fantastic rocks are seen to the left. 67 M. Edgerton (6420 ft.) is the nearest station
to Monument Park (p. 470). — As we approach Colorado Springs we have a splendid view, to the right, of Pike's Peak (p. 470) and the Gateway of the Garden of the Gods (p. 469).

75 M. Colorado Springs (5990 ft.; *The Antlers, $3-5; Alamo, Alta Vista, $2 1/2-4; Gough, R. from 75 c.; *Broadmoor Hotel, connected with the Casino, p. 469, $3-5, R. from $1), a city of 22,000 inhab., on an elevated plateau, near the E. base of Pike's Peak, is pleasantly laid out, with wide tree-shaded streets, and resembles a well-kept and well-to-do New England country-town. It is the principal health-resort of Colorado, and has become the permanent residence of many who are unable to stand the changeable climate of England or the E. coast.

Colorado Springs was founded in 1871, though a settlement had been made somewhat earlier at Colorado City ("Old Town"), a small industrial colony, 2 M. to the N.W. (comp. p. 476). No manufacturing is carried on at Colorado Springs, which has been carefully kept as a residential and educational centre, and no "saloons" are permitted. The name is somewhat of a misnomer, as the nearest springs are those at Manitou (p. 469); but this is decidedly the pleasantest headquarters for exploring the surrounding district (Manitou and Pike's Peak included).

The "View of the mountains from Colorado Springs, well seen from Cascade Avenue, near Colorado College, is very fine. Pike's Peak (p. 470) dominates the scene, while to the S. of it (named from right to left) rise Cameron's Cone (10,500 ft.), Mt. Garfield, Bald Mt. (ca. 12,500 ft.), Mt. Rosa (11,570 ft.), and Cheyenne Mt. (9950 ft.; p. 469). To the right of Pike's Peak opens the Ute Pass (p. 476), and still farther to the right lies the Garden of the Gods (p. 469). The Cheyenne Cañons (p. 469) lie between Cheyenne Mt. and Monte Rosa. In the foreground is the high-lying plateau known as the Mesa (Span. "table-land"). To the E. and S. of the town spreads the illimitable prairie, which in certain states of the atmosphere looks startlingly like the ocean — an illusion intensified by the moving shadows, the smoke of distant locomotives, and the outcrop of lines of rocks resembling breakers.

The Climate of Colorado Springs resembles that of Davos and like it is especially good for consumption or as a preventive for those predisposed to that disease. It is also well suited for persons suffering from nervous exhaustion, malarial poisoning, and other debilitating affections, but is usually harmful to the aged and to those with organic affections of the heart or nerves. It has more wind and dust than Davos, but also more sunshine and dryness; and as the ground is bare most of the winter, there is no period of melting snow to prevent the invalid staying all the year round. Riding, driving, and the usual winter sports can be freely indulged in. There is no rain from Sept. till April. In the winter (Nov.-Mar.) of 1885-89 the average temperature at Davos was 26° Fahr., of Colorado Springs 30°; the latter had 300 hrs. more sunshine than the former. The prevailing winds at Colorado Springs are S.E. and N.; the average percentage of humidity is 47. The town is sheltered by the foot-hills, except to the S. E., where it lies open to the great plains; and, being situated where they meet the mountains, it enjoys the openness and free supply of fresh air of the sea-shore, without its dampness. The soil is dry sand and gravel, with a shallow top-layer of garden soil. There are no springs beneath the town-site. Good water is brought from the mountains, and the sewerage system is excellent. The accommodation for invalids is comfortable and there are several good physicians, one of whom is English (Dr. Solly). No invalid should come or remain without medical advice.

Colorado Springs itself contains comparatively little to arrest the tourist's attention, but it is a splendid centre for innumerable pleas-
Ant drives and excursions (see below). Among the most prominent buildings are Colorado College (500 students) and its preparatory school, Cutler Academy; the State Asylum for the Deaf, Dumb, and Blind; the National Printers' Home; the Opera House; and the Hotels and Hospitals. Helen Hunt Jackson ('H. H.'; 1831-85) is buried in Evergreen Cemetery. Two small Parks have been laid out. The principal clubs are the El Paso Club, the Pike's Peak Club, the Golf Club, and the Country Club, the last with pleasant quarters near the foot of Cheyenne Mt. (see below).

**Excursions from Colorado Springs.**

(1). **Austin Bluffs**, about 3½ M. to the N.E. of the city (reached by carriage, bicycle, or on foot), commands a magnificent *View* of the Rocky Mts., the city, and the plains. The Spanish Peaks, 100 M. to the E., are clearly discernible. To the W. are the peaks mentioned at p. 468. To the N. is the Divide, or watershed between Colorado Springs and Denver.

(2). **Cheyenne Mt. and the Cheyenne Cañons.** The foot of Cheyenne Mt. (9950 ft.), which rises 5 M. to the S.W. of Colorado Springs, is easily reached by electric tramway (10 c.), passing near the pleasant quarters of the Country Club (see above) and the *Broadmoor Casino*, with its boating lake, a good restaurant (D. §4.25), ball-rooms, and orchestral concerts. A group of attractive cottages are clustered round it. The *Cheyenne Mt. Road* leads across the flank of the mountain, commanding exquisite views, in which the brilliant red rocks, the blue sky, the green trees, and the dazzling white snow offer wonderful combinations of colour. The road is steep, narrow, and badly kept, so that steady horses, driver, and head are desirable. It goes on to (20 M.) Cripple Creek (p. 473), and (22 M.) Seven Lakes (10,350 ft.; inn, sometimes closed), but many visitors turn back at the (2½ M.) Horseshoe Curve. The summit of the mountain may be reached by a path (1 M.) diverging to the left near the saw-mill. — The *Cheyenne Cañons* are on the N. side of the mountain, and the electric tramway ends near their entrance. The *S. Cañon* (adm. 25 c.) may be followed on foot to (1 M.) the *Falls*, which descend 600 ft. in seven leaps. From the top of the flights of steps we may ascend to the left to the brink of the cañon (*View*) and go on thence to the above-mentioned road, where our carriage may be ordered to meet us. The *N. Cañon* (fine falls, pools, and cliffs) may be followed for 3-4 M.

(3). **Garden of the Gods** (5 M.). The road leads to the W. across the Mesa (p. 468), passing (4 M.) the entrance to *Glen Eyrie*, a private estate (visitors admitted) containing some fantastic rocky scenery (Cathedral Rock, Major Domo, etc.) About 1 M. farther on we reach the *Gateway of the Garden of the Gods*, consisting of two enormous masses of bright red rock, 330 ft. high and separated just enough for the roadway to pass through. The *Garden of the Gods* is a tract of land about 500 acres in extent, thickly strewed with grotesque rocks and cliffs of red and white sandstone. Among the chief features are the Cathedral Spires, the Balanced Rock, etc. On reaching the road on the other side of the Garden we may either proceed to the right to (1½ M.) Manitou Springs (see below) or return to the left, via Colorado City (p. 468), to (4½ M.) Colorado Springs.

(4). **Manitou** (6320 ft.; Mansion House, Manitou Hotel, Iron Springs House, §4; Barker House, §3-4; Cliff Ho., §2½-4; Sunkyside, §2½-3½; Ruxton, §2-3), situated in a small valley among the spurs of Pike's Peak, and at the mouth of the Ute Pass (p. 476), is largely frequented for its fine scenery and its effervescing springs of soda and iron. It is reached from Colorado Springs by the railway (via Colorado City, 6 M.; 10 c.), by electric tramway (10 c.), or by driving across the Mesa or through the Garden of the Gods (ca. 5 M.; comp. above). The waters, which belong to the group of weak compound carbonated soda waters and resemble those of Ems, are
beneficial in dyspepsia, diseases of the kidneys, and consumption. The chief springs are the Navajo, Manitou, Shoshone, Little Chief, and Iron. The water is very palatable and is used both for drinking and bathing; there is a well-equipped Bath House. Among the numerous pleasant points within reach of Manitou are the picturesque Ute Pass (comp. p. 476), with the fine Rainbow Falls (11/2 M. from Manitou) and the Grand Caverns (adm. $1; fine stalactites and stalagmites, often gorgeously coloured); Williams Cañon, with (1 M.) the Cave of the Winds ($1; these two walks easily combined by a trail near the entrance of the Cave of the Winds); the (3 M.) Red Cañon; Ruxton's Glen and Engleman's Cañon; the (3 M.) Garden of the Gods (p. 479); Monument Park (see below); the Cheyenne Cañons (p. 469; 9 M.); and the Seven Lakes (p. 469; 9 M. by trail, 25 M. by road). Manitou is also the starting-point for the ascent of Pike's Peak (see below). Manitou Park (p. 476), at the head of the Ute Pass, is 20 M. distant.

(5) Pike's Peak (14,147 ft.), one of the best-known summits of the Rocky Mts., rears its snowy crest about 6 M. to the W. of Colorado Springs and just above Manitou. It is usually ascended by the Manitou and Pike's Peak Railway, which was built upon the Abt cog-wheel system and opened in 1891. The railway begins in Engleman's Cañon, a little above the Iron Springs Hotel. Its length is $3^{1/4} M.$, with a total ascent of 7500 ft. or an average of 846 ft. per mile. The steepest gradient is 1:4. The ascent (return-fare $5) is made in about 3 hrs., including a stoppage at the Half-way House (meal 75 c.), a pleasant little hotel in Ruxton Park, frequented by summer-visitors. — The Carriage Road to the top of Pike's Peak begins at Cascade, 6 M. from Manitou (railway; comp. p. 476). It is 17 M. long and has a comparatively easy gradient (carr. to the top and back in 8 hrs., $5 each). — The Bridle Path (6 hrs. on foot or on horseback; horse $5) begins near the railway-station and ascends through Engleman's Cañon (trail well defined; guide unnecessary for experts). Another Trail, 41/2 M. long, now seldom used, ascends from the Seven Lakes (p. 469). — The summit is occupied by a small Inn, open in summer (meals $1), containing a large telescope. The View is superb, embracing thousands of square miles of mountain and plain. The Spanish Peaks (p. 471) and the extended line of the grand Sangre de Cristo Range (including Sierra Blanca) are seen to the S. and Long's Peak (p. 460) to the N., while the other peaks visible include Mt. Lincoln (N.), Mt. Gray, Mt. Bross, and the neighbouring mountains named at p. 463. Denver, Pueblo, Colorado Springs, and Manitou are all visible. The ascent of Pike's Peak can be safely made in summer only, owing to the snow; the mountain-railway begins running in June. — The huge Pike's Peak Tunnel is being constructed below Pike's Peak to connect Colorado Springs with the Cripple Creek district (p. 473), about 16 M. in a direct line. The tunnel, to be finished in seven years, is expected to pay for its cost ($20,000,000) by the ore found in the process of excavation. It is also hoped that it will be of great importance as a drainage system.

(6) Monument Park (Pines Hotel), a tract of curiously eroded sandstone rocks, similar to those of the Garden of the Gods (see p. 469), may be reached from Colorado Springs by road (9 M.; carr. $6-8) or by railway to Edgerton (p. 467), from which it is 1/2 M. distant.

Among other points of interest near Colorado Springs are Bear Creek Cañon, 3 M. to the W.; My Garden (so named by H. H.), 4 M. to the S.W., on the slope of Cheyenne Mt. (view); Templeton's Gap and Colorado Springs Garden Ranch; 3 M. to the N.E.; and Blair Athol, a lovely glen to the N. of Glen Eyrie (p. 469).

Beyond Colorado Springs our line continues to run towards the S. To the right we see Cheyenne Mt. (p. 469); to the left extends the boundless prairie. Stations unimportant.

120 M. Pueblo (4665 ft.; Union Depot Hotel and Restaurant, $3-3^{1/2}, meal 75 c.; Grand, $2^{1/2}), situated at the confluence of the Arkansas River and the Fontaine qui Bouille Creek, is an active
commercial and industrial city of 24,558 inhab., with smelting and steel works. It is the outlet of a rich mining district (coal, iron, etc.) and also trades in agricultural products. The Mineral Palace, a curious building with a ceiling formed of 28 domes, contains specimens of all the minerals produced in the State.

Beyond Pueblo the D. & R. G. R. R. runs on to (210 M. from Denver) Trinidad (p. 463), where it joins the main line of the Atchison, Topeka, and Santa Fé R. R. (see R. 93 b).

Cucharas Junction (5940 ft.), 170 M. from Denver, is the point of divergence of the Silverton branch of the D. & R. G. R. R., forming part of the 'Around the Circle' tour mentioned at p. 461. Between Cucharas and (191 M.) La Veta (7025 ft.) the isolated Spanish Peaks (13,620 ft. and 13,720 ft.) are well seen to the left (S.). Beyond (199 M.) Ojo ('Oho') we begin to ascend the 'Veta Pass,' the summit of which is 9390 ft. above the sea. Two engines are required to draw the train up the steep incline, and great engineering skill has been shown in overcoming its difficulties (maximum gradient 1:10). The most abrupt bend is known as the Mule-Shoe Curve.

To the right rises Veta Mts. (11,175 ft.). We now begin to descend into the San Luis Valley or Park, the largest of the Great Parks of Colorado (p. 443). It is 100 M. long, 60 M. wide, and about 7000 ft. above the sea-level, and is surrounded by mountains 11,440 ft. high. 212 M. Placer (8410 ft.); 226 M. Garland (7935 ft.) To the right towers the triple-peak Sierra Blanca (14,465 ft.), the southernmost of the Sangre de Cristo range and loftiest of the Rocky Mts. — 250 M. Alamosa (7545 ft.; Victoria, § 3; Rail. Restaurant), a brisk little town of 1061 inhab., on the Rio Grande del Norte, is the junction of a branch-line to (70 M.) Creede and of another to Villa Grove and Salida (see p. 473). [The Creede branch ascends along the Rio Grande del Norte. 17 M. Monte Vista (7665 ft.; Hotel Blanca, § 3); 31 M. Del Norte (7880 ft.; Windsor Ho., § 2); 47 M. South Fork. Farther on (61 M.) we pass through the 'Wagon Wheel Gap,' a picturesque mountain pass, with Hot Springs (Hotel, § 1½). 70 M. Creede (Hotels) is one of the most wonderful of the silver cities of Colorado, dating only from the discovery of the ore here in 1891, but already containing 7000 inhab., and producing silver to the value of $4,000,000 in 1892.] From Alamosa our line runs towards the S. 265 M. La Jara ('La Haura'; 7610 ft.); 272 M. Manassa, a Mormon settlement. — 279 M. Antonito (7890 ft.; Palace, § 2) is the junction of a line running S. to (91 M.) Española and (155 M.) Santa Fé.

(The Española branch enters New Mexico (see below) at (23 M.) Palmilla and traverses a district inhabited mainly by Spanish-speaking Mexicans. From (69 M.) Barranca a stage runs to (11 M.) the hot springs of Ojo Caliente. About 6 M. farther on the train enters the romantic 'Comanche Cañon ('Comanchay'). — 72 M. Embudo (8220 ft.), where we reach the Rio Grande del Norte (see above), is the starting-point for a visit to the (30 M.) Pueblo de Taos ('Tows'), one of the most interesting and complete of the cities of the Pueblo Indians (see p. 145). A grand festival is held here on Sept. 30th. The curious mysteries celebrated by Los Hermanos Penitentes in Passion Week include much self-flagellation and culminate at Easter in a realistic drama of the Crucifixion. — 91 M. Española (5390 ft.), a small hamlet, is the S. terminus of the D. & R. G. R. R. On the opposite bank of the Rio Grande is the old Mexican town of Santa Cruz, with a 16th cent. church. Excursions may also be made to the (4 M.) Pueblo of San Juan, the Pueblo of Santa Clara, the Pueblo de Taos (see above), etc. Española is connected with (34 M.) Santa Fé (p. 464) by extension of the D. & R. G. R. R.]

From Antonito the Silverton line runs towards the W., gradually ascending from the San Luis Valley towards the Conejos Mts. ('Conehos'). We repeatedly cross and recross the boundary between Colorado and New Mexico (the 'Sunshine State'). Beyond (305 M.) Sublette the railway bends round Phantom Curve, so called from the spectral sandstone rocks bordering the track. Below us (left) lies the Los Piños Valley. The alignment of the railway here is of the most tortuous character. Beyond (303 M.) Toltec we thread a tunnel and enter the imposing 'Toltec Gorge, the bottom of which lies...
From Denver

1500 ft. below us. The best view is obtained from the bridge crossed just after emerging from the tunnel; and just beyond this, to the left, is a Memorial of President Garfield (d. 1881). At (329 M.) Jambros (10,115 ft.) we reach the top of the pass across the Conejos or San Juan Mts. and begin the descent. 345 M. Chama (1360 ft.; Rail. Restaurant, meal 75 c.). From (365 M.) Lampert stages run to (28 M.) Pozoga Springs (7110 ft.; hotel; springs, 140° Fahr.). 402 M. Arboles (6015 ft.). At (424 M.) Ignacio we reach a reservation of the Ute Indians. — 450 M. Durango (6520 ft.; Struter House, S 3; Blain, S 2), a progressive town of 2726 inhab., on the Rio de las Animas, is the commercial centre of S.W. Colorado.

[From Durango the tourist may, if he prefer, continue the 'Circle' by the Rio Grande Southern R. R., rejoining the main route at Ridgway (p. 473)]. This line passes Fort Lewis, crosses the Animas watershed at (21 M.) Cima (8590 ft.), and descends the Mancos Valley to (40 M.) Mancos. This is the starting-point of the trail to the (20 M.) famous "Cliff Dwellings of the Mancos Cañon", which rank among the most important remains of the mysterious cliff-dwellers and should be visited by every student of the native races of America (guide and horses on application to the railroad agent at Mancos). Comp. p. lxv and 'The Land of the Cliff Dwellers', by F. H. Chapin (1932). — At (17 M.) Millwood (7640 ft.) we cross the Chicken Creek Divide and then descend through Lost Cañon to (60 M.) Dolores (6960 ft.; hotel). Thence we ascend through the Dolores Valley and the narrow Dolores Cañon to (96 M.) Rico (8735 ft.; Enterprise Hotel, S 3), a mining centre (pop. 1134) amid the San Miguel Ms. From Rico the train climbs (gradient 11:100) to (110 M.) the Lizard Head Pass (10,250 ft.), whence it descends on the other side of the San Miguel Ms., passing (113 M.) "Front Lake (8600 ft.; hotel). This descent, by means of the (117 M.) Ophir Loop (9220 ft.) and numerous zigzags, iron bridges, and rock-cuttings, taxed the skill of the engineer to the utmost. From (124 M.) Vance Junction (8115 ft.) a line runs to (8 M.) Telluride (8760 ft.; American, Sheridan, S 2/2), a beautifully situated mining town (pop. now about 4000), passing the large Keystone Placer Mine. Beyond (146 M.) Placerville (7295 ft.; hotel) we cross the Horse-Fly Range, a spur of the Uncompahgre Ms., at the (149 M.) Dallas Divide (8990 ft.), and then descend into the fertile "Dallas or Pleasant Valley, surrounded by snow-capped peaks. 154 M. High Bridge (7960 ft.). — 162 M. Ridgway, see p. 473.]

Beyond Durango the Silver or 'Rainbow' Route turns to the N. and follows the Rio de las Animas. Beyond (150 M.) Trimble Hot Springs (6645 ft.; Hermosa) the valley contracts and at (465 M.) Rockwood (7365 ft.) we reach the beautiful "Animas Cañon", the walls of which rise 500 ft. above us on the one side and drop 1000 ft. below us on the other. A single mile of track here cost $140,000 (28,000 ft.) to build. On issuing from the cañon we see the curious Needle Ms. towering to the right. We then traverse the pretty little Elk Park. To the left rises Garfield Peak (12,135 ft.). — 495 M. Silverton (9225 ft.; Grand Central, S 3), a mining town with 1214 inhab., and the terminus of this branch of the D. & R. G. R. R., is finely situated in Baker Park, near the base of Sultan Mt. (13,500 ft.), one of the grandest of the San Juan Ms.

We now follow the Silverton Railway, one of the most extraordinary feats of engineering in America, which ascends over Red Mt. (13,335 ft.) to (20 M.) Ironton, a small mining town. The line winds backwards and forwards like the trail of a serpent and finally attains a height of 11,235 ft. (3000 ft. above Silverton). The scenery is of the grandest description, and the view from the summit is superb. The descent is as wonderful as the ascent. Numerous mines are passed.

At Ironton we leave the railway and proceed by stage to (8 M.; a drive of 3 hrs.) Ouray. The road is good and the scenery magnificent. To the left rises Mt. Abrahams (12,600 ft.). We pass the Bear Creek Falls (250 ft. high) and the "Uncompahgre Cañon."

Ouray (7120 ft.; "Beaumont Hotel, S 3-4; Western, $2-3½), where we again reach the D. & R. G. R. R., is a picturesque mountain-town with 2534 inhab., frequented for its grand scenery and its hot medicinal springs. To the S. rise Mt. Hardin and Mt. Hayden; to the N.W. is Uncompahgre
The distance from Ouray to Montrose (see p. 475) is 94 M. On the way the railway passes the confluence of the Uncompahgre and the Dallas, (10 M.) Ridgway (7000 ft.; Mentone, $3-4; see p. 472), the old Los Piños Agency, and (26 M.) Fort Crawford, a U. S. military post. From Montrose to Salida and Denver and to Salt Lake City, see p. 476.

Our line now diverges to the right (W.) from the line running to Trinidad (see p. 471). We follow the course of the Arkansas river (left), crossing various tributaries. To the right fine views are joyed of Pike's Peak (p. 470), towering above the lower mountains.

153 M. Florence, with large petroleum tanks and derricks.

From Florence to Cripple Creek, 40 M., railway in 3 hrs. (through from Denver in 8½ hrs.). This line opens up an important mining district. 16 M. Wilbur; 35 M. Victor (9735 ft.; 3000 inhab.). — 40 M. Cripple Creek (9800 ft.; National Hotel, from $3), situated high up among the mountains, to the W. of Pike's Peak (comp. p. 469), has changed since 1891 from a small cattle-ranch into one of the chief gold-mining towns in the country, with 15,000 inhab. and numerous substantial buildings. The annual value of its gold production now exceeds $14,000,000. — From Cripple Creek to Salida, see p. 476.

161 M. Cañon City (5345 ft.; St. Cloud, $3; Royal Gorge Hotel, 2 M. to the W., $2-3), a small health-resort (2825 inhab.), is noted for its hot mineral springs, situated at the mouth of the royal Gorge, 2 M. to the W. Beyond Cañon City we pass between a Royal Gorge Hotel (left) and the State Penitentiary (right) and the famous *Grand Cañon of the Arkansas, 8 M. of stupendous rocky scenery (granite), through which the railway barely makes its way along the boiling river. At the narrowest point, known as the royal Gorge, where the train stops for a few minutes, the rocks tower a height of 2600 ft. and the railway passes over a bridge hung on girders mortised into the smooth sides of the cañon. Beyond the cañon we still follow the foaming Arkansas, passing numerous picturesque rocks and crags. Farther on we obtain a good view, in front, of the fine snow-clad *Sangre de Cristo Range. To the left is the Broadipe Range. As we near Salida the Collegiate peaks, Mt. Harvard, Yale, and Princeton (see p. 461), come into sight in front (N.W.).

217 M. Salida (7050 ft.; Palmer Ho., in the town, on the other side of the river, $2; Monte Cristo, at the station, $3), a small town (5866 inhab.), beautifully situated and commanding a grand mountain view (to the S., the lower N. peaks of the Sangre de Cristo range; to the S.W., Mt. Ouray and Shavano; to the N.W., the Collegiate Peaks). The small hill in front of the station (½ hr.; very steep path) is a commanding point of view.

From Salida passengers by the Denver & Rio Grande R. R. have a choice of two routes, uniting at Grand Junction (p. 475). The arrow-gauge line (left) crosses Marshall Pass (p. 474), one of the highest passes across the main ridge of the Rocky Mts., while the standard-gauge line, with through-carriages (comp. p. 467), runs via Leadville (p. 477). The latter route, which coincides to some extent with the Colorado Midland Railway (p. 476), is here given in small type, while the Marshall Pass line is given as the main route.
FROM SALIDA TO GRAND JUNCTION VIA LEADVILLE, 239 M., railway in 9-10 hrs. — The train runs towards the N., with Mt. Shawano (14,240 ft.) to the left. 7 M. Brown’s Cañon; 17 M. Nathrop (7695 ft.); 25 M. Buena Vista (see p. 461). To the left tower the Collegiate Peaks (p. 461). 48 M. Granite (8945 ft.; comp. p. 461) is the best point for excursions to the Twin Lakes (p. 461), one of the finest points in South Park (p. 461). — 56 M. Malta (9580 ft.) is the junction of the branch-line to (4 M.) Leadville (see p. 477). — 58 M. Leadville Junction. At (67 M.) Tennessee Pass (10,440 ft.) we cross the Continental watershed (tunnel) and begin to descend towards the Pacific Ocean. To the left rises Mt. Massive (14,300 ft.), at the foot of which is Evergreen Lake. Just before reaching (76 M.) Pando we have a good view (left) of the Mountain of the Holy Cross (14,173 ft.; see p. 461). A little farther on we pass through the short but fine Red Cliff Cañon. 83 M. Red Cliff (8670 ft.). About 5 M. farther on is the Eagle River Cañon, where the mining-shafts and miners’ dwellings are seen clinging to the sides of the cliffs, 2000 ft. above our heads. Near (31 M.) Minturn, to the right, is a rock known as the Lioness. Beyond (133 M.) Dotsero, at the confluence of the Eagle and Grand Rivers, we enter the fine Cañon of the Grand River, which is 16 M. long and has rocky sides reaching a height of 2000-2500 ft. We pass through three tunnels, the last 444 yds. long. — 190 M. Glenwood Springs (5200 ft., see p. 477. A branch-line runs hence to (41 M.) Aspen (see p. 477). To the S.E. towers Mt. Sopris (12,370 ft.). Beyond Glenwood we continue to follow the Grand River, which flows to the left. 162 M. Newcastle, and thence to (239 M.) Grand Junction, see p. 477.

Beyond Salida the narrow-gauge runs at first towards the S.W. — 221 M. Poncha (7480 ft.; Hot Springs Hotel, Poncha Springs Ho., $2), with hot springs (90-185°), is the junction of a branch-line to (11 M.) Monarch. — From (228 M.) Mears Junction (8435 ft.) a line runs S. to (75 M.) Alamosa (p. 471).

This line also runs through a picturesque district, affording fine views (left) of the Sangre de Cristo Range, including the Three Tetons (p. 492), Music Peak (13,300 ft.), and the Sierra Blanca (p. 471).

We continue to ascend rapidly, the line winding backwards and forwards in a series of the most abrupt curves, and affording a striking spectacle of engineering skill. Lofty mountains rise on every side. The top of the *Marshall Pass is 10,858 ft. above the sea. The view includes Mt. Ouray (14,400 ft.), rising close to the line on the right, and the Sangre de Cristo Range to the S.E. Snow lies here all the year round.

The first part of the descent is very rapid, and numerous abrupt curves are turned (no standing on the platform allowed). — 259 M. Sargent (8480 ft.). We now traverse a bleak moorland district. Beyond (279 M.) Parlin (7950 ft.) we repeatedly cross the meandering Tomichi. — 290 M. Gunnison (7680 ft.; La Veta Hotel, with railway-restaurant, $3-4, meal 75 c.), a town of 1105 inhab., is of considerable importance as the outlet of a rich mining district.

A branch-line runs from Gunnison to (28 M.) Crested Butte (8880 ft.; Elk Mountain Ho., $2), a small town, in a district rich in coal, silver, and gold. The Crested Butte is close to the town. The Elk Mts., a little to the W., rise finely from the plain and afford good shooting.

Beyond Gunnison we follow the Gunnison River, at first on one side and then on the other. — 316 M. Sapinero (7245 ft.) is the junction of a line, running through *Lake Fork Cañon, to (35 M.) Lake City, near the beautiful Lake San Cristobal. An observation
car is attached to the train for the passage of the *Black Cañon, or Grand Gorge of the Gunnison, which is 15 M. long and in some respects even finer than the Royal Gorge. Among the most prominent individual features are the Chippeta Falls (right) and the *Currecanti Needle, a lofty pinnacle of rock surmounted by a flag-staff (about halfway down the cañon). The river, which we cross and recross, alternates between foaming rapids and pleasant quiet reaches. Near the end of the cañon we diverge to the left from the Gunnison and follow the cañon of its tributary, the *Cimarron, one of the finest pieces of the whole gorge. From (331 M.) Cimarron (6895 ft.; Rail. Restaurant) we ascend rapidly to (336 M.) Cerro Summit (7965 ft.), and then descend, nearly as rapidly, towards the Lower Gunnison. The country now traversed is arid and unattractive. — 343 M. Cedar Creek (6750 ft.). 353 M. Montrose (5790 ft.; Belvedere, with rail. restaurant) is the junction of the line to Ouray (see p. 473). The Uncompahgre Mts., culminating in Uncompahgre Peak (14,420 ft.), are seen to the S.W. (left). Beyond (374 M.) Delta (4980 ft.) we pass through the Cañon of the Lower Gunnison, where the smooth-faced sandstone cliffs are striking. Beyond (399 M.) Bridgeport we thread a tunnel 722 yds. long. In approaching Grand Junction we cross the Grand River, just above the mouth of the Gunnison.

425 M. Grand Junction (4550 ft.; Brunswick Hotel, $2 1/2; Rail. Restaurant) is of importance as the junction of the Denver and Colorado Midland railways. We continue to follow the Grand River (left). To the right are the fantastic Little Book Cliffs. We traverse the bare 'Colorado Desert'. At (460 M.) Utah Line we enter Utah (p. 478), called by the Mormons Deseret. To the left, in the distance, are the La Sal and San Rafael Mts. To the right are the Roan or Book Mts. (7000-9000 ft.), with their variegated cliffs. 480 M. Cisco. — At (531 M.) Green River (4070 ft.) we cross the river of that name and enter another stretch of desert.

Beyond Green River the train ascends steadily towards the Wahsatch Range. At (556 M.) Lower Crossing (4630 ft.) we cross the S. fork of the Price River. 594 M. Price (5560 ft.); 601 M. Helper (Rail. Restaurant). At (605 M.) Castle Gate (6165 ft.) we reach the *Castle or Price River Cañon, the entrance to which is formed by two pinnacles of sandstone, 450-500 ft. high, barely leaving room for the railway and river to pass between them. 618 M. Colton (7185 ft.). At (626 M.) Soldier Summit (7465 ft.) we reach the top of the pass over the Wahsatch Mts. and begin to descend on the other side. 633 M. Clear Creek (6245 ft.); 651 M. Thistle (5040 ft.). A little farther on we pass through the pretty little Spanish Fork Cañon and emerge in the beautiful Utah Valley (p. 478). To the S. rises Mt. Nebo (12,000 ft.). 666 M. Springville (4565 ft.). To the left lies Utah Lake, with the Oquirrh Mts. rising beyond it. 671 M. Provo (4530 ft.), a thriving little Mormon city, with 5159 inhab., situated on the Provo River, a little above its mouth in Utah Lake.
476 Route 94. UTE PASS. From Denver

685 M. Lehi (4545 ft.). Farther on we see (left) the small river Jordan, connecting Utah Lake with the Great Salt Lake (p. 480). 701 M. Bingham Junction (4380 ft.). As we approach Salt Lake City we have a view to the right of the Mormon Tabernacle and Temple.

716 M. Salt Lake City (4240 ft.), see p. 477.

Beyond Salt Lake City the train runs to the N., with Great Salt Lake generally in sight to the left. To the right rise the Wasatch Mts. In the lake are the large and mountainous Antelope Island and (farther on) Fremont Island. 752 M. Lake Park (hotel), a pleasant bathing-resort on Salt Lake, with excellent bathing arrangements (comp. p. 481). 764 M. Hooper (4390 ft.).

753 M. Ogden (4310 ft.), see p. 447.

b. Via Colorado Midland Railway.

712 M. RAILWAY in 26-28 hrs. (fare $18; sleeper $5). Through-carriages to San Francisco. This line ('Pike's Peak Route') also traverses much fine scenery.

From Denver to (74 M.) Colorado Springs the train uses the tracks of the Atchison, Topeka, and Santa Fé Railway (see p. 462), practically coinciding with that above described (R. 94a). From Colorado Springs the line runs towards the W. 77 M. Colorado City, see p. 468; 80 M. Manitou, see p. 469. 81 M. Manitou Iron Springs (6550 ft.), the starting-point of the Pike's Peak Railway (p. 470). Beyond Manitou the train ascends through the beautiful *Ute Pass, on the shoulder of Pike's Peak (p. 470), so called because formerly the regular route of the Ute Indians in passing across the mountains to the plains. 86 M. Cascade Cañon (7240 ft.; Ramona, $2-3; Cascade; Rail. Restaurant), the starting-point of the carriage-road to the top of Pike's Peak (comp. p. 470); 87 M. Ute Park (7510 ft.; Ute Hotel); 89 M. Green Mountain Falls (7735 ft.; Hotel, $2 1/2-3 1/2); 95 M. Woodland Park (8485 ft.; hotel), at the head of the Ute Pass, affording a splendid view of Pike's Peak. From (100 M.) Manitou Park Station (8465 ft.) a four-horse coach runs to (7 M.) *Manitou Park (7500 ft.; Hotel, well spoken of, $3). On leaving the Ute Pass we cross the (102 M.) Hayden Divide (9200 ft.), part of the Continental watershed.

From Divide the Midland Terminal Railway runs towards the S. to (29 M.) Cripple Creek (p. 473; 4 1/4 hr.; through-cars from Denver in 6-7 hrs.), passing (6 M.) Gillett, (23 M.) Victor, and (27 M.) Anaconda, all important mining points.

From Divide we descend, passing (111 M.) Florissant (8150 ft.), to the fine *Granite or Eleven Mile Cañon, through which rushes the South Platte River. We are now traversing South Park (p. 461). 123 M. Hovbert (8520 ft.); 133 M. Spinney (8630 ft.); 144 M. Hartsel Hot Springs (8890 ft.; Hotel, $2-2 1/2), one of the chief resorts in South Park. After crossing the Trout Creek Pass (9345 ft.)
we descend to (176 M.) Buena Vista (see p. 461), in the valley of the Arkansas. 194 M. Granite (8960 ft.); 201 M. Snowden (9305 ft.).

209 M. Leadville (10,200 ft.; Vendome, $3\frac{1}{2}-4$; Continental, $2\frac{1}{2}$; Rail. Restaurant), one of the highest cities and most celebrated mining centres in the world, is finely situated amid towering mountains. Pop. (1890) 10,384. It is especially interesting in all points connected with mines and miners.

Leadville was founded in 1859 under the name of California Gulch and was for several years one of the richest gold-washing camps in Colorado. In 1876 the great carbonate beds of silver were discovered, and the population rose for a time to 30,000. The annual yield of silver in the Leadville mines amounts to about $13,000,000, and its gold-mining has also again become profitable.

Among the favourite excursions from Leadville are those to the Soda Springs on Mt. Massive, 5 M. to the W. (reached by a fine boulevard), and to the Twin Lakes (p. 461), 14 M. to the S. — From Leadville to Denver, etc., by the Denver & Rio Grande R. R., see R. 94 a.

Beyond Leadville the train ascends rapidly towards the ridge of the Saguache Mts., passing the 'Continental Divide' by the (226 M.) Hagerman Pass (11,530 ft.), the highest point reached by any railway in crossing the Rocky Mts. It then descends rapidly. 256 M. Ruedi (7570 ft.); 263 M. Peach Blow (7000 ft.). — From (272 M.) Basalt (6615 ft.; Rail. Restaurant) a branch-line runs to (19 M.) Aspen (comp. p. 474).

Aspen (7950 ft.; Jerome, $3\frac{1}{2}$; Lincoln, $2$), finely situated in the heart of the Rockies, is a prosperous mining town with 5003 inhabitants. Silver and lead are the chief sources of its wealth, but gold is also found in the vicinity. The annual value of the bullion yielded by the Aspen mines is about $8,000,000.

We continue to descend along the Roaring Fork. — 296 M. Glenwood Springs (5770 ft.; *The Colorado*, with well-kept grounds, $4-5$; *Hotel Glenwood, $2\frac{1}{2}-3\frac{1}{2}$), at the junction of the Roaring Fork and the Grand River, has of late come into prominence on account of its beautiful situation and hot salt mineral springs. The springs, rising on both sides of the Grand River, have a temperature of 120-140° Fahr., are highly mineralized, and are beneficial in rheumatism, gout, and most diseases of the blood and skin. The bathing arrangements are excellent, including a large swimming basin, 640 ft. long and 110 ft. wide (temp. 95°). A natural Turkish bath may be enjoyed in one of the Vapour Caves (105-110°).

308 M. Newcastle (p. 474); 322 M. Rifle (5100 ft.); 339 M. Parachute; 352 M. DeBeque. At (384 M.) Grand Junction (p. 475) we pass on to the lines of the Rio Grande Western Railway; and the journey hence to (676 M.) Salt Lake City and (712 M.) Ogden is the same as that described in R. 94 a.

Salt Lake City. — Hotels. Knutsford (Pl. a; C, 2, 3), cor. of Third South and State St., from $3$; Kenyon (Pl. b; C, 2), cor. Main and Second South Streets, $3-5$, R. $1-3$; Walker House (Pl. d; B, 2), Main St., $2-3$; Cullen (Pl. e; B, 2), $2-2\frac{1}{2}$; Wey's Hotel, First East St. (Pl. C, 2); Grand Pacific (Pl. f; A, 2), cor. S. Temple and Third West Str., opposite Oregon Shor Line Railway Station.

Tramways (electric) traverse the principal streets (fare 5 c.).

Post Office (Pl. B, 2), W. Temple St., cor. 2nd S. St.

Streets. Salt Lake City is laid out on a rectangular plan, and its streets are named and numbered in such a way that it is easy to find any given point. The centre of the city is Temple Square (Pl. B, 1, 2), the streets enclosing which are named North Temple, West Temple, South Temple, and East Temple Streets. The streets to the N. of N. Temple St. are known as 1st North, 2nd North, and so on; those to the W. of W. Temple St. as 1st W., 2nd W., etc.; those to the S. of S. Temple St. as 1st S., etc.; those to the E. of E. Temple St. as 1st E., etc. Each block is 1/4 M. long. First East St. was recently renamed State St. Popularly, East Temple St. is known as Main St., South Temple St. as Brigham St., and North Temple St. as Jordan St. On the bench in the N.E. part of the city the blocks are smaller, and the streets narrower and named differently.

Salt Lake City (4230 ft.), the Zion of the Latter Day Saints or Mormons and the capital of the state of Utah, is finely situated in a spacious upland valley, encircled by mountains, which approach the city closely on the N. and E. (Wahsatch Range), while they are 20 M. distant to the S. and 15 M. distant to the S.W. Great Salt Lake (p. 480) lies 12 M. to the N.W. The city is regularly laid out and the streets are wide and shaded with trees. Each house in the residence-quarters stands in its own garden, the general effect being cool and pleasant. In 1890 the population was 44,843 (two-thirds Mormons and the rest ‘Gentiles’).

Salt Lake City was founded in 1847 by the Mormons, under Brigham Young (p. 479), who had been expelled from Nauvoo (III. see p. 365) the previous year and had made a long and perilous journey across the Indian-haunted plains. The district was then a barren and unpromising desert, but the industrious Mormons set to work at once to plough and plant and began that system of irrigation which has drawn out the latent capabilities of the soil and made the Utah valleys among the most productive regions in the country. The Territory of Utah was organized in 1850, with Brigham Young (d. 1877) as the first governor. A copious stream of Mormon immigrants soon set in from Europe; and, in spite of numerous collisions with the U. S. Government on the question of polygamy, the history of the city and territory has been one of steady progress and development. Of late years the proportion of ‘Gentile’ (i.e. Non-Mormon) inhabitants in Salt Lake City has increased very rapidly and introduced many new features and problems into the situation. Polygamy has been declared illegal by the U. S. Courts and has been discontinued. In 1893 Utah was admitted to statehood.

† ‘Early in 1820, at Manchester (N. Y.), Joseph Smith, then fourteen years old, became interested in a religious revival but was puzzled by the conflicting doctrines taught. He asked of God in prayer, which sect was right. In answer he saw a vision of God the father and his son Jesus Christ, and was told that all the sects were wrong. In subsequent visions he learned that he was to be the instrument in restoring the Gospel and the Holy Priesthood of the Son of God to men, and in establishing the Church and Kingdom of God upon the earth, never more to be overthrown; also where he would find the inspired history of the aborigines of America engraved in ancient characters on metal plates. This he afterwards translated into English, by the power of God, and published in 1830, as the Book of

† This statement of the origin and doctrines of Mormonism was drawn up for *Baedeker’s United States* in the office of the President of the Church of Latter-Day Saints.
Mormon. It has been translated and published in Welsh, Swedish, Spanish, Dutch, Hawaiian, and Maori, and translated into Hindustani and Hebrew. On May 15th, 1839, John the Baptist appeared to Joseph Smith and Oliver Cowdery, laid his hands on them, and ordained them to the Aaronic or Lower Priesthood. The same year the apostles Peter, James, and John appeared to them and ordained them to the Apostleship of the Melchizedek or Higher Priesthood.

'The Church of Jesus Christ of Latter-Day Saints was organized with six members, on April 6th, 1830, at Fayette (N. Y.), by Joseph Smith, by appointment and instruction from God. Twelve apostles, also seventies, high priests, elders, bishops, priests, teachers, and deacons, have been since ordained, now numbering many thousands. They have preached the Gospel to many nations, and hundreds of thousands of believers have been baptized. Wilford Woodruff† is the present president of the Church, with George Q. Cannon and Joseph F. Smith as his counsellors, the three constituting the First Presidency.

'Driven from Missouri and Illinois, with their prophet and president, Joseph Smith, and his brother Hyram murdered in Carthage jail (Ill.) on June 27th, 1844, by an armed mob, the Latter-day Saints were led by Brigham Young to Salt Lake City in 1847, spreading since into the regions about. They now number about 200,000 and have built six Temples to the Lord, the most imposing of which is at Salt Lake City.

'The Latter-Day Saints believe in God the Father; his son Jesus Christ and his atonement; the Holy Ghost; the Gospel, the first principles being faith, repentance, baptism by immersion for remission of sins, and the laying on of hands for imparting the Holy Ghost; the resurrection of the dead, and the eternal judgments; the necessity of divine authority, by calling and ordination, to preach the Gospel and administer its ordinances; apostles, prophets, seventies, high priests, elders, bishops, priests, teachers, and deacons, for the work of the ministry; revelation from God; the Bible, Book of Mormon, and other inspired books; the gathering of Israel and the building up of Zion and Jerusalem; the sacredness and eternity of marriage; and the personal reign of Christ upon the earth as King of Kings and Lord of Lords.'

Temple Block (Pl. B, 1, 2), the Sacred Square of the Mormons, lies near the centre of the city and forms the chief object of interest to strangers. It is 10 acres in area, is surrounded by a high adobe wall, and contains the Tabernacle, the Temple, and the Assembly Hall. Visitors are admitted, by the W. gate, from 8 to 12 and 1 to 4.

The *Tabernacle (Pl. B, 2), built in 1864-67, is a huge and extraordinary structure, in the shape of an oval or ellipse, 250 ft. long, 150 ft. wide, and 70 ft. high. It is surmounted by a wooden roof with iron shingles, resembling the shell of a turtle or the inverted hull of a ship, supported by 44 sandstone pillars.

The Interior, presenting one of the largest unsupported arches in the world, has seats for over 8000 people and can accommodate about 12,000. Amorphous though it be, there is something imposing in its size and proportions, while it is well adapted for speaking and hearing. The building is surrounded by a gallery, except at the W. end, where there are a platform for speakers, with seats for the choir and others, and an immense and fine organ. Public religious services are held in the Tabernacle every Sunday at 2 p.m., and it is also used for lectures, concerts, and other meetings.

A little to the E. of the Tabernacle is the new *Temple (Pl. B, 2), a large and handsome building of granite, erected in 1863-93, at a

† Mr. Woodruff died in 1898 and was succeeded by Mr. Lorenzo Snow.
cost of over $4,000,000. It is 186 ft. long from E. to W. and
99 ft. wide. At each end are three pointed towers, the loftiest of
which, in the centre of the E. or principal façade, is 210 ft. high
and is surmounted by a colossal gilded figure (12½ ft. high) of the
Mormon Angel Moroni (by C. E. Dallin).

The Interior (not accessible) is elaborately fitted up and artistically
adorned. The Temple is used for the administration of ordinances, including
marriage (for this world and the next, or for eternity alone), baptism for
the dead, prayer, theological lectures, preaching, teaching, ordinances, etc.

The Assembly Hall (Pl. B, 2), to the S.W. of the Tabernacle, is
a granite building with accommodation for 3000 people, intended
for divine service. The interior is adorned with frescoes of scenes
from Mormon history. — The famous Endowment House, which stood
at the N.W. corner of the Temple Enclosure, has been pulled down.

We now follow South Temple Street towards the E. To the
left (N.) is the Deseret News Office (Pl. C, 2), behind which is the
Tithing Storehouse, where the Mormons pay their tithes in kind. A
little farther on, also to the left, are the Lion House (Pl. C, 2; with
a lion over the entrance), one of the residences of Brigham Young;
the Office of the President of the Mormon Church; and the Bee-
hive House (Pl. C, 2; surmounted by a beehive, Utah’s emblem),
another of Brigham Young’s houses. On the opposite side of the
street (right) are the huge warehouse of Zion’s Co-operative Mer-
cantile Institution (Pl. C, 2); the Museum (Pl. C, 2), containing
Utah products and curiosities (adm. 25 c.); and the Gordo House
(Pl. C, 2), opposite the Beehive House.

A little farther to the N.E. is Brigham Young’s Grave (Pl. C, 2),
surrounded by an ornamental iron railing.

About ½ M. to the N. of this point is Prospect Hill (Pl. C, 1), with a
tower (adm. 15 c.) commanding an excellent View of the city, its en-
virons, and Salt Lake. Fort Douglas (see below) is seen to the E. — A still
more extensive view is obtained from Ensign Peak (5050 ft.), which rises
a little farther to the N. and may be ascended nearly all the way by car-
riage. To the N. lies City Creek Cotton, with some pretty scenery.

The other parts of the city call for no especial comment. The Salt
Lake Theatre (Pl. C, 2), at the corner of State and 1st S. Sts., is a
large building. The imposing City and County Building is in
Washington Sq. (Pl. C, 3). A new Capitol is in contemplation in
Capitol Grounds (Pl. C, 1), near Prospect Hill (see above). Among
the educational establishments is Utah State University (Pl. B, 1),
in Union Sq., attended by 3-400 students. The Exposition Build-
ing is in the Exposition Grounds (Pl. D, 3).

On a plateau (500 ft.), 3 M. to the E. of the city, is Fort Douglas
(Pl. F, 1-4), a U. S. military post, reached by the Utah Central Railway or
by electric tramway (fare 10 c.). Fine views from the post and from the
road to it. Parade and band-concert every afternoon.

Great Salt Lake, the nearest point of which is 12 M. to the N.W. of
Salt Lake City, is 80 M. long and 30 M. wide. Several rivers flow into
it, but it has no outlet and gets rid of its superfluous water by evapora-
tion. Its water, which is extraordinarily buoyant, contains about 14 per-
cent of pure salt (ocean 3-4 p. c., Dead Sea 24 p.c.). A bathe in it is very
Hotels. SAN FRANCISCO. 95. Route. 481

exhilarating, but bathers should be careful not to get any of the brine into their mouth or eyes. The lake contains several islands, the largest of which are Antelope and Stansbury. It is very shallow in places, and the tints of the water are often very beautiful. There is said to be a submarine volcano in the arm of the lake near Promontory (p. 448). The lake may be conveniently visited by taking the Oregon Short Line R. R. (p. 478) to (18 M.) Garfield Beach or (17 M.) Saltair, two well-equipped bathing resorts with comfortable hotels. A small steamer sometimes plies to Lake Park (p. 476).

The Warm Sulphur Springs, just to the N. of the city, and Beck's Hot Springs, 2 M. farther on, are frequented for their medicinal qualities.

Among the chief points of resort among the Woolditch Mts. are the Big Cottonwood Canyon, a day's drive from the city; the Little Cottonwood Canyon; the City Creek Canyon, close to the city; the Weber Canyon, to the N.; and the American Fork and Provo Canyons, in Utah Valley, to the S.

95. San Francisco.

Arrival. Railway Passengers from the N., E., and S. leave the train at Oakland (see p. 451) and reach San Francisco at the Ferry Station (Pl. G, 2), at the foot of Market St., where cars (50 c.), hotel-omnibuses (50 c.), and cable, electric, and horse cars (5 c.) meet the steamer. Those arriving by steamer also land in the same neighbourhood. — The only regular Railway Station in the city is that of the Southern Pacific Co. (Pl. G, 5), at the cor. of 3rd and Townsend Sts., for Menlo Park, Santa Clara, Santa Cruz, San José, Tres Piños, Monterey, Paso Robles, etc. (comp. p. 450).

Hotels. *Palace (Pl. a; F, 3), at the corner of Market St. and Montgomery St., a huge building (1200 beds) surrounding an internal court; front-room and board from $5, court-room (undesirable) and board from $3 1/2, front-room without board $3-4, court-room $1 1/2. — California (Pl. b; F, 3), Bush St., R. from $1; Baldwin (Pl. c; F, 4), burned down in 1898; Grand (Pl. d; F, 3), opposite the Palace, of which it is an annex, $3-5, R. $1-3; Lick House (Pl. e; F, 3), cor. of Montgomery and Sutter Sts.; Occidental (Pl. f; F, 3), cor. of Montgomery and Bush Sts., $3-5; Beresford (Pl. b; F, 3), cor. of Bush and Stockton Sts., $2 1/2-4; Russ House (Pl. i; F, 3), cor. of Montgomery and Pine Sts., $1 1/2-2 1/2; Pleasanton (Pl. j; E, 3), cor. of Sutter and Jones Sts., $3-5.

Restaurants. At the *Palace, California, and other hotels (see above); Tortoni, 107 O'Farrell St.; Marchand, 115 Grant Ave.; Delmonico, 110 O'Farrell St.; Masion Riche, 104 Grant Ave. and 44 Geary St.; Poodle Dog Rotisserie, cor. Grant Ave. and Bush St.; Viticultural Society, 317 Pine St. (excellent Californian wines); Wilson, 114 Post St. (low prices); Vienna Bakery, 205 Kearny St. — Chinese Restaurants, see p. 485.

Tramways. An excellent system of *Cable Cars (fare 5 c.) traverses all the main thoroughfares and neutralizes the steepness of most of the streets (comp. p. 452). An elaborate system of transfers makes it possible to go from almost any point in the city to any other point for a single fare. The stranger should visit one of the 'Cable Power-houses' (e.g. at the cor. of Sutter and Polk Sts., or at the cor. of Mason and Washington Sts.). — An Electric Tramway, communicating with the Sutter St. cable cars, runs to Sutro Heights and the Cliff House (p. 486; through-fare 5 c., incl. transfer). — Cabs. With one horse, one pers., 1 M. 50 c., with two horses (hacks) $1 1/2, two pers. $1, $2 1/2; per hr. $1 1/2 (2 pers.), $3 (4 pers.), each addit. hr. $1, $2. Heavy baggage is usually transported by the transfer companies. — Ferries, plying from the foot of Market St., see p. 486.

Places of Amusement. Baldwin Theatre (Pl. F, 4), burned down in 1898; California Theatre (Pl. F, 3), 414 Bush St. (very tastefully fitted up); Grand Opera House (Pl. F, 3-4), Mission St., near 5th St.; Bush Street Theatre (Pl. F, 3; varielties), between Montgomery and Kearny Sts.; Columbia Theatre, Eddy St., opposite the Baldwin; Alcazar (Pl. F, 3), 114 O'Farrell St.; Orpheum (Pl. F, 3, 4), opposite the last; Tivoli Opera House (Pl. F, 4), Eddy St., near Powell St. (cheap but fair performances of opera; beer-drinking and smoking allowed); Chinese Theatres, see p. 485. — Panorama at the cor. of Market
Route 95

SAN FRANCISCO.

Climate.

and 10th Sts. (Pl. E, 5). — Race Course (Pl. A, 5), near Golden Gate Park (meetings in spring, summer, and autumn); Olympic Club Grounds, for baseball, etc. — San Francisco Art Association, 430 Pine St. (picture-gallery). — Sutro Heights, see p. 486.

Clubs. Pacific Union (Pl. F, 3), cor. of Union Sq. and Stockton St.; Bohemian (Pl. F, 3), cor. of Sutter and Mason Sts. (literary men, actors, etc.); Cosmos, 247 Powell St.; Olympic (Pl. E, F, 3; athletic), Post St., near Mason St.; University, 722 Sutter St.; Press, 129 Kearny St.; Deutscher Verein, Pioneer Building (p. 484); San Francisco Verein (German), 219 Sutter St.; Ligue Nationale Francaise, 308 Larkin St.; Cercle Francais, 421 Post St. (these two French); Concordia (Hebrew), cor. of Van Ness Ave. and Post St.

Tourists Agents. Raymond & Whitcomb, 613 Market St. and Crocker Building, Room 88; Thos. Cook & Son, 621 Market St.

Post Office (Pl. F, 2), at the cor. of Washington and Battery Sts. (8-8; Sun. 9-10 a.m. and 2 p.m.); chief branch-office (Station D), at the foot of Market St. Letters may also be posted in the letter-boxes and postal cable cars. A new post-office is to be built at the corner of Mission and 7th Sts.

British Consul, Mr. Joseph William Warburton, 506 Battery St.

San Francisco, the largest city of California and the Pacific Coast and the seventh city of the United States, is grandly situated in 37° 47' N. lat., at the N. end of a peninsula 30 M. long, separating the Pacific Ocean from San Francisco Bay (see p. 486). The city lies mainly on the shore of the bay and on the steep hills rising from it, but is gradually extending across the peninsula (here 6 M. wide) to the ocean. On the N. it is bounded by the famous *Golden Gate, the narrow entrance (1 M. across) to San Francisco Bay. The city is on the whole well and substantially built but contains fewer large buildings of architectural importance than any other city of its size in the country. In 1890 it contained 298,997 inhab., including about 15,000 Chinese (comp. p. 485).

The Mission of San Francisco (see p. 484) was founded by the Mexicans in 1776, but the modern city really sprang from the village of Yerba Buena (‘good herb’, i.e. wild mint), founded in 1835, about 3 M. to the E. In 1846 Yerba Buena came under the American flag, and in the following year its name was changed to San Francisco. In 1848, the year of the discovery of gold in California, its population was about 500. In 1850 it was about 25,000, and each subsequent decade has seen an extraordinary increase (56,302 in 1860; 119,473 in 1870; 233,956 in 1880). San Francisco received a city-charter in 1850, but its corrupt municipal government led in 1856 to the formation of a Vigilance Committee, which took the law into its own hands and made a very thorough reformation. — To make the present site of San Francisco suitable for a large city, an immense amount of work had to be done in cutting down hills and ridges, filling up gullies, and reclaiming the mud flats on the bay (comp. p. 84). The city, however, is still remarkably hilly; and one of its most characteristic sights is the cable-cars crawling up the steep inclines like flies on a window-pane.

The Climate of San Francisco is wonderfully equable. The mean annual temperature is about 57° F. and no month varies to any great extent from this average. September has the highest average (about 61°), and a few hot days (80-90°) occur about midsummer. The mean temperature of January is about 50°. Visitors should always have warm wraps at hand, especially in the afternoon, when a strong wind usually blows in from the sea. The summer climate is not generally considered beneficial for persons of weak lungs, owing to the wind and the dust; but the man of ordinary health finds the air invigorating and stimulating all the year round. The annual rainfall is 25 inches. — Earthquakes occur occasionally in San Francisco but are never very destructive. The severest (1868) damaged some old and badly built structures and caused the loss of one life.
The Commerce of San Francisco is extensive, the value of its exports and imports amounting to about $150,000,000. Among the chief exports are gold and silver, wine, fruit, wool, and bread-stuffs; the imports include coal, timber, rice, sugar, tea, and coffee. The manufactures include iron, flour, silk and woollen goods, canned fruits and vegetables, leather, liquors, ship-building, meat-packing, carriages, silver-ware, sugar, glass, brass, machinery, cigars, cordage, etc., and had in 1890 a value of $131,000,000.

The population is very heterogeneous, every European nationality being represented here, to say nothing of the Mexicans, Chinese (p. 485), Japanese, Africans, and other non-European races.

Market Street (Pl. G-C, 2-7), the chief business-thoroughfare, extends to the S.W. from the Ferry Depot (Pl. G, 2), a handsome structure with a tower 250 ft. high, to a point near the twin Mission Peaks (935 ft.), a distance of about 34\(\frac{1}{2}\) M. The visitor should begin his inspection of the city by ascending to the top of the Spreckels Building (300 ft. high), at the corner of Market St. and 3rd St., or to that of the tower of the Chronicle Building (Pl. F, 3), in Market St., nearly opposite the Palace Hotel (p. 481), which affords a good bird's-eye view of the city from a central point. He may then supplement this by following Kearny Street (Pl. F, 4-3), with many of the best shops, to *Telegraph Hill (Pl. F, 1; 295 ft.), which commands a good view of the Golden Gate (p. 482), the waterfront of the city, the Bay, Mt. Tamalpais (N.W.; p. 487), Mt. Diablo (N.N.E.; p. 488), etc.

Following Market St. towards the S.W. from the Chronicle Building, we pass between the recently burned-down Baldwin Theatre (Pl. F, 4; right) and the Academy of Sciences (Pl. F, 4; left), the latter with a fine inside staircase of gray Californian marble. Adjacent is the huge granite building of the Emporium, the 'Whiteley's' of San Francisco. A little farther on, at 8th St., a few steps to the right bring us to the large City Hall (Pl. E, 4, 5), a handsome and original structure in Yerba Buena Park, just to the N. of Market St., erected in 1892-96 at a cost of over $4,000,000 (800,000 ft.). It contains a Free Library, with 85,000 volumes. Near it are the large St. Ignatius Church and College (Pl. E, 5) and the Mechanics' Pavilion (Pl. E, 5; the property of the Mechanics' Institute, 31 Post St., with a library of 75,000 volumes).

The U. S. Branch Mint (Pl. F, 4), in Fifth St., at the corner of Mission St., contains interesting machinery and a collection of coins and relics (adm. 9-12). In 1891 it coined bullion to the value of $32,115,007; in 1894-91, $951,000,000.

Among the other chief buildings in the business-quarter are the Post Office (Pl. F, G, 2), at the corner of Battery and Washington Sts.; the Stock Exchange (Pl. F, 3), 327 Pine St.; the Merchants' Exchange (Pl. F, 3) and the Bank of California (Pl. F, 3), California St.; the First National Bank (Pl. F, 3), at the corner of Bush and Sansome Sts.; the Crocker Building; the lofty Mills Building; and the Odd Fellows Hall (Pl. E, 4), cor. Market and 7th Sts. — The *California Market (Pl. F, 3), extending from California St. to Pine St., presents
a wonderful show of fruits and vegetables (best in the early morning). — The Mercantile Library (Pl. E, 4), at the cor. of Van Ness and Golden Gate Avenues, is a handsome and well-equipped building, with an excellent collection of 70,000 volumes. — The California State Mining Bureau, in the building of the Society of Californian Pioneers (Pl. F, 4), 24 Fourth St., contains interesting collections of Californian minerals and relics (10-5). The California Academy of Sciences (see p. 483; Market St., near 4th St.), the California Historical Society, and the Geographical Society of the Pacific offer much that is of interest to the scholarly visitor, and the historical student should also inspect some of the old Spanish grants in the Surveyor General's Office (610 Commercial St.). The California Eye & Ear Hospital (Pl. E, 3) is in Sutter St. — In Portsmouth Sq., bounded by Kearny, Washington, Montgomery, and Clay Sts. (Pl. F, 2), is a monument to Robert Louis Stevenson (1850-94), in the form of a Spanish galleon.

One of the most interesting historical relics of San Francisco is the old Mission Dolores (Pl. D, 7; see p. 482), at the corner of Dolores and 16th St. (Valencia St. cable-cars pass within two blocks). The old church, dating from about 1778, is built of adobé ('adóby'), and is adjoined by a tangled and neglected little churchyard. Adjacent is a new church of no special interest.

Among the educational institutions of San Francisco may be mentioned the Cooper Medical College (Pl. C, D, 3); the handsome new buildings of the Medical and Legal Departments of the University of California, near Golden Gate Park (Pl. A, 7; comp. p. 451), the Cogswell Polytechnic (cor. Folsom and 26th Sts.); the California School of Mechanical Arts (Utah St.; founded by Mr. James Lick, p. 492); the Boys' High School (Pl. D, 3), and the Girls' High School (cor. Geary and Scott Sts.). San Francisco possesses 24 free kindergartens, attended by over 2000 children.

The Presidio (Pl. A, 1, 2), or Government Military Reservation (approached by the California St., Union St., or Jackson St. cable cars), garrisoned by two regiments of U. S. troops, has an area of 1500 acres and stretches along the Golden Gate for about 4 M. Its walks and drives afford beautiful views, the finest, perhaps, being that from Fort Point or Winfield Scott. A military band plays at the Presidio every afternoon, Thurs. & Sat. excepted. — There is another small military reservation at Black Point or Point San José (Pl. D, 1; reached by Union St. cars), with Fort Mason.

The part of California Street between Powell St. and Leavenworth St. (Pl. E, 3) is known as 'Nob Hill', as containing many of the largest private residences in San Francisco. Most of these are of wood, and no expense has been spared to make them luxurious residences, but a great opportunity to develop something fine in timber architecture has been lost in an unfortunate attempt to reproduce forms that are suitable for stone buildings only.
Among the principal houses are the mansions of the Stanford (cor. of Powell St.), Hopkins-Searles (cor. of Mason St.; now the Mark Hopkins Institute of Art, belonging to the University of California), Crocker (cor. of Taylor St.), Huntington (cor. Taylor St.), and Flood families (cor. of Mason St.; stone). Other large houses are found in Van Ness Avenue (Spreckels House, cor. of Clay St.), Jackson St. (Tevis House, cor. of Taylor St.), etc.

The Chinese Quarter is one of the most interesting and characteristic features of San Francisco, and no one should leave the city without visiting it. It may be roughly defined as lying between Stockton, Sacramento, Kearny, and Pacific Streets (comp. Pl. F, 2) and consists mainly of tall tenement buildings, divided by narrow alleys and swarming with occupants.

During the day strangers may visit China Town unattended without danger; but the most interesting time to visit it is at night, when everything is in full swing until after midnight, and it is then necessary to be accompanied by a regular guide. The guides, who are generally detectives, may be procured at the hotels and charge $5 for a party of not more than 4-6 persons. One of the chief features of China Town is the Theatres (adm. 10-25c.; for white visitors, who are taken on to the stage, 50c.), remarkable for the length of the performances (a single play often extending over days or even weeks), the primitive scenery and absence of illusion, the discordant music, the curious-looking audience, the gorgeous costumes, and the seeming want of plot and action. No women appear on the stage, and the female parts are taken by men. Among the other points of interest usually visited by strangers are the Joss Houses (where visitors are expected to buy bundles of scented incense-tapers), the Opium Joints, the Drug Stores (extraordinary remedies), the Curiosity Shops, etc. The visit is usually wound up at one of the Chinese Restaurants in Dupont St., where an excellent cup of tea and various Chinese delicacies may be enjoyed.

China Town contains about 15,000 inhabitants. A large proportion of these are men, and children are very scarce. There are several Chinese Missions with schools, etc.

The largest of the public parks of San Francisco is Golden Gate Park (Pl. A, 5, 6; reached by several lines of tramway), which extends from Stanyan St. to (3 M.) the Pacific Ocean, with an area of 1013 acres and a width of 1/2 M. The landward end of the park is tastefully laid out and planted with trees (eucalyptus, Monterey cypress, Monterey pine, etc.), but the seaward end is still in the condition of bare sand-dunes characteristic of the entire peninsula. The reclaimed portion of the park contains monuments to Garfield, Francis Scott Key (author of the ‘Star-spangled Banner’; by W. W. Story), Gen. Halleck, Thomas Starr King (by Daniel C. French), and Balboa (by Linden; unveiled in 1898), a fine conservatory (with a specimen of the Victoria Regia lily), and a children's playhouse. Here, too, is the Art Gallery of the Midwinter Exhibition of 1894, now containing an interesting Museum. Good views are obtained of the Golden Gate and (from the W. end) of the surf rolling in on the ocean-beach. Band on Thurs., Sat., & Sun. afternoons. — The Hill Park (Pl. B, C, 6), 1/2 M. from the E. end of Golden Gate Park, commands fine views (highest point 570 ft.).

Near the N.E. corner of Golden Gate Park is a group of cemeteries, the largest of which is the Laurel Hill Cemetery (Pl. A, B, 4),
containing many fine monuments. The adjoining *Lone Mountain (470 ft.), the top of which is marked by a large wooden cross, commands a splendid *View of the city, the Ocean, San Francisco Bay, the Golden Gate, Mt. Tamalpais, and Mt. Diablo. The *Yerba Buena (p. 482) grows on Lone Mt. — The *Presidio Reservation (p. 484) lies a little to the N. of Laurel Hill Cemetery.

**Excursions**. The most popular short excursion from San Francisco is that to (6 M.) *Point Lobos, with *Sutro Heights, the *Cliff House, and the *Seal Rocks*, which may be reached by driving via the Golden Gate Park or Geary St. (Point Lobos Avenue), by the Ocean Beach Railway along the S. side of Golden Gate Park (reached by Haight St. cars), by electric car (see p. 481), or by the Cliff Railway from the N.E. corner of Laurel Hill Cemetery (Pl. B. 4; reached by Powell St. cars, with transfer at Jackson St.). It is advisable to go one way and return another. The through-fare, incl. transfers, is 5c. The Cliff Railway skirts the rocks overhanging the *Golden Gate (p. 482), of which it affords a magnificent *View, and ends near the entrance to *Sutro Heights Park, the beautifully laid-out grounds of Mr. Adolph Sutro (freely open to the public). The fine trees and plants here grow luxuriantly on the originally sandy but now well-watered site. The statuary could be dispensed with. *Fine *View from the terrace over the Pacific Ocean, with the *Farrallone Islands (30 M. to the W. (lighthouse). At our feet lies the *Cliff House, a hotel and restaurant. The chief attraction here is the view from the piazza of the *Seal Rocks, a stone's throw from the land, which are covered with hundreds of huge sea-lions (Span. *lobos marinos), basking in the sun. Some of the animals are 12-15 ft. long and weigh from 1000 lbs. upwards; and their evolutions in the water are very interesting. Their singular barking is easily audible amid the roar of the breakers. Near the Cliff House are the huge and magnificent *Sutro Public Baths, with salt-water swimming pools, an aquarium, restaurants, and a theatre. — The station of the *Ocean Beach Railway (see above) lies on the beach, a little to the S. of the Cliff House. Drivers who have come by Geary St. or Golden Gate Park may vary the route in returning by following the beach for about 3 M. and then taking the San Miguel Toll or Mission Pass Road (comp. Plan; fine views). To the right, near the beginning of this road, lies *Lake Merced.

Among the other short drives from San Francisco may be mentioned that to *Mt. San Bruno (1325 ft.), 7 M. to the S. (2 M. from *Baden, p. 490), a good point of view. — A drive along the water-front gives some idea of the commercial activity of San Francisco and may include visits to the large *Union Iron Works (by permission obtained at city-office) at *Potrero Point (Pl. H. 7; also accessible by tramway), where iron ships of war are built, and to the *Dry Dock at *Hunter's Point (Pl. H. 4).

The *Government Piers in the Bay of San Francisco may be visited by the steamer 'General McDowell', which sails several times daily from the foot of Clay St. (Pl. G, 2) to *Alcatraz, *Angel Island, *Port Mason (Black Point), and the *Presidio (permit at the Military Headquarters, cor. of Market St. and Grant Ave.). *Alcatraz Island is strongly fortified and contains a military prison and a torpedo station. *Angel Island is also fortified. The *Presidio and *Port Mason are described at p. 484. — The largest naval station near San Francisco is at *Mare Island, reached via *Vallejo Junction and Vallejo (see p. 450). The island is the headquarters of the U. S. *Marine Corps and contains a *Navy Yard, with large dry docks and interesting machinery.

*San Francisco Bay, a noble sheet of water 50 M. long and 10 M. wide, gives San Francisco one of the grandest harbours in the world and affords numerous charming excursions. The various *Ferries start from the foot of Market St. (Pl. G, 2). Excursion-steamer also ply sometimes through the Golden Gate to the Pacific Ocean, standing out to sea for a short distance and then returning.

1. The steamer starting farthest to the N. plies to the N. across the Bay, affording a good view of the Golden Gate (left), to (6 M.) *Sausalito or *Saucelito (*Terrace Hotel, $ 2-3/2), a pleasant little yachting, bathing,
and fishing resort, with fine laurels and other trees. A fine walk, affording
good views of the Golden Gate, leads round the promontory via Lime
Point to (4 M.) Point Bonita, the N. horn of the Golden Gate (lighthouse).

(From Sausalito the North Pacific Coast Railroad (narrow-gauge) runs to the N. to (51 M.) Cazadero. — From (5 M.) Mill Valley (on a branch of this line) a winding mountain-railway (views) ascends to (8% M.) the top of Mt. Tamalpais (3606 ft.; 2 hrs. from San Francisco; through-fare $1, return $1.40). The railway terminates at the Tavern of Tamalpais (52½/2, about 200 ft. below the summit. The "View from the top includes the Pacific Ocean, the Cascade Mts., the Sierra Nevada, the Santa Cruz Mts., the Contra Costa Hills (overtopped by Mt. Hamilton), Mt. Diablo, San Francisco, and San Francisco Bay. A trail has been cut from the railway to Bolinas Ridge, etc. From Mill Valley excursions may also be made to the Red Wood Cañon and other points of interest. — 10 M. San Anselmo, the junction of a short line to San Rafael (see below); 24 M. Camp Taylor; 21 M. Tocat-loma; 32 M. Point Reyes, a shooting and fishing preserve, at the head of Tomales Bay. Beyond (63 M.) Howard's (600 ft.) we pass through a fine red-wood district. — 5 M. Cazadero ("Cazadero Hotel, § 1/2-3", a favourite sporting and summer resort in the midst of the redwoods.)

(2). The second ferry plies to (6 M.) Tiburon, the starting-point of the
railway to San Rafael, Petaluma, and Ukiah (see below)

[From Tiburon to Ukiah, 107 M., San Francisco & North Pacific Rail-
way in 5 hrs. — 9 M. San Rafael (generally pron. "San Rafell"); "Hotel Rafael,
from $3½; Paristan, § 1½-2½; Mountain View," a charming little resort,
affording a pleasant and balmy relief to the dusty winds of San Francisco,
should be visited by every tourist, especially in the time of roses. It is a
favourite point for an ascent of (11 M.) Mt. Tamalpais (see above), of which
it affords an excellent view (carriages to the top in 3 hrs., descent in 2 hrs.).
The drive may include the Lagunitas Reservoir. San Rafael may be
easily taken in in conjunction with Sausalito (see p. 486). — 30 M.
Petaluma (American Hotel, § 2-3), with 3692 inhab., has a thriving trade
in grain and fruit. 45 M. Santa Rosa; 50 M. Fulton, the junction of a
branch-line to Guerneville; 51½ M. Mark West, with sulphur springs; 60 M.
Healdsburg. From (68½ M.) Geyserville stages run to (8 M.) Skaggs' Springs,
with a number of warm sulphur springs. — From (78 M.) Cloverdale (United
States Hotel, § 2) a stage-coach runs to (10 M.) the "Geyser Springs (2000 ft.;
Hotel, § 3), a number of boiling springs in the Devil's Cañon, near the
Pluto River. These springs vary greatly in temperature, appearance, and
character, but there are no true geysers among them (comp. p. 423). The
accepted theory ascribes them to chemical action. A guide is procured
at the hotel to point out and name the most interesting features. The
Geyser Springs may also be reached from Calistoga (p. 488). — Beyond
Cloverdale the line continues to run towards the N., with Russian River
at some distance to the right. From (96 M.) Hopland stages ply to various
points in the picturesque Clear Lake District (numerous mineral springs).
It is proposed to extend the line from (107 M.) Ukiah, the present terminus,
to Eureka, on Humboldt Bay.]

(3). The third ferry is that to Oakland, already mentioned at p. 451.
This is the route for the chief railways to the N., S., and E.

(4). Another line plies to (3 M.) Alameda Mole, whence a railway runs to (6 M.) Alameda (Parker Hotel, § 2), a pleasant suburban town
(11,165 inhab.), adjoining Oakland on the S. This route connects with the
narrow-gauge railway to San José and Santa Cruz (see p. 494).

From San Francisco to Calistoga, 73 M., railway in 3½-3½ hrs. —
From San Francisco to (23 M.) Vallejo Junction, see p. 450. We then cross
the strait by steamer to (31 M.) South Vallejo. 32 M. North Vallejo ("Val-
leyho"), a small town of 6313 inhab., opposite Mare Island (p. 486). The
train now runs to the N. through the fertile "Napa Valley, which is espe-
cially rich in grapes and other fruits. From (38 M.) Napa Junction a
branch-line runs to (13 M.) Suisun (p. 450). From (46 M.) Napa, a busy little
city of 4395 inhab., we may drive to the (6 M.) Napa Soda Springs. Beyond
(55 M.) Yountville we traverse extensive vineyards. 64 M. St. Helena, with many
fine vineyards, is the starting-point of stages to White Sulphur Springs,
488 Route 95. SAN FRANCISCO.

Etna Springs, and Howell Mountain. — 73 M. Calistoga (Magnolia, $2-2l/2), the terminus of the railway, is a pretty little town of 1200 inhab., with several warm mineral springs. About 5 M. to the W. is the curious "Petri-
ified Forest," a tract 4 M. long and 1 M. wide, over which are scattered the re-
manes of about 100 petrified trees. — About 12 M. to the N.W. of Cal-
istoga rises Mt. St. Helena (3345 ft.), an extinct volcano, which may be
ascended on horseback and affords an extensive view. From Calistoga
stage-coaches run daily to (27 M.) the Geyser Springs (p. 457) and to points
in Clear Lake District (p. 487).

From San Francisco to Mount Diablo. — We proceed by ferry and
train to (30 M.) Martinez, as described at p. 495, and go on thence by stage
to (2 M.) Clayton (Clayton Hotel, $1/2), whence the summit (6 M.) is
easily reached on horseback or on foot. Mt. Diablo (3855 ft.), a conspi-
cuous object for many miles round and well seen from San Francisco
(28 M. distant as the crow flies), commands a very extensive "View, in-
cluding the valleys of the Sacramento to the N. and the San Joaquin
on the S., the Sierra Nevada from Lassen's Peak on the N. to Mt. Whitney
in Clear Lake District (p. 487).

Sonoma (Union Hotel, §2), a city of 1200 inhab., in the Sonoma Valley,
to the N. of San Pablo Bay, is interesting as one of the chief seats of
the Californian vine-culture. The wine is kept in tunnels excavated in
the hills of volcanic sandstone. Sonoma is reached by railway (43 M.)
from Tiburon (p. 487) or by stage (15 M.), from Napa (p. 487).

Californian Wine (communicated). — Wine-making in California
dates from an early period, the European vine having been brought here
by the early missionaries. No record has been found of the date of the
event, nor can the species introduced be identified with any known sort.
It was probably brought from one of the Balearic Isles, the first mis-
ionaries having all been Catalans from Majorca, or it was, perhaps, a
seedling raised on the spot. However this may be, it had attained a
wide diffusion before the transfer of the country to the United States
and was then found growing at almost all the Missions. Its fruit is
abundant and quite palatable for the table, but makes a strong heady
wine, not suited to the demands of commerce, though popular enough
among a pastoral people, whose lives were spent out of doors and largely
in the saddle. The first effort of the American emigration to improve
the native wines did not meet with a distinguished success. They rea-
soned, justly enough, that California had within her borders every variety
of soil and a climate decidedly superior to that of any part of Europe,
because free from the unseasonable storms and inopportune frosts which
so affect the viticulturists of the old world. They were, however, ignorant
that besides soil and climate it was indispensable, in order to make a
good wine, to have the proper sorts of grapes; for a fine wine can no
more be made from a vulgar grape than the proverbial 'silk purse from
a sow's ear'. In fact the most eminent French authority on the subject
lays down the rule broadly that "the brand of the wine is in the grape'.
The distinctive character of the wine of Burgundy is derived from the Pinot
grape; and, in like manner, those of the Rhine, the Moselle, and the Medoc
derive their essential characteristics from the particular sorts of grapes
cultivated in those districts. But while the character of the wine depends
on the grape from which it is made, its quality, within the range of that
defined character, depends on soil, situation, exposure, and climate. All
this is now recognized as elementary truth, but was little known even a
decade ago.

The Germans were the first to improve the native wines. Finding
the Mission grape did not make a wine suited to their national taste,
they, at an early date, imported scions of the favourite stocks of their own
country and propagated them. As a rule the Germans make white wine,
and their choice of sorts was limited to those appropriate for such. Hence
the white wines of California experienced a marked improvement twenty
years ago, while her red wines continued to be still made of the mission
grape. The late Col. Harasthy introduced many years since the Zinfandel and some other European vines for the production of red wine, but they were all what the French term 'cépages d'abondance', i.e. sorts which produced large crops. With the grape, however, as with many other things, quantity and quality go in inverse proportion. The Zinfandel grape was extensively propagated and became popular, for it was a decided improvement on the mission sort, had the advantage of being an early and abundant bearer, and made a wine which matured in two years. To the immigrants from the South of Europe — Frenchmen, Spaniards, Italians, Greeks, Dalmatians, etc., of whom such large numbers are to be found on the Pacific Coast — it was quite a boon, for it supplied them with their accustomed beverage, at a reasonable price, and it came just at the time when the devastations of the phylloxera in France rendered it almost impossible to obtain any ordinary claret of that country pure. Within the limits of the domestic demand, too, its production was profitable, by reason of its bountiful crops. But that limit was rigidly fixed. The product of the Zinfandel grape is essentially a peasant's wine; its consumption cannot be indefinitely extended by mere cheapness. No converts were ever made from whiskey or beer to wine by such a beverage, and those accustomed to the use of wine as a luxury — consumers of the better sorts of French wines — found it decidedly unpalatable. Hence production soon trod closely on the heels of consumption, and ere long outstripped it. For some years there has been no profit in the industry.

Meanwhile about 1880 and 1881 intelligent Americans had their attention directed to viticulture, and ere long learned, as the Germans had learned before them, with respect to white wines, that to make red wines, fit to compete with the products of the French vineyards, the first requirement was to have the proper sorts of grapes. They accordingly began about the date mentioned to import and propagate the sorts from which the great wines of France are made, and from that period dates the marked improvement of California red wines. A characteristic of these grapes, however, is the largely enhanced expense of cultivating them, the smallness of their crops, and the length of time necessary to bring their wine to maturity and render it fairly potable; so that the cost of the wine to the producer is enhanced in a degree quite proportioned to its increased value. The wine dealers who have become accustomed to the cheap blends made on a Zinfandel base are averse to the burden of carrying stocks for four or five years without an assured return for enlarged rents, quadrupled stocks of cooperage, and quadrupled care in handling. From this cause those in quest of the best California wines — especially red wines — have to seek them in the hands of the producers.

The principal districts of the state in which the vine has been extensively cultivated are: 1. The plain of which Los Angeles may be considered the centre and which was the centre of population in Spanish and Mexican days; 2. The San Joaquin Valley; 3. Napa and Sonoma Counties, to the N. of San Francisco Bay; 4. Santa Clara County, with the adjoining mountains of Santa Cruz to the S. of it. The Los Angeles and San Joaquin Valleys, from their great heat, are best able to produce wines of the Spanish and Portuguese types. From the proper sorts of grapes, grown in these districts, are made very fair ports and sherries, while brandy and very fine raisins are also produced there in considerable quantities. In Napa and Sonoma the vine is extensively cultivated, and excellent white wines of the Rhenish type are made. The prevailing use of the Zinfandel grape is, however, hostile to the production of red wines of any high quality, while the extensive diffusion of the phylloxera in both those counties threatens the extinction of the industry within a moderate time. The Santa Cruz mountains, and especially the adjoining foot-hills in Santa Clara County, are producing quite a considerable amount of excellent wine of the Bordeaux type, both red and white. Bordeaux stocks have been imported and extensively planted, and the local situation resembles so strikingly that of the Medoc as to suggest a natural correspondence in products. In fact Santa Clara and the S. part of San Mateo counties are thrust out between the waters of the Ocean and those
of the Bay of San Francisco just as the Medoc is between the Bay of Biscay and the estuary of the Garonne, and the tempering effects of these large bodies of water on the climate and vegetation of the intermediate tongue of land must constitute an important factor in the quality of the viticultural products.

The production of wine in the State, according to the reports of the State Viticultural Commission, rose from about 4,000,000 gallons in 1877 to 31,000,000 gallons in 1897.

96. From San Francisco to San José, Santa Cruz, and Monterey.

a. Via Standard-Gauge Railway.

Southern Pacific Railway to (50 M.) San José in 1½-2 hrs. (fare $1.25; parlor-car 25c.); to (121 M.) Santa Cruz in 4-4½ hrs. ($3); to (125 M.) Monterey in 4-4½ hrs. ($3).

This excursion should not be omitted by any visitor to San Francisco. It is advisable to go one way and return the other; and in any case the section of the narrow-gauge railway between San José and Santa Cruz should be included. Perhaps the best plan is to go to Monterey (p. 493) by the standard-gauge railway, stopping off for visits to Palo Alto (see below), San José (p. 491), etc.; return via Pajaro (p. 492) to Santa Cruz (p. 494); drive thence to the Big Trees (p. 494); and thence take the narrow-gauge line back to San Francisco. The drives across the Sierra Morena (see below) are well worth taking.

San Francisco, see p. 481. The train starts from the station at the corner of 3rd and Townsend Sts. (p. 481), stops again at the corner of 26th and Valencia Sts., and soon leaves the city behind. At (7 M.) Ocean View (290 ft.) we see the Pacific Ocean to the right. About 3 M. beyond (9 M.) Colma, a small wayside station, San Francisco Bay, which we skirt for 30 M., comes into view on the left. 12 M. Baden; 14 M. San Bruno; 17 M. Millbrae, with the large country house of Mr. D. O. Mills (right). — 21 M. San Mateo, a pleasant little town, embosomed in live-oaks, is the starting-point of a stage line to (32 M.) Pescadero (through-fare $3.10).

The road to Pescadero crosses the Sierra Morena (views), passing the interesting old village of Spanishtown. The *Cliffs at Gordon's Landing tower 250 ft. above the sea, recalling the Shakspeare Cliff at Dover. — Pescadero (Swanton Ho., Pescadero Ho., $1½-2), a small village on the Pacific coast, at the mouth of Pescadero Valley, is famous for its Pebble Beach, on which agates, opals, jaspers, and other similar stones are found.

25 M. Belmont. — 28 M. Redwood (Price's Hotel, $1½-2½), so named from the trees in the timber of which it does its principal trade. A fine road runs hence across the Sierra Morena to San Gregorio, traversing a splendid redwood forest (*Views). — 32 M. Menlo Park (Menlo Park Hotel, Oak Grove Villu, from $1½) is a favourite residence of the wealthy merchants of San Francisco and contains many fine houses, surrounded by beautifully laid out grounds and noble trees. Beyond Menlo Park the red roofs of the Stanford University (see p. 491) may be seen to the right. — 33 M. Palo Alto (Palo Alto Hotel), taking its name ('tall tree') from a fine redwood to the left of the railway, is the nearest station to the (1 M.) University.
of Monterey. SAN JOSÉ. 96. Route. 491

*Leland Stanford Jr. University, founded by Mr. and Mrs. Leland Stan-
ford in memory of their only son and endowed by them with upwards
of $30,000,000 (6,000,000£.), was opened in 1891 and has now a staff
of about 80 instructors and an attendance of 1100 students, of whom many
are women. It is finely situated on the Palo Alto stock-farm (a tract of
3400 acres, deeded to the University), on a plain near the foot of the coast
mountains. The buildings were mainly designed by H. H. Richardson,
who took the motif of their architecture from the cloisters of the San
Antonio Mission. The material is buff, rough-faced sandstone, sur-
mounted by red-tiled roofs, producing brilliant effects of colour in con-
junction with the live-oak, white oak, and eucalyptus trees outside,
the tropical plants in the quadrangle, and the blue sky overhead. The
main buildings at present form a low quadrangle, enclosing a court 565 ft.
long and 246 ft. wide, the buildings of which are connected on the inner
side by a beautiful colonnade; and there are besides two dormitories,
an art museum, a mechanical department, and a little village of profes-
sors' houses. The completed scheme includes an outer, two-storied quad-
rangle, with cloisters on the outside, a memorial arch, and a chapel
with a Richardsonesque tower. — Near the University are the celebrated
*Palo Alto Stables and Paddocks (Mr. Stanford's), where 300 fine trotting
horses and running horses may be seen. Among the most famous horses
bred at this stud are Sunol (who trotted a mile in 2 min. 7/2 sec.), Palo
Alto (247/4), Arion, Electroineer, Electricity, and Advertiser.

39 M. Mountain View is the nearest station to (6 M.) Cupertino,
the vineyard of Mr. John T. Doyle, where one of the finest red wines
in California is produced (Las Palmas). The railway now follows
the *Santa Clara Valley, one of the fairest and most fertile valleys
in California, sheltered on either hand by mountains. Large quan-
tities of fruit (esp. grapes, prunes, and peaches) and wheat are grown
here. At Agnews, as we approach Santa Clara, a large Insane Asylum
is seen to the left.

47 M. Santa Clara (70 ft.; Valley Hotel, $1½), a pretty little
town with 2891 inhab., is the seat of Santa Clara College, a large
institution founded by the Jesuits in 1851 and including a church
belonging to an old mission of 1777 (150-200 students). Santa Clara
is connected with (3 M.) San José (see below) by the *Alameda, a
fine avenue traversed by an electric tramway (fare 10 c.). It is well
worth while, especially in the rose season, to leave the train at Santa
Clara and drive (arr. or tramway) through the Alameda to San José.

50 M. San José ('Hosay'; 90 ft.; *Hotel Vendôme, with pleasant
grounds and sun-parlour, $3-4; St. James, $2-2½; Auzerais,
E. P.), a beautiful little city of 18,060 inhab., is of importance as the
chief place in the fruitful Santa Clara valley (see above) and is also
frequented on account of its delightful climate. The most con-
spicuous building is the Court House, the dome of which affords an
extensive *View, including the Calaveras Mts. (with Mt. Hamilton)
to the E., the Santa Cruz Mts. to the S., the Contra Costa Mts. to
the W., and San Francisco Bay to the N. The City Hall and Post
Office are large buildings. San José also contains several good schools
and colleges.

San José is the starting-point for (26 M.) Lick Observatory, on Mt. Ham-
ilton. Stages start every morning (except Sun.) and reach the Observatory
about 1.30 p.m., halting 1 hr. and regaining San José at 6 p.m. (return
On Sat., when visitors are allowed to look through the great telescope between 7 and 10 p.m., the stage starts at about 1 p.m. and returns about 9 or 10 p.m. (return-fare $5). Parties of four or more should hire a private carriage. The road, though uphill nearly all the way, is so well made and easily graded that a fair rate of speed is maintained, while the beautiful and ever-varying views prevent weariness. Innumerable wild-flowers line the way, while the manzanita, live-oaks, and other trees are also interesting. The Observatory is in sight most of the time. We cross two intervening ridges. About 7 M. from San José we pass near the mouth of the Penitencia Cañon (so called because the monks of the San José Mission kept their retreats here), which has been reserved as a city-park and contains Alum Rock and several mineral springs (hotel). On crossing the second of the intervening ridges, we descend into Smith Creek (2145 ft.), where a halt is generally made for dinner (75 c.) at the small hotel. The hotel lies at the base of Mt. Hamilton, 1 1/2 M. from the Observatory in a direct line (footpath), but 7 M. by the road, which is said to make 365 bends. Visitors sometimes spend Sat. night here and return to San José on Sun. morning. — The Lick Observatory, founded with a legacy of $700,000 (140,000 l.) left by Mr. James Lick (1793-1876) of San Francisco, stands on the summit of Mt. Hamilton (1210 ft.), and is in point of situation, equipment, and achievement one of the leading observatories of the world. It forms the astronomical department of the University of California (p. 451). The Great Telescope is one of the largest and most powerful refracting telescopes in existence; its object-glass, 36 inches in diameter, was made by Alvan Clark of Cambridge (p. 95). Mr. Lick is buried in the foundation-pier of the telescope. Visitors are received courteously at the Observatory and shown all the objects of interest (10-4, Sat. 7-10 in the evening; no admission on Sun.), but there is no inn or restaurant nearer than Smith Creek. The View from the Observatory is very extensive, sometimes including wonderful effects of cloud and mist. It embraces, on a clear day, the Sierra Nevada, the Pacific Ocean, Santa Clara Valley, Angel Island, Mt. San Bruno (p. 486), and Mt. Tamalpais (p. 487). Loma Prieta (see p. 494) is conspicuous to the S. Comp. 'Handbook of the Lick Observatory', by E. S. Holden.

About 13 M. to the S. of San José, in a spur of the coast-range, are the interesting Abmaden Quicksilver Mines, which may now be reached by railway (fare 35 c.). — An excursion may be made to the Pacific Congress Springs (700 ft.), 10 M. to the S.W. (6 M. from Los Gatos, p. 494), which are beneficial in rheumatism. If they prefer, visitors may change carriages at San José and proceed to Santa Cruz via the narrow-gauge railway (comp. p. 494).

Beyond San José the Lick Observatory (see above), on the top of Mt. Hamilton, is seen to the left. 55 M. Hillsdale (150 ft.); 69 M. Madrone (340 ft.), 6 M. to the W. of the Madrone Springs; 80 M. Gilroy (190 ft.; Southern Pacific Hotel, $2), a busy little city of 1694 inhab., 14 M. to the W. of the frequented Gilroy Springs (stage daily). Beyond Gilroy the line goes on S. to (94 M.) Hollister and (101 M.) Tres Piños. Our line, however, turns to the right (W.) and runs towards the coast. 87 M. Sargent's. — 99 M. Pajaro ('Paharo'; 25 ft.) is the junction of the lines to Santa Cruz (right) and Monterey (left). For the journey from Pajaro to (121 M.) Santa Cruz, see p. 494, where it is described in the reverse direction.

The train to Monterey runs towards the S.W. 110 M. Castroville is the junction of a line running to the S. to (116 M.) Santa Margarita.

Among the chief places on this line are (33 M.) Soledad, with the remains of a mission, founded in 1791, now a Salvation Army colony; 62 M. San Lucas; 97 M. San Miguel, with a mission of 1797; and (106 M.) El Paso de Robles ('Pass of the Oaks'; 720 ft.; Springs Hotel, $2-4), frequented
for its hot sulphur springs (95-110° Fahr.) and mud baths (122° Fahr.),
which are good for rheumatism, gout, and cutaneous affections.

From Santa Margarita a stage runs daily to (10 M.; through-fare S) San Luis Obispo (Hotel Ramona, $2-3), a pleasant little city of 2995 inhab.,
in the midst of a fine grazing country. It is the site of an old Mission,
founded in 1772. San Luis Obispo is connected by the Pacific Coast Railway
with (10 M.) Port Harford, which has regular steamer communication
with San Francisco. To the S. this railway runs to (32 M.) Santa Maria,
Los Alamos (54 M.), and (56 M.) Los Olivos (p. 496), whence it is intended to
prolong it to Santa Barbara (p. 497)

124 M. Del Monte, the station for the (1/3 M.) Hotel Del Monte
(see below). — 125 M. Monterey (*Hotel del Monte, see below,
$3-4, R. from $1; Alta Vista, $1½-2; El Carmelo, at Pacific Grove,
see below, $2), situated on the S. side of the Bay of Monterey,
85 M. from San Francisco by sea, is one of the quaintest and most
interesting towns in California (1662 inhab., largely of Spanish blood).

Its site was visited by the Spaniards in 1602, but it was not until 1770
that the Mission de San Carlo de Monterey was founded on this spot. Monterey
was the capital of California until its conquest by the Americans in 1846,
and with the removal of the seat of government went the commercial
importance and life of the little town, which is now one of the quietest
places in the State. It is, however, extensively visited on account of its
balmy climate (warm in winter and cool in summer; mean temp. of Jan.
ca. 50°, of June, July, and Aug. 60-64°), its beautiful sandy beach, and
its charming surroundings. Many of its buildings are of adobé. Some
remains of the old Spanish fort still remain, while the Roman Catholic
Church occupies the site of the Mission, which was removed to Carmelo
Valley in 1771 (see p. 494).

The *Hotel del Monte ('Hotel of the Forest'), one of the most com-
fortable, best-kept, and most moderate-priced hotels in America, lies in
the midst of exquisite *Grounds, in some ways recalling the fine country
parks of England, though, of course, the vegetation is very different.
Among the noble old trees which surround it are innumerable live-oaks
and Monterey pines and cypresses, while the *Gardens offer a continual
feast of colour. One section of the gardens, known as 'Arizona', is
devoted to cacti of all kinds, and in another part of the grounds is a *Maze
of cypress hedges. A little to the N. of the hotel is the pretty little boating
lake named the Laguna del Rey, while on the beach, ½ M. from the
hotel, is a large Bathing House, including four swimming-basins. Nearly
opposite the hotel is the Hotel del Monte Club House.

The chief excursion from Monterey is the so-called **Seventeen Mile
Drive, leading round the peninsula on which the town lies. As we leave
the town, going towards the W., we see, on the hill to the left, a *Statue of
Padre Junipero Serra, the founder of the Mission, erected in 1891. To the right
is the Bay of Monterey, with its white sandy beach. About 1 M.
beyond Monterey is the summer settlement of Pacific Grove (El Carmelo
Hotel, see above), to which the railway has been extended. In 1 M. more
we pass near the lighthouse on Point Pinos, the S. headland of the Bay
of Monterey, and turn to the left. The next part of the road lies mainly
through trees, passing not far from the little Lake Majella. To the right
is the Moss Beach (fine algae, or sea-mosses). Farther on we have a fine
unimpeded view of the Pacific Ocean, and about 7 M. from Monterey reach
the *Seal Rocks, where we enjoy a spectacle similar to that mentioned at
p. 486. Another mile brings us to *Cypress Point, with its flat, umbrella-like
Monterey cypresses (*Cupressus macrocarpa), a singular, crooked, mis-shapen
tree indigenous to this locality. Beyond Cypress Point the road runs to the
E., passing Pebble Beach, where agates, etc., may be picked up; Chinese Cove,
with a small Chinese settlement; the nucleus of a small Zoological Garden
(grizzly bear, buffaloes, etc.); and the sandy Pescadero Beach. The road
then turns to the left (N.), and a short digression may be made to the
right, to visit the old Carmelo Mission, where the original church has lately been supplied with a new roof. The remainder of the drive (5 M.) runs through wood.

Good fishing is obtained in the Carmelo River (reserved for guests of the Hotel del Monte), as well as in the bay. Deer and quail shooting may be enjoyed in the adjacent woods and mountains.

b. Via the Narrow-Gauge Railway.

Ferry to (9 M.) Alameda; Railway thence to (46 M.) San José (fare $1.25, chair-car 25 c.), Santa Cruz (80 M.; $2.80), and (128 M.) Monterey ($3). Comp. remarks at p. 490.

From San Francisco to (3 M.) Alameda Mole and (9 M.) Alameda, see p. 487. The line skirts the E. shore of San Francisco Bay (views to the right). 16 M. San Lorenzo; 24 M. Alvarado; 29 M. Newark. At (38 M.) Alviso we reach the smiling Valley of Santa Clara (p. 491). 44 M. Santa Clara (p. 491). — 46 M. San José, see p. 491.

The most picturesque part of the line soon begins now, as it ascends over the Santa Cruz Mts. (views). 55 M. Los Gatos ('The Cats'; 400 ft.), a pretty little town on the E. slope of the mountains, lies in the warm belt and grows oranges successfully. Farther on we ascend through a cañon with fine rock-scenery and towering redwood trees. 58 M. Alma (560 ft.); 61 M. Forest Grove. From (62 M.) Wright's (900 ft.) we descend rapidly, through similar scenery, towards the coast. 74 M. Felton (275 ft.). — 75 M. Big Trees (270 ft.). the station for the famous *Big Trees of Santa Cruz.

This grove (adm. 25 c.) contains about a score of the genuine Redwood (*Sequoia sempervirens; comp. p. 450) with a diameter of 10 ft. and upwards. The largest is 23 ft. across; one of the finest, named the Pioneer, has a circumference of 70 ft. A large hollow tree is shown in which Gen. Fremont camped for several days in 1847. Another stump is covered with an arbour, which holds 12-14 people.

77 M. Rincon (300 ft.); 80 M. Santa Cruz; 81 M. Santa Cruz Beach.

Santa Cruz (Pacific Ocean Ho., $2-21/2; Pope Ho., $21/2; Sea Reach Ho., $2-6, at the beach, 1 M. from the town), a small city of 5596 inhab., is pleasantly situated at the N. end of the Bay of Monterey (p. 493) and is a favourite summer-resort. Its attractions include an excellent bathing-beach, fine cliffs, good fishing, caves and recesses abounding in sea-anemones, beautiful flower-gardens, and picturesque surroundings. A fine drive, affording splendid *Views of forest and mountain scenery, may be made to the (5 M.) Big Trees (see above). The town originated in the Mission de la Santa Cruz (1791).

The train for Monterey runs towards the S., passing Santa Cruz Beach (see above), to (86 M.) Capitola and (89 M.) Apts., two other resorts on Monterey Bay. To the left rises the pointed Loma Prieta ('Black Mt.; 3790 ft.), one of the loftiest of the Santa Cruz Mts. At (102 M.) Pajaro we join the line described at p. 492.
From San Francisco to Los Angeles and Santa Barbara.

Southern Pacific Railway to (484 M.) Los Angeles in 18-23 hrs. (fare $4.5; sleeper $2.90); to (532 M.) Santa Barbara in 27 hrs. (same fares). Santa Barbara may also be reached by steamer direct (280 M.) or by a combination of railway-travelling and staging via Santa Margarita, San Luis Obispo, and Los Olivos (comp. p. 498). Los Angeles may be reached by steamer to (380 M.) San Pedro and railway (22 M.) thence (see p. 500).

From San Francisco, via Oakland, to (32 M.) Port Costa, see p. 451. 36 M. Martinez, the usual starting-point for an ascent of Mt. Diablo (see p. 488), which rises to the right. At (50 M.) Cornwall we leave the Suisun Bay (p. 450) and turn towards the S. About 2 M. to the S. of (68 M.) Byron are the Byron Hot Springs (130°Fahr.; Hotel, $2-4). — 83 M. Tracy (65 ft.) is the junction of the old route to San Francisco via Livermore and Niles and to Fresno (see below) via Volta and Mendota. A little farther on we cross the San Joaquin ('Wahkeen') and reach (94 M.) Lathrop (25 ft.; Hotel, with rail. restaurant, $2-3, meal 75 c.), the junction of the old line to Sacramento via Stockton (comp. R. 89). We now ascend the great San Joaquin Valley, the granary of California, 200 M. long and 30 M. wide, producing endless crops of grain and fruit, including oranges, figs, and olives. 114 M. Modesto (90 ft.; 2402 inhab.); 152 M. Merced (170 ft.; 2000 inhab.). Various rivers are crossed. — 178 M. Berenda (255 ft.) is the junction of a branch-line to (22 M.) Raymond, forming one of the approaches to the Yosemite Valley (see R. 101). The Sierra Nevada is visible to the left, including Mts. Lyell (13,040 ft.), Tyndall (ca. 14,000 ft.), Whitney (14,898 ft.), and Goddard (ca. 14,000 ft.). — 185 M. Madera (280 ft.), a shipping-point for timber, brought from the mountains by a 'flume', 50 M. long. Near (197 M.) Heldon we cross the San Joaquin. — 207 M. Fresno (290 ft.; Hughes Ho., $21/2-3), a city with 10,818 inhab., is the centre of a large raisin-growing district, which in 1891 produced 1200 car-loads of raisins, valued at $1,500,000. The water necessary for irrigation is brought from the mountains by an extensive system of canals.

From Fresno a branch-line runs to (20 M.) Sanger Junction, the nearest station to the new Sequoia National Park, which lies in the High Sierra, 40 M. to the E. of the railway, and contains splendid forests of sequoias, besides most remarkable gorges, peaks, and caverns. This will probably become a popular resort when access to it is made easier. A tri-weekly stage runs from Sanger Junction to (45 M.) Sequoia Mills.

At (227 M.) Kingsbury (300 ft.) we cross the King's River by a trestle-bridge. 241 M. Goshen (285 ft.), the junction of a line to (60 M.) Alcalde. — 251 M. Tulare (280 ft.; Grand Hotel), a flourishing little town with 2697 inhab. and a large trade in agricultural produce. The irrigation in this district is largely provided by artesian wells, the windmills of which are seen in all directions.

About 7 M. to the W. of (261 M.) Tipton (265 ft.) lay Tulare Lake, a large body of water, at one time over 50 M. long, which has
recently dried up and become a barren desert of mud. 282 M. Delano;
294 M. Famoso; 314 M. Bakersfield (415 ft.), with 2626 inhabi-
tants. At (336 M.) Caliente (1290 ft.) we leave the San Joaquin
Valley and begin to ascend the *Tehachapi Pass, which crosses the
Sierra Nevada between this valley and the Desert of Mojave. The
construction of the railway here is a very remarkable piece of en-
gineering. The line winds backwards and forwards and finally, at
the *Loop (3050 ft.), crosses its own track, at a height of about
80 ft. above the tunnel it has just threaded. Eight other short tun-
nels are passed through before the summit is gained at (362 M.)
Tehachapi (4025 ft.), beyond which the train runs along a plateau
for some miles, passing a small salt lake, before beginning the
descent to the desert. 371 M. Cameron (3785 ft.).

382 M. Mojave ('Moháhve'; 2750 ft.; Rail. Hotel, $3), the junction
of the Santa Fé Pacific Railroad (see p. 467), is a handful of
wooden shanties on the edge of the cheerless Mojave Desert
described at p. 467. The Los Angeles line runs towards the S. across the
desert, forming an almost absolutely straight line for many miles.
Old Baldy (p. 501) is seen in front, to the left, while the San Bernar-
dino Mts. are faintly seen on the horizon (farther to the left). 396 M.
Rosamond (2315 ft.). Beyond (407 M.) Lancaster (2350 ft.) we quit
the desert for a hilly and rocky country, passing through several
short tunnels and crossing the Soledad Pass (3200 ft.). 417 M. Harold
(2820 ft.); 427 M. Acton (2670 ft.). We now descend steadily,
through cuttings and over bridges.

452 M. Saugus (1160 ft.) is the junction for the line to Santa Bar-
bara (see below).

The Los Angeles line runs towards the S. and beyond (454 M.)
Newhall (hotel) penetrates the San Fernando Mts. (ca. 3000 ft.)
by a tunnel 1 1/4 M. long (1470 ft. above the sea). The Valley of
San Fernando, which we now enter, is green with orange and olive
groves and forms a strong contrast to the desert we have been travers-
ing. 463 M. Fernando (1068 ft.); 473 M. Burbank (555 ft.), the
junction of a line to (80 M.) Chatsworth Park; 478 M. Tropico
(435 ft.).

484 M. Los Angeles (290 ft.), see R. 98.

FROM SAUGUS TO SANTA BARBARA AND ELWOOD. This line runs
at first slightly to the N. of W. and descends towards the sea through
the Santa Clara Valley (not to be confounded with that described
at p. 491), with high mountains on either hand in varied and con-
torted forms. Numerous orchards and orange-groves are passed. To
the left at first flows the Santa Clara River. 468 M. Camulos (285 ft.)
was the home of 'Ramona' (see the story of that name by H. H.), and
the ranch in which she was brought up may be seen to the left.
We cross and leave the river near (470 M.) Piru. — 487 M. Santa
Paula (285 ft.; Pretoria Hotel, $2 1/2), a busy little place with 1047
inhab., is the centre of the petroleum region of California. Coal also has been found in the vicinity. Fine orange-groves. — The hills now recede and the valley widens to a plain. The ocean comes into sight near (494 M.) Saticoy (145 ft.). The line turns to the right (N.). Distant islands are seen to the left, while the coast-hills rise to the right.

503 M. San Buenaventura (45 ft.; Rose, $2^{1/2}-3^{1/2}; Anacapa, $2-2^{1/2}; Santa Clara Ho., $2), a city of 2320 inhab., pleasantly situated at the mouth of the valley of the Ventura, is the outlet of a fertile grain and fruit growing region and carries on a considerable trade in timber. It is also frequented as a health-resort. A Spanish mission was founded here in 1782; its present church dates from 1809.

Stage-coaches (fare $1) run from San Buenaventura to Nordhoff (Oak Glen Cottages), in the beautiful Ojai Valley (‘Ohigh’), situated 45 M. to the N.W., at a height of 600-1200 ft. above the sea and surrounded by an amphitheatre of mountains, of which Mt. Topotapa (6000 ft.) is the chief. The valley is a favourite winter-resort for invalids, and is, perhaps, the best place in California for wild flowers.

Beyond San Buenaventura the train runs close to the sea, the mountains at places barely leaving room for its passage (views to the left). 520 M. Carpinteria; 525 M. Summerland; 528 M. Montecito (p. 498).

532 M. Santa Barbara (Arlington, $2-4; Miramar; Mascarel), a city of 5864 inhab., the ‘American Mentone’, is charmingly situated on the coast-plain, at the base of the foot-hills, with the Santa Ynez Mts., a little farther off, forming a fine screen against the cold N. and W. winds. It has a well-deserved reputation as one of the most attractive winter-resorts in California, due to its mild, dry, and equable climate (mean temp., winter 50-55°, summer 65-70°), the beauty of its surroundings, the luxuriance of its roses and other flowers, the excellent bathing beach, and its pleasant society. The main street, 2 M. long, is paved with asphalt and lined with substantial business blocks. Most of the private houses are surrounded by delightful gardens. The chief lion of the place is the old Mission, founded by Padre Junipero Serra (p. 440) in 1786. It lies on a hill 3/4 M. to the N. of the town and may be reached by following the tramway which diverges to the right from Main St. at the Arlington Hotel. The end of the tramway-line is near the Mission, with its colonnaded front, red roof, and two-towered church.

Visitors are admitted 8.30-11 and 2-4, Sun. 3.30-4.30 (women to the church only; small fee expected). The points shown include the plain, whitewashed church (containing a few paintings), refectory, dormitory, and garden. About a dozen of the old Franciscan monks still remain. The Mission commands a splendid View (best from the church-tower) of Santa Barbara and the Pacific, with the islands in the background. On the wall about 100 yds. behind the Mission is a sundial with the inscription: ‘Lux dei vitae viam monstrat sed umbra horam atque fidem docet’.

After visiting the Mission we may ascend the picturesque Mission Cañon behind it, crossing the bridge and turning to the left (sign-post ‘Up the Cañon’). The cañon contains some pretty waterfalls.

Baedeker's United States. 2nd Edit. 32
An excellent **View of the town, the ocean, the islands, the coast, and the mountains** is obtained from the pretty grounds of Mr. Dibley's House, on the height to the W. of the bay (visitors freely admitted).

In a pretty valley, 4 M. to the E. of Santa Barbara, lies Montecito (comp. p. 497), with numerous beautiful gardens. In one of these is La Parra Grande, or the Great Vine, which covers a trellis 60 ft. square has a trunk 4 ft. in diameter, and produces annually 8000 lbs. of grapes (four or five times as much as the famous vine at Hampton Court). The vine is of the Mission variety (p. 488). — On a hill about 1 M. to the E. of Montecito (sign-boards) are the **Hot Springs** (1400 ft.; temp. 114-118°), whence a climb of 1/4 hr. brings us to Point Look Out, commanding one of the finest views in the neighbourhood. — The **San Ysidro Ranche**, about 1 M. beyond Montecito, has fine orange and lemon groves. — **La Piedra Pintada** ('painted rock'), an interesting relic of aboriginal art, is on the Santa Ynez Mts., near the head of Montecito Valley.

Among other fine points near Santa Barbara are **Sycamore Cañon** (2 M.), **Bartlett's Cañon** (10 M.), **Glen Annie** (13 M.), the Cathedral Oats (6 M.), **Goleta** (8 M.), **Ortega Hill** (5 M.), **Hollister's Ranche** (12 M.), with a beautiful avenue of date-palms, **Cooper's Ranche** (15 M.), with a large olive-grove, and **Santa Cruz Valley** (15 M.), with two old missions. Near the town we may notice the Chinese vegetable gardens, the fields of Pampas grass (cultivated for its plumes), and the groves of walnut. Flowers grow here most luxuriantly; at a flower-show in Santa Barbara 100 varieties of roses were exhibited, all cut from one garden the same morning. — The curious nest of the **Trapdoor Spider** is often found near Santa Barbara.

**Ocean Yachts** make excursions, on a usually perfectly calm sea, to various points on the coast and to the islands of **Santa Cruz** (26 M.) and **Santa Rosa** (31 M.). The former is the larger of the two and is inhabited by a few farmers. The beautiful **Abalone shells** are found in great abundance on these islands. — In the bed of the ocean, about 10 M. to the N.W. of Santa Barbara and 1 1/2 M. from shore, is a huge spring of petroleum, the oil from which may be seen floating on the surface in calm weather.

**Steamers** ply regularly from Santa Barbara to **San Francisco** (p. 481), **San Diego** (p. 504), **San Pedro** (p. 500), etc.

A **Stage** runs daily from Santa Barbara to the N. to (45 M.) **Los Olives** (p. 493), starting about 8 a.m., stopping for dinner at the **Home Station** (75 c.), and arriving about 4.30 p.m. (fare $4). This fine route, crossing the **Santa Ynez Mts.** by the **San Marcos Pass**, is a pleasant way of returning to San Francisco for those who do not wish to go over the same ground twice.

Beyond Santa Barbara the railway goes on to (14 M.) **Etwood**, whence it is intended to extend it to **Los Olives** (p. 493).

### 98. Los Angeles.

**Railway Stations.** **Southern Pacific,** Fifth St.; **Southern California,** Santa Fé Ave.; **Los Angeles Terminal,** E. First St.; **Redondo,** cor. of Jefferson St. and Grand Ave., in the S.W. part of the city.

**Hotels.** **Van Nuys**, $3-5, R. $1-3; **Hollenbeck,** from $2 1/2, R. from $1; **Westminster,** from $2 1/2, R. from $1; **Nadeau,** $2 1/2, R. from $1; **Bellevue Terrace,** with grounds, from $2; **Hoffman,** $2-3. — **Ulrich's Restaurant.**

**Tramways** (5 c.) traverse the chief streets and run to the suburbs.

**Post Office,** Main St., near Fifth St.

**British Vice-Consul,** Mr. Charles White Mortimer.

**Los Angeles,** or **La Puebla de Nuestra Señora la Reina de Los Angeles** ('City of Our Lady the Queen of the Angels'), the metropolis of Southern California, lies on the **Los Angeles River**, 20 M. above its mouth and 15 M. in a direct line from the Pacific Ocean.
It was founded by the Spaniards in 1781 and passed into American possession in 1846. It was, however, of no great importance till the ninth decade of the present century, when it underwent an almost unprecedentedly rapid increase in wealth and population. Its population rose from 11,183 in 1880 to 50,395 in 1890, and its adobe houses have given place almost entirely to stone and brick business blocks and tasteful wooden residences.

Los Angeles is a railway-centre of great importance and is the headquarters of the characteristic Californian industry of fruit-growing. The plains and valleys around it are covered with vineyards, orange-groves, and orchards. The total value of the fruit produced in S. California in 1891 was $6,000,000, and the value of the oranges exported from Los Angeles alone amounted to $1,250,000. Los Angeles is also the centre of a district that produces petroleum and asphalt.

Though less specifically a health resort than some other places in Southern California, Los Angeles enjoys a mild and equable climate, with a tendency to coolness at night (mean annual temp., Jan. 52°, Aug. 70°). The city, especially the residential quarters, is embowered in vegetation, among the characteristic features of which are the swift-growing eucalyptus, graceful pepper-trees, an occasional palm, Norfolk Island pines, live-oaks, India-rubber trees, orange-trees, roses, geraniums, yuccas, century plants, bananas, calla lilies, and pomegranates.

Southern California, of which Los Angeles is the principal city, possesses, perhaps, an all-the-year-round climate that approaches perfection as nearly as any other known to us. It is a semi-tropical climate with little frost, no snow, and moderate winter rains, remarkable for its equableness and dryness. Winter and summer are terms that here lose their ordinary significance, their place being taken by what may almost be called a perpetual spring. Sea-bathing may be practised in Dec. or Jan., while the dryness of the atmosphere and the ocean breezes make the summer much less trying than in places farther to the E. The wild flowers of S. California, of which the golden poppy (Eschscholzia Californica) is one of the most characteristic, are extraordinary in number, variety, and brilliancy. 'The greatest surprise of the traveller is that a region which is in perpetual bloom and fruitage, where semi-tropical fruits mature in perfection, and the most delicate flowers dazzle the eye with color the winter through, should have on the whole a low temperature, a climate never enervating, and one requiring a dress of woollen in every month' (Warner). Comp. 'Our Italy', by Chas. Dudley Warner, and 'California of the South', by W. Lindley and J. P. Widney.

Main Street is the dividing line for E. and W. and contains many substantial buildings. Among these are the Federal Building and the Post Office. The County Court House is in Temple St., the City Hall in Broadway. Some of the Schools are handsome buildings. The Viaduct of the Cable Tramway, in San Fernando St., spanning the railway tracks on the E. side of the city, is an interesting piece of engineering. Los Angeles also contains two Theatres, several Parks (including the Griffith Park of 3000 acres), and two Race Courses. A visit may be paid to one of the open Zanjgas, or irrigating canals, in the suburbs.

From Los Angeles to Santa Monica, 15 M., Southern Pacific Railway or Los Angeles and Pacific Railroad in 3/4 hr. — On the way we pass the large National Soldiers' Home and an ostrich farm. — Santa Monica (Arcadia, from $3; Santa Monica; Atlantic; Jackson), a popular seaside resort, has a fine sandy beach, on which surf-bathing may be enjoyed all the year round. Adjacent is Port Los Angeles, with a large wharf.

32°
FROM LOS ANGELES TO REDONDO BEACH, by the Redondo Railway (18 M.)
or the Southern California Railway (23 M.) in 3/4 hr. — 12 M. Inglewood,
a pleasant town of suburban homes. — 23 M. Redondo Beach (Redondo Beach
Hotel, \$2\1/2-3\1/2, another pleasant sea-bathing resort and seaport, has a
beautiful beach and good facilities for boating and fishing. The large
Chautauqua Assembly Building accommodates 4000 people. There is a deep-
water pier, and Redondo is becoming of importance as a shipping-port.

FROM LOS ANGELES TO SAN PEDRO, 25 M., Southern Pacific Railway in
1 hr. — 6 M. Florence, the junction of the line to San Diego (see p. 503);
11 M. Compton; 21 M. Thenard, the junction of a branch-line to the bathing-
resort of (4 M.) Long Beach (Bay View Ho.; Sea Side Inn); 22 M. Wilmington,
a small seaport. — 26 M. San Pedro (Metropole: Clarence), with 1240 inhab.,
is the chief seaport of Los Angeles, with a harbour that has been improved
at a cost of over \$1,000,000 and admits vessels of 20 ft. draught. Steamers
ply hence regularly to San Francisco, Santa Barbara, San Diego, etc. —
San Pedro may also be reached by the Los Angeles Terminal Railway
(21\1/2 M., in 1 hr.), which runs via (22 M.) Long Beach (see above) and ends
at East San Pedro, on Rattlesnake Island.

[From San Pedro steamer ply regularly to (25 M.) Santa Catalina, a
beautiful mountainous island, with fine rocky coasts, which has lately been
much frequented for its delightful climate (usual temperature 60-70° Fahr.)
and excellent fishing. The only resort is Avalon (Metropole, \$2\1/2-3\1/2,
Avalon Ho.; Island Villa; numerous boarding-houses and lodgings), situated
on the S.E. side of the island, on a crescent-shaped bay under the lee of
the mountains. Wild goats may be hunted among the hills, and the quail-
shooting is also good. Wild flowers are very abundant. — See 'Santa
Catalina', by C. F. Holder.]

From Los Angeles to Pasadena, see R. 99; to San Bernardino, see R. 100;
to San Diego, see R. 101; to Saugus (for Santa Barbara and San Francisco),
see R. 97; to San Gabriel and Colton (for New Orleans, etc.), see R. 100b.

99. From Los Angeles to Pasadena.

Southern California Railway to (10 M.) Pasadena in 25 min. (fare
25 c.; return-fare 35 c.).

Los Angeles Terminal Railway to (10 M.) Pasadena in 1/2 hr. (fares
as above), and thence to (6 M.) Altadena in 1/4 hr.

Pasadena may also be reached by the Southern Pacific Railway via
Shorb (p. 508).

Los Angeles, see p. 498. Both railways ascend the valley of the
Arroyo Seco ('dry river'), passing several small intermediate stations.

10 M. Pasadena (330 ft.; *Hotel Green, with large annex, \$3-5;
*La Pintoresca, from \$2\1/2; *Mitchell, \$2-3; Carlton), a small city
and health-resort, with a resident population of (1890) 4882, lies on
the level floor of the fertile San Gabriel Valley, about 5 M. from the
base of the Sierra Madre Range (2000-11,000 ft.). To the S.E. rises
Oak Knoll, a small hill commanding a splendid *View across the
valley, with its glossy-green orange-groves, to the snow-topped wall
of the Sierra Madre. Mt. San Antonio (p. 501), in the San Bernardino
Range, is seen overtopping the Sierra Madre to the N.E., while the
San Jacinto Peaks (p. 517) are visible on the S.E. horizon. [The large
Raymond Hotel, which formerly crowned this knoll, was burned down
in 1895.] To the S. and S.W. lies the ocean, with the mountainous
islands of Santa Catalina (see above) and San Clemente (with its
curious rivers of sand and relics of an unknown race).
The city of Pasadena is well laid out and contains good Schools, Churches, a Public Library, an Opera House, and other substantial buildings. The Museum of the Pasadena Academy of Sciences contains an interesting collection of antiquities, fossils, and objects of natural history. The wealth of vegetation in the streets and gardens includes the eucalyptus, pepper-trees, olives, lemon and orange trees, cork and india-rubber trees, date and fan palms, bananas, guavas, Japanese persimmons, locust trees, and other trees and shrubs too numerous to name. The roads in the neighbourhood are good, and many pleasant drives may be made. Comp. 'All about Pasadena', by C. F. Holder.

One of the most popular excursions from Pasadena is the ascent of Echo Mountain by the Mount Lowe Railway (see below). — The ascent of *Mt. Wilson* (5600 ft.) is generally accomplished by omnibus to the foot of the trail and thence to the summit by burro (fare, there and back, including mule and guide, $2 1/4). A good road, 9 M. long, beginning at Eaton Cañon (5 M. from Pasadena and 2 1/2 M. from Altadena, see below), ascends to the top of Mt. Harvard (5438 ft.; Camp Wilson, open throughout the year), an adjacent peak, whence the top of Mt. Wilson is easily reached. The *View* is extensive and very beautiful. The ascent of the two peaks is also often made from Santa Anita (p. 502). — The *San Gabriel Mission* (see p. 503) lies 3 1/2 M. to the S.E. of Pasadena; the road to it leads through large orange-groves. — Among other easily accessible points of interest near Pasadena are Stoneman's Ranch, with fine orange-groves, 1 M. to the S.; Sunny Slope Winery, 3 1/2 M. to the E.; the Shorb or San Gabriel Winery, 2 1/2 M. to the S., said to be the largest in the world; Baldwin's Ranch, 5 M. to the E., with a stud and racecourse (station Santa Anita, p. 502); Millard Cañon, 4 M. to the N.; Arroyo Seco Cañon, 5 M. to the N.W., reached via the Devil's Gate (tramway); the Ostrich Farm (adm. 25 c.), 1 1/2 M. to the N.W.; the Sierra Madre Villa (from 3 1/2), 6 M. to the N.E., near the base of the Sierra Madre Range (view); Linda Vista, 2 M. to the N.E.; and La Canada Valley, 4 1/2 M. to the N.W. (tramway). Mt. Disappointment (5200 ft.) and Brown's Peak (5300 ft.) may be ascended (with guide) by those who are fond of mountain-climbing. Mt. San Antonio (Old Baldy; 10,140 ft.), 27 M. to the N.E., is best ascended from N. Ontario (p. 503).

The sportsman will find abundance of game for his gun in the vicinity of Pasadena, including bears in the remoter recesses of the mountains. Coursing is also practised, the hares or jack-rabbits affording good sport.

Beyond Pasadena the Los Angeles Terminal Railway sweeps round to the left, passing (3 M.) Arroyo Park and ending at (6 M.) Altadena (1500 ft.), near the foot of the Sierra Madre. Immense tracts here are covered in winter by brilliant poppies.

From Altadena, the Mount Lowe Electric Railway runs to (2 1/2 M.) the Rubio Falls in the Rubio Cañon (1800 ft.), whence a Great Cable Incline, 1000 yds. long, ascends to the summit of Echo Mountain (3500 ft.; return-fare $3), which commands a wide and beautiful view. Here are situated the Echo Mountain Hotel ($3-4), the Lowe Observatory (with a 16-inch equatorial telescope; open to visitors), and a collection of native wild animals. — From Echo Mt. the mountain-railway goes on to the Alpine Tavern (5000 ft.; return-fare $5). Hence we may ascend on foot or on mule-back to the top of Mt. Lowe (9000 ft.), which commands a *View* extending for over 100 M. in every direction. The route skirts the wonderful Grand Cañon.
100. From Los Angeles to San Bernardino.
   a. Via Southern California Railway.

61 M. RAILWAY in 1 1/2-2 hrs. (fare $1.75).

From Los Angeles to (10 M.) Pasadena, see R. 99. Beyond Pasadena the line runs towards the E. 13 M. Lamanda Park (735 ft.) is the station for the (1 1/2 M.) Sierra Madre Villa (free omnibus meets trains). 15 M. Santa Anita is often made the starting point for an ascent of Mt. Wilson (p. 501; omn. to Sierra Madre, 1 M.; burro thence to the top; return-fare $1). At (19 M.) Monrovia (Grand View Hotel, $2) we cross a branch of the S. Pacific Railway (see p. 503). From (25 M.) Azusa (615 ft.; Hôt. Azusa, $2) stages run daily to the San Gabriel Cañon (fare $1). 27 M. Glendora; 35 M. North Pomona (comp. p. 503). — 41 M. N. Ontario (1210 ft.; Magnolia Villa; comp. p. 503) is a good starting-point for the ascent of Mt. San Antonio (p. 501). We drive through the San Antonio Cañon for 9 M. and then mount on burros. Euclid Avenue (p. 503) runs both N. and S. from N. Ontario. — 45 M. N. Cucamonga.

61 M. San Bernardino (1100 ft.; New Southern Hotel, from $2 1/2; Rail. Restaurant), a busy little city with (1890) 4012 inhab., is finely situated near the E. margin of the valley of its own name and commands a good view of the San Bernardino Mt. Range to the N., culminating in Mt. San Bernardino (11,600 ft.). The city was originally laid out by Mormons in 1851 and has had a prosperous career as the centre of a rich fruit-growing country. It is the junction of a line to San Diego and National City (see below).

From San Bernardino to (142 M.) San Diego and (148 M.) National City, railway in 1 1/2 hrs. — At (3 M.) Colton this line crosses the Southern Pacific Railway (see p. 503). — 6 1/2 M. Highgrove is the junction of a line to (24 M.) Perris (junction of another line to San Jacinto) and (51 M.) Temecula. — 10 M. Riverside (375 ft.; Glenwood Tavern, $2 1/2-3 1/2; Temecula, $2-3; Rowell, $1 1/2-2), a city of 4683 inhab., is laid out on a very extensive scale, with beautiful avenues of ornamental trees. *Magnolia Avenue, with its double rows of pepper-trees, is 10 M. long and 130 ft. wide. Riverside is the centre of the seedless navel orange culture, and the groves in its vicinity afford, perhaps, the most attractive picture of the orange-growing industry of California. It is a favourite resort of tourists and health-seekers. The San Bernardino Range is in full view. About half-a-million boxes of oranges (100 to a box) are put up here annually. — 25 M. Corona (600 ft.) or South Riverside. Beyond (28 M.) Rincon (490 ft.) we reach the Santa Ana River and run through the Santa Ana Cañon. At (47 M.) Orange we join the line to San Diego described in R. 101.

A loop-line, opening up some beautiful scenery, runs from San Bernardino to (9 M.) Redlands, (12 M.) Mentone, (19 M.) Highland, (24 M.) Arrowhead, and so back to (27 M.) San Bernardino. — Redlands (1350 ft.; Windsor, § 2-3; Casa Loma, § 2-4), another flourishing orange-growing city, with 1904 inhab., is finely situated on the slopes of the foot-hills and commands good views of the San Bernardino Mts. (N.) and the San Jacinto Mts. (S.). — Arrowhead is the station for the Arrowhead Hot Springs (2005 ft.; Hotel, § 2 1/2), which enjoy a considerable reputation.

Coaches (fine views) run twice weekly in summer from San Bernardino to (39 M.) Bear Valley (6400 ft.), where a gigantic reservoir has been formed by damming up a mountain-gorge.
FROM SAN BERNARDINO TO BARSTOW, 80 M., railway in 3½ hrs. — This line runs to the N. and ascends towards the summit of the pass over the San Bernardino Range (3220 ft.), which it reaches beyond (19 M.) Cajon (‘Cahon’). On the other side we descend into the Mojave Desert (see p. 467), and beyond (45 M.) Victor we follow the course of the Mojave River. 60 M. Point of Rocks; 69 M. Cottonwood. — At (50 M.) Barstow we join the main line of the Santa Fé R. R. (see p. 467).

b. Via Southern Pacific Railway.

62 M. RAILWAY in 2½ hrs. (fares as above).

Los Angeles, see p. 498. — The train runs to the E. through the fruitful San Gabriel Valley (p. 500). From (6 M.) Shorb (460 ft.) branch-lines diverge to (5 M.) Pasadena (p. 500) and to (10 M.) Monrovia (p. 502) and (12 M.) Duarte. — 9 M. San Gabriel (410 ft.; Hotel San Gabriel, $2½-3½) is the site of the interesting Mission de San Gabriel Arcangel, founded in 1771. The Mission Church, erected in 1804 with material imported from Spain, is seen to the left, just before we enter the station. The old Mission gardens and vineyards deserve a visit. Pasadena (see p. 500) lies about 3 M. to the N.W. To the N. and E. is the Sierra Madre Range (p. 500). At (16 M.) Bassett (290 ft.) a loop-line diverges to Covina, rejoining the main line at Pomona. — 33 M. Pomona (860 ft.; The Palomares, $2½), with 3634 inhab., is one of the prettiest and most prosperous of the fruit-growing towns in the San Bernardino Valley (p. 447). — 39 M. Ontario (980 ft.; Ontario, $2; South Pacific), a brisk little fruit-growing town with 1064 inhab., lies in the midst of a striking landscape, with the four highest mountains of S. California in sight (Mt. St. Bernardino and Grayback to the E., San Jacinto to the S.E., and Mt. San Antonio or Old Baldy to the N.). It is connected with (2½ M.) N. Ontario (p. 502) by the beautiful Euclid Avenue, planted with eucalyptus and pepper trees and traversed by a tramway, drawn uphill by mules and descending by gravity. — 42 M. South Cucamonga (comp. p. 502). — 58 M. Colton (965 ft.; see p. 502). The line for San Bernardino here turns to the left (N.); to the right (S.) runs the line to San Diego (comp. p. 502). — 62 M. San Bernardino (see p. 502).

101. From Los Angeles to San Diego and National City.

Coronado Beach.

132 M. SOUTHERN CALIFORNIA RAILWAY to (127 M.) San Diego in 4½ hrs. (fare $5, sleeper $1.50, chair-car 25 c.) and to (132) National City in 4½ hrs. (same fares).

Los Angeles, see p. 498. 2 M. Redondo Junction, for the line to Redondo Beach (p. 500). The train runs at first through groves of oranges and walnuts and afterwards over meadows. A good view is obtained to the left, above the foot-hills, of the Sierra Madre (p. 500). Beyond (7 M.) Bandini we cross the San Gabriel River. 13 M. Santa Fé
Springs (155 ft.); 261/2 M. Anaheim (Commercial Hotel, $2), a pleasant little town, in one of the best orange-growing districts of the State. We cross the S. Pac. Railway. Before reaching (31/2 M.) Orange (180 ft.; Palmyra), the junction of the line from San Bernardino (see p. 502), we cross the wide sandy bed of the Santa Ana River. This part of the line passes through numerous fine orange-groves. — 34 M. Santa Ana is the junction of a short line to Newport Beach, on the coast. Near (46 M.) Modjeska is the winter-home of Mme. Modjeska. From (47 M.) El Toro (425 ft.) stages run to (9 M.) Laguna Beach (fare 25 c.). We now descend rapidly through a rolling green country, not unlike the fells near Appleby and Carlisle. To the left, at (56 M.) Capistrano, are seen the interesting ruins of the Mission of San Juan Capistrano, founded in 1806 and overthrown by an earthquake in 1812. We reach the ocean at (59 M.) San Juan ('Wahn'), and henceforward have it close to us on the right. To the right is Dana's Point, over which the hides were hurled as narrated in Dana's 'Two Years before the Mast'. — From (85 M.) Oceanside (Miramar) stages run to the (4 M.) Mission of San Luis Rey de Francia (fare 50 c.), which, after standing empty and in ruins for nearly a century, is again occupied by Franciscans, and thence on to (21 M.) Fallbrook (fare $1 1/2), with a large ostrich farm. — From (86 M.) Escondido Junction a branch-line runs to (21 M.) Escondido. Fine views of the ocean to the right. 97 M. Encinitas. 127 M. Old Town of San Diego (see below).

128 M. San Diego (Florence, situated on a hill above the town, $21/2-4; Brewster, $2 1/2-5; Horton, $2-2 1/2; Brit. vice-consul, Mr. W. T. Allen), a city of 16,159 inhab., has, like many other Californian towns, been the subject of a 'boom' which has led it to lay out streets and town-lots in places likely to be mere pasture-land for many years to come. It lies on a bay of its own name and has the best harbour on the Pacific Coast after that of San Francisco. Steamers ply regularly to San Pedro (p. 500), San Francisco, ports in Central and S. America, etc., and sailing vessels to Hawaii, Australia, and numerous Californian ports, while through-trains run over the Santa Fé route to Chicago in 4 days. The climate is mild and equable (mean temp., Jan. 54°, Aug. 69°), and the surrounding country is very fertile. The city contains a U. S. garrison. The following excursions may be made nearly as well from Coronado Beach (p. 505), as from San Diego. About 8 M. to the N. of San Diego is the old Mission of San Diego, the first settlement (1769) made by white men in California. Its olive-groves are very prolific. The Mission may be reached by taking the electric car to (5 M.) the hills overlooking the Mission Valley, and thence by burro; or we may drive all the way, descending the curious and very steep 'Mission Grade'. Drivers should return by the Old Town of San Diego (the original settlement), with its adobe buildings, Ramona's house (see H. E.'s 'Ramona'), the Spanish church-bells (100 years old), and a mission-school attended by Indian and white children. — Other favourite points are (6 M.) Paradise Valley; Pacific Beach, reached by a steam-tramway (11 M.); the Sweetwater Dam (13 M. to the E.), 396 ft. long, 90 ft. high, and 12-46 ft. thick, forming a reservoir with a capacity of 6,000,000,000 gallon (reached by suburban
CORONADO BEACH. 101. Route. 505

railroad); La Jolla Cave (‘Holya’), 14 M. to the N.W. (motor railroad); and El Cajon Valley (‘Cahon’), 15 M. to the N.E.

Coronado Beach, on a small peninsula immediately opposite San Diego and forming the outer arm of San Diego Bay, is reached from San Diego Railway Station by a tramway (5 c.) and ferry (5 c.), connecting with a steam-tramway leading to the hotel (5 c.; hotel-omnibus from the station to the hotel 50 c., incl. ferry and hand-baggage). Coronado Beach, about 12 M. in length, consists of a narrow tongue of sand, running to the N. from the mainland and ending in the expansions known as the South and North Beach, each about 1 1/2 M. square. The latter, opposite Point Loma (see below), forms the S. horn of the entrance to San Diego Bay and is still mainly a waste of sand and chaparral. The South Beach, on the other hand, has been partly laid out as a city and contains some hotels, several hundred cottages, a motor railway, fine trees, beautiful gardens, and other attractions. Its permanent population is about 2000. The *Hotel del Coronado ($3-6) is one of the largest, finest, and most comfortable hotels in California, and is finely situated close to the ocean and an excellent sandy beach. Adjacent are bathing-tanks of salt-water, for summer and winter use, while steam-yachts, launches, and boats afford opportunity for excursions by water. Flowers thrive wonderfully on Coronado Beach, and the flower-beds adjoining the hotel are of astonishing brilliancy. The tower of the hotel commands a splendid view. — The Hotel Josephine ($2) has no view of the sea.

The Climate of Coronado Beach is mild, dry, and equable (mean winter temp. 53°, spring 59°, summer 68°, autumn 65°). The daily range is singularly small, the difference between the lowest and the highest mean temperature of the 24 hrs. amounting in 1890 to only 10°. The average annual rainfall is ten inches, and the average number of rainy days is thirty-four. The Coronado Mineral Water, now extensively exported, has been found efficacious in liver and kidney complaints.

Among the points of interest on South Beach are the Ostrich Farm (adm. 25 c.) and the beautiful *Botanical Gardens (2 1/2 M. from the Coronado Beach Hotel; station on the motor-line to the ferry). Opposite the hotel is a Museum of California relics and curiosities (adm. 25 c.). — A dummy or motor-line (steam-tramway) runs along the peninsula to (14 M.) National City (see below), returning along the shore to San Diego. — An excursion should be made to Point Loma (‘View), the N. horn of the entrance to San Diego Bay, reached by boat to Ballast Point or by carriage from San Diego. The uppermost of the two lighthouses here, 500 ft. above the sea, is said to be the most lofty-situated lighthouse in the world. The point is the site of the station of a submarine cable to Hawaii and of a Theosophical Institution named the ‘School of the Lost Mysteries of Antiquity’. — Other excursions may be made to the places mentioned in connection with San Diego and National City. — Good fishing for mackerel, barracouda, halibut, and bluefish is obtained in the bay or ocean, while quail may be shot on North Beach and wild-fowl along the shore.

Beyond San Diego the railway soon reaches its terminus at (132 M.) National City (International Hotel, $2-3), with 1353 inhab., connected by a steam-motor line with (19 M.) Tia Juana (‘Tea Wahna’), situated just beyond the Mexican frontier.
102. The Yosemite Valley.

Approaches. The usual and most convenient approach to the Yosemite Valley is that described below, via Berenda and Raymond (44 hrs.). The Valley is also sometimes entered via Stockton and Milton (31 hrs.; p. 450), and this picturesque route, which includes the Hetch-Hetchy Valley (p. 515) and the Calaveras Grove (p. 450), may be used for a variation in returning to San Francisco. Circular tickets are issued by the Yosemite Stage & Turnpike Co. (office, 613 Market St.) for the journey from San Francisco to the valley and back for $38; the charge for board at the hotels on the way and in the Valley (two days) and for conveyance to the chief points of interest by horse or carriage is $22.50. Similar tickets may be procured at Los Angeles, etc. It is advisable to apply for tickets some days in advance, as the stage-accommodation in entering the Valley is limited; and the same precaution should be observed in leaving the Valley.

[Travellers approaching the Valley via the Stockton and Milton route take the train from San Francisco to (103 M.; 4 hrs.) Stockton (p. 450) and from Stockton to (30 M.; 1 hr.) Milton (p. 450), and go on thence by stage to (41 M.; 10 hrs.) Priest's, where the night is spent. An early start is made next morning, and the remaining 50 M. are driven over in 10 hrs. In leaving the Valley the night is spent at Chinese Camp (p. 450), 20 M. from Milton.]

Hotels. The only hotel in the Valley itself ($21/2-4 a day) affords reasonably comfortable quarters. There are also fair hotels at the stopping-places of the stages on the way into the Valley, and likewise a good inn at Glacier Point (p. 511).

Season. Plan of Tour. The season of travel in the Yosemite begins about April 1st and ends about Nov. 1st. Perhaps the middle of May is on the whole the best time for a visit, as the roads are then generally free from snow or dust, the temperature is pleasantly warm by day and cool at night, the waterfalls are still full of water, the snow-effects on the mountains are fine, and the wild-flowers are in profusion. On the other hand some of the trails may still be closed by snow. Campers usually visit the Valley in June, July, or Aug., and suitable camping-places are set apart for their use. It is possible to see all the points usually visited in about three days, but it is advisable to spend at least a week in the Valley. Those who have time for one trip only should select that to Glacier Point, which gives a view of the Valley itself, the Sierra Nevada, and the Vernal and Nevada Falls. Next in importance come the Falls just named, Eagle Peak and the Yosemite Falls, and Cloud's Rest (the last for the more energetic). No one should fail to see the sun rise in Mirror Lake, which can be easily done on the same day as any of the other usual excursions except the very longest. The charges for horses, mules, carriages, and guides are reasonable and are fixed by the Board of Commissioners (tariff on application at the hotel). The roads on the floor of the Valley are good, and the mountain-trails are as a rule excellent bridle-paths, though nervous persons, or those inclined to dizziness, may find some of them rather trying to ride down. In this case, however, it is easy to dismount and go on foot, letting the mule follow. The Guides ($3) are usually pleasant and obliging, but do not compare in intelligence or knowledge of the country with the best Swiss guides. The trails are so unmistakable that their functions are mainly confined to looking after the horses.

Bibliography. The standard work on the Yosemite is the 'Yosemite Guide-book' by Prof. J. D. Whitney (published in three sizes, but at present unfortunately out of print). See also J. M. Hutchings' 'In the Heart of the Sierras'. Excellent maps of the Yosemite Valley have been published by the U. S. Corps of Engineers (Wheeler Survey) and the Geological Survey of California. Good photographs may be obtained from Taber & Co., San Francisco, or from George Fiske, in the Valley itself. — The botanist will find the Yosemite Valley a place of great interest, and the number and variety of its wild flowers are especially remarkable. The singular snow-
plant (*Sarcodes sanguinea*), elsewhere rare, is frequently found in or near the Yosemite in May and June. It has the form of a bright scarlet column, 3-12 inches high, and grows on the edge of snow-drifts or in ground recently covered with snow. Good shooting and fishing may also be obtained.

According to the present time-tables the train (through-sleeper from San Francisco to Raymond) leaves Berenda (see p. 495) early in the morning and runs towards the E. to (22 M.) Raymond (hotel). The stages, in which the seats we are to retain till we reach our destination are assigned to us by number, leave Raymond about 7 a.m. The first part of the drive is comparatively uninteresting, as well as hot and dusty in summer; it is therefore hoped that the railway may be extended to Ahwanee (see below). Beyond (14 M.) Grub Gulch we are accompanied for some time by a long 'flume' for bringing timber down the mountains. To the right is a *Gold Mine*, worked by electric power.

20 M. Ahwanee (*Hotel, $3, L. $1*) is the luncheon-station. — The scenery now improves. Look-out Point commands a fine retrospect, extending over the plain to the coast-hills. The timber along the road is fine, including sugar-pines (*Pinus Lambertiana*), yellow pines (*Pinus ponderosa*), silver firs (*Abies magnifica*), cedars (*Libocedrus decurrens*) and oaks, besides pretty blossoming trees like the dogwood (*Cornus Florida*), buckeye (*Aesculus Californica*), and California lilac (*Ceanothus integerrimus*). The curiously twisted and red-trunked manzanita (*Arctostaphylos glauca*) is also abundant.

42 M. Wawona or Big Tree Station (3925 ft.; *Hotel, $4, S., R., & B. $31/2*), the usual halting-place for the night (reached about 6 p.m.), is beautifully situated on the S. fork of the Merced River (p. 508) and forms pleasant headquarters for a prolonged stay. The principal point of interest in the vicinity is the Mariposa Grove of Big Trees, 7 M. to the S.W., usually visited by Yosemite travellers on their way out of the valley. — The roads from Merced (p. 495) and Madera (p. 495), by which a few visitors approach the Yosemite, join ours at Wawona.

The *Mariposa Grove of Big Trees* (6500 ft.), so-called from its situation in Mariposa ('butterfly') county, occupies a tract of land, 4 sq. M. in area, reserved as a State Park, and consists of two distinct groves, 1/2 M. apart. The Lower Grove, which we reach first, contains about 100 fine specimens of the *Sequoia gigantea* (see p. 450), including the 'Grizzly Giant', the largest of all, with a circumference of 91 ft. and a diameter of 31 ft. Its main limb, 200 ft. from the ground, is 61/2 ft. in diameter. In ascending to the Upper Grove, which contains 365 big trees, the road passes through a tunnel, 10 ft. high and 91/4 ft. wide (at the bottom), cut directly through the heart of a living Sequoia, 27 ft. in diameter. The road passes close to nearly all the largest trees in the Grove, the names and dimensions of which will be supplied by the driver. About 10 of the trees exceed 250 ft. in height (highest 272 ft.) and about 20 trees have a circumference of over 60 ft., three of these being over 90 ft. The Calaveras Grove (see p. 450) has taller trees than any in the Mariposa Grove, but the latter has those of greatest circumference. Many of the finest trees have been marred and reduced in size by fire. The wood of the *Sequoia gigantea*, like that of the *Sequoia sempervirens* (redwood; comp. p. 494), is easily
worked, durable, and susceptible of a high polish. Small articles made of it may be bought at the pavilion in the Upper Grove.

To the W. of the Wawona Hotel rises Signal Peak (7880 ft.), the top of which (7 M.) may be reached by a good road. The *View embraces the San Joaquin Valley (p. 495) and innumerable peaks of the Sierra Nevada. — The *Chinooka Falls (300 ft. high), 5 M. to the N.E., are reached by a good bridle-path and repay a visit.

Good fishing and shooting (with some chance for a bear) are obtainable round Wawona. — Close to the hotel is the Studio of Mr. Thomas Hill, well known for his pictures of the Yosemite. Dried flowers, exquisitely mounted by Mrs. Hill Jr., may be bought here.

Beyond Wawona the scenery traversed is of a very high order. The road mounts rapidly, commanding a series of fine views, and finally attains an elevation of 6500 ft. The descent is equally rapid. At (53 M.) Eleven Mile Station the horses are changed. At (55 M.) Chinquapin Station the direct road to Glacier Point diverges to the right (see p. 511). About 6 M. farther on we reach **Inspiration Point (5600 ft.), where we obtain the first view of the valley, with El Capitan to the left, Cathedral Spires and Sentinel Dome to the right, and the Half Dome and North Dome in the background. Farther on we descend a winding road, with rapid turns, 'hair-pin' bends, and glorious views of the valley. On reaching the floor of the valley we skirt the Merced River and pass near the foot of the *Bridal Veil Fall (right, p. 511), while views of the Virgin's Tears and (farther on) of the Yosemite Falls (p. 509) are obtained to the left. The road from Milton (see p. 450) comes in from the N. and runs along the other (N.) bank of the river. — 67 M. Yosemite Village (4000 ft.), with the Sentinel Hotel ($21/2) and the office of the Guardian of the Valley (p. 509). The stage arrives here about midday.

The **Yosemite Valley ('full-grown grizzly bear'; pron. 'Yosémity') is a gorge or cañon on the W. slope of the Sierra Nevada, traversed by the Merced River and enclosed by rocky and almost vertical walls. The nearly level floor of the valley is 8 M. long and about 3850 ft. above sea-level, while the enclosing walls are 3000-5000 ft. higher. The width between the walls varies from 1/2 M. to 2 M. At several points huge waterfalls are precipitated over the face of the rocky walls into the valley below. The park-like floor of the valley is carpeted with fine flower-studded grass and freely sprinkled with beautiful trees and shrubs, while the emerald-green Merced flows through it in alternate reaches of calm and turmoil.

'The principal features of the Yosemite, and those by which it is distinguished from all other known valleys, are: first, the near approach to verticality of its walls; second, their great height, not only absolutely, but as compared with the width of the Valley itself; and finally, the very small amount of talus or débris at the base of these gigantic cliffs. These are the great characteristics of the Yosemite, throughout its whole length; but, besides these, there are many other striking peculiarities, and features both of sublimity and beauty, which can hardly be surpassed, if equalled, by those of any mountain valleys in the world' (Whitney).

The visitor standing on the floor of the valley sees no outlet in any direction and feels curiously separated from the rest of the world. Per-
haps no single valley in Switzerland combines in so limited a space such a wonderful variety of grand and romantic scenery.

The formation of the valley was at first ascribed to erosion or even to glacial action; but Prof. Whitney has proved to the satisfaction of most authorities that it was most probably due to a mighty convulsion of nature, caused by the subsidence of a limited area, marked by lines of 'fault' or fissure, crossing each other nearly at right angles. The ragged masses of rock that fell into the chasm were gradually covered up by the action of the river, ultimately producing the smooth level floor that the valley now presents. The geological formations are entirely granitic.

The Yosemite Valley was first seen by white men, so far as is known, in 1851, when a small party of soldiers came upon it suddenly when in pursuit of some Indians. The first settlement was made in 1857, and other buildings soon followed as the attractions of the Valley became known and tourists began to pour in. In 1864 an Act of Congress was passed, handing the valley itself, with the adjacent territory for a distance of about 2 M. all round it, to the State of California for the purposes of a State Park. This park is managed by the Governor and a board of State Commissioners, and these are represented on the spot by the Guardian of the Valley, whose office is near the Sentinel Hotel. The State Park is enclosed by the Yosemite National Park, which takes in the entire watershed of the rivers of the valley. About a score of the so-called Digger Indians (Shoshonians), who originally occupied the valley, still survive. They are one of the lowest types of red men, supporting themselves partly on roots and acorns and partly by fishing.

Perhaps the most striking object in the valley, to most visitors, is the cliff known as El Capitan, which rises prominently as the N.W. buttress of the cañon. It is not by any means the highest part of the cañon-walls, though rising to a height of 3300 ft. above the floor of the valley, but produces its effect by its dominating position, its majestic form, the bareness and verticality of its face, and the narrowness of the valley in front of it. It has two faces, one looking W. and the other S., which join each other almost at right angles. The summit cannot be reached without a long and arduous journey, which is seldom undertaken. The Ribbon Fall or the Virgin's Tears, about 2000 ft. high, descends over the cliffs just to the W. of El Capitan. It is a beautiful fall in the early part of the season, but loses most of its water in summer. — To the E. of El Capitan are the fine peaks named the Three Brothers, the highest of which, known also as Eagle Peak (3000 ft. above the valley), is a favourite view-point (see p. 512). — In the recess to the E. of Eagle Peak, near the centre of the valley, are the Yosemite Falls, where the creek of that name descends to the valley in three leaps, with a total height of 2500 ft. The Upper Fall has a vertical
descent of 1436 ft.; the Middle Fall consists of a series of cascades with a total descent of 626 ft.; while the Lower Fall is 400 ft. high. This is the highest waterfall in the world with anything like the same body of water. At the top it is about 35 ft. wide. Seen at its best, this fall is certainly one of the grandest features of the valley; but it dwindles considerably as the season advances. A splendid ice-cone, 500 ft. high, forms at the foot of the Upper Fall in winter. Trail to the top, see p. 512. — The projection to the E. of the Yosemite Falls is named Yosemite Point (3220 ft.) and commands a splendid view (comp. p. 512). The ravine to the E. of this is known as Indian Cañon. The wall of rock on the other side of Indian Cañon is known as the Royal Arches, so called from the semi-circular cavities on its front. Adjoining these, at the angle formed by the beginning of the Tenaya Cañon (see below), rises the Washington Tower or Column (2005 ft.), which is itself a cub or spur of the huge North Dome (3725 ft.).

We have now, in our survey, reached the head of the Yosemite Valley proper, where it splits into the three narrow canions of the Tenaya or N. fork of the Merced to the N., the Merced proper in the middle, and the Illilouette or S. fork of the Merced to the S. (comp. p. 513). To the S. of the Tenaya Cañon, opposite the N. Dome and forming the E. terminus of the Yosemite Valley, rises the singularly shaped **South or Half Dome (4972 ft.), which disputes with El Capitan the place of the most remarkable single feature of the valley. 'It strikes even the most casual observer as a new revelation in mountain forms; its existence would be considered an impossibility if it were not there before us in all its reality; it is an unique thing in mountain scenery, and nothing even approaching it can be found except in the Sierra Nevada' (Whitney). The Half Dome was first ascended in 1875 by a man named Anderson, who scaled the summit on the S.E. side by means of a rope attached to pegs driven into the rock. Anderson's ladder has, however, been allowed to go to ruin, and at present the top of the Half Dome is inaccessible. — To the S.W. of the Half Dome, at the angle formed by the Tenaya and Merced Cañons, rises Grizzly Peak, a grim, wooded, and nearly inaccessible summit.

Passing over the Merced Cañon, which enshrines the Vernal and Nevada Waterfalls (see p. 511), we now come to the S. wall of the Yosemite Valley, the first (easternmost) peak of which is **Glacier Point (3350 ft.), the most frequently visited, and in many respects the finest, of the points of vantage from which to view the valley. A description of the trail to it and the view from it is given at p. 511. — For about 1 M. to the W. of Glacier Point the wall of the valley runs nearly in a straight line and is almost wholly covered with talus or debris. Above this, but a little back from the valley, rises the Sentinel Dome (4270 ft., 8120 ft. above sea-level), which commands a very extensive view (see p. 511). The front-wall just
mentioned ends on the W. in the *Sentinel Rock (3155 ft.), the most conspicuous rock on the S. face of the valley. Its ascent is not difficult or dangerous for climbers. — Next in order, as we proceed towards the W., come the slender Cathedral Spires (2970 ft. and 2950 ft.), adjoined by the imposing *Cathedral Rocks (2660 ft.), opposite El Capitan. Over the W. side of the lower part of these rocks pours the *Bridal Veil Fall, which some visitors deem the finest in the valley. It has a clear vertical fall of about 630 ft., with a width of 50-70 ft. The name is derived from the effect on it by the wind, which often makes it flutter like a white veil. Like most of the other falls, it loses much of its grandeur as the summer advances. A fine rainbow is generally visible on this fall between 4 and 6 p.m.

The above enumeration includes most of the principal points in the valley itself or in its immediate walls. Below follows a short description of the routes leading to these as well as to other points not included in the valley itself but generally visited thence. The hotel (p. 508) is taken as starting-point. For information as to horses, guides, and so on, comp. p. 506.

(1.) *Lower Round Drive (12-20 M.), on the floor of the Valley (fare $3/2 each; incl. Mirror Lake and Cascades, $3/2). This drive gives a very good general idea of the Yosemite wonders, but, as most of them are almost as well seen on entering the valley by stage, it need not be taken by those whose time is limited. The points visited include the foot of the Yosemite and Bridal Veil Falls (p. 509 and above), and it is well to time the drive so as to see the afternoon rainbow on the latter (see above). The Cascade Falls are about 3/2 M. below the Bridal Veil Fall, beyond the limits of the valley proper. Mirror Lake (see p. 512) is about 3 M. to the N.E. of the hotel.

(2.) Glacier Point (5½ M.; horse $3). The Glacier Point trail (well-made but somewhat trying on horseback for those liable to giddiness, esp. in descending; quite safe and not very steep for walking) begins near the foot of Sentinel Rock, not far from the hotel. The trail ascends the steep face of the cliff in zigzags. Union Point, about two-thirds of the way up, commands a fine view. Close by is the singular Agassiz Column. **Glacier Point (3850 ft.; 7200 ft. above the sea), marked by a flagstaff, where an iron rail has been fixed between two rocks, commands a splendid view of most of the valley, the floor of which lies almost perfectly sheer below us. A little way from the edge of the cliff is the small and unpretending, but fairly comfortable Glacier Point Hotel ($3, meal $1), the porch of which commands a magnificent **View of the Merced Cañon, with the Vernal and Nevada Falls and the Cap of Liberty, the Half Dome, and the High Sierra, including (named from right to left) Mt. Starr King, Red Mt., Gray Mt., Mt. Clark, Mt. Ritter (in the extreme distance), Mt. Florence, Mt. McClure, Tenaya Peak, and Mt. Lyell (p. 513). Nearly every evening a fine display of fireworks (announced by a horn) is given here by throwing burning brands, etc., over the cliff (well seen from below). — Glacier Point is accessible, for those who can neither ride nor walk up the trail, by carriage-road from Chingwatin (see p. 508), but this roundabout journey takes about a day (5½ hrs. each way) instead of 4-5 hrs. It may also be reached via Nevada Fall (comp. p. 512), and those who spend the night here may return by this route. Many visitors now ascend from the Sentinel Hotel to Glacier Point and drive thence to (14 M.; 5½ hrs.) Wawona (p. 507).

— The top of Sentinel Dome (p. 510) is about 11/4 M. from Glacier Point and is easily reached thence on foot or horseback (no extra charge). From Sentinel Dome the excursion may be extended to the (11/2 M.) so-called Fissures (horse 75 c. extra).
(3.) **Vernal and Nevada Falls (5½ M.; horse §3).** The excellent Anderson Trail, which as far as Vernal Fall is so broad and easy as to give no cause for nervousness, begins about 2½ M. to the S.E. of the Sentinel Ho. and winds along the flank of Grizzly Peak (p. 510), with the beautiful Merced River rushing downwards on the right. A good distant view is obtained (right) of the Illilouette Falls (p. 513). About 1/4 M. below the Vernal Fall we cross the river by a bridge, which commands one of the best views of it. Beyond the bridge is the so-called Register Rock, where the trail forks, the left branch leading to the flat Lady Franklin Rock, near the foot of the Vernal Fall. The (2 M.) **Vernal Fall has a vertical descent of 350 ft., with a width of 70-80 ft. Behind rises the picturesque **Cap of Liberty (7060 ft. above sea-level). We may now ascend to the top of the fall by a series of iron Ladders, which climb the face of the rock close to the fall (waterproof desirable), but this route should not be tried by any except those of steady head. From Register Rock (see above) the trail (now narrower and steeper) makes a wide sweep to the right before reaching the top of Vernal Fall, where the flat rock, with a natural parapet, permits an approach to the verge of the water. Just above is the beautiful **Emerald Pool. The trail recrosses the river about halfway between the top of the Vernal Fall and the bottom of the Nevada Fall. Above the bridge is the **Diamond Cascade and below it is the **Silver Apron. We now soon obtain a fine view of the (3½ M.) superb **Nevada Fall, which has a slightly sloping descent of about 600 ft. and ranks with the Yosemite Falls. — Many visitors turn at the foot of the Nevada Fall, but those who have time and strength should certainly follow the steep trail to (7½ M.) the top of it.

The trail to the Little Yosemite and Cloud’s Rest (see below) diverges to the left before we reach the bridge above the falls. Beyond the bridge the trail goes on, along the flank of Mt. Starr King (9080 ft.), to (12 M.; 17 M. from the hotel; horse §6) Glacier Point (see p. 511); and this route is recommended to those who have time. The night may be spent at Glacier Point Hotel (see p. 511). This trail crosses the Illilouette just above the falls (p. 513).

(4.) **Eagle Peak and Yosemite Falls (3-6½ M.; horse §3).** To reach Eagle Peak trail, a steep but well-made bridle-path (not so dizzy as the Glacier Point trail), we cross the bridge behind the Sentinel Hotel (p. 508); turn to the left a little farther on, and cross the bridge over the creek descending from the Yosemite Falls. The trail diverges to the right about ½ M. beyond the last-named bridge, ascends round and up the ledges adjoining the Falls cañon, and then descends to (1½ hr.) a hitching-place near the foot of the **Upper Yosemite Fall (see p. 509). We clamber over the rocks and approach as near the fall as we care to penetrate through the clouds of spray, gaining an overwhelming impression of the stupendous power and volume of this marvellous waterfall. Continuing to follow the trail, we keep to the left, where a path to the right diverges to the top of the Yosemite Fall, and again to the left at the next fork, where the path to the right leads to Lake Tenaya (comp. p. 513). The **View from Eagle Peak (p. 509) extends farther to the W. than that from Glacier Point and includes some peaks of the High Sierra. — If time allows, a visit to the top of the Yosemite Fall (see above) should certainly be combined with this trip. The **View of the fall from above is as impressive in its way as that from below. A large boulder about 12 yds. below the bridge above the fall, on the left (E.) side of the stream, shakes or rather jerks perceptibly at irregular intervals, as may be felt by leaning against it. This movement is probably caused by the water of the fall entering some cavern far below. The trail crossing the above-mentioned bridge leads to Yosemite Point (p. 510), which commands a view similar to that from Eagle Point. If time and strength do not allow a visit to both, the top of the Yosemite Falls and Yosemite Point should be preferred to Eagle Peak.

(5.) **Mirror Lake** (carr. §1), a small piece of water, about 4 M. to the N.E. of the Sentinel Hotel, at the mouth of the Tenaya Cañon, is visited for its wonderful reflections of the North and South Domes and Mt. Watkins. Its surface is generally most unruffled early in the morning, and visitors
usually go to see the sun rise in it over the Half Dome (about 8 a.m. in summer). The reflections are also good by moonlight.

(6.) Cloud's Rest (9-10 M.; horse $5). This excursion is one in high favour among the more energetic visitors to the Valley. It is accomplished in one day (12 hrs.). The new trail is good and not difficult, but the upper part of it is apt to be buried in snow in the early part of the season. — From the hotel to the point where the trail diverges from that to the top of the Nevada Fall, see p. 511. A little farther on the trail to the so-called Little Yosemite (6000 ft.) diverges to the right from the Cloud's Rest trail. Cloud's Rest (600 ft. above the valley and 9010 ft. above the sea) commands a splendid "View of the walls of the Yosemite Valley and of the High Sierra. Immediately to the S.W. is the Half Dome; to the N., across the Tenaya Cañon, rises Mt. Watkins (see below). Among the most prominent peaks of the Sierra (named from N. to S.) are Mt. Hoffman, Tenaya Peak (with Tenaya Lake below it), the Cathedral, Mt. Dana, Mt. Gibbs, Mt. Lyell, Mt. Clark, and Mt. Starr King (p. 512).

(7.) Falls of the Illilouette (2½ M.). The falls of the Illilouette or Tuolumne may be reached by a somewhat rough scramble up the Cañon of the Illilouette, opening to the S. of the Merced Cañon (comp. p. 510). The total height is about 600 ft.; the main fall is 400 ft. high. They are also passed on the trail from Nevada Fall to Glacier Point (see p. 512). Most visitors will content themselves with the distant view from the Vernal Fall trail (see p. 512). A good echo is returned from Echo Wall, in the Illilouette Cañon.

(8.) Mt. Watkins (4400 ft. above the valley and 8200 ft. above the sea) rises on the N. side of the Tenaya Cañon and is sometimes ascended from the N. Among the longer excursions in the High Sierra, which can be made by those who prolong their stay in the Yosemite Valley, are those named below. Guides are necessary in all cases, and a little experience in mountain-climbing is desirable for some of the ascents. Rough accommodation for the night can sometimes be procured, but in other cases camping out is necessary. — About 12 M. to the N. of Yosemite is the Cañon of the Tuolumne (four syllables), a stream which, in this part of its course, runs nearly parallel with the Merced and is very attractive from the beauty and variety of its waterfalls and the grandeur of its overhanging cliffs. The upper part of the Cañon can be easily reached on horseback by the Virginia Creek Trail, which leaves the trail to Mono Lake at Tenaya Lake (see below) and soon brings us to the first and uppermost of three picturesque groups of cascades, with a total descent of 2000 ft. within 1½ M. About 20 M. lower down is the Hetch-Hetchy, a remarkable counterpart of the Yosemite, on a somewhat smaller scale, but closely resembling it in its main features, with similar high cliffs and fine waterfalls. It cannot easily be reached by descending the cañon, but is approached by a side-trail leaving the Milton road at Crocker's Station, where guides and animals may be procured. Those who make this trip must provide their own food and camp-accommodation. — Lake Tenaya, 18 M. from the Sentinel Hotel, via the Eagle Peak trail (comp. p. 512), lies near the head of the Tenaya Cañon, in the midst of a grand mountain amphitheatre. Tenaya Peak, on its E. side, may be ascended with little difficulty. Beyond this lake the trail (to the left the Virginia Creek trail, see above) goes on to the (5 M.) Tuolumne Meadows (8500 ft.), at the head of the Tuolumne Cañon (see above). The scenery here is very fine. Near the head of the Meadows are the (5 M.) Soda Springs, a favourite camping-ground for those making the ascent of Mt. Dana or Mt. Lyell (see below). The trail goes on to (20 M.) Mono Lake. — Mt. Dana (13,225 ft.; there and back, 3-4 days), the loftiest peak near the Yosemite, commands a very extensive view and is generally ascended from Soda Springs (see above; no particular difficulty). — Mt. Lyell (13,217 ft.) is more difficult and should not be attempted except by experts (3-4 days). It is also ascended from Soda Springs. — Mt. Hoffman (10,870 ft.; View) may be ascended from Tenaya Lake in half-a-day. — Visitors to the Little Yosemite (see above) may go through the gorge at its head, passing the Silver Chain Cascade, to the Lost Valley (there and back in one day).

Baedeker's United States. 2nd Edit.

33
103. From San Francisco to Portland.

772 M. Southern Pacific Railway in 36 hrs. (fare $25; sleeper $5). This line traverses some fine scenery and affords good views of Mt. Shasta (see below); some of the engineering difficulties were very great.

Steamers of the Pacific Coast Steamship Co. (agents, Goodall, Perkins, & Co., 10 Market St.) and of the Oregon R. R. & Navigation Co. leave San Francisco every 5 days for Portland (2 days; fare $16, incl. berth and meals). The voyage is a pleasant one and usually calm in summer.

From San Francisco to (90 M.) Sacramento and (108 M.) Roseville Junction, see pp. 451-449. Our line here diverges to the left from that to Ogden and runs to the N., ascending the valley of the Sacramento, which flows at some distance to the left. 142 M. Marysville (65 ft.), a city of 3991 inhab., at the confluence of the Feather and Yuba Rivers. To the left rise the Marysville Buttes (1800-2100 ft.). At (163 M.) Biggs (100 ft.) we cross the Feather River. 186 M. Chico (195 ft.; 2894 inhab.). A fine fruit-growing country is traversed. Near (213 M.) Tehama (220 ft.) we cross the Sacramento.

Beyond (260 M.) Redding (555 ft.), near the head of the Lower Sacramento Valley, we enter upon a stretch of very picturesque scenery (observation-car), where the train crosses the winding Sacramento 18 times and threads 12 or more tunnels in 80 M. At (269 M.) Copley (600 ft.) the Indians spear salmon. Between (277 M.) Kennet (670 ft.) and (282 M.) Morley (720 ft.) the Sacramento is joined by the Pitt River. To the right rise the McCloud Mts. The McCloud River, which flows into the Pitt River, is one of the finest trout-streams in California. 298 M. Delta (1140 ft.), a good fishing-station. Near (306 M.) Gibson (1390 ft.) we pass through fine pine-forest. To the left, near (320 M.) Castle Crag (2085 ft.; *Castle Crag Tavern, $2 1/2-3 1/2), rise the imposing *Castle Crag, towering to a height of 4000 ft. above the river and forming one of the most striking pieces of scenery in the United States. Near (323 M.) Chestnut (2195 ft.) we obtain our first view of the huge snow-clad dome of Mt. Shasta (in front, to the right). To the right, near (325 M.) Upper Soda Springs (2360 ft.), are the pretty Mossbrae Falls. A little farther on we cross the Sacramento for the last time and ascend rapidly, round the *Great Bend, to (335 M.) McCloud (3350 ft.). — At (338 M.) Sisson (3555 ft.; *Hotel Sisson, $2; Depot Hotel, $1 1/2), in Strawberry Valley, we enjoy a grand, unimpeded view of Mt. Shasta. To the left rise the Scott Mts. (Mt. Eddy, 9150 ft.).

The top of *Mt. Shasta (14,440 ft.) is 12 M. from Sisson and may be ascended thence (there and back) in 30-36 hrs. (guides, horses, etc., at Sisson's Hotel; total expense $15-20 each). The night is spent at Sisson's Camp (9000 ft.), just above the timber-line. There is a Geodetic Monument on the main peak. Mt. Shasta is a huge extinct volcano, and its volcanic character is clearly discernible in the Crater or W. Peak (12,900 ft.), where there is a crater 3/4 M. in diameter and 2500 ft. deep. Hot springs and solfataric action are also visible near the top of the main peak. The *View from the summit is very extensive.
At (345 M.) Black Butte Summit (3900 ft.) the train reaches the summit of the pass across the N. part of the Sierra Nevada and begins its descent. To the right we obtain views of the five distinct cones of Muir's Peak or Black Butte (6500 ft.). The trees through which we run include the sugar pine (Pinus Lambertiana; with cones 12-18 inches long), the yellow pine (P. ponderosa), the contorted pine (P. contorta), the cembra pine (P. flexilis), and the nut pine (P. Sabiniana; cones 12 inches long and 6 inches thick). 355 M. Edgewood (2955 ft.) commands a good retrospect of Mt. Shasta. We now ascend the Shasta Valley, with the Shasta River at some distance to the right. From (377 M.) Montague (2540 ft.) the Siskiyou Mts. (7660 ft.) are visible to the left. Near (395 M.) Hornbrook (2155 ft.) we cross the Klamath River and begin to ascend the Siskiyou Mts. (gradient 4 : 100). Beyond (404 M.) Coles (2905 ft.) we enter Oregon ('Webfoot State'). The line passes through a long tunnel just before reaching the summit at (414 M.) Siskiyou (4130 ft.). To the right is Pilot Rock (5430 ft.), the S. outpost of the Cascade Mts. (p. 425). — The train now descends rapidly, through tunnels and round curves, into Rogue River Valley.—431 M. Ashland (1900 ft.; 1784 inhab.). Mt. Pitt (9760 ft.) rises to the right. — 446 M. Medford (1400 ft.) is the nearest station to (85 M.) the curious Crater Lake.

Crater Lake (6240 ft.), not yet easily accessible to the ordinary tourist, lies on the summit of the Cascade Mts., occupying the abyss formed by the subsidence of an extinct volcano of the size and height of Shasta. It is 6 M. long and 4 M. wide. Its most peculiar feature is the perpendicular enclosing wall of igneous rock, 1000-2000 ft. high, in which there are but one or two openings. There is no visible affluent or outflow, but the water, though destitute of animal life, is fresh and sweet and of a phenomenally clear ultramarine hue. The lake is 2000 ft. deep and thus the deepest body of fresh water on the continent. *Wizard Island*, in the centre of the lake, 845 ft. h. is an extinct volcanic cone and is a curious instance of a crater within a crater. The road to the lake is fair, and the descent to the water's edge may be made in about 1/2 hr. For a visit to the lake from Ashland or Medford 6-8 days should be allowed. Conveyances, camping outfits, and information may be obtained at both places. The district containing this lake has been set apart as the Oregon National Park. Government has recently placed some trout in Crater Lake. For an excellent account of the lake, see Mazama (p. 517), Vol. I, No. 2.

Beyond Medford, to the right, stands Table Rock. 476 M. Grant's Pass (960 ft.); 510 M. Glendale (965 ft.); 552 M. Myrtle Creek (635 ft.); 574 M. Roseburg (490 ft.; 1472 inhab.), on the Umpqua River. To the right is Diamond Peak (8807 ft.), and farther on, on the same side, are the Three Sisters (8500 ft.). Beyond (649 M.) Eugene (455 ft.) we descend the pretty and well-wooded valley of the Willamette (left). 667 M. Harrisburg (335 ft.). — 692 M. Albany (240 ft.) is the junction of a line to (11 M.) Corvallis and (83 M.) Yaquina, on Yaquina Bay (p. 517). — 720 M. Salem (190 ft.; Willamette Hotel, $2-3), the capital of Oregon, a small city with 4515 inhab., the State Capitol, and various other State buildings and institutions. — 757 M. Oregon City (95 ft.), with 3062 inhab., possesses a fine water-power supplied by the Falls of the Willamette (40 ft.). — 771 M.
East Portland (55 ft.). The train then crosses the Willamette and reaches its destination.

772 M. Portland (*The Portland, from $3; Imperial, $2-3, R. $ 1-2; Perkins, on the European plan; Grand Central; Brit. Consul, Mr. James Laidlaw), the business capital of the Pacific North-West, is advantageously situated on the Willamette, 12 M. above its confluence with the Columbia (see p. 445). Pop. (1890) 46,385, or, including East Portland and Albina, now incorporated with the city, 62,046. These figures include about 3000 Chinese. Its position at the head of deep-sea navigation on the Columbia and Willamette and its extensive railway connections with the N., E., and S. have made Portland an important commercial centre, and it ranks among the wealthiest cities of its size in the country. The streets are well laid out and have a more substantial look than those of many western towns.

Portland was first settled in 1843, and its growth since then has been rapid and uninterrupted. The annual value of its exports now amounts to about $15,000,000 (3,000,000 f.); the chief articles being wheat, flour, wool, fish (salmon, etc.), and timber. It manufactures pig iron, woollen goods, flour, furniture, beer, cordage, and other goods to the annual value of $25,000,000 (3,000,000 f.). It has steamship lines to San Francisco and other ports on the Pacific Coast, Puget Sound, British Columbia, Alaska, China, and Japan, while its sailing vessels ply to Great Britain, China, South America, and New York. — The annual rainfall at Portland is 46 inches.

The new Union Railway Station, at the corner of N. 6th and Irving Sts., is a roomy and handsome building, with a tall clock-tower. About 3/4 M. to the S. of it, in the block enclosed by Jefferson, Madison, 4th, and 5th Sts., is the new City Hall. Other important edifices in the business part of the city are the Chamber of Commerce (Stark St.), the Post Office and Custom House (5th St.), the Court House (4th St.), the Opera House (Morrison St.), the Daily Oregonian Office (cor. of 6th and Alder Sts.), and the Marquam Block (Morrison St.). The Portland Library, Stark St., is a tasteful Romanesque building. The Portland Hotel (see above), between 6th, 7th, Yamhill, and Morrison Sts., is a handsome structure. The Portland Industrial Exposition Building, in Washington St., is used for annual exhibitions. Some of the Churches, Schools, and Charitable Institutions are worthy representatives of the city's wealth. Among other objects of interest is the fine Steel Bridge over the Willamette.

The visitor to Portland will, however, best use his leisure by ascending the Portland Heights on the W. side of the city (easily reached on foot or by tramway) for the sake of the magnificent mountain view they command. Mt. Hood (p. 517), 60 M. to the S.E., is the most prominent peak, but the rounded dome of Mt. St. Helens (p. 427; 50 M. to the N.), Mt. Adams (p. 425), and Mt. Rainier (p. 426) are visible, and the view also includes the Coast Range and the valleys of the Columbia and Willamette. The best point for this view is Fairmount, 1000 ft. above the city and about 1 hr.'s walk or 3/4 hr.'s drive from its centre.

Portland is the headquarters of the Ma'amas, an Alpine Club
(200 members) founded in 1894, which has done much to make the mountain-scenery of the Pacific North-West better known through its periodical the *Masama* and in other ways (annual dues $3).

**Excursions from Portland.**

The favourite excursion from Portland is the voyage up the Columbia River to (60 M.) the Cascades and to (110 M.) The Dalles (fare $3½; comp. p. 445; Or. R. R. & Nav. Co. Office, cor. of 3rd and Washington Sts.). The traveller may take the train to The Dalles, spend the night there, and return next morning by the steamer. If the trip is made only one way, the steamer should be preferred, as the scenery is not seen to the best advantage from the train. The boats leave early in the morning, but travellers can go on board the night before. On the way we pass (18 M.) Vancouver, the military headquarters of the Department of the Columbia.

Steamers (office as above) also descend the Lower Columbia to (106 M.) Astoria (ca. 8 hrs.), affording a good view of the wide estuary of a great river. A visit to a Salmon Cannery may be combined with the trip. -- Astoria (Occident Hotel, $2; Brit. vice-consul, Mr. P. L. Cherry), a small seaport with 6184 inhab., formerly famous for its fur-trade, has 3 M. of wharves on the Columbia. Excursions may be made hence to (16 M.) Clatsop Beach (hotel) and North Beach (in Washington; return-ticket from Portland to either of the Beaches, $4½).

The Willamette affords another pleasant trip, steamers plying regularly to Oregon City (p. 515), Dayton, and Corvallis (p. 515).

**Mt. Hood** is conveniently ascended from Portland by taking the train to (66 M.) Hood River (comp. p. 446).

**Mt. St. Helens** (a more or less active volcano), **Mt. Adams**, **Mt. Jefferson**, and the Three Sisters may also be visited from Portland; but the trails are rough, and camping out is necessary in each case.

Among other points of interest visited from Portland are the Multnomah Falls (p. 446), **Crater Lake** (p. 515), and **Yaquina** (p. 515), Newport (Ocean House), and other places on **Yaquina Bay** (3 hrs. by train; return-fare $6).

From Portland to Tacoma (for Seattle, British Columbia, Alaska, etc.), see R. 106; to **Omaha** and the East, see R. 88.

**104. From San Francisco to New Orleans.**

2400 M. **Southern Pacific Railway** (‘Sunset Route’) in about 4 days (fare $67.50; sleeper $13). Through-carriages.

From **San Francisco** to (484 M.) **Los Angeles**, see R. 97, and from **Los Angeles** to (542 M.) **Colton**, see R. 100 b.

542 M. **Colton** (960 ft.; **Trans-Continental Hotel**, $1½-3; **Marlborough Ho.**, $2), a town of 1315 inhab., is of importance as the junction of lines to **San Bernardino** (p. 502), on the N., and **San Diego** (p. 504), on the S. It grows large quantities of fruits of various kinds and is widely known for its excellent black and white marble (comp. p. 483). — The train now begins to ascend rapidly towards the ridge of the **San Bernardino Mts.**, which we cross, at (563 M.) **Beaumont**, by the **San Gorgonio Pass** (2560 ft.). On the other side we descend as rapidly towards the Colorado Desert (see below). To the right are the striking **San Jacinto Mts.** (highest summit 10,990 ft.), to the left the San Bernardino Range. — The **Colorado Desert**, which we now traverse for about 150 M., is a barren sandy wilderness, a great part of which actually lies below sea-level (see p. 518). Almost nothing grows on it except cactus and
yuccas. The Gulf of California would seem to have extended to the vicinity of the San Gorgonio Pass and when it receded left a large inland sea of salt-water, which finally dried up, leaving large deposits of salt near Salton (see below). — 569 M. Banning (2320 ft.); 575 M. Cabazon (1780 ft.); 583 M. White Water (1125 ft.). — About 7 M. to the S.W. of (589 M.) Palm Springs (585 ft.) lies Palm Valley (inn.), at the E. base of the San Jacinto Mts., with the only natural grove of date-palms in California and a curious hot spring. It is now frequented to some extent as a health-resort, and fruit-growing is also carried on. — At (612 M.) Indio (Rail. Hotel), also frequented by consumptive patients, we are about 50 ft. below the level of the sea, and at (637 M.) Salton we reach a depth of 263 ft. below sea-level. In 1891 a lake, 30 M. long, 10 M. wide, and 4 ft. deep, was created near Salton by the Colorado River, the country thus partly reverting for a time to the physical conditions mentioned above. 661 M. Volcano Springs (225 ft. below sea-level). At (671 M.) Flowing Well we are again 5 ft. above sea-level. 703 M. Cactus (395 ft.). — Farther on we cross the Colorado River, and enter Arizona (p. 465).

731 M. Yuma (140 ft.: Southern Pacific Hotel, with Rail. Restaurant, $21/2), one of the hottest places in the country, which was established by the Spanish missionaries in 1700 and lies on the Colorado just below its confluence with the Gila ('Heela'). The Mexican frontier is only 7 M. to the S. The Yuma Indians, specimens of whom sell bows and arrows, etc., at the railway-station, have a reservation adjoining the Colorado. The Territorial Prison is situated at Yuma. — The train now follows the course of the Gila (left) through an arid and unattractive district. Cacti are abundant, including many specimens of the giant cactus (Cereus giganteus; Mex. sahuaro), often 40 ft. high and 'looking like a Corinthian column surmounted by candelabra'. Mirages are often seen in crossing Arizona by this route. To the left rise the Castle Dome Mts., to the right the Gila Range. Farther on other mountains are seen on both sides. 791 M. Mohawk Summit (540 ft.); 854 M. Gila Bend (735 ft.; Rail. Restaurant); 873 M. Estrella (1520 ft.). — From (896 M.) Maricopa (1175 ft.) a branch-line runs to the N. to (35 M.) Phoenix (Adams Ho., from $3; Commercial Hotel, E. P.; Ford Ho., from $2; Hardwick, $11/2-21/2), the capital of Arizona, a city of 3152 inhab., in the well-irrigated Salt River Valley. The remains of several prehistoric towns have been found in the vicinity. — About 16 M. to the N. (2 hrs. by stage) of (917 M.) Casa Grande (1395 ft.; Fryer Hotel, $2) are the highly interesting remains of the pueblo of Casa Grande or Chichitilaca, with enormous adobe walls. — The line continues to ascend steadily.

982 M. Tucson (pron. 'Toosohn'; Orndorff, $21/2-5; St. Xavier, $21/2-3; Rail. Restaurant), a quaint old Spanish-looking place with 5150 inhab., is the largest city of Arizona and carries on a considerable trade with Mexico. It contains the Territorial University and an Indian School. About 9 M. to the S. is the old mission-church of
St. Xavier, founded at the close of the 17th century. — Beyond Tucson the Santa Rita Mts. are seen to the right, culminating in Mt. Wrightson (10,315 ft.); to the left are the Santa Catalina Mts. — 1029 M. Benson (3580 ft.) is the junction of a branch-line to Guaymas, on the W. coast of Mexico (Gulf of California). At (1050 M.) Dragoon Summit (4615 ft.) we reach the highest point of this part of the line and begin to descend slightly. 1074 M. Wilcox (4165 ft.); 1079 M. Railroad Pass (4395 ft.); 1095 M. Bowie (3760 ft.). At (1125 M.) Stein's Pass (4350 ft.), in the Peloncillo Range, we enter New Mexico (p. 471). 1145 M. Lordsburg (4245 ft.), the junction of a branch-line to Clifton; 1175 M. Wilma (4555 ft.). — 1204 M. Deming (4335 ft.; Depot Hotel, $ 3), a place of 1136 inhab., is the junction of the A., T., & S. F. line to Rincon (for La Junta, Denver, etc., see p. 409) and also of a short line to (48 M.) Silver City. — 1215 M. Zuñi (4185 ft.; not to be confused with the pueblo mentioned at p. 482). Beyond (1288 M.) Rogers we cross the Rio Grande and enter Texas ('Lone Star State'), the largest state in the Union (265,780 sq. M., or larger than France).

1294 M. El Paso (3715 ft.; Pierson; Grand Central; Vendome; Rail. Restaurant), a city of 10,338 inhab., is situated on the left bank of the Rio Grande and has become a place of some industrial importance, with silver-smelting works and cattle-yards. It is the chief gateway of the trade between the United States and Mexico. Just across the river is the Mexican town of Juárez or El Paso del Norte (see p. 541), connected with El Paso by an 'international' tramway. El Paso is the S. terminus of the A. T. & S. F. line (R. 93b), the W. terminus of the Texas & Pacific Railway (R. 105), and the N. terminus of the Mexican Central Railway (R. 109). — Railway time changes here from the 'Pacific' to the 'Central' standard (2 hrs. faster); local time accords with the 'Mountain' standard (comp. p. xviii).

Beyond El Paso the line follows the general course of the Rio Grande, here forming the boundary between Texas and Mexico. Antelopes are occasionally seen from the train. 1307 M. Ysleta (3665 ft.); 1348 M. Fort Hancock (3520 ft.); 1387 M. Sierra Blanca (4510 ft.; Rail. Restaurant); 1456 M. Valentine (4425 ft.); 1491 M. Marfa (4690 ft.), the main depot for Fort Davis, a little to the N. — At (1505 M.) Paisano (5080 ft.) we reach the highest point on the Southern Pacific Railway between San Francisco and New Orleans (1055 ft. higher than the Tehachapi Pass, p. 496). Fine mountain scenery in the distance. — 1566 M. Haymond (5885 ft.); 1611 M. Sanderson (2780 ft.; Rail. Restaurant); 1663 M. Langtry (1320 ft.), a military post. The Rio Grande is again in sight. Beyond (1694 M.) Shumla (1420 ft.) we cross the Pecos River by a fine cantilever bridge, 2180 ft. long and 328 ft. high (one of the highest railway-bridges in the world). Near (1695 M.) Painted Cave (1005 ft.), in the cañon of the Rio Grande, is a large cavern with some curious and undeciphered Indian hieroglyphics. As we approach (1755 M.) Devil's River
(970 ft.) we see, to the left, the singular Palisades, in the Castle Rock Cañon. Beyond (1748 M.) Del Rio (955 ft.; Hotel Val Verde, $1 1/2) we leave the Rio Grande and traverse a cattle-raising district.

— From (1785 M.) Spofford Junction (1015 ft.) a line runs to (34 M.) Eagle Pass, the starting-point of the Mexican International Railway route to Mexico (see p. 540). 1826 M. Uvalde (930 ft.); 1877 M. Dunlay (1010 ft.).

1918 M. San Antonio (685 ft.; Menger, $2 1/2-5; Maverick, $2 1/2-4; Southern, St. James, $2; Rail. Restaurant), one of the chief cities of Texas and the 'cradle of Texas liberty', is a well-built city, of a distinctly Spanish cast, situated on the San Antonio River, which, with its small affluent the San Pedro, divides the city into three parts. San Antonio is an important wool, cotton, horse, mule, and cattle market, and is the centre of numerous railways (comp. p. 521). It is also the seat of a United States military post (p. 521). Its population of (1890) 37,673 consists in nearly equal proportions of Americans, Mexicans, and Germans, with a few Coloured people. San Antonio is one of the most interesting cities in the country and will repay a day's halt. It is frequented as a winter-resort by persons of weak lungs (mean temp., winter 52°, summer 82°).

San Antonio de Bexar was settled by the Spaniards about 1690-1700, and like most of their settlements combined the character of a presidio, or military post, with that of a mission (San Antonio de Valero). The most outstanding event in its history is the 'Fall of the Alamo' in 1836. Texas had determined to resist certain obnoxious laws imposed by Mexico, and the latter sent an army under Santa Ana to reduce the rebels. The advance-guard of 4000 men reached San Antonio on Feb. 22nd and found the fortified Church of the Alamo (see below) garrisoned by a body of 140 Americans (afterwards joined by 25 or 30 more), under Travis, Bowie, and Davy Crockett, who refused to surrender. After a siege of 12 days, the church was finally carried by assault (Mar. 6th) and all the survivors of the gallant little band of defenders were put to the sword. 'Remember the Alamo' became a burning watchword in subsequent struggles. See 'San Antonio de Bexar', a handsomely illustrated volume by Wm. Corner, including a sketch by Sydney Lanier (price $1.25), and 'Remember the Alamo', a novel by Mrs. Barr.

The first object of interest for most visitors to San Antonio is the Church of the Mission del Alamo, situated in the Alamo Plaza, in the quarter to the E. of the San Antonio River. The church, which seems to have derived its name from being built in a grove of alamo or cottonwood trees (a kind of poplar; Populus monilifera), is a low and strong structure of adobé, with very thick walls. It was built in 1744, but has lost many of its original features. It is now preserved as a national monument (visitors admitted free). — At the N. end of the Alamo Plaza, in Houston Street, is the handsome Federal Building. On the W. side is the building containing the San Antonio Club and the Grand Opera House.

Following Houston St. towards the left (W.), we cross the San Antonio and reach Soledad Street, which leads to the left to the Main Plaza (Plaza de Las Yslas), pleasantly laid out with gardens. On its S. side rises the imposing new Court House and on its W. side
stands the Cathedral of San Fernando, dating in its present form mainly from 1868-73, but incorporating parts of the earlier building, where Santa Ana had his headquarters in 1836. — To the W. of the Cathedral is the Military Plaza (Plaza de Armas), with the large City Hall.

The *Military Post (Fort Sam Houston) is finely situated on Government Hill, 1 M. to the N. of the city, and deserves a visit. A splendid *View of the city and its environs is obtained from the tower (88 ft. high), in the centre of the quadrangle.

No stranger in San Antonio should neglect to visit some of the other old Spanish Missions near the city. Those most often visited are the First and Second Missions (see below), but, if time allows, the Third and Fourth Missions should be included. They can all be seen by a drive of 5 or 6 hrs.

The Mission of the Conception, or First Mission, lies about 2 1/4 M. to the S. of the city (reached via Garden St.), dates from 1731-52, and is well preserved. The church has two W. towers and a central dome. The sculptures on the W. door should be noticed. — The Mission San Jose de Aguayo, or Second Mission, 4 M. to the S. of the city, dates from 1720-31 and is the most beautiful of all. Among the points to be noted are the W. façade of the church and the doorway, window, and capitals of the small chapel or baptistry. To the W. of the church is the Mission Granary, with its arched stone roof and flying buttresses (now used as a dwelling). The line of the rampart of the Mission Square is now obscured by adobe huts erected on its ruins. — The Mission San Juan de Capistrano, or Third Mission, 6 M. to the S. of San Antonio, dates from 1731. The line of its square is well defined, and its ruined church, chapel, and granary are interesting. About ½ M. distant is a solid old Aqueduct, taking water to the Fourth Mission. — The Mission San Francisco de la Espada, or Fourth Mission, on the W. bank of the San Antonio River, 9 M. to the S. of the city, also dates from 1731. At the S.E. corner of the Mission Square is a well-preserved Bastion or bastion. The Church has been restored and is regularly used for service by the Indians here.

About 3 M. to the S. of San Antonio are the International Fair Grounds and Buildings, reached either by the Aransas Pass Railway or by electric tramway. It was on these grounds that 'Roosevelt's Rough Riders' were organized in 1893. Adjacent is Riverside Park, with fine groves of pecan trees (carya olivae formis). San Pedro Park, 1 M. to the N. of the city, contains fresh springs and a zoological collection.

From San Antonio to Rockport, 159 M., railway in 6½ hrs. The line runs towards the S.E. 61 M. Kenedy is the junction of a line to (177 M.) Houston (see p. 522). — 138 M. Gregory is the junction of a line, crossing Corpus Christi Bay, to (11 M.) Corpus Christi (St. James, Merriman, $2), a city of 4387 inhab., frequented as a summer-resort. It has a considerable shipping-trade and is connected by the Texas & Mexican Railway with Laredo (p. 523). The King Ranch, 45 M. to the S. of Corpus Christi, is the largest cattle-ranch in the United States owned by one person (Mrs. Richard King). It covers 700,000 acres (1000 sq. M.) and is stocked with 100,000 cattle and 3000 brood-mares. — 159 M. Rockport (Aransas Hotel, $2; The Shell, 2 M. from the town, $2 1/2-3), a place of 1069 inhab., situated on Aransas Bay, is a favourite resort for bathing and for its fine tarpon and other fishing. It has a good harbour, entered by Aransas Pass, which has been improved by the construction of stone jetties. The country round Aransas Pass and Corpus Christi is very fertile and produces large quantities of fruit.

From San Antonio to Austin, 81 M., International and Great Northern R. R. in 3 hrs. — 20 M. Neu-Braunfels, a German town founded by the 'Deutscher Adelsverein' in 1844; 50 M. San Marcos. — 81 M. Austin (Driskill, $2 1/2-5; Avenue, $2 2-1/2; Raymond, $2), the capital of Texas, a pleasant little city, with 14,575 inhab., lies on the Colorado River, in full view of the
Colorado Mts. Its handsome red granite "Capitol, finely situated on high ground, was built by Chicago capitalists in 1881-88, at a cost of $3 1/2 million dollars, in exchange for a grant of 3 million acres of land. It is the largest capitol in America, after that at Washington, and is said to be the seventh-largest building in the world. Other prominent buildings are the State University (750 students), the Land Office, the Court House, and various Asylums. About 2 M. above the city is the "Austin Dam, a huge mass of granite masonry, 1200 ft. long, 60-70 ft. high, and 13-66 ft. thick, constructed across the Colorado River for water-power and waterworks. Lake McDonald, formed by the dam, is 25 M. long.

From San Antonio to Laredo, 153 M., International and Great Northern R. R. in 6 1/4 hrs. The intermediate stations are unimportant. — Laredo (Hamilton, $2 1/2; Commercial, $2), a busy commercial city with 11,345 inhab., lies on the left bank of the Rio Bravo del Norte or Rio Grande. — Mexican National Railroad hence to the City of Mexico, see R. 107.

Beyond San Antonio the New Orleans line passes a number of stations of no great importance. 1993 M. Harwood (460 ft.); 2049 M. Columbus (210 ft.); 2098 M. Rosenberg (110 ft.).

2126 M. Houston (65 ft.; Capitol Hotel, $2 1/2-3 1/2; Hutchins Ho., $2-4; Grand Central, Lawlor, $2-3; Bristol, E. P.; Tremont, $1 1/2), locally pronounced 'Hewston', the fourth city of Texas in population in 1890 (27,557) and now probably the second (estimated pop. 60,000), lies on the narrow but navigable Buffalo Bayou, 50 M. above Galveston. It is a characteristic specimen of a 'hustling', go-ahead, 'Western' city, with more than usually extravagant hopes of future development. In 1890 the value of the cotton handled here amounted to $20,000,000 (4,000,000 bales), while a large trade was also done in sugar, timber, and cotton-seed oil. The numerous manufactories employ about 10,000 workmen. Among the principal buildings are the Market and City Hall, the Cotton Exchange, the Court House, the Post Office, and the Masonic Exchange. A visit to one of its large Cotton Presses is interesting. Houston is a railway centre of great importance, about a dozen lines radiating hence in all directions.

From Houston to Galveston, 50 M., railway in 1 3/4 hr. — Intermediate stations unimportant. As we approach our destination we cross a trestle, 2 M. long, leading over the channel between the two wings of Galveston Bay to Galveston Island. — 50 M. Galveston (Tremont, $2 1/2-4; Washington, $2-2 1/2; Grand, E. P.; *Beach Hotel, see next page, $3 1/2-5; British Consul, Mr. H. D. Nugent), the third city of Texas in population (29,084 in 1890) and the first in commercial importance, lies at the N.E. extremity of the long and narrow Galveston Island, at the entrance to Galveston Bay. It is the third cotton-shipping port in the United States (900,000 bales yearly), and other important exports are wool, hides, flour, grain, and fruit. Regular steamer-lines ply to New York, New Orleans, Key West, Havana, Vera Cruz, Brazos, and various South American and European ports. Galveston Bay has a total area of about 450 sq. M. and is guarded at its entrance by a long bar, through which the U. S. Government has constructed, at vast expense, a deep water-channel flanked by stone-jetties, 5 M. long. The streets, which are little above the level of the bay, are wide and straight, and the residence-quarters abound in luxuriant gardens, shaded with oleanders, magnolias, etc. Among the principal buildings are the new Custom House and Post Office, the Cotton Exchange, the City Hall, the Court House, the Ball Free School (a large building with a dome), the Rosenberg Free School, the Free Public Library, and the R. C. University of St. Mary. Magnolia Grove Cemetery may be visited. — The city of Galveston lies largely on the
inner side of Galveston Island, on the outer or seaward side of which is
a splendidly smooth and hard *Beach, 30 M. long, affording an unrivalled
drive or walk. The *Beach Hotel (see p. 522), near which are good bath-
houses, is about 1½ M. from the centre of the city (tramway). Good tarpon
and other fishing is obtainable. The mean temperature of winter here is
about 62°, of summer 82°.

From Galveston to Fort Worth and Newton, see p. 462; to Texarkana
(for St. Louis, etc.), see p. 455.

Beyond Houston our line continues to run towards the E., travers-
ing the great timber-producing part of Texas. At (2176 M.) Liberty
(40 ft.) we cross the Trinity River. 2210 M. Beaumont (30 ft.) is the
junction of lines N. to Rockland and S. to Sabine Pass (Brit. vice-
consul), with a harbour improved by the U. S. Government. Beyond
(2233 M.) Orange (20 ft.) we cross the Sabine River and enter Louisi-
a (p. 378). 2271 M. Lake Charles; 2344 M. Lafayette (50 ft.).
The line now bends towards the S. 2385 M. Baldwin. The features of
the scenery are tree-lined ‘bayous’, magnolia-groves, live-oaks and
cypress trees draped with Spanish moss (*Tillandsia usneoides), and plant-
ations of sugar-cane, cotton, and tobacco. — 2409 M. Morgan City
(Castillo, $2; 2291 inhab.), with a small zoological and botanical gar-
den (Oneonta Park), may be made the starting-point of an interesting
steamer-trip up the picturesque Bayou Teche, penetrating the district
to which the Acadians were removed (comp. Longfellow’s ‘Evange-
line’). — At (2489 M.) Atgiers (p. 415) we cross the Mississippi.

2490 M. **New Orleans**, see p. 415.

105. From New Orleans to Dallas, Fort Worth,
and El Paso.

*Texas and Pacific Railway* to (542 M.) Dallas in 22-23 hrs. (fare $15.30),
to (545 M.) Fort Worth in 24 hrs. ($15.30), and to (1160 M.) El Paso in 52 hrs.
($33.40). — Through-carriages run by this route to Los Angeles and San
Francisco, following the tracks of the Southern Pacific Railway (R. 104)
beyond El Paso.

New Orleans, see p. 415. The line at first ascends on the right
bank of the Mississippi, finally parting company with the river near
(85 M.) Plaquemine. From (89 M.) Baton Rouge Junction a short
line runs to (12 M.) Port Allen, opposite Baton Rouge (p. 359).
From (170 M.) Cheneyville a line runs to the S. to Lafayette (see
above), on the S. Pacific Railway. — 194 M. Alexandria (Stonewall
Ho., $2) is a pleasant little town of 2861 inhab., on the Red River.
Steamers ply hence to Shreveport (see below).

324 M. Shreveport Junction, for (2 M.) Shreveport (Phoenix,
$2 1/2), a busy industrial and commercial city with 11,979 inhab.,
on the Red River. Its chief exports are cotton and live-stock.
Steamers ply regularly to Alexandria and New Orleans. Shreveport
is the junction of lines to Vicksburg (p. 359) and Houston (p. 522).
— Our line now bends to the left (W.) and enters Texas (p. 519)
beyond (347 M.) Waskom.

366 M. Marshall (400 ft.; Genoecchio, $2 1/2; Capitol Ho., $2), a
brisk little city with 7207 inhab., machine-shops, and other factories, is the junction of a line to (74 M.) Texarkana (p. 457), connecting there with the Iron Mountain Line (R. 92). — 390 M. Longview (335 ft.; Mobberly, Magnolia, $2-2^{1/2}$) is the junction of the International and Great Northern Railway to Austin (p. 521), San Antonio (p. 520), and Laredo (p. 522). — 435 M. Mineola (400 ft.).

512 M. Dallas (465 ft.; Oriental, $2^{1/2}$-5; McLeod Hotel, $2^{1/2}$-5; Windsor, $2^{1/2}$-4^{1/2}; Lakeside, at Oak Cliff), the largest city in Texas, lies on the Trinity River, in the centre of a rich corn, wheat, and cotton producing district. Pop. (1890) 38,067. It is a railway-centre of great importance, lines branching off to all points of the compass; and the annual value of its trade is $30,000,000, of its manufactures about $7,000,000. The Court House and City Hall are large buildings. In 1897 a Confederate Monument was erected here, consisting of a shaft of Texas granite 50 ft. high, with statues of Jefferson Davis, Stonewall Jackson, Robert Lee, and Sydney Johnson at its base. On the bluffs (200 ft.) to the S. of Dallas is the suburban town of Oak Cliff, with a large Female University.

545 M. Fort Worth (640 ft.; Delaware, $2^{1/2}$-3^{1/2}; Worth; Mansion, E. P.), a city with (1890) 23,076 inhab., on the Trinity River, is an important railway-centre, including lines to Wichita (p. 462) and Newton (p. 462), Austin (p. 521), San Antonio (p. 520), and Houston (p. 522). This is the headquarters of the stock-men of the N. part of Texas and has large stockyards, grain elevators, and flour-mills. The annual value of its trade is $30,000,000. To the W. are Arlington Heights (180 ft.; Arlington Inn, $3-4), a winter resort commanding a splendid view of Trinity Valley.

Beyond Fort Worth the line traverses an interminable cattle-raising district, with few points of interest for the traveller. Stations unimportant. 578 M. Weatherford (865 ft.). 661 M. Cisco (1610 ft.) is the junction of the Houston and Central Texas R. R. 706 M. Abilene; 747 M. Sweet Water; 813 M. Big Springs.

To the N. of this part of the line extends the Llano Estacado or Great Staked Plain, a district of 50,000 sq. M., consisting of a vast elevated plateau nearly 5000 ft. above the sea, surrounded by an escarpment of erosion resembling palisades. On the N. it is bounded by the Canadian River and on the E. by the Pecos. The name is said to be due to the stakes driven into it by the Spaniards to mark their way. The soil is generally a brown loam, covered with grama grass (Bouteloua digastachya) and low mesquite shrubs, but there are also large tracts of sand. There is no other vegetation. The surface is almost perfectly level, except where a slight variation is afforded by the sandhills. There is no surface-water, except in a few scattered ponds, but numerous wells have been sunk, and the Staked Plain has thus now become a vast cattle pastureage. The geological conditions are interesting to the scientific visitor.

Beyond (573 M.) Odessa we see the White Sand Hills to the right. 946 M. Pecos City, on the Pecos River, is the junction of the Pecos Valley R. R. to (90 M.) Eddy. From (964 M.) Toyah stages run to Fort Davis and Fort Stockton. We now enter a mountainous district, with the Guadaloupe Mts. to the right and the Apache Mts. to the left.
At (1048 M.) Carrizo the Carrizo Mts. rise to the right. From (1067 M.) Sierra Blanca to —
1160 M. El Paso, see p. 519.

106. From Tacoma to Puget Sound, Victoria, and Alaska.

The tourist traffic to Alaska is mainly in the hands of the Pacific Coast Steamship Co. of San Francisco, and a pamphlet with all necessary information, including stateroom-plans of the steamers, may be obtained from Messrs. Goodall, Perkins, & Co., 10 Market St., San Francisco, or from any agent of the company. The steamer 'Queen' of this company (3000 tons burden) makes about six trips from Tacoma to Sitka and back every summer (June-Aug.), taking about 12 days to the round journey (fare $80-200, according to position of berth and stateroom, the highest charge securing the sole occupancy of a large stateroom). This steamer carries passengers only and calls at Seattle, Port Townsend, Victoria, Fort Wrangell, Juneau, Dyea, Skagway, the Muir Glacier, and Sitka. — The steamships 'City of Topeka' and 'Cottage City' of the same company sail fortnightly the year round, carry freight as well as passengers, take 12-14 days for the round trip from Tacoma (fares $80-200), and call at more points in Alaska. Return-tickets are also issued from San Francisco (fare from $105), passengers travelling by sea between that city and Portland or Port Townsend (p. 526). The fares from Seattle, Port Townsend, or Victoria are the same as those from Tacoma. Passengers should secure their berths in advance.

The arrangements of the Alaska trip resemble those on the trip to the North Cape (see Baedeker's Norway and Sweden), and it involves no greater hazard or fatigue. There are only a few hotels in Alaska, and passengers live almost entirely on the steamers. The weather is generally pleasant in June, July, or Aug., though rain and fog may be looked for at some part of the voyage, and forest-fires are apt to obscure the sky in the first part of the trip, especially in July and August. Warm winter clothing should be taken, as the nights on board are often very cold, though the sun may be quite powerful during the day. Stout boots are desirable for the short excursions on land, and waterproofs are indispensable. Deck-chairs may be bought or hired at the port of departure. Nearly the whole of the voyage is in the calm channel between the coast-islands and the mainland, so that sea-sickness need not be dreaded. The steamers, though not so luxurious as the Atlantic liners or the Fall River boats, are safe and reasonably comfortable. The 'Scenery passed en route' is of a most grand and unique character, such as, probably, cannot be seen elsewhere at so little cost and with so little toil or adventure. In the description of the text the usual route of the 'Queen' is followed. The approximate distances from Tacoma by this course are given in nautical miles (7 naut. miles = about 8 statute miles). Native curiosities can, perhaps, be best obtained at Sitka (p. 530), furs at Juneau (p. 533). In buying the latter the traveller, if not an expert, should be on his guard against deception and should in no case buy except at the larger stores.

The recent mining developments in the Upper Yukon District have caused the establishment of several more or less temporary steamboat lines to various points in Alaska, but these hardly come within the scope of the present Handbook. Comp. pp. 592, 594, and Baedeker's Canada.

Tacoma, see p. 425. The first part of the voyage lies through Puget Sound, named from a lieutenant on Vancouver's vessel, one of the most beautiful salt-water estuaries in the world, surrounded by finely wooded shores and lofty mountains. Its area is about 2000 sq. M., while its extremely irregular and ramified shore-line is nearly 1600 M. long. The usual width is 4-5 M. The depth varies from 300 to 800 ft., and at many points 'a ship's side would strike the shore before the keel would touch the ground'. There are nu-
umerous islands. A very large trade is carried on in Puget Sound in timber, coal, and grain, the annual value of its exports amounting to about $10,000,000 (2,000,000l). As we proceed Mt. Rainier or Tacoma (p. 426) is conspicuous to the S.E., while the Olympic Mts. (6-8000 ft.) are seen to the W.

25 M. Seattle (three syllables; *The Rainier-Grand, $3-5; Butler, R. $1-2; Occidental; Stevens; Great Northern), finely situated in Elliot Bay, on a series of terraces rising from the shore of the Sound, is one of the largest and most energetic cities of the Pacific North-West and the commercial centre of Puget Sound. Founded in 1852 and named after an Indian chief, it had 4533 inhab. in 1880 and 42,837 in 1890 (now 60,000). Its prosperity is the more remarkable as almost the whole of the business-quarters was burned down in 1889; but this calamity seems, as in the case of Chicago (p. 311), to have served merely as an opportunity for rebuilding the city in a more substantial manner. Among the best buildings are the Court House, the Opera House, the High School, the Providence Hospital, and the State University (270 students). The higher parts of the city command splendid views of the Olympic Mts. — The spacious Harbour, with its numerous wharves, is entered and cleared annually by about 1000 vessels, the chief exports being coal (600,000 tons), timber, hops, and fish. The value of its manufactures (1890) was $9,200,000. Iron has also been found in the neighbourhood. Seattle is the chief entrepôt of the Alaskan Gold Fields (p. 534).

About 2 M. to the E. of Elliot Bay lies *Lake Washington (easily reached by electric tramway) a beautiful sheet of fresh water, 20 M. long and 2-5 M. wide. Small steamers ply to various points on the lake, affording beautiful views of the Cascade Mts. (p. 425).

From Seattle to Vancouver, 168 M., Great Northern Railway in 3 hrs. This line runs to the N. along the E. bank of Puget Sound and Washington Sound. From Seattle to (33 M.) Everett, see p. 337. 551/2 M. Stanwood; 95 M. Fairhaven, a thriving little place (4076 inhab.) on Bellingham Bay; 98 M. New Whatcom (Bellingham Ho.), also on Bellingham Bay (1059 inhab.). Beyond (118 M.) Blaine we enter British Columbia. 1431/2 M. New Westminster (Queen's Hotel, $2-3), with 6641 inhab., is the oldest settlement in this region. At (156 M.) Port Moody we join the main line of the Canadian Pacific Railway. — 168 M. Vancouver, see Baedeker's Canada.

From Seattle to Tacoma by railway, see p. 426; to N. Yakima and Pasco Junction (for the E.), see p. 429; to Spokane and St. Paul, see R. 55. Lines also run to various other points.

Steamers ply to Tacoma, Victoria, and other ports in Puget Sound, on the Pacific Coast, and in Europe.

As the steamer continues to plough its way towards the N., we obtain a view of Mt. Baker (10,800 ft.), the last outlier of the Cascade Mts., far ahead of us (right). The steamer bends to the left into Admiralty Inlet, the main entrance to Puget Sound. To the right lies Whidbey Island.

65 M. Port Townsend (Central, Delmonico, $2; Brit. vice-consul, Mr. Oscar Klöcker), a picturesque little town of 4558 inhab., lies partly on the shore and partly on a steep bluff behind, reached by long flights of steps. It lies at the head of the Strait of Juan de Fuca.
and is the port of entry for Puget Sound. The large grey-stone building on the bluff is the Custom House. To the left lies Fort Townsend, with a large marine hospital. — Passengers coming from San Francisco by sea usually join the Alaska steamer here.

Our boat now steers to the N.W. across the Strait of Juan de Fuca. To the left are the Olympic Mts., ahead lies Vancouver Island; to the right, in the distance, rises Mt. Baker. As we approach Victoria the little city presents a very picturesque appearance. The conspicuous building on the height to the right is the house of Mr. Dunsmuir, a wealthy coal-owner. To the left of the pier, among trees, are the barracks of Esquimalt (see below).

100 M. Victoria (Dallas, Driard, $3-5; Victoria; Clarence; Poodle Dog Restaurant, D. 75 c.; U. S. Consul, Mr. A. E. Smith; cabs cheap), the capital of British Columbia, is a quaint and quiet little city with (1891) 16,841 inhab. (now about 25,000), forming a strong contrast to the bustling and raw-looking cities we have just been visiting on the American shores of the Sound. Victoria, however, is also of recent origin, having been founded as a station of the Hudson Bay Co. in 1842 and not beginning to develop into a town until the gold-mining excitement of 1858. The population includes a strong contingent of Chinamen. The export trade in 1891 was valued at $5,630,000 (1,126,000 l.). The centre of the town (11/2 M.) is reached from the wharf by tramway (5c.). The *Government Buildings, forming a tasteful group in a square adjoining James's Bay, include the Parliament House, a Provincial Museum, and the Government Offices. The monument in front commemorates Sir James Douglas, first governor of the colony. *Beacon Hill Park should also be visited. The streets are wide and clean, and most of the private residences stand in gardens rich in shrubs and flowers. The roads in the vicinity of Victoria are unusually good and afford charming drives through luxuriant woods of pine, maples, alders, arbutus, madronas, fern-trees, and syringas.

About 3 M. to the S.W. of Victoria (tramway, 10 c.) lies Esquimalt, the headquarters of the British Pacific Squadron, with a good harbour, a dockyard (closed at 5 p.m.), a fine dry-dock, barracks, and a naval arsenal. Some British men-of-war may generally be seen here.

From Victoria to Nanaimo, see below. — Steamers ply regularly from Victoria to Vancouver (see Baedeker's Canada).

Vancouver Island, at the S. extremity of which Victoria lies, is 290 M. long and 50-80 M. wide, with an area of 20,000 sq. M. The greater part of its surface is covered with mountains, reaching a height of 6,700 ft. (Victoria Peak, 7,485 ft.) and but little has been reclaimed or settled by Europeans since its exploration by Vancouver in 1793. The two native tribes are the Nootkas and Selish, of whom a few degenerate specimens may be met in Victoria.

From Victoria our course lies to the N., through the Canal de Haro, which was decided by the arbitration of the King of Prussia in 1872 to be the line of demarcation between American and British possessions. To the left lies Vancouver Island, to the right the San Juan Islands, beyond which the cone of Mt. Baker is long visible.
Looking backward, we see the Olympic Mts., on the other side of the Juan de Fuca Strait. On issuing from the archipelago of Haro Strait, we enter the broader waters of the Gulf of Georgia (20-30 M. wide). Various islands lie off the shore of Vancouver.

130 M. Nanaimo (Wilson Ho.; U. S. Consular Agent), a small town on the E. coast of Vancouver, with 4595 inhab., is of importance as the outlet of the extensive collieries of the New Vancouver Coal Co. The Alaska steamers often stop to coal here either in going or returning. The pretty, rose-gardened cottages of Nanaimo are very unlike the grimy abodes of coal-miners in England, and many of the miners own them in freehold. Nanaimo is connected with (73 M.) Victoria by the only railway on the island. — Vancouver (see Baedeker’s Canada) lies on the mainland, directly opposite Nanaimo (steamer, $2).

Farther on we see few settlements or signs of life. The shores are low and heavily wooded, but lofty mountains rise behind them on both sides, those on the mainland covered with snow. Long, deep, and narrow fjords, flanked with lofty mountains, run up into the land. To the right lie Lesquenit Island and the large Texada Island, covering the entrance to Jervis Inlet, one of the just-mentioned fjords. About 80 M. beyond Nanaimo we leave the Gulf of Georgia and enter *Discovery Passage, a river-like channel, 25 M. long and 1-2 M. wide, which separates Vancouver Island from Valdes Island and is flanked by mountains 3-6000 ft. high. Valdes Island, ending on the S. in Cape Mudge, occupies nearly the whole channel, and a scheme has been in consideration for running a railway from the mainland to Vancouver Island by bridges constructed over the narrow waterways here. About the middle of Discovery Passage are the famous *Seymour Narrows, 2 M. long and 1/2 M. wide, through which the water rushes with great velocity (sometimes 12 knots an hour).

Discovery Passage is succeeded by *Johnstone Strait, another similar channel, 55 M. long and 1-3 M. wide, between Vancouver Island on the left and the mainland itself, or islands hardly distinguishable from it, on the right. The Prince of Wales Range, on Vancouver Island, reaches a height of about 4600 ft.; and the white summits of the Cascade Range rise to the right beyond the lower intervening hills. The varied beauty of the scenery cannot easily be indicated in words; but few travellers will weary of the panorama unfolded before them as the steamer advances. — Beyond Johnstone Strait we thread the shorter Broughton Strait (15 M. long), between Vancouver and Cormorant and Malcolm Islands. On Cormorant Island lies the Indian village of Alert Bay, with a salmon-cannery, a totem pole, and a native graveyard. The conical summit to the left is Mt. Holdsworth (3040 ft.).

On emerging from Broughton Strait we enter Queen Charlotte’s Sound, which is 10-30 M. wide and contains many islands, mostly adjoining the mainland. On the shore of Vancouver lies Fort Rupert,
an old post of the Hudson Bay Co., with an Indian village. A little later we pass through Goletas Channel and then say farewell to Vancouver Island, the N. point of which, Cape Commerell, we leave to the left. For a short time (40 M.) we are now exposed to the swell of the Pacific Ocean, but this is seldom enough in summer to cause uneasiness even to bad sailors. To the N.W., in the distance, loom the large Queen Charlotte Islands.

Our course now hugs the mainland and leads at first through *Fitzhugh Sound, a deep and narrow channel, the W. shore of which is formed by a continuous series of islands. The sharp peak of Mt. Buxton (3430 ft.) rises on Calvert Island. As we near the N. end of the Sound the scenery becomes very grand, huge snowy peaks towering above the pine-clad hills that line the channel. Beyond the large Hunter's Island we turn sharply to the left and enter the extremely narrow and winding *Lama Passage, between it and Denny Island. On Campbell Island, to the left, is the Indian village of Bella Bella, opposite which is a graveyard, with totem- poles (comp. p. 530). Farther on we pass through the wider Seaforth Channel and reach Millbank Sound, the only other point on the voyage where we are exposed for a brief interval to the waves of the open sea. Beyond this sound we enter Finlayson Channel, 24 M. long and 2 M. wide, between the large Princess Royal Island (48 M. long and 25 M. wide) and the mainland. Numerous fjords, short and long, run into the mainland, and several high waterfalls descend from the cliffs. Finlayson Channel is continued by Tolmie Channel, Graham Reach, and Frazer Reach, beyond which we pass through McKay Reach, between the N. end of Princess Royal Island and Gribbell Island, into Wright's Sound. From this we enter *Grenville Channel, which runs for 50 M. in an almost perfectly straight line between Pitt Island and the mainland. It is flanked on both sides with steep mountains 1500-3500 ft. high, while still higher mountains rise in the background to the right. At places the channel is only a few hundred feet wide. Signs of glacier action are seen on the more distant mountains, while the courses of long bye-gone avalanches may be traced by the light-green streaks of the younger growth of trees. Crossing an expansion of Grenville Channel, we next enter the short Arthur Passage, between Porcher Island (l.) and Kennedy Island (r.), which leads to Malacca Passage and the wide Chatham Sound. To the right is the mouth of the Sheena River. The E. side of the Sound is bounded by the large Chim-sy-an or Tsimpsean Peninsula, which is connected with the mainland by a very narrow neck of land. On this lies Old Metlakatla, the scene of Mr. Wm. Duncan's interesting experiences in educating the natives (see p. 531) and now a missionary station of the Episcopal Church of Canada. Higher up is Port Simpson, a station of the Hudson Bay Co., established in 1831. To the left lie the Dundas Islands, opposite the northernmost of which opens Portland Inlet. Just here we cross the boundary-line between the British and
American possessions (54° 40' N. lat.; the famous 'fifty-four forty or fight' of 1842) and enter Alaska. To the left opens Dixon Entrance, between Graham Island (S.) and Prince of Wales Island (N.).

The territory of Alaska received its name from Charles Sumner in a speech addressed to the Senate in favor of the purchase of the territory. It is a corruption of an Aleut word referring to the continent as distinguished from the Aleutian islands. The boundaries of the territory comprise the continent and islands adjacent, to the W. of 141° W. lon., and also a strip to the W. of a line drawn parallel to the coast from the vicinity of Mt. St. Elias (p. 556) in a S.E. direction to the N. extreme of Portland Canal, through the canal in mid-channel, and westward to the ocean on the parallel of 54° 40' N. lat. The W. limits of the territory, to the N. of the Pacific Ocean, include the Aleutian chain, the islands of Bering Sea, and the eastern of the two Diomede Islands in Bering Strait.

The territory is divisible by its physical characteristics into several diverse regions. The Sitkan Region, including the coast and islands to Cook's Inlet on the N. and the Kadiak group on the W., has a rough and mountainous topography with many glaciers, a bold sea-coast, numerous fjords and islands, a moist, cool, and equable climate, and a dense covering of chiefly coniferous forests. — The Aleutian Region includes the peninsula of Alaska, the Aleutian chain, and the Pribiloff or Fur Seal Islands. It also has a cool and equable climate, with much fog and wind but less rain than in the Sitkan region. It consists of broad level areas with numerous clusters of mountains, few glaciers, many volcanic cones, many harbours and anchorages; and, while totally destitute of trees, nourishes luxuriant crops of grass, herbage, and wild flowers. The Aleutian chain represents an old line of fracture in the earth's crust; and, contrary to the usual idea, a large proportion of the islands are not volcanic but composed of crystalline or sedimentary rocks. — The Yukon Region includes the mass of the continent to the N. of the great peninsula, which has on its N. border true Arctic conditions, on its W. shores a mild summer and an Arctic winter, and in the interior a hot short summer and a dry cold winter, much like that of Minnesota. It is a region of Tundra: low, undulating ranges of grassy mountains, and extensive, level, more or less wooded river-valleys.

The products of the Sitkan region are timber, precious metals, salmon, halibut, and other sea-fish. Lignitic coal and extensive beds of marble exist in many places. The Aleutian region produces chiefly fox and sea otter fur, the fur-seal pelts, and a certain amount of coal. Extensive cod-fisheries are prosecuted along its shores. The Yukon region produces gold, furs, and salmon. A remarkable characteristic of the Territory is that, though bordering on the Arctic Ocean and in the S. teeming with glaciers, it has still never been subjected to the action of a continental ice sheet, such as have ground down the coasts of the analogous fjord-regions of New England and Norway.

The native inhabitants of Alaska belong to four ethnologic stock races: the Eskimo or Inuit, with their special offshoot the Aleutian people; the Haida Indians of Alaska; the Tlingit stock of the Sitkan region; and the Tsimsh or Athabaskan Indians of the great interior region. In all there are between twenty and thirty thousand of these natives, independent, self-sustaining, and mostly well disposed. They are in no direct way related to any of the present Asiatic races as is so often assumed, but, from the evidences of the prehistoric shell-heaps, have occupied the region for many centuries. They live by fishing and hunting; the moose, the caribou, and the salmon, in the interior, and the hair-seal, the beluga, the cod and other sea-fishes, the salmon, and wild fowl, on the coasts, furnish their chief supplies. The fjords and rivers are their roads; with hardly an exception they are canoe-men everywhere, and throughout the N. drivers of dogs and sledges.

Among the Tlingit and Haida people one custom is forced on the attention of all who visit their villages. It is that of erecting what are called Totem Poles, which have various significations, the most common
to Alaska. FORT WRANGELL. 106. Route. 531

being that of a 'genealogical tree'. A man erects one of their large communal houses, and, in memory of this achievement, puts up in front of it a cedar pole carved with figures emblematic of the totems of himself and his ancestors, one above another. The door of the house is frequently cut through the base of the pole under the totem of the builder; while, above, the successive totems (which by their social laws must change with every generation) appear in the order of remoteness.

The estimated area of the territory is 550,000 sq. M. (thrice that of France); its total population about 35,000†, of which one-seventh are accounted civilized; its chief archipelago, in the Sitkan region, is said to contain 5000 islands; its total shore line amounts to some 18,200 M.; its principal commercial port is in about the same latitude as Liverpool; its southernmost islands lie on the parallel of Brussels; its westernmost village is as far W. from the mouth of the Columbia River, Oregon, as Eastport, Maine, is E. from that point; it includes within its boundaries the highest mountains, the most superb glaciers and volcanoes in America to the N. of Mexico; and presents the anomaly of a territory with only about one inhabitant to 17 sq. M. which in 20 years has paid more than eight million dollars in taxes. It was transferred by Russia to the United States in 1867 for the sum of $7,250,000.

The most authoritative and complete work on Alaska is 'Alaska and its Resources' by Dr. Wm. H. Dall, who kindly drew up the above paragraphs for this Handbook. A good popular account is given in Miss E. R. Scidmore's 'Alaska and the Sitkan Archipelago'. See also Miss Scidmore's excellent 'Guidebook to Alaska' (Appleton; new edition, 1898) and A. P. Swineford's 'Alaska: its History, Climate, and Natural Resources' (1898).

To the right, as we proceed, juts out Cape Fox, with the small station of Fort Tongas. There is a U. S. custom-house on the small Mary Island. The steamer now steers in a straight direction towards the N. and enters Clarence Strait, which is 100 M. long and 14-12 M. wide and is bounded on the W. by Prince of Wales Island (130 M. long and 30 M. wide). This is the home of the Haidas, the cleverest of the Alaskan tribes (comp. p. 530), and contains the best totem-poles, but the ordinary tourist has no opportunity of landing here. Annette Island, the largest of the Gravina group, is the seat of Port Chester, with the new Metlakatla, founded by Mr. Duncan on leaving his original station (see p. 529). To the right, opposite Annette Island, lies the large island of Revillagigedo, the chief place on which is Loring, with an important salmon-cannery. We are now within what is known as the Alexander Archipelago, about 1100 of the islands of which appear on the U. S. charts, while innumerable small islets are disregarded. The mountains on each side of the strait are fine in size, proportions, and colouring. Near the head of Clarence Strait we steer to the right (E.), between Etoile Island (r.) and Za-rembo Island (l.) and run into Fort Wrangell, usually the first stopping-place of the steamer 'Queen' after leaving Victoria.

790 M. (from Tacoma) Fort Wrangell, situated on the N. end of the island of the same name, opposite the mouth of the Stikine River, was formerly a place of some importance, as the outlet of the Cassiar Mines, but is now a dirty and dilapidated settlement inhabited by about 250 Tlinkits (p. 580) and a few whites. It was named

† Now (1898) probably 50,000.
from Baron Wrangell, Russian Governor of Alaska at the time of its settlement (1834).

To the tourist Fort Wrangell is of interest as containing the best collection of Totem Poles he is likely to see, though their execution is by no means so fine as that of the Haidas (see p. 531). The totems here are 20–40 ft. high. One is surmounted by a bear, another by a head with a ‘Tyhee’ hat, the badge of a Shaman or ‘Medicine Man’. A specimen of such a hat, said to be 400 years old, is shown in one of the houses. The old Graveyard is so overgrown with vegetation as to be difficult of access and now contains little of typical interest. The carved figure of a bear (or wolf) which surmounted one of the graves now lies on the ground near two totem-poles.

The Tlinkits themselves will interest the visitors, who will at once notice such customs as the blackening of the faces of the girls (said to have for its object the preservation of the complexion) and the wearing of tabrets, or small plugs of silver, ivory, wood, or bone, in the lower lip. Curiosities of various kinds, including tabrets, silver bracelets, carved horn and wooden spoons, reed baskets, halibut hooks, gaily painted canoe-paddles, the carved rattles of the Shamans, and fine carvings in slate may be purchased from the natives; and the inquisitive may visit the imperfectly ventilated interior of one of the huts.

At the end of the village farthest from that with the totem-poles are the Court House and a Mission School for Girls, the teacher of which is glad to give information to interested visitors.

The Stikine River is said to receive no fewer than 300 glaciers, and its scenery is very fine. It forms one of the routes to the gold mines of the Klondike Region, and in 1897–98 light river-steamers ascended it regularly to (125 M.) Glenora (see Baedeker’s Canada).

Soon after leaving Fort Wrangell we thread our way through the devious Wrangell Narrows, where the channel is marked by stakes and buoys. The shores here are well-wooded, and at places stretches of grass border the water like the lawns of an English country-house. Farther on, in Soukhoi Channel, the scenery is of a more majestic character. The mountains on either side, though apparently of no very great height, are covered with snow to within 1000 ft., or less, of the water; and their shapes are very varied and beautiful. One of the most striking is the Devil’s Thumb (ca. 8500 ft.), a peaked monolith recalling the Dolomites of Tyrol. We here see the first glaciers of the voyage (all to the right): the Le Conte Glacier, high up on the mountain-side; the larger Patterson Glacier; and the Baird Glacier, in Thomas Bay. About this part of the trip, too, we may meet our first piece of floating ice; while the indescribably beautiful effects of the late sunsets (9–10 p.m.) will rouse the most sluggish enthusiasm. The huge slopes of névé, or hardened snow, are fine.

Soukhoi Channel widens into Frederick Sound, with Cape Fan-hawe to the right and Kupreanoff Island to the left; but our course soon leaves this sound and carries us to the N. through the long Stephens Passage, bounded on the W. by the large Admiralty Island. Holkam or Sum Dum Bay, to the right, has been the scene of some placer-mining. Near the head of the passage, to the right, opens *Taku Inlet, with its fine glaciers, one of which has a sea-face ½ M. long and 100–200 ft. high. The muddy grey water of the inlet is filled with ice-floes and bergs. The surrounding mountains are of a
fantastic, Dolomitic appearance. The chief settlement of Admiralty Island is Killisnoo, on its W. coast, with large oil-works. — Just beyond the mouth of the Taku Inlet we enter the pretty Gastineau Channel, between Douglas Island and the mainland.

990 M. Juneau, the most important town in Alaska, is situated on the mainland, on a narrow strip of comparatively level ground between the sea and a precipitous, snow-seamed mountain (3300 ft.). Settled in 1880 and named after a nephew of the founder of Milwaukee (p. 321), it is occupied mainly by miners. In 1890 it contained 1253 inhab., about equally divided between whites and natives or half-breeds, but this number has been considerably increased by recent developments. Juneau is one of the chief outfitting stations for the Yukon miners, and contains a theatre, several churches, two or three hotels, a woollen mill and other industrial establishments, and some shops for the sale of Alaskan furs (sea-otter, seal, otter, beaver, bear, musk-rat, fox, etc.; see, however, p. 525) and the famous Chilkat Blankets. The last are made of the hair of mountain-goats and coloured with native dyes, but genuine examples, worth $60-100, are now rare, and most of those offered for sale are made of wool and stained with aniline dyes. Juneau supports two newspapers.

About ½ M. to the N. of Juneau is a village of the Auk Indians, a curious and primitive, but very dirty settlement, which will repay a visit. The traveller may bargain here for a trip in an Indian canoe. Behind the village is a native Cemetery, with curious little huts containing the cremated remains and personal effects of the deceased.

A well-made road leads from Juneau through the highly picturesque *Cañon of the Gold Creek, with its waterfalls and small glacier, to (3½ M.) Silver Bow Mines, and offers a trip well worth making if time allows. The Silver Bow Basin contains gold mines of great promise, and both quartz and placer mining are successfully prosecuted.

On Douglas Island, nearly opposite Juneau, is the famous Treadwell Gold Mine, at which the steamers generally call. The mine, which is close to the wharf and easily visited, has one of the largest quartz-crushing mills in the world, employing 80 stamps. The quartz does not produce more than $3-4 of metal per ton, but is so easily and economically worked that the profits are said to be enormous. It is credibly stated that the company that owns it refused $16,000,000 for the mine, and the gold actually in sight is estimated to be worth 4-5 times as much as the price paid for the entire district of Alaska (p. 531). Many of the best workers in the mine are natives, who earn $2½ per day.

As Gastineau Channel has not been charted above Juneau, the steamer now returns to its S. end and then proceeds to the N. through Saginaw Channel, on the W. side of Douglas Island. This debouches on *Lynn Canal, a fine fjord extending for 60 M. towards the N. It is flanked with snow-mountains, rising abruptly from the very edge of the water to a height of 6000 ft., and presents, perhaps, the grandest scenic features we have yet encountered. About a score of glaciers, large and small, descend from the ravines into the fjord, among which the Auk, Eagle (r.), and Davidson Glaciers are conspicuous. The last-mentioned, near the head of the fjord and on its W. side, spreads out to a width of 3 M. as it reaches the water-level, its front being partly masked by a tree-grown moraine.
Lynn Canal ends in two prongs, named the Chilkoot and Chilkat Inlets, recently come into prominence in connection with the rush to the gold district of the Klondike. In these inlets the tourist reaches the highest latitude of his trip (ca. 59° 10' N.; about that of the Orkney Islands, Christiania, and St. Petersburg). At midsummer there are not more than 3-4 hrs. of partial darkness here.

On Chilkoot Inlet (the E. arm) lie the two new and bustling little towns of Skagway (E. bank) and Dyea (W. bank), the chief points of departure for the Upper Yukon and the Klondike (see Baedeker's Canada). Each of these contains about 3000 inhab. and is furnished with rough hotels, outfitting establishments, and other accommodations for the miner. Skagway has a landing-wharf, but the steamers cannot approach nearer than 5 M. from Dyea. The latter was made a U. S. military post in 1898. The trails from Skagway and Dyea to the Upper Yukon are described in Baedeker's Canada. A railway, to run from Skagway to the Yukon District, was begun in 1899, and will probably be open to Bennett Lake in the spring of 1899. — On Chilkoot Inlet lie Pyramid Harbor and Chilkat, with prosperous salmon-canneries. There are also other settlements on the inlet. This is the district in which the fine Chilkat blankets (p. 533) are made. Good echoes may be wakened off the glaciers. The Dalton Trail, beginning at the head of the Chilkat Inlet, is used by Klondike travellers after the navigation of lakes and rivers has ceased for the year.

We now return to the S. end of Lynn Canal and then bend to the right (N.W.) into Icy Strait. Opening off this to the right is *Glacier Bay, which extends to the N. for about 45 M., with a width contracting from 12 M. to 3 M. The mountains immediately abutting on the bay are comparatively low (4000-7000 ft.), but as we ascend it we enjoy a magnificent **View to the left of the Fairweather Range, including (named from left to right) Mt. La Pérouse (11,300 ft.), Mt. Crillon (15,900 ft.), Mt. Lituya (10,000 ft.), and Mt. Fairweather (15,500 ft.). The surface of the bay is full of small icebergs and floes detached from the large glaciers which descend into it, and the most careful navigation cannot avoid an occasional bump. As we near the head of the bay we have an excellent view of the wonderful **Muir Glacier, the grandest single feature of our Alaskan expedition (1270 M. from Tacoma by the course described). To the right is seen the small hut in which Prof. John Muir, who first visited the glacier in 1879, lived when making his explorations of the glacier in 1890.

This stupendous glacier, throwing the large ice-fields of Switzerland entirely into the shade, enters the sea with a front 1¼ M. wide and 150-200 ft. high, probably extending 700 ft. below the water. From this wonderful wall of blue and white ice, which forms a striking contrast to the dirty terminal moraines of European glaciers, huge masses of ice, often weighing many hundreds of tons, detach themselves at frequent intervals and fall into the bay with a reverberating roar, throwing up the water in clouds of spray and creating waves that rock the huge steamer like a cock-boat. Nine main streams of ice unite to form the trunk of the glacier, which occupies a vast amphitheatre, 30-40 M. across. Seventeen smaller arms join the main stream. The width of the glacier when it breaks through the mountains (Pyramid Peak to the W., Mt. Wright and Mt. Case to the E.) to descend to the sea is about 3 M. The superficial area of the glacier is 350 sq. M., or about the same as that of Huntingdonshire. Prof. G. F. Wright, who explored the glacier in 1896, estimated its rate of movement at 70 ft. per day in the centre and 10 ft. at the sides (an average of 40 ft.),
as compared with 1½-3 ft. at the Mer de Glace, but Prof. H. F. Reid, of the Case School of Applied Science (p. 298), who spent the summers of 1890 and 1892 here, found the most rapid movement not more than 7 ft. per day. In August about 200,000,000 cubic feet of ice fall into the inlet daily. Though the glacier thus moves forward at a comparatively rapid rate, investigation shows that it loses more ice in summer than it gains in winter and that its front is retrograding steadily from year to year. It is evident from the general appearance of the enclosing hills that the ice-stream once occupied the whole of Glacier Bay; and numerous features of the moraines and adjacent rocks give proof of more recent retrocession. Vancouver found the bay blocked by a wall of ice in 1794. See the very interesting reports (with maps, etc.) of Prof. H. F. Reid’s two expeditions.

Visitors are landed in small boats on one of the lateral moraines, and by following this back for about 3/4 M. reach the surface of the main glacier, which they may follow as far as time allows. The seaward end of the glacier is so corrugated and seamed by vast crevasses as to be quite inaccessible. The surface of the glacier commands a splendid view of Glacier Bay and the Fairweather Range; and those who are good climbers may obtain a still better view by ascending the stony conical mountain (ca. 3000 ft.) on the left (N.W.) side of the glacier, about 2 M. from the bay. Walking on the smooth surface of the glacier is generally easy in summer; but the feet should be well protected against dampness, as the strong summer-sun (which makes too warm clothing undesirable) has considerable effect on the surface-ice. The steamboat company provides alpenstocks for the use of passengers, and has constructed a plank-walk, with guide-posts, leading up to the glacier. Those who make longer explorations should keep a good lookout for snow-covered fissures and avoid wandering off alone.

Mirages are of common occurrence at the Muir Glacier, and have given rise to the so-called ‘Phantom City’ of which fanciful illustrations are given in some books describing this region.

Above Muir Inlet several other huge glaciers enter Glacier Bay, but as this part of the bay has not yet been charted, an approach to them is less easy. Among them are the Getkite, Hugh Miller, and Grand Pacific Glaciers.

The nearest way from Glacier Bay to Sitka would be through Cross Sound and down the W. side of Chichagoff Island, but to avoid the unpleasantness of an outside passage the steamer returns through Icy Strait (p. 534) and Chatham Sound (p. 529). About one-third of the way down the latter we diverge to the right through *Peril Strait, between the islands of Chichagoff (N.) and Baranoff (S.). This strait is wide at first but ultimately contracts to a width of 1/2 M., where its wooded hills and islets recall the scenery of Loch Lomond. As we approach Sitka we have a fine view, to the right, of Mt. Edgcumbe (see below), with its crater half filled with snow.

1420 M. **Sitka** (*Millmore’s Hotel, $2*), the capital of Alaska and seat of the governor, is very beautifully situated on the W. side of Baranoff Island, with a fine bay dotted with green islands in front and a grand range of snow-mountains behind. The bay is sheltered by Krusoff Island, with the extinct volcano Mt. Edgcumbe (2800 ft.), while immediately to the E. of the town towers Mt. Verstovaia (3210 ft.). In 1890 Sitka contained 1190 inhab., of whom 293 were white, 31 Chinese, and 865 natives. The town was founded in 1804 by Alex. Baranoff, the first Russian governor of Alaska (see W. Irving’s ‘Astoria’). Sitka lies in 57° N. lat. (about the same as that of Aberdeen or Riga), and, owing to the Kuro Siwo, or Japanese current,
has a milder winter climate than Boston, in spite of the propinquity of eternal snow (mean summer temp. 54°, winter 32°). The temperature seldom falls to zero. The rainfall is high (ca. 110 inches).

On a height to the right of the dock (fine view) stand the ruins of Baranoff Castle, the former residence of the Russian governors, burned down in 1894. — Near the head of the main street, leading from the wharf into the town, is the Russo-Greek Church, with its green roof and bulbous spire, which contains some interesting paintings and vestments (small fee charged for admission). Many of the natives and half-breeds are members of the Greek church, and Sitka is the seat of the Orthodox Greek bishop of the United States. Several of the substantial old Log Houses of the Russians are still in use. — Turning to the right at the head of the main street and following the road along the beach, we reach the buildings of the Presbyterian Mission, where visitors are welcome. The Sitka Museum, a highly interesting collection of Alaskan products, is installed in a building in the mission-grounds, fitted up like the dwelling of a native chief, with a totem-pole at the entrance. — By passing up between these buildings we reach the Indian River Walk (a round of about 2 M.), where the visitor with preconceived ideas of Sitka's arctic climate will be surprised to find luxuriant vegetation, fine trees, and a brawling brook, not unlike such typical English walks as the Torrent Walk at Dolgelley. One of the characteristic plants is the 'Devil's Club' (Echinopanax horrida).

The Native Village, or Rancherie, lies to the left of the wharf and is occupied by 800-1000 Sitkans, including many interesting specimens such as 'Mrs. Tom' and 'Sitka Jack', who are always at home to steamboat visitors. Tourists occasionally get up canoe races among the natives, and exhibitions of native dancing are often arranged for their benefit. Behind the village is the native and Russian cemetery.

Native curiosities may be bought at Sitka comparatively cheap, and a Russian samovar may still occasionally be picked up here. Travellers should also visit the office of the Alaskan (10 c.), a weekly paper.

Sitka is the turning-point of our voyage, and we now retrace the way we have come (via Icy Strait, Chatham Sound, Frederick Sound, etc.). The distance to Tacoma is about 1200 M., taking 5-6 days. As a rule few stops are made on the homeward journey; but much fine scenery, previously passed at night, is now seen by daylight. Passengers for the Canadian Pacific Railway leave the steamer at Victoria and proceed thence by a smaller steamer to Vancouver (see Baedeker's Handbook to Canada).

Mt. Logan (19,539 ft.), the loftiest mountain in N. America, is situated in Canada, just beyond the Alaskan frontier, to the N. of 60° N. lat. and about 45 M. from the coast. A little to the W. of it is Mt. St. Elias (18,024 ft.), first ascended by Prince Luigi of Savoy in 1897. These mountains are nearly 300 M. to the W. N. W. of Glacier Bay (p. 534) and are not visible on any part of the trip above described.

Tourists who wish to go farther to the N. may avail themselves of the Alaska Commercial Co.'s steamer, which leaves Sitka for Unalaska about the 8th day of each month while navigation is open (round trip of 2500 M., taking about a month; fare $120). This excursion affords splendid views of the St. Elias Alps and the enormous glaciers of the Alaska mainland. The sea is generally smooth in summer. Holders of return-tickets of the Pacific Coast Steamship Co. are entitled to stop over at Sitka and return by a later steamer.

Steamers now run regularly from San Francisco and other ports to St. Michael's, a U. S. military post on Norton Sound, 770 M. to the N. of Unalaska, whence river-steamers ascend the Yukon to (1650 M.) Dawson City, in the Klondike Region (see Baedeker's Canada).
MEXICO.

The Republic of Mexico (Span. Mejico), occupying the S. part of N. America, consists of a confederation of 27 States, two Territories, and a Federal District (in which is situated the city of Mexico). Its total area is about 770,000 sq. M. and its population in 1895 was 12,578,861. About 80 per cent of the inhabitants are of pure or mixed Indian blood, and only 20 per cent belong to the Spanish and other Caucasian races. With the exception of the flat and narrow strips along the coasts of the Gulf of Mexico and the Pacific Ocean, the country consists of a huge table-land bounded on each side by mountain-ranges, forming the N. prolongation of the Andes. The main range, bounding the W. side of the table-land, is named the Sierra Madre. The Central Mexican Plateau has a mean elevation of about 6000 ft.

Approaches. Plan and Season of Tour. Since the opening of the railways described in RR. 107-110, an excursion into Mexico can be easily added to a visit to the S. part of the United States, and affords a survey of so novel and picturesque a civilization as amply to repay the time and trouble. Three weeks will suffice for the journey to and from the City of Mexico, with halts at many interesting places on the way, and also for trips from the City of Mexico to Orizaba (or even Vera Cruz), Puebla, and Oaxaca (Milla). This excursion involves no serious hardships and is constantly made by ladies; but those who wish to visit the interesting remains of Yucatan and Chiapas must be prepared to give more time and labour. The Mexican plateau may be visited at any season, and is, perhaps, at its pleasantest from June to Sept., when the dust is abated by the summer rains. For a general tour, however, winter or early spring is preferable; and March or April will be found as good months as any. Fairly light clothing is desirable for the heat of the day, but wraps should be at hand for the cool evenings and mornings. The rarefied air of the Mexican plateau is sometimes found rather trying at first. Those who intend to use the steamer (comp. p. 552) in one direction are advised to take it in going rather than in returning.

Travellers who do not speak Spanish cannot do better than join one of the Raymond and Whitcomb Parties (see p. xxv), which visit Mexico in winter and spring. Their usual route is from Eagle Pass to the City of Mexico (R. 108), and thence back to El Paso (R. 109), with excursions to Orizaba (R. 111), Tampico (p. 543). The parties travel on a special vestibuled train, which serves them as their hotel (except in the City of Mexico) and has the additional advantage of reaching and leaving the stopping-places at convenient hours. Interpreters accompany each party.

Railways, etc. English is generally understood at the railway ticket-offices of the larger towns and by the conductors of the through-trains. Time-tables and 'folders' are also issued in English. The visitor to the parts of Mexico described below will scarcely come into contact with the system of Diligences. Most of the cities have complete systems of Tramways (drawn by mules), all with first-class and second-class cars. The tramways sometimes connect places 10-70 M. apart.

Hotels. Mexican hotels are apt to be poor, and their sanitary arrangements leave much to be desired. The ordinary charges are $2-2½ per day (higher in the City of Mexico). The place of chambermaids is usually taken by 'Mozos', or boys. Small fees are expected and efficacious. Neither soap nor matches are provided in the bedrooms. Wine and foreign beer are dear, native beer and pulque (p. 545) cheap.

Passports. Custom House. Passports are not necessary in Mexico, but may sometimes prove convenient. The custom-house examination is generally conducted courteously and leniently, and scarcely concerns things likely to be in the possession of the ordinary tourist. Articles purchased in Mexico are often liable to duty at the American frontier.

Money. Expenses. The legal unit of the Mexican monetary system is the Peso (dollar), divided into 100 Centavos (cents). The old expressions Medio (6½ c.) and Real (pl. Reales; 12½ c.) are still in constant use, though the coins they represent no longer circulate (dos reales = 25 c., cuatro
Route 107.

MONTEREY.

From Laredo to

reales = 50c., seis reales = 75c., ocho reales = $1). — The cost of a
short tour in Mexico should not exceed $8-10 a day. A Mexican dollar
is generally worth about 50c. American gold. Mexican money may be
bought cheaply in New York, but a fair rate of exchange can be obtained
in the City of Mexico. American money may also be exchanged at the
frontier. No bank-notes should be accepted except those of the Banco
Nacional and the Bank of London, Mexico, and South America. Drafts on
New York banks are a good form in which to carry large sums, and realize
the highest rate of exchange in the City of Mexico.

Language. A slight acquaintance with Spanish will be found of great
service in travelling in Mexico. Vowels have the pronunciation of Con-
tinental Europe; consonants are pronounced as in English, with the follow-
ing exceptions: in the middle of a word b usually sounds like v; e before
c and i = th in thin, before a, o, u, 1, r, and at the end of a word = k;
g before c and i = guttural h; b is silent; ll = ly; j = ch in loch; z = th.
It should be noted that Mexican pronunciation is not quite identical with
that of Spain. The transliterations in these pages do not claim to be more
than approximately accurate.

Postal Arrangements. A list of the insufficiently addressed letters
received by each mail is usually exhibited at the post-office, and in
applying for one of these it is necessary to give its number on the list as
well as the name of the addressee. Letters addressed to the large hotels
in the City of Mexico are delivered at the hotel-office. The postal rates
for domestic letters is 5c. per ½ oz., for letters to the countries of the
Postal Union 5c. per ½ oz. Letters from the U. S. to Mexico are sent at
the U. S. domestic rate (2c. per oz.).

Bull Fights may still sometimes be seen. Persons of delicate sensi-
bilities will, however, do well to avoid these degrading and disgusting
spectacles.

Bibliography. Mexican guidebooks are published by Scribner's Sons,
Appleton, and Hoeck (p. 546). The traveller should be familiar with Pres-
cott's 'Conquest of Mexico'. Other good books are those by David A. Wells,
F. A. Ober, Matias Romero ('Statistical Notes on Mexico'; 1886), and C. F.
Lummis ('The Awakening of a Nation'; 1898). Gen. Lew Wallace's novel
'The Fair God' will also be found interesting. For the antiquities, see
'Report of an Archeological Tour in Mexico in 1881', by A. F. A. Bandelier.

107. From Laredo to the City of Mexico.

810 M. MEXICAN NATIONAL RAILROAD (Camino de Ferro Nacional Mexi-
cano) in 39 hrs. (fare $25.50, U. S. currency; sleeper $9, Mexican currency).

This line affords the shortest and most direct route to the City of
Mexico (from New Orleans 1570 M.) and passes through fine scenery. As,
however, it is a narrow-gauge line, it cannot be traversed by the Ray-
mond vestibuled trains (see p. 537). Baggage from the United States should
be 'checked' to New Laredo, where the Mexican custom-house examination
takes place and luggage is re-checked.

Laredo, see p. 522. The train crosses the Rio Grande del Norte
into Mexico and halts at (1 M.) Laredo Nuevo or New Laredo (440 ft.;
see above; U. S. Con., R. B. Mahone). The first part of the journey
lies through a dreary plain of cactus and mezquite. To the right,
beyond (72 M.) Lampazos (1030 ft.; Rail. Restaurant), rises the
Mesa de los Catujanos (1500-2000 ft.).

168 M. MONTEREY (1790 ft.; Hidalgo, Iturbide, $21½; U. S.
Consul General, John K. Pollard), the capital of the State of Nuevo
Leon, a city of (1895) 56,855 inhab., situated in a beautiful valley,
between the Cerro de la Silla (4150 ft.) on the E. and the Cerro de la
Mitra (3620 ft.) on the W., is frequented as a winter-resort. The
picturesque Episcopal Palace is now occupied by troops. The Topo Chico Hot Springs (Hotel, $2 1/2) lie 3 M. to the N.E. At Monterey we cross the railway from Treviño to Tampico (see p. 541). — Beyond Monterey the train ascends through the narrow valley of the San Juan, amid grand mountain-scenery (to the right, the Sierra de la Paila; to the left, the Sierra Madre, p. 537). — 235 M. Saltillo (5200 ft.; Tomasichi, $2 1/2; Rail. Restaurant; U. S. Con., C. B. Towle), the capital of Coahuila, with (1895) 19,654 inhab., is famous for its manufacture of sarapes (Mexican cloaks). Beyond Saltillo we cross the battlefield of Buena Vista (Feb. 23rd, 1847). At (260 M.) Carneros (6500 ft.) we reach the top of the central plateau of Mexico (p. 537). The line descends a little and runs in a straight direction across a level plain. 370 M. Catorce (Rail. Restaurant, meals $1) is the station for the (8 M.) rich silver-mining town of the same name. A little farther on we cross the Tropic of Cancer and enter the Torrid Zone (pyramid to the right).

478 M. San Luis Potosi (6150 ft.; Grande, Progreso, Louis ville Ho., $2 1/2; Rail. Restaurant, meals $1; U. S. Con. Agent), capital of the state of the same name, a city of (1895) 69,676 inhab., owes its importance to the rich silver-mines in its vicinity.

The city is clean and well kept. Among the chief points of interest are the Cathedral (with a clock given by Philip II. of Spain), the Mint, the Alameda (with statue of Hidalgo, see below), the Plaza Mayor, the Markets, the Governor's Palace, the City Hall, the Palace of Justice and several Churches. The San Pedro Mine should be visited. — Railways run hence to Tampico (p. 543), on the Gulf of Mexico, and to Aguascalientes (p. 543).

564 M. Dolores Hidalgo is named in honour of the patriot Hidalgo (p. 541), who was curé of this parish. — 556 M. San Miguel de Allende (6000 ft.; Allende, $2; Rail. Restaurant), a city of 15,000 inhab., at the base of the Cerro de Montezuma, contains several interesting churches and excellent public baths. It was the birthplace of the patriot Allende (p. 541), for whom it is named. — The train now follows the valley of the Laja (views to the right). Farther on the vegetation becomes more tropical. — 620 M. Celaya (5770 ft.; Solis), a city of 30,000 inhab., at the intersection of the Mexican National and Mexican Central railways (comp. p. 544), is a place of some importance, with fine old churches (Our Lady of Carmen, etc.) and good baths. Dulces (sweetmeats), strawberries, and opals are offered for sale at the station. — 644 M. Salvatierra. — 663 M. Acambaro (6085 ft.; Rail. Hotel & Restaurant) is the junction of a line to Morelia (32,287 inhab.) and Patzcuaro (on a beautiful lake), which is to be extended to the Pacific Coast. The line now turns to the S.E. (left), and ascends through the valley of the Lerma (views to the left). 701 M. Maravatio (6610 ft.); 725 M. Tepetongo (7650 ft.); 757 M. Flor de Maria (8500 ft.; Rail. Restaurant, meals $1). We thread a tunnel and enter the Valley of Toluca.

795 M. Toluca (*Leon d'Oro, Gran Sociedad, $2), the capital of the State of Mexico, is a prosperous and clean-looking city of (1895)
23,648 inhab., splendidly situated in a fertile valley, among lofty mountains, at a height of 8650 ft. above the sea. Its attractions include the State Buildings, fine Markets, interesting Churches, and quaint Portales; while linen 'drawn-work', pottery, and other souvenirs may be purchased.

The ascent of the *Nevado de Toluca (15,155 ft.), a snow-clad volcanic mountain rising to the S., takes about two days (there and back). The view is superb.

The run from Toluca to Mexico reveals some of the finest scenery in Mexico, if not in the world. The train runs towards the E. and beyond the Indian town of (805 M.) Ocoyoacac, seen far below us to the right, begins to ascend the La Cruz Mts. (Sierra Madre; views to the right). We follow the windings of the Rio Lerma. To the right towers the Nevado de Toluca (see above). 809 M. Jajalpa ('Hahalpa'; 8870 ft.). Much maguey (see p. 545) is cultivated in this district. 815 M. Salazar. At (816 M.) La Cima (10,200 ft.) we reach the summit and begin the descent, obtaining magnificent **Views of the Valley of Mexico, with its lakes, the City of Mexico in the centre, and the grand snow-clad volcanoes of Popocatepetl (r.) and Ixtaccihuatl (l.; see p. 549) in the background. At (823 M.) Dos Rios we cross the Rio Hondo by a lofty trestle. Numerous lateral ravines (barrancas) are also crossed. Farther on, Chapultepec (p. 548) is conspicuous to the right. 835 M. Naucalpan. Beyond (838 M.) Tacuba the tree of the Noche Triste (p. 549) is seen to the left.

840 M. City of Mexico (Colonia Station), see p. 545.

108. From Eagle Pass to the City of Mexico.

1000 M. Mexican International Railroad (Ferrocarril Internacional Mexicano) in 42 hrs. (fare $31.25, sleeper $9; from Spofford Junction $32.30, New Orleans $52.70, New York $55.20). This is the most direct standard-gauge line from the East to the City of Mexico. Baggage is examined and re-checked at Eagle Pass (comp. p. 520).

Eagle Pass, a small town of 3000 inhab., lies on the N. or American bank of the Rio Grande. The train crosses the river by an iron bridge, 310 yds. long, and halts at Ciudad Porfirio Diaz, formerly called Piedras Negros (720 ft.; Hotel; U. S. Consul, C. P. Snyder), a Mexican city of about 5000 inhab., in the State of Coahuila. Picturesque Mexican figures, the men in sombreros and scarlet sarapes, the women in blue rebozos, appear at once. — The train ascends steadily towards the great Mexican table-land (p. 537), traversing at first an arid and monotonous desert. Few houses are seen except an occasional hacienda, of stone or adobe, and little vegetation except yuccas, mezquite, and cacti. 25 M. Nava (1065 ft.); 32 M. Allende (1230 ft.); 51 M. Peyotes (1595 ft.); 72½ M. Sabimas (1115 ft.), in a coal-producing district, the junction of a line to (11 M.) Hondo; 82 M. Soledad (1215 ft.); 98 M. Aura (1485 ft.); 123 M. Hermanas (1300 ft.); 148 M. Monclova (1925 ft.; Rail. Restaurant; 10,000 in-
CHIHUAHUA. 109. Route. 541

hab.); 159 M. Castaño (2455 ft.); 181 M. Bajan (2765 ft.); 209 M. Reata (2950 ft.). — 225 M. Treviño (2920 ft.) is the junction of a line to Monterey (p. 538) and Tampico (p. 543).

From Treviño to Tampico, 387 M., Monterey & Mexican Gulf Railway in 32 hrs. — This railway traverses a fertile valley, bounded by the Sierra de Tamuálipas (N.) and the Sierra Madre (S.). At (66 M.) Monterey (p. 538) it intersects the Mexican National Railroad (p. 533). — 90 M. San Juan; 157 M. Linares; 242 M. Victoria; 316 M. Rosillo. — 387 M. Tampico, see p. 543.

At (254 1/2 M.) Jaraí (3750 ft.; Rail. Restaurant), where we may be said to have fairly reached the great Mexican plateau, the line turns to the right (W.) and now runs at nearly the same level. A railway runs hence to Saltillo (p. 539). — 297 M. Paita (3900 ft.); 334 1/2 M. Bola (3575 ft.), at the S. end of the large Laguna de Parras; 350 M. Hornos (3595 ft.), the junction for (14 M.) San Pedro; 369 M. Mata- moros (3650 ft.; U. S. Consul, P. M. Griffith), the junction of a branch-line to (43 1/2 M.) Zaragoza.

At (383 M.) Torreon (3720 ft.; p. 542) we join the Mexican Central Railway. — To the (1090 M.) City of Mexico, see R. 109.

The Mexican International Railway goes on to (560 M. from Eagle Pass) Durango (42,165 inhab. in 1895; Central Hotel, $2 1/2; U. S. Con., W. H. Faulkner), the capital of the state of its own name.

109. From El Paso to the City of Mexico.

1224 M. MEXICAN CENTRAL RAILWAY (Ferrocarril Central Mexicano) in 46 hrs. (fare $61.40 Mex. currency; sleeper $9; return-tickets, valid for 9 months, to City of Mexico, from St. Louis $77, from Kansas City $71.20, from New Orleans $62.85, all U. S. currency). Side-trip tickets are issued, to holders of through-tickets to California, from El Paso to Mexico and back to Eagle Pass via R. 108, or vice versa, $40. This line is the direct route between the city of Mexico and California and the West (comp. R. 101). Baggage is re-checked and examined at Ciudad Juarez (comp. p. 519).

El Paso, see p. 519. The train crosses the Rio Grande to (3 1/4 M.) Ciudad Juarez ('Wahrez'), formerly El Paso del Norte (3800 ft.; Rail. Restaurant; U. S. Con., C. W. Kindrick), with the Mexican custom-house, an interesting old church, and a statue of Juarez (p. 548).

A new railway, opened in 1898, runs hence to the S.W. to (194 M.) Casas Grandes and (155 M.) Terrenas.

Our route at first lies through the State of Chihuahua ('Chee-wah-wah') and offers little of interest. 30 M. Samalajuca (4300 ft.); 95 M. Ojo Caliente (4090 ft.); 112 M. Moctezuma (Rail. Restaurant); 139 M. Gallego (5450 ft.); 194 M. Sauz (5170 ft.). We cross the Chubiscar to —

225 M. Chihuahua (4635 ft.; Casa Robinson, $2 1/2-3; Palacio, $2-2 1/2; U. S. Con., W. W. Mills), the capital of the state of that name, a busy city with (1895) 18,521 inhab., in a hill-girt plain. It was founded in 1539.

The chief object of interest is the fine * Parroquia, or parish-church, dating from 1711-9. Behind the Banco Minero Chihuahuense is a monument marking the spot where Miguel Hidalgo and Ignacio Allende, leaders of the revolution of 1810, were executed in 1811. The patriots were previously imprisoned in the Casa de Moneda (Mint). The Plaza and Alamedas are
pleasant, and the old Aqueduct is interesting. — A day’s excursion may be made to the Santa Eulalia Silver Mines.

Beyond Chihuahua the line descends. We cross the San Pedro at (279 M.) Ortiz, and the Conchos near (326 M.) Santa Rosalia (4020 ft.; 6000 inhab.), with hot springs. — 371 M. Jimenez (‘Heemenez’; 4530 ft.; Rail. Restaurant) is a city of 8000 inhab. on the Florida. The dust on this part of the route is very trying. From (417 M.) Escalon the Mexican Northern Railway runs to (78 M.) the great silver-mining district of Sierra Mojada. — Near (437 M.) Ceballos (3900 ft.) we enter the State of Durango. We now traverse the Mapimi Basin, in which cotton, sugar, maize, and wheat are produced. Beyond (515 M.) Lerdo (3725 ft.), a cotton-trading place of 10,000 inhab., we cross the Río Nazas.

518 M. Torreon (3720 ft.; Rail. Restaurant; U. S. Con. Agent) is the junction of the Mexican International Railway (R. 108). The country traversed is arid and sterile, and sand-spouts are frequently seen. The mountains become higher, one near (562 M.) Jimulco reaching a height of 10,280 ft. Numerous large haciendas are passed. The train ascends steadily towards the top of the great central plateau of Mexico (p. 537). 614 M. Symon (5145 ft.). At (642 M.) Camacho (5400 ft.; Rail. Restaurant) we enter the State of Zacatecas. 680 M. Pacheco; 700 M. La Colorada (6000 ft.); 750 M. Fresnillo (6860 ft.). Beyond (768 M.) Calera (7050 ft.) we begin to ascend rapidly and the scenery becomes very picturesque.

785 M. Zacatecas (8045 ft.; Zacatecano, $2; U. S. Consular Agent), a city of (1895) 40,026 inhab., romantically situated in a narrow ravine, offers several points of interest to the stranger. It is one of the chief centres of the silver-mining of Mexico.

The Market Place, in the centre of the city (reached from the railway station by tramway), presents a very picturesque appearance, with its large fountain, whence the water-carriers fetch their supplies for the city’s use. Near by is the Cathedral (1612-1752), with an elaborately carved façade. The Municipal Palace (with its attractive court-yard) and the Mint are also within easy reach. — A visit may be paid to one of the Silver Reduction Works, in which the processes of reducing the ore are carried on after a highly primitive fashion, but a visit to a silver-mine is more conveniently managed at Guanajuato (p. 543). — A splendid View is obtained from the Bufo, a mass of porphyry rising 500 ft. above the city and crowned with a small chapel, originally dating from 1728 but rebuilt in 1794. On March 2nd, 1871, the Revolutionsary troops were defeated here by the Juarez forces after a sanguinary struggle.

Zacatecas is connected with (6 M.) Guadalupe by a tramway, down which the cars descend by gravity in ½ hr., while they are drawn up again by mules in 1-1½ hr. At Guadalupe is the fine *Church of Nuestra Señora de Guadalupe (1721), with an elaborately decorated interior and a few fair paintings. The Chapel of the Purisima is especially gorgeous. The old convent adjacent contains a College and Orphan Asylum. — Good pottery may be bought at Zacatecas and Guadalupe.

On leaving Zacatecas the train again descends rapidly (seats to the left), affording striking *Views of the Oriental-looking city and the mountains. Numerous mines and smelting works are seen on both sides. The engineering difficulties overcome by the railway both in
reaching and leaving Zacatecas are remarkable. 824 M. Soledad. Several lofty peaks are seen in the distance to the left.

860 M. Agualascalientes (6180 ft.; Plaza, Washington, $2; Rail. Restaurant; U. S. Con. Agent), a pretty little city with (1895) 31,619 inhab. and a large silver and copper smelter, is the capital of the small state of the same name and is widely known for its hot springs.

The pretty Alameda leads to the E. from the station (tramway), which is itself 1 M. to the E. of the city (tramway), to the Hot Springs (ca. 95° Fahr.), each enclosed by a small bath-house (fee about 15 c.). The overflow from the springs is carried off by a small canal skirting the Alameda. The best baths, fed by a conduit from a reserved spring, are close to the railway-station (fee about 25 c.). — Some of the Churches of Agualascalientes are interesting, and the Public Squares are gay with luxuriant vegetation.

From Agualascalientes to San Luis Potosi and Tampico, 415 M., railway in 20 hrs. This division of the Mexican Central Railway passes through some of the finest scenery in Mexico. — 68 M. Satunis, with large salt works. At (140 M.) San Luis Potosi (see p. 539; Rail. Restaurant) we cross the Mexican National Railway. — We now descend gradually by a series of terraces, traversing the "San Isidro" and other beautiful valleys. Beyond (257 M.) Cardenas (3800 ft.; Rail. Restaurant) the line drops abruptly into the Conchas Valley and then penetrates the fine "Tamasopo Canyon," threading many tunnels. 296 M. Rascon (1000 ft.; Rail. Restaurant). Other fine canyons and waterfalls are passed farther on. From (340 M.) Taninui we may visit the interesting Choy Cave, over which the railway passes. — 415 M. Tampico (100 ft.; Hotel Fleming), an old town of 7000 inhab., on the Panuco, 7 M. from its mouth in the Gulf of Mexico, has regular steamboat communication with New York, New Orleans, Mobile, and other ports.

Near (890 M.) Encarnacion (6090 ft.) we cross the Rio Encarnacion and enter the State of Jalisco. 929 M. Lagos (6150 ft.; Progreso), a town with about 13,000 inhabitants. Beyond (946 M.) Pedrito we enter the State of Guanajuato ('Wahnawahto'). Fine scenery.

966 M. Leon (6865 ft.; Hotel de Diligencias, $2), a city of (1895) 90,978 inhab., with manufactures of saddlery and other leathern goods and of rebozos (p. 540), contains a Cathedral and several pretty Plazas. Visitors will notice the fences of the Organ Cactus. — 986 M. Silao (5830 ft.; St. Julian; Ridon; Rail. Restaurant), a town of 15,000 inhab., with handsome churches and gardens.

From Silao a branch-railway runs through a cañon (11 M.) Marfil, whence a tramway leads along a narrow gorge to (3 M.) Guanajuato (6835 ft.; Union, $2; U. S. Con. Agent), a highly interesting silver-mining city, founded in 1554. Pop. (1895) 39,337. The houses cluster in the bottom of the ravine or cling to its sides, while the fortress-like smelting-works add to the general picturesqueness. Above the town rises a large square rock (view), forming a conspicuous landmark for many miles round. The chief source of interest in and near Guanajuato are the Silver Mines, including the Vela Madre, said to be the richest vein of ore in Mexico. The total annual output is now about 1,250,000 l. The mines are more easily visited than those in other parts of Mexico, being entered by stone stairways; and orders of admission may be obtained from the Administrador. The Reduction Works are also interesting; almost all are worked by horse or mule power, with the primitive methods of 300 years ago. A visit may be paid to the large Alhondigo de Granaditas, dominating the city and now used as a prison. The Teatro Juarez is one of the handsomest theatres in America. Other points of interest are the churches, numerous handsome private residences, and fine public and private gardens. The water-carriers bear curious long slender water-jars (almost peculiar to Guanajuato).

The district now traversed is fertile and diversified. At (1005 M.)
Irapuato (5765 ft.; Hot. Ferrocarril) fine fresh strawberries are offered for sale every day in the year at the station (25-50 c. per basket).

From Irapuato to Guadalajara, 161 M., railway in 7½ hrs. This line runs through the valley of the Rio Lerma, one of the most fertile districts in Mexico, and is to be continued to the Pacific coast. The large Lake Chapala lies a little to the S. of the line, but is not visible from it. — From (146 M.) El Castillo a tramway runs to (4 M.) the beautiful "Falls of Juanacatlan ("Wahucatlan"), on the Lerma, 70 ft. high and 600 ft. wide. Close by is a cotton-mill for 1000 operatives.

161 M. Guadalajara ('Wahdalahara'; 5055 ft.; Cosmopolita, $ 2; Schroeder's Private Hotel, Calle del Carmen 19; U. S. Con. Agent), the capital of Jalisco (p. 543), is a rich and progressive place with 83,870 inhab. and manufactories of fine pottery, rebozos, cotton, silk, and other articles. It is cleaner and more regularly laid out than most Mexican cities and contains many points of interest for the stranger. Near the centre of the city stands the Cathedral, a fine edifice completed in 1618, with a dome and two lofty towers. In the sacristy is an Assumption ascribed to Murillo. To the S. of this, abutting on the Plaza de Armas, is the Bayrario (1808-43). On the E. side of the same square is the Governor's Palace, while on the S. and W. are the Portales de Cortazar and de Bolivar, containing many of the best shops. — The Church of San Jose, in the Plaza of Nunez, is a gorgeous modern edifice, elaborately adorned with gilding and painting and said to have cost $1,000,000. — On the N. side of the city is the interesting Hospital de Belen, and on the E. side, not far from the pretty Alameda (military music), is the huge "Hospicio de Pobres (1000 inmates), with its beautiful flower-filled 'patios' and departments for men, women and children (incl. a Kindergarten and a cecchita), the deaf and dumb, and the blind ('drawn work' and other articles for sale). On the opposite side of the town is the Penitentiary, on the radiating principle (visitors admitted). The "Paseo, running to the S. from the Alameda, affords a fine walk or drive. — Other important buildings are the Bishop's Palace, the Mint, the City Hall, and the Teatro Degollado, one of the finest in Mexico. — San Pedro and other points in the suburbs are also interesting.

Beyond Guadalajara the line now goes on to (55 M.) Ameca (Hot. Americano).

1017 M. Salamanca is famous for its gloves. Beyond (1043 M.) Celaya (5770 ft.; 30,000 inhab.), famous for its dulces or sweetmeats (15-50 c. per box), we cross the Mexican National R. R. (R. 107), and beyond (1060 M.) Mariscala we enter the State of Querétaro.

1071 M. Querétaro (5906 ft.; Hot. del Jardin), a picturesque city with (1895) 32,790 inhab., is pleasantly situated in a fertile valley. The domes and towers of numerous churches rise above the other buildings, the most interesting being the Cathedral and Santa Clara. Opals are found in great abundance in the neighbourhood.

Perhaps the chief interest of Querétaro is its connection with the last days of the unfortunate Emp. Maximilian, who was besieged here in 1867 by the Republican troops under Escobedo. The city surrendered on May 19th, and a month later Maximilian, with his adherents Miramon and Mejia, was shot on the Cerro de las Campanas, a hill to the W. of the town. The spot is now marked by three monuments and affords a fine "View of Querétaro, embowered in greenery. The Capuchin Convent, in which Maximilian was confined before his execution, is now a private house, but visitors are admitted to his room.

In leaving Querétaro the line passes under the fine *Aqueduct constructed in 1726-38 by the Marquis de Villar del Aguila to provide the city with water. Some of the arches are nearly 100 ft. high.
To the left, 2 M. from Querétaro, in a romantic ravine, is the large *Hercules Mill*, the largest cotton-mill in Mexico (1800 workmen).

On this part of the journey we see immense fields of the *Maquey or Century Plant* (*Agave Americana*), cultivated by the Mexicans for the sake of its sap, which is converted into the national beverage *Pulque*. The plants are sometimes 10-12 ft. high. A spiritual liquor named *Mescal* is distilled from the leaves of the *maquey*, and another (*Tequilo*) from its roots, while its fibre and thorns are also turned to commercial uses.

Beyond (1106 M.) *San Juan del Rio* (6245 ft.; Rail. Restaurant; 15,000 inhab.) the line ascends rapidly, passing the plain of (1124 M.) *Casadero* and reaching its highest point (8135 ft.) just beyond (1148 M.) *Marques*. The descent hence to Mexico is very fine. — 1174 M. *Tula* (6660 ft.; Hidalgo, Montezuma), a town of about 1500 inhab., is believed to have been founded by the Toltecs and contains interesting remains ascribed to that people (guides at the hotels). — Beyond (1185 M.) *El Salto*, where we join a branch of the Mexican National R. R., we skirt the *Tajo de Nochistongo* (right), a canal-cutting made by the Spaniards in 1607-8 to drain the lakes in the Valley of Mexico (comp. p. 546). It is 12½ M. long, 150-165 ft. deep, and 260-330 ft. wide. The majestic snow-capped peaks of *Ixtacihuatl* and *Popocatepetl* (p. 549) come into view ahead of us. The line again ascends somewhat. 1195 M. *Huehuetoca* (7410 ft.).

1224 M. *City of Mexico*, see below.

### 110. The City of Mexico.

**Railway Stations.** *Mexican Central Station* and *Mexican Railway Station* (Vera Cruz), Plazuela de Buena Vista, on the W. side of the city; *Mexican National Station*, Colonia Arquitectos, to the S.W.; *Interoceanic Station*, San Lazar, to the E.; *Ixtotl Station* (Hidalgo & N.E. Railway), Peralvillo, to the N.E.

**Hotels** (comp. p. 537). *Sanz Hotel*, Calle de la Mariscal, a late and luxuriously equipped house with all modern conveniences, from $7, R. from $3; *Coliseo*, Calle del Coliseo 10, R. from $4.50; *Iturbide*, Calle de San Francisco, a large house enclosing a roomy central court, once the residence of the Emp. Iturbide, R. $4.5-5 (elevator); *Grand Hotel*, Calle Oriega 12, R. $1-3; *Hotel del Jardin* (Hardeen), Calle Primera Independencia y Letran, well spoken of, $3-8; *Opera*, Calle de Vergara; *San Carlos*, Calle del Coliseo, R. $1-3; *Humboldt*, $8; *Guadalupe*, R. $1-3; *American*, *Gillow*, $1-3; *Comonfort*, $1-1½. — *Restaurants* at the above hotels; *Restaurant Austria*, Cinco de Mayo 6; *Café de Paris*; *Recaiter*; *Concordia*; *Restaurant Schiller*, Coliseo Nuevo, opposite the Teatro Principal; *Café Colon*, Paseo de la Reforma; *Rich's Chop House*, Bethamitas St.; *Maison Dorée*; *Fonda San Agustin* (one of the best of the Mexican fondas, with genuine native cooking); *Eliseo*, *San Cosme*, garden restaurants (so-called 'Tivolis'), easily reached by the San Cosme tramway, meals $1/4-1/2.

**Tramways**, drawn by mules, intersect the city in all directions (fare in first-class cars 6 c.; to suburban points 10-25 c.). (It is expected that one of the lines will soon be equipped with electricity.) — *Cars* are divided into three classes, denoted by blue, red, and yellow flags; fares 1 c., and 50 c. per hr., 50 c., 40 c., and 25 c. per 1/2 hr. or fraction thereof or per drive. The fare from the railway-stations to the hotel, including hand-baggage, is about the same as the hourly rate. Double fares after 10 p.m.

*Baedeker's United States. 2nd Edit.*
and on Shrove Tuesday, All Souls Day, and Battle of Flowers Day; fare and a half on Sundays and other holidays.

**Baths.** *Baños del Factor,* Factor St.; *San Agustín,* San Agustín Hotel; *San Felipe de Jesús,* in the street of that name; *Vergara,* Vergara St.; in the Iturbide Hotel (25-38 c.; p. 545); *Paseo,* Paseo de la Reforma (25 c.-$1).

**Theatres.** *Teatro Nacional,* see p. 548 (good performances of opera in winter): *Teatro Principal,* Calle del Coliseo; *Arbeu,* Calle de San Felipe Neri; *Hidalgo,* Calle de Cocheras. — *Orrin’s Circus,* Plaza Villamil.

**Shops.** (English spoken at most of the best). Mexican curiosities, photographs, guide-books, maps, English books, periodicals, & newspapers: *Hocking,* Primera Calle de San Francisco 12; *Spaulding,* Calle de Cadena 23; *Sonora News Co.,* First Estaciones 3; *Bell,* Primera Calle de San Francisco 1; *Art & Curio Co.,* Puente San Francisco 16; *American News Agency,* Puente San Francisco 5. Other good shops are in the Calle de los Plateros, the Calle de San Francisco, the Coliseo Nuevo, and the Calle de Cinco de Mayo.

— *The Mexican Herald* and *The Two Republics,* two daily papers in English (5 c.), contain many useful items for the tourist, including daily lists of letters lying at the G. P. O. for English and American visitors (comp. p. 538). — *Unión de Ciclistas Mexicanos* (president, Thos. R. Crump).

**Streets.** The streets of the city of Mexico were officially re-named in 1889. The town is divided into four quarters by the long street called *Avenida Oriente* and *Av. Poniente,* running from E. to W. past the N. side of the Plaza de la Constitución and the Alameda, and by the *Calle Norte* and *Calle Sur,* running from N. to S. and intersecting the Avenida one block E. of the Alameda. All streets running E. and W. are called *Avenidas* (those to the E. of the dividing line *Av. Oriente,* to the W. *Av. Poniente*), while all the streets running N. and S. are called *Calles* (those to the N. of the central *Avenida Ca. Norte,* to the S. *Ca. Sur*). Each street has a number. The old names, however, were so pertinaciously retained by the inhabitants that they have been restored to their places, alongside the new ones. The latter are seldom used.

**Post Office,** at the N. end of the Palacio Nacional (p. 547); branch office, Calle San Juan de Letran.

**British Minister,** Sir Henry Nevill Dering, Puente Alvarado 15; consul, Mr. Lionel Carden, Calle de Gante 11. — *U. S. Minister,* Hon. Powell Clayton, Calle Buenavista 4; U. S. Consul General, Mr. A. D. Barlow, Calle San Diego 6.

**Protestant Churches.** Services in English are held at Calle de Gante 5 (Meth. Epis., 10.15 a.m. and 7.30 p.m.), *Christ Church,* Fourth Calle de la Providencia 5 (Epis., 11 a.m. and 8 p.m.), and *Union Church,* Calle de San Juan Letran 12 (11 a.m. and 8 p.m.).

**Mexico** (7400 ft.), the capital and by far the largest city of the Mexican Republic, lies in the centre of the Valley of Mexico, in part of the former bed of Lake Texcoco. It contains (1895) 344,877 inhab., chiefly full-blooded Indians or mestizoes, and including about 3000 natives of the United States and Great Britain. The streets are generally wide and electrically lighted. Most of the buildings are of stone, and several of the public edifices are very handsome. The public squares and gardens and the residential suburbs are very attractive. The climate is equable (50-70° Fahr.).

The Spanish city of Mexico was founded in 1522 on the site of the ancient Aztec Tenochtitlan, the population of which is placed by tradition at from 800,000 to 500,000. Its growth has been steady and rapid. In 1600 it contained 15,000 inhab., in 1746 it had 90,000, and in 1800 it had about 120,000. The commerce of the city is mainly in transit. Its manufactures include cigars, gold and silver work, pottery, feather work, saddlery, paper, religious pictures, and hats. Numerous ineffectual attempts have been made to drain the valley of Mexico (comp. p. 546), but it is hoped that the great *Drainage Canal,* completed in 1898 at a cost of $10,000,000, will
prove a radical cure. It is 30 M. long and crosses the mountains by a tunnel 6 M. in length. Its width at the top varies from 45 ft. to 168 ft. The canal is crossed by numerous bridges of stone and iron.

The **Cathedral** (Church of the Asuncion de Maria Santisima) stands on the N. side of the Plaza de la Constitucion of Plaza Mayor, 5-10 min. walk from the Sanz and other chief hotels. This edifice, which occupies the site of the chief Aztec temple (Teocalli), was begun in 1573 and finally dedicated in 1667. The towers, 218 ft. high, were not completed till 1791. It is 425 ft. long (from N. to S.), 200 ft. wide, and 180 ft. high. In style it is similar to the Spanish Renaissance edifices of the same period.

The Interior, which is in the Doric style with traces of Gothic, has an imposing effect in spite of its huge and incongruous modern altars and the wooden flooring. The fine **Dome** is adorned with paintings. The **Choir** occupies the centre of the church and has richly carved stalls. The aisles are rejoined by rows of chapels, the most interesting of which are the Capilla San Felipe de Jesus, with the tomb of the Emp. Iturbide, the Cap. de las Reliquias, with paintings of martyrs by Juan de Herrera, and the Cap. San Pedro. The **Sacristy** and the **Chapter House** also contain interesting paintings. The heads of Hidalgo, Allende, Jimenez, and Aldama (comp. p. 541) are interred below the Altar of los Reyes, in the apse. — The visitor should not fail to ascend one of the towers for the sake of the *View of the city (small fee).

On the E. the Cathedral is adjoined by the **Sagrario Metropolitano**, the first parish-church of the city, dating in its present form from 1749-69 and restored in 1858. It is in the florid style named after the Spanish architect Churriguera (close of 17th cent.). — In front of the Sagrario is the Martinez Monument, showing the geographical position of the city, the varying levels of Lake Texcoco, etc.

The centre of the Plaza Mayor is occupied by the pretty **Zocalo Garden**, where a band generally plays in the evening. Almost all the tramway-lines start in this square.

On the E. side of the Plaza Mayor stands the huge **Palacio Nacional**, 675 ft. long, containing many of the governmental offices (interior open to visitors). The chief points of interest are the large Hall of the Ambassadors (with portraits of Mexican celebrities) and the Senate Room. — On the S. side of the Plaza are the Diputacion or Palacio del Ayuntamiento (City Hall) and the Portal de las Flores (shops). On the W. side are the Portales Mercaderes. — To the S.E. of the Plaza is the chief **Market** of the city.

Behind the Palacio Nacional and entered from the Calle de Moneda is the **National Museum** (open daily, 10-12). The most valuable and interesting collections are the **Mexican Antiquities** (from Yucatan, etc.), including the famous Aztec Sacrificial Stone and the **Aztec Calendar**. The **Historical Collections** are also of interest. See Catalogue (Engl. trans. by W. W. Blake).

A little farther to the E., in the Calle Amor de Dios, is the **Academy of San Carlos** (Museum of Fine Arts; 10-12), with good Italian and Flemish paintings and interesting collections of old and modern Mexican works (**Las Casas protecting the Indians**, by Felix Parra, etc.).
To the W. of the Cathedral, in the Calle del Empedradillo, is the 
Monte de Piedad, or National Pawn Office, founded in 1775. 
Valuable objects may often be procured here at low prices.

The Calle de Plateros (now Avenida Oriente 4), forming with 
its prolongation the Calle de San Francisco (or A.V. Poniente 4), 
the principal business-street of the city, leads to the W. from the 
Plaza Mayor to (1/2 M.) the *Alameda, a beautiful public garden, 
with fine beeches and a great variety of flowering trees and shrubs 
(band frequently; fashionable promenade on Sun. forenoon). — The 
Calle de Cinco de Mayo (or A.V. Poniente 1) running parallel with 
the Calle de San Francisco on the N., is also a fine street. It ends 
on the W. at the National Theatre (p. 546).

Near the Buena Vista stations (p. 545) and adjoining the Guerrero Garden is the Church of San Fernando, the interesting cemetery 
attatched to which contains the graves of Juarez (fine monument), 
Maramon (p. 544), Mejia (p. 544), Zaragossa, Guerrero, Comonfort, 
and other eminent Mexicans.

Among the numerous other interesting buildings in the city, of which 
but a scanty selection can be named here, are the Biblioteca Nacional 
(275,000 vols.), in the Calle St. Agustin, a little to the S.W. of the Plaza 
Mayor; the Casa de Moneda (Mint), in the Calle de Apartado; the Mineria 
(School of Mines), in the Calle de San Andres (29-51), near the Alameda 
(numerous meteorites in the court and portico); the House of Congress, in 
the former Teatro Iturbide, at the corner of the Calle Primera del Factor 
and the Calle de la Canoa (large new one to be erected); the Church of 
Santo Domingo, in the plaza of the same name, a little to the N. of the 
Cathedral; the School of Medicine, opposite the last, occupied by the Inquisition 
for 250 years; the Conservatory of Music, in the Calle del Universit; 
the huge new City Hospital; the new Prison; the Church of La Santisima, 
with its finely carved façade, 1 1/4 M. to the E. of the Cathedral; and nu-
merous other churches and charitable institutions.

The fashionable drive of the Mexicans is the beautiful *Paseo 
de La Reforma, which begins near the Alameda and runs to the 
S.W. to (2 M.) Chapultepec (see below). At the entrance is an 
equestrian statue of Charles IV., and the ‘Glorietas’, or circles 
(400 ft. in diameter), which occur at frequent intervals further on, 
are adorned with monuments to Columbus, Guatemotzin (the last In-
dian Emperor), Juarez, Friar Servando Teresa de Mier, Gen. Juan 
Zuasua, etc. The Paseo commands fine views of Popocatepetl and 
Ixtaccihuatl (p. 549). At the end of it is a small park with a collect-
on of native animals.

Environs of Mexico.

The chief point of interest in the immediate neighbourhood of the City 
of Mexico is the Palace of Chapultepec, finely situated on a rocky hill 
at the end of the Paseo de la Reforma (see above; also reached by the 
Tacubaya tramway from the Plaza Mayor, 10 c.). Orders of admission 
(free) may be obtained at the Consulates or through the Hotel Interpreters. 
The present building, which occupies the site of Montezuma’s Palace, dates 
from 1783-85, with later additions. It is occupied by President Diaz and 
by the National Military School (320 cadets). The fine old cypresses in the 
grove surrounding the palace (Cupressus disticha) reach a height of 120 ft. 
and a girth of 30-40 ft. A monument commemorates the cadets who fell.
in the defence of the palace against the Americans in 1847. Beyond the hill is the battlefield of Molino del Rey (Sept. 8th, 1847). The "View from the ramparts includes the city and valley of Mexico, with Popocatapetl and Ixtaccihuatl in the background. — From Chapultepec the excursion may be extended (tramway 1 1/4 M.) to Tacubaya, with the National Observatory, two churches, a secularised convent, and beautiful private "Gardens.

About 21/4 M. to the N. of the city (tramway from the Plaza Mayor; 10 c.) is Guadalupe Hidalgo, with the sanctuary of the Virgin of Guadalupe, the patron-saint of Mexico and more especially of the Indians. The Virgin is believed to have appeared to an Indian, Juan Diego, in 1531, on the adjoining hill of Tepeyacac. At the foot of the hill is the large church of Nuestra Señora de Guadalupe, completed in 1709, containing a miraculous picture of the Virgin, imprinted on Diego's tiña (blanket). At the top of the hill is the Capilla del Cerrito, and close by is another chapel, covering a holy (chalychate) spring. The singular monument on the hill was erected by a grateful seaman.

The curious "Chinampas or Floating Gardens, near the villages of (2 M.) Santa Anita and (3 M.) Ixtacalco, are reached by the Viga Canal, leading to the S. from the city (tramway from the Plaza to the Canal 6c.; boat to Santa Anita and back about $3/4-1, to Ixtacalco 3 2). This is a highly interesting trip and should be made at least as far as Santa Anita (most varied life seen on Sun.). The boats are a kind of rude parody of the Venetian gondola. A visit may be paid on the way to the Hacienda of Don Juan Corona, containing a collection of relics and a charity school. The 'floating gardens' are now small pieces of ground separated by narrow canals and used for growing vegetables. The canal ends at (8 M.) the Lago de Xochimilco.

At Popotla, 21/2 M. to the W. of the city (tramway from the Plaza; 12 c.), is the famous "Arbol de la Noche Triste, or Tree of the Dismal Night, under which Cortes is said to have wept on the night of the expedition of the Spaniards from Mexico (July 1st, 1520). It is a kind of cypress (see p. 548). The road to it passes the Tlaxpana Aqueduct. The tramway goes on to Tacuba and (2 1/2 M. farther) Atzcapotzalco (18 c.).

Tramway excursions may also be made to Dolores, Mixcoac and the Castaneda, La Piedra, San Angel, Tlalpam, and other points.

The two magnificent snow-capped volcanoes of Popocatepetl (17,780 ft.) and Ixtaccihuatl ("Istacwiuatl"; 16,060 ft.) are conspicuous features in the environment of Mexico. The former is sometimes ascended from Ame cameca, on the Interocenatic Railway; but the ascent is arduous and should not be attempted except by experienced mountaineers in good condition. Guides and horses may be obtained in Amecameca, but the bulk of the provisions should be brought from Mexico. The trip takes 2-3 days and costs about $40 for a single traveller and $25 for each member of a party.

From Mexico to Cuernavaca, 75 M., Mexico, Cuernavaca, & Pacific Railway in 4 1/2 hrs. This line (departure from the Mex. Central Station) passes through some charming scenery, and the trip is well worth making. — 8 M. Tacubaya (see above). From (18 M.) Contreras the train ascends rapidly along the mountain-side. Beyond (3 M.) Ajusco we pass through a great cut (magnificent retrospect) and reach the vast forest of the Monte de Huiztliac. At (30 M.) La Cima we begin the descent, enjoying numerous fine views. 47 M. Tres Marias. — 75 M. Cuernavaca is an interesting old town of (1935) 8554 inhab., with the Palace of Cortez (now the police-station), a church of 1529 (with an old clock given to Cortez by Charles IV.), and the beautiful garden of La Borda.

Other excursions by railway may be made to Texcoco (25 M.; Interocenatic Railway) on the site of the ancient city of the Chicimecs, with Aztec remains; to Toluca (see p. 539); to Orizaba, Cordoba, or Paso del Macho (see pp. 551, 552); to San Juan Teotihuacan (p. 550); to Puebla (p. 550); to Oaxaca (p. 551), etc.

From Mexico to El Paso, see R. 109; to Laredo, see R. 107 to Eagle Pass, see R. 108; to Vera Cruz, see R. 111.
111. From the City of Mexico to Vera Cruz.

263 M. Mexican Railway (Ferrocarril Mexicano) in 11½ hrs. (fare about $12-14). Only 33 lbs. of luggage are allowed free on this railway. Visitors to Mexico should at least make a trip over this railway as far as Orizaba or Paso del Macho for the sake of the magnificent scenery in the descent from the Mexican Plateau to the coast-level. Views to the right.

City of Mexico, see p. 545. The train ascends to the N. and N.E., passing the new Custom House (right), Guadalupe (p. 548; left), and Lake Texcoco (right), and farther on crosses immense plantations of 'maguey' (see p. 545). Popocatepetl and Ixtaccihuatl are seen to the S. — 27 M. San Juan Tetzihuacan, with two interesting 'Teocallis', or pyramids, dedicated to the Sun and Moon and believed to antedate the Toltecs (seen to the left, about 2 M. from the railway). The former is 180 ft. high, with a base measuring 680 ft.; the other is smaller. — 34 M. Otumba was the scene of a crucial battle between the Spaniards and Aztecs (July 8th, 1520). 48 M. Irolo (8045 ft.) and (37 M.) Apam are two of the chief centres of the trade in 'pulque' (p. 545). Beyond Apam we pass from the State of Hidalgo to that of Tlaxcala. Near (77 M.) Guadalupe (8830 ft.) Mt. Orizaba and the Malintzi are visible to the S.E. — 86 M. Apizaco (Rail. Restaurant) is the junction of a branch-line to Puebla.

From Apizaco to Puebla, 30 M., railway in 1½ hr. — Good views are obtained of the Malintzi (13,460 ft., left) and, in clear weather, of Popocatepetl, Ixtaccihuatl, and Orizaba. From (10 M.) Santa Ana we may make an excursion by tramway to (5 M.) the ancient city of Tlaxcala, with interesting churches, relics of Cortez and other early Spaniards (in the Casa Municipal), etc. — Beyond (23 M.) Panaocola the pyramid of Cholula (see below) is seen to the right.

30 M. Puebla (7200 ft.; Diligencias, Universal, § 2; U. S. Con. Agent, Mr. James R. Hardy), the capital of the State of the same name, with (1895) 91,917 inhab., was founded in 1531 and is one of the most attractive cities in the country. The use of glazed and coloured tiles in external and internal decoration is a characteristic feature. Its most interesting products for tourists are the articles made of Mexican onyx, baskets and mats of coloured straw, and pottery. The Cathedral, dating from the middle of the 17th cent., with later additions, is scarcely inferior to that of Mexico in size and importance, while its interior is more richly decorated. It is in the Spanish Renaissance style, with a central dome, barrel vaulting, and two lofty towers (view). Among the points of interest in the interior are the onyx decorations, the marquetry work, the paintings, the tapestry, the altars, and the organ-cases. — Other interesting churches are those of San Francisco, La Compañia, and Nuestra Señora del Carmen. — Near the railway station is a large new Penitentiary. — The Paseo along the Río Atoyac affords a pleasant walk. — A visit should be paid to Fort Guadalupe, on the hill where took place the famous battle of the Cinco de Mayo (1862). The fort commands a splendid View, including Mts. Popocatepetl, Ixtaccihuatl, Orizaba, and Malintzi.

About 8 M. to the W. of Puebla (railway) is Cholula (6910 ft.; 5000 inhab.), with some interesting churches and the famous Pyramid of Cholula, an artificial mound of sun-dried brick and clay, 204 ft. high, with a base about 1000 ft. square (approximately). It is built in terraces, three of which are distinctly recognizable. The top, consisting of a platform 165 ft. square, crowned by the Church of the Virgin de los Remedios, is reached by a winding stone-paved road, ending in a flight of steps. The View is very fine. The construction of the pyramid is ascribed to the Olmecs or Toltecs, but its date and purpose are obscure.
From Puebla to Oaxaca. 228 M., Mexican Southern Railway (Ferrocarril Mexicano del Sur), in 13 hrs. (one train daily in each direction; return-fare $15, from Mexico City $20.50; tickets available for 30 days). This line traverses one of the finest districts in Mexico, the greater portion lying amid tropical scenery, though the termini are both in the temperate zone. — 11 M. Amozoc is the highest point on the line (7500 ft.). Beyond a beautiful valley affording glimpses of Malinche and other volcanoes and commanding a distant view of Popocatepetl (p. 549), the organ-cactus trees become a prominent feature, and the prickly pear, mesquite, huisache, and lechugulilla gradually give place to date-palms and plantains. — 79 M. Tehuacan (Hot. del Jardín, English spoken, § 2; Gran Hotel Continental, § 2), a beautifully situated and frequented resort, with mineral springs and baths resembling those of Carlsbad. — At (112 M.) Venta Salada the first sugar-cane plantations are reached. 121 M. San Antonio. The train now enters the savage Cuez Cañon, rivalling the canyons of Colorado. 146 M. Quilotpec is the lowest point on the line (1650 ft.); and at (159 M.) Tomelín (dinner station) begins the steep ascent. We mount through the rapidly changing vegetation of the beautiful Tomelín Cañon, and at (200 M.) Las Sedas (6200 ft.) find ourselves among pine-woods. — 228 M. Oaxaca (pron. ‘Wahaka’; several hotels), an ancient historical city with (1895) 32,641 inhab., is one of the most flourishing in Mexico. It was the birthplace of Presidents Juárez (p. 548; monument) and Porfirio Díaz (1830). Carriages and horses may be obtained here for numerous excursions in the vicinity, including those to (20 M.) the celebrated ruins of Mitla (good accommodation a a hacienda) and to Monte Albán. Cortez took the title of Duke of Oaxaca from this valley.

137 M. San Andrés is the starting-point for the difficult ascent of *Mt. Orizaba or Citlatepetl (18,245 ft.), now ascertained to be the highest mountain in Mexico and probably second to Mt. Logan alone among the peaks of N. America (comp. p. 536). The mountain is seen to the left. — At (152 M.) Esperanza (7980 ft.; Rail. Restaurant) begins a very rapid descent, to surmount which trains coming in the reverse direction require the aid of double-headed Fairlie locomotives. The scenery on this portion of the line is very grand, and its engineering is very remarkable. The vegetation becomes of tropical richness as we near the tierra caliente, or hot lands of the coast, including orange, lime, citron, banana, and pomegranate trees, sugar cane, palms, coffee plants, and a great variety of brilliant flowering trees and shrubs. — Beyond (156 M.) Boca del Monte (7925 ft.), where we look down into the valley 3000 ft. below us (right), the train runs along a terrace on the mountain-side, threading several tunnels and crossing several bridges. 166 M. La Bota. At (169 M.) Maltrata (5550 ft.) we reach the smiling valley of La Joya. A little farther on we pass the wild gorge named the *Barranca del Infiernillo (‘Little Hell’), with the Aroyo de Maltrata 600 ft. below us. Near Orizaba we round the Cerro del Borrego, where a small French force repulsed a large number of Mexicans in 1862. — 181 M. Orizaba (4090 ft.; Hotel Colon, $3; Hotel Achotequi, $2; La Borda, Diliencias, $2; Restaurant at the station, good native beer), a quaint little town of 15,000 inhab., lies in a valley surrounded by mountains and contains some interesting churches, with numerous examples of the work of the local painter Barranco. Excellent fruit may be bought here very cheaply. The reed-thatched
huts of this region are thoroughly tropical looking. An excursion may be made by carriage or on horseback to the waterfall of Rincon Grande. — Beyond Orizaba we cross the fine *Ravine of the Metlac by a bridge 92 ft. high, and other bridges and tunnels are passed (good engineering). 192 M. Fortin; 197 M. Córdoba (2710 ft.; fine fruit); 210 M. Atoyac (1510 ft.). A little farther on are the *Falls of the Atoyac. 216 M. Paso del Macho (1500 ft.).

Beyond this point the scenery is uninteresting, and this may be made the turning-point for those who do not intend to take ship at Vera Cruz. Near (237 M.) Soledad we cross the Jamapa by a long bridge. 264 M. Tejeria.

263 M. Vera Cruz (Diligencias, $2 1/2; Hotel de Mexico, $2; U. S. Con., W. W. Canada), a seaport on the Gulf of Mexico, with (1895) 88,993 inhab., lies in a dreary sandy plain and contains comparatively little of interest to the tourist. Its commerce has declined since the opening of railway communication with the United States. The climate is hot and very unhealthy in summer.

Steamers ply regularly from Vera Cruz to New York, New Orleans, Galveston, and other American ports; and good sailors may prefer one of these routes in entering or leaving Mexico.

From Vera Cruz to Jalapa, 82 M., Interoceanic Railway of Mexico in 5 hrs. — Jalapa (1395 ft.; *Gran Hotel; *Veracruzano, Mexicano, $2), a quaint old city with (1895) 18,173 inhab., beautifully situated among the mountains, is the capital of the State of Vera Cruz and, perhaps, the most charming summer-resort in Mexico, with a cool and refreshing climate. Many delightful excursions can be made from it. Jalap derives its name from this city. The women of Jalapa are distinguished for their beauty.
